Mr. KING. Mr. President, will the Senator yield?

Mr. BRUCE. In one moment; let me make just one remark, and then I will gladly yield to the Senator. I merely wish to say that I hope that those figures buttress up the conclusions which I have reached, among other reasons, because it is a fact, if not known to all the Members of the Senate yet known to me and to the people of Maryland and to the members of the American Legion throughout the country, that one of the American soldiers who bore with the very highest degree of gallantry the burdens of the World War was my colleague, Mr. TYDINGS, who has just produced those figures. Beginning in the American Army as a private in a machine-gun company, he rose by his splendid gallantry and rare intelligence to be a lieutenant colonel at the close of the war.

Now I yield to the Senator from Utah.

Mr. KING. I want to ask the junior Senator from Maryland whether, in the tables he has presented, he has shown that for the next fiscal year the United States has appropriated substantially $800,000,000 for the Army and the Navy, and that there is before us a bill, which will probably pass, calling for an appropriation of $300,000,000 more for new construction——

Mr. WALSH of Massachusetts. Naval construction.

Mr. KING. Naval construction; and probably another bill will pass for modernization, adding from twelve to twenty-five million dollars.

Mr. TYDINGS. In answer to the Senator's question, I will say that at the time this table was prepared it showed that the United States for the year 1927—the year taken in all countries—had appropriated $679,709,000 for military defense purposes. I have not added the figures of 1928 to that, because I took the same year for every country in the world in order that the figures might be comparable.

Mr. KING. I want to say to the Senator that we are emphasizing our desire for peace and supporting in a magnificent way the efforts of the Secretary of State for peace, by the President recommending an appropriation of $740,000,000 for the Navy for new construction, and appropriating for the Army and the Navy substantially $800,000,000 this year, and at least $300,000,000 for new construction; so that we are contributing materially to world peace by appropriating this year and authorizing substantially $1,000,000,000 for the Army and the Navy.

Mr. REED of Pennsylvania. Mr. President, does not the Senator think that the probability of peace in Washington is increased by every additional policeman that is put on the force?

Mr. KING. Mr. President, if the Senator means to imply by that——

The PRESIDING OFFICER. Does the Senator from Maryland yield; and if so, to whom? The Senator from Maryland has the floor.

Mr. KING. I beg the Senator's pardon.

Mr. BRUCE. I do not want to be too chary of my privilege; I simply wish to tell the Senator from Utah, my friend Mr. SMOOT, who has done me the honor to listen to me so patiently another story illustrating just what sort of treatment we might have received if the spirit of Bismarck had had its way at the close of the World War.

This story was told to me some years ago by a friend of mine who heard it in Germany. I do not think that it has ever crept into print. When Bismarck had his interview with the representative of the French Government—I forget just at the moment who it was, whether it was Olivier or not; probably the Senator from Pennsylvania can tell me—for the purpose of fixing the terms of the French indemnity, and mentioned the amount that he required, Olivier, or whoever it was, replied, "Why, do you realize that a man attempting to count such a sum of money as that could hardly count it all if he had been counting from the birth of Christ down to the present day?" Turning to a man of Jewish descent, a skillful accountant that he had rought along with him, Bismarck rejoined, "Oh, yes; but I have been so prudent as to bring along with me a fellow whose ancestors were counting money long before the birth of Christ."

Mr. TYDINGS. Mr. President, I should like to say, in further answer to the question asked by the Senator from Utah, that

France is shown to have a standing army of 727,413 men. That is, one out of every 56 men, women, and children in that country is in the active standing army.

Italy has a standing army of 380,448 men—one out of every 111 men, women, and children in that country.

Spain has a standing army of 272,787 men. One out of every 80 citizens is in the active standing army.

Rumania has a standing army of 266,500 men. One out of every 65 people in Rumania is in the standing army.

As this table will show, if Senators will look at it, all of these countries are borrowing tremendous sums from the United States, and are not scaling down their military establishments; so that to some degree, at least, we are financing the standing armies of the entire world with American capital.

Mr. GERRY obtained the floor.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. GERRY. I yield to the Senator from Utah.

Mr. SMOOT. I submit a proposed unanimous-consent agreement, which I send to the desk and ask to have stated. I will say to Senators that it went over this morning because the Senator from North Carolina [Mr. SIMMONS] was not in the Chamber. The Senator from North Carolina has returned, and he has no objection to the proposed agreement.

Mr. GERRY. The Senator from North Carolina has no objection to it?

Mr. SMOOT. None whatever.

The PRESIDING OFFICER. The proposed unanimous-consent agreement will be stated.

The Chief Clerk read as follows:

It is agreed by unanimous consent that when the Senate has completed its consideration of H. R. 1, the pending revenue bill, the Secretary be authorized—

(1) To make necessary changes in numbers and letters in all headings and subheadings and in any cross references thereto.

(2) To strike out or correct cross references that have become superfluous or erroneous, and to insert cross references made necessary or convenient by reason of changes made by the Senate.

(3) Where amendments adopted to the bill do not conform in style, typography, and intention to the style of the bill as printed, to make such corrections as may be necessary to produce such conformity.

(4) To make such changes in the table of contents as are necessary to make it conform to the action of the Senate in the remainder of the bill.

Mr. JOHNSON. Mr. President, before that agreement is adopted, will the Senator from Utah kindly tell me what is meant by the expression "changes in style"? Does that mean in the make-up or in the phraseology?

Mr. SMOOT. We can not tell just exactly what minor amendments may be made in the wording.

Mr. JOHNSON. I am not objecting to it, but I am asking for information. Is it the purpose of the committee to have the Secretary rewrite the English where it is essential?

Mr. SMOOT. Oh, no. For instance, we will take the first section of the bill: If there is one amendment in that section, it may have to be carried on in three or four sections to carry out the meaning of the first section. This is the same unanimous-consent agreement that has been made heretofore.

Mr. JOHNSON. I am not objecting, but the word struck me from my old college days, when English was insisted upon and style was required; and I did not know whether the Senator from Utah was insisting upon a particular style in the financial bill or not.

Mr. SMOOT. I assure the Senator I was not.

Mr. JOHNSON. Very well.

The PRESIDING OFFICER. Is there objection to the proposed unanimous-consent agreement?

Mr. KING. Mr. President, I shall not object to the unanimous-consent request, but the point made by the Senator from California attracted my attention this morning.

Mr. SMOOT. I will say to the Senator that I have no objection to striking out the word "style"; but I was following the example that has been set in the past.

Mr. KING. I understand; and my understanding has been that in the past, where there was any verbal change made, it was called to the attention of Senators.

Mr. SMOOT. The Senate will have to act upon these changes.

Mr. KING. I know that the Senator from Pennsylvania [Mr. REED] and myself, when the last tax bill was under consideration, in consultation with representatives of the bureau, went over these amendments and changes; and when there was any textual change I am sure that it met the approval of the Senator from Pennsylvania and myself, and, if it was at all material, we called the attention of the committee to it. I presume the same policy will be pursued with respect to this matter; so I have no objection.

Mr. SMOOT. I will go farther than that, and advise the Senate now that if at any time they want to reopen any question involved in this unanimous-consent agreement, I will agree to it freely.

The PRESIDING OFFICER. Without objection, the modified unanimous-consent agreement is entered into.

## INDEPENDENT OFFICES APPROPRIATIONS

Mr. WARREN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Rhode Island yield to the Senator from Wyoming?

Mr. GERRY. Is this for the submission of a conference report?

Mr. WARREN. A conference report.

Mr. GERRY. I am very glad to yield, if it does not take me from the floor.

The PRESIDING OFFICER. The Chair lays before the Senate a message from the House of Representatives, which will be stated.

The Chief Clerk read as follows:

IN THE HOUSE OF REPRESENTATIVES, UNITED STATES,
*May 3, 1928.*

*Resolved*, That the House recede from its disagreement to the amendment of the Senate No. 4 to the bill (H. R. 9481) entitled "An act making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes," and concur therein.

That the House recede from its disagreement to the amendment of the Senate No. 1, and concur therein with an amendment as follows:

In line 1 of the matter inserted by said amendment, after the word "duties," insert the words "and powers."

That the House recede from its disagreement to the amendment of the Senate No. 10, and concur therein with an amendment as follows:

In line 8 of the matter inserted by said amendment, after the word "That," insert the following: "after such reconditioning."

That the House recede from its disagreement to the amendment of the Senate No. 11, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following: "$13,688,750: *Provided*, That of the sums herein made available under the United States Shipping Board, not to exceed an aggregate of $350,000 shall be expended for compensation of regular attorneys employed on a yearly salary basis and for fees and expenses of attorneys employed in special cases."

That the House further insists on its disagreement to the amendments of the Senate Nos. 7, 8, and 9.

Mr. WARREN. Mr. President, I present the conference report on the independent offices appropriation bill, and I will then ask to make one or two changes, which will complete the agreement of the two branches.

Mr. WALSH of Massachusetts. Mr. President, will the Senator from Wyoming answer a question, please?

The PRESIDING OFFICER. Does the Senator from Rhode Island yield to the Senator from Massachusetts?

Mr. GERRY. I do.

Mr. WALSH of Massachusetts. May I ask the Senator from Wyoming in what condition the appropriation for the reconstruction of the *Mount Vernon* and *Monticello* has been left in the report?

Mr. WARREN. I think there are two or three words included since the bill passed the Senate. We will come to that if we can get the report adopted.

Mr. WALSH of Massachusetts. Has the amount originally appropriated been retained?

Mr. WARREN. It is the same amount.

Mr. KING. I think we had better have a chance to examine it before we agree to it.

The PRESIDING OFFICER. The Senator from Wyoming presents a report, which will be read.

The Chief Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9481) "making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 5, 12, 13, and 14.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following:

", of which $1,000,000, or so much thereof as may be necessary, may be used for reconditioning and operating ships for carrying coal to foreign ports"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 1, 4, 7, 8, 9, 10, and 11.

F. E. WARREN,
REED SMOOT,
W. L. JONES,
LEE S. OVERMAN,
CARTER GLASS,
*Managers on the part of the Senate.*

WILL R. WOOD,
EDWARD H. WASON,
THOMAS H. CULLEN,
*Managers on the part of the House.*

Mr. WARREN. I move the adoption of the conference report.

Mr. KING. I wish the Senator from Wyoming would tell us what changes have been made from the bill as it passed the Senate in the items on which the Senate has receded.

Mr. WARREN. Some of the changes were reported before, and in order to get an agreement it required the changing of a few which I will send to the desk. What has the Senator in mind as to the changes?

Mr. KING. I have not the bill before me, and I do not recall. I am merely asking the Senator to explain the changes from the text as the bill passed the Senate, where the Senate has receded.

Mr. WARREN. The text as it passed the Senate was changed, for instance, in the Shipping Board in three or four different places, and comes back to us with two or three of those matters standing as they did, and the others with amendments suggested which I propose to offer now, before we complete the consideration of the report.

Mr. KING. Does this involve the amendment which was offered by the Senator from Alabama [Mr. BLACK].

Mr. WARREN. It does. I have explained that to the Senator from Alabama, and I think it is satisfactory to him. The changes are that the salaries are left as they were; but the total amount, which covers both salaries and fees and expenses of all kinds, is in another lump, very considerably smaller, as the Senator from Alabama—who, I see, is on his feet—will tell the Senator.

Mr. BLACK. Mr. President, if I may make a statement with reference to that matter, the two amendments which were agreed to by the Senate had two objects. One of them was to limit the fees to be paid to the attorneys to $10,000. The House declined to accept that amendment. The other amendment provided for a reduction of $150,000 in the total amount paid for attorneys' fees during the next year. The House accepted a reduction of $70,000, which means a saving on attorneys' fees of $70,000.

Personally, I do not think that is enough. I think the amendment as agreed to by the Senate left ample funds for the operation of the legal department; but I do not think the difference is sufficient to hold up further at this time the conference report on this bill. I give notice, however, that when the next appropriation bill comes up I desire to see that the matter is presented to the Appropriations Committee and a thorough investigation made, in order that there may be made a still further and radical reduction, so as to get this department down somewhere near the basis on which it ought to be; and I understand that the various members of the Appropriations Committee will be glad to go into the matter fully when it is again presented. For that reason I do not object to accepting the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

Mr. WARREN. Mr. President, I move that the Senate agree to the amendments of the House to the amendments of the Senate numbered 1, 10, and 11, and that the Senate recede from its amendments numbered 7, 8, and 9.

Mr. LA FOLLETTE. Mr. President, I am not sufficiently familiar with the bill to discuss any but one amendment adopted by the Senate upon which the Senator from Wyoming now moves that the Senate recede. That is an amendment offered by me to provide for the abolition of the sea service bureau maintained and operated by the Shipping Board.

The sea service bureau was created during the war as a recruiting and training agency for the enormously expanded shipping facilities of the United States occasioned by our entry into the war. It has been maintained since that time, and the evidence is practically conclusive that the service is taken advantage of only by the Shipping Board for the operation of its vessels. There is an enormous turnover in the men who are employed by the sea service bureau, and the evidence is conclusive that the expenditure of this sum of money, which varies from three hundred to three hundred and fifty or four hundred thousand dollars a year—

Mr. WARREN. It is now $120,000.

Mr. LA FOLLETTE. The Senator from Wyoming informs me that it has now been reduced to $120,000. The conference report was presented in the House on yesterday amid the confusion of the debate on the McNary-Haugen bill in the House. I am informed by Members in the House who were specifically interested in the amendment which I am now discussing that they had been advised that they would be notified when the conference report was to come up in the House, but such notice was not given to them, and at least in two instances I know of members who were upon the committee of the House investigating the Shipping Board, and who were very much opposed to the continuance of the sea service bureau, were not notified that the conference report would be taken up for consideration and were not present in the House.

Therefore I am satisfied, from such investigation as I have been able to make, that the adoption of the conference report on the part of the House did not give any opportunity to those who were interested in a number of these amendments, and in this amendment in particular, to be heard in the House. Therefore I hope that the motion of the Senator from Wyoming, in so far as it affects amendment No. 9, will not be agreed to.

Mr. WARREN. Mr. President, the Senator must remember that it would be pretty hard for us to keep track of the four hundred and thirty-odd Members of the House and keep them in attendance on every occasion. Reading the RECORD, there is nothing to show that there was other than the regular course followed in the handling of this conference report. We struggled in conference over this item; it was one of the things the House conferees would not agree to, and, of course, in order to save it we did not yield, but asked the House conferees to take it back to the House and get the opinion of the House on it. It did not pass in the House, and all that would be left to us would be to take the matter up again and go against the same stone wall again.

I would like at this time to have read at the desk a communication from the president of the Shipping Board in regard to this matter. It is a question to which we have given a great deal of attention and on which we have put a great deal of hard work.

The PRESIDING OFFICER. The clerk will read.

The Chief Clerk proceeded to read, and read as follows:

With reference to H. R. 9481, independent offices appropriation bill, which carried the following amendment:

"No part of the funds of the United States Shipping Board or the United States Shipping Board Merchant Fleet Corporation shall be available for the maintenance of a sea service bureau."

I wish to submit the following outline of the functions of the sea service bureau, which will show why it should not be discontinued:

The sea service bureau of the United States Shipping Board is a section of the bureau of operations. This bureau was organized June 20, 1917, at which time the principal duty was to place officers and men who had graduated from the navigation and engineering schools as well as the unlicensed personnel which were trained by various colleges and school ships conducted under the supervision of the United States Shipping Board.

When this bureau was organized we had 90 per cent aliens aboard the American flagships. The report for the period ending June 30, 1927, shows that we have 87.2 per cent Americans in the merchant marine service.

Very few changes have been made in the personnel of this bureau. This alone shows the efficiency and splendid results that have been obtained by keeping our organization together.

The principal work of the section is to Americanize the merchant marines, place the best competent men aboard the ships, and aid foreigners who are desirous of becoming citizens of the United States of America. The sea service bureau slogan is "American seamen for American ships."

Mr. WARREN. I want special attention given to two or three passages. It would seem as if in what they are doing the bureau is working in the right direction.

The Chief Clerk resumed and concluded the reading, as follows:

The sea service bureau have their own medical department in New York City, Baltimore, and New Orleans, where the physical examination of seamen is conducted prior to being assigned to a vessel. The examining of seamen has a dual purpose. We acquaint the seamen of their physical condition and at the same time we are having seamen on our ships that are physically fit. The saving alone on the

claims against the ships more than pays for the expense of the operating of the whole sea service bureau section. In ports where we do not maintain our own medical staff arrangements have been made with the United States Public Health Service to carry on the physical examinations when requested to do so by the master of the vessel.

A complete record is kept on file in the various agencies showing each seaman's name, address, next of kin, age and description, name of last vessel on which employed, discharge markings as to ability, conduct, seamanship, etc. In fact, the record of each seaman is complete from the time of his first position on a Shipping Board ship.

Thousands of letters are received annually from interested American youths in every section of the United States who desire to enter the sea profession, and it is the aim of every local agency of the sea service to encourage these American youths to follow the sea as a livelihood. During the past year 1,170 inexperienced boys between the ages of 18 and 23 years have been given an opportunity to go to sea. They were rated as deck boys and paid $25 per month.

Upon the officers of our ships is imposed the duty of training these boys. The groundwork being of the highest importance, they are required to train the boys in seamanship, cargo work, rope work, maintenance of ship's structure, and expenditure of stores; in short, in the care and upkeep of the modern steamship, as well as in navigation. The boy advances as he shows proficiency in his primary training. It is not too much to say that the schooling of these deck boys may prove an important factor in the ultimate success of the American merchant marine. A large percentage of them are now on their way to development as efficient officers.

The sea service section is the only official agency in the United States which offers an opportunity to young Americans who are desirous of entering the sea life and serving on the ships of the American merchant marine to secure the requisite training which will qualify them to fill even the most unskilled positions aboard ship.

It should ever be borne in mind the lesson taught by the late war, when the greatest question before the country was how to get ships and men to man them, when the large number of alien seamen then employed on American ships refused to man our ships on voyages through the war zone, but instead sought safety on coastwise runs or retired entirely from the sea until after war was over, making it necessary to man such ships with untrained young Americans, where possible, or, in a large number of cases, tying up the ships entirely until American youths could be trained to man them, thus crippling the country's resources because of its lack of a trained body of American seamen.

The shipping interests of foreign nations are resorting to every practice to cripple the American merchant marine, and actual experience has proved that the subjects, or former subjects, of these countries who are now employed on American ships, discriminate, whenever possible, against the young Americans who work with them, and are attempting in every conceivable way to drive these Americans off the ships. Unless the Shipping Board continues to assist more young Americans to go to sea and replace this element they will ultimately be successful in their efforts and the American merchant marine will be manned solely by men of foreign birth as it was prior to the establishment of the sea service section by the United States Shipping Board.

The sea service section makes no discrimination as to whether or not the seaman belongs to a labor organization. The local managers of the section are chiefly men who have followed the sea prior to taking up this work. They have therefore a complete knowledge of the likes and dislikes of the sailor and are fully competent to place the best men available in the various ratings.

The per capita cost of placing seamen is somewhat higher than the average cost for last year because of a substantial decrease in the number of men placed. This smaller turnover is due to careful selections made, and shows that the men are becoming better satisfied with their employment. While an increase is indicated in the cost of placements, there is at the same time a decrease in the operating expenses of the ships.

All matters pertaining to the now extinct sea training bureau, navigation and engineering schools, sea-training ships, etc., are kept in this office and are referred to very often by the various departments of the Shipping Board and Fleet Corporation, as well as by civilians who were interested at the time of the World War.

The cost of operating the sea service bureau is $120,000 per annum. Should this bureau be abolished the cost of manning our ships will far exceed this figure, with no assurance of obtaining efficient American crews.

Letters from the following organizations have been received protesting against the discontinuance of the sea service bureau:

Letter dated—

February 27, 1928: The American Red Cross, New York City.

February 27, 1928: United States Veterans' Bureau, New York City.

February 27, 1928: State of New York department of labor, New York City.

March 13, 1928: Chamber of Commerce, Portland, Oreg.

UNITED STATES SHIPPING BOARD SEA SERVICE BUREAU.

Mr. GERRY. Mr. President, I understand that this conference report will lead to a good deal of debate. I yielded to the Senator from Wyoming with the understanding that there was not going to be any debate upon it.

Mr. WARREN. So far as I am concerned, I have nothing further to say.

Mr. GERRY. But I understand that the Senator from Wisconsin has. I would like to go on with my speech.

Mr. LA FOLLETTE. It was not my fault that the Senator from Rhode Island permitted this matter to come up, and I do not propose to have this amendment disposed of without some debate. Nor do I propose to delay the consideration of the conference report. Nevertheless, I am not satisfied to have the Senate register its opinion with regard to this amendment after hearing a self-serving statement by the president of the Shipping Board, which has just been read into the RECORD. If the Senator from Rhode Island desires to proceed, then I suggest to the Senator from Wyoming that he lay the conference report aside, and we will take it up to-morrow.

Mr. GERRY. I do desire to proceed, and I ask for recognition by the Chair.

Mr. WARREN. I do not want to let this matter go over until to-morrow, but I will be very glad to lay it aside until the Senator from Rhode Island, who was kind enough to yield to me, shall have concluded whatever he may have to say. I will wait and take up the matter further after he shall have finished.

TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

Mr. GERRY. Mr. President, it is very apparent, from the debate that has taken place to-day, that the Senate has recognized the feeling of business in this country, and not only its feeling but that of the average taxpayer, that we should do something more in tax reduction than has been done. The time has come when we should have a better policy in regard to the funding of our debt.

The Treasury experts in the past have been very conservative, to say the least. I do not blame them for being conservative to a certain extent, because naturally they want their estimates to be such that there shall be no deficit; but from the figures which I have here, it is very apparent that the Treasury's estimates for the taxable years have been so conservative that they have been of little value to the Committee on Finance.

For example, in August, 1921, the Secretary of the Treasury, before the Ways and Means Committee, estimated that for the fiscal year ending June 30, 1922, there would be an excess of expenditures over receipts of $336,000,000 and over. As an actual fact, instead of a deficit in that year, there was a Treasury surplus of $313,000,000 and over. The estimate for 1922 was therefore in round figures, $650,000,000 too low.

If a mistake like that had been made in only one year it could be explained, or an attempt made to explain it; it could be said that this thing and that happened. But every year the estimates have erred in practically the same way, and we always have an explanation instead of an accurate estimate.

Let us take the next year. In January, 1924, again before the Ways and Means Committee, the Undersecretary of the Treasury placed the estimated surplus for the year 1924 at $329,000,000. The actual surplus was over $505,000,000. This time the Treasury came a little closer, but again they were too low by $176,000,000.

In 1925, before the Ways and Means Committee, the Secretary of the Treasury estimated the surplus for the fiscal year

1925 at $290,000,000. The actual surplus was $377,000,000, a very much closer estimate than the ones theretofore made, but even then about $100,000 000 out.

In 1927 the surplus was placed at $250,000,000 to $300,000,000, while as an actual fact it turned out to be the amazing sum of $635,000,000. The Treasury's guess then was $325,000,000 too small, and to show how little the situation was understood the Finance Committee had a specially called meeting, as I recollect, and the corporation tax was increased from 12½ to 13½ per cent.

The minority leader on the Finance Committee, the Senator from North Carolina [Mr. SIMMONS], and other minority members of the committee, argued with the majority that the Treasury estimate was not correct, that the experts whom they had consulted stated that the estimates were not correct, and that there was no necessity for putting the extra tax on the business of the country. The vote in the committee I have not before me, but the minority members, I think, were unanimous in opposing the increase and fought it vigorously on the floor of the Senate. This year, in the bill now before us, the majority members are asking a decrease in the corporation tax to 12½ per cent; in other words, simply taking off the additional amount which they put on in the last revenue bill.

The Senator from Utah [Mr. SMOOT], in submitting the majority report of the committee to the Senate, estimated that the surplus will be $400,000,000, but he also goes further and says that in 1929 the surplus will be only $212,000,000, and therefore he feels that it is unsafe to reduce our taxes by more than a little over $200,000,000.

Frankly, I am surprised at as conservative a Senator as is the Senator from Utah recommending a tax cut which will, according to his estimate, be within $7,000,000 or $8,000,000 of what he estimates the surplus will amount to. That is very close figuring unless in the back of his head he has a subconscious feeling that the estimate of the Treasury which he has submitted for 1929 will be as far above the amount he gives as the past estimates have proven to be above the estimates in past years. I can not help feeling that he must have some idea of this sort; otherwise I do not believe he would venture so close to the margin.

Mr. President, the minority members of the committee feel that the Treasury estimates are too low, as I have stated; that there will be a greater surplus and that it will be safe to reduce the taxes of the country in the amount to which we will try to reduce them in the amendment which the ranking minority member of the committee, the Senator from North Carolina [Mr. SIMMONS], will offer when the time comes.

But apart from that the minority members of the committee feel, I think very unanimously, that there is another matter which we must now meet in all questions of tax reduction, in all questions regarding estimates for the coming year. I refer to our policy with reference to the payment of foreign debts. I do not think the country realized, although the Finance Committee did and discussed it somewhat when the last tax bill was before the committee, the vast amount of money that is going to refund our indebtedness, to pay off the obligations which the Government incurred during the war, both for itself and for the amounts which we loaned our allies.

In 1920 we passed the original debt funding act, and for the convenience of the Senate I am going to place a portion of it in the RECORD so that Senators may understand more clearly exactly how the sinking fund is worked:

> The sinking fund and all additions thereto are hereby appropriated for the payment of such bonds and notes at maturity, or for the redemption or purchase thereof before maturity by the Secretary of the Treasury at such prices and upon such terms and conditions as he shall prescribe, and shall be available until all such bonds and notes are retired.

In other words, the sinking fund continues in effect until the bonds and notes are paid off.

> The average cost of the bonds and notes purchased shall not exceed par and accrued interest. Bonds and notes purchased, redeemed, or paid out of the sinking fund shall be canceled and retired and shall not be reissued. For the fiscal year beginning July 1, 1920, and for each fiscal year thereafter, until all such bonds and notes are retired there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, for the purposes of such sinking fund, an amount equal to the sum of (1) 2½ per cent of the aggregate amount of such bonds and notes outstanding on July 1, 1920, less an amount equal to the par amount of any obligations of foreign governments held by the United States on July 1, 1920, and——

Mr. SIMMONS. Mr. President, will the Senator tell me whether he is not now reading the law?

Mr. GERRY. Yes; I am

Mr. SIMMONS. Will the Senator object to my sending to the clerk's desk and having read an amendment dealing with that very subject, and for the purpose of requiring payments made by foreign governments, both upon principal and interest, to be covered into the sinking fund, thereby reducing to that extent every year the amount that will have to be raised by taxation? I would like to have it appear in this connection in the Senator's speech.

Mr. GERRY. I shall be very glad to have that done.

Mr. SIMMONS. I send the amendment to the desk and ask that it may be read, and I give notice that I shall offer it at the proper time.

The PRESIDING OFFICER. The amendment will be read.

The legislative clerk read the amendment, as follows:

> At the proper place in the bill insert a new section to read as follows:
>
> "SEC. —. Liberty bond sinking fund: (a) Subdivision (a) of section 6 of the Victory Liberty loan act is amended by adding at the end of the first paragraph thereof a new sentence to read as follows: 'In the fiscal year beginning July 1, 1928, and in each fiscal year thereafter, payments (whether in money or in other property) received during such year from foreign governments in respect of their obligations held by the United States, and the proceeds received during such year from the sale of any such obligations, shall first be applied against the appropriation made by this section for such year, and any excess shall be applied as otherwise provided by law.'
>
> "(b) This section shall take effect on July 1, 1928."

The PRESIDING OFFICER. The amendment will be printed and lie on the table.

Mr. GERRY. I had just read the requirements of the statute for an amount equal to 2½ per cent, less an amount equal to the par amount of any obligation of foreign governments held by the United States on July 1, 1920; in other words, they take the amount of our own indebtedness and then deduct the amount of the obligation of foreign governments, and of that remaining sum they compute an amount of 2½ per cent, which is the sum that is paid from the revenue of the United States into the sinking fund.

> 2. The interest which would have been payable during the fiscal year for which the appropriation is made on the bonds and notes purchased, redeemed, or paid out of the sinking fund during such year or any previous years.

In other words, after bonds and notes are redeemed by the sinking fund, the Government still continues to pay into the sinking fund the amount of the interest due on those securities. The result of that is that it makes the sinking fund pyramid like compound interest.

If we study the figures we shall find how the sinking fund keeps on swelling until in a very few years to come it will amount, I think, to something like $750,000,000 annually.

As an example of how the sinking fund increases, I have a table here which shows that in 1927, "on account of sinking fund," the amount was $333,528,400. For 1928 the amount is estimated at $353,221,424.

Mr. REED of Pennsylvania. Mr. President, will the Senator from Rhode Island permit an interruption? If he wants the exact figures at that point I happen to have them.

Mr. GERRY. I shall be very glad to yield to the Senator from Pennsylvania for that purpose.

Mr. REED of Pennsylvania. The exact amount is $354,741,300.

Mr. GERRY. Is that for 1928?

Mr. REED of Pennsylvania. That is for the fiscal year 1928.

Mr. GERRY. Yes; and for 1929 my figures are $369,209,094.

Mr. REED of Pennsylvania. Necessarily, the amount is hard to calculate at this time because of the uncertainty as to the amount of interest on the securities in hand, but it will be about that amount.

Mr. GERRY. I say to the Senator from Pennsylvania that Mr. McCoy furnished me with the figures I am stating, and I presume they are very accurate, as Mr. McCoy's figures always are.

Mr. President, besides that the sinking fund has additional items that go to make it up. There are "purchases from foreign repayments," "received from foreign governments," "purchases from franchise-tax receipts (Federal reserve and Federal intermediate credit banks)," "forfeiture gifts," and so forth. So that last year the sinking fund amounted to over $519,000,000.

I have a table here which I shall read. It shows that from 1920 to 1927, inclusive, the public debt has been decreased from the following sources:

| | |
|---|---|
| Sinking fund | $2,074,080,950 |
| Foreign repayments | 306,130,350 |
| Bonds received in debt settlements | 663,646,700 |
| Estate tax received in bonds and notes | 66,088,000 |
| Franchise-tax receipts | 149,023,696 |
| Miscellaneous | 11,914,071 |
| From surplus | 2,692,108,044 |
| From decrease in general-fund balance | 1,017,607,417 |
| Total | 6,972,599,228 |

So a debt amounting roughly to twenty-five and a half billion dollars has been reduced to eighteen and a half billion dollars. It is estimated that by the operations of the sinking fund alone, leaving out the application of the surplus, such as the $400,000,000 that was paid into it this year, at the present rate the entire remaining amount of our national indebtedness, approximating eighteen and a half billion dollars, will be paid off in from 21 to 22 years. Of course, if we go on paying off the debt at the rate we did last year, which was something like $900,000,000, it will be paid off even more quickly.

The chambers of commerce of the United States are much alive to the conditions that exist and have been protesting vigorously through their organization to the Congress that we are not reducing taxes with sufficient rapidity, and that the sinking fund condition should be remedied. Apart from the question of tax reduction, it seems to me that we are confronted with a very important policy that should be determined now in a farsighted manner. In view of the vast amount of money in the sinking fund, it is very easy to see that if, instead of paying off our entire indebtedness in 21 or 22 years, we lengthen that period to 31 or 32 years, we could save anywhere from $60,000,000 to $100,000,000, which could be applied to tax reduction and thus afford relief to the business of the country and to the people of the country generally.

We have reached the point now where we must determine what policy we are going to pursue. The longer we wait the longer we are going to have the situation that was discussed here to-day on the floor of the Senate. Our agreements with our allies were based on the theory that their indebtedness to us would be settled in 62 years. The British debt settlement, which is the largest and most important one, was entered into in 1923. If we add 62 years to that date we shall find that in 1985 the debt due us from Great Britain will have been settled; but in the meanwhile what is happening? If we go on paying off our indebtedness in the future in the way we have in the past we are going to find that in 1950 or 1951 we shall have paid off all our indebtedness, while our former allies, if we continue to demand that they pay us, will be paying money to the United States Government on an account of an indebtedness that is no longer charged against our people.

If Senators will think for a moment they will realize that such a condition would go on for 30 years, and even for over 35 or 40 years, if we continue applying a yearly surplus of $300,000,000 or $400,000,000, in addition to the sinking fund, to the payment of our national debt. That would be at the rate of nearly a billion dollars a year, and, in view of the way in which the sinking fund grows, it is easy to see how soon the entire indebtedness will be canceled. Then we are going to reach the condition that was so much discussed on the floor of the Senate to-day; we are going to have a clamor for the forgiving of the remainder of the entire indebtedness; and it is my humble opinion that the demand has already started.

Mr. PITTMAN. Does the Senator mean forgiving the foreign indebtedness?

Mr. GERRY. Yes; we are going to have a clamor to forgive our allies the amount of money they borrowed from us.

Mr. PITTMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Rhode Island further yield to the Senator from Nevada?

Mr. GERRY. I yield.

Mr. PITTMAN. Do I understand that the argument in favor of that would be that the people of America, being no longer taxed by reason of that indebtedness, therefore might as well forgive it?

Mr. GERRY. That is exactly the argument that would be used, because the American taxpayer would have already been taxed to pay off this indebtedness; and when the European payment continues we will be using that money to pay our current expenses in place of deriving it from our own taxes. That this condition would be created would be true if it were not for the fact that, according to my recollection, there is in the agreements that we entered into with our allies a proviso that the money collected from them must be paid toward meeting their indebtedness.

I should like to ask the Senator from Utah if that is not true. Is it not true that the money paid to us from the Allies must be paid toward their indebtedness?

Mr. SMOOT. Oh, no; not toward their indebtedness.

Mr. GERRY. Toward interest and indebtedness?

Mr. SMOOT. We use the money, the interest that they pay upon their obligations, to refund our obligations. It is not to pay their indebtedness.

Mr. GERRY. I understand that. The Senator missed my point.

Mr. SMOOT. I understood the Senator to ask whether the money we received from them was used to pay their indebtedness. It is used to reduce the domestic indebtedness.

Mr. GERRY. They borrowed the money from us, and we sold bonds to obtain that money.

Mr. SMOOT. Yes.

Mr. GERRY. Under the debt settlements a part of the money that we received from the Allies goes to the payment of the capital and the other part goes to interest.

Mr. SMOOT. That is right.

Mr. GERRY. But it is limited to that amount. There is a limitation in the agreement; is there not?

Mr. SMOOT. I do not quite understand the Senator. A limitation of what kind—as to the amount that we shall apply upon our indebtedness?

Mr. GERRY. No; that it must go to their indebtedness.

Mr. SMOOT. Certainly; that is the law.

Mr. GERRY. That is in the contract?

Mr. SMOOT. That is in the agreement that has been made.

Mr. GERRY. That was my understanding of the agreement. It is in the agreement?

Mr. SMOOT. Yes.

Mr. PITTMAN. Mr. President, does the Senator happen to have the statistics there to show what our domestic debts are evidenced by?

Mr. GERRY. By bonds. I do not think I get the Senator's question.

Mr. PITTMAN. It was stated there that our Government sold bonds for the purpose of raising the money to be furnished to the Allies. What character of bonds were they?

Mr. GERRY. Our Liberty bonds were sold, and the money obtained from those bonds was given to the Allies and then we took their notes in return.

Mr. PITTMAN. And those Liberty bonds were due in what period of time, generally speaking?

Mr. SMOOT. The last of them run up to 1947. Within a couple of years about $2,000,000,000 of the bonds will fall due.

Mr. PITTMAN. As I understand, those bonds were first sold in the open market, and at times were sold below par. In fact, they sold sometimes, I believe, as low as 85 per cent of par.

Mr. SMOOT. They reached that figure on the market, but they never were issued for that.

Mr. PITTMAN. I do not mean that; I mean they reached that level on the market—85 cents on the dollar. Then those bonds went into the hands of those who could afford to hold them, and they are largely there now; and the sooner those bonds are paid off the larger profit there will be to the holders. Is that correct?

Mr. SMOOT. No; the holder does not want them paid off. They are the best security in the world, and they are being refunded at a very much lower rate of interest than they are carrying now.

Mr. PITTMAN. If I bought a bond to-day for 85 per cent of its face value and sold it to-morrow at par, I would make 15 per cent on the transaction.

Mr. SMOOT. Yes; of course.

Mr. PITTMAN. If I did not sell it for 10 years, I would make the interest during that period of time, and one-tenth of 15 per cent each year.

Mr. SMOOT. And it would not make a penny of difference to the Government.

Mr. PITTMAN. It would not make a penny of difference to the Government, but it would make a tremendous difference to the man who got the 15 per cent.

Mr. SMOOT. There is no man who bought our bonds but that can sell them any day he desires; and the only reason he is holding them now is because they are the best investment that he can find.

Mr. PITTMAN. There might be a question as to whether the bonds would be as valuable if they thought they were not going to be paid off as rapidly as possible, if they thought they were going to run the full period of time; but, be that as it may——

Mr. SMOOT. Why, just within a few months we called bonds that were drawing 4¼ per cent, and we have reissued short-time certificates at 3⅜ per cent, and they were taken up just as rapidly as the bonds themselves were. There is none of the

bonds of the United States but that is slightly above par at the rate they are bearing now.

Mr. PITTMAN. Then it comes down solely to the proposition—I am asking this for information—whether it is better for the Government to cease paying the interest on those bonds, varying from 3¾ per cent to 4¼ per cent, or whether it is better that the taxpayer should pay the rate of interest that is being paid at the present time?

Mr. SMOOT. If the bonds are paid off, it will cause a reduction in the bonds of the Government outstanding, and therefore a reduction in the amount of interest that must be paid each year.

Mr. PITTMAN. But the taxpayer would not get any reduction of his taxes if the money, instead of being used for the support of the Government, were diverted to the purpose of reducing the national debt, would he?

Mr. SMOOT. Why, certainly. If we had our $18,000,000,000 of national debt paid off now, drawing, say, an average of 4 per cent, that would be $720,000,000 a year that the taxpayer would not have to pay at all.

Mr. PITTMAN. If the taxpayer were only required to pay the tax necessary to raise two hundred or two hundred and fifty million dollars a year, he would not be benefited at all by a reduction of the public debt over and above that amount. It would not reduce taxation or increase it, either one.

Mr. SMOOT. It would reduce it, because the amount we have already paid off on our obligations is equivalent to some $375,000,000 of interest; and instead of paying the interest we can reduce the annual tax by that amount of money. That is why I want the debt paid off just as quickly as possible, because there is not any better reduction in taxes than to reduce the debt, so as to reduce the interest that the Government will have to pay.

Mr. PITTMAN. It is perfectly evident that there is an argument used now that it is better to reduce the national debt than to reduce taxes. Consequently, you can not do both.

Mr. SMOOT. No, Mr. President; the proposition now is that there should be a happy medium between the two; and that is exactly what we are trying to arrive at with the bill that is before the Senate, and that has been the policy in the past.

Mr. PITTMAN. Then I thoroughly understand it. The happy medium means that both can not exist at the same time.

Mr. SMOOT. That is true, too, and the Senator knows it.

Mr. PITTMAN. You can not use your funds for the reduction of a past debt and at the same time reduce present taxation.

Mr. SMOOT. That is a fact that can not be denied by any human being.

Mr. PITTMAN. I was trying to understand the theory; and it is felt that the public is bearing a greater burden by rapidly taking off the burden of war at the expense of taxation.

Mr. GERRY. I should like to say to the Senator from Nevada that that very fact of the ability to buy bonds below par was availed of by certain foreign governments, and it was very wise banking. Under the debt settlements they were allowed to pay their indebtedness to us with our bonds, and therefore, having bought those bonds below par, they were able to give those bonds to our Treasury and have them taken in payment at par.

Mr. SMOOT. Mr. President, I want to say to the Senator that at the date the first settlement was made—and that was with England—the bonds were nearly at par. If these settlements had been made when these bonds were selling for about 88, that would have been absolutely true; and I think England did make a little profit on purchasing the bonds and paying the bonds at par on their obligations.

Mr. GERRY. I have always understood, if the Senator from Utah will permit me, that they bought a great many bonds early, and then, after the settlement was made, they reaped the benefit of their foresight.

Mr. SMOOT. Just the same as if the Senator had bought the bonds himself he would have reaped it, or any other corporation or individual in the world. That was a question of investment. If they had gone down they would have lost that much. Since they went up they made that much.

Mr. GERRY. I am not saying that that is not the case. I am stating that as the fact.

Mr. SMOOT. That is true.

Mr. GERRY. It is true, and they reaped the benefit of their foresight. The expert has also just told me that I am correct in my understanding of what I asked the Senator from Utah about, that in these debt settlements there is a proviso that the money set aside for capital must be paid for the canceling of the public debt; and, therefore, if we should cancel all of our public debt, that money could not be used. Of course, that is a theoretical proposition.

Mr. SMOOT. Of course, if such a condition existed, I will say to the Senator——

Mr. GERRY. But that is in the statute? I was correct in my understanding of the statute?

Mr. SMOOT. Yes; I said the Senator was.

Mr. GERRY. I thought so, but I wanted to be accurate, and that is the reason why I asked the Senator from Utah.

Mr. SMOOT. As to the law, the Senator stated it correctly; but I will say further to the Senator that if these obligations were all paid we could reduce our taxes by an amount which I have not figured out, but which would be, anyhow, 3⅜ per cent on seventeen or eighteen billion dollars.

Mr. GERRY. There is no question of that. I am not disputing that; but here is the point, and I am nearly through: If you do that, you have reduced indebtedness by making this generation carry the heavy tax burden of the war; and there you are going into a question of policy as to what the Government should do and what is the best financing.

Mr. SMOOT. That is absolutely true.

Mr. GERRY. I have maintained right along that we are now coming to a position in taxation where we have got to determine a policy, because unless we meet the issue and determine upon a policy, we are going to get in a position where we are paying off this debt so fast that there will be a tremendous demand and a great propaganda to forgive the foreign indebtedness, and place that burden on the American people.

Mr. SMOOT. Mr. President, I am one of those who believe that future generations will have all the obligations to meet that they can carry. If it were true that future generations would sail along without incurring any obligations at all, then the Senator's argument would be quite proper, that the present generation should not take the whole burden of the war; but I believe, as much as I believe that I am alive, that between now and 22 years from now—the time when this debt will be canceled if the program as mapped out is carried out the children who are born during that period will have all they can pack.

Mr. GERRY. Is the Senator in favor of paying off the debt in 22 years?

Mr. SMOOT. I would like to see it paid off quicker than that.

Mr. GERRY. And putting heavier taxation on the people?

Mr. SMOOT. We are not putting heavier taxation on them. There are less than 4,000,000 persons in the United States, including corporations, associations, and other organizations, who pay taxes to-day. Now, we are reducing the taxes again, and we will cut out quite a number more. I believe that the people who pay taxes to-day, including the corporations and associations, can afford to do so better than those who have been exempted in the past.

Mr. GERRY. How would the Senator, then, handle the question of the foreign indebtedness?

Mr. SMOOT. That was discussed this morning. I would expect the foreign nations to pay under the terms of whatever settlement is agreed upon.

Mr. GERRY. After all, the paying off of the indebtedness is a question of degree, or a matter of policy as to how much we will pay off and how soon we will pay it off. But is it not a matter of fact that if we pay the debt off in 22, or even 30 years, and we have this foreign indebtedness that will run for 25 years in addition, we will have a great demand to settle the foreign indebtedness, we will have the international banker wanting the foreign indebtedness canceled? The Senator from Utah knows that, and I know it.

Mr. SMOOT. The international banker would like to see it canceled to-day.

Mr. GERRY. He would like to see it canceled to-day. Then the securities he owns would rise in value, and he figures that he might have a chance to handle more bond issues abroad.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. GERRY. I yield.

Mr. McKELLAR. In view of the challenge from somebody on the other side to know how Democrats stood on the cancellation of the indebtedness, I take this opportunity of saying that, so far as I am concerned, I think the terms we have given our debtors have been far more liberal than we ought to have given. I am utterly and absolutely opposed to making any reduction in those debts now or at any other time. I think we have been more liberal than the debtors could have hoped.

Mr. GERRY. Mr. President, my contention is that we have come to a time when we have to establish a policy as to whether we are going on to pay off our total indebtedness in 21 or 22 years or less—and if we go on at the present rate,

it will probably be less—and continue our present rate of taxation, or whether we want to pay off our indebtedness over a slightly longer period, say, 10 years more, or in 31 or 32 years, and be able to give tax reduction to the American people of from sixty to one hundred million dollars. That is a question about which the Senator from Utah and I differ.

Apart from the question simply of tax reduction, there is also the question we have been discussing to-day as to whether, unless we change the rate at which we are paying off our indebtedness, we will not be faced with what we are going to do with the obligations that foreign governments owe us. We are going to be faced unquestionably by propaganda on the part of many idealistic and sincere people, and also by propaganda from the international bankers, who would gain by the canceling of the foreign indebtedness.

We are going to have to meet that issue, and I for one believe that the sooner it is met the better, because it is going to be increasingly difficult for us to collect as our own indebtedness becomes less and less.

I do not see, and I have never seen, why America is not entitled to continue to receive from her allies the money they have agreed to pay. We have paid our share of taxes, and I do not think that proud nations in the future will want to feel that they have failed to meet their obligations. But whether they do or not, I feel certain that the average American citizen realizes that he has done his bit, that he is doing his bit, and that he is entitled to receive all the advantage that he can from the money that he pays in taxes, which includes the amount he pays to reduce our debt, and that he is the one who should be considered.

Mr. GLASS. Mr. President, I want to call the attention of the Senator from Utah to a very egregious blunder he made in a statement upon the floor to-day, if I may be permitted to do so.

Earlier in the day I demonstrated by quotations from the act itself that not a single dollar was loaned by this Government to foreign governments without authority of law; on the contrary, that it was by the express authorization of the statute; but the Senator from Utah made what seemed to me the most astonishing statement to come from the chairman of the Finance Committee of the Senate in declaring that more money was loaned to foreign governments after the armistice than prior to the armistice.

I did not venture specifically to give my recollection of the figures at the time, but I have gotten the report of the Secretary of the Treasury since, and the facts are that, prior to the armistice, credits established amounted to $8,171,976,666, and that following the armistice credits established were only $1,475,442,743.84. So that the difference is as I have indicated. The credits established before the armistice were in excess of $8,000,000,000, and the credits established to meet commitments after the armistice were less than a billion and a half dollars.

Mr. SMOOT. Mr. President, will the Senator state to the Senate now what France received after the armistice?

Mr. GLASS. I will in a few moments; but it was an inappreciable amount contrasted with what she got before the armistice. The point is that the chairman of the Finance Committee of the Senate makes upon the floor of the Senate the statement that more credits were established to foreign governments after the armistice than theretofore, when, far from that being so, it is as eight billion dollars is to a billion and a half.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit a question?

Mr. SMOOT. I forgot to take into consideration the amount England was owing the United States. That was $4,600,000,000. If the Senator will take each of the countries outside of England, I think he will find my statement about correct.

Mr. GLASS. No; I will find it utterly incorrect. I have gone into it far enough to establish the fact that it is utterly incorrect.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit me to ask a question?

Mr. GLASS. Certainly.

Mr. REED of Pennsylvania. I am impressed by the fact that what the Senator from Utah said with regard to the advances before and after the armistice dealt with payments that were made by the United States to those foreign governments.

Mr. GLASS. He would be just as far wrong in that as he was in the other statement.

Mr. REED of Pennsylvania. What the Senator from Virginia is endeavoring to show is the establishment of credit on this Government's books, a very different thing from the payments.

Mr. GLASS. Oh, yes; but I will show that the Senator from Utah was just as far wrong in that supposition as the Senator from Pennsylvania is.

Mr. REED of Pennsylvania. If the Senator wanted to make a responsive answer, it seems to me he ought to answer on that point.

Mr. GLASS. I will make a response right here from the report of the Secretary of the Treasury. The cash advanced prior to the armistice, or up to three days after the armistice, was $7,098,714,750, whereas the total advances were but $9,647,419,000. That is a specific answer.

Mr. REED of Pennsylvania. From what is the Senator reading?

Mr. GLASS. I am reading from the official report of the Secretary of the Treasury to the President.

Mr. REED of Pennsylvania. For what year?

Mr. GLASS. For the year 1918. The credits established for Belgium prior to the armistice were $106,580,000; subsequent to the armistice, $236,865,000.

Credits established to France prior to the armistice were $2,389,956,600; subsequent to the armistice but $658,018,177.24.

Mr. REED of Pennsylvania. How much was paid to France after the armistice?

Mr. SMOOT. I was speaking of settlements that were made.

Mr. GLASS. I can get those figures and show that the Senator was as far wrong in that item as I am showing he was wrong in the other.

Great Britain had credits established of $3,709,000,000 before the armistice, and she had credits etsablished of $568,000,000 after the armistice.

Russia had credits established of $187,000,000 before and nothing after the armistice.

Italy had credits established of $1,102,351,891.98 before the armistice and $518,570,000 after the armistice. If it would afford the Senator any satisfaction, I could very easily obtain the advances and show he was just as far wrong in that item as he has been in these two, which is very far.

Mr. SMOOT. I will put the figures in the RECORD myself.

Mr. GLASS. Mr. President, in order to continue for a moment the statement I made in the time of the Senator from Rhode Island, I want to say that the Senator from Utah [Mr. SMOOT] asked me with reference to the cash advances on account of foreign loans prior to and after the armistice, especially with reference to France and Great Britain. From the report of the Secretary of the Treasury for 1918, page 36, I read again that the total established credits to Great Britain amounted to $3,945,000,000, of which amount there was advanced in cash before the armistice $3,696,000,000. The total credits established for France were $2,445,000,000 and the total cash advances prior to the armistice were $1,970,000,000.

Mr. REED of Pennsylvania. I am not able to reconcile the figures in the Treasury report for 1918 with those in the Treasury report for 1927. At page 323 of the latter volume I find the statement that France's afterwar indebtedness, with interest, amounts to $1,655,000,000; Belgium's postarmistice borrowings, with interest, were $258,000,000; the postarmistice indebtedness of Italy, with interest, was $800,000,000, and so on. In order that we may clear it up I shall ask the Treasury Department to send us a statement showing the exact amounts advanced in cash before and after the armistice.

Mr. GLASS. I accounted to the Senator for nearly $500,000,000 of the postwar indebtedness which arose after the war out of the sale of material by this Government to the French Government.

Mr. REED of Pennsylvania. Four hundred and seven million dollars.

Mr. GLASS. I said approximately $500,000,000. I did not undertake to state the exact figures. I can not account for other postwar indebtedness, but I have no doubt in the world the official figures of the Secretary of the Treasury are correct.

Mr. SMOOT. In the statement I made I had reference to the settlements which were made or supposed to be made by the Debt Commission. Of course, I think they were correct, but I will get the exact figures.

Mr. GLASS. The exact figures have just been quoted from the report of the Secretary of the Treasury. The Senator can not set up his recollection against the official figures from the report of the Secretary of the Treasury.

Mr. SMOOT. I am not trying to do so.

## PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had approved and signed the following acts:

On May 1, 1928:

S. 1368. An act to extend the benefits of the employee's compensation act of September 7, 1916, to Martha A. Hauch; and

S. 3437. An act to provide for the conservation of fish, and for other purposes.

On May 2, 1928:

S. 4180. An act authorizing the attendance of the Marine Band at the Confederate Veterans' Reunion at Little Rock, Ark.

On May 3, 1928:

S. 2900. An act granting pensions and increase of pensions, to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors; and

S. 4046. An act authorizing the Henderson-Ohio River Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Henderson, Ky.

INTERNATIONAL TECHNICAL COMMITTEE OF AERIAL LEGAL EXPERTS (S. DOC. NO. 94)

The PRESIDING OFFICER (Mr. FESS in the chair) laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed:

*To the Congress of the United States:*

I transmit a report from the Secretary of State in regard to the work of the International Technical Committee of Aerial Legal Experts, in the deliberations of which the Government of the United States would be entitled to participate if it should pay a share of the annual expenses of the committee, and commend to the favorable consideration of the Congress the recommendation of the Secretary of State, as contained in the report, that legislation be enacted authorizing an annual appropriation of a sum not in excess of $250 to meet the quota of the United States toward the annual expenses of this committee, beginning with the calendar year 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 4, 1928.*

AYER & LORD TIE CO.

The PRESIDING OFFICER laid before the Senate a communication from the Comptroller General of the United States, transmitting, pursuant to law, a report and recommendation concerning the claim of the Ayer & Lord Tie Co., which, with the accompanying report, was referred to the Committee on Claims.

REPORT OF NATIONAL INSTITUTE OF ARTS AND LETTERS

The PRESIDING OFFICER laid before the Senate the annual report of the National Institute of Arts and Letters relative to its activities for the year 1927, which was referred to the Committee on the Library.

MARINE BIOLOGICAL STATION AT KEY WEST, FLA.

The PRESIDING OFFICER laid before the Senate a communication from the Acting Secretary of Commerce, transmitting draft of a proposed bill for the reconveyance to the Key West Realty Co. of the marine biological station at Key West, Fla., with favorable recommendation, which, with the accompanying paper, was referred to the Committee on Commerce.

THE COOLIDGE DAM (S. DOC. NO. 93)

The PRESIDING OFFICER laid before the Senate a communication from the Secretary of War, chairman of the Federal Power Commission, reporting, pursuant to law, for the commission, relative to the proposed development of hydroelectric power at the Coolidge Dam and the compensation to be paid to the Apache Indians of the San Carlos Reservation for the use of their lands in connection with the Coolidge Dam project, which, with the accompanying report, was ordered to lie on the table and to be printed.

FARM RELIEF

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 3555) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce.

Mr. MCNARY. I move that the Senate disagree to the amendment of the House and request a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. MCNARY, Mr. CAPPER, Mr. GOODING, Mr. SMITH, and Mr. RANSDELL conferees on the part of the Senate.

INDEPENDENT OFFICES APPROPRIATIONS

The Senate resumed the consideration of Mr. WARREN'S motion that the Senate recede from its amendment numbered 9 to the bill (H. R. 9481) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes.

Mr. LA FOLLETTE. Mr. President, I desire to make a brief statement concerning Senate amendment No. 9, providing that no further funds shall be available for the maintenance of the sea-service bureau by the Shipping Board.

The sea service bureau was created during the war as a recruiting and training service. The testimony seems to be practically unanimous to the effect that the sea service bureau rendered good service during that period. Following the armistice and since that time the sea service bureau has been maintained by the Shipping Board, although there is no statutory provision authorizing its maintenance. It has been carried on by the Shipping Board without statutory provision. The statute provides that the shipping of sailors shall be done before United States shipping commissioners. Therefore the work done by the sea service bureau is a duplication. As is the case with all bureaus which have been created, there is a disposition for it to continue. Those who are employed desire to have their employment continued.

A rather thorough investigation was made of the Shipping Board by a committee of the House, of which Representative DAVIS of Tennessee was a member. When the independent offices appropriation bill was under consideration in the House Representative DAVIS offered an amendment similar to the one which I subsequently offered and which was adopted by the Senate. I desire to quote briefly from Mr. DAVIS'S statement on the floor of the House on January 24, appearing on page 1970 of the RECORD. Referring to the sea service bureau, he said:

I want to state that the select committee which investigated Shipping Board affairs sometime back entered into a full investigation of this subject and I know that I reached the conclusion, and I believe that other members of that committee reached the conclusion, that this sea service bureau should be eliminated.

If I had time to go into details and explain many of the things that were shown with respect to this bureau at those hearings, I believe the distinguished gentleman from Indiana and his colleagues upon the Appropriations Committee would reach the same conclusion which I have reached. I believe that in their effort to economize and to save every dollar they can—which I commend—they would see that undoubtedly here is one opportunity to effect a saving.

I do not know just exactly how much this sea service bureau cost during the last calendar year, but it has been ranging all the way from $100,000 per annum to as high as $400,000 some time back.

Mr. DAVIS continued:

Chairman O'Connor, of the Shipping Board, appeared before the select committee and was questioned with regard to this sea service bureau, in part, as follows.

I direct the attention of the Senate to this testimony taken by the select committee of the House when it was investigating the Shipping Board and had under consideration the matter of the sea service bureau.

Mr. DAVIS. Mr. O'Connor, you are the member of the Shipping Board who has jurisdiction over the sea service bureau, are you not?

Commissioner O'CONNOR. Yes, sir.

Mr. DAVIS. As I understand, that was a bureau that was established during the war, primarily in order to train seamen to be placed upon the Shipping Board vessels that were being acquired and constructed?

Commissioner O'CONNOR. Yes, sir.

Mr. DAVIS. At the present time, and for some two or three years past, the sea service bureau has amounted to only a recruiting or seamen's employment service, has it not?

Commissioner O'CONNOR. That is practically all; yes.

Continuing to quote from Mr. DAVIS:

Now, Mr. Joseph E. Sheedy was the vice president of the Emergency Fleet Corporation and the director of operations, and the one directly in charge of this sea service bureau, and I want to call your attention to what he had to say upon the same subject. After asking in a general way about it, this occurred at the same hearing:

"Mr. DAVIS. Do you think that the bureau performs a successful function?

"Mr. SHEEDY. Frankly, I have never been able to find out."

That statement was made by the vice president of the Emergency Fleet Corporation, under whose direct supervision the sea service bureau rested.

Mr. President, the sea service bureau maintained by the Shipping Board has so conducted its affairs in the shipping of seamen that there has been an enormous turnover in personnel, such an enormous turnover that all their claims regarding the training of boys for the service of the sea are completely answered. Mr. D. A. Hoover, supervising inspector general,

stated under date of January 13, 1928, that approximately 16,633 seamen are required as the number of able seamen actually to man the merchant fleet. According to the statement made by the board in defense of the sea service bureau they admit that they have placed 68,636 seamen on Shipping Board vessels during the year. This means a turnover of approximately 450 per cent, and I submit to the judgment of any Senator whether or not an efficient organization can be built up under conditions where a turnover of this magnitude is inevitable.

Mr. FLETCHER. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Wisconsin yield to the Senator from Florida?

Mr. LA FOLLETTE. I yield.

Mr. FLETCHER. The claim is made by those who are favoring the sea service bureau that it tends to Americanize the seamen on American ships. Does the Senator have any information with respect to that claim? It is claimed, I believe, too, that before the bureau was established some 90 per cent of the seamen were foreigners and that now they are 80 per cent Americans. It is also claimed, I believe, that while the bureau costs $120,000 or more a year, it would probably cost more to make the examinations and supply the sailors without the bureau. I would like to hear the Senator with reference to those two particular claims.

Mr. LA FOLLETTE. Their statement is that they have 87.2 per cent Americans on United States Shipping Board vessels. My information is that in order to reach that percentage they include the Filipinos who have been signed on those vessels. I may be in error as to that, but that is my information. Of course, the Filipinos who are signed are not citizens, except as they may have discharges from the Army or the Navy or from the naval auxiliary.

Mr. WARREN. Mr. President——

Mr. LA FOLLETTE. I yield to the Senator from Wyoming.

Mr. WARREN. I would ask the Senator, in connection with that observation, how the Shipping Board treated the Filipinos before that time when they figured on how many non-American seamen they had? It was figured that they had some eighty-odd per cent in the early years of non-American seamen.

Mr. LA FOLLETTE. I can not answer the Senator's question.

Mr. WARREN. Their declaration was that they had changed some eighty-odd per cent of foreigners to about 87 per cent of Americans or citizens of the United States.

Mr. LA FOLLETTE. Mr. President, there is considerable evidence to the effect that the sea service bureau is maintaining a black list. They term it a "deferred list." The claim is made—and I believe it is substantiated—that men shipping on these vessels who complain of violations of safety and labor provisions of the seamen's act when a vessel has completed its trip are placed upon a deferred list and can not secure further employment through the agency of the sea service bureau. I have here a photostatic copy of a letter on the letterhead of the Fleet Corporation addressed to Mr. Wilson and reading:

DEAR SIR: Please assign the bearer, Arthur Sorrel, as A. B. on this ship; and will you also please send me over a good ordinary seaman?

Respectfully yours,

E. E. HORRELL,
*Chief Officer, S. S. Mount Evans.*

Then there appears upon the lower portion of the letter a longhand memorandum signed by Mr. Wilson, in which he said:

The bearer, A. Sorrel, appears on our deferred list, so therefore can not be assigned to a Shipping Board vessel.

I also have a copy of another letter signed by Mr. Chris Rasmussen, agent New York Branch Eastern & Gulf Sailors' Association, written to Mr. W. P. Seymour, assistant to the director of industrial relations, United States Shipping Board, and reading as follows:

DEAR SIR: I am writing this short letter to you on behalf of Mr. John Olson, a member of this organization, who served as an able seaman on the S. S. *Saugus*, American Export Line. He shipped here in New York in September, 1924, and was discharged from that ship in Greece the same year; he came back to the United States about three months later by way of England. Mr. John Olson is an American citizen and has several very good discharges from ships, including some Shipping Board ships, and also from the United States Army Transport S. S. *Calemaras* during the World War. He has lately been sailing in oil tanks and other privately owned American ships, owing and due to the fact that he was put on the deferred list by the sea-service bureau after coming back from Europe at the time above mentioned, and I am asking you if possible to see that Mr. John Olson will be taken off the deferred list and given another chance, which I really believe he is entitled to. Mr. Daly, at the sea service bureau here, recommended that he write to your office in care of you, and I, in turn, promised to write this letter for him. Trusting that I will hear from you at your earliest convenience on this matter, I am,

Yours most respectfully,

CHRIS RASMUSSEN,
*Agent New York Branch Eastern & Gulf Sailors' Association (Inc.).*

I also desire to read a resolution adopted unanimously by the forty-seventh convention of the American Federation of Labor held at Los Angeles, Calif.:

Whereas there can be no safety at sea without skilled officers and seamen; and

Whereas the needed skill is only developed when those who are to see the work done are selecting those who are to do it; and

Whereas the sea service bureau and the shipowners' employment offices are working directly against any and all efficiency and safety; and

Whereas these employment offices are gathering places for casual laborers and men seeking shelter from too close a scrutiny by the police and to get away when the scrutiny becomes too pressing; and

Whereas these conditions work a hardship upon all real seamen and a most serious hindrance to the development of a merchant marine and a sufficient sea power for the United States: Therefore be it

*Resolved*, That the sea service bureau and shipowners' association shipping offices are a positive evil and ought to be abolished, and that employment of seamen ought to be through the United States shipping commissioner's office, being selected by the vessels' officers either at the commissioner's office or before coming there to be signed.

That raises the question which is very important here, as I see it, Mr. President, namely, that under the statutory provisions for the shipping of men upon ships before United States commissioners, the United States commissioner acts only as an intermediary to see that the sailor has justice. The master of the ship, under those provisions, has the last word to say concerning the personnel of those who are to go to sea with him. That was the practice for generations of time on the sea until this sea service bureau was set up by the Shipping Board, and has been maintained for the purpose of standing between the officers who desire to ship their men and the men themselves; and they have maintained these deferred or black lists, putting upon them, as I have shown here, men who have made complaints against the safety or the labor provisions of the seamen's act.

I desire briefly to refer to an editorial which appeared in the Washington Post under date of February 22.

Mr. KING. Mr. President, will the Senator yield?

Mr. LA FOLLETTE. I yield to the Senator from Utah.

Mr. KING. Apropos of the resolution adopted by the labor organization in Los Angeles, have the Shipping Board or this bureau which seeks to perpetuate itself ever attempted to answer it?

Mr. LA FOLLETTE. Yes, Mr. President. The Senator from Wyoming had a letter read into the RECORD. Perhaps the Senator heard portions of it.

Mr. KING. Yes.

Mr. LA FOLLETTE. That is the answer which they make.

Mr. KING. I do not think it is satisfactory at all. It seems to me, from that letter and from what the Senator has said and from my limited knowledge of the matter, that this bureau, like most Federal bureaus, is trying to perpetuate itself, though it was created for a transitory purpose. It is like a leech; when it attaches itself to the Federal Government, it never lets go; and Congress has not power enough to pry off some of these leeches.

Mr. LA FOLLETTE. The Senator states the case very succinctly so far as this bureau is concerned. I am informed by the Senator from Wyoming that it is now costing the Government $120,000 a year to maintain this organization, which has no statutory authorization, and is, as a matter of fact, maintained in violation of the theory upon which the shipping of seamen is provided for in the statutory provisions.

I wish to read, Mr. President, this editorial from the Washington Post—it is very brief—entitled:

A BUREAU THAT MAKES LAW

The Senate has attached an amendment to the appropriation for the Shipping Board to the effect that none of the appropriation shall be used to maintain the sea service bureau. The bureau is now nothing but an employment office, performing services which by law are assigned to the shipping commissioners, for whom offices are provided in every port of entry that is also a port of ocean navigation.

The first duty of the shipping commissioner's office is "to afford facilities for engaging seamen by keeping a register of their names and characters." This is exactly the work that the sea service bureau is doing at an expense of about $150,000 a year. This is an inexcusable waste of public money. If the shipping commissioners have not done this duty, they should do it, as required by law.

The shipping commissioners have an added duty of seeing that the laws relating to seamen are obeyed. There are certain laws for the protection of the seamen which would be obeyed if this work was done by the shipping commissioners.

Let me say that that also is an important reason why the Shipping Board is determined to maintain this bureau.

Among these laws are certain penalties for misconduct when committed by the seamen or when committed by the officers of the vessel. The sea service bureau disregards these laws and places men on what is called the deferred list (black list), in lieu of submitting those men to the regular authorities for trial and punishment. These laws were passed to protect life and property at sea by maintaining proper skill and discipline. To disregard those laws and substitute therefor the whim of the owner, the master, and the sea service bureau must necessarily result in fostering a disregard for law and in driving skilled and law-abiding seamen from the service.

By its own admission the sea service bureau uses the deferred list in lieu of the penalties not only for serious infractions of discipline but even for crimes. This is a vicious system of lawmaking by a bureau, in disregard of the laws of Congress. The bureau should be abolished. The House conferees should accept the Senate amendment to the Shipping Board bill.

Mr. President, this bill has been in conference for many weeks. Only on yesterday was the conference report taken to the floor of the House. It was taken to the floor of the House at a time when the House was centering its attention upon the consideration of, or was preparing to consider, the so-called Haugen bill. Because of the desire of the House speedily to get to the consideration of that other measure, the injection of the report at that time precluded any adequate consideration of this question.

What boots it that amendments put on in the Senate are taken to the floor of the House unless there is to be given an opportunity for discussion and for an intelligent rendition by the House of its opinion with regard to those amendments?

In my brief experience in this body it has seemed to me that there has been growing up here within recent years an utter lack of consideration for the amendments which are put on House bills in the Senate. I have nothing to say concerning the attitude of the Senate conferees. I believe that they conscientiously struggled to secure an agreement on the part of the House conferees to this amendment; but I submit that under the circumstances the House, or the individual Members of that body, had no opportunity to consider the merits of this amendment attached in the Senate, or of the other two amendments upon which a recession by the Senate is now moved by the Senator from Wyoming.

It seems to me, Mr. President, that the Senate could very well insist upon a further conference concerning this amendment, with a request that it be taken to the floor of the House at a time when a consideration of the merits of the amendment might be had. Let me say, Mr. President, that there are able men in the House who have given very careful study to this entire subject who are concerned and interested in this amendment and who had no opportunity on yesterday to present this question upon the floor of the House.

Therefore I trust that the motion of the Senator from Wyoming concerning Senate amendment No. 9 will not prevail.

The VICE PRESIDENT. Without objection, the motion of the Senator from Wyoming to agree to the amendments of the House to the amendments of the Senate Nos. 1, 10, and 11, and to recede from the amendments of the Senate Nos. 7 and 8, will be agreed to. The question now is on the motion of the Senator from Wyoming to recede from the amendment of the Senate No. 9.

Mr. WARREN. Mr. President, I was about to make some remarks, but I am willing that the matter shall be voted on now.

Mr. LA FOLLETTE. I ask for a division.

Mr. FLETCHER. Mr. President, before we get to that point, with regard to this proposal for unanimous consent to agree to the rest of it——

Mr. WARREN. In the first place, I think we ought to know a little more about it; and, if the Senator will excuse me a moment, I want to say that when this amendment was offered by my friend from Wisconsin [Mr. LA FOLLETTE] on the floor. it was objected to as being out of order on the ground that it was legislation, and there was some talk about it. I remember that I took the ground at the time, and so stated, that I felt that we would not make the point of order and that it could go to conference and probably would be taken care of there.

Mr. LA FOLLETTE. Mr. President, if the Senator will permit me, the RECORD will show that the President pro tempore of the Senate, who was in the chair, ruled that the amendment was clearly a limitation and therefore not subject to a point of order. I wish to say, further, that this amendment was not adopted without an understanding on the part of the Senate as to what was contained in it, because the Senator from Connecticut questioned me concerning the amendment, and at that time I made an explanation of its purposes and of the reason for its adoption.

Mr. WARREN. I have no difference with the Senator from Wisconsin about that. If there was a point of order made, I do not know it; and I do not know that there was any Senate ruling, except as the Senator has so stated.

Mr. FLETCHER. What I was asking the Senator about—I was not in the Chamber when the report was laid down—was the amendment offered by the Senator from Alabama [Mr. BLACK]. That was in conference, also?

Mr. WARREN. Yes; and several others.

Mr. FLETCHER. I wanted to inquire what attitude was taken with regard to that.

Mr. WARREN. The motion that is now up will cause the two Houses to agree. The House disagreed to the particular amendments that the Senator from Alabama had offered, and the Senator from Alabama knows about that and took up that matter to-day. Out of the four amendments offered by the Senator from Alabama there is one that is included now in this motion that gives $350,000 for the appointment of attorneys, but includes in that the salaries of those who are drawing salaries by the year, the same as the fees of those who serve for shorter periods.

Mr. FLETCHER. That has been agreed to by the Senator from Alabama? He is not here. That is the reason why I am asking. The Senator from Alabama has agreed to that?

Mr. WARREN. The Senator from Alabama approved that, because, as he figured, it will save $70,000.

Mr. FLETCHER. I do not care to argue it. I am just trying to ascertain the situation.

Mr. WARREN. Certainly.

Mr. FLETCHER. That disposes of everything except amendment No. 9?

Mr. WARREN. They are all disposed of, so far as I know, except this one. The pending motion includes all of those that are in disagreement and to which, so far as I know, there are no objections; so that it comes down now to the matter of this one amendment, No. 9, to which the Senator from Wisconsin objects.

Mr. FLETCHER. With regard to this motion, I concede the difficulties in the situation now. Originally, I think the Senator's amendment was entirely meritorious, and I think it is yet. If we can possibly secure for it further consideration in the House, I should like to see that done. I think originally this bureau was justified, and served a good purpose; but that service now is not needed to be performed, and it is costing the Shipping Board this much money which it need not cost, and which can be avoided, I think, by a proper handling of the situation. For that reason I should like to see the Senator's amendment prevail.

That is all I care to say. I do not care to take time to discuss it.

Mr. WARREN. Mr. President, I want to appeal to the Senator from Wisconsin to allow this matter to go through, because we have done all that we can in reason, I think.

I was about to say that the Senate amendments went to conference, where they had the warmest support of every man on the conference committee on the part of the Senate. The House refused to agree, and we would not recede; and, of course, we insisted that the matter go back to the House; so that it would have gone back even without a reconsideration. It went back to the House; and I have read the RECORD, and there is nothing in the world so far as the RECORD is concerned that would show what the Senator has received news of from other quarters, because each one of these amendments was taken up by the gentleman from Indiana, and the question put.

In this particular case the gentleman from New York [Mr. LAGUARDIA] moved that the House yield to the Senate. It was voted on and rejected. Later, the motion was made that they insist upon their disagreement, and that was sustained; and so it goes down. Every one of these amendments is considered in particularity, quoted absolutely, every word of them, and in each case the motion is put and carried.

Now, it may be, and I am perfectly willing to accept the fact that there must have been some confusion in the House because of the particular legislation to which the Senator from Wisconsin refers being before them; but the condition that it puts us in as conferees, after going through the conference, and now, after going through the House, is such that it seems that it is time for us now to accept what they have to say about it.

All of this argument about the merits of the case is like the merits of many another case, where in conference we are sometimes unable on the Senate side and they are sometimes unable on the House side to maintain what each side is in favor of. I have had any amount of literature sent to me about the result of having, or not having, this bureau. I have had some of the remarks read at the desk; and I will ask now to have the clerk commence at the top of page 3 and read that, as being among those things that surround us, and I suppose they are considered by the House in their very strong attitude against us.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Chief Clerk read as follows:

This smaller turnover is due to careful selections made, and shows that the men are becoming better satisfied with their employment. While an increase is indicated in the cost of placements, there is at the same time a decrease in the operating expenses of the ships.

All matters pertaining to the now extinct sea training bureau, navigation and engineering schools, sea training ships, etc., are kept in this office and are referred to very often by the various departments of the Shipping Board and Fleet Corporation, as well as by civilians who were interested at the time of the World War.

The cost of operating the sea service bureau is $120,000 per annum. Should this bureau be abolished the cost of manning our ships will far exceed this figure, with no assurance of obtaining efficient American crews.

Letters from the following organizations have been received protesting against the discontinuance of the sea service bureau:

Letter dated—

February 27, 1928: The American Red Cross, New York City.

February 27, 1928: United States Veterans' Bureau, New York City.

February 27, 1928: State of New York, Department of Labor, New York City.

February 28, 1928: The Salvation Army, New York City.

February 28, 1928: Pacific Steamship Co., Seattle, Wash.

March 1, 1928: Civitan Club of Baltimore, Baltimore, Md.

March 1, 1928: Kiwanis Club of Portland, Portland, Oreg.

March 1, 1928: Baltimore Association of Commerce, Baltimore, Md.

March 1, 1928: Chamber of Commerce, Boston, Mass.

March 6, 1928: American Marine Mutual Association of Masters, Mates, and Pilots, Boston, Mass.

March 6, 1928: Chamber of Commerce, Seattle, Wash.

March 6, 1928: Grays Harbor Stevedore Co., Aberdeen, Wash.

March 7, 1928: Society for Prevention of Cruelty to Children, New York City.

March 8, 1928: Hampton Roads Maritime Exchange, Hampton Roads, Va.

March 8, 1928: Newport News Shipbuilding Co., Newport News, Va.

March 8, 1928: Chamber of Commerce, Norfolk, Va.

March 12, 1928: Chamber of Commerce, Savannah, Ga.

March 13, 1928: Marine Engineers' Beneficial Association, Boston, Mass.

March 13, 1928: Chamber of Commerce, Portland, Oreg.

UNITED STATES SHIPPING BOARD SEA SERVICE BUREAU.

## POWER TRUST INVESTIGATION

Mr. NORRIS. Mr. President, there is taking place now before the Federal Trade Commission an investigation of very far-reaching importance, one which, in my judgment, is not attracting the attention that it should attract from the leading newspapers of the country. All the prophecies that have been made in the past several years, when questions regarding water power and the Water Power Trust and the Electric Trust have been before the Senate, are being fulfilled in that investigation. Some of the most startling things are coming to light, some things which, it seems to me, are almost beyond the power of human beings to do. The way they are trying to educate the people of the country and create public sentiment in favor of the Water Power and the Electric Trust is something that must shock the consciences of all fair-minded people when they read or hear about it.

I am going to read an editorial from the New York World that calls attention to conditions in language much better than I am able to employ. This is from the issue of May 1 of this year:

[From the New York World of May 1, 1928]

### THE "POWER TRUST" INVESTIGATION

For a graphic account of the manner in which it is possible to use the modern publicity machine of moving pictures, radio, syndicates, "news" stories, and inspired editorials it would be difficult to surpass the story now being told before the Federal Trade Commission by the publicity experts of the power companies. The World's bureau in Washington reported yesterday one bit of strategy whereby candidates for the Senate were advised to attack Senators who had advocated Government ownership by describing them as socialists and bolsheviks. "Pin the bolshevik idea" on your opponent was the advice offered.

This is an interesting experiment in propaganda methods, but it does not suggest the thoroughness with which the power companies have worked. Their boards of strategy seem to have included not only publicity experts but bureaus of espionage. Thus in the records of the Federal Trade Commission we find the director of the Illinois committee on public utility information reporting to an officer of the Electric Bond & Share Co. in New York regarding the textbooks used in the public schools of Illinois (Document 449).

In other words, we find that the employees of this great monopoly, of this great trust, are reporting to a corporation in New York the success they are having in putting textbooks and pamphlets into the public schools of Illinois for the purpose of educating the children according to their ideas as to the management of public utilities. I continue reading:

We find the same director reporting (in Document 448) upon the methods of banishing from the schools any textbook of which his committee disapproved.

In other words, this great monopoly is picking and selecting the textbooks which shall be used in the public schools of America, and is taking out of the schools those textbooks which its men and its employees do not approve. I read further:

There are two such methods, he suggests. One, "getting in touch with" the publishers, is "a very slow process." The other method "gets action in the form of the immediate removal of the books from the schools of a city, and I can certainly see no objection to that."

This latter method needs more explanation. What "action" do the utilities companies take when they wish to obtain "the immediate removal" of a textbook from an American public school? And to what type of textbook do the utilities take exception?

When the full report of the Federal Trade Commission is available it seems certain that it will be instructive. There are some points, however, on which more light is needed.

I want to read also, in the same connection, an editorial from the Scripps-Howard papers. I read this from the Washington News of May 1:

### WHO PAYS FOR PROPAGANDA?

The Federal Trade Commission during recent weeks has been piling up a mass of documentary evidence and direct testimony which seems to substantiate assertions made in Congress that the utilities industries are engaged in a propaganda campaign of enormous proportions. Its object is to influence public thought and legislation against public ownership in any form, against Federal legislation, and specifically against the Boulder Dam and Muscle Shoals bills.

It has been established that the Joint Committee of National Utilities, composed of the National Electric Light Association, the American Gas Association, and the American Electric Railway Association, collected between June and December of 1927 some $400,000 for propaganda purposes. Its organization came as a result of the probability that the Walsh resolution, calling for a Senate investigation of the power industry, would become law.

It was desired, testimony showed, to have representation in Washington. The power lobby succeeded in shunting off the Walsh resolution to the Federal Trade Commission, and it is under authority of this that the commission is now proceeding.

The National Electric Light Association itself within a year collected more than a million dollars with which to influence public opinion.

It has been shown that the utilities organizations hired former United States Senators and other officials to work here in their behalf. They employed well-known writers to prepare books and pamphlets, which were distributed broadcast. An effort has been made to influence newspapers through this printed propaganda and by direct contact. Methods have been provided to supply women's clubs throughout the country with "information," and for "cooperating" with the clubs. Contacts have been established with schools and colleges, textbooks surveyed, students and faculty members employed during summer months, and cash grants made to further work in which the utilities are interested.

The primary purpose of this all, of course, is to defeat Government operation and forestall Federal regulation. But the utilities likewise have opposed the Shipstead bill to protect labor against injunction abuses and other measures and have interested themselves in taxation and control of navigable streams.

Witnesses admitted frankly that they attempted to use every form of publicity available in an effort to persuade the public to their way of thinking. One witness said his State organization tried to reach everyone from the eighth grade on.

The Federal Trade Commission, it would seem, is getting a comprehensive picture of this gigantic propaganda mill.

But it should not stop there. It should find out who is paying for this propaganda. Are these huge expenditures included in the expenses

the regulatory bodies permit the utilities to charge against the consumer?

Must the public pay to have its opinions brought into line with those of the utilities?

And after that, of course, the question of utility financing remains—the determination of just what is back of the huge issues of utilities securities sold to the public.

Mr. President, I have here a report of one day's proceedings before the Federal Trade Commission, printed in the Washington Herald of April 28, and in the evidence reviewed here it is shown how the giant hand of these great corporations and this great monopoly has fastened itself upon the newspapers and the schools and the teachers and the students. I read from the article:

In solemn review, Judge Healy, counsel of the commission, conducted a parade of subsidized professors and writers who prepared books and delivered lectures paid for by the power lobby, which then disseminated this literature through the country disguised as bona fide investigations by impartial scientific men.

I ask to have the article printed as a part of my remarks. There being no objection, the article was ordered to be printed in the RECORD, as follows:

POWER INQUIRY DIGS DEEPER IN PROPAGANDA'S FAR-FLUNG NET—HAND OF GIANT CORPORATIONS FASTENED ON NEWSPAPERS AND SCHOOLS, PROBERS FIND—METHODS UNPARALLELED

By Edwin J. Clapp

The hearing yesterday in the Federal Trade Commission's investigation of the power lobby brought out the unparalleled methods by which the public-utility interests have got hold of the newspapers and schools which form the public opinion of the country, and the legislators who pass its laws.

In solemn review, Judge Healy, counsel of the commission, conducted a parade of subsidized professors and writers who prepared books and delivered lectures paid for by the power lobby, which then disseminated this literature through the country disguised as bona fide investigations by impartial scientific men.

STUCK TO PROPAGANDA

Propaganda against the Boulder Dam bill proved the main, if not the exclusive, activity of the power people, whose funds include the $1,100,000 being spent by the National Electric Light Association this year and the $400,000 collected since last June 1 by the joint committee of utility associations, the more specialized agent of anti-Boulder Dam activity.

Among the day's revelations of the marvelous workings of light and power in the year 1928 were the following:

1. George F. Oxley, publicity director for the National Electric Light Association, defended his practice of inspiring newspaper editorials with the novel explanation that "it is absolutely fair for me to put into the hands of the editor material so that he can reflect on his own views in editorials."

2. Judge Healy put into the record a letter by Oxley to the Pennsylvania State utility information director, asking for a list of State legislators in Pennsylvania, because "we have a particular piece of work which we wish to do with them."

$100 A WEEK FOR BOHN

3. Dr. Frank Bohn, a writer, was revealed as recipient of a retainer of $100 a week from the joint committee of National Utility Associations while he was publishing power articles in the Sunday edition of the New York Times of October 2, 1927, and October 30, 1927.

4. The minutes of the National Electric Light Association's public policy committee, headed by Russell H. Ballard, president of the Southern California Edison Co., threw light on the motive for an annual payment of $30,000 a year to the Harvard University School of Business Administration. The committee is on record as approving this payment on the ground that it will result in a textbook from Harvard on public regulation of utilities and "a textbook covering this ground would better appear under academic auspices than as a publication of the association."

5. The public policy committee voted to add to the $150,000 appropriated by the Puget Sound Power & Light Co. to attempt a publicity campaign demonstrating the failure of the Seattle municipally owned electric-light plant. The policy committee said:

"Seattle's rates are continually cited as lower than those charged by privately owned plants; the claim of successful results of such a policy in Seattle is dangerous and requires refutation."

6. Paul Clapp, managing director of the National Electric Light Association, testified to a swing around the circle in the Southwest and Southeast, organizing meetings of utility executives, subordinate officials and employees, to stir up "generally diffused" opposition to the Swing-Johnson bill for Boulder Dam.

7. Alfred Fisher, director of the Missouri committee on public utility information, in 1926 reported to Oxley that "the most important work done by the Missouri committee last year was in directing the attention of the industry to textbooks in public schools. You will agree with me that it would be most unwise to give this work any publicity." He added: "It is a matter for executive session between leaders of the industry, writers of textbooks, and printers thereof."

8. Prof. Theodore J. Grayson, of the University of Pennsylvania, is shown as the recipient of $407.27 as "fees and expenses" for a public lecture delivered in New Orleans last October. The news report of the lecture, sent to editors by Grayson as a Pennsylvania professor, discloses that he classed Boulder Dam advocates with socialists. This designation would include such supporters of the legislation as the Los Angeles Chamber of Commerce, John Hays Hammond, Gen. George W. Goethals, and President Coolidge.

$291.50 FOR A LECTURE

Grayson received an additional $291.50 for a lecture at Richmond on December 1 last and $288.29 for another address at Geneva, N. Y., on December 31. Judge Stephen B. Davis, New York head of the power lobby, in a letter to the Federal Trade Commission of March 21, 1928, wrote that "Mr. Grayson is an official of the New Jersey Public Utility Association as well as a college professor." The commission has also learned he is a Philadelphia lawyer, attorney for the New Jersey Water Service Co.

Doctor Bohn was shown to have been paid $100 a week from July 16 to November 23, 1927. Maj. J. S. S. Richardson, publicity director of the joint committee, testified Thursday Bohn was paid this sum for "editing." His activity during this period included an article, "Superpower era of electricity," published in the Sunday New York Times of October 2, 1927, and an article, "The struggle over Government *v.* private development of water power," in the Sunday New York Times of October 30, 1927. In the October 30 article Doctor Bohn carefully balanced the advantages of public versus private ownership, with the balance always slightly in favor of private ownership.

ADDRESSES SOUGHT

The doctor's services were further explained in a letter of September 16, 1927, written by George F. Oxley, of the National Electric Light Association, to Thorne Brown, director of the mid-West of the National Electric Light Association, and reading:

"I am taking up with the joint committee the question of whether it is possible to arrange for Mr. Frank Bohn to make two or three additional addresses while he is in your division, and I am asking Judge Davis to correspond with you direct."

Perhaps the most amusing exhibit in the hearing is a letter written by Prof. E. A. Stewart, of the University of Minnesota, in 1925, to Dr. S. S. Wyer, long-established writer against public ownership, whose wares have been broadcast by the National Electric Light Association and the joint committee. Stewart thanks Wyer for sending him a pamphlet disputing the success of the Government-owned power system of the Province of Ontario. The professor writes that after reading a few of the excerpts contained in Wyer's pamphlet, "I couldn't help but think of the song:

"'Hallelujah! Thine the glory,
Hallelujah, amen.
Hallelujah, Thine the glory,
Revive us again!'"

TRIES IT HIMSELF

Professor Stewart became so affected by the Wyer effort that he has recently himself made an elaborate report on what he calls the failure of the Ontario plan for providing cheap electricity for farmers. The pamphlet is being given nation-wide distribution by a Minneapolis public utility.

Dr. S. S. Wyer is author of the latest anti-Boulder Dam pamphlet, entitled "Study of the Boulder Dam Project," by Samuel S. Wyer, consulting engineer. This pamphlet, issued by the Ohio State Chamber of Commerce on January 30, 1928, and one of the exhibits introduced into the record, has been distributed broadcast through the country and put into the hands of every Representative and Senator.

The Ohio State Chamber of Commerce came into the picture yesterday when George B. Chandler, its secretary, was shown by exhibits and testimony to have labored for an anti-Boulder Dam resolution at a meeting of State chambers of commerce officials assembled in Atlantic City.

He actually succeeded in getting such a resolution considered favorably by the Connecticut Chamber of Commerce. However, they insisted upon expert advice as to what to do about Boulder Dam, and voted against it only after an adverse resolution had been prepared and submitted by Samuel Ferguson, president of the Hartford Electric Light Co.

WANTED AN INQUIRY

The next move for delaying action on Boulder Dam was prefigured by a resolution presented at the February 16, 1928, meeting of the public policy committee of the National Electric Light Association. The minutes of this session contain the following item:

"Mr. Paul A. Schollkopf, of the Niagara Falls Power Co., presented to the committee the desirability of securing an independent engineer-

ing investigation on the Colorado River. It was suggested that the United States Chamber of Commerce might properly set up a commission with the object in view of determining the soundest possible engineering treatment of the river, such a study to be started promptly in order that it may be completed early this fall."

The power lobby's method of working the newspapers is nicely illustrated in a letter of January 19, 1926, written by Oxley, of the light association, to Richardson, then head of the Pennsylvania public service information committee:

"Inclosed please find uncorrected proof of an editorial which will be published in the January 21 issue of the Progressive Labor World, which, of course, you know. Arrangements have been made to have the revised proofs of the editorial in the hands of Charles Penrose to-morrow.

"I thought it might be possible for you to call the editorial to the attention of some of your newspaper friends and perhaps the Associated Press representatives, with a view to having them list at least a part of it for use in some other paper in the city."

GREENWOOD'S BOOK

Yesterday's hearings gave further information regarding the propaganda book, Aladdin, U. S. A., by Ernest Greenwood, former member of the District of Columbia school board. The book was financed by the National Electric Light Association, which advanced $5,000 to Greenwood and then purchased 5,000 copies for $7,500 from Harper & Bros., publishers, "in anticipation of reselling" to public-utilities companies.

Oxley in a letter of January 8, 1928, "to member company executives," urged the wide distribution of the book and added the following quaint comment on its scientific value:

"Thomas A. Edison has written a foreword to the book and authorized the use of an autographed photograph as frontispiece. This, of course, will add to the value and convincing quality of the material in the book."

On January 13, 1928, Oxley again circularized "member company executives" with a "pamphlet reprint of an article by Ernest Greenwood, which will appear in the February issue of the Industrial Digest." The magazine article attached to Oxley's letter was entitled "Panning public utilities," and the subtitle was: "What is the basis of the popular pastime of picking on organizations with clean business records which always have paid dividends to their security holders?"

WOMAN URGES BOOK

Sophia Malieki, chairman of the women's committee of the National Electric Light Association, on March 22, 1928, addressed an appeal to "chairmen of women's committees":

"Aladdin, U. S. A., by Ernest Greenwood, is a book every member of the electrical industry ought to read. Students and club members frequently ask for material on the industry. This book is an authoritative source. Teachers and librarians will appreciate having the book brought to their attention or given them."

Further data were produced with respect to the trip to Washington made by ex-Gov. James G. Scrugham, of Nevada, in January, to confer with Judge Stephen B. Davis, director of the joint committee of National Utility Associations, which is leading the fight against Boulder Dam. For this trip Governor Scrugham was paid $600 expense money. The controversy is still unsettled as to whether Scrugham invited himself to the conference or was invited by Judge Davis. Governor Scrugham has been an outstanding advocate of Boulder Dam legislation.

The exact date of the Scrugham-Davis conference was established as January 19 by an entry in an expense memorandum prepared by Judge Davis, accounting for a matter of $3,395.04 of special expenses from December 9, 1927, to January 25, 1928. Attention was called to the fact that from January 12 to January 27 Judge Davis and George B. Cortelyou, president of the Consolidated Gas Co. of New York and chairman of the joint committee, were together in Washington, as shown by an item of $1,282.14, described as expended for "Mayflower Hotel—Mr. Cortelyou and Judge Davis, railroad tickets, meals, and incidentals."

Scrugham apparently arrived in Washington in the middle of this period. Davis and Cortelyou were obviously in Washington fighting the Walsh resolution for investigation of the so-called Power Trust, for the resolution was defeated after Senate committee hearings on January 16 to 21, inclusive.

Yesterday afternoon the commission's hearings adjourned until next Wednesday, to give time to digest the trunk full of additional subpœnaed documents dumped in the hearing room yesterday.

ODDIE SCORES SCRUGHAM FOR POWER-LOBBY PAY

Senator TASKER ODDIE, of Nevada, yesterday made a statement criticizing ex-Governor James G. Scrugham, of Nevada, for accepting money from the power lobby:

"I was amazed that ex-Governor Scrugham should have accepted money from the power interests which are trying to defeat the Boulder Dam legislation.

"This partly accounts for some of the opposition on the part of Secretary Work and ex-Governor Scrugham to myself and to some of the important features of my stand on Boulder Dam legislation.

"Secretary Work and ex-Governor Scrugham have been working very closely together, and ex-Governor Scrugham is Secretary Work's personal representative on these matters in Nevada.

"Their attacks on my policy, in my opinion, were for the purpose of embarrassing the Boulder Dam legislation which we are trying to get through.

"I can see now where some of this influence came from."

Mr. NORRIS. Mr. President, I ask to have included in the RECORD a report from the same writer, printed in the same paper, in which the evidence reviewed shows how the State of Connecticut is being covered with propaganda, and how the school children of that State are being educated at the expense of the Power Trust along the line that is agreeable to those who control that great monopoly.

Mr. FRAZIER. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. FRAZIER. I want to ask the Senator if he understands that the Power Trust are not only furnishing these books, but donating them to the schools?

Mr. NORRIS. Oh, yes; they are donating them, and paying teachers and instructors wherever they can get them to go out in the country and make speeches. They are getting women's organizations, and all kinds of organizations that they can get. I will refer to some more of them as I proceed.

Mr. GOODING. Mr. President, does the Senator know whether the Associated Press and other organizations are carrying this news to the people?

Mr. NORRIS. I have looked into the matter for two days. In my judgment, the Associated Press carried a very small account of it. I was hardly able to get an intelligent idea of just what happened before the Federal Trade Commission from reading the Associated Press report.

Mr. GOODING. I ask that question because a newspaper man who was in the city two or three days ago, and who went over to New York, said the newspapers there were not carrying practically anything at all in connection with this investigation. He was astonished when I told him of some things the commission was uncovering. Possibly no more important information has ever been given to the public than is being furnished in the investigation now being made. Yet I understand the great press of the country is not carrying enough of it so that the people can get even an intelligent idea of what is being done.

Mr. COUZENS. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. COUZENS. Is it not also true that they catalogue Senators in some respects, as to what position they take, stating that some of them are safe and some are not? Is not that correct?

Mr. NORRIS. I have no doubt but that they have catalogued us. I do not know that that has been done down there yet, but I have no doubt that we are all classified, that some of us are classified as safe, and some of us are classified as sane, and some as bolshevik, and some as "red."

I was about to read what they were sending into the schools of Connecticut when I was interrupted. In order to meet any argument that may be made against them, they send out various things. The Senator from Montana put in the RECORD the other day a sample of a speech a man is to make when he is running against another for the United States Senate who is supposed to be friendly to Government ownership of anything. They send out a catechism to the children, consisting of questions and answers. I want to read one of them. Here is the question.

What is the effect of adverse criticism upon utility service?

A. When people in any community criticize adversely public utilities in their cities, they are advertising their own city to outsiders as a poor place in which to live and are thereby retarding its growth.

That is what the children are taught. You must not criticize the public utilities in your town unless they are owned by the municipality, and then you can give them fits every day.

Mr. JOHNSON. Is that a part of the curriculum of Connecticut?

Mr. NORRIS. It was sent into the public schools of Connecticut.

Mr. LA FOLLETTE. Does the Senator know how long ago they started teaching that in the schools up there?

Mr. NORRIS. I suppose they started it a good while ago, because I know there are men who come from Connecticut who are quite old who have those ideas.

Mr. President, I ask to have printed as a part of my remarks this entire article without further reading.

The PRESIDING OFFICER (Mr. FESS in the chair). Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Herald, April 3, 1928]

CONNECTICUT'S YOUTH TAUGHT BY CATECHISM SENT TEACHERS—GRADE SCHOOLS ALSO ARE USING PROPAGANDA PUBLISHED BY LOBBY, INQUIRY DISCOVERS—PARTY BOSS INVOLVED—RORABACK COUNSEL FOR GROUP—NATIONAL BODY OF WOMEN FORMED TO "SPREAD GOSPEL"

By Edwin J. Clapp

"The little red schoolhouse" in Connecticut is using as a textbook in classroom work the Connecticut Public Utilities Catechism, published by the Connecticut Committee on Public Service Information, it was disclosed yesterday in the Federal Trade Commission's hearing on the so-called Power Trust and the power lobby.

According to Clarence G. Willard, secretary of the Connecticut committee, 76 high schools in the State are using his "catechism," while letters from Connecticut teachers aver that it is being used in grade schools as well.

SPENDS $15,000 ANNUALLY

Other outstanding events in the day's developments were:

1. Disclosure that the Connecticut committee spends $15,000 a year, of which it gets $3,000 from the New Haven Railroad Co., $2,500 from the Connecticut company, a subsidiary of the New Haven, and $15,000 from the Connecticut Light & Power Co., a public utility, of which J. Henry Roraback, Republican boss in Connecticut, is counsel and chairman of the management committee.

2. The outlines were given of a nation-wide organization of women to spread the public-utility propaganda, their leaders being trained in a high-powered school of elocution, and then sent out like apostles to spread the gospel taught them with respect to rates, earnings, and public regulation.

3. The 1927 convention of the Great Lakes division of the National Electric Light Association, held last September, and the meeting of the Southern Appalachian Power Conference, last October, were both disclosed to have climaxed in appeals to mobilize power forces to defeat Boulder Dam.

GOT EXPENSES, TOO

4. J. Bart Campbell, Washington newspaper correspondent, who, according to the testimony, was employed by the power lobby to supply it with "news releases" at $150 per month, is shown also to have received from the power lobby money for expense accounts, varying from $51.11 to $122.85 a month.

David Lawrence, publisher of the United States Daily, which had submitted to the power lobby a proposal for a $202,800 advertising campaign in that newspaper, was defended in a letter submitted to the commission by the paper's director of advertising, Victor Whitlock, who said "the memorandum does not represent the views of David Lawrence, nor does it represent the views of our newspaper."

Judge Robert E. Healy, chief counsel of the Federal Trade Commission, admitted the letter to the record with the comment:

"I do it, however, without indicating anything as to what future inquiry may be made or seem desirable * * * as I stated, I put this in without any inference whatever as to the future action or future inquiry on the same matter."

CATECHISM IS SENSATION

Without any doubt the sensation of the day was the Connecticut public-utilities catechism, revised and distributed to schools annually by the Connecticut committee.

In the committee's annual report for the year ended March 31, 1927, appears the item: "Church press, for printing catechisms, $694.89." The cost of this year's edition was approximately $800.

The caliber of the "catechism" is indicated by the following:

"Question 9. What is the effect of adverse criticism upon utility service?

"Answer. When people in any community criticize adversely public utilities in their city they are advertising their own city to outsiders as a poor place in which to live and are thereby retarding its growth."

According to the testimony of Secretary Willard, of the committee, there are 10,110 of these catechisms in use, copies having been ordered by 76 high schools. A letter dated January 11, 1927, to Willard from E. H. Parkman, superintendent of schools, of Thompsonville, Conn., says: "We have placed the catechisms in certain high-school classes and in several of our upper-grade classes, for the teachers find them very useful, indeed."

A SOLEMN RITUAL

The catechism is offered to the Connecticut schools with all the solemnity of a research document. On January 6, 1927, Willard wrote Frank W. Strong, principal of the Durham High School, thanking him for ordering 60 copies of the catechism, and adding: "It took us six months to compile it, most of the time being spent in verifying the text and making certain that everything was exactly according to facts."

Judge Healy pressed Willard closely with respect to his authority for some of the "facts" in the catechism. For example, in the answer to question 21, the catechism says that when communities attempt to offer a light-and-power service, "in every case it has been found that the costs of the service are higher than when the service is furnished by a private corporation." Judge Healy questioned Willard, as follows:

"Q. In this paragraph 21 you undertake to prove to the high-school children that municipal ownership is a bad thing, don't you?—A. As a matter of fact; yes. I think it is so in every case I have heard of.

"Q. Don't you know whether it is or not? Don't you know that there are communities in this country served by municipal plants where the costs of the service are no higher than when the service is furnished by a private corporation?—A. I don't know.

CONVENIENT KNOWLEDGE

"Q. I want to ask you if, when you wrote that article, you knew anything at all about the cost of service in the municipality-operated plants I will name? Let us take first the city of Los Angeles.—A. Personally, I don't know."

Another of the catechism statements to which Judge Healy took exception is the following, also under question 21:

"Statistics have proven that the cost of living in cities which operate their own utilities is much higher than in cities where the public service is intrusted to private enterprise regulated by the public's servants on a commission."

This statement gave rise to the following colloquy between Judge Healy and the witness:

"Q. Do you remember whether a statement to that effect was sent out by the National Electric Light Association in a pamphlet?—A. It might have been. I don't remember.

"Q. The record here shows a statement of that kind was made by the National Electric Light Association, and the National Industrial Conference Board was cited as the authority, and we had in the record a letter from the National Industrial Conference Board, saying they never did anything of the kind.—A. That may have been a fact.

MIGHT BE ERRONEOUS

"Q. If that was the basis, it rests upon a mistaken basis, does it not?—A. I assume so."

The catechism, however, went like hot cakes in the Connecticut schools. Robert G. Blanchard, of the Lewis High School, Southington, Conn., wrote in October, 1926: "Your catechism is a real contribution to secondary education; we would like 150 copies."

The most glowing eulogy of the catechism was given by Ralph W. Hedges, principal of the Warren Harding High School, of Bridgeport, in a letter to Willard, dated September 16, 1927:

"Will you kindly send us 1,300 copies (of the new edition)? We wish to thank you very much for this material and to congratulate you upon the splendid work which you are doing for the public schools of the State of Connecticut. We not only make use of the material in many of our classes, but we also have placed a copy in the hands of every pupil in our school."

Willard testified that he keeps a stream of "clip sheets" pouring out to a mailing list of 1,036, which includes 108 newspapers, 128 banks and trust companies, 40 chambers of commerce, and 237 high-school students. In a letter of November 4, 1925, Willard reported to the chairman of the committee, Samuel Ferguson, president of the Hartford Electric Light Co., on the success of getting the clip sheets into the schools:

"For the past few months we have been making an effort to interest the high schools in the State to use our clip sheets in their classrooms, particularly in the study of civics. I believe this work is of value in shaping many future opinions. Within the next six months I trust we may be able to have our clip sheets used generally throughout the State, just as the Literary Digest and Current Events are used to-day."

Prompt action to prevent Boulder Dam legislation was taken by A. Bliss McCrum, director of the West Virginia committee, immediately after receipt of the circular telegram of January 7, 1927, sent to all State committee directors by George F. Oxley, publicity director of the National Electric Light Association. McCrum promptly wrote Oxley on January 10:

"Probably the most effective way in which the West Virginia association in this State can help is by getting in contact with Members of the House of Representatives from the State of West Virginia. I am taking the matter up with some of the more active members of the association and will ask them to get in touch with their Representatives in the House of Representatives at Washington."

CONFERENCE ALARMED

The October 13, 14, 15, 1927, meeting of the Southern Appalachian Power Conference, at Chattanooga, adopted a resolution favoring private instead of "political" ownership. The delegates were addressed by William H. Onken, jr., editor of the Electrical World, of New York City, who said:

"The inhabitants of other States are as anxious, I take it, as are the politicians of California, to protect the inhabitants of the Imperial Valley against flood. But that is not to say that they will shut their

eyes to the water grab promised in the Swing-Johnson bill or the effort also there made to put the Government in business and to thwart the Federal water power act."

The September 22–24, 1927, annual convention of the Great Lakes division of the National Electric Light Association, at French Lick, closed with the following remarks on Boulder Dam by President Sands:

"You may think that the Boulder Dam issue, in so far as Government operation of the electric light and power end of the business is concerned, is of minor importance, but it is these beginnings of the intrusion of the Government into our business that must be resisted."

A WORD TO BOSSES

Speaking at the fifth annual meeting at French Lick of the Great Lakes division of the National Electric Light Association, whose minutes were introduced into yesterday's hearing, Chester Corey, vice president of the Harris Trust & Savings Bank, of Chicago, stressed the "political value of customer ownership of the stock of public utilities." He said that "many instances could be cited of the appreciation of the politicians of the unwisdom of favoring legislation adverse to the safety of investments made in small units by a very large number of their constituents."

This September meeting at French Lick was also addressed by Miss Isabel Davis, secretary of the National Electric Light Association's women's committee, which, she said, was organized five years ago to "give the women of the country an idea of what the electric light and power industry is."

The national committee makes plans that are followed by a women's committee in each member company, meeting monthly and listening to facts on "regulation, financing, superpower, private versus political ownership, as presented by executives, and the women are encouraged to take part in the discussion following."

DESCRIBES WORK

The missionary work being done by these women was thus described by Miss Davis:

"A large number of the committee are studying public speaking under qualified instructors, with practice within their meetings. And from this activity many speakers are being developed who are qualified to appear before groups outside the industry. Two young women members of the women's committee of the southwestern geographic division traveled over that division, making a town a day, and in each town they talked two or three times. They addressed business women's clubs, women's social clubs, men's civic clubs, and even the employees of a big cracker factory, and reached thousands of men and women with facts about the industry.

"In New Orleans a young lady conducts classes of school children through the power plant, explaining in simple language the uses of electricity, how it is generated, and telling them about the policies of the company which serves them."

Mr. NORRIS. Here is another one, reporting another day's work down in the commission, from the same paper, written by the same man. I read a paragraph from it:

At hearings in the investigation of the so-called Power Trust it was frankly admitted that $20,225 of this money—

of a much larger sum—

was spent secretly, and was never accounted for.

The distributor of this money was Walter H. Johnson, of Philadelphia, until recently president of the Philadelphia Electric Co., and now head of the public policy committee, Pennsylvania Electric Association. He could not remember where a single dollar of it had gone, although on February 29 of this year he spent the last $675 of it.

I ask that the whole article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Herald, May 4, 1928]

STATE LOBBY WORKED UPON PENNSYLVANIA LEGISLATORS—FEDERAL TRADE COMMISSION BARES HOW ELECTRIC CO. PAID WAY INTO FAVOR AT CAPITAL—NO RECORD OF $20,225—PAID PROPAGANDA TWISTED BOOKS IN SCHOOLS TO CONFORM WITH POLICY OF CORPORATIONS

By Edwin J. Clapp

A $59,000 slush fund used by the electric power interests to hire lobbyists and influence legislators in Pennsylvania was uncovered by the Federal Trade Commission yesterday.

At hearings in the investigation of the so-called Power Trust, it was frankly admitted that $20,225 of this money was spent secretly, and was never accounted for.

The distributor of this largess, Walter H. Johnson, of Philadelphia, until recently president of the Philadelphia Electric Co. and now head of the public policy committee, Pennsylvania Electric Association, could not remember where a single dollar of it had gone, although on February 29 of this year he spent the last $675 of it.

There is a man who spent something over $20,000 in the course of several years, just winding up last February, and he can not give to the inquirer the name of a single person who got a penny of it. He has no recollection of the identity of anyone who got a single cent of that money. I suppose that man was under oath, and I presume most of those who are doing me the honor of listening to me now are attorneys, or, if they are not, they have had some experience in court. Is there a man within the sound of my voice who will say that a witness who handles that much money, and does it secretly, tells the truth when he says within two or three months after he is through spending it that he can not remember a single individual who got a penny of it? Nobody will believe that story.

If the ordinary man went to court or before a commission and gave that kind of testimony, nobody would hesitate to brand him as a perjurer, but if he is connected with the great Electric Power Trust that has its fangs upon the communities from the Atlantic to the Pacific and from the Lakes to the Gulf, then we look upon it just as a slip of memory.

Reading further from this article:

LEGISLATIVE LOBBY

According to exhibits introduced yesterday, $38,775 more expenditures of Johnson's public policy committee were disbursed to individuals admittedly hired to operate upon the State legislators in Harrisburg. Prominent men in Pennsylvania are involved in the disclosures.

The Boulder Dam bill, now pending in the Senate, came in for a large share of the attention of the utility organizations of Pennsylvania, which assembled in meeting to pass resolutions against it, and devoted to it liberal space in the publicity matter they distributed.

Schools and newspapers are no more neglected by Pennsylvania than by the other States thus far investigated. The State utilities information bureau has investigated the textbooks on civics and economics used in the State and published a survey, indicating "unsound" information they contained.

120,000 PAMPHLETS

Thirty thousand sets of four pamphlets on public utilities, corresponding to the "catechism" distributed by the utilities to the schools of Connecticut, have been sent out by the Pennsylvania information bureau to the school children of the State.

The testimony disclosed that in Pennsylvania they had discarded outgrown methods of sending "news" to the papers. Instead, "contact men" take matter to the editors direct.

Exhibits disclose the utility men urging liberal advertising expenditures, especially among rural newspapers, on the ground that "paid advertising is manna to the country newspaper," and "it helps you to more readily interest them in your point of view" if they are given paid advertising.

A SPY SYSTEM

An "important and confidential" memorandum addressed to "executives of Pennsylvania public utilities" by the State information bureau urges each one of them to "delegate some one of your organization to the following task:

"To report to the committee director the names of newspapers which do not quote items from the news bulletin." (Sent out by the committee.)

In other words, they not only send out paid advertising to any newspaper, according to the theory that I have just read, but they send out bulletins and then they hire spies to report to them the names of the newspapers who do not publish from those pamphlets any part of the propaganda which is sent out to them.

I remember in one of these articles—I think I ought to read that particular item—there is shown a contribution of the trust made to a religious paper, and one item of expense on that account shows an expenditure of something over $600. I can not just find it at the moment, but it is in some of the articles which I am having placed in the RECORD, and Senators will be able to find it there.

The article from which I last read continues:

An interested and attentive observer of the day's proceedings was ex-Gov. Gifford Pinchot, of Pennsylvania. More than half of the $59,000 slush fund was spent when the Pennsylvania power lobby was waging its successful attempt to defeat the 19 bills that Pinchot had introduced into the Pennsylvania Legislature to make possible its giant power system, with its provision for the sale of cheap current to municipalities and farmer groups, and also bring about a more stringent regulation of the earnings of Pennsylvania utility companies. During the afternoon Mrs. Pinchot sat by the governor, knitting.

A few feet away, another attentive spectator, sat one of Pinchot's political enemies, Philip H. Gadsden, of Philadelphia, vice president of the United Gas Improvement Co., in charge of public relations.

Gadsden is likewise vice chairman of the national power lobby, the joint committee of National Utility Associations in New York, and is also chairman of its executive committee. Gadsden was accompanied by Josiah T. Newcomb, $35,000 lobbyist of the joint committee.

The star witness of the day, and of the entire investigation to date, was Walter H. Johnson, of Philadelphia. His avocation is the chairmanship of the public policy committee of the Pennsylvania Electric Association; his business is assistant to the chairman of the board of directors of the Philadelphia Electric Co. Johnson gave a classic and an engagingly frank exhibition of the standards, the methods, and the memory lapses of men who handle special funds used to influence legislation.

He could not remember where or how or when or to whom he disbursed any of the $20,225 he had handled. All he knew was that it had been honorably and lawfully spent. He just drew the money out at different times, put it in the safe, and used it. He said he thought it was perfectly proper for a person to appear before a legislative committee as a witness and conceal the fact that he had been paid.

Here is some questioning about Pennsylvania:

JUDGE SHARPLY QUESTIONS MAN WHO HIRED "HELPERS"

Johnson's views met with sharp comment from Judge Edgar A. McCulloch, Federal Trade Commissioner in charge of the investigation, and Judge Robert E. Healy, chief counsel of the commission, who conducted the examination. With reference to Johnson's secret disbursements of cash drawn from the bank account of the public policy committee of the Pennsylvania Electric Association, the following colloquy took place:

"Q. Is it correct to say that the principal expenditures of the committee have been in connection with legislative matters in Pennsylvania?—A. That is correct.

"Q. Who employed these various lawyers and experts for the services rendered?—A. I did.

SELDOM THERE

"Q. Was that your particular function?—A. That was my particular function as chairman of the committee.

"Q. Did you attend the legislative sessions yourself to some extent?—A. Oh, very seldom.

"Q. Do you discuss the bills with the members of the legislature?—A. I discussed the bills with counsel.

"Q. You don't go up and undertake to buttonhole the legislators?—A. No, sir.

"Q. Your method is to stir the people back home up to write the legislators?—A. That is correct.

"Q. That is the way you have the pressure exerted on them?—A. Yes, sir.

"Q. And through your counsel you get people to go and speak against the bill?—A. Correct.

YES, OF COURSE

"Q. Are the counsel also expected to talk with legislators outside of committee hearings?—A. Why, of course, I don't see why they should not.

"Q. And if they can get a friend of theirs in the legislature to oppose a measure there, they are expected to do that?—A. Of course they are.

"Q. If one or more of them has a specially wide acquaintance in the legislature, wouldn't that be looked upon as an advantage?—A. It certainly would.

"Q. Do you think it takes special legal skill to do this kind of work that is referred to in the legislature, or don't you undertake to select men that are popular with the legislators and have a wide acquaintance in the legislature?—A. I should say that, of course, we employ men that have a wide acquaintance. Yes; certainly; but they are honorable and they have got to have good common sense."

---

HE KEPT NO EXPENSE BOOK, "SO NONE COULD EVER KNOW"

Johnson admitted to Judge Healy that he had been "the main legislative man in the public-policy committee" and that he had received, on dates specified, $20,225 in cash from W. E. Long, treasurer of the committee, the sums ranging from $250 to $7,500, the last payment being $675 on February 29, 1928. With respect to each item the question was asked, "What did you do with it?" and the answer was, "I don't know." For example:

"Q. On the 18th of March, 1927, you received in the same way the sum of $7,500?—A. Correct.

"Q. What did you do with that?—A. I don't know. If Mr. Long had told me, I would recall it. It might have been some cleaning-up matters.

"Q. Who cleaned up?—A. Well, what I mean is not the way you are taking it. There are expenses connected with the honorable discharge of duties performed, and that is the only way I can account for that.

WANT IT SECRET

"Q. If they are incurred in an honorable discharge of duties, why is the payment handled by Mr. Long drawing the money and turning it over to you in cash?—A. Simply because people—we don't want people to know who gets the money.

"Q. Very good. You don't want people to know who gets the money.—A. I don't know who got it. I can not answer that. I can't answer that if my life depended upon it. The legislature is in session year by year. I had a corporation I was trying to handle, and I had to have people do the details for me, doing the work, as you have your honorable, distinguished attorneys around you to assist you.

"Q. I am beginning to understand why you were chairman of the committee. Answer my question. If this money was spent honorably and lawfully, would there be any objection to telling who got it and how much?—A. Yes, sir; there would.

"Q. There would, although it was honorable and lawful?—A. Yes, sir.

"Q. But you are unable to tell about where any of this money went?—A. Correct.

ALWAYS A SECRET

"Q. Beginning with the first item in December, 1922, your mind is just as blank as with respect to the one of March 18, 1927?—A. That is correct.

"Q. Barely a year ago?—Yes, sir.

"Q. The sum of $7,500?—A. Yes, sir.

"Q. Have you no recollection at all as to why you proposed to Mr. Long that the money should be handled in this way?—A. Except I thought it was the way to do it.

"Q. It was because you didn't want it known who got the money and how much, Mr. Johnson?—A. Of course.

"Q. And if we don't know who got the money and how much, we will never know what they got it for, will we?—A. No, sir.

"Q. Or whether it was honorable and lawful?—A. No, sir.

"Q. And you don't intend to tell us, do you?—A. I don't know. I scratched my brain to try to find out."

At this point Commissioner McCulloch intervened:

"Commissioner MCCULLOCH. You can't remember a single individual you paid any of that money to?

"The WITNESS. No, sir.

"Commissioner MCCULLOCH. Did you carry it around in your pockets and hand it out?

"The WITNESS. No; I paid it out—I put it in the safe and used it. That is, if it was for entertainment, traveling expenses, I would send for people and pay their expenses and then give them something for their services.

"Mr. HEALY. Wasn't some of that money paid to people in that way that were to go before the legislature and into the committees in opposition to these bills?

"A. I should think so, but I would not say so.

"Q. A person paid by your association would go to the legislature and oppose a bill without disclosing the fact that he was being paid?—A. Of course.

"Q. That would be perfectly honorable and lawful?—A. Yes, sir.

"Q. All right. That gives us some standard by which we can judge the use that was made of the rest of the money, perhaps"—

And so on. Mr. President, I ask to print, without further reading, the remainder of the article.

The PRESIDING OFFICER (Mr. SACKETT in the chair). Without objection, it is so ordered.

The remainder of the article referred to is as follows:

WHO TOOK THE BIG MONEY BROUGHT TO LIGHT AT LAST

Judge Healy questioned Mr. Johnson closely to ascertain whether the public policy committee had opposed the giant power bills of Governor Pinchot because they opened the way for the development of public ownership. Mr. Johnson was unable to recall that public ownership was in any way a feature of the giant power proposition until he heard Judge Healy read into the record a pamphlet attacking Giant Power on this ground written by Charles Penrose, brother of the late Senator Boies Penrose, and given nation-wide circulation by the Pennsylvania Utility Association assisted by the Investment Bankers' Association.

Mr. Johnson closed his testimony with: "I do not think that the Giant Power bills are practical, to begin with, and I do not think that they are to the best interests of the dear people."

Among the known recipients of the funds of the Pennsylvania Association's public policy committee, a leading beneficiary was John P. Connelly, who got $14,103, of which $11,525 was paid him during the period when the utility companies were fighting the giant power bill and the tri-State water-power pact. Connelly is a chief lieutenant of WILLIAM S. VARE, Philadelphia Republican boss, who spent $800,000 to win a seat in the United States Senate in 1926 and has not yet been seated.

LAWYER LOBBYIST

Payments totaling $14,615 were made to the Philadelphia law firm of Hause, Evans & Baker, one of whose members, Berne T. Evans, is known as the chief lobbyist of the power interests in Pennsylvania. All but $2,000 of this fund was paid during the fight over giant power and the tri-State pact.

J. H. Bigelow, chairman of the Democratic State committee, got $1,000 on March 3, 1926. On April 17, 1926, $1,000 was paid to James F. Burke, of Pittsburgh, former Member of Congress, and one of Andrew W. Mellon's political lieutenants. The $1,000 to Burke was

paid via the Duquesne Light & Power Co. Burke was VARE'S original counsel in the Reed committee investigation.

Another $1,000 went to William T. Ramsey, formerly wet mayor of Chester, Pa., and former member of the State legislature. This payment was likewise made indirectly, a double play from Long to Ramsey via Albert R. Granger.

Daniel T. McKelvie, of Hazelton, whom Long described as "not a lawyer," received a total of $7,050 for services on legislative matters between March 3, 1926, and April 26, 1926.

NEWSPAPERS, COLLEGES

The technique of handling the newspapers was explained by A. G. McKenzie, director of the State utility information bureaus of Pennsylvania and New Jersey, at a meeting of the Pennsylvania Electric Association on November 7. Mr. McKenzie spoke about the value of utility companies carrying advertisements in the newspapers, especially the small and rural papers. He stated it was his experience that it was extremely difficult to interest the newspapers in your welfare unless you are interested in the welfare of the newspapers.

The minutes of the same November meeting also disclosed some attention paid to the colleges:

"Mr. Kuhn mentioned that he believed it would be a good idea to check up on the trend of teaching as imparted in the colleges and universities, especially in economics and liberal arts schools, in relation to the utilities. So many courses in these schools are in the form of lecture courses, and unless the professors have the right point of view, immense damage will be done to the industry. Most of these lectures are not based on textbooks, consequently, he declared, the textbooks will not disclose the main source of the trouble."

Examination of the weekly clip sheets of the Pennsylvania Public Utilities Information Bureau during 1927 discloses frequent items attacking the present Swing-Johnson bill for Boulder Dam, with major articles against them on February 14 and September 12. A meeting of the public relations committee of the Pennsylvania Electric Association at Altoona, Pa., February 28, 1927, was largely devoted to attacking the Boulder Dam bill and devising means of fighting it.

SWING-JOHNSON BILL

The meeting was called to order by Mr. Shearer with this address:

"It is quite an opportune time for this meeting to be scheduled because of the agitation being fostered in various quarters against the public utilities. It is essential that steps be taken by the industry to combat the propaganda of the agitators. Every day brings to our attention some new movement aimed at the public utilities.

"At the present time there is pending in the Senate the 'Swing-Johnson bill,' which is being promoted primarily by a group of legislators interested in the nationalization of the electric light and power industry. This bill is the first big effort of the Government ownership group to get the Federal Government to go into the power business. This bill is of momentous importance to the electric light and power industry, because it will establish a precedent for other similar projects.

"We also have ex-Governor Pinchot active as ever in the promotion of his 'Giant power.' Only recently he paid a visit to Portland, Me., to deliver an address on the 'Superpower monopoly.' He is now in Washington and is quite active behind the scenes, in all Government ownership propaganda. Only on last Friday Senator WALSH of Montana introduced a bill in the Senate providing for investigation of the public utilities.

"In addition to these efforts we have men of the caliber of Professor Ripley, of Harvard, issuing articles and books, all aimed at the electric light and power industry."

Hearings will resume this morning at 10 o'clock.

Mr. NORRIS. The question is asked sometimes by the writer and the question presents itself to anyone who looks into it or who listens to this wonderful tale of evidence coming before the Federal Trade Commission, Who pays the bill? Where did they get the $7,500. Where did they get the $400,000 that was used to pay the lobby in this city? Where did the other company, speaking of the electric light company, get the more than $1,000,000 that was used in propaganda purposes? Who paid this money? Just ask yourselves the question, Who paid this money?

Every penny of it came from those who use the public utilities. They have no other source of income. The man who, by the electric light in his humble home, reads his evening paper, is making his contribution. The woman turning out washing for her neighbors with an electric washing machine is paying her share of this boodle money. Every man who uses an electric light, every man who uses any electric power, whether he is getting it in large quantities or in small quantities, is making his contribution. Although it may be made in pennies, in the aggregate it amounts to millions. That same money is used to deceive the very men and the very women who make the contributions from their daily wages.

That is what is being shown up right in this city. The evidence discloses the fact that it is coming from all over the United States. I have only touched some of the high spots. They have only touched some of the high spots as far as they have gone. But it does disclose that this organization, handling millions of dollars, is looking after not only the Senate of the United States, not only the House of Representatives of the United States but every legislature in the land, and down to every street commissioner running for office where he has anything to do with regulation. It will be found that they are some of the principal contributors in presidential campaigns. There is nothing that escapes this great trust. From the public schools and the humble homes into the public halls of the legislatives and the palaces of the officials, both of the State and of the Nation, this wonderful trust is sending its information tending to deceive and to misrepresent the truth to the American people.

INDEPENDENT OFFICES APPROPRIATIONS

Mr. WARREN. Mr. President, the bill now before us, the independent offices appropriation bill, is the second one we passed this session. It has been in the mill all the time up to the present moment. No one can be more sorry than I am that we must disappoint the Senator from Wisconsin [Mr. LA FOLLETTE], but we have done all that I feel we can do.

I want to ask the Senator himself and I want to ask all Senators present to vote "yea" upon the motion, so we can finish with this long, drawn-out affair which we have had on our hands for some two months.

Mr. LA FOLLETTE. Mr. President, I feel that this amendment is of too much importance to yield to the appeal of the Senator to vote with him upon this motion.

In connection I ask to have inserted in the RECORD at this point a copy of a letter written by Andrew Furuseth to Hon. Martin B. Madden at that time chairman of the Committee on Appropriations of the House.

The PRESIDING OFFICER. Without objection, it is so ordered.

The letter is as follows:

JANUARY 2, 1928.

Hon. MARTIN B. MADDEN,
*Chairman Committee on Appropriations of the*
*House of Representatives,*
*House Office Building, Washington, D. C.*

DEAR SIR: On behalf of the seamen I beg most respectfully to call to your attention that there are two services which are substantially duplicating, and for the expenses of which appropriations have for some time past been made by Congress.

This matter was brought to the attention of Mr. WOOD'S subcommittee. I was granted a hearing in which I tried to develop the facts. Fearing that to some extent I failed, I beg respectfully to submit the following facts:

The sea service bureau was organized as a war measure and as such it did fully as much good as might be expected. In the war there were three lines of service that might be followed by a young man. The Nation needed men for the Navy, and the young man might enlist for a specific time; it needed men for the expanding of the merchant marine, and here the young man might enlist for the war, if he could find the proper information, the means to reach a seaport and the opportunity to join a vessel; or he might be drafted for the Army. There might be the most honorable reasons why he desired to choose the merchant service. Mr. Henry Howard, a wealthy citizen of Boston, undertook to perfect an organization which would give to the young man the information and the means to permit him to choose the merchant marine. It was called the Recruiting and Training Service. The young men were recruited, given a very short training, and then were sent to the vessels, where they were utilized by mixing them with the more experienced men, and thus expand the personnel very sorely needed. The young men came in great numbers, they served during the war. They wrote home and urged others to come; they came, and the organization was a success during the war.

When the armistice came the men, who had come from motives of patriotism—and they constituted the great majority—left to take up their duties on shore. The sea service bureau then became nothing but an employment office and partly a duplication of the United States shipping commissioners' offices, which had since 1872 been in operation in all ports of entry which were also ports of ocean navigation. The purpose of those offices was to furnish a place where masters might come to select crews for their vessels without the interference of private employment agents, usually called crimps. That such was part of their duty is found in section 4508, Revised Statutes, page 41, navigation laws, 1927, which reads:

"First. To afford facilities for engaging seamen by keeping a register of their names and characters.

"Second. To superintend their engagement and discharge in manner prescribed by law.

"Third. To provide means for securing the presence on board at the proper time of men who are so engaged.

"Fourth. To facilitate the making of apprenticeships to the sea service.

"Fifth. To perform such other duties relating to merchant seamen or merchant ships as are now or may hereafter be required by law."

The sea service bureau is duplicating these duties except in the bare signing and discharging of the men and that having relation to apprenticeships, and the work is done in such way that it violates the law as laid down by the Supreme Court of the United States; that it deprives the master of the right to select the men for his vessel by keeping a deferred list (blacklist) of the seamen who, for one reason or another, may have become disliked by any of the officers of the last vessel. (See hearing.)

The young American seeing his shipmate blacklisted or finding himself blacklisted writes to his home and friends, who as a result stay away. This again results in the best and most promising young men refusing to seek the sea and thus leaves the bureau in position to gradually furnish the more unfit. There is thus created a condition under which unfitness is steadily increasing, and this is not the only grievance that the young man has against the sea service bureau, though it is one of the most serious and the one most easily proven. (See hearings.)

The condition results in a turnover under which any development of a skilled personnel is impossible.

The president of the Merchant Fleet Corporation confesses to this much when he says:

"A recent investigation of the accidents occurring on one steamship line discloses that three of every five of the injuries or deaths result from human rather than mechanical failure."

To one who knows sea life it is rather plain that the human failure is also responsible for, or at least very largely responsible for, the two mechanical failures, because in a seaworthy vessel with a seaworthy crew—and that means a skilled personnel—the mechanical failures are discovered and replaced. It would thus appear that the lack of skill is even more serious than stated.

In the name of not only the seamen, but in the name of the hope that we have for the development of a necessary sea power for America, this letter is submitted in addition to what was developed in the hearing.

Most respectfully yours,

ANDREW FURUSETH,
*President International Seamen's Union of America.*

---

Tradition and history alike testify to the wisdom of having the master select the crew for his vessel, and the decisions of the courts, extracts of and references to which are found below, make it part of the maritime law.

Farrell *v.* McCrea (1 Dallas, 304, 305):

"There was no distinction in this respect, between the mate and a common mariner; they were alike subject to the order of the master, who could equally refuse to receive either; or, when received, was equally empowered to dismiss them, for his appointment as master gave him the sole undoubted and exclusive right of choosing every seaman under him, whatever courtesy he might be inclined to show to the recommendation of those by whom he was himself employed."

Butler *v.* Boston Steamship Co. (130 U. S. 527, 554):

"By virtue of his office and the rules of the maritime law, the captain or master has charge of the ship and the selection and employment of the crew. * * *"

Respondents' rules are, therefore, in derogation of the decisions of this court and the general maritime law. The master being responsible for the wages of the crew and the safety of the ship and the lives of everyone on board, he should have the common right of selecting his own crew.

The PRESIDING OFFICER. The question is, Shall the Senate recede from its amendment No. 9?

Mr. LA FOLLETTE. On this question I ask for a division.

On a division, the motion was agreed to.

ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

H. R. 10536. An act granting six months' pay to Anita W. Dyer; and

H. R. 12733. An act to authorize the refund of certain taxes on distilled spirits.

GOV. ALFRED E. SMITH

Mr. BRUCE. Mr. President, I desire to have inserted in the RECORD a letter from Mr. Frank R. Kent to the Baltimore Morning Sun of this morning, in which he laughs to scorn the idea that after we have forced, as we have practically done, the nomination of Governor Smith as President of the United States, we propose to acquiesce in the insertion in the next Democratic national platform of a dry plank or any dry being associated with Governor Smith as a candidate for the Vice Presidency.

I desire to read just one short paragraph:

It is manifestly absurd to nominate Smith, a recognized and avowed wet, and then stand him on a dry platform or link him with a dry running mate. To do either of these things would make the candidates and the party ridiculous. It is possible in politics to straddle and it is possible to pussyfoot, but it is not possible to face simultaneously both ways without some sort of camouflage or concealment.

To nominate Smith on a dry platform and with a dry candidate for Vice President would simply be a great national joke.

I ask that the entire article be inserted in the RECORD at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article is as follows:

[From the Baltimore Sun, May 4, 1928]

THE GREAT GAME OF POLITICS—A SENSE OF DIRECTION IS IMPORTANT

By Frank R. Kent

WASHINGTON, May 3.—With the selection of Governor Smith as the Democratic standard bearer conceded on all sides the interesting question now is: What logically follows? Where does this leave the Democratic Party? In what direction is the donkey faced? In other words, what does the Smith nomination mean?

The answer seems clear. The California primaries not only definitely determine the party nominee but with almost equal definiteness indicate his issue. It is manifestly absurd to nominate Smith, a recognized and avowed wet, and then stand him on a dry platform or link him with a dry running mate. To do either of these things would make the candidates and the party ridiculous. It is possible in politics to straddle and it is possible to pussyfoot, but it is not possible to face simultaneously both ways without some sort of camouflage or concealment.

To nominate Smith on a dry platform and with a dry candidate for Vice President would simply be a great national joke. It will not likely be done, though some of our most earnest politicians and publicists are proceeding on the theory that it will. They talk and write earnestly about the necessity of nominating for second place a Protestant dry from the South and insist that a plank satisfactory to the friends of the Volstead Act must be incorporated. Carrying out this idea, all of the vice presidential possibilities mentioned in the Washington dispatches are drys—Moody, of Texas; Daniels or McLean, of North Carolina; Hull, of Tennessee; George, of Georgia; Byrd, of Virginia.

The Protestant and South part of this is sound enough, but it is hard to understand how the idea of a dry can be reconciled with reason—why it does not at once appear impractical and impolitic on its face. Logically, such a course could not fail to weaken the ticket. To the extreme wets it would seem a cowardly compromise. To the extreme drys its rank insincerity would be plain. To the moderates the incongruity of a dry and a wet on the same ticket would seem inexcusable. It would be as if in former campaigns a free silverite had been linked with a gold-standard man, or a high protective tariff advocate with a free trader.

It just will not work. Plainly, prohibition is going to be the vibrant question of the campaign. It is all very well to talk about corruption as the big issue, but no practical politician believes it possible to arouse the people very greatly now over the misdeeds of the Harding régime, rotten as they were. California showed that. The two candidates who regard corruption as the issue were the two Senators whose work in uncovering corruption has placed the country deeply in their debt—WALSH and REED. Their national services are far greater than any rendered by Smith. Yet Smith beat them 5 to 1; got many more votes than both combined. WALSH, a convinced dry, ran last. REED, a wet, who wants to subordinate all issues to corruption, was a poor second. Smith, the real wet, got more than 60 per cent of the total Democratic vote in this dry State.

It is impossible to question that those who voted for Smith did so because they approve the things for which he stands. The principal thing for which he stands, so far as the voters outside New York know, is modification of the Volstead Act. Hoover, who will probably be his Republican opponent, does not favor modification, and his party will not propose it. What an absurdity under the circumstances for the Democrats to nominate a man for President who favors liberalization of the Volstead act and a man for Vice President opposed to any change?

They would be traveling in opposite directions on the main line. The presidential candidate's views on the big issue would clash with the vice presidential candidate's. There would be discord from the start. Smith's running mate would be in tune with Smith's opponent, rather than with Smith. Smith would have—to avoid stultification—to repudiate his running mate or his party platform, or both.

It isn't possible to affirmatively face both ways and get away with it this time. It might be if the presidential nominee had no views and

no record on this issue; but it is not possible with Smith, who has both views and record. Unless the party is prepared to adopt a platform and provide a running mate in sympathy with its leader, it might as well throw up the sponge. "If," as one newspaper says, "they are not going to follow him it is absurd to nominate him." A hybrid ticket on a pussyfooting platform will hardly make an effective appeal. If you run in both directions, you never arrive.

DONATION OF BRONZE CANNON TO CHARLESTON, S. C.

Mr. SHEPPARD. From the Committee on Military Affairs, I report back favorably without amendment the bill (H. R. 6492) to authorize the Secretary of War to donate to the city of Charleston, S. C., a certain bronze cannon, and I submit a report (No. 1001) thereon. I call the attention of the Senator from South Carolina [Mr. BLEASE] to the report.

Mr. BLEASE. I ask unanimous consent for the present consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole, and it was read, as follows:

*Be it enacted, etc.*, That the Secretary of War is authorized and directed to donate, without expense to the United States, to the city of Charleston, S. C., a smoothbore, muzzle-loading, bronze field gun, No. 124, captured from the Confederate forces, and now in the Watervliet Arsenal, Watervliet, N. Y.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TAX REDUCTION

Mr. CURTIS. Mr. President, I ask that the revenue bill be laid before the Senate.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to; and the Senate (at 5 o'clock and 25 minutes p. m.) took a recess until to-morrow, Saturday, May 5, 1928, at 12 o'clock meridian.

## NOMINATIONS

*Executive nominations received by the Senate April 4 (legislative day of April 3), 1928*

MEMBER OF UNITED STATES CUSTOMS COURT

Genevieve R. Cline, of Cleveland, Ohio, to be a member of the United States Customs Court, in place of Hon. William C. Adamson, retired.

APPOINTMENTS IN THE REGULAR ARMY

Capt. George Edward Kraul to be a captain of Infantry, with rank from July 1, 1920.

(NOTE.—The nominee is now a captain of Infantry, with rank from November 25, 1920. This message is submitted for the purpose of correcting an error in his date of rank.)

MEDICAL ADMINISTRATIVE CORPS

*To be second lieutenants*

Staff Sergt. Omer Antonio Couture, Medical Department, with rank from April 30, 1928.

Staff Sergt. Edward James Gearin, Medical Department, with rank from April 30, 1928.

Staff Sergt. Ralph Beveridge Robinson, Medical Department, with rank from April 30, 1928.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY

JUDGE ADVOCATE GENERAL'S DEPARTMENT

Capt. Ernest Hill Burt, Infantry (detailed in Judge Advocate General's Department), with rank from July 20, 1918.

Capt. John Fulton Reynolds Scott, Cavalry (detailed in Judge Advocate General's Department), with rank from July 1, 1920.

Capt. Frank Eugene Shaw, Infantry (detailed in Judge Advocate General's Department), with rank from July 1, 1920.

Capt. Clarence Charles Fenn, Infantry (detailed in Judge Advocate General's Department), with rank from July 1, 1920.

PROMOTIONS IN THE REGULAR ARMY

*To be captain*

First Lieut. Mahlon Milton Read, Coast Artillery Corps, from April 27, 1928.

*To be first lieutenants*

Second Lieut. William Augustus Davis Thomas, Field Artillery, from April 27, 1928.

Second Lieut. Eugene Lynch Harrison, Cavalry, from April 27, 1928.

PROMOTIONS IN THE NAVY

Lieut. Benjamin F. Staud to be a lieutenant commander in the Navy from the 2d day of October, 1927.

Lieut. (Junior Grade) Carl H. Reynolds, jr., to be a lieutenant in the Navy from the 16th day of November, 1926.

The following-named acting chaplains to be chaplains in the Navy, with the rank of lieutenant, from the 2d day of June, 1927:

William H. Rafferty.
John E. Johnson.

The following-named acting chaplains to be chaplains in the Navy, with the rank of lieutenant, from the 1st day of July, 1927:

Joseph E. McNanamy.
Homer G. Glunt.
Edward J. Robbins.
Charles A. Dittmar.
Emerson G. Hangen.

Boatswain George P. Childs to be a chief boatswain in the Navy, to rank with but after ensign, from the 5th day of August, 1926.

The following-named pay clerks to be chief pay clerks in the Navy, to rank with but after ensign, from the 3d day of December, 1927:

Andrew E. King.
Rufus Hendon.
Fred Robinson.
Chester W. Utterback.
Wilburn Bates.

## CONFIRMATIONS

*Executive nominations confirmed by the Senate May 4 (legislative day of May 3), 1928*

PROMOTIONS IN THE NAVY

*To be lieutenant commanders*

Herbert B. Knowles.
Stanwix G. Mayfield, jr.

*To be lieutenants*

Clement R. Baume.
Henry T. Wray.

*To be lieutenants (junior grade)*

Louis D. Sharp, jr.
Charles M. E. Hoffman.
Edward P. Creehan.

*To be surgeon*

Frederick W. Muller.

*To be chief pay clerks*

Charles G. Crumbaker, jr.
John K. Chisholm.
Arthur L. Sullivan.
Stanley B. McCune.
Henry L. Greenough.
Chastine A. Murray.

IN THE MARINE CORPS

*To be captains*

Hal N. Potter.
Oliver T. Francis.
Edward A. Fellowes.
Robert C. Kilmartin, jr.
Edward A. Craig.
Lester A. Dessez.

*To be first lieutenants*

Shelton C. Zern.
John E. Curry.
Richard M. Cutts, jr.
Frank D. Weir.

POSTMASTERS

IOWA

Melvin V. Smith, Akron.
Claude M. Sullivan, Cherokee.
Orpha M. Bloomer, Havelock.
Wilbert W. Clover, Lohrville.
Celia T. Green, Mystic.
Loys E. Couch, Newell.

MARYLAND

Samantha E. Wilson, Mardela Springs.

PENNSYLVANIA

Wade M. Henderson, Brookville.
Laura M. Peacock, Houston.

WEST VIRGINIA

Robert S. Hornor, Bridgeport.

## HOUSE OF REPRESENTATIVES

FRIDAY, *May 4, 1928*

The House met at 12 o'clock noon.

Rev. John Compton Ball, pastor of the Metropolitan Baptist Church, Washington, D. C., offered the following prayer:

Almighty and everlasting God, when we consider the heavens, the work of Thy fingers, the moon and the stars, which Thou hast ordained, what are we that Thou art mindful of us and that Thou shouldst visit us? And then we read that Thou hast made us but a little lower than Thyself and hast crowned us with glory and honor—glory in that we bear Thy divine image, honor in that we think Thy thoughts after Thee. For this we thank Thee; and with such knowledge in our hearts and on our lips, we pray that Thou wouldst bless us with Thy wisdom, so that in all the deliberations of this day we may express the thought and interpret the will of the living God. May the words of our mouths and the meditations of our hearts be acceptable in Thy sight, O Lord, our strength and our Redeemer. For Jesus' sake. Amen.

The Journal of the proceedings of yesterday was read and approved.

### MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 8229. An act for the appointment of an additional circuit judge for the sixth judicial circuit;

H. R. 10536. An act granting six months' pay to Anita W. Dyer; and

H. R. 12733. An act to authorize the refund of certain taxes on distilled spirits.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3594. An act to extend the period of restriction in lands of certain members of the Five Civilized Tribes, and for other purposes; and

S. 1727. An act to amend the act entitled "An act to amend the act entitled 'An act for the retirement of employees in the classified civil service, and for other purposes,' approved May 22, 1920, and acts in amendment thereof," approved July 3, 1926, as amended.

### AMERICAN MERCHANT MARINE

Mr. RAMSEYER. Mr. Speaker, I call up House Resolution 175, a privileged resolution from the Committee on Rules.

The SPEAKER. The gentleman from Iowa calls up a resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 175

*Resolved*, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of S. 744, entitled "An act to further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States, and for other purposes." That after general debate, which shall be confined to the bill and which shall continue not to exceed four hours, the time to be equally divided and controlled by those favoring and those opposing the bill, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider without the intervention of the point of order as provided in clause 7 of Rule XVI the substitute committee amendment recommended by the Committee on the Merchant Marine and Fisheries now in the bill, and such substitute for the purpose of amendment shall be considered under the five-minute rule as an original bill. At the conclusion of such consideration the committee shall rise and report the bill to the House with the committee substitute, as amended, and the previous question shall be considered as ordered on the bill and committee substitute thereto to final passage without intervening motion except one motion to recommit.

Mr. RAMSEYER. Mr. Speaker, this resolution makes in order the consideration of Senate bill 744, which passed that body and then was referred to the House Committee on the Merchant Marine and Fisheries. That committee, after considering the Senate bill, struck out all of the Senate bill after the enacting clause and substituted an entirely new bill. The Senate bill covers less than three pages while the House bill covers 22 pages. The bill as reported out by that committee is a comprehensive bill.

The rule is in the usual form. It provides for general debate not to exceed four hours, the debate to be on the bill, half the time to be controlled by those in favor of the bill and half by those opposed to the bill. The Senate bill, 744, was reported by the Committee on the Merchant Marine and Fisheries without opposition, and this resolution comes from the Committee on Rules with a unanimous report.

The rule further provides that:

It shall be in order to consider without the intervention of the point of order as provided in clause 7 of Rule XVI the substitute committee amendment recommended by the Committee on the Merchant Marine and Fisheries now in the bill, and such substitute for the purpose of amendment shall be considered under the five-minute rule as an original bill.

But for that rule you could only consider the House provisions as one amendment to the Senate bill. The rule makes it in order to take up the committee substitute to be read section by section under the five-minute rule, with the right to offer amendments to each section as it is reached for consideration.

Then there is another thing. Some of the House provisions may not be germane to the Senate provisions, and that is the reason why for the provision of the rule relative to clause 7 of Rule XVI, which reads:

And no motion or proposition on a subject different from that under consideration shall be admitted under color of amendment.

So that if there should be any provision in the House bill not germane to the provisions of the Senate bill a point of order against such provision on the ground of germaneness would not lie.

Mr. Speaker, I yield to the gentleman from North Carolina [Mr. POU] such time as he desires to use.

Mr. POU. Mr. Speaker, this was a unanimous report from the Committee on Rules. There is no controversy with respect to the rule. The ranking minority member of the Committee on the Merchant Marine and Fisheries came before the Committee on Rules and joined in the request for this rule.

Mr. RAMSEYER. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. WHITE of Maine. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of Senate bill 744 to further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States, and for other purposes. Pending that motion, I would like to inquire about the control of the time. The rule provides that the time shall be controlled by those in favor and by those opposed to the bill. So far as my knowledge goes there is no Member who is opposed to the bill. There is no member of the committee opposed to the bill, and I know of no Member of the House who desires to control the time in opposition. I therefore ask unanimous consent that the time may be equally controlled by myself and the gentleman from Tennessee [Mr. DAVIS], the ranking minority member of the committee, with the understanding we will yield equally to those who may be opposed to the bill.

The SPEAKER. The gentleman from Maine moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill S. 744 and pending that motion asks unanimous consent that the time may be equally divided between himself and the gentleman from Tennessee. Is there objection?

There was no objection.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill S. 744, with Mr. CRAMTON in the chair.

The Clerk read the title of the bill.

Mr. WHITE of Maine. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection to the request of the gentleman from Maine?

There was no objection.

Mr. WHITE of Maine. Mr. Chairman and members of the committee, I will undertake in the first instance to briefly describe the situation in which we find ourselves with respect to our merchant marine, and to make reference to some of the tendencies which ought to engage our serious consideration. I will then, time permitting, go through the bill somewhat in detail, explaining to the Members of the House the particular provisions of the bill and indicating what we of the committee hope to result from its passage.

A merchant marine of adequate size and of proper types of vessels assures to the country possessing the same commercial independence and national security. America must have both.

So long as the productive capacity of our farms and factories, our forests and mines, exceeds the needs of our people, this Nation's well-being is dependent upon sea transportation, for an unsold exportable surplus leads inevitably to curtailment in business activity, to agricultural depression, to unemployment, and to all the misfortunes incident to such conditions. We produce one-half more cotton than we use, one-third more wheat and pork, and 15 per cent more of manufactured products. These excesses and others over our domestic needs must be sold and delivered abroad, and it is ships alone which can make this necessary delivery.

The value of our exports for the calendar year 1926 totaled $4,809,000,000. These goods sold abroad assured American industry a substantial degree of prosperity. Unsold, they would have brought deflation, stagnation, idleness, privation.

During the calendar year 1926, 33 countries participated in the carriage of our foreign trade. There were 58,500 entrances and clearances of vessels carrying more than 112,800,000 cargo tons, upon which the freight bill approximated $728,000,000.

Of this total volume of trade, vessels of American registry carried about 34 per cent and this 34 per cent in volume was almost exactly 34 per cent in value. We paid, therefore, to foreign vessels not far from $500,000,000 for the carriage of goods sold or bought by us. This was tribute paid to foreign interests for a service which American ships in large measure should have rendered.

Of equal importance with the present facts as to our participation in this ocean trade are the tendencies with respect to such trade. The decline in the percentage of goods carried in American ships has been marked and is of sinister significance. In 1921 American vessels carried 51 per cent of our exports and imports. In 1923 this proportion had dropped to 44 per cent, in 1925 to 40 per cent, and in 1926 to 34 per cent, and the percentage for the last year is even less. While these losses were taking place in the tonnage carried by American ships, the aggregate tonnage carried by foreign ships correspondingly increased, moving from 49 per cent in 1921 to 66 per cent in 1926. Of 59 principal ports of the United States through which moved inbound and outbound foreign cargo tonnage, the percentage carried in foreign vessels increased in 47 of the 59 ports between 1921 and 1926. This distribution of foreign shipping activity indicates the extent of the competition to which American vessels are subjected and the increase in the tonnage carried on foreign ships demonstrates the effectiveness of this competition.

The tragedy of American shipping is further emphasized by the facts with respect to shipbuilding. It is a lamentable truth that there has been a continuous decline in this industry in the United States since 1921. Of vessels of seagoing size built in the world between January 1, 1922, and August 15, 1927, amounting to 7,900,847 tons, only 309,264 tons were built in the United States. Of 1,034 vessels constituting this tonnage only 41 were built in the United States, and of 307 motor ships included in this total only 2 were built in the United States. Great Britain built 14 times as many as the United States. Since 1921 not a single ship has been built in the United States for the overseas trade, but of 4,085 foreign ships more than 20 per cent have been built within the last six years.

At the end of 1927, 3¼ per cent of the tonnage under construction in the world was building in our country, the lowest at any time in more than 35 years, but at the end of March, 1928, our percentage had shrunk to 2 per cent, about 58 per cent lower than at end of 1927. The United States as of this latter date ranked tenth among the nations of the world in shipbuilding. These shipbuilding figures tell their story as to the character of the present fleet of vessels under the American flag, of the condition of our yards, and they have another important bearing. With the disappearance of our yards and the absence of work we lose the physical capacity to build ships, and of equal importance, the technical staff essential for this highly specialized industry. Years of training and of experience is necessary to design the hull of a first-class passenger or naval vessel, but designing of machinery involves even greater complications. Because of a want of shipbuilding work in this country, our technical men are disappearing. The technical employees in our yards to-day are but one-quarter the number of 1916.

The first modern battleship built in the United States was the *Texas*. She was built at Norfolk Navy Yard, but her designs were purchased from an Englishman because the United States had not at that time the experience to build such a ship. Ten more years like the last will bring us to a like condition, subject us to the same humiliation and danger.

This want of shipbuilding within the United States has permitted foreign nations to outstrip us in the construction of new and modern vessels. Constant replacements are necessary if a fleet is to be maintained to the highest point of efficiency, and vessels built must be of the modern type. Speed in later years has become increasingly important. An analysis of the figures shows that of the seagoing vessels of the principal maritime nations Great Britain has 886 built within five years, Germany has 180 built within this time, and the United States but 84. Japan, Italy, and France have slightly less in numbers than the United States but the tonnage of the new vessels of France and of Italy exceed substantially the tonnage of the 84 United States vessels built during these years. Of recent construction Great Britain has ten times the number of ships of the United States, and Germany has twice as many modern ships as fly our flag. Considered with reference to speed, Great Britain has 1,039 seagoing vessels with a speed in excess of 12 knots. The United States has but 180 such vessels. Of 16 knots speed and above, Great Britain has 158; we have 51.

The figures heretofore given painfully illustrate the part taken by American ships in American trade and the facts with respect to modern-built ships of the higher speeds clearly indicate that we shall lose further ground and become independent in still greater degree upon foreign ships unless we take prompt and vigorous action in behalf of our marine.

In studying the problem and in endeavoring to find a solution, we are confronted with the problem of cost and operating differentials against the American ship, and with the fact, which adds to our difficulties, that American vessels engaged in our foreign trade are in part governmentally owned and operated and in part are under private ownership and operation. Both of these conditions must be considered and must be dealt with.

As of January 1, 1928, there were 541 passenger and general cargo vessels in our foreign trade, of which number 300 were owned by the Government. There is complete agreement that until the services maintained by these ships may be taken over and maintained by private enterprise we should continue Government vessels therein. The continuance of the Government in these enterprises, however, involves more than is usually recognized. The vessels of the Shipping Board have lived half their efficient life and continued governmental operation requires the immediate beginnings of a replacement program of vast proportions. The replacement of the vessels in operation by the Government at the date of its last annual report with new cargo vessels of 14 knots speed calls for a capital expenditure of $525,000,000. This means if the replacement is completed by 1940, with the last appropriation made available in 1938, an average annual expenditure of $52,500,000, and to this expenditure there must be added if we are to clearly appraise the cost of such an undertaking to the people, the operating losses by the Government during the intervening years. Figuring these losses at $15,000,000 a year, there would be added the further sum of $150,000,000, making a total expenditure on account of governmental operations during the years to 1940 of $675,000,000.

There is talk of maintaining ourselves upon the sea and building our fleet to the size and efficiency demanded by the American people through governmental operation. This bill proceeds upon the theory that there are certain essential services which can not be profitably operated by private companies under present conditions, which in the public interest should be maintained at Government expense, but in my view it is idle to think of the maintenance by the Government of anything more than this minimum of service. The figures demonstrate that at the present time, after years of experience, our Shipping Board vessels are averaging only 121 days a year at sea per ship, that we are losing practically $1.48 per ship-mile and $1.84 per ton carried, that our vessels in some Atlantic and Gulf port trades are averaging to carry less than 45 per cent of their capacity, and in all trades 56 per cent capacity, and that the entire Government fleet for the year 1926 carried but 8 per cent of our total cargo. There is in these figures no justification for the hope that Government operation holds a promise of success. The legislation which we are presenting nevertheless retains in full vigor all of the provisions of law conferring the right and the duty upon the Shipping Board to maintain existing essential services. It supplements authority to continue governmental operations with aids to privately owned vessels, which we hope and believe will result in substantial expansion of our private fleets.

Our privately owned fleet in the foreign trade as of January 1 last comprised 237 vessels of all types engaged in carrying our goods to most of the principal ports of the world. This privately owned fleet carried in the year 1926 approximately 26 per cent of our commerce, as against 8 per cent carried by the Shipping Board. This fleet falls generally into two classes; first, the combination cargo and passenger vessel, and second, the general-cargo ship. They face the handicap of substantial differentials. The reasons for the inability of the privately owned American ship—except those bought from the Government at nominal prices and some others in noncompetitive trades—to successfully compete are chargeable to such dif-

ferentials. In a Shipping Board report, which speaks as of January, 1927, the board found construction costs to average 33⅓ per cent against us.

The American Ship Builders' Association tells us that upon the assumption that both have a normal volume of work that it costs to build a 10,000 dead-weight ton cargo steamer 59 per cent more than in Great Britain, 60 per cent more to build a 9,850 dead-weight ton tank steamer, and 54 per cent more to build a combination cargo and passenger steamer.

Annual fixed charges are usually interest, 6 per cent; depreciation, 5 per cent; repairs, 2 per cent; insurance, 5 per cent; a total of 18 per cent. Private shipbuilders say 27 per cent.

This means that the American owner of an American-built ship is handicapped at least 18 per cent annually on this capital differential.

The principal reason for this cost differential is labor cost. Wages in American yards nearly double those in Great Britain and three to four times those in Germany. In the building of a ship 39 per cent is labor in the shipyard; 5.6 per cent taxes, insurance, and depreciation; 4.6 per cent freight; and 50.8 per cent materials. Breaking down these items it will appear that 78 per cent—$11,700,000—of the entire cost of a $15,000,000 ship goes to American labor; that is, 7,800 workmen one year at $5 a day, or 2,600 workmen for three years. This capital cost is the great factor in the differential cost.

Of lesser consequence but still of importance is the wage and subsistence differential. The Shipping Board tells us that averaging the difference between United States vessels and those of eight principal maritime competitors it appears:

1. Pay roll ratio of the average of these countries is to United States wage costs as 51 is to 100.

2. Subsistence costs of the average of these countries is to United States costs as 62 is to 100.

From a number of typical British ships it appears, according to the board's experts, that it takes about 7.25 per cent of the total American cost to meet and equalize the annual differential against the American ship arising from the lower construction and operating costs of a British vessel.

In my belief these figures of the board are too low.

Notwithstanding handicaps it is said of this first class of privately owned vessels—combination cargo and passenger—that they are generally making their expenses, but they fall far short of earning sufficient to provide for replacement. They, therefore, face, as the matter now stands, a keener and more effective competition by newer and faster foreign ships.

I would not minimize the service rendered to American shippers during late years by this Government fleet. It is proper, however, to have clearly in mind that notwithstanding our huge initial expenditure and our operating losses in the maintenance of this fleet the percentage of our commerce carried in Government-owned ships has been growing constantly less and in a greater degree than the loss suffered by privately owned American ships. In 1921 our Government-owned fleet carried 15 per cent of our commerce, but for the year 1926 this percentage had dropped to 8 per cent. Stated in another way, our operating losses exceeded $16,000,000 in the carriage of 8 per cent of our commerce. In the same period the percentage carried by the private vessels under our flag dropped from 36 per cent to 26 per cent. We must always have in mind that our private ships are carrying in our foreign trade over three times the cargo tons carried by our Government vessels. They are entitled to protection against governmental competition. They merit our thought and aid quite as fully as does the smaller governmental activity. We must not permit our concern for these Government vessels to close our eyes to the relative importance of the two classes of vessels and services. It would be better to lose the 8 per cent than the 26 per cent if a choice had to be made.

The general cargo ship may in turn be divided into two classes. There are, in the first place, those lines operating tonnage bought of the Shipping Board at low prices and on easy terms. Fixed charges for interest, insurance, and depreciation on such vessels are below like charges on foreign ships with which they compete and offset their own higher operating costs. The American operator who has ships of this kind is able to compete successfully with a foreign line, but, like the passenger vessel, these ships show no profits from which replacements may be anticipated. The second class of cargo vessels are those belonging to long-established lines operating in large part pre-war tonnage or tonnage acquired immediately after the war, in either case of high cost. Such ships, however, are in selected and more profitable trades. This and the long experience of the operators therein constitute a favorable factor, but because of the high fixed charges these vessels are not operating at a profit from which replacements may be made. It may be said, therefore, that although the privately owned American fleet is struggling along, it is in no position to replace its old vessels with new ships, modern in type and of the higher speeds, and is in no position to expand its activities.

It has been pointed out that 20 per cent of the vessels of foreign flags in our trade have been built within the last five years, while not a single American ship for our overseas foreign trade has been built within that period. It seems certain that unless newer and faster and more modern ships find their way into American trade under the American flag and unless the differentials heretofore mentioned are overcome by superiority of service, by efficiencies in operation or otherwise, we must expect a continued shrinkage in the percentage of our commerce carried by our ships and a constantly greater dependence upon foreign nations.

There is a volume of trade ample to support an adequate American merchant marine, but that business will not seek the American ship if a better and faster service is furnished by another flag. Our problem is to aid in the construction of the best type of ships and by proper governmental encouragement to make certain permanence of operation by such ships. This bill which is before you is an effort to aid in bringing about the end we all desire. Your committee members would be the last to claim for it that it will accomplish all we desire. Our merchant marine is not to be rebuilt and restored to its old-time place in a day. We face a long struggle. Your committee believe, however, that this bill is the first step in the legislative program which must be ultimately adopted.

The alternatives presented to us are clear. We must embark upon an extensive and costly program of shipbuilding and ship operation by the Government; we must legislate in behalf of the private ship, as this bill does, or we must accept as certain the disappearance of our flag from the sea and acknowledge our dependence upon other nations.

We who support this measure believe its enactment insures the maintenance by the Government of those routes deemed essential to American commerce, routes not now attractive to private operators; we have faith that if administered in accordance with our purpose and to the extent authorized, shipbuilding within the United States will be stimulated, that new and modern American ships will take their place upon the seas, that interest among our people in our ships will be revived, that a new loyalty will be aroused in American shippers and American business, and that we shall have done much toward the restoration of American supremacy upon the seas, to bringing again the day when our flag will be seen in every port, when our lost heritage shall be restored, and we shall have resumed that position and that independence on the waters of the earth which in the years of long ago we established at the risk of our existence as a Nation.

The pending bill offers no untried experiments. Every principle in it has at times been resorted to in this country or by the great maritime powers of the world.

Mr. RAMSEYER. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. RAMSEYER. How many more Government ships did we have in 1921 than at the last date given by the gentleman?

Mr. WHITE of Maine. I am not able at the moment to give the exact number, but substantially more.

Mr. RAMSEYER. Many of the ships that were operated by the Government in 1921 have been sold, have they not?

Mr. WHITE of Maine. Many of them have; yes.

Mr. DAVIS. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. DAVIS. Right in that connection, I think we have about one-third of what we had at the peak number.

Mr. MORTON D. HULL. Do I understand that the commerce has not diminished but is going in foreign vessels?

Mr. WHITE of Maine. The percentage of our cargoes carried by foreign vessels has increased between 1921 and 1926 from something like 49 per cent to over 66 per cent.

Mr. MORTON D. HULL. There is an explanation for that, which the gentleman will give, is there not?

Mr. WHITE of Maine. I believe so.

Mr. MORTON D. HULL. Does that explanation appear in the gentleman's statement?

Mr. WHITE of Maine. I think there are many reasons, but perhaps the overshadowing reason is in the superior speeds and the modernizing of the ships of foreign nations which have been entering into our trade.

Mr. MORTON D. HULL. In other words, the explanation is they give a better service, is it not?

Mr. WHITE of Maine. Well, that is a matter of argument; but I express the belief that the great consideration is in the fact that the fleet of other nations has been modernized and ours has not.

Mr. COLE of Iowa. Will the gentleman yield for just one question?

Mr. WHITE of Maine. Yes.

Mr. COLE of Iowa. Is it not true that the foreign vessels are operated more cheaply than our vessels?

Mr. WHITE of Maine. I think that enters into it also.

Mr. CRISP. Will the gentleman yield?

Mr. WHITE of Maine. I yield.

Mr. CRISP. I have listened with profit and interest to my friend's statement. Will he be kind enough to give briefly to the House the provisions in the bill by which he hopes to remedy the evils that now exist?

Mr. WHITE of Maine. I will go through the bill——

Mr. MERRITT. Before the gentleman does that, I notice with concern that there have been no new vessels added to the merchant marine in the last five years.

Mr. WHITE of Maine. No new overseas vessels.

Mr. MERRITT. What effect has that condition had upon the shipyards?

Mr. WHITE of Maine. It has resulted in almost the disappearance of the American shipyards of other days. We had in the United States in 1916, 22 shipyards equipped to build vessels of the seagoing type. We have now only 8 of such shipyards in the United States. There have disappeared in the intervening years some shipyards that have been in activity generation after generation. In my own State the Bath Iron Works, and the Cramp yards in Philadelphia, that have been building American ships for almost a hundred years are closed and others have disappeared within the last few years.

So to-day we have in the United States just 8 shipyards capable of building seagoing vessels. Great Britain is keeping busy 57 shipyards.

Mr. MERRITT. Then we have a vicious circle—we can not build ships because the cost is so high and the yards are disappearing, so the costs are getting higher.

Mr. WHITE of Maine. That is true; we are in a vicious circle with the disappearing of the shipyards and the disappearance of the resources for building ships; and that is a problem that must be considered in the light of these conditions.

We have confronting us the problem not only of the ship itself, but the shipyards which are back of the ships. I will take occasion to say that this legislation looks not only to the ships but the shipyards, and all the way through we have stressed in this legislation the necessity for the new modern types, not only that it may successfully carry goods but that the shipyards may be again brought to life.

Mr. SPEAKS. Will the gentleman yield? Will the gentleman state the number of shipyards in the United States in 1915?

Mr. WHITE of Maine. I can not give the gentleman the number in 1915, but in 1916 there were 22 shipyards capable of building seagoing vessels. At the present time there are only 8.

Mr. SOMERS of New York. How many are constructing ships?

Mr. WHITE of Maine. At the time of the hearings there were building in the entire United States, I think, only two vessels of the seagoing type.

Now, if I may, let me go through the bill. We have reported out the Senate bill in an amended form. The Senate bill in a large measure, it seems to me, was a restatement of existing provisions of law. There were in it, however, two or three substantive matters. One dealt with the authority of the Shipping Board to sell governmental vessels.

Under the existing law vessels may be sold for operation under our flag by a majority vote of the board. Vessels may not be sold for foreign registry except by a vote of 5 to 2. The Senate provision was to the effect that no vessel of the Government should be sold except by unanimous vote of the Shipping Board. Your committee was unwilling to accept that provision, because that would give to a single individual the right of veto. It would give to a single individual in one of the independent boards of the Government in effect the right to determine a great governmental policy, because by withholding his approval he might prevent for all time the sale of a single Government vessel. By that action he in effect would require permanent Government operation of our vessels.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield?

Mr. WHITE of Maine. In the House bill we have provided that these vessels may be sold on an affirmative vote of five members of the board. We passed beyond the requirement of a mere majority, and say that no Government vessel may be sold except upon the affirmative vote of five members of the board. That is the first and substantial change made by the House committee in the Senate bill. I yield to the gentleman from Maryland.

Mr. LINTHICUM. How many votes did it take to sell the ships on the Pacific coast that we parted with within the last six months?

Mr. WHITE of Maine. As I stated, a majority vote of the board is required under the present law.

Mr. TILSON. Why did a majority of the committee think they should depart from the almost universal rule that a majority of a commission or of a board or of a court should govern? Why should this exception be made? What is the reason for requiring more than a majority of the board to sell a vessel?

Mr. WHITE of Maine. I am compelled to say that there was a wide difference of view upon that point, and the result, as it appears in the bill, is a compromise effected by the members of the committee.

Mr. MORTON D. HULL. How many members are there on the board?

Mr. WHITE of Maine. Seven. Section 5 of the Senate bill provides that all the offices or employment or positions under the United States Shipping Board and the Fleet Corporation should generally be under civil service. The House committee has stricken that provision from the bill. The existing law provides for those positions in the Government that shall fall within the classified civil service. Your committee felt strongly that it was not our province to redraft or modify the general civil service laws of the United States. We felt, further than that, that it was unwise in the extreme to undertake to place under the civil service those positions requiring ship knowledge and knowledge of ship operations. It is a type of experience, a type of knowledge, which does not lend itself readily to ascertainment by civil-service examinations. So we have stricken from the bill that provision.

I may say, speaking in very general terms, that all of the other provisions of the Senate bill are redrafted and reembodied in the House amendment in their substance. The House amendment deals with possibly four or five matters of consequence. First of all, Title III of the House bill redrafts, expands, liberalizes the present provisions of the construction loan law, so called. Under the construction loan act as it is now framed there is an authorized amount constituting that fund of $125,000,000.

The Shipping Board is authorized to make loans from that fund to private shipowners for the construction and reconditioning of vessels. The present law specifically places limitations upon the authority of the board with respect to those loans. It limits the authorized loans to one-half the cost of the vessels, but in exceptional circumstances, where additional security to the mortgage is taken, it permits a loan of two-thirds of the cost of the vessel. Your committee has expanded that provision and permits loans under the section which we report to you up to three-quarters of the cost of the vessel. The existing law fixes a limitation of 4¼ per cent upon the rate of interest which these loans shall bear when the money goes for the construction of a ship in foreign trade. Your committee has recommended the lowering of that rate of interest in the case of vessels engaged in foreign trade. The present law limits the life of a loan to 15 years. Your committee has recommended that the life of the loan may be extended to 20 years. Bear in mind, these provisions to which I have alluded are in the main the maximum placed upon the authority of the commission to loan. The commission may loan smaller amounts and at shorter terms and under more drastic conditions than are set forth in this bill. Your committee feels this is one of the most important provisions of the bill. It is not new. We have had a construction loan fund in our law since 1920. This principle has been resorted to by most of the maritime nations of the world. Great Britain, to whom we may look for light in shipping matters, has utilized this fund in the building of her fastest liners, and she has established a substantial amount, I think a fund of $126,000,000, to be used to aid in the construction of ships in her yards. Your committee has authorized an increase in the amount of this loan fund from $125,000,000 to $250,000,000. We feel that if we are to embark upon an extensive program of ship construction, if we are to have within the near-by years a fleet of vessels of types and of size competent to wage effective competition with foreign vessels, we must utilize this fund to a large extent. So this provision, as I have roughly sketched it, comes before the membership of the House with the unanimous approval of the Merchant Marine Committee.

Mr. CRISP. Mr. Chairman, will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. CRISP. Is that to be a revolving fund?

Mr. WHITE of Maine. It is to be a revolving fund, but at no time are the amounts in it to exceed $250,000,000, the limit that we have placed upon it.

Mr. CRISP. And where a loan of 75 per cent is made in the construction of new vessels the board will have a lien on the vessel for the repayment of the same?

Mr. WHITE of Maine. The board will not only have a preferred mortgage but such other and additional security as the board may insist upon. We think we have given to the board the fullest authority necessary to safeguard the interests of the United States and to insure the repayment in full of every dollar of the loan with interest thereon.

Mr. LINTHICUM. On page 6 it is provided that they may set aside receipts until it amounts to $125,000,000.

Mr. WHITE of Maine. On what page?

Mr. LINTHICUM. On page 6. And then on page 9, section 302, provision is made for an increase of the construction loan fund to $250,000,000. Is part of that for the Shipping Board now and is the other part for the new loan fund?

Mr. WHITE of Maine. The present law authorizes the setting up of this fund of $125,000,000, specifying the sources from which the fund shall come. It comes from sales and the liquidation of the securities which the board has at any time. The limit we have provided in this bill is that in addition to the amount now authorized, there may be appropriated such amounts from time to time as shall lift the amounts available to $250,000,000.

Mr. LINTHICUM. Then the $250,000,000 would include the $125,000,000?

Mr. WHITE of Maine. Yes. The $250,000,000 would include the $125,000,000.

Mr. SOMERS of New York. Mr. Chairman, will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. SOMERS of New York. Speaking of this loan, in your report you refer to vessels in the foreign trade, where the rate is fixed "at the lowest rate of yield of any government obligation outstanding at the time the loan is made." Could the gentleman tell us what that would be to-day?

Mr. WHITE of Maine. There are many Government securities, and I can not give you the exact figures to-day of what that would be. Some of the earlier loans bear as low a rate of interest as 2 per cent. I may say that I have called a meeting of the committee to-morrow morning to still further consider that language. It appears there is some doubt in the minds of Members as to whether we should authorize as low a rate of interest as that particular section now permits. Before that matter is disposed of in the House I want to bring to you the more considered judgment of the Committee on the Merchant Marine and Fisheries on that point.

Now, passing from the construction loan fund to other provisions of importance, I direct your attention to the matter of postal contracts. There is nothing new in the principle of that proposed provision. This Government of ours for many years past has authorized the entering into contracts with merchant vessels and vessel owners for the carriage of our mail. There is the old provision in section 4007 of the Revised Statutes, which has been on the books for more years than I can recall—the ocean mail act of 1891—the provisions of the merchant marine act of 1920, and the act passed in 1918 authorizing mail contracts between the United States and Great Britain. All through the years the Government of the United States has recognized the propriety of entering into contracts of this type. Your committee feel that such contracts in substance and in fact are payments for a definite service rendered to the Government of the United States, for which it is proper that we should make payments. Not only has our own Government approved this policy, but every other maritime nation on earth has likewise utilized this means.

The difficulty with the United States has been that we never have constantly and persistently and aggressively pursued the policy, so that these provisions on the statute books have heretofore been of relatively little importance. I do not mean to say they have not been of some value, because I think I know of vessels in operation which would not be in operation if it were not for the payment they are receiving for the carriage of the United States mail. But we believe that there is a legitimate opportunity to expand this feature of our law and make it useful not only to all of our people in the speedy transportation of our mails but also to aid our merchant marine.

Now under the terms of this section the Postmaster General is given the authority to determine what mail routes shall be established. He is to notify the Shipping Board as to the postal requirements of our ocean service. It then becomes the obligation of the Shipping Board to pass upon what I would call the navigational side or aspect, to determine what type and character and size and speed of ships will respond most efficiently to the postal needs as laid down by the Postmaster General.

The Shipping Board makes its recommendation under the terms of the bill to the Postmaster General as to these shipping matters, and the Postmaster General is then authorized to make contracts with our vessels. We have classified the vessels in this title according to tonnage and speed. That follows the language of the established precedents; and we have provided the maximum rates of pay to the various classes, the rates of pay being generally based upon the size and speed of the vessel performing the service.

Your committee is unanimous in its recommendation that this title be approved by the House.

Mr. O'CONNOR of New York. Mr. Chairman, will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. O'CONNOR of New York. The gentleman will recall that when the bill was pending before the Committee on Rules I asked the question: "Why do you not put some compulsion on the Post Office Department, other things being equal, to prefer American ships?" You leave it wide open to an individual as to what he is going to do about it.

Mr. WHITE of Maine. It is a question how far you can be asked to lay down a direction without taking from the executive officer that discretion which an executive officer of the Government ought to have. There may be certain services where it will not be advisable to enter into these long-term contracts. It may be better to proceed under some other provision of law and provide for the carriage of mail upon a poundage basis or some other contractual arrangement. And that leads me to emphasize this, that this provision of the bill is not an exclusive authority for entering into mail contracts.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. ABERNETHY. I understand that the Postmaster General stated that this provision would result in profit to the Government?

Mr. WHITE of Maine. That was the view presented to our committee by the Post Office Department.

Mr. SOMERS of New York. Mr. Chairman, will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. SOMERS of New York. What percentage do you pay out now?

Mr. WHITE of Maine. Under the provisions of existing law there is paid for the carriage of mail on American ships in the overseas trade something like $7,000,000.

The receipts from our Postal Services, from that same character of service, amount to about twelve and a half million dollars. I think I am stating that right. This represents a very substantial margin between the amounts paid to American ships and the receipts from our ocean mail service.

It is estimated that if we apply the maximum rates—this is important and I want you to get the significance of it—that if we apply the maximum rates of this bill to all the vessels now carrying United States mail, all American vessels, we will increase the compensation paid to approximately $14,000,000. In other words, this provision of this bill will entail an additional expenditure upon the Federal Treasury of approximately $7,000,000 annually, but I think it important in the extreme that we should consider in that connection the opinion of the Postmaster General that from the improvement in the services and from the higher-speed vessels there will result a very much larger volume of mail moving under our flag, and, therefore, a very much increased revenue to our Post Office Department from the operation of our-flag ships, and I give it as my opinion that it will be many years before this provision of our bill will pass beyond the self-sustaining standpoint, if it ever does that.

Mr. SOMERS of New York. One more question. Does the gentleman know how much foreign mail United States vessels carry?

Mr. WHITE of Maine. Roughly speaking, foreign-flag ships carry 30 per cent of our foreign mail at this time. I am giving that as an offhand recollection but I think I am approximately right. It may be slightly under that, but somewhere, I should think, about 30 per cent.

Now, I want to hurry on.

Mr. KNUTSON. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. KNUTSON. I noticed in looking over the bill the other day that it exempts the steward's department from the compulsory provision for the employment of American citizens. Has the committee given consideration to the fact that the most prolific source of smuggling is in the steward's department?

Mr. WHITE of Maine. We have given consideration to this question of nationality of crews upon American ships. The situation is this: There is no general provision of law at the present time requiring that any member of a crew on an American ship should be an American citizen except that provision applying to licensed officers. Licensed officers must be American citizens, but there is no other general provision of law requiring a crew to be made up of American citizens. That I may not be misunderstood, I want to supplement that statement. Under the 1891 ocean mail act there was a provision that one-half of the crew—which would include the steward's department—should be American citizens; that is, upon vessels which held contracts under the 1891 act. But as a practical matter there are no such vessels operating under the 1891 act by contract, or, if any, a negligible number. The practical result is that to-day there is no general requirement that there shall be American citizens upon our ships other than the provision with respect to officers. There is the provision of the seamen's law which requires, I think, that three-fourths of a crew shall be able to understand the language of the officers, but that has no relation to citizenship. So I feel, and many members of our committee feel, that in this provision here we are working toward a larger percentage of American citizenship on American-flag vessels.

Mr. MORTON D. HULL. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. MORTON D. HULL. Before the gentleman gets away from the loan fund I would like him to tell me whether I understood him correctly in stating that the total of the loan fund will be $250,000,000?

Mr. WHITE of Maine. That is right.

Mr. MORTON D. HULL. Then what is the significance of this parenthetical provision, "exclusive of such repayments"?

Mr. WHITE of Maine. Those repayments go into the fund in order that it may be a revolving fund; in other words, if they loan out $100,000,000 in a year, those repayments, when made, go back into the fund in order to keep it at its maximum figure.

Mr. MORTON D. HULL. Can they not enlarge it?

Mr. WHITE of Maine. No.

Mr. LINTHICUM. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. LINTHICUM. The gentleman said a moment ago that 30 per cent of our mail was carried in foreign ships?

Mr. WHITE of Maine. But I did not vouch for the accuracy of the statement.

Mr. LINTHICUM. Well, approximately. What I want to know is, what part of the foreign mail we carry in our ships?

Mr. WHITE of Maine. Well, I can not give it to you in percentages. If you see any instance where a foreign government is letting an American-flag ship carry mail, except under the force of necessities, you will see something I have never been able to see.

Mr. LINTHICUM. Will the gentleman be good enough to put the exact percentages in the RECORD?

Mr. WHITE of Maine. I will try to do so.

Mr. CHINDBLOM. May I ask what that figure was of the percentage of American mail carried in American ships?

Mr. WHITE of Maine. Subject to correction, I will say that between 65 and 70 per cent of our mail is carried in American ships and 30 per cent or thereabouts carried in foreign ships. Can any member of the committee correct me on that?

Mr. DAVIS. It has been reduced in the last two or three years. I do not think that now the amount carried in foreign ships is over 20 or 25 per cent. It has been very much higher, but it has been greatly reduced in the last two or three years.

Mr. WHITE of Maine. I will put in the RECORD the exact proportions.

I think I have alluded to the principal matters in this bill. I want to emphasize in closing that we are not taking from the Shipping Board any of the rights it now has to maintain ships in trades deemed by it to be essential. On the contrary, we reserve in full vigor and force and vitality every provision of law authorizing the Shipping Board to maintain these essential services. We have, however, carried in this bill various provisions which we hope and believe will stimulate American shipbuilding and put upon the seas newer and more efficient American-flag ships.

Mr. SOMERS of New York. Before the gentleman closes his very instructive and enlightening discussion, will he be good enough to touch on the insurance features of this bill?

Mr. WHITE of Maine. The question of insurance was one that gave our committee great concern. There was a feeling, and there were charges made, that the marine insurance companies of the United States are discriminating against the American ship, both with respect to the classification of the ship and with respect to the insurance rates fixed for that ship and for the cargo thereon.

In the bill as it was originally introduced there was a provision authorizing the Shipping Board to reinsure risks placed upon American vessels. Your committee found the subject was full of controversy, full of difficulties so important that we believed it entitled to longer and more searching investigation than we were able to give it at this session.

Existing law carries a provision, section 10 of the merchant marine act of 1920, authorizing the Shipping Board to set up an insurance fund for the insurance of the interest of the United States in any vessel or in any plant. Your committee took that provision of existing law and expanded it somewhat.

Under the present law this fund is to come from net revenues. We struck out the word "net," authorized the fund to be set up from revenues, and also provided that the fund might be increased or built up from insurance premiums.

Then we provided that the United States might insure any legal or any equitable interest which it might have in a vessel and we declared expressly that the United States should be deemed to have such an interest in any vessel toward the construction of which it had made a loan, in any vessel upon which it had a mortgage or lien of any character, and in any vessel obligated by contract with the United States to perform service to the United States, to the extent of the Government's interest therein.

We believe this provision in its present form is not offensive to insurance companies of the United States, but we think it does give opportunity for the Shipping Board to secure the interest of the United States in any of these vessels toward the construction of which, as I have said, we have lent money, upon which we may hold mortgages or in which we have a contract interest.

The CHAIRMAN (Mr. BEEDY). The gentleman from Maine has consumed one hour.

Mr. WHITE of Maine. At this point I yield the floor, Mr. Chairman.

Mr. DAVIS. Mr. Chairman, I yield 15 minutes to the gentleman from Virginia [Mr. BLAND].

Mr. BLAND. Mr. Chairman and gentlemen of the committee, when the gentleman from Maine [Mr. WHITE] concluded his very able presentation of this bill I was reminded of the statement made by Will Rogers at the Jackson Day dinner after Claude Bowers had made the opening speech. He advised the other speakers that they might as well go home; that everything had been said that could be said on the subject.

I wish to add that this bill and this subject of a merchant marine have been considered by the committee with the sole thought of building up an American merchant marine and of advancing the interests of the United States. Never at any time has any partisan political element entered; never at any time in the consideration of this bill has any member of the committee, either of the subcommittee or of the committee as a whole, approached the question in any other way than with a desire to promote the common interests of the country. It has been peculiarly gratifying to serve with men who have tried to work out this great problem in this honest and conscientious way—and it is a great problem.

I feel, gentlemen, that the Members of this House, in their repeated expressions of interest in a merchant marine, in their continued thought to its problems, and in their votes from time to time of appropriations for a merchant marine, have but reflected the sentiment that exists all through the United States, that the American flag shall not depart from the seas.

The problem involves, as the gentleman from Maine has said, the development of the foreign commerce of the United States. It involves the question of the national defense of our country. We have realized that we can not retain our position in the foreign commerce of the world unless we possess the delivery wagons to carry the goods that are manufactured here or that are raised here for sale upon the markets of the world.

Mr. LINTHICUM. Will the gentleman yield for a question?

Mr. BLAND. Yes.

Mr. LINTHICUM. At one time we had a very large merchant marine, and I would like to know why it was we allowed it to be sold and distributed, and so on, at a great loss to the country. Why did we not continue the merchant marine, which was very large, indeed, under the Shipping Board as we had it? Can the gentleman tell me anything about that?

Mr. BLAND. The policy, as declared in the act of 1920, was to transfer the ships of the Shipping Board to private operation as rapidly as this could be conveniently done in the interest of the country.

Some of these ships have been transferred. They are still in operation. Others are not in operation at the present time, for

the reason that there was no appropriation for them, and because those ships are not constructed so as to be susceptible of economic operation.

Mr. SOMERS of New York. A good many of these ships were designed to meet war conditions?

Mr. BLAND. Yes; the ships were built for war purposes and to meet, as the gentleman says, war conditions. As one witness who appeared before our committee said, it is very much as if an employer had too many unskilled laborers at the very time when he needed a larger number of skilled laborers. Speed and regular service are essential in order that there shall be built up a merchant marine, and by these ships rapid and economical and regular service can not be provided. However, these Shipping Board ships have served a very useful purpose. They served a good purpose in 1926, when the foreign ships were diverted into the coal business and when we were without ships in regular operation to carry the products of the farm, our cotton and our grain, to the markets of the world. They were put up on the seas, and as Secretary Hoover said, they saved $650,000,000 to the American farmers and the American people.

Mr. MOREHEAD. Will the gentleman yield?

Mr. BLAND. I will.

Mr. MOREHEAD. What is the attitude of the President in regard to building up the shipping business—what are his recommendations to Congress in that respect?

Mr. BLAND. As I recall various expressions in the messages of the President, he is interested in the building up of a merchant marine, but if the gentleman wants a more particular expression of the attitude of the President on the subject, I must refer him to some Member of the President's own party. I am not sufficiently in the confidence of the President to answer him.

Mr. KINDRED. Will the gentleman yield?

Mr. BLAND. Yes.

Mr. KINDRED. Will the gentleman explain with reference to the liability of the United States for certain established claims? Will they have to come to Congress to collect any damages?

Mr. BLAND. I do not think so.

Mr. SOMERS of New York. They are all taken care of.

Mr. BLAND. I am satisfied that that would be handled by the Shipping Board.

Mr. KINDRED. And that any claim for damages could be collected without coming to Congress?

Mr. BLAND. That is the intention of the bill.

Mr. MOREHEAD. I want to say to the gentleman that the reason I asked the question as to the attitude of the administration was that I was carrying out the thought of my friend from Maryland [Mr. LINTHICUM]. My thought as a business man was that any business that does not pay, that holds out no opportunity for it to be profitable to the private shipowner or the Government was not encouraging, and I gathered that from the remarks of the gentleman from Maine.

Mr. BLAND. Will the gentleman repeat his question?

Mr. MOREHEAD. The only thing presented by the gentleman from Maine was that the present ships are not being used a great deal of the time, and I was wondering if the abandonment of the shipyards was not an elimination and consolidation of the different yards? What I wanted to say, however, was that if the gentleman could give us some encouragement that some time the operation will be successful and not be a loss to the private owners or the Government.

Mr. BLAND. That is the thought of the committee in the presentation of this bill. In the first place, in order to establish a merchant marine I think it will be conceded that we must have a merchant marine in private hands, for unless the Government makes larger appropriations than I think probable, you are not going to secure out of the private treasury the necessary replacements for our merchant marine. The encouragement that is held out in this bill we think will be able to secure private capital, which will go into the upbuilding of the merchant marine and will result in the building of modern ships.

I want to call attention to this—and it was referred to by the gentleman from Maine—that Great Britain, by the trade-facilities loan or some legislation of that kind, created in 1921 an initial fund of $121,000,000 to be used in doing the very thing contemplated here. As I recall the testimony before the committee, that fund of $121,000,000 has been increased until it is now $365,000,000. This fund is used for the purpose primarily of causing ships to be built in British yards. Those ships are the most modern types of vessels. If a man in Great Britain desires to build a ship, he applies to the authorities having in charge the administration of that fund, and the Government lends him 85 per cent of the cost of the vessel. This loan is made for a long term.

In this connection I may call attention to the fact, as shown before our committee, that the Government of Belgium subscribed a million dollars to the stock of three Belgian steamship companies, and that it guaranteed, in 1916, the Lloyd Royal Belge Steamship Co. for $19,300,000. According to Mr. Plummer, of the Shipping Board, that company is one of the most energetic competitors of our domestic ships in the North Atlantic trade.

It was testified that in 1925 the German Government, despite its financial condition, placed $12,000,000 at the disposal of German steamship companies as loans, and that in 1924 the French Government guaranteed a loan of $10,000,000 for a 25-year period, the loan being at 7 per cent, the 7 per cent to be paid not to the Government but to the purchasers of these debentures.

The evidence was to the effect that American bankers handled that particular loan; so that, while it is very difficult to induce American bankers to handle a loan for an American shipping company, this loan was handled by them, though, of course, it should be said that in handling this loan they had the French Government behind the loan.

The evidence further disclosed that Japan, having since 1889 paid construction and operating bounties which in 1910 reached the annual sum of $7,386,000, in spite of their cheap labor and cheap production, is now proposing a $75,000,000 loan fund—one-half for construction and one-half for operation bounties—and those are for vessels to run to the west coast of the United States. The evidence was further that last year Japan loaned 30,000,000 yen to the Tokyo dockyards in order that they might have proper facilities for keeping their great trans-Pacific ships in first-class shape.

The evidence before the committee showed further that Great Britain had developed something that was said to be unique in international trade and in harmony with the trade facilities act which I have mentioned. I refer to the export credits act, under which that Government has created a further fund of $126,000,000 so that the English merchant who is selling goods abroad can give his customer such long-time credit as he may desire and yet raise money on his bills of lading so as to have capital for his own uses as he may desire, while giving his customer whatever credit he needs.

This statement will explain why other nations are securing so many modern ships, for, as the gentleman from Maine has said, all of the ship-owning, maritime nations of the world are putting modern ships upon the seas.

Our own people in America are not supporting the American merchant marine as they should, and frequently their failure to do so arises from no lack of patriotism or from any desire to fail in support to our American merchant marine but simply because under the conditions existing to-day they fear that the American flag is going to leave the seas. In consequence they are afraid to cut off their connections and trade relations with foreign shipping interests. They are afraid that if they do so they will be left high and dry. We believe that if this bill is passed it will be an inducement to our people to support our ships. We believe, as one of the newspapers of this country has said, that it will be a proclamation to the world that America has just begun to fight for her place on the seas, and that it will serve notice to the people in our own country that America is going to keep her flag there. We believe that it will serve notice to all foreign shipping interests that are now discriminating against us, and to all countries that may be discriminating against us, that all discrimination may as well cease, and that they may as well try to harmonize their interests with ours. We will notify the world that we are determined that our flag shall be kept on the seas, in private hands, if possible, but if that be not possible nevertheless that our flag shall be kept upon the seas by appropriations out of the Treasury of the United States and by Government-owned ships. [Applause.]

Mr. KINDRED. In connection with the appropriations and provisions of this bill, which is a good bill, under the operation of the bill what will be the net loss to the United States Government?

Mr. BLAND. I can not say that there would be any net loss. Take the construction loan fund of 75 per cent, which is contemplated to be loaned. It will be loaned at a rate of interest at which the Government can borrow the money, and there will be no loss there because it has to be secured.

Mr. KINDRED. Judging from operations in the past, what will probably be the loss?

Mr. BLAND. It would be impossible for me to say what the losses would be if we go on in the way in which we have gone in the past and in which we are now going; but the

situation would be this, that if we continue as at present our Government-owned merchant marine will in a short time be upon the rocks by reason of the necessary obsolescence of our ships. It will be there because our ships themselves are not modern, and commerce will go to the more modern, speedier, and more economical ships.

Mr. KINDRED. But any reasonable loss will be justified by the results accomplished?

Mr. BLAND. Any reasonable loss, but I can not see how there will be any loss. Certainly not under the construction loan fund, and under the mail pay act the testimony of the Postmaster General is that if we can get faster ships we will increase our funds there, so that he estimates there will be no loss there.

Mr. KINDRED. There have been losses in the past?

Mr. BLAND. Yes; running to an enormous sum, which I can not give the gentleman at this time.

Mr. DAVIS. Mr. Chairman, will the gentleman yield?

Mr. BLAND. Yes.

Mr. DAVIS. I suggest to the gentleman from New York [Mr. KINDRED] that the provisions require an annual payment, not only of the interest but of a pro rata part of the principal, over an average of years. If there should be a default in the payment, under the mortgage the Government would take the ship, and we could either resell it or operate it. It is our purpose to maintain a merchant marine one way or the other.

Mr. KINDRED. Will the gentleman tell us the justification for any loss by the results expected?

Mr. DAVIS. I think we are justified in taking some risk, not only from the standpoint of American commerce but from the standpoint of national defense.

Mr. MORTON D. HULL. Mr. Chairman, will the gentleman yield?

Mr. BLAND. Yes.

Mr. MORTON D. HULL. What is the gentleman's understanding of the total loan fund provided by this bill?

Mr. BLAND. Not to exceed $250,000,000.

Mr. MORTON D. HULL. What is the gentleman's explanation of the phrase "exclusive of such repayments"?

Mr. BLAND. My explanation is that which has been given by the gentleman from Maine [Mr. WHITE]. Certainly that was the intention of the committee. It was their intention that the maximum fund should not exceed $250,000,000. If the language does not express that idea, then I am perfectly willing to make that intention clear. We had the bill prepared with the aid of the legal drafting department, and that was the thought the committee had in mind.

Mr. MORTON D. HULL. Further, the bill provides:

(b) When $250,000,000 has been credited to such fund—

And so forth.

Mr. BLAND. I heard the question which the gentleman asked the gentleman from Maine, and if there is any doubt about that intent, then I am sure that the committee will be delighted to clear it up. I want to call attention to just one more thing. Reference has been made to the condition of the private shipyards. I fear there may exist the thought that these shipyards exist only for the particular sections in which they are located. The testimony before our committee shows that if you were to take a $15,000,000 passenger vessel and were to construct it in a shipyard, only 39 per cent of the total cost of building such a vessel would be expended in that yard; 5.6 per cent would go for taxes, insurance, and depreciation; 4.6 per cent would go for freight. I show this because I want to show the interest the country at large has in the maintenance and preservation of these institutions. The remainder of 50.8 per cent is represented by material furnished by supply people throughout the country, and it was shown just how that would work out. It would go as far west as Oregon.

The evidence was that from Oregon there would be $35,000 of material purchased; in the State of Idaho, $35,000; in the State of Texas, $44,000; in Oklahoma, $35,000; Arkansas, $15,000; Louisiana, $25,000; Mississippi, $25,000; Alabama, $25,000; Georgia, $46,000; Tennessee, $25,000; Indiana, $235,000; Ohio, $350,000; Michigan, $260,000; Minnesota, $92,000; Missouri, $46,000; and so on. So that the distribution is all over the country, and, more than that, there is the matter of our national defense. We should have these instrumentalities to be used when needed. [Applause.]

These private institutions are essential to our defense. In the case of the Newport News yard alone, during the World War, there were repaired and sent to sea 1,000 vessels, an average of two a day. Many of these ships were armed merchantmen. That yard repaired almost the entire fleet of 25 transports running out of Hampton Roads. They delivered 10 ships of 100,000 tons carrying capacity, and in addition they completed three destroyers and completed a battleship.

Unless something is done soon shipbuilding will become a lost art in America. There is a total of 60 shipways in the five east coast yards, and 50 of them are vacant.

An old-established yard which had built ships for nearly 100 years has gone under.

It was not until 1900 that the schools and colleges of this country, teaching shipbuilding and engineering, had progressed to such a point that the Navy Department would send its students to them to acquire their theoretical education. Since 1900 we have had students from the Navy at the Massachusetts Institute of Technology and at some of the other schools in this country, but now the demand for these students in shipyards has fallen off to such an extent due to her lack of shipbuilding, that they can not obtain employment after graduation, and if the present conditions continue for another 10 years, American students must be again sent abroad to learn their business.

American merchant ships are essential to our national prosperity and to our national defense. American shipyards are essential to an American merchant marine.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. WHITE of Maine. Mr. Chairman, I yield to the gentleman from Indiana [Mr. WOOD] 20 minutes.

The CHAIRMAN. The gentleman from Indiana is recognized for 20 minutes.

Mr. WOOD. Mr. Chairman and gentlemen of the House, before commencing the statement I have to make I wish to congratulate the Committee on the Merchant Marine and Fisheries for their accomplishment. While it may not be all that is to be desired—and it is not—and while it may not be all that we ought to have at this time, it is a splendid start in the right direction, and I hope that every man who is in favor of an American merchant marine will give his hearty support to this measure. [Applause.] I expect to support it, and am glad of the opportunity. I have some amendments here that I propose to offer; but whether they are adopted or not, I shall support this bill.

I think that in proposing these amendments we will indicate to the committee and to the House and to the Nation something of the necessity that will have to be met before we shall ever have a well-rounded and completed merchant marine.

I also wish to thank the gentlemen of this committee and each individual member of it for the very courteous treatment I have received at their hands on the various occasions when I have appeared before the committee to present my views.

The maritime mandate of the American people—the unqualified determination to provide an American merchant marine—is vigorously asserted in the preamble of the merchant marine act of 1920. It is the American declaration of maritime independence.

The achievement of that courageous aspiration will render a service to our entire country in which all our people participate.

It will provide the balance wheel of our national prosperity.

Not only is it indispensable as an auxiliary to our national defense, it is in fact an actual part of our Naval Establishment. It completes that aspect of our Government which only can be adequately expressed as sea power.

Can such an essence of our welfare and security fail to have the united support of all who benefit by our institutions?

The problem now confronting us is: How shall we complete the accomplishment of our declaration of 1920?

Let us briefly review outstanding facts.

MAGNITUDE OF OUR FOREIGN COMMERCE

The total value of American foreign trade for 1927 amounted to $9,230,000,000. The total value of the water-borne portion amounted to nearly $8,000,000,000. In volume the water-borne portion amounted to 113,000,000 cargo tons. The freight bill for transporting this commerce amounted to $760,000,000. American ships received approximately 30 per cent of this amount.

Thirty-two countries with 5,700 vessels of over 26,000,000 gross tons participate in the transportation of our foreign trade. Those vessels represent a total of 58,000 entrances and clearances.

Foreign-flag ships carry more than 66 per cent of our entire foreign trade, American-flag vessels carry less than 34 per cent.

There are but 475 American-flag vessels capable of meeting the foreign competition presented by more than 4,000 vessels.

Since 1922 our foreign competitors have built 1,280 vessels for transoceanic service. The United States has constructed 18.

Our foreign commerce is divided into two groups commonly referred to as the "near-by foreign trade" and the "overseas foreign trade" which are defined as follows:

NEAR-BY FOREIGN TRADE

The "near-by foreign trade" of the United States includes commerce with Canada, Mexico, Central America, West Indies, and the north coast of South America to and including the Guianas.

In this trade approximately 43,000,000 tons are moved annually with an average value of $30 per ton of merchandise, and constitutes more than 26 per cent in tonnage volume of our entire water-borne foreign commerce.

Mr. O'CONNELL. Mr. Chairman, will the gentleman yield?

Mr. WOOD. Certainly.

Mr. O'CONNELL. The gentleman is making a very interesting statement. Can he tell us from what source he has obtained those figures? Are these the gentleman's own figures, or are they furnished by the Department of Commerce?

Mr. WOOD. These figures are largely furnished by the Department of Commerce.

American vessels carry approximately 56 per cent of the import cargo tonnage and 52 per cent of the export cargo tonnage.

The Great Lakes trade with Canada includes tonnage amounting to more than 11 per cent of our total water-borne foreign commerce and American vessels carry two-thirds of the import cargo, but only 40 per cent of the export cargo in the Great Lakes foreign trade.

The average value of near-by imports, including Great Lakes trade, is slightly more than $26 a ton of merchandise, and the average value of exports is almost $37.50 a ton of merchandise.

OVERSEAS FOREIGN TRADE

The "overseas foreign trade" of the United States includes commerce with all countries other than those described in the "near-by foreign trade"—trans-Atlantic, trans-Pacific, and the east and west coasts of South America.

In this trade approximately 70,000,000 tons of freight are moved annually with an average of $95 per cargo ton of merchandise, and constitutes nearly 62 per cent in tonnage volume and 80 per cent in value of our total water-borne foreign commerce.

American flag vessels carry less than 30 per cent of the import cargo tonnage and less than 19 per cent of the export cargo tonnage.

In other words, we carry only 30 per cent of what we buy and the foreigners carry 81 per cent of what they buy from us.

The average value of overseas imports is $182.50 a ton of merchandise, and the average value of overseas exports is $66.20 a ton of merchandise. Please note that our foreign competitors do not permit us to carry our share of the higher-priced cargo.

WHAT OUR COMPETITORS HAVE DONE TO RETRIEVE THEIR SHIPPING

Shipbuilding activities of the principal maritime nations from 1922–1927, covering ships of 2,000 gross tons and over suitable for trans-oceanic service, are shown in the following table:

| Country | Number of ships | Gross tons |
|---|---|---|
| Great Britain | 882 | 4,905,853 |
| Germany | 192 | 1,118,635 |
| France | 104 | 630,613 |
| Italy | 87 | 711,499 |
| Japan | 75 | 333,327 |
| United States | 18 | 195,191 |
| Total | | 7,895,118 |

The statement discloses that out of a total of almost 1,300 ships of approximately 8,000,000 gross tons the United States is credited with but 18 ships of less than 200,000 gross tons, thus being outbuilt by Great Britain by almost 50 to 1; Germany, more than 10 to 1; France, more than 5 to 1; Italy, almost 5 to 1; and Japan, more than 4 to 1.

Mr. SHALLENBERGER. Mr. Chairman, will the gentleman yield?

Mr. WOOD. Yes.

Mr. SHALLENBERGER. I am very much interested in that statement. Can you give us your judgment as to what we ought to do to correct that?

Mr. WOOD. Yes. I will give that later.

The postwar trend has been toward cargo-liner service—that is, a regular service on definite routes—in contradistinction to tramp service. Over 75 per cent of the world's shipping is now engaged in this class of service. Prior to 1914 it was but 25 per cent.

Our competitors were quick to recognize this trend and have either built or acquired modern tonnage with increased speeds and other economic advantages as shown by the following compilation:

| Country | 12 knots and over, number of ships | 14 knots and over, number of ships | 16 knots and over, number of ships | 18 knots and over, number of ships | 20 knots and over, number of ships |
|---|---|---|---|---|---|
| Great Britain | 1,280 | 436 | 145 | 38 | 12 |
| France | 277 | 105 | 55 | 19 | 11 |
| United States | 235 | 101 | 37 | 6 | 2 |
| Japan | 206 | 56 | 10 | 2 | 2 |
| Italy | 186 | 55 | 27 | 9 | 9 |
| Germany | 153 | 29 | 9 | 2 | 1 |
| Total | 2,337 | 782 | 283 | 76 | 37 |

We now realize how severely handicapped we are to meet competition!

Flag-waving arguments have little or no effect in influencing American shippers to use our ships until such time as we can place at their disposal ships offering the same advantage in speed, regularity, and frequency of sailings as are offered by our competitors. Not until that time can we be assured of the full support of American shippers, nor is it fair or reasonable for us to expect them to accept inferior commercial service under the guise of patriotism.

Mr. MONTAGUE. Mr. Chairman, will the gentleman yield?

Mr. WOOD. Yes.

Mr. MONTAGUE. The gentleman has not mentioned at all the figures of Scandinavian countries carrying sea-borne commerce?

Mr. WOOD. I have not put it in my statement.

Mr. MONTAGUE. Can the gentleman give us the figures as to their water-borne commerce by sail and not by steam?

Mr. WOOD. No. I am only dealing with the character of vessels with which we are and are to be in competition.

Mr. MONTAGUE. I was just inquiring.

HOW AND WHY AMERICAN SHIPPING IS HANDICAPPED

Mr. WOOD. In the problem confronting us in placing American shipping where it rightfully belongs we must consider the economic phase. Some are of the opinion that this basic obstacle can be overcome by increased efficiency and ingenuity. What are the facts? The major handicap against us is due to the higher shipbuilding costs in the United States. It is not due to the lack of efficiency or ingenuity. In normal times the personnel and equipment of our shipyards—of the few that are left—are as efficient as any in the world. The reason for our higher ship construction costs is the result of our higher living standards and no amount of increased efficiency or ingenuity can offset this handicap.

We have heard statements that many of our industries have been able to manufacture their products to enable them to compete in foreign markets. This is true where industries can take advantage of mass production methods, but such methods do not apply in the construction of ships. The reason for this is that under normal conditions seldom more than half a dozen ships are built from the one design. Therefore this expedient can not be used to lessen the handicap of American shipyards in competition with foreign yards where labor and material are cheaper to any appreciable extent. It must be remembered that ships are built to order—not manufactured, and that the normal life is 20 years.

American shipyards are, therefore, in direct competition with foreign yards.

The difference in construction costs of ships built in American yards compared with those built abroad results in an annual handicap of over 4 per cent of the price paid for the vessel built in an American yard.

Where standards of living differ in the countries engaged in the business of building ships the cost of construction will vary directly as the standards of living in those countries.

Until such time as the living standards of the countries with whom we are competing are brought to our level this handicap will prevail.

TO WHAT EXTENT DO OUR SHIPPING LAWS HANDICAP US?

The seamen's act has been most severely criticized as handicapping American shipping. After carefully analyzing the provisions in this act it appears that the criticisms are largely unfounded. The frequent advances of pay to the crew may be undesirable. However, prior to the seamen's act advances were made to the crew, and it would seem that this is a matter which the master of the vessel can deal with in a satisfactory manner.

Our measurement laws are also subject to considerable unfavorable comment, insinuating that American ships are discriminated against. This is a matter which has been thoroughly investigated, and the conclusions reached show that there is practically no difference in our laws as compared with

those of foreign countries. It has been found, however, that in some instances the provisions in the American rules have not been fully taken advantage of; hence, the fault lies not in the existing law but to negligence on the part of the shipowner.

Our steamboat inspection laws have been criticized particularly with reference to the testing of boilers.

While our laws appear to be more severe than those of other countries, it remains a question, and largely a matter of opinion, whether our laws should be changed to conform to those of other countries.

In summing up the situation regarding these laws which have been unduly criticized without a thorough understanding of them the final result, due to any changes that might be made, would be trivial. It is felt, after numerous interviews and consultations with practical steamship owners and operators, that such items as those referred to in our existing laws as constituting a handicap could be easily overcome when the major handicap, the construction differential, is absorbed.

CONCLUSIONS

Successful competition in the world's markets is predicated on the delivered price of the commodity—in first-class condition—in the shortest time. This not only requires ships equal to those of our competitors in speed, regularity, and frequency of sailings, but obviously necessitates equalizing the higher American construction costs as compared with the lower ship-construction costs prevalent in foreign shipyards. This is our greatest handicap.

If we are to continue to support our American industries, we must build our ships at home and give them the same protection against direct foreign competition that many of our other industries now enjoy.

It has been stated by some that the annual Government operating loss is, in effect, an indirect subsidy. A more accurate statement would be that this is the price we pay for the operation of obsolete and unsuitable types of ships in competition with the more modern and faster ships of our competitors.

Our past experiences have taught us that the pioneering and establishing period of steamship services is an expensive operation under the most favorable conditions. It is therefore quite obvious that slight progress, if any, can be made during that period until we have ships on a parity with those of our competitors.

In view of the rapid progress made by our competitors it is highly imperative that we begin a replacement and construction program without further delay, and in order to accomplish this there must be provided a plan—

Which will equalize the capital investment of the American and foreign ship;

Which will permit the ships to be owned and operated by private citizens under Government regulation;

Which provides for the owner to pay the full price of the American-built ship;

Which will insure permanency of operation; and

Which will guarantee adequate replacement.

The proposal I have to place before you fully incorporates these requirements.

THE REMEDY

There are several amendments I intend to offer to this bill. However, the one in which we are all most interested relates to the construction of cargo vessels and will be offered as section 303 of the bill.

How does the Government expect to compensate those charged with the responsibility of maintaining this national service, which so vitally affects both our country's prosperity and security? It is simple.

The bill provides a form of aid for vessels able to carry the mails. In addition the loan provisions are extended to aid American owners and operators. However, the cargo vessels, forming the backbone of any merchant fleet, are not adequately provided for. The difference in the cost of construction can not be absorbed by the measures proposed in the bill. To this end I offer the following amendment for your consideration:

SEC. 303. The board is hereby authorized and directed to make loans from the construction-loan fund for the total cost of construction of vessels for service in the foreign trade for citizens of the United States. Such vessels shall be constructed in American shipyards and according to designs approved by the board. Such sums as may be loaned for such construction shall be repaid to the construction-loan fund by the purchaser of such newly constructed vessels within a period of 20 years: *Provided*, That the contract and preferred mortgage guaranteeing the service of such vessel in the foreign trade shall provide for an initial payment of 5 per cent of the cost of the vessel upon the making of the contract and 5 per cent annually thereafter.

The provisions of this section shall not apply to vessels entitled to the benefit of Title IV of this act relating to the transportation of foreign mails.

It has been determined by experts in ship construction costs that a vessel costing $1,000,000 in the United States can be constructed in Great Britain for $636,942.67. After the British owner has charged interest on his investment, insurance, and depreciation, the cost at the end of 20 years exceeds $1,000,000. It will be observed from the above amendment that the cost of this vessel is to be repaid by the American owner within 20 years, and after he has maintained insurance thereon the cost will be approximately equal to that of the British owner. This is only possible without charging interest on the principal of the loan.

The CHAIRMAN (Mr. CRAMTON). The time of the gentleman from Indiana has expired.

Mr. WOOD. May I have five minutes more?

Mr. WHITE of Maine. I give the gentleman five additional minutes.

The CHAIRMAN. The gentleman is recognized for five additional minutes.

Mr. WOOD. If the Government owned and operated the ships this fund would not be drawing interest. Therefore, to charge interest for this fund would be the equivalent of demanding of the private owner that he pay a bonus for the privilege of rendering our country a national service, since it benefits all of the people and insures the means for the establishment and maintenance of a permanently American owned and controlled merchant marine, a merchant marine which will be able to compete with any nation in the world and which will complete the establishment of an adequate naval sea power.

Do not take this proposal lightly; it is not without precedent. Our decline in maritime affairs resulted partially from our development of the interior. When national resources were made available for the development of our western territory we found railroads financing transcontinental projects through enormous land grants. Later, with the westward migration of our population, the reclamation of arid lands was essential. Here the Government constructed huge dams, with reservoirs, canals, and all necessary work for the creation of an irrigation and reclamation system. And under the reclamation act as amended the cost of this construction work is to be paid by settlers on those projects within a period of 40 years, but no interest is charged. To-day we find the Federal Government spending a hundred million dollars each year for the construction of highways, not one cent of which is repaid to the Treasury. Surely the meager aid I have suggested for our merchant marine is not without precedent.

In addition to the foregoing I wish, in conclusion, to direct your attention to a situation which deserves serious thought and consideration. In spite of the fact that we have been dubbed an Uncle Shylock the United States has proved a good samaritan to many foreign nations. We have loaned billions of dollars abroad for the rehabilitation of those nations and their industries.

Directly or indirectly some of those very nations with whom we are competing in the markets of the world have been enabled to build up and modernize their shipping, the necessary funds being obtained from loans granted by the United States. I have here a statement showing the amount of the funded debt of various foreign nations, the total payments to be made, and the present worth of payments as at the time of funding.

*Funded indebtedness of foreign governments to the United States*

| Country | Date of agreements | Amount of debt as funded | Total payments to be made | Present worth of payments (at time of funding) at 4¼ per cent compound interest | Per cent of present worth to amount as funded |
|---|---|---|---|---|---|
| Great Britain | June 18, 1923 | $4,600,000,000 | $11,105,965,000 | $3,792,350,150 | 82.44 |
| France | Apr. 29, 1926 | 4,025,000,000 | 6,847,647,104 | 2,008,122,624 | [1] 49.89 |
| Italy | Nov. 14, 1925 | 2,042,000,000 | 2,407,677,500 | 535,312,311 | 26.21 |
| Belgium | Aug. 18, 1925 | 417,000,000 | 727,830,500 | 226,020,669 | 54.20 |
| Finland | May 1, 1923 | 9,000,000 | 21,695,055 | 7,420,497 | 82.45 |
| Hungary | May 29, 1924 | 1,939,000 | 4,693,240 | 1,598,429 | 82.44 |
| Lithuania | Sept. 22, 1924 | 6,030,000 | 14,531,940 | 4,972,364 | 82.46 |
| Poland | Nov. 14, 1924 | 178,560,000 | 435,687,550 | 146,989,791 | 82.30 |
| Latvia | Sept. 24, 1925 | 5,775,000 | 13,958,635 | 4,760,424 | 82.36 |
| Czechoslovakia | Oct. 13, 1925 | 115,000,000 | 312,811,439 | 92,167,514 | 80.15 |
| Estonia | Oct. 28, 1925 | 13,830,000 | 33,331,140 | 11,404,289 | 82.46 |
| Rumania | Dec. 4, 1925 | 44,590,000 | 122,506,260 | 35,343,429 | 79.26 |
| Yugoslavia | May 2, 1926 | 62,850,000 | 95,177,635 | 20,236,000 | [1] 32.21 |
| Total | | 11,521,574,000 | 22,143,512,997 | 6,886,698,491 | 59.77 |

[1] Computed by the Treasury Department.

It will be observed that Great Britain, France, and Italy, which countries are our principal competitors in maritime affairs, profited handsomely by the funding of their debts. For these three countries the difference between the amount of the debt as funded and the present worth of payments at the time of funding is $4,330,234,915. A very liberal estimate of the cost of vessels constructed by these three countries since 1922 is $2,000,000,000. There remains an additional $2,000,000,000 for expenditures unknown.

The amendments I have outlined give no more to the private owner than would be given to the Government. There is, however, this advantage: Under private operation, at the end of 20 years, the original cost of construction has been repaid to the marine security fund from private sources, as compared to reimbursement by the Government, coming from a public source, the United States Treasury.

Surely the time has arrived to rehabilitate industries so vital and indispensable as our shipbuilding and shipping, to make it possible to successfully compete with the very ships American dollars enabled our competitors to build.

My proposal only asks that the American merchant marine be accorded the same treatment extended to our competitors. Action is imperative. It is now a matter of self-preservation. The issue is one which not only affects our prosperity and security, but the very destiny of these United States.

Gentlemen, I thank you. [Applause.]

The CHAIRMAN. The time of the gentleman from Indiana has again expired.

Mr. DAVIS. Mr. Chairman, I yield 20 minutes to the gentleman from Texas [Mr. BRIGGS].

The CHAIRMAN. The gentleman from Texas is recognized for 20 minutes.

Mr. BRIGGS. Mr. Chairman and gentlemen of the committee, I do not think any subject before the American people is fraught with more concern to their interest than the subject of the American merchant marine. I do not think that there has ever been a greater lack of information indicated as to what the fleet which America now possesses is worth than that which obtains in many circles to-day regarding the American merchant marine.

Many people are prone to think that the great construction program of ships during the World War resulted in little or no benefit to the American people. The facts are that for the first two years after their construction they earned $500,000,000.

The further fact is true that had it not been for the existence of the ships of the United States since the World War the American people would have paid out in increased freight rates probably a billion dollars more than they have paid. That alone would disclose a billion and a half return to the people for the $3,000,000,000 they have expended in the construction of the ships.

But more than that, the United States upon the close of the World War and, particularly, directly after the World War, found for a long time the utmost difficulty in getting adequate tonnage, even with the new ships, to move the commerce desired by the foreign countries of the world. Tonnage rates were exceedingly high, and the United States employed the bulk of its fleet in that service. But in the year 1920 the crisis came in ocean rates. Shipping became demoralized, because commerce became demoralized. Commerce on the high seas declined to such an extent that there was a vastly greater amount of tonnage than there was available cargo or any demand for tonnage.

The result was that ocean rates fell practically below the cost of operation; and a world-wide demoralization of rates, experienced by all nations, resulted, and still continues to be felt, even though conditions have recently improved.

The United States Government was operating its fleet several years ago at a deficit, if you choose to call it such, of approximately $50,000,000 a year. The statement by the Fleet Corporation for last year reflected the fact that such deficit was practically reduced to $13,600,000. The reduction in operating deficits therefore is approximately $36,400,000.

What has the fleet accomplished in addition to those things to which I have already called attention and which graphically illustrate the constant value of an American merchant marine to the American people? In 1924 there was a tremendous scarcity of tonnage. A great deal of the foreign tramp tonnage, so-called, which comes into our ports to carry cargoes of a seasonal character from the United States to different parts of the world, was not available. It was being utilized by its own countries for emergency uses. What happened? An appeal had to be made for the United States to put into service additional ships. Why? Because producers, and particularly the wheat and cotton growers of this Nation, could not move their exportable surplus from the United States to the foreign countries that wanted that surplus. They could not get the tonnage to do it.

Representations were made to the President of the United States for the purpose of securing his authorization for the use of extra ships. The President gave that authorization and ships were put into service at an additional cost to the Government of about three-quarters of a million dollars. The testimony of the Secretary of Commerce before the House Merchant Marine Committee subsequently disclosed the fact that in providing that tonnage and lifting that exportable surplus of wheat alone from the American market caused wheat to rebound from $1 a bushel to $1.65 a bushel, and resulted in an increase in the market price of the wheat crop of the United States of about $650,000,000. So you can add that item to the benefits of the American merchant marine. Undoubtedly such extra American ships also saved millions to the cotton and other producers, agricultural and industrial, shipping to foreign markets.

In 1926, during the great British coal strike, we had another instance of inability to get ships to move the seasonal commerce of this country—cotton, grain, and its products, manufactured commodities and coal. What was the result? The Government put into service 100 extra ships from its idle fleet, and they moved the commerce of the United States to the markets of the world, when and where the people wanted that commerce; for, mind you, the wants of the people for certain products are not always a constant quantity. Those wants are often acute at a time when people are not able to buy the same products in other world markets, so that they must come to the United States to get those products. If you do not move them when they want them, or if you wait until commodities of a similar character are available in other countries, you have severe competition, and as a result there is serious difficulty in selling, or often an inability to sell, your products in foreign markets. The result was that by putting those 100 extra ships into the service of the United States to move cotton, grain, and the products therefrom, as well as other agricultural and manufactured products of this Nation, the American people benefited to the extent of approximately a quarter of a billion dollars. So with the fleet, or a large part of it, still existent, you have already had placed before you financial returns from it to the American people of at least two billion five hundred million, and probably as much as two billion seven hundred and fifty million, a sum almost equaling the cost of the original fleet.

Now, it is perfectly true that the trend to-day is toward faster and speedier ships. It is perfectly true that the ships you have are good ships so far as they go. Practically every witness that came before the Merchant Marine Committee testified to the worth of the great majority of the ships which the United States owns. Of the original 2,500 vessels owned by the United States, we have sold about 1,700 at a return of approximately $300,000,000.

Mr. VINSON of Kentucky. Will the gentleman yield?

Mr. BRIGGS. Yes.

Mr. VINSON of Kentucky. In respect of the sale of ships by the Shipping Board what is the usual term of restricted use?

Mr. BRIGGS. You mean the five-year period?

Mr. VINSON of Kentucky. Is it a five-year period?

Mr. BRIGGS. Usually.

Mr. VINSON of Kentucky. Has there been any effort made to change the period?

Mr. BRIGGS. Well, there was a very decided effort made, I think, in the Shipping Board itself, and there was quite a wide difference of opinion prevailing there with regard to whether the contract of sale of the lines on the Pacific coast should provide for 5 or 10 year operation of such lines under the American flag. The determination of that question tied up the Shipping Board a long time, but it made an adjustment in some way and finally provided for a five-year period.

Mr. VINSON of Kentucky. The restricted use period, then, is not statutory, but it is subject to the action of the Shipping Board?

Mr. BRIGGS. That is it under existing law. But the proposed bill before you provides that during the life of the loan period of 20 years, for the construction of new ships, such ships must remain and continue in operation under the American flag.

Mr. BLAND. And if reconditioned, for five years?

Mr. BRIGGS. Yes; if they borrow money for that purpose, they must operate the ships under the American flag for not less than five years.

The United States owns to-day approximately 800 ships, and about 268 or 270 of them are in actual operation. Of course, during the movement of seasonal crops more American vessels are employed than at other times. At that time the number will probably run in excess of 300 or 350, according to the de-

mand and the scarcity of other tonnage, as well as the competition which develops.

Mr. SHALLENBERGER. Will the gentleman yield?

Mr. BRIGGS. Yes.

Mr. SHALLENBERGER. When these new ships are called into service by seasonal demands are they operated by the Government directly or are they leased to private operators?

Mr. BRIGGS. The Government usually operates them under what is known as managing operators' agreements. That is the way practically all of these vessels are operated except the United States passenger line, which is practically operated directly by the Government.

Now, the question before the American people to-day is whether we are going to retain and strengthen our place on the high seas and enjoy and increase the advantages which I have pointed out to you. The question is whether we are to hold not only the position we now command, and command only through the possession of our own fleet, but to provide for necessary expansion and development. That is the problem which has confronted the Nation for some time, and your committee has worked most earnestly to obtain a solution of that problem. It believes it has done so.

We believe in presenting this measure before you, while it is perhaps not an ideal measure, while it has been give and take to a very large extent, and the result of compromises, yet you have a measure here that will operate not only to materially benefit the American merchant marine but make possible its permanence and success.

It provides for the continuance under the Shipping Board of the existing trade routes and services operated by the Fleet Corporation until those trade routes and services are taken over by purchasers and privately operated.

It also makes the cargo carrier, as well as the passenger ship, eligible for mail contracts where such cargo vessel has at least a speed of 10 knots an hour and a tonnage of 2,500 gross tons.

The incentive to private ownership and operation is still further indicated when it is pointed out that serviceable, well-built ships of modern construction can be purchased by Americans from the fleet of the Shipping Board at a cost at least 250 per cent below the cost of replacement anywhere, and the purchaser thereby obtains a substantial reduction and aid in his capital investment.

Provision is also made for an increase in American seamen in crews, though it does not go as far as I should like to have it do. I look forward to the day when American ships are both completely owned and manned by Americans.

It also provides for an extension of insurance relief and other aid.

The bill invokes no new principle of Federal policy. The principles applied in the bill are all recognized and contained in existing law, and have simply been liberalized in return for added service to the people. The representatives of the Post Office Department testified that the postal receipts would cover the expense of mail contracts.

You have in it a doubling of the existing construction loan fund, which provides money at rates of interest at which the Government itself might borrow. It means no gift of the money. It is a loan of the money with good security on the ship, and with such additional security as the Shipping Board may require to insure the return or the repayment of the sums advanced.

Mr. MOORE of Virginia. May I interrupt the gentleman?

Mr. BRIGGS. Certainly.

Mr. MOORE of Virginia. Under the bill will not the American shipbuilder or the American shipowner be at an advantage in respect of the interest on the loan as compared with the British shipbuilder or shipowner?

Mr. BRIGGS. Most assuredly. This bill provides that the money may be obtained where the ship goes into foreign trade at the current rates of interest or the lowest rates of interest at which the Government may borrow the money. It means no loss to the people, but it gives ship operators and builders a very low rate of interest. The British have a fund along much the same line, but they require a rate of interest of approximately 5 per cent.

Mr. SHALLENBERGER. If I may interrupt, I understood the gentleman from Indiana to indicate that the money might be advanced without interest. Was that under his amendment?

Mr. BRIGGS. I do not know. That is not the committee bill. This bill is presented to you for adoption by this House upon the basis of a loan with an interest rate which shall not subject the Government of the United States to any loss, and yet gives to the ship owner or operator the benefit of very low rates of interest, and for that reason, even with reference to differences which may obtain in construction costs at home and abroad, the American builder of ships will by the use of this fund have a 2 per cent advantage in the loan rate over a period of 20 years.

Mr. GREEN. Will the gentleman yield?

Mr. BRIGGS. Yes.

Mr. GREEN. I understand our merchant marine is not self-sustaining, and I was wondering about what the annual deficit has been for the last two or three years.

Mr. BRIGGS. I endeavored to explain a moment ago that that has been reduced from $50,000,000 to almost $13,000,000 a year.

Mr. GREEN. Is it hoped by the committee or does it appear that we may eventually wipe out that deficit?

Mr. BRIGGS. It is confidently expected. This committee reaffirms the policy of the act of 1920, that it ultimately hopes for private ownership and private operation of the American merchant marine, but until that time the American people are going to keep their fleets upon the high seas and operate their trade routes, if they have to do it, under the existing situation.

This is one of the most important things, it seems to me, that should be understood not only at home, but should be understood abroad—that the United States does not mean to relinquish its American merchant marine; that it is not a temporary affair. We have stricken from the name of the Fleet Corporation the word "Emergency" and we now call it the United States Shipping Board Merchant Fleet Corporation. This bill intends to serve notice that the United States is on the high seas to stay; that it is going to have vessels of a modern and well-balanced type to carry its cargoes; that it is not going to be as it was in 1914, practically without a ship to carry its commodities abroad and into the world markets, having to pay to foreign ships an increased freight cost of approximately $5,000,000,000.

Mr. GREEN. Will the gentleman yield for a question there? I am asking this for information.

Mr. BRIGGS. Yes; that is what I am trying to give the committee.

Mr. GREEN. I understand the tonnage carried in American vessels has been decreasing in proportion to the amount carried by foreign vessels. By maintaining the merchant marine, does the gentleman, as a member of the committee, think this will have a tendency to have more of America's commerce carried in American vessels?

Mr. BRIGGS. Yes; and not only by maintaining it, but by developing in the United States a feeling of, "Let us do something for our own ships by shipping much more of our own commerce in and by traveling more on our own ships." [Applause.]

This bill provides that Government officials while on Government business shall travel on American ships where those ships are available.

Mr. Farrell, the president of the United States Steel Corporation, said that the greatest aid which the American merchant marine could have would be the support of the American people.

It came to my attention not a great while ago that one of the most difficult situations with which the United States ships still have to contend is the lack of sufficient import cargo. We carry a much larger proportion of exports than imports. This is what reduces the levels in the amount of cargo carried. We find that some importers will not utilize the American ships, although they can get the same service on the same terms as foreign ships provide; perhaps because such importers have not had their attention sufficiently directed to the situation. Americans should at least give the American ships an even break in the matter and let the American merchant marine reduce some of its operating losses and provide for the carriage of a greater share of commerce throughout the world for the American Nation.

Mr. McDUFFIE. May I interrupt the gentleman?

Mr. BRIGGS. Certainly.

Mr. McDUFFIE. I understood the gentleman from Indiana [Mr. WOOD] to say that a ship costing $1,000,000 in an American shipyard could be constructed in a British shipyard for $600,000. This is quite a difference—nearly $400,000, if I remember his figures correctly. Does the gentleman think under the provisions of this bill we are meeting that difference or that we can meet the difference so as to put the man who wants to invest his capital in ships on a parity with the British ship operator?

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. DAVIS. Mr. Chairman, I yield the gentleman 10 minutes more.

Mr. SHALLENBERGER. Will the gentleman yield there?

Mr. BRIGGS. Certainly.

Mr. SHALLENBERGER. I made some computations here while the gentleman from Indiana was talking to us dealing directly with what the gentleman from Alabama [Mr. McDUFFIE] has referred to. The difference in construction cost, as I figured it, is $365,000 in favor of the English builder, and you propose a saving of 2 per cent to the American builder.

Mr. BRIGGS. Over a period of 20 years.

Mr. SHALLENBERGER. Which is $400,000, so that the saving under your bill amounts to more than the difference in cost.

Mr. BRIGGS. That is exactly what I was getting ready to explain.

Mr. McDUFFIE. The Britisher borrows money now——

Mr. BRIGGS. But he borrows it at 5 per cent.

Mr. McDUFFIE. And you propose to have the American Government lend to the American shipbuilder or ship operator money at 3 per cent.

Mr. BRIGGS. At the current rate the United States may borrow it, probably 3 per cent, so the Government does not stand to lose anything on the transaction. I want to say to the people and to the membership of this committee of the House that to my mind this measure is capable of solving one of the most difficult problems we have ever had and solving it without burdening the American people or stifling initiative. We believe it will bring success.

Shipbuilders and ship operators who appeared before our committee indicated that they felt that such a measure as we have reported would make a success of American operation and of a privately owned and operated American merchant marine.

Of course, you must bear in mind that the success of any undertaking depends very much on the support it receives. The gentleman from Florida [Mr. GREEN] called attention to the decline in the amount of cargo that the United States vessels carry in foreign trade. The United States carries probably 34 per cent of the exports and imports in ocean trade; that does not include the Great Lakes. The rest of such commerce is carried in foreign vessels. It is not true that the United States could not carry more; but if it did, it would carry more at a resulting deficit.

Mr. MONTAGUE. Will the gentleman yield?

Mr. BRIGGS. Yes.

Mr. MONTAGUE. By ocean trade the gentleman means from the United States and to the United States. The gentleman is not dealing with the world ocean trade?

Mr. BRIGGS. I mean from the ports of the United States to foreign ports and back to the United States. I do not include the Great Lakes.

Mr. SOMERS of New York. Will the gentleman yield?

Mr. BRIGGS. Certainly.

Mr. SOMERS of New York. Is it not true that a study of the history of the American merchant marine reveals the fact that wherever conditions were equal the American merchant marine grew faster than any other?

Mr. BRIGGS. That is true. I want to call attention to the fact that from 1908 to 1914 the United States carried less, with the exception of one year, than 10 per cent of the volume of commerce of the United States in foreign trade. In carrying 34 per cent now we have made a tremendous advance from that period—an advance of nearly 350 per cent. But we ought to carry more. This bill is intended and designed that that shall be the result and to give that benefit without putting a tax on the people—it gives such benefit to the American merchant marine as will encourage it to build faster and better vessels, and also enable it to compete more successfully with the ships of foreign nations.

Mr. BLAND. Will the gentleman yield?

Mr. BRIGGS. I will.

Mr. BLAND. Is it not a fact that at one time the cotton of the South could not be shipped because the foreign ships were involved in other service?

Mr. BRIGGS. It was so in the World War when the cotton of the South was piled up in warehouses and yet the world wanted cotton, but there was not tonnage available to move it.

Mr. SHALLENBERGER. And the price of cotton fell to 6 cents a pound?

Mr. BRIGGS. Of course, it did. The fact that we had no ocean transportation resulted in a loss of hundreds of millions to the cotton farmers of the South and the manufacturers as well.

Mr. GREEN. If the gentleman will yield, I am glad to know that the committee has worked out this problem as well as it has, and I hope it will continue to work to the end that our ships may be built at home, and that we can carry more of American commerce.

Mr. BRIGGS. Now, I want to call attention to another thing, and that is that, after all, the heart of the whole situation is in the fact that you must have a market for your commodities either at home or abroad. You must have a market for the things you produce and you must have ships to carry your goods. The United States has been going into the world market more and more. Since the World War our water-borne foreign commerce has increased from 81,824,834 long tons in 1921 to 112,825,756 tons in 1926, or 37.9 per cent. The value has increased from $6,888,000,000, in round numbers, in 1921, to $9,142,000,000 in 1926. From 1921 to 1926 an average of 55.9 per cent of the cotton crop was exported to foreign markets; 27.3 per cent of the wheat crop, 47.6 per cent of the rye crop, and 26 per cent of the rice crop were also exported and consumed in foreign markets.

The same is true to a very large extent of other commodities. If you do not have the ships to carry those things when you need them, and you have to compete among the foreign ships for a limited amount of space, you are bound to pay vastly increased freight rates. The bill America now pays, as the gentleman from Indiana [Mr. WOOD] called attention to a few moments ago, averages over $700,000,000 a year in ocean freight rates alone, and the average from 1921 to 1926 was about $600,000,000 a year. As I have explained, if you had had only a 25 per cent increase in your ocean freight rates for that period of time, it would have added $150,000,000 a year that the American producer would have had to pay, and it would have amounted to approximately $900,000,000 in that period from 1921 to 1926.

Mr. Chairman, this bill may not be all everybody hopes for. We have attempted with the Senate bill which was presented to us to work out something we feel everybody could support, that would not be obnoxious to the American people, and would preserve to the American people their great fleet; that would not destroy, but preserve it; that not only will do that, but enable the American fleet to be added to in private operation by private operators, with fine modern ships, to compete with the foreign ships that are being constructed, and to which attention was so vividly called by the gentleman from Indiana [Mr. WOOD]. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. WHITE of Maine. Mr. Chairman, I yield 15 minutes to the gentleman from Massachusetts [Mr. GIFFORD]. [Applause.]

Mr. GIFFORD. Mr. Chairman, I entered this House in November, 1922. The President had just called a special session of Congress to consider the passage of a ship subsidy bill. We were informed that our merchant marine was losing $50,000,000 a year and that a bill would be presented to us under the provisions of which the cost to the Government would be only about $30,000,000; that we had built a fleet during the war at a cost of $3,400,000,000, and that in that year of 1922 it was worth not over $400,000,000 and was eating its head off at the rate of $1,000,000 per day. That was a direct subsidy bill, and we went so far in our anxiety to correct the situation that we passed legislation containing a clause requiring that half of our immigrants should be brought here in United States vessels, despite the fact that was in direct conflict with 32 existing treaties with foreign nations. Under that act we were willing to give $15,000,000 direct compensating aid for losses. We were willing to grant $7,000,000 in tax exemptions. That subsidy bill of 1922 was passed by the House by a fair majority and there were sufficient votes in the other branch to have passed it had not a vote thereon been prevented by a filibuster. As I have said, the bill provided for aids estimated at $30,000,000 per year. It also provided that insurance be undertaken by the Government when necessary in order to meet competing rates established by foreign companies. There was a provision that the Navy should employ the merchant marine for its transportation purposes. The provisions of that direct subsidy bill plainly proved that the Nation demanded that an end be put to the annual loss of $50,000,000 incurred under Government operation and that we should directly assist a private merchant marine at an expenditure of not more than $30,000,000.

The United States Shipping Board has recently held meetings in various parts of the country and has reported that the Nation is unanimously in favor of a merchant marine, and one privately owned, if possible. The United States Chamber of Commerce has reported the same result from its questionnaires. Congress should show itself responsive to this general demand, and it is hoped that the bill which we now have before us for consideration will accomplish the desired result. Most of the Government-owned vessels are already operated by private companies, and we are paying these agents not only their commission on the freight rates but for the losses arising from such operation to an amount which is estimated at $1.48 per ton. Including in the estimate depreciation, rents, interest, and the difference in insurance rates, these losses from operation and care of the fleet amount to nearly $20,000,000 yearly. It is fur-

ther believed that the enactment of this bill would obviate the necessity of the Government entering on a further shipbuilding program. There is certainly sufficient capital in this country which would be attracted to this type of investment if a fair return were assured thereon.

New ships can not, however, be built at the price which would have to be paid in America without Government aid. This bill provides for loans to the extent of 75 per cent of the cost of construction and equipment at the current Government rates of interest. It is estimated that the consequent saving in interest charges over a period of 20 years would take care of the difference in the cost of building here in America and that the liberal mail contracts provided for by this bill should overcome the difference in operating expenses.

I wish to read this paragraph. In 1902 Great Britain through its admiralty loaned for a period of 20 years, at 2¾ per cent, all the money required to build the 25-knot ships—the *Lusitania* and the *Mauretania*. It gave them a 20-year naval subvention of the equivalent of $735,000 annually, to which the post office added a 25-year mail contract in the sum of $330,000 per year.

The paragraph then goes on to show that these two vessels paid back every penny of that money, and that if the *Lusitania* had not been sunk they would have made a profit of about $5,000,000.

Owing to the new building programs of foreign nations, and the liberal subventions granted by their governments, up-to-date and much faster ships of greater utility are now needed by the United States in order that we may be successful competitors. The vital question now is whether—and if so, under what conditions—we should begin the work of new construction? The country has declared itself against Government operation. In order to assure the accomplishment of new shipbuilding by private concerns we must be fair-minded and liberal. The Shipping Board is the agency which seems to hold the fate of this great problem in its control. We have made it our bankers and it is authorized to loan our money, even at a considerable risk, to accomplish the purposes provided in the act. Some losses should be regarded as justified if by sustaining them we can be of assistance to the Naval Establishment upon which we expend $400,000,000 per year.

During the last six years our foreign competitors have built new vessels to the extent of from six to eight million tons, which is three times what the Shipping Board and all other American companies have engaged in foreign trade. During those six years we have not built a single ship to engage in foreign commerce. We must meet this competition of newer, larger, and faster ships, and we must do it under private operation. This can be accomplished only through liberal assistance from the Government.

It is confidently believed that the passage of this bill will result in the building of ships and the raising of our present fleet to a higher level of competitive efficiency. It will mean new prosperity for our shipyards and for the many lines of industry which contribute to the various phases of shipbuilding.

Our Shipping Board should take into consideration the foreign steamship affiliations of such persons as criticize the activities and plans of the board, or of any proposals advanced to upbuild our merchant marine. We must realize that capital provided by our own citizens is invested in foreign shipping and that many of those foreign lines are represented by American agents who have much influence in the shipping world. The seven members of our Shipping Board—two each from the Atlantic and Pacific coasts and one from the Gulf coast, Great Lakes, and agricultural sections of the country—have within their control the policy which will mean encouragement or discouragement to the patriotic and enthusiastic persons who, if this bill is enacted, will be willing to embark upon a new shipbuilding era and create ships which will be privately owned and privately operated.

Extreme interest is now being shown in the North Atlantic route which to-day is used almost exclusively by foreign vessels. Of the 18 monster steamships in operation we have practically only one—the *Leviathan*—and she is not making the maximum number of trips per year. Her sailings are irregular and do not have proper supplementary service.

Mr. COX. Will the gentleman yield?

Mr. GIFFORD. Yes.

Mr. COX. The observation has been made that there are discriminations against us, in the way of insurance and patronage, and so forth, because of the inadequate condition of the ships. Does not the statement that the gentleman has just made argue that even if our ships were in condition to put them on a parity with foreign ships, they still would not get the traffic?

Mr. GIFFORD. I do not think that is the trouble in the case of the *Leviathan*. Inasmuch as she is Government owned and operated I do not believe that argument applies.

Our imagination is fired by the bold and daring proposition of the Trans-Oceanic Co., whose proposal is to build six monster ships of greater speed and efficiency than any vessel now afloat. The shipping world has been startled before when similar proposals were made, and it is always a difficult task for the proponents of big, unproven projects to convince those who hold the control of finances that they should be approved and the necessary funds provided. The Shipping Board has recently reported unfavorably on the plan of the Trans-Oceanic Co. to the Senate. However, I see in its report no suggestion to the effect that this plan would not be a so-called essential service. It would almost seem that the North Atlantic business has become the most essential of services. If you will read the hearings held by our committee you will find that this company presented convincing reports from some of our greatest engineers, both from the construction and the operation standpoint. There were also reports from those highly qualified in the subject of economics which set forth the probable success of such operation. The report of the engineers and authorities representing the Shipping Board was diametrically opposed to those submitted by the company. It is our desire that the Shipping Board should be open-minded, keeping this proposition before it and granting sufficient hearings before it expresses its complete disapproval of the plan.

Since the greatest speed requirements of the present day have been met in the construction of naval vessels, such as the *Saratoga*, it necessarily follows that merchant ships can likewise be built having equal speed. Long and painstaking experimental work, both before and during construction, is always necessary, and construction plans having an absolute certainty of success naturally could not be ready for presentation at this time. It is my belief that our Government should cooperate, as did the Government of Great Britain in the building of the *Lusitania* and *Mauretania*, vessels which at that time were as revolutionary as those now proposed under the plan of the Trans-Oceanic Co. It has been suggested that, acting on the order adopted by the Senate, the Shipping Board report on this proposition as the experts for both parties have not consulted together, and that the previous report was premature. I appeal for a most careful reconsideration of the matter and trust that the Shipping Board will be fair-minded and give this company the fullest opportunity which it may desire to present its case through the medium of its expert advisors. It is true that in this case the radical departure of building ships with speed increased from 25 to 33 knots an hour must have most careful consideration, but I feel that the Shipping Board should be ready to give its sympathetic cooperation in determining the matter.

Seventy per cent of the North Atlantic business is American and if a four-day service at regular intervals can be inaugurated the proponents thereof should have every right to believe that they will receive, from patriotic citizens and the traveling public which will certainly welcome the saving in time, a sufficient amount of business to warrant the undertaking. Cold figures, based upon the present amount of business with a suggested normal increase of 2½ per cent each year should be convincing, even without taking into consideration the sentimental and patriotic factors which should induce our people to use this service. The financial responsibility of the new company, judged by the names of those who are, or will be, identified with the project should also be sufficient.

Speaking in the Senate recently, Senator BINGHAM devoted a great deal of attention to this matter, and spread at some length upon the record the names and standing of those identified with the company, thereby assuring us that from a financial standpoint the project was entirely feasible. At this time the Shipping Board may well give its attention to the determination of the question whether or not this would be an essential service. Under the very liberal construction of the act of 1920 and the present bill it is allowed great freedom. These acts even provide that it shall take the moral hazard into consideration. In fact, the act expressly recites that it shall loan money on vessels of the newest and most up to date types of construction. The Shipping Board's decision will be of tremendous importance to the country, and we must demand of it the strongest and most sincere efforts to place the entire merchant marine in the hands of private operators as soon as feasible, and to encourage any and all honest attempts of our citizens to build up that merchant marine, not only to meet our foreign competitors on a parity but to outstrip them in this highly competitive race.

We should consider the subject in a large way; we can afford to take chances in a business which is already losing money.

I told the chairman of our committee that I should devote the time allotted to me principally to this proposal for a North Atlantic service, since I believe that if this can be made effective the shipping problems of this country will be solved. We would be a "ship-minded" nation. I wish to call attention to the last few lines of the adverse report made by the United States Shipping Board. "They—the board—are prepared to state to the Senate how this can be accomplished." In closing I desire to say that when the board's plan is presented to the Senate and the Congress of the United States I trust that it will not of necessity be one for Government operation, but will rather be a plan for an American merchant marine privately owned and privately operated. [Applause.]

Mr. Chairman, I yield back the remainder of my time.

The CHAIRMAN. The gentleman yields back two minutes.

MESSAGE FROM THE PRESIDENT

The committee informally rose; and the Speaker having resumed the chair, a message in writing from the President of the United States was presented to the House of Representatives, by Mr. Latta, one of his secretaries, who also announced that on the following dates the President approved and signed bills and resolutions of the House of the following titles:

On April 28, 1928:

H. R. 7722. An act authorizing the health officer of the District of Columbia to issue a permit for the opening of the grave containing the remains of the late Nellie Richards.

On April 30, 1928:

H. R. 6103. An act to amend an act entitled "An act making appropriations for sundry civil expenses of the Government for fiscal year ending June 30, 1884," and for other purposes.

On May 1, 1928:

H. R. 484. An act to amend section 10 of the plant quarantine act, approved August 20, 1912;

H. R. 4068. An act for the relief of the Majestic Hotel, Lake Charles, La., and of Lieut. R. T. Cronau, United States Army;

H. R. 4126. An act authorizing the Secretary of the Interior to issue a patent to Katie Cassiday for a certain tract of land;

H. R. 7184. An act authorizing J. L. Rowan, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Shawneetown, Ill.;

H. R. 9485. An act authorizing Roy Clippinger, Ulys Pyle, Edgar Leathers, Groves K. Flescher, Carmen Flescher, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Wabash River at or near McGregors Ferry in White County, Ill.;

H. R. 11212. An act authorizing Paul Leupp, his heirs, legal representatives, or assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Stanton, N. Dak.;

H. R. 11265. An act authorizing the Cabin Creek Kanawha Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near Cabin Creek, W. Va.;

H. R. 11266. An act authorizing the St. Albans Nitro Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near St. Albans, Kanawha County, W. Va.;

H. R. 11267. An act granting the consent of Congress to the board of county commissioners of Itasca County, Minn., to construct, maintain, and operate a free highway bridge across the Mississippi River at or near the road between the villages of Cohasset and Deer River, Minn.;

H. R. 11279. An act authorizing the Postmaster General to establish a uniform system of registration of mail matter, and for other purposes;

H. R. 11356. An act authorizing the State of Indiana to construct, maintain, and operate a toll bridge across the Ohio River at or near Rockport, Ind.;

H. R. 11473. An act granting the consent of Congress to the States of North Dakota and Minnesota to construct, maintain, and operate a bridge across the Red River of the North at Fargo, N. Dak.;

H. R. 11578. An act authorizing the B & P Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande River at or near Weslaco, Tex.;

H. R. 11583. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across the White River at or near Cotter, Ark.;

H. R. 11625. An act granting the consent of Congress to the State of Montana, Valley County, Mont., and Garfield County, Mont., or to any or either of them, jointly or severally, to construct, maintain, and operate a bridge across the Missouri River at or near Glasgow, Mont.; and

H. J. Res. 152. Joint resolution authorizing and requesting the President to extend invitations to foreign governments to be represented by delegates at the International Congress of Entomology to be held in the United States in 1928.

On May 2, 1928:

H. R. 11478. An act to amend an act to allot lands to children on the Crow Reservation, Mont.;

H. R. 13331. An act to authorize the President to present the distinguished-flying cross to Col. Francesco de Pinedo, Dieudonne Costes, Joseph LeBrix, Ehrenfried Gunther von Huenefeld, James C. FitzMaurice, and Hermann Koehl; and

H. J. Res. 239. Joint resolution authorizing the erection in the District of Columbia of a monument in memory of Peter Muhlenberg.

On May 3, 1928:

H. R. 2654. An act for the relief of Anton Anderson;

H. R. 6862. An act authorizing and directing the Secretary of the Interior to investigate, hear, and determine the claims of individual members of the Sioux Tribe of Indians against tribal funds or against the United States;

H. R. 8487. An act to adjudicate the claims of homestead settlers on the drained Mud Lake bottom, in the State of Minnesota;

H. R. 9047. An act to authorize appropriations for the construction of roads at the Presidio of San Francisco, Calif.;

H. R. 9569. An act authorizing the payment of an indemnity to the British Government on account of the death of Reginald Ethelbert Myrie, alleged to have been killed in the Panama Canal Zone on February 5, 1921, by a United States Army motor truck;

H. R. 12179. An act to provide for the reimbursement of the Government of Great Britain on account of certain sums expended by the British chaplain in Moscow, the Rev. F. North, for the relief of American nationals in Russia in 1920;

H. R. 11764. An act conferring jurisdiction upon the Court of Claims of the United States or the district courts of the United States to hear, adjudicate, and enter judgment on the claim of A. Roy Knabenshue against the United States for the use or manufacture of an invention of A. Roy Knabenshue, covered by Letters Patent No. 858875, issued by the Patent Office of the United States under date of July 2, 1907;

H. J. Res. 145. Joint resolution to provide for the payment of an indemnity to the Chinese Government for the death of Chang Lin and Tong Huan Yah, alleged to have been killed by members of the armed forces of the United States;

H. J. Res. 146. Joint resolution to provide for the payment of an indemnity to the Dominican Republic for the death of Juan Soriano, who was killed by the landing of an airplane belonging to the United States Marine Corps;

H. J. Res. 147. Joint resolution for the relief of the estate of the late Max D. Kirjassoff;

H. J. Res. 148. Joint resolution to provide for the payment of an indemnity to the British Government to compensate the dependents of Edwin Tucker, a British subject, alleged to have been killed by a United States Army ambulance in Colon, Panama;

H. J. Res. 149. Joint resolution to authorize an appropriation for the compensation of William Wiseman;

H. J. Res. 150. Joint resolution to provide for the payment of an indemnity to the Government of the Netherlands for compensation for personal injuries sustained by two Netherlands subjects, Arend Kamp and Francis Gort, while the U. S. S. *Canibas* was loading on May 1, 1919, at Rotterdam;

H. J. Res. 151. Joint resolution to provide for payment of the claim of the Government of China for compensation of Sun Jui-chin for injuries resulting from an assault on him by a private in the United States Marine Corps;

H. J. Res. 230. Joint resolution to provide for the membership of the United States in the American International Institute for the Protection of Childhood; and

H. J. Res. 262. Joint resolution requesting the President to extend to the Republics of America an invitation to attend a conference of conciliation and arbitration to be held at Washington during 1928 or 1929.

On May 4, 1928:

H. R. 12320. An act to amend the longshoremen's and harbor workers' compensation act.

AMERICAN MERCHANT MARINE

The committee resumed its session.

Mr. DAVIS. Mr. Chairman, I yield 15 minutes to the gentleman from North Carolina [Mr. ABERNETHY].

The CHAIRMAN. The gentleman from North Carolina is recognized for 15 minutes.

Mr. ABERNETHY. Mr. Chairman and members of the committee, before proceeding I want to thank the able chairman of

the Committee on the Merchant Marine and Fisheries for the admirable manner in which he has handled the matter before the committee and the amiable spirit of compromise and accommodation which he has observed throughout the progress of the hearings and in the consideration of the bill. I also want to thank the ranking member on the minority side of the committee, the gentleman from Tennessee [Mr. DAVIS], for his attitude, and also the other members of the committee.

I listened with a great deal of interest to the address by the distinguished gentleman from Indiana [Mr. WOOD], and I was glad to hear him say that while he had certain amendments which he proposed to offer to this bill, yet he thought the bill was a great constructive measure and he would support it, regardless of whether his amendments were adopted or not.

This bill which has been brought out here is a composite bill. It did not go as far as any individual member of the committee would like it to go, but there has been a unanimous approval of all the items of the bill, and we find it one of the most constructive pieces of legislation ever presented to the Congress of the United States, coming in here without one scintilla of opposition from any member of the committee.

I believe, ladies and gentlemen of the House, that if this bill becomes a law we shall have an adequate merchant marine in the future for America, and it will be the most outstanding accomplishment that has ever been put through Congress. I say that advisedly. I do not want to raise any controversy here this afternoon, when everything is running on smoothly. It is not desirable that we should raise any controversy under such circumstances, and I do not propose to do that.

Mr. O'CONNOR of New York. Mr. Chairman, will the gentleman yield?

Mr. ABERNETHY. Yes.

Mr. O'CONNOR of New York. Is not that always regarded as somewhat suspicious?

Mr. ABERNETHY. Not in this instance, because the personnel of the committee is such that it would obviate that suspicion.

I have heard in the running debate here a great many questions asked as to what was the trouble with American shipping. I have listened to the hearings on this matter and have attended the hearings in most instances, and have heard various witnesses representing the shipping interests, and the farming interests, and the American Federation of Labor, and the United States Chamber of Commerce, and the syndicates representing the insurance interests of the country engaged in marine insurance; and other business interests generally present their views on this matter; and when we went into the consideration of the bill we had the Jones bill from the Senate and the White bill from the House; and we had the Wood bill from the House and we had the Wainwright bill. But now we have taken all those bills and brought in a composite bill which we claim represents every interest of the country. It is a very unusual thing that we should have the entire and unanimous approval of every member of the committee, and we are assured that this bill will become a law, because we feel certain that when it goes to the other body that body will approve it and the President will sign it.

Mr. COLE of Iowa. Mr. Chairman, will the gentleman yield?

Mr. ABERNETHY. Yes.

Mr. COLE of Iowa. A moment ago the gentleman asked what is the matter with the American shipping. Is it not because of the high cost of building the ships, in the first instance, and then the high cost of operating the ships?

If you want to put American shipping on the map, will it not be necessary for some McNary-Haugen contrivance to equalize the cost of operating ships under the American flag and operating them under other flags; and if we want American shipping to be successful, will it not be necessary for us to go in and pay the difference in the costs of operation?

Mr. ABERNETHY. I want to say in answer to the gentleman that there is no equalization fee in this bill, and I am glad there is not, because that seems to be a very much controverted question in the country at the present time. But if the gentleman wants to know from me what I think the trouble is with American shipping, it is that there is too much British domination of our shipping in the country. That is what is the trouble. I did not want to say that, but it is the fact. If you want to know what I think about it, I think America must wake up to the fact that America must run its own ships, and it must operate them under the American flag and not have them under the influence of any foreign nation. That, I think, will solve the problem.

Mr. COLE of Iowa. Will the gentleman yield for one more question?

Mr. ABERNETHY. I will be glad to yield.

Mr. COLE of Iowa. In order to do that, will it not be necessary for us to do something along the line I have suggested? I used the phrase "McNary-Haugen" only as an illustration. But will it not be necessary for us, I repeat, if we are going to maintain the American standard of wages on the ocean, as we should do, and to compete with those who are satisfied with lower standards, to equalize those wages in some way?

Mr. ABERNETHY. I will answer the gentleman by saying that if he will read this bill he will find this language in Title I.

> The policy and the primary purpose declared in section 1 of the merchant marine act, 1920, are hereby confirmed.

Then, if he will read section 805, he will find this language:

> The policy and the primary purpose declared in section 7 of the merchant marine act, 1920, are hereby reaffirmed.

Now, if he will read the act of 1920, he will find that the Shipping Board, if private operators will not come in and maintain a merchant marine, that the Government itself, with the aid of Congress, can maintain it. That is what we have put in here as the primary object of this bill, namely, to encourage private operation; but if we can not get private operation by the loan fund and by the other provisions of the bill then we authorize the Shipping Board to operate the trade routes, and then we say that each and every port of the country shall be open and that American ships shall be run from these ports. Then we give a liberal loan fund and we give the ocean-mail contracts which, I think, more than equalize the situation.

Mr. COLE of Iowa. In other words, however you may conceal it, you will have to come down to the fact that if you want an American merchant marine the American people in some manner must pay the difference in the cost of operating ships under the American flag and under foreign flags.

Mr. ABERNETHY. There is nothing in here about a subsidy, and if there were our side of the House would not support it and we are supporting it unanimously.

Mr. COLE of Iowa. Unless you provide the money you will not get any results.

Mr. ABERNETHY. I do not think the gentleman should put the McNary-Haugen principle into this bill.

Mr. O'CONNOR of New York. Will the gentleman yield?

Mr. ABERNETHY. Yes.

Mr. O'CONNOR of New York. The gentleman from North Carolina does not understand what the gentleman on the other side is trying to suggest. The gentleman is thinking in the terms of the protective, subsidized tariff. That is what he wants to put in the bill and not the McNary-Haugen proposition.

Mr. COLE of Iowa. That is quite correct.

Mr. ABERNETHY. I think if the gentleman will read this bill carefully he will find it is so worded that that will not be necessary. You take the ocean mail contracts. Mr. Glover, Second Assistant Postmaster General—and I want to commend him publicly for the splendid manner in which he presented this matter to our committee—told us that if we would give him the ships, and ships of sufficient speed, it would be the policy of the Post Office Department to carry all the mails in American ships; that if we did that we would not have any loss but would have a profit. That is no subsidy. The giving of ocean mail contracts has been the law, which has been upon the statute books for some time, and all the Post Office Department wants is ships that can compete.

In other words, gentlemen, this is one bill on which Republicans, Democrats, Progressives, and all interests can get together, and I say it is largely due to the management of the gentleman from Maine and the gentleman from Tennessee. [Applause.] When you get those two contending factions together, the proposition must be all right. I want to say for the gentleman from Tennessee [Mr. DAVIS] that he lives in the interior. He is not interested in any port; but he comes in here and gives his unqualified approval of this bill. The gentleman from Oklahoma [Mr. MCKEOWN] and other gentlemen from the great interior give their unqualified approval of this bill.

Mr. COLE of Iowa. Will the gentleman yield for an observation?

Mr. ABERNETHY. Yes.

Mr. COLE of Iowa. You may think we live in the interior, but we are going to bring ships into that interior. We are going to bring them up the St. Lawrence and up the Mississippi. We are interested in ships just as much as you are who live on the coast.

Mr. ABERNETHY. And am I not helping you every day when I vote for appropriations for waterways and when I

went the whole way yesterday afternoon and voted for the McNary-Haugen bill in aid of the farmer?

Mr. COLE of Iowa. You cotton men got enough out of that bill to make you vote for it.

Mr. LOZIER. Will the gentleman yield?

Mr. ABERNETHY. I will be pleased to yield.

Mr. LOZIER. In England practically all the export tonnage is carried in English bottoms, the English railroads bringing that tonnage to the sea and the English exporters see that it is exported in English bottoms. In the United States the great bulk of our tonnage originates in the interior of the country.

Mr. ABERNETHY. That is true.

Mr. LOZIER. It is carried to tidewater by American railroads, but those American railroads and the American exporters in an overwhelming preponderance of cases have entered into contracts with owners of British ships by which this American tonnage, after being carried to tidewater by American railroads, is turned over to the British ships and carried to the world markets in British bottoms. I have called attention to this situation every time measures affecting shipping have been before the Congress, and I would like to have the gentleman's reaction, and I would like to ask him whether or not a method can be devised by which American exporters and American railroads will be induced and persuaded to turn over this tonnage, which originates in the interior, to American ships and have it carried abroad in American bottoms rather than turn it over to British ships. Can the gentleman suggest a remedy for that situation?

Mr. MANSFIELD. Will the gentleman yield right there?

Mr. ABERNETHY. Certainly.

Mr. MANSFIELD. I want to add a little to the gentleman's question, if you please. Will the gentleman answer, furthermore, why it is that the members of the American Bar Association, when they travel overseas, travel in English ships?

Mr. ABERNETHY. I can not speak for the attitude of the American Bar Association, but in answering further the gentleman from Missouri——

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. DAVIS. Mr. Chairman, I yield the gentleman three minutes.

Mr. ABERNETHY. I want to say to the gentleman from Missouri that the question he puts to me is very pertinent and very proper, and needs an affirmative answer. If I read properly the attempt of this committee as expressed in this bill, and also as I know from the personnel of the committee, it is the intention of the Committee on the Merchant Marine and Fisheries that if you pass this legislation and it is not sufficient to bring about the situation we desire, we will bring in other legislation. I am sure this statement is backed up by the chairman of the committee, because if there is any one man here who wants to put this great commerce of ours, which is bulging out from over the country, in American bottoms, it is the chairman of this great committee. He has done as much to correct the situation as any man here because he represents the majority side of the House, and the gentleman from Tennessee and the gentleman from Virginia and the gentleman from Texas and the gentleman from Oklahoma and the entire committee are a unit on this proposition.

The gentleman from Missouri [Mr. LOZIER] has hit the nail on the head, and we might as well notify the business interests of this country that if they are to expect the cooperation of Congress and the sympathy of Congress, that when they ship goods abroad and get goods from abroad they must use American bottoms because this is the only way we can build up an adequate merchant marine in this country. And if additional legislation is needed to bring this about, Congress will act promptly.

We believe this is the most constructive piece of legislation that has ever been reported to the Congress.

Mr. LOZIER. I did not ask the question in a spirit of hostility.

Mr. ABERNETHY. I know that.

Mr. LOZIER. But in a sincere desire to reach a formula by which this abuse in the future can be prevented.

Mr. ABERNETHY. I believe this bill will help, with the assistance of the Shipping Board, and I believe we will have their assistance, because we have made up our minds, and I think the Congress and the country are determined not to scrap the ships we have, but to put them into commission and to build new ships, and to put our shipyards in commission, and open all our ports in the country, and open up our great waterways, and have American ships carry our great commerce, at the same time saying to the balance of the world that as far as we are concerned, we are going to use our own transportation system. When we do this we will build up a proper merchant marine. [Applause.]

The CHAIRMAN. The time of the gentleman from North Carolina has again expired.

Mr. WHITE of Maine. Mr. Chairman, I yield the gentleman two additional minutes.

Mr. ROMJUE. Will the gentleman yield?

Mr. ABERNETHY. I will be pleased to yield.

Mr. ROMJUE. I presume the committee in the formation of the bill, of course, has been in touch with the Shipping Board?

Mr. ABERNETHY. Yes.

Mr. ROMJUE. I presume you have conferred with them and have listened to their views. Are there any material points which the Shipping Board favors that are not in the bill at the present time.

Mr. ABERNETHY. The only thing which I think the Shipping Board might be criticized for—and I say this with all due respect, because I have great admiration for the present board—is the manner in which they have approached this new idea of having faster ships across the ocean. I think the Shipping Board might as well understand that if we are going to build up the American merchant marine they must respond to the will of Congress, and I believe they will do this.

Mr. ROMJUE. I was about to say to the gentleman that it has always seemed to me that they are very well posted on these matters and their views might well be considered.

Mr. ABERNETHY. We had them before us and they were very helpful in many instances. For instance, Mr. Plummer was very helpful with respect to the insurance feature of the bill.

Mr. ROMJUE. And does the board, generally, approve the terms of the bill?

Mr. ABERNETHY. Absolutely, as I understand it. [Applause.]

Mr. WHITE of Maine. Mr. Chairman, I yield 10 minutes to the gentleman from West Virginia [Mr. BOWMAN].

Mr. BOWMAN. Mr. Chairman, the remarkable rise of American ships and sailors to the commercial supremacy of the seas is an unparalleled story in the history of the maritime world. It is a romance of the courageous seagoing men, who with pike and carronade won, established, and defended the freedom of the seas. With unreliable charts and crude instruments of navigation, America held this most enviable position of commercial supremacy for almost two centuries against the incessant plague of French, Spanish, Dutch, and English sea-roving privateers, and the swarms of marauding freebooters and pirates sailing under the black flag. No more thrilling epics of history have ever been written than those recording the heroic deeds of American pioneers upon the uncharted seas. They brought renown to America and commanded respect for her flag in every known port of the world.

The ascendency of America's commerce upon the seas was no less spectacular than was her decline. Shortly after the Civil War, America forsook her established supremacy and turned her steps from the shores to the inland to seek a new destiny. She ceased to concern herself with the sea. The ingenuity and industry of her people were turned to an inland empire of untold national resources. They gave no thought to this epochal change. "Winning the West" brought the greatest development in railroad building, manufacturing, and farming that the world has ever experienced, but the commerce of the seas lost its virility and importance in America. The American fleet, whose sails once flecked every sea in every clime, vanished, and only the brave memories of a former glory remain as a heritage to the greatest nation in the world in this hour of commercial need.

The first vessel built within the limits of the United States for commercial purposes was a small seagoing vessel of 30 tons called the *Virginia*, which was constructed at the mouth of the Kennebec River, Me., in 1607. It is quite an interesting coincidence that the congressional district of Maine in which the mouth of this river is located is now represented in the House of Representatives of the United States by Hon. WALLACE WHITE, chairman of the Committee on the Merchant Marine and Fisheries [applause], who, with the gentleman from Tennessee [Mr. DAVIS], is responsible for pending legislation.

The successful venture of this first little sailing craft to the fishing banks of Newfoundland not only established the fishing industry in the New England coast, whose climate was unsuited to agriculture, but laid the foundation and keel for the shipping industry of this country and foreshadowed the creation of a merchant marine that would claim the supremacy of the seas. The business of building ships was stimulated and developed, until the mouth of every river and bay on the Atlantic coast from Nova Scotia to Long Island Sound had keel blocks sloping to the tide. It might be interesting to note that the construction of each vessel was a community enterprise. The

blacksmith, the carpenter, the calker, the rigger, the material man took their pay in shares. Each voyage of the ship directly concerned a community.

Before the close of the seventeenth century more than 1,000 New England ships were sailing upon the trade routes of the Atlantic. England's peculiar and sovereign rights to the seas were threatened. In 1668, Sir Josiah Child, British merchant and economist, declared that in his opinion nothing was more prejudicial and in many respects more dangerous to the mother kingdom than the increase of shipping in her colonies, plantations, and provinces. Eventually the English Parliament forbade the Colonies to export fish to foreign markets. This unjust law to curb the growing trade of the Colonies affected more than 6,000 able-bodied seafaring men and spread ruin and distress among the New England ports.

This was only an incident in the evolution of a new nation. Denied the normal ebb and flow of trade and commerce, the sturdy colonial fishermen and seamen became privateers upon the high seas. This was the only means of retaliation; but fate decreed it. It taught them how to defend the honor and integrity of the Stars and Stripes upon the sea as well as upon the land. It trained them to meet the emergencies of a new nation. The effect of this was apparent later during the Revolutionary War, when 174 colonial merchant ships, armed with 2,000 short-range guns, captured 10,000 British seamen and took as prizes 733 merchant vessels. This victory was more serious to the success of England's war against the Colonies than the capture of the Hessian troops by the land forces commanded by Washington. Actual distress in England resulted from the daring and heroism of our sailors upon the sea.

It was our brave sailors who upheld the dignity and commanded the respect of our Nation in its early days. In 1799 they compelled France, who was seizing our merchantmen in the West Indies, to make a new treaty of peace. They drove from the trade routes of the seas the pirates of the Barbary States of northern Africa. In 1812 they again defied England, who was seizing American citizens and American merchantships, and compelled a treaty that opened forever the highways of the sea to the commerce of the United States and gave to us supremacy in the world trade; to have, but not to hold. America was destined to relinquish voluntarily her control of the commerce upon the seas.

Between the years 1795 and 1810 the United States carried 90 per cent of the world's ocean commerce in American-flag ships. During the period from 1821 to 1860 American vessels carried import and export freight valued at $12,378,999,144, or 77.3 per cent of the world's commerce.

The period from 1860 to 1865 marks the rapid decline of our sea trade. In 1861 American vessels carried imports valued at $201,600,000, compared to $134,000,000 by other vessels. Our export trade amounted to $179,000,000, while foreign trade in exports amounted to $69,000,000. Four years later our import trade had fallen to $74,000,000, while foreign trade leaped to $174,000,000, and our export trade had fallen to $93,000,000, while foreign export trade jumped to $263,000,000. The average percentage of all imports and exports carried by American vessels during this period was 41.2 per cent. This condition was due primarily to the internal strife between the North and the South during the Civil War, which made American commerce on the seas extremely hazardous and dangerous.

From 1866 to 1913 foreign vessels carried five times the freight value of our exports and eight times the freight value of our imports as were carried by vessels under the American flag. The percentage of all exports and imports carried by American vessels for this period was 14.6 per cent.

In 1914 the value of our import and export freight was $3,800,000,000 and American merchant ships carried only 9.7 per cent. The value of American freight for this single year amounted to one-fourth of the total freight for the period between 1821 and 1860, and our percentage in carrying and transporting our freight dropped from 77.3 per cent to 9.7 per cent. During the World War our vessels carried 42.7 per cent of our import and export freight value; and in 1927, with a total of freight imports and exports valued at $8,000,000,000—or two-thirds of the total freight value carried from 1821 to 1860—American vessels carried only 34.1 per cent. The freight bills for our export and import cargoes amounted to approximately $730,000,000, of which sum American vessels received $230,000,000 and foreign vessels received $500,000,000.

A detailed analysis of our overseas trade, which does not include Canada and countries bordering on the Gulf of Mexico, the Caribbean Sea, the West Indies, Central American States, and the north coast of South America, shows that American vessels carry less than 30 per cent of our import cargo tonnage and less than 19 per cent of our export tonnage. In other words, our vessels carry only 30 per cent of what we buy from foreign countries and the vessels of foreign countries carry more than 81 per cent of what foreign countries purchase from us.

To enable us to comprehend the reasons for the ascendancy and the decline of our merchant marine, it is well for us to have in mind that the speed of our vessels was the dominant factor. Our supremacy was based upon speed. America had the most graceful and speediest vessels of the world. Only when foreign ships excelled our speed upon the seas did we lose supremacy in trade.

Between 1849 and 1851 three notable events transpired that stimulated our trade upon the seas and developed our vessels into winged crafts of speed. First, the discovery of gold in California; second, the repeal of the British navigation laws which had given England a monopoly of trade with British East Indies; and third, the discovery of gold in Australia. These events created the wildest and most extravagant demands for the transportation of passengers and freight the world has ever known in times of peace. Speed was the ruling passion of commerce upon the seas. Competition among the nations of the world was keen and every national resource was developed in the bitter rivalry for trade. In this struggle for the trade of the world America won. From 1850 to 1854 she launched 160 clippers, among which was the historic *Flying Cloud*, which outdistanced and outclassed the fastest ship of any other nation. America had evolved a ship and had produced a crew which, taken together, were able to give more ton-miles for a dollar than any other similar unit of foreign nations. This was due to speed.

During this period our ships invaded the ports of East Indies, and because of their reputation for speed received freightage at 6 pounds per ton, while English ships rode at anchor or were glad to accept freight at 3 pounds per ton. England was dismayed at this competition of speed, and it was freely admitted that the tea trade in England had passed from English ships to American clippers. The London Times in an editorial sounded the warning in the following words:

> We must run a race with our gigantic and unshackled rival—there will always be an abundant supply of vessels good enough and fast enough for short voyages; but we want fast vessels for long voyages, which otherwise will fall into American hands.

The warning came too late. America was supreme upon the seas.

The screw propeller sealed the doom of American clippers. This invention had aroused the interest of two continents. America rejected it; but England exploited its possibilities.

In 1839 Ericsson, the inventor of the *Monitor* during the Civil War, came to this country and built a screw steamship named the *Princeton* for our Navy. This was the first ship of its character in operation. The utility of the screw propeller necessarily involved the substitution of iron for the hull, because wooden hulls could not stand the vibration. America had not learned her possibilities in the iron industry, and her commercial faith was bound in the success of her wooden-hull clippers and paddle-wheel steamers.

England, on the other hand, began the immediate construction of screw-propelled vessels with iron hulls. This became a great industry in English ports. Again speed determined the commercial supremacy of the sea. England regained the trade routes because of the regularity and speed of her iron ships propelled by screws. The screw propeller added greatly to the speed of vessels and opened a new era of transportation.

In 1857 there were 51 vessels carrying the trade between the American ports on the Atlantic and Europe. Of these, 17 were paddle-wheel steamers and sailing vessels and 34 were steamers with iron hulls and screw propellers. The last-named ships were always preferred by shippers at a higher freight rate because of their speed.

In 1860 nearly all of our mail, freight, and passengers were carried by English vessels, and not a single ship was being built in our shipyards, while 16,000 tons of new iron and screw-propelled steamers were being built in England for American trade.

It remained for the Civil War to sweep the last vestige of our commercial supremacy from the seas. Confederate privateers scoured the seas and while our loss in vessels was negligible, the possibility of capture and confiscation deprived American ships of the opportunity to obtain cargoes of freight. American owners of American ships transferred their vessels to foreign flags for safety and protection. American shipyards were idle. The currents of commerce were changed. England took advantage of every opportunity, as America had done with England in the troubled days of the war with Napoleon. Trade naturally gravitated from the nation that had survived and triumphed over the greater calamities of the Revolution, embargoes of European countries, and the War of 1812. America

gradually relinquished her national renown and prestige upon the seas until by 1900 no American-flag ship sailed from our shores to Russia, Sweden, Norway, Denmark, Netherlands, Italy, Hungary, Greece, or Turkey. During that same year only two small vessels of American registry sailed for France, and these ships returned to our shores in ballast. The trade of our country was carried by vessels under foreign flags, and in 1910 we carried only 8 per cent of the world's commerce.

The failure to maintain our trade upon the seas has brought many bitter experiences to our Nation. In 1898 we had no merchant ships to carry supplies and reinforcements to our troops in Cuba. Chartered foreign vessels were responsible for the sustenance of our Army during the war with Spain; and at the close of the war chartered merchant vessels of Spain brought our men back from Cuba and the Philippines. In 1908, when our naval fleet sailed around the world, we were compelled to use foreign-flag merchant vessels to carry the fuel and supplies. We had only eight auxiliary vessels, and were forced to charter 50 vessels sailing foreign flags. This was, perhaps, satisfactory in times of peace, but we should not anticipate nor expect the use of foreign vessels in the time of war. In the light of these historical facts our national pride is neither heightened nor broadened.

Then came the sad experiences of the World War. We became most extravagant and wasteful in the intense and hectic fabrication of a merchant fleet. In our feverish haste we were compelled to build great shipyards, dry docks, piers, terminals, and warehouses. We were forced to construct and launch thousands of ships and vessels in order to relieve a paralyzed export trade. Because of the lack of an adequate merchant marine, terminal facilities were congested and the main lines of our great railroads were blocked with loaded cars of fuel and food consigned to the war-torn nations of the world. Every Atlantic port had to declare embargoes on incoming materials for foreign shipments. It is true we performed a miracle in ships and foreign transportation. I do not discredit the miracle, because it demonstrates what the United States could do in times of emergency. I am proud of my country in the knowledge that it could rise and respond so readily to such handicaps. I do deplore and condemn, however, our deliberate failure to maintain an adequate merchant marine, which failure necessitated this most extravagant miracle of national power and national resourcefulness. The miracle was justified, but the causes were inexcusable.

This experience has cost the American Government more than $3,570,000,000, as evidenced by actual congressional appropriations for the Shipping Board and the Emergency Fleet Corporation, including the estimate for 1929. It is estimated that this amount would be more than doubled if there were added to this sum the amount paid for exorbitant and excessive freight rates on more than 70 per cent of our export and import trade which was carried by foreign ships during the war and the cost of transporting our men to the war front. According to the records of the War Department we were not able to transport our soldiers across the Atlantic. They show the glaring facts that 911,000 soldiers were carried by United States transports, 41,500 by other United States ships, 1,007,000 by British ships, and 121,000 by other foreign ships. In other words, America transported only 45 per cent of her soldiers and less than 30 per cent of her export and import trade during the World War.

What would have been our measure of success in the World War had England, with her wide commercial sweep of the seas, instead of Germany, been at war with us? What would have been the result if Germany had had control of the seas? Had this condition existed, imagination can not picture the penalties of defeat because of our unpreparedness. In this war America was lucky. The freedom of the seas was secured by her allies. The next emergency may find us most unfortunate in being unable to make speedy preparations. We can not always rely upon luck.

A little more than 10 years ago we emerged from the World War with every element of sea power. We had shipyards, docks, piers, naval bases, a Navy, and every incentive for an adequate merchant marine. Our world trade in exports and imports amounted to almost $10,000,000,000 annually, but our many shipyards were idle. Shipbuilding was apparently a lost art. From 1922 to 1927 the United States built only 18 merchant vessels, with a tonnage of less than 200,000 tons, while Great Britain, Germany, France, Italy, and Japan during the same period launched 1,340 ships, with a gross tonnage of almost 8,000,000 tons. To-day we discover that we have a merchant marine problem instead of a merchant marine.

The National Council of American Shipbuilders is an authority for the following tabulated statement taken from Lloyd's Register of Shipping, showing the approximate gross tonnage of vessels under construction in the various countries of the world during the last quarter of 1927 and the first quarter of 1928:

| | Mar. 31, 1928 | Dec. 31, 1927 |
|---|---|---|
| Great Britain and Ireland | 1,440,000 | 1,579,000 |
| Germany | 443,000 | 472,000 |
| Italy | 171,000 | 183,000 |
| Holland | 162,000 | 174,000 |
| France | 103,000 | 115,000 |
| Denmark | 103,000 | 97,000 |
| Russia | 94,000 | 87,000 |
| Japan | 91,000 | 68,000 |
| Sweden | 91,000 | 100,000 |
| United States | 56,000 | 97,000 |

The above figures show that at the end of 1927 America was building only 3¼ per cent of the world tonnage, and that during the first quarter in 1928 we were constructing only 2 per cent of the combined tonnage of the world. The report is also responsible for the statement that the tonnage under construction in the United States at the end of 1927 was the lowest it had been for a period of 35 years; and at the end of the first quarter of 1928 the tonnage under construction was even lower, being 58 per cent of what it had been at the end of 1927.

The above analysis not only shows the deplorable condition of our shipbuilding industry, but also discloses the fact that very few merchant marines are being constructed to replace or supplement our vessels now operating in the foreign trade to meet the keen competition of modern high-speed vessels recently constructed and now being constructed by foreign nations. These startling facts and truths present a sad commentary on the progress and spirit of the richest and most prosperous nation in the world.

The term sea power is not confined to a large navy alone, but it includes a merchant marine to support it. Every modern naval fleet must have an auxiliary fleet of supply ships, ammunition ships, hospital ships, mine layers, mine sweepers, destroyers, tenders, and so forth, and these auxiliary ships should be merchant ships commandeered by the Government merchant vessels seeking new markets for our products in time of peace; but auxiliary vessels to the Navy in times of war. This would create a well-balanced navy and permit our ships to carry the American flag into all parts of the world. A navy without a merchant marine is not effective. In the establishment of an adequate merchant marine no element of national defense should be omitted nor overlooked. An efficient, adequate merchant marine is a national obligation we owe to the Navy.

If this be true, it is apparent that the vessels of our merchant marine should be vessels of great speed. The history of merchant marines shows conclusively that speed is a dominant factor in the development of an adequate merchant marine. Trade has always followed the vessels of greatest speed, and if America should contend for the supremacy of the seas her vessels must necessarily be vessels of equal or greater speed than foreign merchant vessels. A vessel without speed is a national liability, either in the times of peace or in the times of war.

As a product of the World War the United States Shipping Board has under its control more than 500 merchant ships riding at anchor in the Atlantic ports, which were never intended for commercial use. These ships deter private capital and industry. Foreign nations have no fear of them in trade competition. Most of these vessels are more than 10 years old, while the average life of a steamer is 20 years. Their speed averages a little more than 10 knots per hour. A few of these vessels can be reconditioned, remodeled, and repaired by the installation of additional machinery, and their speed increased to 13 knots per hour. When you increase the speed of these vessels 3 knots per hour, what do you have? Experts say we will not even have a nucleus of an adequate merchant marine. They can not contend with foreign vessels of greater speed. To even believe or hope they will be successful contenders for trade is arbitrarily to defy the experiences and historical traditions of the merchant marines throughout all ages.

Only our fastest vessels, such as the *Leviathan*, the *Northern Pacific*, and *Great Northern*, were permitted to sail the Atlantic unescorted during the World War, because their high speed was considered sufficient protection against the enemy. Speed was protection. Speed was safety. Think of our emergency war fleet, with an average speed of 13 knots per hour, remodeled and reconditioned as supply ships for our airplane carrier *Saratoga*, with a speed of 33 knots per hour. America can not always gamble with fate. We must not continue to trust to luck. In my mind, any legislation that tends to recognize our obsolete war vessels as a foundation or nucleus for an adequate mer-

chant marine will be a serious blunder which will cost our Government untold millions without reaching the object of legislation.

There is just one place for these war-built ships, and that is at the bottom of the sea and not on the surface of the sea. In other words, these obsolete vessels should be scrapped and the keel of every new vessel constructed should embody and contemplate all the latest improvements for speed, regularity, and durability. America's merchant marine fleet should be the speediest, best equipped, and the most complete fleet upon the seas.

There is no patriotism in the dollar. Operating a merchant marine is a business proposition. It should pay a fair return on the capital invested and provide the necessary depreciation for replacements. In this manner only can a merchant marine be maintained. It must be profitable before it can be successful. Capital seeks the avenue of trade which yields a satisfactory return. The merchant marine must be made profitable before attracting the attention of capital. This is the crux of our merchant marine problem.

The greatest disadvantages to the establishment and maintenance of an adequate merchant marine are: First, the high cost in the construction of vessels in the United States, which exceeds by 40 per cent the cost of vessels constructed in foreign countries, and, second, the excess in cost of manning and operating the ships at sea, which amounts to almost 20 per cent more than the cost of operating foreign vessels. These disadvantages and hindrances to a merchant marine are due primarily to the high wages paid the American workman and the American seaman, respectively. These peculiar disadvantages must not be eliminated; but they must be overcome. The success of any industry should not be established and maintained at the sacrifice and cost of American labor. Methods must be found to reduce and overcome these disabilities of ship construction and ship operation without destroying the high standard of living of American wage earners.

The White amendment, which was considered and reported out unanimously by the Committee on the Merchant Marine and Fisheries of the House of Representatives, aims to correct the defects of our merchant marine problem. To my mind it is the most important step in legislation since the close of the Civil War. It not only recognizes the principle of private ownership and operation of the merchant marine, but seeks to eliminate the many obstacles to our shipping interests. It eventually takes the Government out of the shipping industry, and while it does not guarantee a fair return upon capital invested, it secures for American capital an equal chance in competition with foreign capital for the commerce of the world.

The said White amendments have four important features and provisions which are absolutely necessary to the establishment and maintenance of an adequate merchant marine.

CONSTRUCTION LOAN FUND

The idea of loans by the Government is not new. In the marked competition for commerce upon the seas many European nations have resorted to legislation providing for construction loans, navigation loans, mail contracts, naval subventions, and various other forms of subsidies. These laws have given to foreign nations a distinct advantage over the United States in competition for the world's trade. America, with her high cost of constructing and operating ships, must overcome in some manner the differential in favor of our foreign competitors.

In 1907 the Government of Belgium subscribed $1,000,000 to the stock of three Belgian steamship companies, and in 1916 guaranteed the Lloyd Royal Belge Steamship Co. the sum of $19,300,000. We can understand the financial incentive that makes Belgium a serious competitor of the United States.

Germany in 1925 placed $12,000,000 at the disposal of three steamship companies as loans. In 1924 France guaranteed a loan of $10,000,000 for 25 years to her shipping interests. The shipping interests of Holland are benefited by a direct subsidy. In 1921 that nation began loaning and advancing $400,000 annually to the Holland-South Africa Line for five years without interest, unless the trade justified a return sufficient for interest.

From 1889 to 1910 Japan paid in construction and operation bounties to her shipping interests the sum of $7,386,000, and is now proposing a $75,000,000 loan fund to be used in the construction and operation of her merchant marine.

In 1902 the admiralty of Great Britain loaned the Cunard Line for 20 years, at 2¾ per cent, all money required to build the 25-knot steamships *Lusitania* and *Mauretania*, and gave them a 20-year naval subvention of $730,000 per year, to which the post-office department of England added a 25-year mail contract at $330,000 per year. These contracts more than repaid the loans and all interest.

A construction loan fund was created in the merchant marine act of 1920, which was amended in 1924 and 1927. This act with amendments tended to limit and restrict shipbuilding in the United States. In other words, it did not stimulate this important industry. The basic principle of this legislation was sound, but its provisions and terms offered no advantages to American shipbuilders over the shipbuilders of foreign nations. The Government took no risks and exacted a full measure of obligations for every advantage offered.

The pending bill liberalizes the provisions of the existing law. It eventually creates a revolving fund of $250,000,000, from which loans may be made upon vessels in sums not exceeding three-fourths of the costs of vessels to be constructed, nor more than three-fourths of the cost of reconditioning, remodeling, improving, or equipping vessels already constructed. These loans may be made for a period of 20 years at a rate of interest determined and fixed by the lowest rate of yield of any Government obligation outstanding at the time the loans are made. The present bill, if enacted into law, will permit the Government to extend favorable credits to the shipping interests of the United States at a rate of interest which in a great measure will offset the high construction costs in American shipyards.

MAIL CONTRACTS

The merchant marines of European countries have benefited materially from mail contracts extending over a long period of years. They have recognized the importance of liberal compensation for mail transportation upon the seas. These contracts have stimulated shipbuilding and have guaranteed a large portion of the operating expenses of merchant vessels.

This policy is not new in the United States. Legislation favorable to this policy has been enacted by the United States in 1891, 1917, and 1920, but the inadequacy of the payment and the failure to provide contracts for a substantial period of years made such legislation without force and effect. These acts simply recognized a principle, but gave neither opportunity nor chance to demonstrate the practical utility and operation of the principle.

The bill under consideration authorizes the Postmaster General to enter into long-time contracts with American shipowners for a period not exceeding 10 years for transporting the mails, and the vessels employed in this character of service must be vessels of United States registry during the entire terms of their contracts, and with limited exceptions such vessels shall have been constructed in American shipyards. The provisions of this bill guarantee that American mail to foreign countries will be carried by American ships built in American shipyards and flying the American flag.

The vessels to be employed in transporting mail will be classified according to tonnage and speed into seven classes, and compensation to be paid by the Government to each vessel will be determined by the classification of that vessel. However, in order to meet unusual conditions the Postmaster General is authorized to pay a rate of compensation higher than the maximum rates of this bill to vessels with speed in excess of 24 knots.

The possibilities of utilizing airships and airplanes in the transportation of mail from ship to port, and from port to ship, is recognized, and for this service, which is entirely probable, the Postmaster General is authorized to pay compensation in excess of the maximum rates of the bill.

INSURANCE

For many years American shipping interests have been at the mercy of British insurance companies. These companies fix and establish rates, and American shipowners must bargain for hull and cargo insurance. It must be conceded that they have no community of interests with America, and consequently the owners of our merchant vessels are compelled to pay insurance rates and premiums much higher than are justified by the rates for English shipowners. American shipowners are at the mercy of this gigantic insurance trust. The pending bill, however, seeks to liberalize and broaden the insurance feature of the merchant marine act of 1920, and makes the Shipping Board an effective agency in the establishment and maintenance of our merchant marine.

MERCHANT MARINE NAVAL RESERVE

The coordination of a merchant marine in our program for national defense depends entirely upon an efficient merchant marine naval reserve. Ships alone are not sufficient. We must have capable and experienced men trained on merchant ships in the times of peace to operate and command the auxiliaries of our sea-fighting unit in the times of war. The maritime nations of Europe have recognized the importance of this principle and for a great number of years many of them have maintained a merchant marine naval reserve.

The act of February 28, 1925, authorized the establishment of a merchant marine naval reserve by the United States; but the provisions of this act fell short of the legislative goal. In all probabilities this was due to the declining interest in our merchant marine. It must be borne in mind that before we can have a merchant marine naval reserve we must first have a merchant marine.

The present bill under consideration provides that in addition to the pay prescribed by existing law for officers and enlisted men of the merchant marine naval reserve when not employed on active duty with the regular Navy, such officers and enlisted men of the merchant marine naval reserve as are employed on merchant vessels of United States registry regularly engaged in foreign trade shall be paid per annum by the Navy Department, under such regulations as the Secretary of the Navy may prescribe, an amount equal to two months' base pay of their corresponding grades, ranks, or ratings in the regular Navy, such payments so made by the Navy to be considered, in all laws or agreements referring to the officers and crew of the merchant marine, as an integral part of the total pay prescribed for such officers and crew in accordance with such laws and agreements. This will reduce the operating expenses of our merchant ships and at the same time will provide a training school for our Naval Reserves under the complete control of the Navy Department. We have become accustomed to estimating the strength of foreign nations at sea by a comparative analysis of battleships, cruisers, and destroyers. This method has goaded and committed us to a competitive naval program for the construction of cruisers. We underestimate the potential sea strength of foreign nations when we understand that the availability of their merchant fleet for war-time use is always a matter of prime consideration and importance. It is reported that the merchant ships now under construction by our competitors in the commerce of the sea are designed for immediate conversion into indispensable and necessary auxiliaries of their naval fleets.

This policy should be America's policy. The day may come when our foreign competitors for trade upon the seas may be our adversaries in war. We can not always choose our allies, and it may be a sad awakening to find our present inadequate merchant marine a defective link in our national defense. The foreign nations of the world have challenged America. We must meet that challenge by establishing and maintaining a merchant marine fleet with ships of unexcelled speed constructed in American shipyards, manned by American seamen, and carrying the American flag. [Applause.]

Mr. DAVIS. Mr. Chairman, I yield 15 minutes to the gentleman from Oklahoma [Mr. McKEOWN].

Mr. McKEOWN. Mr. Chairman and gentlemen of the House, one coming from out in the West where I come from, where few of his constituents have seen a magnificent ship sail the sea, is not expected to make a lengthy speech about the merchant marine. I have to look at the situation from one who is interested in the exportation of the products of my country in the interior of the United States. The great problem to-day in my country is transportation of the farm products to points in the United States and to foreign markets.

The freight rates of this country are so high compared to the prices received for farm products that the farmers of this country and the stock raisers are vitally interested in the question of the American merchant marine, because if the American merchant marine does not occupy a position on the high seas where she can keep control of ocean-going rates, then my people will sustain great losses.

As a schoolboy I always read with great interest the story of the whalers and of the clipper ships from New Bedford. They were always fascinating stories, and one of the most interesting books I ever read was a true account given by a young man, one of the first stenographers in the United States Senate, who on account of a short session found himself out of employment and shipped at New Bedford on a whaling vessel. That story emphasizes the necessity of the Government of the United States seeing that the condition of the crews that served in the merchant marine is made more attractive and should interest itself in the general welfare of our seamen.

We are not like the British Isles, where you have easy and ready access to the sea. A great many of our boys live hundreds of mile from the sea and thousands of our people have never seen the ocean. Our boys, except on the coast, are not drawn to the sea, and I have often wondered why.

I heard a man who was familiar with the situation explain that it is because it is not made attractive any longer, that conditions have not been made such as to make it attractive. Our Congress has enacted laws to make the conditions better, and I am hoping that this legislation will result in the growth of the merchant marine and will keep our flag permanently on the high seas. We are busy in our country trying to produce things to ship abroad, and it has been for many years in this country that the exportation of cotton brought the balance of trade in favor of the United States. It has been this one great staple of agriculture that has turned the balance of trade in favor of the United States.

One thing we should keep in mind when we criticize the shippers for shipping their goods in foreign ships. Here is the difficulty: You can not by law make a man patriotic; you can not by law say that a citizen of this country shall not ship in foreign ships unless he can ship as cheaply and as profitably in American bottoms.

The shippers in my country ship gasoline abroad and they ship wheat abroad. Here is what they are met with. The foreign buyer says, "I will buy your gasoline f. o. b. on the coast and I will send my own ships and take it away. I will send my own ship and take your wheat." In trading with a man like that you have to accept his proposition if you want his trade. For that reason it is a difficult matter and you can not by law make an American citizen ship his goods under the American flag by the dictation of law; if it costs him more money to ship under the American flag, he is not going to ship under the American flag.

Mr. MANSFIELD. Will the gentleman yield?

Mr. McKEOWN. I will.

Mr. MANSFIELD. Is it not a fact that the larger part of the cotton that goes to England goes in foreign bottoms because the buyer says I will take the cotton but my ships shall carry it?

Mr. McKEOWN. That is the difficulty; when he ships an article to a buyer in a foreign country, in many instances the foreign buyer says, "I want the article delivered at the seaboard. We will send over and get it in our vessels"; but our buyers, on the other hand, are not so careful to say to the foreign exporter, "We will buy your goods on the seacoast over there, and let it come in our ships."

Mr. JACOBSTEIN. Is it the gentleman's understanding that there is anything in the bill to arbitrarily restrict that?

Mr. McKEOWN. Oh, no; there is nothing in this bill. I am talking generally about the proposition and the conditions and effects of legislation generally. The bill before the House has the unanimous indorsement of the committee. We may differ on some of the items in the bill personally, but as a whole the bill has been reported out favorably, and I understand it has the unanimous indorsement of the Shipping Board.

One of the new factors in marine travel is going to be time. The man from New York who transacts business in London or in Liverpool or in Paris will want to go in a hurry. He does not want to lose much time. If we can encourage this quick service, we ought to do so, and why? Because to-day there are foreign nations who are expecting to inaugurate an air service by dirigibles to come across to this country and use those dirigibles for transportation. We are told that these new ships can go across the Atlantic from dock to dock in four days. If a man in New York misses his boat he can take an airplane and catch the ship at sea, or if he is in an extraordinary hurry, before he lands can leave the ship and go ahead by airplane to shore; of course that will keep up the pace that we are all trying to travel.

Mr. SANDLIN. Does not the gentleman really think that the passage of this legislation will create in the minds of the American people an idea that the American merchant marine has a fixed policy? As it is at present they do not know how long these routes will be established, but they will know now that the Government means to stay in the shipping business and have established routes. Does the gentleman not think that it is a great step forward?

Mr. McKEOWN. I agree with the gentleman and thank him for his contribution. Our people are interested, but when a man is busy and trying to make his business profitable he does not take time enough to make a survey, but, as the gentleman says whenever it is known that ships are going to run, that there will be a regular schedule, business men then will take more pains to route their cargoes over those established routes.

There is one other thing that I think is very interesting about this shipping business. This bill does not require the unanimous consent of the Shipping Board to sell a ship. I think the provision in the bill is fairer because it makes five out of seven control. If the judgment of five men is unanimous, then I do not think we ought to deprive the board of the use of its judgment simply because there is a contrary juror on the case. In other words, we ought not to have a hung jury all of the time; we ought to have a majority verdict.

I shall not take up any more time, but I do hope the Members of the House will give this bill their careful consideration and show an interest in shaping it into such a measure as will be

satisfactory to and receive the approval of the American people. [Applause.]

Mr. WHITE of Maine. Mr. Chairman, I yield five minutes to the gentleman from Massachusetts [Mr. MARTIN]. [Applause.]

Mr. DAVIS. Mr. Chairman, I yield the gentleman five minutes.

Mr. MARTIN of Massachusetts. Mr. Chairman, it is not my purpose to discuss the details of the proposed shipping bill. That has been done by the distinguished and able chairman of the committee. But I do want to speak in behalf of what I believe is the most constructive piece of legislation which will appear before the present Congress.

I am in favor of this bill not because it will be of benefit to any one section of our country; not because it will benefit any single industry; but because it will be of real benefit to every section and every industry whether it be farming, mining, or manufacturing.

The great problem of America to-day as indeed it is for all of the great commercial nations of the world, is the finding of a market for the surplus goods which come from the farms, the mines, and the workshops.

It is apparent to all who think the home markets will not take care of all that can be produced. It is estimated the home demand will take care of but 80 per cent of the output. That means we must sell to other nations the balance of the goods produced if we are to have the full measure of prosperity. Foreign trade can be expanded almost indefinitely. It is limited only by the resourcefulness and energy employed. Let me illustrate:

When Capt. Robert Dollar, who is a pioneer in the upbuilding of American foreign trade, started his round-the-world service four years ago there was hardly any trade between California and Singapore, Penang, or Ceylon.

During the four years of giving that part of the world a fortnightly service to the United States it has brought into this country $29,000,000 of new money. The increase in the then existing trade in Japan, China, and the Philippines amounted to $54,387,045, most of it new business.

What Dollar has done on the Pacific has been duplicated in South America and other parts of the world where permanent trade routes have been maintained. It is obvious from experience that trade follows the flag.

The people of our country have finally begun to realize that shipping in our overseas trade affects the welfare of the entire Nation, not only their continued prosperity but their security as well.

In the keen competition existing in the world's markets to-day, a country which must rely on competing nations to transport its commerce is hopelessly handicapped. We have been told frequently by theorists and short-sighted economists to allow competing nations to carry our products because they could carry them cheapest. This is the height of false economy and has been repeatedly proven to be the case.

Prior to 1914 we depended upon our competitors to carry over 20 per cent of our commerce in their ships; then the American people were rudely awakened to find that our commerce ceased to flow because of the fact that we relied almost entirely on ships of competitor nations for the transportation of our foreign trade. The irreparable losses to the Nation in depending on foreign-flag ships to move our commerce and in our feverish haste to build ships during abnormal times resulted in fabulous expenditures for which the American people will pay unto the third and fourth generation.

The gigantic losses incurred by the Nation before our entrance into the World War when our products congested and rotted at the seaboard for lack of ships to move it, and then our entrance into the World War when ships became imperative for military needs, culminated in needless expenditures amounting to a sum which would have been sufficient to have permanently and profitably established an adequate merchant marine for the past 150 years and for the next century to come.

It is only natural that the sentiment of the American people has changed from indifference to that of "ship-mindedness." Other maritime nations have long realized the obvious necessity of supporting their national shipping. This is borne out by the various forms of aid, during the last 50 years, extended to them for the sole purpose of supporting and expanding their shipping and thus their trade.

One of the best examples of a nation realizing how indispensable shipping is in the development and expansion of her trade is Germany. Although seriously handicapped financially, Germany has seen fit to retrieve her shipping, with the result that to-day she is again able to resume and build up her trade connections. If it were economically sound to rely upon ships of other nations to carry products of a competing nation, it is obvious that Germany is too shrewd not to have welcomed this opportunity.

Trading, banking, and transportation complete the cycle of international trade; each is dependent upon the other, and successful competition in the world's markets can only be achieved by the nation which has complete control of this cycle.

Two important transitions have taken place in ocean transportation since pre-war days. First, the change from tramp service to cargo-liner service. Cargo-liner service predominates to-day. This class of shipping is rapidly approaching 80 per cent of the world's ocean transportation.

The second transition is the trend from steam to internal-combustion type of ship propulsion, which now represents more than one-half of the entire world ship production figure.

These transitions clearly emphasize the demand for economical ships and better services. It is, therefore, evident that successful competition in world trade can only be met by providing permanent services with regular and frequent sailings. The rapid turnover of capital demands this service, and the ships, regardless of nationality, which provide this service will get the business.

Since the ending of the World War our competitor nations were quick to recognize the new era in international shipping and during the past six years those nations have built almost 1,300 ships, of 7,000,000 gross tons, suitable for transoceanic service, with the result that the United States has been far outranked by her competitors in both modern passenger and cargo ships. During the same period the United States has built but 14 ships suitable for transoceanic service, totaling less than 200,000 gross tons.

As a result of our shipbuilding inactivity, American shipyards are in a precarious condition and at this time we rank tenth in world shipbuilding, even Russia having passed us. The total gross tonnage building in the United States to-day in all of our shipyards combined amounts to less than the equivalent of one ship the size of the *Leviathan*. Surely this is a most humiliating position for our country to occupy and it is high time that serious consideration be given to the rehabilitation of this industry, which is an indispensable factor in times of a national emergency.

The chief cause underlying the decline of our shipyards is the fact that ships cost considerably more when built in American yards, which is obviously due to our higher labor and material costs as compared with the lower costs of foreign shipyards. Therefore the capital invested in an American-built ship, together with the higher cost of operating American ships in foreign trade, make it an unprofitable venture and offers no incentive for American investors to build ships in American yards to compete with the lower-priced ships of our foreign competitors.

Mr. MANSFIELD. Mr. Chairman, will the gentleman yield?

Mr. MARTIN of Massachusetts. Yes.

Mr. MANSFIELD. The gentleman speaks of many nations getting ahead of us in the shipbuilding business. Is it not a fact that we overbuilt during the war and had more ships than we could use, and is not that a principal reason why we have not been building ships since that time?

Mr. MARTIN of Massachusetts. That is true in a measure, but if we are to continue to do anything in commerce, we must build new ships to handle our traffic at the present time.

Mr. MANSFIELD. That is, a new type of ship?

Mr. MARTIN of Massachusetts. Yes. The United States Shipping Board has endeavored to carry out the provisions contained in the merchant marine act, 1920, for the establishment of services in the overseas trade routes. It has endeavored and is endeavoring to comply with the provisions of the act. However, the modern ships of our competitors make it extremely difficult to operate successfully and the lines which have been sold by the board to private owners experience this difficulty. It would seem, owing to the greatly reduced prices of the ships which the Government has sold, this handicap would be offset. It is found, however, that the ships which are being patronized are the modern types with increased speeds which provide definite and frequent sailings which explains the problem confronting us. If we expect to remain in the shipping business and attain our rightful place among the maritime nations it is highly imperative that a ship-replacement program be started without further delay, not only to revive our shipbuilding industry but to place American shipping on a parity with the modern ships of our competitors.

In the further development and expansion of our foreign trade it is essential to establish and pioneer new services. By the establishment of such services new trade can be developed in many parts of the world. No competing nation which is also seeking new markets will expand our foreign trade for us. This pioneering work is a function which we must obviously

perform ourselves. Experience has shown us that ocean transportation must be in advance of trade.

The water-borne commerce of the United States amounts to $8,000,000,000. This must continue to grow if we are to remain a prosperous people. And since other nations are equally anxious to expand their foreign trade and in many instances compete with us in like commodities, it becomes essential in the sale of those commodities that we have ships of our own to deliver them.

Therefore in order to perpetuate American shipping we must adopt a plan to insure permanent services to all parts of the world with ships equal to or better than those of our competitors. We must find some means to encourage private capital to invest in American ships. We must recognize the fact that American shipping is handicapped and will continue to be handicapped, due to the higher American living standards, and that this handicap can not be overcome to any appreciable extent by methods adopted in some of our other industries where mass-production methods apply. It must always be remembered that ships are built to order and not manufactured. Likewise the wage scale on American ships will continue to be higher than those of our competitors, also due to our higher living standards. If Americans are to be encouraged to follow the sea, it is only natural that American standards apply.

We can not continue and should not expect such indispensable industries as shipbuilding and shipping to engage in direct competition without some form of protection such as is afforded our other industries. Either directly or indirectly American shipping must be placed on an equality with our other industries which compete in international trade. The service rendered by American shipping is national in scope. It serves all industries engaged in international trade and will serve to stimulate, pioneer, and expand that trade.

The annual sum necessary to accomplish this purpose is less than one-fourth of 1 per cent of the value of our total water-borne foreign commerce. This surely is an insignificant sum to revive, maintain, and perpetuate two of our most vital industries, those of shipbuilding and shipowning.

In the revival of these two indispensable industries the beneficial effect will be felt throughout every one of these United States, as was demonstrated by the reconditioning of the steamship *Leviathan*, to which the products and labor of 46 States directly contributed.

A factor that can not be overlooked is the contribution of merchant ships to the national defense. This is of unusual importance owing to the limitations placed on naval tonnage. The potential sea strength of a nation is not fixed by naval ratios alone, but by the combined strength of naval and merchant tonnage, each serving the other.

The time has surely arrived when we can no longer permit the decline of our sea power to continue without dire results to the Nation, both from a commercial and strategic standpoint. Every effort must be made, partisan differences set aside. This is the crisis; we must declare our commercial independence in the matter of our national shipping and foreign trade and attain our rightful position as a principal world power and a first-class commercial and maritime nation second to none. The bill now before Congress, which was reported unanimously from the committee, with all differences composed, proves as in the past when confronted with a national emergency, the patriotism of the American people as reflected by Congress, rises above the restraining influence of partisan consideration.

The world is awaiting the definite decision as to the future position of the United States upon the seas which this Congress is now about to declare.

Our destiny may be shaped by this decision. I am sure it will be in the interest of greater and more progressive America. [Applause.]

Mr. DAVIS. Mr. Chairman, I yield six minutes to the gentleman from New York [Mr. BLACK]. [Applause.]

Mr. BLACK of New York. Mr. Chairman, as befitting an advancing country of the world, we are taking a reckoning of our power on the sea. That such power is inadequate either for the distribution of our production or for the protection of our basic wealth is fairly evident. Our output is carried in foreign crafts, and our coasts are exposed to enemy attacks. The Nation must think of the sea; the people must contrive a merchant marine and a defensive marine. Public opinion should force the construction of ships of peace and ships of war.

The United States is too resourceful a nation to depend upon other nations for the transportation of its goods to the ports of the world. The Congress has almost as little justification in trusting our commerce to the ships of competing nations as in trusting the defense of our coast line to foreign naval vessels. To translate riches into economic power requires the control over the facilities for the transportation of the riches over the seas. It is akin to hiding one's light under a bushel to deprive the Nation's merchants of national sea carriers.

That it will cost money to give us a sizeable merchant marine is no objection, for money so spent shall return to the country more than tenfold. We are reaching a turning point in the relative commercial status of this Nation, and we must advance or decline. Our commercial health will depend largely on maritime circulation. We must not be like the wealthy miser who was in danger of death and would not call in the doctor because it would cost him money.

A spur to American shipping activity will do much to help domestic industrial conditions. Our merchants will be able to transport their goods at more reasonable rates than now exist due to the preferences given by foreign shipping to foreign cargoes lying side by side with American cargoes in foreign hulls. Moreover, many of our private shipyards, which once throbbed with activity at our principal ports and are now as lifeless as the deserted village, will again hum with all the mighty music of American industrial life. The navy yards of the country will no longer have the competition of the private yards, for work on naval vessels and the Government yards will add to the country's dynamic energy.

Though the country is rich, men are walking the streets for want of work. The restoration of American interest in the merchant marine and the Navy will call many of them back into the ranks of active labor.

America has lately been drifting along without any design. It is time that we plan for our future. In considering that future, America must look to the sea.

Let us learn from Great Britain the story of sea power, but let us not be taught by Great Britain that Britannia alone has the right to unfurl a flag on the peaceful and troubled waters of the world.

The pending bill provides a reliable chart for our proper maritime development.

Give American shipping a chance to show its ingenuity in the age of startling progress. [Applause.]

Mr. DAVIS. Mr. Chairman, I yield 20 minutes to myself.

The CHAIRMAN. The gentleman from Tennessee [Mr. DAVIS] is recognized for 20 minutes. [Applause.]

Mr. DAVIS. Mr. Chairman, this is a very important measure. I suppose it is natural that there is apparently not a great deal of interest when there is but little, if any, controversy. However, this is a problem in which the committee which has reported this bill has been interested ever since the creation of the committee. It is a subject upon which we have held hearings in every Congress of which I have been a Member. There are various phases of the problem. They are presented in somewhat more acute shape at times than at others, but we are all interested in an American merchant marine.

I think that to-day the American public is very much more interested and more vitally concerned in having an American merchant marine than it has been for a long, long time. There was a time when the American-flag ship was preeminent on the sea. As has already been suggested by other speakers, we excelled the world prior to the Civil War. In other words, from 1820 down to about 1860 we had the greatest merchant marine in the world. We were the most successful shipbuilders and ship operators in the world. Our fast "clippers" plied all the seven seas and carried the commerce of this country, ranging all the way from a percentage of 62½ per cent to 92 per cent during that period, and in addition to that these American ships operated extensively in indirect trade; that is, between other nations of the world. The American merchant marine was not only successful but it was profitable, and it was profitable in spite of alleged handicaps that existed then with respect to differentials in wages and otherwise.

As has already been pointed out, however, a decline, an unfortunate decline, came in our shipping; a decline in the percentage of our own commerce which we carried, and a disappearance from the seas of American-flag ships engaged in indirect trade. In 1860 we had by far the largest merchant marine we ever had, and we then had the largest merchant marine in the world, barring none.

But during the Civil War more than a million tons of our ships were destroyed, and fully that many more sought foreign registry to prevent capture and destruction by one side or the other in that unfortunate fratricidal contest. And in 1866, immediately following the Civil War, the Congress, perhaps in a spirit of pique, enacted a law prohibiting the reregistry under the American flag of those ships that had sought protection under foreign documentation. So that during that brief period there was a very substantial decrease in American ships; and just about that time and for a decade prior to the Civil War we had the advent of the steamship; and while an American had invented the steamboat, yet we were so successful with and

so wedded to our fast wooden sailers that we were very slow to turn to steamships and also slow to turn to iron and steel vessels. And so Great Britain, which was then our greatest rival on the sea, began the construction of steamships and of iron vessels, and in that way began to overtake us and distance us.

Then along in 1849 and the few years thereafter we had the discovery of gold and the rush to California, which attracted the minds of the citizens of this country to the great undeveloped West, and we began a great material development, and that attracted the minds of the people and the money of the investors. And so this great interior development, followed by a great industrial development, took place, with the result that this Nation ceased to be ship mined at the time that it turned its mind and its attention and its money to interior development.

American people not only lost interest in a merchant marine from a commercial standpoint but also from the standpoint of national pride. One of the greatest handicaps to American shipping has been that Americans are not as loyal to the flagships of their country as are the nationals of other countries. Even high American officials frequently travel on foreign ships. If American citizens would loyally support American passenger and cargo vessels, American shipping will surely succeed.

Another reason assigned by the authorities on the subject is that—

a most effective cause for the decline was the protective tariff.

As is well known, high tariff duties began to be imposed soon after the Civil War, primarily for the purpose of raising revenue to liquidate the war indebtedness. However, the high protective tariff system became a fixed policy of the party which has been in power most of the time since the Civil War, and tariff rates have on the whole steadily increased. High tariff rates on shipbuilding materials has militated against American ship construction, and the present high tariff rates on shipbuilding material cover most of the differential between the cost of American and foreign ship construction. Furthermore, the authorities agree that the—

tariff has restricted the number and amount of cargoes that American ships could bring from foreign ports, and that condition will always be present in the face of a high tariff.

President Harding, in one of his messages to Congress, very correctly stated that before you can have a successful and profitable merchant marine you must have both incoming and outgoing cargoes. Nobody disputes this truism. The situation is such that Chairman Lasker described it by saying that the tonnage of all exports to Europe is three and a half times as much as the tonnage of our imports from Europe. We must admit that it is not an ideal situation when even if our ships go to Europe fully loaded they must return five-sevenths empty.

I am not discussing this question from a partisan standpoint. I shall not enter into any discussion of the merits of a high protective-tariff system. I am simply stating the facts. No discussion of the handicaps to American shipping can fairly omit mention of the greatest handicap.

However, without even suggesting any surrender of their views with respect to a high protective-tariff policy, I do wish to suggest to those members of the Republican Party, who are vitally interested in an American merchant marine, the advisability of either repealing or substantially reducing the tariff on shipbuilding materials. It is not a part of the policy of the party in power to impose high tariff duties upon all commodities, not even all manufactured commodities—notably shoes. They might, with entire propriety and with great benefit to American shipbuilding and consequent ship operation, adopt such a policy with respect to shipbuilding materials. To do so, would be in keeping with the policy of the Republican Party prior to the Fordney-McCumber Tariff Act.

The act of June 6, 1872, permitted the free importation of certain materials which entered into the construction of wooden vessels for foreign trade and trade between the Atlantic and Pacific coasts of the United States. The tariff act of August 15, 1894, extended the free list so as to include all shipbuilding materials, but only to be used in the construction of vessels for the foreign trade and for the domestic trade between the Atlantic and Pacific ports of the United States. This restriction was such as to practically nullify the usefulness of the privilege. The act of August 5, 1909, permitted ships constructed in whole or in part of imported materials to engage in coastwise trade six months out of the year, while section 5 of the Panama Canal act of August 24, 1912, permitted such ships to engage in the coasting trade during the entire year. The tariff act of October 3, 1913, made no change in this respect.

Prior to the 1909 act the cost of steel plates, the chief material entering into ship construction, ranged from $6 to $15 more per ton in the United States than in England, it being freely charged that American steel manufacturers successfully competed with English manufacturers in foreign countries, selling steel plates and other material much cheaper abroad than they did in the United States. Even with the restrictions on ship construction imposed by the act of 1909, the differential began to disappear; by August, 1910, one year after the passage of the act, the price of steel ship plates in the United States was $31.36 per ton and in England $31.63 per ton; by September, 1911, steel plates were $28.54 in the United States and $32.85 in Great Britain; in September, 1912, they were $30.91 in the United States and $38.93 in Great Britain, this being the month following the passage of the act of 1912; in December, 1914, the selling price of steel plates in the United States was $23.74 and $35.59 in Great Britain; in June, 1915, the price in the United States was $27.44 and in Great Britain $47.45, a differential of $20.01 in favor of the United States. Consequently, by these changes in the tariff laws a former large disadvantage of the American shipbuilder was converted into a distinct advantage.

The condition of the American merchant marine engaged in the foreign trade grew gradually worse until 1910. At that time, instead of carrying from 62½ per cent to 92 per cent of our whole commerce, we were carrying only 8.7 per cent.

In that connection, however, I want to state this, because not to state it, it seems to me, would be unfair and misleading. Aside from the decrease in American tonnage from 1860 to 1870, there was no decrease in our tonnage. It gradually grew. It has continued to grow practically from the establishment of this Government. But there was a tremendous decrease, as I have indicated, in the percentage of our commerce which we carried, because our commerce grew so rapidly and our shipping grew so slowly after 1860 that we did not by any means keep up with our industrial growth, so far as our shipping growth was concerned.

Now, that brings us down to the World War; and we were so interested and so absorbed in our domestic affairs and industry that we seemed to have largely forgotten the sea. We seemed to have largely forgotten the importance of an American merchant marine, particularly from the standpoint of national defense; and so, after the commencement of the World War, and even before we ourselves became involved in the World War, we began to feel keenly the need of merchant ships, because many of the foreign ships which had been plying to and from our shores were diverted from that trade. Many of them were sunk. And so we began to feel the situation very seriously before we became involved in the war.

Then, when we ourselves became involved in the war, we found that we needed merchant ships more than we needed warships. In that connection I want to remind you Members that there has seldom been a war of any magnitude in which merchant ships have not borne as important a part and proven as useful and necessary as warships. This was literally true in the World War, and it will ever be so, because if we maintain our commerce in war and supply our troops with munitions and food supplies and with various other equipment, as is necessary in the conduct of a real war, we must have the ships to carry them as well as the men; and we would likewise need our merchant ships if other important maritime nations became involved in war and their ships are withdrawn from our trade.

Hence, from the national defense standpoint, it is important to have an American merchant marine, and as has already been well stated by others, it is a matter of tremendous importance in peace time.

As indicated, conditions created by the World War, even before the United States became involved therein, forcibly impressed the importance of a larger American merchant marine; besides there was a continual apprehension that the United States might become involved in war. Consequently, the Sixty-fourth Congress enacted the shipping act, 1916, as stated in the title:

To establish a United States Shipping Board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States, and for other purposes.

Within a year after the passage of said act, the United States did become involved in the World War. There was a most pressing and immediate demand for ships and more ships. Under the provisions of the 1916 act and certain emergency acts was consummated the most tremendous shipbuilding program in the world's history. The United States acquired by construction and purchase a total of about 2,500 merchant ships, which were put into immediate service as soon as purchased or launched. Aside from the very important part these ships

played in the war and in the return of our troops, supplies, and equipment, the Shipping Board established trade routes to every principal port of the world, with the result that American-flag ships carried over 50 per cent of our exports and imports in the years 1920, 1921, and 1922. On January 1, 1920, 1,525 Shipping Board vessels with a dead-weight tonnage of 8,681,791 were in successful commercial operation. During the year 1920 there developed a tremendous slump in world commerce resulting in a world-wide withdrawal and lay up of ships. Shipping Board vessels were rapidly—too rapidly—withdrawn from operation, with the result that American-flag ships carried 42 per cent of our imports and exports during the year 1923, 44 per cent during 1924, 40 per cent during 1925, and so on. During the Sixty-sixth Congress a select committee, of which Representative Joseph Walsh, of Massachusetts, was the chairman, was appointed to inquire into the operations of the United States Shipping Board and Fleet Corporation, and conducted a comprehensive inquiry into the ship construction and other activities during the World War. The unanimous report of this committee concluded in part as follows:

> Considering the program as a whole, the accomplishments in the number of ships constructed, the tonnage secured, and the time within which the ships were completed and delivered constitute the most remarkable achievement in shipbuilding that the world has ever seen.

However, aside from the delay involved, these ships were constructed, purchased, and commandeered at war prices, all of which we hope may be avoided in any future national emergency.

It is difficult to estimate correctly how much the Shipping Board vessels have saved the American people in the way of freight rates, not to speak of better and more frequent services from and to a much larger number of ports both at home and abroad.

There is no question at all but that if we had not had these ships plying in American services and carrying American products that we would have been bled through the nose with exorbitant freight rates, such as were exacted during the war, when they charged whatever they desired, and at that time it could not be prevented.

This is a large subject, and I can touch upon only a few features of the bill before us and of their import and significance.

I want to concur in the statement that this bill is possible because of a spirit of cooperation on the part of the members of the Merchant Marine and Fisheries Committee. I have never seen a finer spirit manifested. We all realized that every man could not have his way; that perhaps no man could have a bill exactly in accord with his own views. So far as I am concerned, if I were given the absolute and unconditional authority to draft legislation, I would draft it differently in some particulars, at least, from the bill before us, and I assume that is true with respect to every other member of the committee. On the other hand, each of us might have been wrong in our individual opinion, and I hope that in reporting a bill which represents the composite wisdom of the entire committee we have a more valuable measure than could be drafted by any of the members acting alone.

I do not agree with the suggestion of the gentleman from Indiana [Mr. WOOD], who in his speech said that he indorsed this bill because it was a "good beginning." I want to assert that it is more than a beginning, and I further assert that this bill, if enacted into law, is the most constructive and will be the most helpful bill to a national merchant marine that has ever been enacted by this or any other country. [Applause.] While I say that, yet I consider the bill economically sound and entirely workable.

There is no provision in it involving a principle which does violence to the historic views of either great party. I do not think there is anything in it which any Member of this Congress can not conscientiously support. As I indicated at the outset, there are doubtless differences as to some of the details, but I am discussing the principles involved, and there is not a single provision in this bill which involves a principle that is not already embodied in our laws. We have modernized and liberalized existing laws in several particulars. I shall not undertake to discuss the detailed features of the bill, because that has been admirably done by the distinguished chairman of our committee and by other members of this committee.

But referring again to the effect of this legislation, I want to state that in my opinion it will restore the American flag to the sea in such a way and to such an extent that the American people will again become ship minded; they will take a pride in their merchant marine and will support it in such a way that it will be entirely successful. [Applause.] All authorities agree that one of the greatest difficulties now is that when the American people ceased to have an interest in the sea they ceased to appreciate the importance of their individual and collective support of an American merchant marine, and if Americans will support their merchant marine like the nationals of other countries support their merchant marines, we will not only have a great merchant marine, carrying at least 50 per cent of our imports and exports, but we will have one that will be financially successful. Our national pride and patriotism should embrace our merchant marine. To-day, even under existing conditions, if our ships returned with full cargoes, like most of them depart from our shores, they would be on a very profitable basis. This view is not mine alone.

We had before us at the hearings many witnesses. We had many American shipowners, and I want for a minute to refer to their views. We had before us Henry Herberman, the president of the American Export Lines, which operate between north Atlantic ports, and nearly a score of Mediterranean and Black Sea ports. They are operating in this highly competitive trade 21 passenger and cargo vessels, which they purchased from the Shipping Board, all under the American flag and with crews practically 100 per cent American. They are doing a splendid work, they are rendering a fine service, and promoting American commerce, because they are operating these lines on American businesslike principles. [Applause.]

Mr. Herberman stated that if this bill became a law they would be "on top of the world," and would build new, speedier, and finer ships to replace their present fleet, and would be able to successfully compete with any ships in the world.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. DAVIS. Mr. Chairman, I yield myself 10 additional minutes.

The CHAIRMAN. The gentleman from Tennessee is recognized for 10 additional minutes.

Mr. MOORE of Virginia. Before the gentleman finishes his remarks will he touch upon the point that was made here early in the debate with reference to the contracts under which American railroads operate in connection with foreign steamship lines? I assume the gentleman's belief is that if the American merchant marine is made more vigorous and its permanency insured that after awhile there will be no such contracts to invite criticism.

Mr. DAVIS. In reply to the gentleman from Virginia I will say that it is undoubtedly true that certain American railroads have contracts with foreign steamship lines, under which agreements they exchange freight with each other. My information is that that practice is not as bad as it was, but it is certainly bad enough. I wish to state that that matter is dealt with by the Democratic national platform adopted in 1924, and if you will pardon a personal reference, I had some part in the preparation of that platform. Among other things it says this:

> We condemn the practice of certain American railroads in favoring foreign ships and pledge ourselves to correct such discriminations.

I want to state to the gentleman from Virginia that there is in the merchant marine act of 1920 what is known as section 28, which was designed to remedy that situation. Our committee held extensive hearings on that provision some two or three years ago, at which representatives from all over this country appeared and gave their views, but nothing was done at that time by the committee or by the Shipping Board for the reason that it appeared that to invoke that provision at the time would work a very great hardship on American industry and American foreign commerce in many ports, at least, because of the lack of American ships to adequately take care of the situation, both with respect to tonnage and sailings, and general service. If this measure builds up an American merchant marine, if it results in the construction and operation of faster ships, more frequent sailings, more modern service in every way, and more American lines operating to and from our shores, which we think will result, it will no longer give an excuse to these railroads, in the first place, to make contracts with foreign lines, and, in the second place, it will certainly justify the Government through that section or in some other manner, in meeting the situation and eliminating that practice.

Reverting to the prospects for the construction and operation of speedy, modern ships under the American flag and in the foreign trade, in the event this measure becomes a law, it appears that several private operators in the Pacific, the Oceanic Steamship Co., the American Hawaiian Steamship Co., the Oregon Oriental Line, and perhaps others plan the construction of several such ships, involving an expenditure of approximately $40,000,000 in the near future.

The gentleman from Massachusetts [Mr. GIFFORD] explained in some detail the plans of the Trans-Oceanic Co. to construct

and place in operation six of the speediest and most modern ships ever constructed, for operation under the American flag in the North Atlantic.

Of course, all of these plans and proposals are tentative and conditional upon the passage of this bill.

This is the reason we increased the construction-loan fund, in order to meet the demands for money with which to build these modern, speedy ships, which will not only be so valuable as merchant ships in times of peace, but will prove of incalculable benefit in time of war.

I was requested by some one to explain what justification we thought there was for proposing to lend 75 per cent of the cost of construction of a ship at the current Government rate of interest. In addition to what I stated in response to the question at the time, I want to suggest this: We are spending every year several hundred million dollars upon our Navy, not to speak of our Army, from which we receive no pecuniary returns whatever, and which does not perform any useful service in peace times. We do not expect them to. We do not complain because they do not, but here it is proposed to build some modern ships which would be of just as much value in times of national emergency as the warships, and all the Government is asked to do is to lend 75 per cent of the value of the construction at the rate at which the Government itself could borrow the money, and for the principal to be paid back in equal annual installments with annual interest.

Under the provisions of this bill these ships must be constructed in accordance with plans approved by the Navy, and the Navy will approve them from the standpoint of naval auxiliaries.

The Trans-Oceanic Co. explained their tentative proposal before the committee and before the Shipping Board to build six very large ships that would be airplane carriers. These are the same people who built the U. S. S. *Lexington* and *Saratoga*, the great airplane carriers. The *Lexington* has already in actual test demonstrated that she can make 33 knots or more. These ships will be capable of carrying 24 airplanes on the upper deck of each one of them, and under the provisions of this bill, if we get into war, we can commandeer these ships and pay no consequential damages and pay nothing because of an enhanced price due to the war.

I think this sufficient justification, if somebody else is willing to build these great instrumentalities of defense under the provisions of this bill. I think it is a pretty good investment from a national-defense standpoint, not to speak of the fact that during peace times they will be operating under the American flag between our shores and the shores of other countries.

Like the gentleman from Massachusetts [Mr. GIFFORD], I am not familiar with the technical and mechanical details of the proposal, but it appealed to me and I think it appealed to the Congress. The construction and operation of such ships as proposed by the Trans-Oceanic Co. would certainly go far toward restoring American prestige on the seas, would appeal to American pride, and do much toward making American citizens "sea minded" again. If such a proposal be formally and officially presented to the Shipping Board, I trust that it will have most careful, impartial, and sympathetic consideration. I have always said that the American people can excel every other nationality in every line of industry and that whenever they apply the same industry and the same enterprise and the same intelligence to shipping that they apply to other industries they will likewise excel the world in that. [Applause.]

The CHAIRMAN. The time of the gentleman from Tennessee has again expired.

Mr. WHITE of Maine. I yield to the gentleman from New Jersey [Mr. WOLVERTON].

Mr. WOLVERTON. Mr. Chairman and Members, I come from a State with many miles of seacoast on one of the earth's greatest oceans. To the north my State shelters the harbor of New York, and to the south its borders combine to form the port of Philadelphia. Within the State, I come from a district extending along the banks of the Delaware River—the greatest shipbuilding area in America.

I proudly admit I am ship minded. I confess to the belief that this country's future destiny lies on the sea. It is heartening to know that I am not alone in this faith. Our legislators and leaders throughout the land have unanimously expressed their deep conviction that America must again take her place as a maritime nation. I speak of a return to the sea because from 1816 to 1860 American clipper ships and packet boats were supreme on the oceans of the world, the envy and despair of foreign traders. Built for long voyages and marvels of speed, they carried during this period nearly 90 per cent of our foreign commerce.

If we follow the history of American navigation laws we see that the policy of discriminating duties was in full force until about the year 1790. This policy gradually weakened, until in 1850 it was finally suspended due to the adoption of reciprocity treaties with the leading nations. But prior to this date all sections and all parties of this country had united in offering subsidy to American steamship lines, and this ocean mail policy begun in 1847 had by 1855 completely vindicated itself. Our ocean fleet had increased in tonnage 200 per cent in this short period, and our vessels were the equal of any afloat. It was the grave misfortune of the American marine at this critical period to be drawn into the maelstrom of sectional strife. The merchant shipping of the United States was owned chiefly in New England and New York and sailed from northern ports.

The ocean mail system became more and more an issue of sectional politics, and in 1855 the ocean mail transportation bill making appropriations for the coming year was vetoed by the President. This checked at once the swift, steady growth of our deep-sea tonnage and the most important lines were soon abandoned. The startling reversal of a great national policy that had been entered upon with such high patriotic motives was part of the price this country has had to pay for that feud between the States. In the years when America withdrew its protection from Atlantic steamship enterprise and left it to perish, the nations of Europe, our competitors, were steadily increasing their ship subventions and widely extending their trade routes from ocean to ocean. But with the period of our Civil War what remained of our shipping was totally destroyed. Following the war, Americans turned their energies to the building of railroads and the developing of the interior of their country. To-day, railroad networks cover the land, and we have become the greatest industrial Nation on the globe. And I remind you, Mr. Chairman and Members, that our railway systems have been built up with a subsidy ten times greater than would be required for the revival of our foreign-commerce routes. Our economists tell us that we must now sell abroad from 10 to 12 per cent of our products. The farmers from the interior and the manufacturers along our shores all agree that we must take this surplus product of farm and factory to foreign markets. Having provided adequate and economical facilities for carrying the products of the country to the seaboard, must we await the convenience of the foreign carrier to take this wheat, cotton, oil, and machinery to market for us? We left the high seas to build our country. We have completed that job and we turn our faces seaward once more. It is a logical result by reason of our traditions and the natural instincts of a maritime nation. Furthermore, there is on the sea a great field for transportation enterprise and the development of a commerce profitable alike to producers on shore and operators on the sea. The 5,000 miles of coast line possessed by this country does not suggest to me any reason for the supremacy of any foreign power on the sea.

From the days of Oliver Cromwell until the present, British shipping has been built up and largely sustained through discriminations in favor of her own and against the ships of other nations. No student of history can doubt but that to her navigation laws, which are an ingeniously constructed system favoring British seamen, British shipbuilders, British shipowners, and British merchants, England chiefly owes the vast extension of her commerce. And to-day we find foreign governments still assisting in the development and maintenance of their respective merchant marines. Mr. Lawrie, of the Shipping Board, in his recent report, tells us that capital is being loaned by some foreign governments at low rates of interest as an inducement to the construction of vessels of the most up-to-date types and of the greatest speed. That mail subventions and construction bounties are being paid by these governments to their shipowners and have proved of great assistance in developing and maintaining their fleets. When a foreign vessel is constructed to satisfy the requirements of the Navy for conversion as a cruiser in time of war, the owner of the vessel is adequately compensated. By these and other means our competitors foster and maintain their sea power.

That some assistance should be afforded shipping is only consistent with our national policy, and in recognition of this principle variousprotections and aids were provided for our overseas ships by the merchant marine act of October, 1920. Those aids consisted of preferential rail rates, discriminating duties in favor of goods transported in American vessels, certain tax exemptions, and the extension of our coastwise laws to some of our insular possessions. None of these provisions ever become effective. Almost without exception the items of real interest in what has been called our declaration of maritime independence have either been ignored, repealed, or in some manner set aside. So we have had on our statute books much writing that would give the casual reader the impression that American ships are receiving substantial aid and protection,

while, as a matter of fact, the results of such few of these provisions as have been put into effect are insignificant and in their general application ineffective. So the light which Americans hoped would brighten our merchant marine has turned to darkness and only those familiar with the gradual decadence of our shipping know how great is that darkness. We realize that Thomas Jefferson spoke truth when he said:

> The carriage of our commodities, if once established in another channel, can not be resumed in the moment we may desire.

The sequel to patriotic declarations, noble sentiments, and solemn pledges has been a policy of evasion and denial.

It is with a negligent Congress refusing substantial encouragement and aid, which private shipping enterprise requires to enable it to meet world competition, that our citizens are so much concerned. Such neglect has made our maritime interest doubtful and forced capital to seek other fields of investment. It indicates an abandonment of the hope of American ship undertakings and suggests a loss of faith in the vision of an American merchant marine proportionate to the American cargoes to be carried over the seven seas.

During the present session of this House the people of the United States have unanimously reaffirmed their maritime mandate of 1920 and again vigorously asserted their unqualified determination to provide an adequate merchant marine. They know that American capital and American labor can build and operate American ships if the Government will give the shipping industry that legitimate aid which in addition to putting our flag on the seas would be a benefit to every farm and every factory in the land.

I am satisfied with the deliberations given to this matter by both Houses of this Congress and my pride and love of country do not mislead me when I state my belief that the people of the United States if given the proper assistance and encouragement can rival any maritime people on earth. I believe the bill under consideration gives the necessary aid and that the enactment of this definite policy is imperative.

It is not a partisan issue. Woodrow Wilson said in 1915:

> To speak plainly, we have grossly erred in the way we have stunted and hindered the development of our merchant marine. The merchants and farmers of this country must have ships to carry their goods. It is of capital importance that the United States should be its own carrier on the sea and enjoy the economic independence which only an adequate merchant marine would give it. It is high time we repaired our mistake and resumed our commercial independence on the sea.

And when the World War began the United States, with a wealth surpassing that of any other nation on earth and a commerce equaling that of any country, had under her flag in the overseas trade only 15 ships. Less than 10 per cent of our billions of ocean commerce was at that time transported under our own flag. We were dependent for carrying facilities upon our greatest commercial competitors, and we paid into their coffers each year for transportation charges millions of dollars. The war came and revealed the fact that this Nation had progressed in everything that makes a people great except ocean transportation. Our docks and terminals were soon piled high with the products of the farm and the factory. Our foreign competitors, who had always been willing to carry our imports and exports, were found in this time of emergency to be unavailable.

The farmer was perhaps the greatest sufferer, because of the perishable character of his products. It is estimated that our lack of ships cost us in increased charges in one year $500,000,000. After our own entrance into the war this service became more inadequate than ever and there resulted the unprecedented congestion of domestic products awaiting shipment at every seaport in the country. This necessitated the huge emergency shipbuilding program carried on by the United States at an enormous expense. At the time of construction the question of fitness of these vessels to engage in competitive foreign trade was not considered, but was entirely subordinated to the primary requirements of speedy output and heavy tonnage. So the end of the war found these vessels, with only a few exceptions, to a large degree obsolete for competitive purposes and fast wearing out. In general, they are far inferior to the vessels of foreign nations, who are now building ships of the very latest types and highest efficiency. We can not hope to succeed unless we do likewise; we can not blame our Shipping Board for failure to accomplish the impossible. At the present time there is no ship being built in the shipyards of this country for overseas trade. The need of a definite policy is imperative. Within the next five years the German merchant marine, assuming that its present building program can be maintained, will have reached a total tonnage exceeding its pre-war strength and will be composed entirely of vessels constructed on the latest and most efficient lines.

A very important factor on the sea is speed. The British Empire has 309 vessels, as compared with 51 of the United States, ranging in speed between 15 and 19 knots. In ships over 20 knots we rank fourth. In view of the disarmament treaty, it is the larger and faster vessels, quickly convertible into naval auxiliaries, that are of paramount importance.

In President Coolidge's annual message to Congress in 1923 he stated:

> The entire well-being of our country is dependent upon transportation by sea and land. We must have a merchant marine which meets these requirements, and we shall have to pay the cost of its service.

The records of this Congress, Mr. Chairman, reveal only too well what the cost of this service would be if provided by the Government. The bill I am indorsing proposes to build up a new American merchant marine without cost to the Government or the taxpayer, except as payment for service rendered and when those services are measured by a fair, just, and reasonable price and not paid as a lump sum without regard to work performed. Its provisions will make possible the use of Government credit facilities in the form of a construction loan of three-fourths the cost of building ships at the Government's current rate of interest. Such a loan is protected by prior liens on the ships themselves and will be returned in 20 years by amortization. Mail rates are established, not as a subsidy but commensurate with the speed and frequency of the service, its cost, and utility. Authority is given to the Post Office Department to enter into ocean mail-carrying contracts for periods of 20 years, the life of the loan.

Because approved insurance, whether here or abroad, is limited on any single ship to $9,000,000, the bill provides, in case of total loss, for cancellation of the loan against the ship to the extent not covered by amortization and insurance. Provision is also made by which the crews or a part of them can be enrolled in the Naval Reserve.

I submit that this is the first time that any proposed shipping legislation, prior to its enactment, has called forth from our citizens promises of concrete building programs to advance America's prestige on the sea. This must surely reflect the merit inherent in this bill and would seem to be an earnest of its success if it becomes law. In the RECORD for January 31 is recorded a telegram addressed to the Shipping Board from the president of the Export Steamship Corporation and reading as follows:

> We contemplate placing order for three combination passenger and cargo vessels with a speed of 18 knots for operation between New York and Alexandria, Egypt, with call at Gibraltar and Algiers en route. This new construction conditional upon the passage of Copeland bill or similar legislation providing long-term mail contracts and loan from construction loan fund to partly finance new construction. We are also willing to consider new construction for the New York-west coast of Italy service under similar conditions.

Also, the Transoceanic Corporation of the United States on January 24 made a definite proposal to the Shipping Board for the construction of six vessels to fly the American flag across the North Atlantic—ships that will make the fastest passenger vessels now afloat look like lumbering freighters. This proposal is contingent on the enactment of legislation similar to that contained in the bill at issue. These ships are designed as airplane carriers and meet more perfectly than any vessel ever projected the requirements both of the merchant marine and the Navy. In times of peace these vessels will pay their own way and in times of war they will be deadly units of our armed forces at sea. Their readiness will cost the taxpayer nothing.

This bill will revolutionize ocean service. It offers not only a way to build up a merchant vessel service capable of carrying our traders, our products, and our trade influence to the trade marts of other nations, but also makes possible the building of those naval auxiliaries so necessary for any nation that has risen to a commanding place in the world. We ask only for legislation that will give an American merchant marine of use to the manufacturers, merchants, and agriculturists; that will furnish employment to labor; and that will permit us to build ships in competition with those constructed in foreign countries. If we are to have continued prosperity, we must acquire our share of the world's commerce, and we must transport those commodities to the markets of the world in American ships at least the equal of our competitors and maintain a service on a par with, or better than, our nearest rival. The merchant marine is not merely a carrier of the fruits of industry and of the soil, but the merchant marine is an organization which seeks to develop new business. Overproduction is already a

problem and must be solved. The development of foreign markets will be a remedy. Ships are essential to this commerce, and the principle of the control of these ships is as vital as the principle of the freedom of the seas. Our economic independence demands that the ownership of the vessels that carry our products remain in America.

We are drifting for want of leadership in things concerning shipping. I believe the enactment of this bill will give us wise shipping laws, free us from useless restrictions, and go a long way toward solving our problem. I earnestly implore and bespeak your support, for we must give it more than just serious consideration. Our present fleet will soon become obsolete and our shipyards are fast disappearing. Unless Congress acts we will be dependent upon foreign ships to handle our overseas trade upon their own terms and conditions. Can we supply the statesmanship that shall make the flag of vessels carrying this country's commerce our own?

It is a question of aid, of high and holy protection in the best meaning of the term; the protection of our country, our labor, our commerce, and all that gives dignity and character to nations.

The bill before you answers fully this question and will give the protection desired. It represents on this subject the thought of the best minds in Congress and throughout the land. It is not a subsidy or a subvention, but gives aid only in return for services rendered and commensurate with the work performed.

Mr. WHITE of Maine. Mr. Chairman, I have no other requests for time, and unless there is time available on that side I suggest that the Clerk read the bill for amendment. May I say to the membership of the House I hope we can read to the middle of page 5. So far as I am concerned, I will be disposed to stop there.

The Clerk proceeded with the reading of the bill, and read to line 12, page 5.

Mr. WHITE of Maine. Mr. Chairman, in accordance with an understanding I have had with various members of the committee, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CRAMTON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (S. 744) to further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States, and for other purposes, and had come to no resolution thereon.

### MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate disagrees to the amendment of the House of Representatives to the bill (S. 3555) entitled "An act to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MCNARY, Mr. CAPPER, Mr. GOODING, Mr. SMITH, and Mr. RANSDELL conferees on the part of the Senate.

### ROSEBUD SIOUX INDIANS, SOUTH DAKOTA

Mr. WILLIAMSON. Mr. Speaker, I call up the bill (S. 3438) authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota.

The SPEAKER. The gentleman from South Dakota calls up the bill S. 3438, which the Clerk will report.

The Clerk read as follows:

A bill (S. 3438) authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States so much of the tribal funds on deposit therein to the credit of the Rosebud Indians, of South Dakota, as may be required to make a $10 per capita payment to the recognized members of the tribe, and to pay or distribute the same under such rules and regulations as he may prescribe.

The bill was ordered to be read a third time, was read a third time, and passed.

On motion of Mr. WILLIAMSON a motion to reconsider the vote whereby the bill was passed was laid on the table.

A similar House bill was laid on the table.

### INTERNATIONAL TECHNICAL COMMITTEE OF AERIAL LEGAL EXPERTS (S. DOC. NO. 94)

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with accompanying papers, referred to the Committee on Foreign Affairs and ordered printed:

*To the Congress of the United States:*

I transmit a report from the Secretary of State in regard to the work of the International Technical Committee of Aerial Legal Experts, in the deliberations of which the Government of the United States would be entitled to participate if it should pay a share of the annual expenses of the committee, and commend to the favorable consideration of the Congress the recommendation of the Secretary of State, as contained in the report, that legislation be enacted authorizing an annual appropriation of a sum not in excess of $250 to meet the quota of the United States toward the annual expenses of this committee, beginning with the calendar year 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 4, 1928.*

### AGRICULTURAL SURPLUS CONTROL BILL

Mr. HAUGEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 3555, the agricultural surplus control bill, that the House insist on its amendments, and agree to the conference asked for.

The SPEAKER. The gentleman from Iowa asks unanimous consent to take from the Speaker's table the bill S. 3555, the agricultural surplus control bill, insist on the House amendments, and agree to the conference asked for by the Senate. Is there objection?

Mr. O'CONNOR of Louisiana. Reserving the right to object, I want to suggest the advisability in view of the widespread importance of the bill that five conferees be named.

Mr. HAUGEN. I have suggested the usual number.

Mr. O'CONNOR of Louisiana. I submit that because of its tremendous importance and its wide scope that five conferees would better represent the attitude of the House.

Mr. HAUGEN. There is very little difference in the two bills.

Mr. O'CONNOR of Louisiana. The suggestion was made to me by a Member of the Senate in whom I have great confidence.

Mr. CRAMTON. Mr. Speaker, perhaps I misunderstood the gentleman; but I understood him to say that he made the suggestion at the request of a Member of the Senate. I want to protest against a Member of the Senate making any suggestions as to the number of House conferees.

Mr. O'CONNOR of Louisiana. If I expressed myself in that way, I might say that it was for the purpose of better arresting the attention of the gentleman from Michigan, or that it was a loose and inadvertent expression of my thoughts. I regret that I alluded to a matter which was a statement in a conversational way and that it has aroused the violent animosities of the gentleman from Michigan. The statement of the Senator was my thought also.

Mr. CRAMTON. The selection of conferees is in the hands of the Speaker. The selection of House conferees is not in the hands of the Senate.

Mr. O'CONNOR of Louisiana. I have no doubt about that. There is no reason for resentment because I had a conversation with a Senator—I do not think they are pariahs among the Nation as yet. He would not think of intruding on the functions of the House and I did not make my statement at his request. I am perfectly frank about it. I think he was correct, however, in the hope that he expressed to me that five conferees would be better than three to express the attitude of the House on this far-reaching legislation.

Mr. Speaker, I withdraw the reservation of an objection.

The SPEAKER. Is there objection?

There was no objection.

The Chair appointed as conferees on the part of the House Mr. HAUGEN, Mr. PURNELL, and Mr. ASWELL.

### LEAVE OF ABSENCE

Mr. BURTON, by unanimous consent, was given leave of absense for one week on account of important business.

### AGRICULTURAL EXTENSION WORK

Mr. HAUGEN. Mr. Speaker, I present a conference report on the bill H. R. 9495, agricultural extension work, for printing in the RECORD.

The conference report and statement are as follows:

### CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9495) to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefits of the act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture," as amended,

having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1 and 2:

(1) Page 3, line 8, after "in," insert "such."

(2) Page 3, line 8, after "proportions," insert "as may be determined by the State agencies."

G. N. HAUGEN,
JOHN C. KETCHAM,
J. B. ASWELL,
*Managers on the part of the House.*

CHAS. L. MCNARY,
ARTHUR CAPPER,
*Managers on the part of the Senate.*

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9495) to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefits of the act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture," submit the following written statement in explanation of the action agreed upon by the conferees and recommended in the accompanying conference report:

On amendments Nos. 1 and 2: The Senate amendments would have changed the form of the bill as passed by the House by leaving the final determination as to the proportion of men and women agents to the extension directors of the several States without final review by the Secretary of Agriculture. In view of the fact that this extension service is a cooperative service and the Federal Government makes substantial contributions to the support of the extension agents, the conferees deemed it unwise for the Federal Government to entirely surrender its jurisdiction provided in the Senate amendments, and therefore reached a unanimous agreement in support of the bill as it was passed by the House. The provision as it now stands in the bill gives to the extension directors of the several States and the Department of Agriculture the same control and jurisdiction now exercised in the distribution of funds under the Smith-Lever bill and with a modification as to the proportion of men and women agents to be employed in the further development of the cooperative extension system in agriculture and home economics.

G. N. HAUGEN,
JOHN C. KETCHAM,
J. B. ASWELL,
*Managers on the part of the House.*

ORDER OF BUSINESS

Mr. TILSON. Mr. Speaker, when the tentative program was made up and posted in the Speaker's lobby, nearly a week ago, it was not practicable to state what the business would be on Saturday, to-morrow, and therefore it is stated there as "undetermined." I now wish to state that it is expected on to-morrow to take up the conference report on the flood control bill and when that is disposed of to go on with the reading of the shipping bill under the five-minute rule, with the expectation that the bill will be completed to-morrow.

Mr. WHITE of Maine. I take it, Mr. Speaker, that the conference report has the right of way, but I do have the earnest hope that the membership will be disposed to remain here and complete this bill to-morrow.

Mr. DAVIS. I would like to ask the gentleman from Connecticut to state whether or not, if we do complete the bill to-morrow, the Committee on the Merchant Marine and Fisheries will have next Tuesday as a special Calendar Wednesday?

Mr. TILSON. That is the understanding and, in fact, the order of the House.

SENATE BILLS REFERRED

Bills of the following titles were taken from the Speaker's table and, under the rule, referred to the appropriate committees, as follows:

S. 1727. An act to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof, approved July 3, 1926; to the Committee on Civil Service.

S. 1781. An act to establish load lines for American vessels, and for other purposes; to the Committee on the Merchant Marine and Fisheries.

S. 2720. An act for the relief of David McD. Shearer; to the Committee on Claims.

S. 3752. An act to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926; to the Committee on Military Affairs.

S. 4216. An act to authorize the adjustment and settlement of claims for armory-drill pay; to the Committee on Military Affairs.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 10536. An act granting six months' pay to Anita W. Dyer; and

H. R. 12733. An act to authorize the refund of certain taxes on distilled spirits.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States, for his approval, bills of the House of the following titles:

H. R. 3216. An act for the relief of Margaret T. Head, administratrix;

H. R. 7475. An act to provide for the removal of the Confederate monument and tablets from Greenlawn Cemetery to Garfield Park;

H. R. 11482. An act to amend section 2 of an act entitled "An act to authorize an appropriation for the care, maintenance, and improvement of the burial grounds containing the remains of Zachary Taylor, former President of the United States, and the memorial shaft erected to his memory, and for other purposes," approved February 24, 1925;

H. R. 11629. An act to amend the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service; and

H. R. 11723. An act to provide for the paving of the Government road known as the La Fayette Extension Road, commencing at Lee & Gordon's mill, near Chickamauga and Chattanooga National Military Park, and extending to La Fayette, Ga., constituting an approach road to Chickamauga and Chattanooga National Military Park.

ADJOURNMENT

Mr. WHITE of Maine. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 29 minutes p. m.) the House adjourned until to-morrow, Saturday, May 5, 1928, at 12 o'clock noon.

## COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Saturday, May 5, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON MILITARY AFFAIRS

(10.30 a. m.)

To consider the private bills.

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To consider the private bills.

COMMITTEE ON THE DISTRICT OF COLUMBIA

(10.30 a. m.)

To authorize the merger of street-railway corporations operating in the District of Columbia (H. J. Res. 276).

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

484. A letter from the Comptroller General of the United States, transmitting report and recommendation to the Congress concerning the claim of the Ayer & Lord Tie Co., with request that you lay same before the House of Representatives; to the Committee on Claims.

485. A letter from the Acting Secretary of Commerce, transmitting draft of a bill for the reconveyance to the Key Realty Co. of the marine biological station at Key West, Fla., which bill the department recommends, be enacted into law during the present session of Congress; to the Committee on the Merchant Marine and Fisheries.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. HILL of Washington: Committee on Indian Affairs. H. R. 11468. A bill authorizing the Secretary of the Interior to execute an agreement or agreements with drainage district or districts providing for drainage and reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of such district or districts that may be benefited by the drainage and reclamation work, and for other purposes; without amendment (Rept. No. 1506). Referred to the Committee of the Whole House on the state of the Union.

Mr. WINTER: Committee on Mines and Mining. H. R. 496. A bill authorizing an appropriation for development of potash jointly by the United States Geological Survey of the Department of the Interior and the Bureau of Mines of the Department of Commerce by improved methods of recovering potash from deposits in the United States; with amendment (Rept. No. 1518). Referred to the Committee of the Whole House on the state of the Union.

Mr. QUIN: Committee on Military Affairs. H. R. 12110. A bill to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended; without amendment (Rept. No. 1519). Referred to the Committee of the Whole House on the state of the Union.

Mr. VESTAL: Committee on Patents. H. R. 13452. A bill to amend the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909, as amended, in respect of mechanical reproduction of musical compositions, and for other purposes; without amendment (Rept. No. 1520). Referred to the House Calendar.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. PEAVEY: Committee on War Claims. H. R. 3937. A bill for the relief of the heirs of Thomas G. Wright; without amendment (Rept. No. 1507). Referred to the Committee of the Whole House.

Mr. HOOPER: Committee on War Claims. H. R. 4781. A bill for the relief of the legal representatives of Cobb Blasdell & Co.; without amendment (Rept. No. 1508). Referred to the Committee of the Whole House.

Mr. PEAVEY: Committee on War Claims. H. R. 9210. A bill for the relief of Lieut. George H. Hauge, United States Army; without amendment (Rept. No. 1509). Referred to the Committee of the Whole House.

Mr. PEAVEY: Committee on War Claims. H. R. 9396. A bill to compensate Eugenia Edwards, of Saluda, S. C., for allowances due and unpaid during the World War; with amendment (Rept. No. 1510). Referred to the Committee of the Whole House.

Mr. PEAVEY: Committee on War Claims. H. R. 9516. A bill for the relief of Capt. W. B. Finney; without amendment (Rept. No. 1511). Referred to the Committee of the Whole House.

Mr. PEAVEY: Committee on War Claims. H. R. 10236. A bill for the relief of Harry M. King; with amendment (Rept. No. 1512). Referred to the Committee of the Whole House.

Mr. PEAVEY: Committee on War Claims. S. 342. An act for the relief of George B. Booker Co.; without amendment (Rept. No. 1513). Referred to the Committee of the Whole House.

Mr. LOWREY: Committee on War Claims. S. 605. An act for the relief of Capt. Clarence Barnard; without amendment (Rept. No. 1514). Referred to the Committee of the Whole House.

Mrs. KAHN: Committee on War Claims. S. 2319. An act for the relief of John W. Stockett; without amendment (Rept. No. 1515). Referred to the Committee of the Whole House.

Mr. LOWREY: Committee on War Claims. S. 2473. An act for the relief of Will J. Allen; without amendment (Rept. No. 1516). Referred to the Committee of the Whole House.

Mr. SINCLAIR: Committee on War Claims. S. 3308. An act to confer jurisdiction on the Court of Claims to hear and determine the facts in the claim of John L. Alcock; without amendment (Rept. No. 1517). Referred to the Committee of the Whole House.

Mr. REECE: Committee on Military Affairs. H. R. 9719. A bill for the relief of George A. Day; without amendment (Rept. No. 1521). Referred to the Committee of the Whole House.

Mr. HILL of Washington: Committee on Indian Affairs. H. R. 11064. A bill for the relief of F. Stanley Millichamp; with amendment (Rept. No. 1522). Referred to the Committee of the Whole House.

Mr. RANSLEY: Committee on Military Affairs. H. R. 13476. A bill for the relief of Joseph M. McAleer; with amendment (Rept. No. 1523). Referred to the Committee of the Whole House.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ARENTZ: A bill (H. R. 13537) to redesignate the Humboldt, Nevada, and Toiyabe National Forests, within the State of Nevada, as the Humboldt, Nevada, and Toiyabe Federal grazing reserves, to provide for their administration as such, and for other purposes; to the Committee on the Public Lands.

By Mr. BYRNS: A bill (H. R. 13538) interpreting the construction to be placed upon the words "child" and "children" as used in certain sections of the act approved May 18, 1920, June 10, 1922, and June 1, 1926; to the Committee on Military Affairs.

By Mr. CARLEY: A bill (H. R. 13539) repealing the adoption of project for improvement of waterway connecting Gravesend Bay with Jamaica Bay; to the Committee on Rivers and Harbors.

By Mr. PARKS: A bill (H. R. 13540) granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across the Ouachita River at a point between the mouth of Saline River and the Louisiana and Arkansas line; to the Committee on Interstate and Foreign Commerce.

By Mr. GILBERT: A bill (H. R. 13541) to provide for the establishment of the Fort Boonesboro National Monument in the State of Kentucky, and for other purposes; to the Committee on the Library.

By Mr. PEAVEY: Resolution (H. Res. 185) relative to the construction of a shipway from the Great Lakes to the Atlantic Ocean via the St. Lawrence River; to the Committee on Foreign Affairs.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURDICK: A bill (H. R. 13542) to authorize the payment of the sum of $2,500 to the dependents of the officers and men who lost their lives on the submarine *S–4;* to the Committee on Naval Affairs.

By Mr. CHASE: A bill (H. R. 13543) granting a pension to Emily Cooper Mather; to the Committee on Invalid Pensions.

By Mr. COOPER of Ohio: A bill (H. R. 13544) authorizing the President to appoint Edgar A. Gilbert to the position and rank of first lieutenant in the United States Army; to the Committee on Military Affairs.

By Mr. HERSEY: A bill (H. R. 13545) granting an increase of pension to Helen R. Godsoe; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 13546) for the relief of Joseph Bratten; to the Committee on Military Affairs.

By Mr. KNUTSON: A bill (H. R. 13547) granting a pension to Samuel H. Anderson; to the Committee on Pensions.

By Mr. KUNZ: A bill (H. R. 13548) for the relief of Harry A. Tedswell; to the Committee on Claims.

Also, a bill (H. R. 13549) granting an increase of pension to Stephen Murphy; to the Committee on Pensions.

By Mr. LEA: A bill (H. R. 13550) granting an increase of pension to Nancy Malchi; to the Committee on Invalid Pensions.

By Mr. MOORMAN: A bill (H. R. 13551) granting a pension to Myzella Rowe; to the Committee on Pensions.

By Mr. MORGAN: A bill (H. R. 13552) granting a pension to Alice J. Warrett; to the Committee on Invalid Pensions.

By Mr. SPEARING: A bill (H. R. 13553) for the relief of Mrs. Sol Lion; to the Committee on Claims.

By Mr. TINKHAM: A bill (H. R. 13554) for the relief of the Burtman Ornamental Iron & Wire Works; to the Committee on Claims.

Also, a bill (H. R. 13555) granting a pension to George Henry Heller; to the Committee on Pensions.

Also, a bill (H. R. 13556) for the relief of Stephen J. Crotty; to the Committee on Military Affairs.

Also, a bill (H. R. 13557) for the relief of Thomas J. Harrington; to the Committee on Naval Affairs.

By Mr. WATSON: A bill (H. R. 13558) granting an increase of pension to Mary W. Ryan; to the Committee on Invalid Pensions.

By Mr. WILLIAMS of Illinois: A bill (H. R. 13559) granting an increase of pension to Rachel Goble; to the Committee on Invalid Pensions.

By Mr. WOLVERTON: A bill (H. R. 13560) granting an increase of pension to Arabella Jefferson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13561) granting an increase of pension to Annie E. Toomey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13562) for the relief of Ella E. Horner; to the Committee on Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7412. By Mr. BEEDY: Petition of over 2,000 employees of the Portsmouth (N. H.) Navy Yard, urging the passage of the bill amending the civil service retirement act which provides $1,200 the maximum for retirement on 30 years' service; to the Committee on the Civil Service.

7413. By Mr. CARLEY: Petition of S. Goldsmith, secretary Cigarmakers International Union No. 87, against House bill 9195, amending sections 2804 and 3402, Revised Statutes; to the Committee on the Judiciary.

7414. By Mr. DOUGLASS of Massachusetts: Petition of 128 citizens of Massachusetts urging early and favorable enactment of the pending legislation to increase the pensions of veterans and widows of veterans of the Civil War from Mrs. William H. Moore, of 223 Trenton Street, East Boston, Mass., whose husband served with honor in the Civil War in the famous East Boston Regiment of General Barnes; to the Committee on Invalid Pensions.

7415. By Mr. ENGLEBRIGHT: Petition of Thelma Estes and other citizens of Day, Calif., protesting against House bill 78; to the Committee on the District of Columbia.

7416. By Mr. ROY G. FITZGERALD: Memorial of veterans of the World War, petitioning Congress in regard to the McKellar-Fitzgerald bill, known as the Postal Service bill; to the Committee on the Post Office and Post Roads.

7417. By Mr. FITZPATRICK: Petition from the Allied Printing Trades Council of Greater New York, favoring the passage of the Griest postal bill; to the Committee on the Post Office and Post Roads.

7418. Also, petition from the Bindery Women's Union, Local No. 43, International Brotherhood of Bookbinders of New York, and vicinity, favoring the passage of the Griest postal bill; to the Committee on the Post Office and Post Roads.

7419. By Mr. GREGORY: Petition of Ernest Lackey and other citizens of Paducah, Ky., protesting the passage of House bill 78, or any other compulsory Sunday legislation; to the Committee on the District of Columbia.

7420. Also, petition of Hibbert J. Cullars and other citizens of McCracken County, Ky., urging that immediate steps be taken to bring to a vote a Civil War pension bill for the relief of veterans and widows of veterans; to the Committee on Invalid Pensions.

7421. By Mr. MORROW: Petition of citizens of Texico, N. Mex., indorsing Civil War pension legislation; to the Committee on Invalid Pensions.

7422. Also, petition of citizens of Santa Fe, N. Mex., on Civil War pension legislation; to the Committee on Invalid Pensions.

7423. Also, petition of citizens of Roswell, N. Mex., against compulsory Sunday observance legislation; to the Committee on the District of Columbia.

7424. Also, petition of citizens of Roswell, N. Mex., on Civil War pension legislation; to the Committee on Invalid Pensions.

7425. Also, petition of citizens of Reserve, N. Mex., on Civil War pension legislation; to the Committee on Invalid Pensions.

7426. Also, petition of citizens of Roswell, N. Mex., on Civil War pension legislation; to the Committee on Invalid Pensions.

7427. Also, petition of citizens of Gallup, N. Mex., indorsing Civil War pension legislation; to the Committee on Invalid Pensions.

7428. By Mr. MICHENER: Petition of citizens of Jackson, Mich., asking for increase in pensions for Civil War veterans and widows of veterans; to the Committee on Invalid Pensions.

7429. Also, petitions of citizens of second district of Michigan, favoring passage of House bill 11; to the Committee on Interstate and Foreign Commerce.

7430. By Mr. O'CONNELL: Petition of William J. Hammer, late major, General Staff, United States Army; historian general, Military Order of the World War; and director, Society American Military Engineers, favoring the passage of the Tyson-Fitzgerald bill; to the Committee on World War Veterans' Legislation.

7431. By Mr. VINCENT of Michigan: Petition of residents of the eighth district of Michigan, urging more liberal pension legislation for the benefit of veterans of the Civil War and widows of veterans; to the Committee on Invalid Pensions.

7432. By Mr. WINTER: Resolutions from John Oliver, president Natrona County Poultry Association, Casper, Wyo., and Palmer Gormley, president Big Horn County Farm Bureau, Greybull, Wyo.; to the Committee on Irrigation and Reclamation.

# SENATE

## SATURDAY, *May 5, 1928*

*(Legislative day of Thursday, May 3, 1928)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

### MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed without amendment the bill (S. 3438) authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota.

The message also announced that the House insisted upon its amendment to the bill (S. 3555) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce, disagreed to by the Senate; agreed to the conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. HAUGEN, Mr. PURNELL, and Mr. ASWELL were appointed managers on the part of the House at the conference.

### ENROLLED BILL SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled bill (H. R. 8229) for the appointment of an additional circuit judge for the sixth judicial circuit, and it was signed by the Vice President.

### CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Fletcher | La Follette | Sackett |
| Barkley | Frazier | Locher | Schall |
| Bayard | George | McKellar | Sheppard |
| Bingham | Gerry | McLean | Shipstead |
| Black | Gillett | McMaster | Shortridge |
| Blaine | Glass | McNary | Simmons |
| Blease | Goff | Mayfield | Smoot |
| Borah | Gooding | Metcalf | Steiwer |
| Bratton | Gould | Moses | Stephens |
| Brookhart | Greene | Neely | Swanson |
| Broussard | Hale | Norbeck | Thomas |
| Bruce | Harrison | Norris | Tydings |
| Capper | Hawes | Overman | Tyson |
| Couzens | Hayden | Phipps | Vandenberg |
| Curtis | Howell | Pine | Walsh, Mass. |
| Cutting | Johnson | Pittman | Warren |
| Dale | Jones | Ransdell | Waterman |
| Deneen | Kendrick | Reed, Mo. | Wheeler |
| Dill | Keyes | Reed, Pa. | |
| Fess | King | Robinson, Ark. | |

Mr. FRAZIER. I desire to announce that my colleague the junior Senator from North Dakota [Mr. NYE] is detained from the Senate on account of illness in his family. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Seventy-eight Senators having answered to their names, a quorum is present.

### RAILROAD VALUATION

Mr. NORRIS. Mr. President, I desire to offer a Senate resolution. While I think there will be no opposition to the resolution when it is understood by the Senate, yet in talking with several Senators about it the wish has been expressed that it should go over under the rule. In order that there may be no embarrassment about it, I will ask that the resolution be read and then that it may go over under the rule.

The VICE PRESIDENT. The clerk will read the resolution.

The Chief Clerk read the resolution (S. Res. 222), as follows:

Whereas in May, 1923, the National Conference on Valuation of American Railroads was organized for the purpose of securing a fair

valuation of the railroads of the United States and for the purpose, in behalf of the public interest of the people of the United States, of appearing by counsel before the Interstate Commerce Commission and the courts, with a view of preventing an overvaulation of railroads. Said National Conference on Valuation was organized through the participation and cooperation of Senators, Representatives, governors of various States, mayors of some of the principal cities of the United States, several farm, agricultural, and labor organizations, traveling salesmen's associations, and national organizations of railway employees, and many similar organizations and individuals of national importance; and

Whereas by order of the Interstate Commerce Commission the National Conference on Valuation has been since 1923 a party to all valuation proceedings, has participated in said proceedings, has received notice of all hearings and copies of all the valuation reports, and has been recognized by the commission as a representative of substantial public interests and of a large percentage of travelers, shippers, and consumers dependent upon the railroads for transportation, and of organizations of employees engaged in such transportation, all of which persons have a vital and continuous interest in transportation rates which are and will be established by the commission on the basis of its valuation of the properties of the carriers; and

Whereas the National Conference on Valuation has selected Donald R. Richberg as its counsel, who, as representing said national conference, has advocated principles and methods of valuation which have been opposed by the railroads, but have been widely accepted by lawyers and economists of the highest standing, many of which principles and methods of valuation have been met with the approval of the commission; and

Whereas when the commission considered in public hearing the report upon which its order was based determining the value of the property of the St. Louis & O'Fallon Railway Co., the said Donald R. Richberg, as counsel for the National Conference on Valuation, was the only representative of a party to the proceedings who argued orally and by briefs in favor of the proposed report of the commission, while the official counsel for the commission made no argument for or against said report; and

Whereas suit has been brought by the St. Louis & O'Fallon Railway Co. to set aside the order of the Interstate Commerce Commission fixing the value of its property, which suit is generally accepted as a test case to determine the principles of railroad valuation for rate-making and recapture purposes and has already been heard by a three-judge statutory court, which refused to set aside the order of the commission, and which suit is to be heard on the appeal of the railroads which has been taken to the Supreme Court of the United States; and

Whereas under the circumstances set forth it would seem that the National Conference on Valuation, represented by the said Donald R. Richberg, having advocated the action taken by the commission in said case, should be heard on the appeal of the railroad to the courts to set aside the order of the commission; and it would seem to be in the public interest consistent with the intent of the law that the said national conference, through its counsel, the said Donald R. Richberg, should be heard as a matter of right, and provided in Thirty-eighth Statutes at Large, page 219, and Thirty-sixth Statutes at Large, page 539; and

Whereas the said Donald R. Richberg, as counsel for the National Conference on Valuation, was permitted to present an argument to the statutory three-judge court which heard the O'Fallon case, but the National Conference on Valuation not being permitted to intervene as a party to the proceedings, its counsel must make application to the Supreme Court for leave to be heard in the appeal now pending, which application, being addressed to the discretion of the court, involves primarily consideration of what is in the public interest; and

Whereas, depending upon the valuation principles and methods which may be determined by the O'Fallon case, the aggregate valuation placed on railroad properties may differ to the extent of many billions of dollars, with a consequent difference in the aggregate of transportation rates amounting to hundreds of millions of dollars, so that the O'Fallon case as a test case involved issues of wide and exceptional public interest and of immense consequence to all the people of the United States: Therefore be it

*Resolved*, That the Senate expresses its approval of the application of counsel for the National Conference on Valuation for leave to participate in the hearing of the O'Fallon case in the Supreme Court without thereby expressing its approval or disapproval of the arguments of counsel and without thereby intimating any opinion regarding the issues in the case; and be it further

*Resolved*, That the Senate hereby most respectfully requests the Supreme Court to permit the said Donald R. Richberg, as counsel for the said National Conference on Valuation, to intervene in said O'Fallon case for the purpose of making oral argument and filing a brief therein.

Mr. CURTIS. I understand the resolution is to go over under the rule.

The VICE PRESIDENT. The resolution will go over under the rule.

LXIX——495

COOPERATIVE MARKETING—REPORT OF FEDERAL TRADE COMMISSION

Mr. SHIPSTEAD. From the Committee on Printing I report an original resolution and ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. The resolution will be read.

The Chief Clerk read the resolution (S. Res. 223), as follows:

*Resolved*, That the report of the Federal Trade Commission on "Cooperative Marketing of Farm Products," transmitted to the Senate on May 2, 1928, in response to Senate Resolution 34, Sixty-ninth Congress, be printed with illustrations as a Senate document.

Mr. SMOOT. I will ask if the consideration of the resolution will lead to any debate and whether it is a unanimous report?

Mr. FLETCHER. I will say to the Senator from Utah that the resolution has been reported unanimously from the committee, and I do not think it will lead to any debate.

Mr. SMOOT. Very well.

The VICE PRESIDENT. The question is on agreeing to the resolution.

The resolution was agreed to.

OPERATION OF CHAIN STORE SYSTEM

Mr. BROOKHART. I offer a Senate resolution. I ask that it be read and go over, under the rule.

The resolution (S. Res. 224) was read, as follows:

Whereas it is estimated that from 1921 to 1927 the retail sales of all chain stores have increased from approximately 4 per cent to 16 per cent of all retail sales; and

Whereas there are estimated to be less than 4,000 chain-store systems with over 100,000 stores; and

Whereas many of these chains operate from 100 to several thousand stores; and

Whereas there have been numerous consolidations of chain stores throughout the history of the movement, and particularly in the last few years; and

Whereas these chain stores now control a substantial proportion of the distribution of certain commodities in certain cities, are rapidly increasing this proportion of control in these and other cities, and are beginning to extend this system of merchandising into country districts as well; and

Whereas the continuance of the growth of chain-store distribution and the consolidation of such chain stores may result in the development of monopolistic organizations in certain lines of retail distribution; and

Whereas many of these concerns though engaged in interstate commerce in buying, may not be engaged in interstate commerce in selling; and

Whereas in consequence, the extent to which such consolidations are now, or should be made, amenable to the jurisdiction of the Federal antitrust laws is a matter of serious concern to the public: Now, therefore, be it

*Resolved*, That the Federal Trade Commission is hereby directed to undertake an inquiry into the chain-store system of marketing and distribution as conducted by manufacturing, wholesaling, retailing, or other types of chain stores and to ascertain and report to the Senate, (1) the extent to which such consolidations have been effected in violation of the antitrust laws, if at all; (2) the extent to which consolidations or combinations of such organizations are susceptible to regulation under the Federal Trade Commission act or the antitrust laws, if at all; and (3) what legislation, if any, should be enacted for the purpose of regulating and controlling chain-store distribution.

And for the information of the Senate in connection with the aforesaid subdivisions (1), (2), and (3) of this resolution the commission is directed to inquire into and report in full to the Senate (a) the extent to which the chain-store movement has tended to create a monopoly or concentration of control in the distribution of any commodity either locally or nationally; (b) evidences indicating the existence of unfair methods of competition in commerce or of agreements, conspiracies, or combinations in restraint of trade involving chain-store distribution; (c) the advantages or disadvantages of chain-store distribution in comparison with those of other types of distribution as shown by prices, costs, profits, and margins, quality of goods and services rendered by chain stores and other distributors or resulting from integration, managerial efficiency, low overhead, or other similar causes; (d) how far the rapid increase in the chain-store system of distribution is based upon actual savings in costs of management and operation and how far upon quantity prices available only to chain-store distributors or any class of them; (e) whether or not such quantity prices constitute a violation of either the Federal Trade Commission act, the Clayton Act, or any other statute; and (f) what legislation, if any, should be enacted with reference to such quantity prices.

Mr. CURTIS. The resolution is to go over, under the rule.

The VICE PRESIDENT. The resolution goes over, under the rule.

FEDERAL TRADE COMMISSION REPORT ON SALE OF FLOUR AND BREAD

Mr. BRUCE. Mr. President, a day or two ago I obtained the consent of the Senate for the publication as a Senate document of the final report of the Federal Trade Commission made to the Senate on January 11, 1928, pursuant to Senate Resolution No. 163, which was agreed to on February 16, 1924, directing an inquiry into the Bakery Trust. Now, I am informed that special authority of the Senate is necessary in order to have the illustrations which accompany that report form a part of the publication which has been ordered. Therefore, if there be no objection, I ask unanimous consent that the illustrations may be printed.

Mr. SMOOT. Mr. President, will the Senator let that request go to the Committee on Printing?

Mr. BRUCE. Yes; I will do that, if necessary.

Mr. FLETCHER. I will say to the Senator that the matter has been before the Committee on Printing, and the committee did act on the matter for which unanimous consent was given to have printed the other day. However, there is a preliminary report, called part 1, which is a part of the same report. The committee knew nothing about that. I understand the Senator from Maryland now wants to add to the unanimous consent given the other day so as to have that preliminary report included in the permission granted.

Mr. SMOOT. Under the rule, I think it will be necessary to have the request go to the Committee on Printing.

Mr. FLETCHER. It has been before the committee, and I think the committee believe it ought to be done.

Mr. BRUCE. In addition to that, I desire special leave of the Senate to have incorporated the illustrations in the published report. That is the object of the request I have made: First, to obtain the consent of the Senate for the publication of the preliminary part of the report which was not covered by the action of the Senate a few days ago and then to obtain the consent of the Senate to the incorporation in the published report of the illustrations accompanying the report.

The VICE PRESIDENT. Is there objection to the modification of the unanimous consent so as to cover the printing of the preliminary report, together with the illustrations? The Chair hears none, and, without objection, it is so ordered.

TAX ON NARCOTIC DRUGS

The VICE PRESIDENT laid before the Senate a communication from Olin West, M. D., secretary and general manager American Medical Association, Chicago, Ill., which was ordered to lie on the table and to be printed in the RECORD, as follows:

AMERICAN MEDICAL ASSOCIATION,
*Chicago, May 3, 1928.*

The honorable the VICE PRESIDENT OF THE UNITED STATES,
*Washington, D. C.*

SIR: As secretary of the American Medical Association, in behalf of the more than 96,000 physicians who are its members, I protest against the proposed increase in the tax on physicians under the Harrison Narcotic Act, recommended by the Senate Committee on Finance in the proposed revenue act of 1928 (H. R. 1) as reported May 1, 1928.

The Congress, under the revenue act of 1926, reduced to a peacetime basis (from $3 to $1 a year) the war tax imposed on physicians under the Harrison Narcotic Act by the revenue act of 1918. The sudden proposal of a repudiation of the action of Congress taken at that time comes now without explanation and, so far as can be discovered, without justification or excuse. The increased taxation can not be justified on the basis of any supposed need of money wherewith to enforce the act, for the very purpose of the bill in which this increase is recommended is to reduce Federal revenues by approximately $200,000,000.

If the proposed increase in the tax on physicians is based on the hypothesis that the increase is necessary to sustain the constitutionality of the Harrison Narcotic Act, the hypothesis finds no support in the record of adjudicated cases, for the United States Supreme Court has twice held the act to be constitutional when the tax on physicians was only $1 a year (U. S. *v.* Jin Fuey Moy, 241 U. S. 394; U. S. *v.* Doremus, 249 U. S. 86). The recent decision of the court (Nigro *v.* U. S., 72 L. Ed. 426), in which it was held that the act was constitutional at a time when physicians were taxed $3 a year, did not and could not hold the act any more constitutional then than it was when the tax was $1 a year. Only a most strained and impossible interpretation of a dictum in the opinion in this case can be used as a basis for any demand for increasing even the tax as a whole imposed by the act, and certainly no part even of the dictum can be used as a basis for singling out physicians for increased taxation.

No doubt the Treasury Department has a right to initiate taxation, directly or by implication, without allowing taxpayers who are to bear the proposed burden to know what is in prospect for them. It is obviously within the right of the Senate or any of its committees to consider and to act on recommendations and implications of the Treasury Department without affording interested taxpayers opportunities to protest and to file briefs and arguments in support of such protests. The American Medical Association feels, however, that such secret courses should be pursued only in grave emergencies and it is unable to see any grave emergency that has justified the course of secrecy pursued in the present case. The more than 96,000 physicians who constitute the membership of the American Medical Association deeply resent the course that has been followed in this matter and protest most strongly against the imposition on the medical profession of this proposed tax burden, particularly at a time when the public has been made to believe that taxes were to be, not increased, but reduced.

The medical profession of the United States, as represented by this association, asks that the recommendation of the Senate Committee on Finance, whereby the tax on physicians will be increased under the Harrison Narcotic Act, be rejected.

Very respectfully yours,

OLIN WEST.

AMENDMENT OF WORLD WAR VETERANS' ACT

Mr. ASHURST presented resolutions adopted by Cactus Chapter, No. 2, Disabled American Veterans of the World War, of Tucson, Ariz., which were referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

TUCSON, ARIZ., *April 30, 1928.*

A resolution proposing that section 202, subdivision (3), paragraph 1 of the World War veterans' act, as amended, be hereby amended to read as follows:

"(3) If and while the disability is rated as total and permanent, the rate of compensation shall be $100 per month plus the allowances for dependents provided by subdivision (1) of this section."

Whereas disabled veterans of the World War throughout the United States have at different times forwarded resolutions to Members of Congress requesting that dependency compensation be payable to totally and permanently disabled veterans; and

Whereas need of this legislation is proved, inasmuch as it is practically impossible for any man, either able-bodied or disabled, to support a family on $100 per month. For instance, a properly furnished house or apartment of two or three small rooms rents for at least $50 per month and a grocery bill for a medium-sized family amounts to $40 per month. With this amount expended there is very little left for the really necessary expenses of life; and

Whereas the Disabled American Veterans of the World War are cognizant of the fact that our representatives in Congress wish the disabled ex-service men to be both well fed and well housed, and are aware that $100 per month is not sufficient compensation for a totally and permanently disabled veteran; and

Whereas in many instances it has become necessary for the wife of the disabled veteran to work daily in department stores and laundries in order to assist the family budget in order that the family may live in comfort; and

Whereas this proposed amendment will particularly affect the welfare and treatment of the 800 disabled compensable ex-service men now living in Tucson and vicinity under the Veterans' Bureau home-treatment status, and the attention of Congress is called to the fact that even should any of these 800 men desire hospitalization by the bureau in Tucson they could not be accommodated because the hospital now under construction by the United States Veterans' Bureau will only accommodate 261 patients, therefore these veterans, in order to obtain the maximum benefit from the dry, sunny climate of Tucson, must live and support their families on the maximum sum of $100 per month: Therefore be it

*Resolved*, That we, the members of Cactus Chapter, No. 2, Disabled American Veterans of the World War, in regular session assembled, do hereby request the Hon. HENRY F. ASHURST to present the facts of this matter to the United States Senate in order that section 202, World War veterans' act, 1924, as amended, be amended in subdivision (3), paragraph 1, as follows:

"(3) If and while the disability is rated as total and permanent, the rate of compensation shall be $100 per month plus the allowances for dependents provided by subdivision (1) of this section."

*Be it further resolved*, That Maj. Thomas Kirby, national legislative committeeman of the Disabled American Veterans of the World War, be given a copy of this resolution and requested to confer with Hon. HENRY F. ASHURST regarding this legislation.

JOSEPH THOMAS,
*Acting Commander.*
CHARLES L. EDGERTON,
*Adjutant.*
FRANCIS J. NILLES,
*Executive Committee.*
LA RUE GOODRICH,
*Executive Committee.*
JAMES C. HERRON,
*Executive Committee.*

INVESTIGATION BY FEDERAL TRADE COMMISSION OF BOULDER DAM LOBBY

Mr. ASHURST. Mr. President, on yesterday the able Senator from Nebraska [Mr. NORRIS] inserted into the CONGRESSIONAL RECORD copious extracts from newspapers regarding the investigation being conducted by the Federal Trade Commission into the activities of the Power Trust. I believe the Senator did a wise, proper thing, and it is now my duty to include into the RECORD a letter signed by Governor Hunt, of Arizona, and addressed to the Federal Trade Commission, demanding that an investigation also be made by the Federal Trade Commission of the lobby which here and elsewhere is attempting to promote the Boulder Canyon Dam bill. I ask that the Secretary read the governor's letter; and at this juncture I wish to make the following correction, viz: Among the witnesses whom the governor demanded be summoned and sworn to explain their diversified activities in behalf of this bill there was named the auditor and manager of the International News Service. That should read the Universal Service. I ask that the governor's letter be now read and that the list of witnesses whom the governor desires to have sworn and examined be printed in the RECORD.

Mr. SMOOT. Does the Senator desire the letter read?

Mr. ASHURST. Yes. It is not long; it can be read in about five minutes.

Mr. SMOOT. I do not want to take up any more time with extraneous matters than is necessary.

Mr. ASHURST. Will the Senator grant his consent?

Mr. SMOOT. If it will not take more than five minutes, but if it does I want to go on with the revenue bill.

Mr. ASHURST. I ask the clerk to read very rapidly.

The VICE PRESIDENT. The clerk will read, as requested.

The Chief Clerk read as follows:

MAY 1, 1928.

*To the Federal Trade Commission, Washington, D. C.*

GENTLEMEN: You are now engaged in making an investigation of the electrical power industry of the United States. One of the duties with which you are charged by the resolution adopted by the Senate is to investigate the activities of the so-called hydroelectric power lobby.

I am not concerned officially with the question of whether it is improper for American citizens to exercise the right of "petition" which is guaranteed to them by the Constitution of the United States. That is a matter for Congress to decide. However, many irresponsible and fantastic statements and charges concerning the alleged activities of the so-called power lobby are published daily by certain newspapers.

Charges have been made upon the floor of Congress by proponents of the Swing-Johnson bill, and these newspaper articles have been inserted into the CONGRESSIONAL RECORD by proponents of the legislation, who are seeking to secure the passage of the Swing-Johnson bill or what is known as the Boulder Canyon Dam bill. The fact that no evidence has ever been adduced to substantiate many of the innuendos and charges does not appear to hinder or restrain those who are supporting the legislation from repeating such insinuations.

It is with these latter activities that I am concerned as the Governor of the State of Arizona. Many of these newspaper articles, by inference and innuendo, charge that the State of Arizona in opposing the Swing-Johnson bill is acting in collusion with and under the influence of the representatives of private power companies. These allegations I challenge, denounce, and deny.

I am, of course, familiar in a general way with the "evidence" which has been offered to sustain the charges with reference to the alleged activities of the power companies.

I am also familiar, in a general way, with some of the propaganda broadcast by those who are advocating this Boulder Dam legislation, and it is my belief that for every dollar the opponents of Boulder Canyon legislation have spent in opposing it, that those supporting the legislation have spent $5.

I charge that there is a conspiracy to rob the State of Arizona of valuable resources, to make them available to power companies in the State of California, and that enormous sums of money have been and are being expended to employ lobbyists, lawyers, engineers, and newspaper men, and to pay for propaganda; that methods—both legitimate and questionable—have been employed to influence public opinion and to influence Members of Congress in favor of the Boulder Dam legislation and to threaten, intimidate, harrass, and browbeat Members of Congress into supporting the Boulder Dam legislation. It could also probably be established that attempts have been made to influence the policy of candidates for the office of President of the United States.

I respectfully submit that these charges are susceptible of verification.

In view of the foregoing and in view of the further fact that while you are conducting your investigation the Boulder Dam legislation is now being discussed in Congress. I therefore respectfully request that you do not confine your investigation solely to the activities of those whose are opposing the Boulder Canyon legislation but that you also investigate the activities of the lobby which is supporting the Boulder Dam legislation, so that, in fairness to the State of Arizona and the other States interested, such States shall not be irreparably injured by legislation which Congress may pass as a result of false and misleading information.

I respectfully request that you at once summon to appear before you, with all their books, papers, accounts, and records which in any way pertain to the legislation proposed in the Swing-Johnson and Phipps Boulder Dam bills, relating to the development of the Colorado River, all persons who possess evidence concerning the activities of those who are supporting said legislation. I append to this letter a list of persons whom I suggest that you summon to testify in this matter.

Very respectfully yours,

GEO. W. P. HUNT,
*Governor of Arizona.*

The VICE PRESIDENT. Without objection, the list of witnesses referred to by the Senator from Arizona will be printed in the RECORD.

The list of witnesses is as follows:

List of witnesses which Gov. George W. P. Hunt, of Arizona, suggests that the Federal Trade Commission summon to appear to give testimony concerning lobbying activities on the Boulder Canyon Dam bills:

The members of the board of public service commissioners of the city of Los Angeles, Calif.

The officers of the bureau of light, power, and water of Los Angeles, Calif.

Officials of the Imperial Valley Irrigation District, of Imperial Valley, Calif.

Officials of the Boulder Canyon Dam Association.

Officers of the Motion-Picture Producers' Association.

Mayor and auditor of the city of San Diego, Calif.

Former Mayor John L. Bacon, president of the Boulder Canyon Dam Association, San Diego, Calif.

Officers of the Coachella Valley Irrigation District, Coachella Valley, Calif.

Officers of the Colorado River Land Co., California.

Editor and auditor of the Los Angeles Record, Los Angeles, Calif.

Editor and auditor of the Los Angeles Examiner, Los Angeles, Calif.

Editor and auditor of the Los Angeles Times, Los Angeles, Calif.

Editor and auditor of the Los Angeles Express, Los Angeles, Calif.

Officers of the League of Southern California Municipalities, California.

Officers of the Los Angeles Chamber of Commerce, Los Angeles, Calif.

Mr. R. B. Peters, of the Southern California Farm Bureau.

Manager and auditor of the Chandler Mexican land interests.

Editor and auditor of the Los Angeles Herald, Los Angeles, Calif.

Editor and auditor of the New Republic, New York City.

The members of the boards of supervisors of the counties of Los Angeles, Orange, Imperial, Riverside, Santa Anna, and San Bernardino, also San Diego, Calif.

The mayors of Riverside, Calif., from 1922 to date, particularly Mr. S. C. Evans, executive director of the Boulder Canyon Dam Association.

William Randolph Hearst and the editors and auditors of his newspapers and publications.

The auditor and manager of the Universal Service and the auditors and managers of the motion-picture companies in which William Randolph Hearst is financially interested.

Mr. Roy Howard and the editors and auditors of the newspapers associated with the Scripps-Howard chain of papers.

The managers of the Newspaper Enterprise Association, and also of the Scripps-Howard alliance.

Mr. W. A. Bonfils, owner of the Denver Post, and Mr. Hayes, one of its feature writers, Denver, Colo.

Producers of the moving picture, "The Winning of Barbara Worth."

Producers of the moving picture which was filmed in the Colorado River December, 1927.

Mr. L. Ward Bannister, attorney at law, Denver, Colo.

Mr. James G. Schrugham, Reno, Nev.

Mr. Arthur P. Davis, Oakland, Calif.

Mr. Charles P. Squires, Los Vegas, Nev.

Mr. William Mulholland, Los Angeles, Calif.

Mr. E. F. Scattergood, Los Angeles, Calif.

Mr. Burdette Moody, Los Angeles, Calif.

Prof. William F. Durant, Berkeley, Calif.

Mr. Ralph L. Criswell, Los Angeles, Calif.

Mr. William J. Carr, Pasadena, Calif.

Mr. Ralph H. Swing, San Bernardino, Calif.

Mr. Louis C. Hill, civil engineer, Los Angeles, Calif.

Mr. J. B. Lippincott, civil engineer, Los Angeles, Calif.

Mr. Lucius K. Chase, attorney at law, Los Angeles, Calif.

Mr. F. H. McIver, Imperial Valley, Calif.

Mr. Walter B. Clawson, of the Associated Press, Los Angeles, Calif.

Mr. R. D. McPherian, Imperial Valley, Calif.

Mr. Joseph Timmons, feature writer, Hearst newspapers, Los Angeles, Calif.

Mr. John T. Lambert, feature writer, Hearst newspapers, Washington, D. C.
Mr. Judson King, Washington, D. C.
Mr. Gifford Pinchot, Washington, D. C.
Dr. S. S. M. Jennings, Coachella, Calif.
Mr. Thomas C. Yeager, Coachella, Calif.
Mr. W. B. Matthews, attorney for the Los Angeles Bureau of Power and Light, Los Angeles, Calif.
Mr. F. W. Greer, publicity director.
Mr. Nelson M. Shipp, Cordele, Ga.
Mr. J. C. Allison, operator of Mexican lands.
Congressman PHIL D. SWING, Imperial Valley, Calif.
Mr. Harry Chandler, owner of Mexican land and of the Los Angeles Times, Los Angeles, Calif.
Mr. Enterman, Imperial Valley, Calif.
Mr. Earl Pound, El Centro, Calif.
Mr. Mark Rose, El Centro, Calif.

REPORTS OF COMMITTEES

Mr. DALE, from the Committee on Commerce, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 11692) authorizing the Gulf Coast Properties (Inc.), a Florida corporation, of Jacksonville, Duval County, Fla., its successors and assigns, to construct, maintain, and operate a bridge across the Lake Champlain at or near East Alburg, Vt. (Rept. No. 1006);

A bill (H. R. 11797) granting the consent of Congress to Columbus County, State of North Carolina, to construct, maintain, and operate a free highway bridge across the Waccamaw River at or near Reeves Ferry, Columbus County, N. C. (Rept. No. 1007); and

A bill (H. R. 11992) granting the consent of Congress to the Arkansas Highway Commission to construct, maintain, and operate a free highway bridge across the Current River at or near Biggers, Ark. (Rept. No. 1008).

Mr. DALE, also from the Committee on Commerce, to which was referred the bill (H. R. 11338) authorizing the Kansas City Southern Railway Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Randolph, Mo., reported it with an amendment and submitted a report (No. 1009) thereon.

He also, from the same committee, to which was referred the bill (S. 4203) authorizing J. H. Haley, his successors and assigns (or his heirs, legal representatives, and assigns), to construct, maintain, and operate a bridge across the Missouri River at or near a point where Olive Street Road, St. Louis County, Mo., if extended west would intersect the Missouri River, reported it with amendments and submitted a report (No. 1010) thereon.

Mr. FLETCHER, from the Committee on Military Affairs, to which was referred the bill (H. R. 4652) for the relief of Charlie R. Pate, reported it without amendment and submitted a report (No. 1011) thereon.

He also, from the same committee, to which was referred the bill (S. 3812) for the appointment of William Edward Tidwell as a first lieutenant in the United States Army, reported adversely thereon and moved that the bill be indefinitely postponed, which was agreed to.

Mr. TYSON, from the Committee on Military Affairs, to which was referred the bill (H. R. 4664) for the relief of Capt. George R. Armstrong, United States Army, retired, reported it with amendments and submitted a report (No. 1012) thereon.

He also, from the same committee, to which was referred the bill (S. 1933) granting an honorable discharge from the military service to Charles Morton Wilson, reported adversely thereon and moved that the bill be indefinitely postponed, which was agreed to.

Mr. CAPPER, from the Committee on the District of Columbia, to which was referred the bill (S. 3827) to exempt employees of the public-school system of the District of Columbia from the $2,000 salary limitation provision of the legislative, executive, and judicial appropriation act approved May 10, 1916, as amended, reported it without amendment and submitted a report (No. 1013) thereon.

DELAWARE RIVER BRIDGE

Mr. DALE. From the Committee on Commerce I report back favorably with an amendment Senate bill 1857, and I submit a report (No. 1004) thereon. I call the attention of the Senator from Delaware [Mr. BAYARD] to the bill.

Mr. BAYARD. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. The Senator from Delaware asks unanimous consent for the present consideration of a bill the title of which will be stated by the Secretary.

The LEGISLATIVE CLERK. A bill (S. 1857) granting the consent of Congress to the Delaware & New Jersey Bridge Corporation, a corporation of the State of Delaware, domiciled at Wilmington, Del., its successors and assigns, to construct, maintain, and operate a bridge across the Delaware River.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment was to strike out all after the enacting clause and in lieu thereof to insert:

That in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes, the Delaware & New Jersey Bridge Corporation, a corporation of the State of Delaware, domiciled at Wilmington, Del., its successors and assigns, George A. Casey, of Wilmington, Del.; Clifford R. Powell, of Mount Holly, N. J.; and Anthony J. Siracusa, of Atlantic City, N. J.; their heirs, executors, administrators, or assigns, be, and are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Delaware River at a point suitable to the interests of navigation, at or near Wilmington, Del., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the condition and limitations contained in this act.

SEC. 2. There is hereby conferred upon the Delaware & New Jersey Bridge Corporation, its successors and assigns, George A. Casey, of Wilmington, Del.; Clifford R. Powell, of Mount Holly, N. J.; and Anthony J. Siracusa, of Atlantic City, N. J., their heirs, executors, administrators, or assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, contruction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said Delaware & New Jersey Bridge Corporation, its successors and assigns, George A. Casey, of Wilmington, Del.; Clifford R. Powell, of Mount Holly, N. J.; and Anthony J. Siracusa, of Atlantic City, N. J.; their heirs, executors, administrators, or assigns, are hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of Delaware, the State of New Jersey, any public agency or political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 30 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion cost, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall at any time be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 30 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same and of

the daily tolls collected, shall be kept and shall be available for the information of all persons interested.

SEC. 6. The Delaware & New Jersey Bridge Corporation, its successors and assigns, George A. Casey, of Wilmington, Del.; Clifford R. Powell, of Mount Holly, N. J.; and Anthony J. Siracusa, of Atlantic City, N. J., their heirs executors, administrators, or assigns, shall within 90 days after the completion of such bridge file with the Secretary of War and with the highway departments of the States of Delaware and New Jersey, a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States shall, at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said Delaware & New Jersey Bridge Corporation, its successors and assigns, George A. Casey, of Wilmington, Del.; Clifford R. Powell, of Mount Holly, N. J.; and Anthony J. Siracusa, of Atlantic City, N. J., their heirs, executors, administrators, or assigns, shall make available all of its records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to the Delaware & New Jersey Bridge Corporation, its successors and assigns, George A. Casey, of Wilmington, Del.; Clifford R. Powell, of Mount Holly, N. J.; and Anthony J. Siracusa, of Atlantic City, N. J., their heirs, executors, administrators, or assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill authorizing the Delaware & New Jersey Bridge Corporation, a corporation of the State of Delaware, domiciled at Wilmington, Del., its successors and assigns, George A. Casey, of Wilmington, Del.; Clifford R. Powell, of Mount Holly, N. J.; and Anthony J. Siracusa, of Atlantic City, N. J., their heirs, executors, administrators, or assigns, to construct, maintain, and operate a bridge across the Delaware River at or near Wilmington, Del."

### ERECTION OF FLAGSTAFF AT FORT SUMTER, S. C.

Mr. TYSON. From the Committee on Military Affairs I report back favorably, without amendment, House Joint Resolution 177, authorizing the erection of a flagstaff at Fort Sumter, Charleston, S. C., and for other purposes, and I submit a report (No. 1005) thereon.

Mr. BLEASE. Mr. President, that is a local matter, and is approved by the Secretary of War. It does not call for any appropriation. I ask for its immediate consideration.

The VICE PRESIDENT. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

*Resolved, etc.*, That the Secretary of War is authorized and directed to select a suitable site and to permit the executors of the estate of Eliza Mackintosh Clinch Anderson Lawton to erect on public grounds of the United States at Fort Sumter, Charleston, S. C., a flagstaff, with appropriate landscape and architectural setting, and to place in connection therewith a memorial commemorating the defense of the fort by Gen. Robert Anderson. The design and materials of the flagstaff and memorial shall be subject to the approval of the Secretary of War, with the advice of the Commission of Fine Arts. The United States shall be put to no expense in or by the erection of such flagstaff and memorial. Upon completion thereof the Secretary of War is authorized and directed to accept, on behalf of the United States, the flagstaff and memorial, in lieu of the legacy in the will of Eliza Mackintosh Clinch Anderson Lawton, providing for the erection of a statue of Gen. Robert Anderson at Fort Sumter.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. REED of Pennsylvania:

A bill (S. 4355) to amend section 14 of the national defense act; to the Committee on Military Affairs.

By Mr. SHORTRIDGE:

A bill (S. 4356) for the relief of Howard P. Cornick; to the Committee on Military Affairs.

By Mr. BROOKHART:

A bill (S. 4357) authorizing Henry Horsey, Winfield Scott, A. L. Ballegoin, and Frank Schee, their heirs, legal representatives, and assigns, to construct and operate a bridge across the Des Moines River at or near Croton, Iowa; to the Committee on Commerce.

By Mr. GILLETT:

A bill (S. 4358) for the relief of Minnie A. Travers; to the Committee on Claims.

By Mr. WHEELER:

A bill (S. 4359) granting a pension to James Stuart; to the Committee on Pensions.

By Mr. THOMAS:

A bill (S. 4360) granting an increase of pension to Marguerite W. Huston (with accompanying papers); to the Committee on Pensions.

By Mr. HALE:

A bill (S. 4361) granting an increase of pension to Octavia R. Bickmore (with accompanying papers); to the Committee on Pensions.

By Mr. BRUCE:

A bill (S. 4362) to amend section 641 of the act approved May 19, 1924, entitled "World War veterans' relief," providing for the payment of a certificate upon certain conditions; to the Committee on Finance.

By Mr. JOHNSON:

A bill (S. 4363) for the relief of Elmer E. C. Armstrong; and

A bill (S. 4364) providing for the advancement of Michael Holub on the retired list of the Army; to the Committee on Military Affairs.

By Mr. DALE:

A bill (S. 4365) granting an incerase of pension to Harriet M. Gridley (with accompanying papers); to the Committee on Pensions.

By Mr. FLETCHER:

A bill (S. 4366) for the relief of James H. Roache; to the Committee on Public Lands and Surveys.

By Mr. SHIPSTEAD:

A bill (S. 4367) for the relief of Joseph Lee; to the Committee on Military Affairs.

A bill (S. 4368) to authorize reinstatement of war-risk insurance of Sophus B. Enger, deceased; to the Committee on Finance.

### AMENDMENTS TO TAX REDUCTION BILL

Mr. SHIPSTEAD and Mr. REED of Pennsylvania each submitted an amendment intended to be proposed by them to House bill 1, the tax reduction bill, which were separately ordered to lie on the table and to be printed.

### SENATOR FROM PENNSYLVANIA—EXPENSES OF CONTEST

Mr. SHORTRIDGE submitted the following resolution (S. Res. 225), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

*Resolved*, That the Committee on Privileges and Elections, authorized by resolution of December 17, 1927, to hear and determine the pending contest between WILLIAM S. VARE and William B. Wilson involving the right to membership in the United States Senate as a Senator from the State of Pennsylvania, hereby is authorized to expend from the contingent fund of the Senate $25,000 in addition to the amount heretofore authorized for such purpose.

### MEMBERS OF SAME FAMILY IN GOVERNMENT SERVICE

Mr. BLEASE. I offer a resolution, which I ask to have read and go over, under the rule.

The VICE PRESIDENT. The resolution will be read.

The resolution (S. Res. 226) was read, as follows:

*Resolved*, That the heads and chiefs of any and all the various departments, bureaus, commissions, and other establishments of the United States Government be, and the same are hereby, directed and required to forward, on or before the 3d day of December, 1928, a report to the Senate, setting forth with particularity the names and addresses of any and all husbands, wives, and other members of the same immediate

family employed in the Government service, together with the place of such employment, the salary received by each therefrom, the date of appointment to the said service, and by whom made.

*Resolved further,* That any person or persons failing or refusing to make the said report as hereinabove directed, or making a false statement in reference to any item or items thereof, shall forthwith be adjudged in contempt of the Senate, and shall suffer therefor such penalty or penalties as may be prescribed.

The VICE PRESIDENT. The resolution will go over, under the rule.

ENFORCEMENT OF PROHIBITION

Mr. BRUCE. Mr. President, I should like to have inserted in the RECORD an editorial from the St. Louis Post-Dispatch of May 2, 1928, headed "Submit the issue of Federal prohibition to the people."

This paper, as we all know, is one of the great organs of personal liberty in the United States; and I have not for some time seen a more effective attack than this editorial is upon that system of organized fanaticism and organized hypocrisy known as the national prohibition system.

The VICE PRESIDENT. Without objection, the editorial will be printed in the RECORD.

The matter referred to is here printed, as follows:

SUBMIT THE ISSUE OF FEDERAL PROHIBITION TO THE PEOPLE

The only sound and satisfactory solution of the Federal prohibition problem is the repeal of the eighteenth amendment. Every other proposal, touching the modification of the Volstead Act or the nullification of the amendment by repeal of all enforcing legislation is a makeshift. It would only postpone the final settlement of the question.

Put the question to the people.

The issue of Federal prohibition can not be taken out of politics until it is finally and conclusively settled by the complete abandonment of Federal prohibition. So long as the eighteenth amendment remains in the Constitution the issue will persist. It will be a red herring across the trail of all other national issues, diverting the public mind from them.

Federal prohibition is a paramount issue throughout the country. There is a reason for its predominance. It has had more effect on politics and on government, on legislation, and on public sentiment than any issue in American history since the slavery question and secession.

The eighteenth amendment changed the character and spirit of the Constitution. It changed the scope and power of the Federal Government. It broke down the constitutional restrictions on Federal powers and functions. It authorized the Federal Government to violate the rights of the States and usurp their police powers guaranteed by the Constitution. It authorized the Federal Government to destroy the inherent constitutional rights of the individual. It was a deadly assault upon the individual liberty of the citizen. It impaired local self-government.

Federal prohibition has never been submitted to the American people as a clear-cut issue.

It was adopted without consulting the people as a whole. It was adopted during the war, on the pretense of being a war measure, while millions of voters were disfranchised by absence abroad or by war activities. It was adopted by indirect political methods. The Anti-Saloon League, under cover, with a huge campaign fund, took advantage of the war to elect legislators, national and State, favorable or actually pledged to the support of the Federal prohibition program.

The Anti-Saloon League program for Federal prohibition was carried through, we believe, against the convictions of a majority of the people; against the convictions of a majority of the Congress which submitted it, and of many of the State legislatures which ratified it.

The Volstead Act, enforcing Federal prohibition, which violated fundamental American principles and guarantees embodied in the Constitution, was adopted not through the convictions of Members of Congress and their free, conscientious approval of it, but through compulsion of threats and fear of defeat by a powerful political organization.

These are the fundamental reasons for the submission to the people of a clear issue of repeal. But there are other convincing reasons, based upon the experience of the Nation with Federal prohibition. The effects of Federal prohibition have not justified the avowed purposes and the predictions of those who organized and managed the prohibition campaign, nor the expectations of those who with honest motives were misled into supporting it.

Instead of destroying the saloon it has increased the number of saloons and drinking places, in cities at least, and of stills and brewing plants in country districts.

Instead of promoting temperance, it has increased intemperance and its consequent disorders.

Instead of protecting the young from the evils of intemperance, it has induced many to drink to excess.

Instead of stopping the manufacture and sale of intoxicating beverages, it has encouraged the illicit manufacture and sale. Bootleggers have multiplied.

Instead of checking crime and emptying the jails, it has increased crime and lawlessness and filled the jails to overflowing. It has caused lawlessness and widespread corruption among public officials. It has put a huge corruption fund in the hands of the underworld.

These conditions of increasing intemperance, lawlessness, and corruption have convinced many individuals and organizations who supported Federal prohibition as the solution of the problem of intemperance and as a great moral advance that the experiment is a failure. There is increasing evidence of a reaction against Federal prohibition among the people.

The only practical way in which to get a fair plebiscite is through action by the leading political parties.

Two forces, under strong leadership, are working within the Republican Party.

Senator BORAH insists that the Republican Party shall adopt an unequivocal plank in its platform, declaring for Federal prohibition and the rigid enforcement of prohibition laws.

President Nicholas Murray Butler, of Columbia University, New York, a Republican leader, declares himself emphatically in favor of repeal, and insists that the political parties should take a decisive stand on this issue.

There is nothing in the avowed principles of the Republican Party which would prevent it from deciding either way, on the ground of general public welfare or of expediency. It inclines to paternalism and centralization of power in the Federal Government, but a large element of Republicans favors repeal of the eighteenth amendment.

On the other hand, the Democratic Party, by avowed principle and tradition, is the logical guardian of the original Constitution. It was founded on the fundamental principle of the constitutional restriction of Federal powers and functions. It avows the Jeffersonian principles of the preservation of the rights and powers of the State, and the guarantees of individual rights and liberties. It is the avowed defender of the principle of local self-government. It is the avowed opponent of Federal usurpation.

The Democratic Party is divided on the issue of Federal prohibition. There are leaders on both sides of the question, but the opposition to Federal prohibition within the Democratic Party is very strong in both leadership and numbers. Its two leading presidential candidates, Governor Smith, of New York, and Senator REED of Missouri, are against Federal prohibition on principle.

We believe the balance of strength, in leadership and in the rank and file of both parties combined, is against Federal prohibition.

If the Democratic Party were true and faithful to its principles and traditions, it would adopt a platform unequivocally favoring the repeal of the eighteenth amendment, and nominate a candidate in accord with this platform.

In our insistence on the submission to the people of a clear issue of the repeal of the eighteenth amendment there is not a shadow of intention to advocate a reestablishment of the old licensed saloons. That problem can be met when the vital problem of Federal prohibition is settled.

The besetting sins of political parties, political leaders, and public officials in this country are cowardice and hypocrisy. They are deadly sins. Cowardly evasion is blighting both political and governmental action.

It is high time that cowardice, hypocrisy, and evasion should be abandoned in dealing with Federal prohibition, which so seriously affects our Government and the social and political life of the people.

The Post-Dispatch appeals to political leaders and to the people to put an end to political evasion on the question of Federal prohibition. We demand that the political parties and every candidate for an office which is concerned with Federal prohibition shall make a clear declaration on this question.

The issue of repeal of the eighteenth amendment should be submitted to the voters in the presidential campaign.

POSTAL RATES

Mr. KING. Mr. President, a few days ago the so-called postal rates bill was under consideration by the Senate. During the discussion there was some controversy as to whether accurate information had been obtained in regard to the deficits in the Post Office Department and, if so, the principal causes of such deficits. It was contended by some Senators that there was a deficit for the past year of $75,000,000, and it was claimed that this large deficit resulted from carrying second-class mail at lower rates than those which should prevail. The discussion revealed that there was no unanimity of opinion upon the part of those on the Post Office Committee either as to the amount of the deficit or the causes of the same.

During the debate I asked the Senator from New Hampshire [Mr. MOSES] a question, substantially as follows:

Why have not facts been presented that will enable the Congress to determine whether the Post Office Department's figures are correct or not?

While I put the question in an interrogative form, I did not mean to imply a disbelief in the accuracy of the figures submitted by the Post Office Department. However, the question which I propounded has led some of my friends to believe that I took the side of those who were insisting that the deficit was very much less than shown by the Post Office Department.

I am taking this occasion to very briefly state that at the time of the discussion I was of the opinion that the position of the Post Office Department was right and that the deficit was such as was indicated by the officials in that department. I have made some inquiry since then and am more convinced than I was then of the accuracy of the figures submitted by the postal authorities. It occurred to me during the debate that there ought not to be any dubiety on the question of receipts and disbursements of the Post Office Department, and that there ought to be no uncertainty as to whether the department was losing money; and if so, the annual deficits. It did seem to me that a system of bookkeeping and accounting should have been adopted in that great department that would accurately reflect its business, its losses, and its gains. It is true that persons have represented to me that the Post Office Department's accounting system was archaic, and that it was difficult, if not impossible, to determine with any degree of certainty the sources of revenue and the losses sustained in its operation. It has been stated that the accounting system did not provide full and accurate information with respect to the gains or losses resulting from any particular class of mail carried by the Post Office Department.

Notwithstanding these contentions, I have been inclined to accept the statements of the department and regard their findings as to their deficits as being substantially correct. I have made some inquiry since the discussion referred to and have learned that the department employed one of the leading accounting firms of the United States to examine the books of the department with a view to determining whether the report submitted by the Post Office Department with respect to the losses referred to was accurate or inaccurate. The firm referred to submitted a report, as I am advised, supporting the figures of the Post Office Department. My information is that when the postal rate bill was under consideration in 1925 a committee representing the users of second-class mail suggested an investigation of the figures submitted by the Postmaster General in order that such figures might be tested and the accuracy of the same determined. It was the report submitted by the firm of certified accountants to which I have just referred that supported the report of the Post Office Department. When the report of the certified accountants was made my information is that the matter was referred to the firm of Price Waterhouse. This firm deservedly enjoys a high reputation as certified public accountants, and, as I am advised, its conclusions were in accord with the report of the firm of certified public accountants employed by the department in 1925.

My information is, Mr. President, that there is a deficit as reported by the Post Office Department of substantially $75,000,000. I think this should be accepted as the basis for any legislation that may be enacted. There is no reason why the rates should not be so changed and modified as to prevent any further deficits in the operation of the Post Office Department. It should be self-supporting and those who use the mails should be willing to pay for such use, and no group or class of citizens should seek or obtain any favors not granted to all others, or seek to have established discriminatory rates which will enable them to pass on to those who use the mails the losses resulting from the special advantages or privileges which they seek.

ABOLITION OF WAR

Mr. FRAZIER. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the San Francisco Call and Post of April 27, 1928, with regard to a recent speech made by the noted writer, Mrs. Kathleen Norris, in opposition to war.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Without objection, the article will be printed in the RECORD.

The matter referred to is here printed, as follows:

BAN WAR, MRS. NORRIS'S PLEA TO SAN FRANCISCO MOTHERS

"If we women made up our minds to organize and fight, we could stop war forever."

That was the statement by Kathleen Norris, famous novelist, which was being discussed to-day by the wealthy and fashionable women of the Mill Valley Outdoor Art Club. A "standing room only" audience had heard Mrs. Norris hurl javelin after javelin at Mars in her address before the club yesterday.

"In Paris," said the novelist, "there are signs on every lamp-post saying, 'Women of France, for every child you are giving to France the women of Germany are giving seven!'

"But the women of France are wise. They will no longer rear children to be cannon food. And I don't blame them!

"We mothers rear perfect children to make perfect fodder for the guns," cried Mrs. Norris.

"We get spinach and force the children to eat it whether they like it or not so they will grow up strong and healthy, fit to be butchered in Europe.

FED FOR SLAUGHTER

"Carrots, spinach, certified milk, all the things we are told so often that we must make our sons eat—we faithfully get them and faithfully feed the poor little kids these things so that their bodies and souls and lives can be fed to the slaughterhouses of war later.

"Is it fair," demanded Mrs. Norris, "that the woman who takes the best care of her son is the one that is forced to lose him in some war that he had nothing to do with starting?

"Let a woman neglect her son and fail to get for him that certified cream which we careful mothers pour so carefully on his mush—then that woman's son is carefully preserved for her, and he is saved in time of war.

GIVEN UP TO WAR

"But we who take care of our sons must give them up in time of war."

Mrs. Norris insisted that women could do something now that would stop war.

"The next generation will be fooled by the same brass bands and appeals to patriotism," she said. "The time to organize against war is now!"

"We women don't have to be afraid we can't get anything we want," the famous writer declared. "Three or four times the women of America have risen up, and each time they've got just what they wanted. They can do it again, and stop the murder of their sons."

NOBODY TO BLAME

"The war is over," Mrs. Norris continued. "Nobody was responsible. Nobody was to blame. No individual decided upon it. It was all a terrible blunder. That's what they tell us, and now they say, 'Let's forget it and turn our attention to Lindy and automobiles.'

"But just the same, if a few—a very few—American women—perhaps some of the women in this audience—made up their minds that it should not be forgotten—

"'That our dead,' in Lincoln's matchless phrase, 'should not have died in vain'—

"That time has come for action and not passive acquiescence—

"Then we should have no more wars. One hundred years of peace would show the world what war really is.

"After that it would be as easy to make America go back to slavery or England to go back to religious persecutions as ever to try war again.

"We could do this—we women of America—through the Federated Clubs, the parent-teacher organizations, the Red Cross and the 'Y,' the Girl Scouts and the Campfire Girls, and all the magnificent groups that exist in all the churches.

"We can do it if we wish to. The only question is, Will we do it?"

"Propaganda in time of war," the famous woman writer insisted, "is largely lies. We war-hating women have to be assured over and over that this is a philanthropic war to end all wars. They said that to the women in the old Greek and Persian wars, too.

"'A war to end war!' How fatuously, how simply, we repeated this and believed this 10 years ago!

"Frenzied, mud-caked, half-frozen, hungry, desolately puzzled, and lonely boys scrambling through blood-soaked barbed-wire entanglements, plunging their bayonets into the soft bodies of other boys—to 'end war.'

"One could begin to laugh and cry and scream and go mad at the mere memory of it all."

SOUNDS WARNING

Mrs. Norris warned her hearers not to be impressed unduly by the arguments of men in favor of war. She said:

"Many of the men who hold forth on the subject of international relationships haven't the slightest idea what they are talking about. Face them with one or two shrewd questions and they crumple into sulky generalities.

"Men's favorite generality is, of course, that women have no business to talk war. They say it sounds silly, coming from women. What do women know about war, anyway?

"Well, gentlemen, our humble hope is that some one of these days women are going to know something about war—and for your sakes."

Mrs. Norris insisted that "if ever a general statement is 100 per cent true it is true to say that American women hate wars.

"Established in the center of our astounding sophistication, furred, rouged, powdered, perfumed, always well fed and silken clad, protected a thousand times by walls and streets and pavements, mails and police and radio and telegraph and press, laws and lights and bells, Army and Navy, our women go about with a jungle fear devouring their hearts—the fear of war."

THE WORLD COURT

Mr. ROBINSON of Arkansas. Mr. President, I ask leave to have printed in the RECORD a letter from Prof. David Y. Thomas, of the University of Arkansas, respecting the subject of the World Court and the Gillett resolution.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Without objection, the letter will be printed in the RECORD.

The matter referred to here is printed, as follows:

UNIVERSITY OF ARKANSAS,
DEPARTMENT OF HISTORY AND POLITICAL SCIENCE,
*Fayetteville, May 1, 1928.*

Hon. J. T. ROBINSON, M. C.,
*Washington, D. C.*

DEAR SENATOR ROBINSON: According to the press dispatches the Gillett resolution requesting the President to renew negotiations about our entrance into the World Court has been up for discussion, but apparently has not been disposed of at this writing.

I am heartily in favor of the resolution, but I don't see much good that can come of a renewal unless the President is in a position to remove the doubts and fears of the European nations regarding the meaning of the fifth reservation made by the Senate when ratifying the statute creating the World Court. The significant part of this reservation reads that the court shall not, "without the consent of the United States, entertain any request for an advisory opinion touching any dispute or question in which the United States has or claims an interest."

It is my understanding that this part of the reservation is the main thing that caused the European nations to request an explanation. As it stands, if a dispute were to arise between, say, Hungary and Rumania and our State Department were to claim that we have an interest in it, though it might be very difficult to prove such interest, that would block consideration by the court. In this way our State Department could block all advisory opinions. It is hard to think that it would ever trump up a claim to an interest when we really had none, but the possibility is there and it is not strange that European nations balk at it.

Surely the Senate never intended that this interpretation should be put upon its reservation. As a means of clearing up the difficulty I respectfully suggest that the Senate restate the reservation by striking out the two words "or claims," so that the reservation will read, "in which the United States has an interest." But if it seems best to retain "or claims," then follow it with this concession: "*Provided*, That if a difference of opinion arises on whether or not the claim is valid, then the United States agrees that the validity of the claim shall be passed upon by the court."

I am not sure that this will allay all the fears of the European powers, but it seems to me that it ought to settle most of them. Anyway I am very much interested in the Gillett resolution, and I trust that you will support it with such reasonable changes in the fifth reservation as will tend to allay the reasonable fears of the Europeans.

Very truly yours,

DAVID Y. THOMAS.

HERBERT HOOVER

Mr. BLEASE. I ask that the clerk read an editorial on "Hoover's Americanism" and that it be printed in the RECORD.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Is there objection to the request of the Senator from South Carolina? The Chair hears none.

The Chief Clerk read as follows:

[From the Fellowship Forum of April 28, 1928]

HOOVER'S AMERICANISM

A California correspondent recently wrote to the Fellowship Forum questioning the Americanism of Secretary of Commerce Herbert C. Hoover, one of the leading candidates for the Republican nomination for President. Subsequently our correspondent forwarded to us a clipping from a Sacramento newspaper covering the matter which he had brought to attention, the employment of foreign labor on Mr. Hoover's large farm in Kern County, Calif.

From this newspaper clipping it appears that a union-labor committee recently investigated the report about Mr. Hoover's employment of foreigners and found that out of approximately 300 persons working on his farm only about 25 to 30, or 1 in 10, were Americans, and of the 25 or 30 only a very few were whites. Most of the labor is done by Mexicans and Filipinos. The union-labor committee investigated to determine if employment of foreigners was necessary because of a shortage of white American workers. It found no shortage; also, that Mr. Hoover's farm manager had made no request of the near-by United States employment bureau to assist him in finding American workers.

The incident is rather illuminating. It again shows the need of restricting Mexican immigration. Not only in California, but throughout the West and Southwest, Mexican laborers are taking jobs that ought to go to American workers. That is one of the reasons several million Americans who would like to work are out of employment right now.

Coupled with the disclosures in Mr. Hoover's personally written autobiography in Who's Who, which listed his residence as London and showed most of his business and professional connections to be foreign up to the World War, when he decided to repatriate himself, the California incident certainly lays the Secretary of Commerce open to the charge of being an American by nativity only until such time as he entered politics.

Recently indignant protests have been registered against Mr. Hoover's order ending segregation of whites and negroes in the Department of Commerce and requiring men and women of both races to work side by side. This indignation was righteous. Resentment that on his California farm, when so many American workers are out of employment, he does not take the trouble to have his manager give the preference to people of his own color and nationality, is justified.

All of these things raise a doubt that Mr. Hoover is a thoroughgoing American in all things, or that he always thinks in terms of America. He has been called America's foremost internationalist. These things go to make him an exceedingly vulnerable candidate if nominated by his rather lately adopted political party. The Kansas City convention could find a man far more thoroughgoing in his Americanism, and therefore far less vulnerable than Mr. Hoover.

It is beginning to appear that the country can look only to the Kansas City convention for a nominee whom genuine Americans can wholeheartedly support. It is to be hoped the convention will rise to the occasion and offer the country a candidate about whose heart there can be no suspicion.

WILLIAM CHILDERS

Mr. BARKLEY. Mr. President, I ask unanimous consent for the present consideration of House bill 4357, for the relief of William Childers.

Mr. SMOOT. What is the bill?

Mr. BARKLEY. It is a little claim bill, reported by the Committee on Claims. It will take no time at all.

Mr. SMOOT. If there is any objection to it, I will ask that it go over.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to William Childers, formerly employed in quarrying stone for use in connection with the Government Lock No. 1, on the Levisa Fork of the Big Sandy River, the sum of $840, out of any money in the Treasury not otherwise appropriated, as full compensation for injury and consequent loss of the left eye sustained in the course of his employment and without negligence on his part.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the bill (S. 3594) to extend the period of restriction in lands of certain members of the Five Civilized Tribes, and for other purposes.

The message also announced that Mr. WILLIAMS of Illinois and Mr. KINCHELOE were appointed as additional managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (S. 3555) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce.

The message further announced that the House insisted upon its amendment to the bill (S. 1648) for the relief of Oliver C. Macey and Marguerite Macey, disagreed to by the Senate; agreed to the conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. UNDERHILL, Mr. SEARS of Nebraska, and Mr. BOX were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to each of the following bills of the House:

H. R. 9495. An act to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefits of the act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture; and

H. R. 10141. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

TAX REDUCTION

Mr. SMOOT. I ask now that the Senate proceed to the consideration of the revenue bill.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the first committee amendment.

Mr. REED of Pennsylvania. I send to the desk an amendment which I intend to present to the bill now under consideration. I ask that it be printed and lie upon the table.

The VICE PRESIDENT. That order will be made.

Mr. McMASTER. I desire to offer a tariff amendment to the pending bill. This amendment does not involve the change of any tariff schedule, but its purport is to establish for the farmers of the country the principle of the drawback system which is now enjoyed by the manufacturers of the country. I ask that the amendment be printed and lie on the table and that it be printed in the RECORD.

There being no objection, the amendment was ordered to lie on the table, to be printed, and to be printed in the RECORD, as follows:

On page 245, after line 16, insert the following:

SEC. —. Amendment to tariff act of 1922. The tariff act of 1922 is amended by adding after section 313 thereof a new section to read as follows:

"SEC. 313a. The Secretary of Agriculture is authorized and directed to designate primary markets for each of the following: Grains, cotton, livestock, tobacco, fruits, nuts, vegetables, and any other agricultural product which the Secretary of Agriculture deems advisable. After the designation of any primary market for any such product any producer or shipper of such product shipping for export any quantity thereof through a primary market shall be paid a compensatory allowance equal to the transportation charges paid on such product from the primary market to the most convenient port. Such allowances shall be paid out of the revenue from customs, and a sum sufficient for such purpose is hereby reserved, set aside, and appropriated from the revenue from customs for each fiscal year in a special fund to be administered by the Secretary of Agriculture to carry out the provisions of this section. Such allowances shall be determined and paid under such rules and regulations, and upon the filing of such notices, bonds, bills of lading, and other evidence of payment of transportation charges and exportation, as the Secretary of Agriculture may prescribe. In designating primary markets for any agricultural product under this section the Secretary of Agriculture shall, so far as practicable, avoid the creation of discrimination against other primary markets for such product."

Mr. WALSH of Massachusetts. Mr. President, I have been receiving, as probably every other Senator on the floor has been receiving in the last few days, a large number of telegrams and letters from people engaged in the installment-sale business, protesting against the provisions in the bill which relate to the taxing of incomes from sales made upon the installment plan.

I understand that the Finance Committee have not definitely determined to press the amendment which they have reported in the revenue bill, and that negotiations are on foot to reach a satisfactory agreement between these protestants and the Treasury Department. Will the Senator from Utah please state, for the information of the Senate and the public, just what the attitude of the Finance Committee is upon that phase of this bill?

Mr. SMOOT. Of course, the committee itself authorized the reporting of the bill containing the provisions in regard to the installment plan as written in the bill. Since the bill was reported to the Senate one class of merchants engaged in selling have presented to me, at least—I do not know whether they have talked to other members of the committee or not—what seems a sufficiently good reason why there should be an amendment, and just as soon as Mr. Alvord and Mr. Beaman get the full details of the suggested amendment, I shall ask the committee either to adopt it or to reject it.

Mr. WALSH of Massachusetts. So that the chairman does not intend at this time, to-day, at least, to press the amendment reported by the committee?

Mr. SMOOT. If the installment sales provision comes up to-day, I shall ask that it go over.

Mr. WALSH of Massachusetts. There are prospects of a satisfactory agreement being reached?

Mr. SMOOT. I think so; I hope so.

Mr. FLETCHER. Mr. President, it has been brought to my attention that real estate ought to be eliminated from the installment sales provision. I am not sure whether the committee has thought about that or not.

Mr. SMOOT. I will say to the Senator that a representative of a real-estate firm appeared before the committee at the hearings, but the committee decided unanimously that it would not except real estate, but would allow it to stand upon the same basis, where there were sales, as any other business.

Mr. FLETCHER. Strictly installment sales?

Mr. SMOOT. Strictly installment sales.

Mr. FLETCHER. I am not so sure about that. I may suggest an amendment to eliminate real estate. It seems to me that in selling sewing machines, or victrolas, or that sort of thing we have a different situation than where land is being sold.

Mr. SMOOT. Not as to the profits, and it is the profits we have to tax, and not the business. I will gladly confer with the Senator in relation to it if he desires to go into the matter.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). The question is on agreeing to the committee amendment, on page 8, line 5, to strike out "1927," and insert "1928."

Mr. SMOOT. Mr. President, this is a retroactive feature, applying to corporations, and at the request of a number of Senators I ask that it may go over.

Mr. KING. My colleague is referring to the amendment found on page 8, line 5?

Mr. SMOOT. That is the amendment.

Mr. KING. I want to state that when we reach page 215, which provides for the retroactive application of the law to the surtax, I shall move to strike out the amendment found there.

Mr. SMOOT. That has reference to individuals.

Mr. KING. Yes; exactly. I am not in favor of any retroactivity as contemplated in any provision of the bill.

The PRESIDING OFFICER. The Chair understands that the committee desires to have the amendment passed over.

Mr. SMOOT. Yes, Mr. President.

The PRESIDING OFFICER. Both amendment on page 8?

Mr. SMOOT. Both amendments.

The PRESIDING OFFICER. Both amendments will be passed over.

The next amendment was, in section 12, surtax on individuals, on page 10, after line 17, to strike out all the items to line 3, page 13, and insert the items from line 4, page 13, to line 3, page 15.

Mr. HARRISON. Let all those amendments go over.

Mr. SMOOT. In going over the bill first, we may pass over all the amendments involving rates and take up the administrative features first, then return to the provisions covering rates and discuss each item as it appears in the bill.

The PRESIDING OFFICER. The amendments involving rates will be passed over. Will the chairman of the committee indicate the amendment he desires to have taken up?

Mr. SMOOT. The first one is, on page 15, line 15, to strike out "sections 104 and 105" and insert "section 104," so as to read:

(d) Evasion of surtaxes by incorporation: For tax on corporations which accumulate surplus to evade surtax on stockholders, see section 104.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SIMMONS. Mr. President, I wish to suggest to the Senator from Utah that when we reach those amendments he make a brief statement with reference to the substance of the amendment.

Mr. SMOOT. This amendment is merely a change in number.

Mr. SIMMONS. The Senator will understand that I am not objecting to that sort of a change, but some of these administrative provisions were adopted unanimously by the committee.

Mr. SMOOT. I will ask the clerk, under the unanimous-consent agreement entered into, to make the changes in the numbers of the sections wherever that is necessary.

The PRESIDING OFFICER. Without objection, it will be understood that all amendments merely changing section numbers will be agreed to.

Mr. SMOOT. The next amendment to be considered now is on page 16, line 24.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 16, line 24, after the word "service," insert "(including in the case of any President of the United States taking office after the enactment of this act, the compensation received as such)," so as to read:

PART II—COMPUTATION OF NET INCOME

SECTION 21. NET INCOME.

"Net income" means the gross income computed under section 22, less the deductions allowed by section 23.

SECTION 22. GROSS INCOME.

(a) General definition: "Gross income" includes gains, profits, and income derived from salaries, wages, or compensation for personal service (including in the case of any President of the United States taking office after the enactment of this act, the compensation received as such), of whatever kind and in whatever form paid, or from professions, vocations, trades, businesses, commerce, or sales, or dealings in property, whether real or personal, growing out of the ownership or use of or interest in such property; also from interest, rent, dividends, securities, or the transaction of any business carried on for gain or profit, or gains or profits and income derived from any source whatever.

Mr. SMOOT. This simply means that hereafter the salary of the President shall be taxable just the same as any other individual's salary is taxable.

Mr. KING. Mr. President, I agree with my colleague that there should be a provision taxing the salary of the President. I am not so sure that a proper interpretation of the existing law would exempt the salary of the President from taxation. I have no objection to this amendment, but if upon further consideration I am convinced that the present law subjects the salary of the President to taxation, I shall either move to reconsider and strike out the clause inserted or offer an amendment providing that nothing herein shall be construed as exempting the salary of the President from taxation.

Mr. SMOOT. So that Senators may know, I will state now that if at any time a Senator desires to have a reconsideration of the vote by which any amendment is agreed to, and asks for it, as far as I am concerned, he will have an opportunity to submit his views upon the amendment.

Mr. FLETCHER. Mr. President, whether or not the junior Senator from Utah is correct, this amendment ought to go in, anyhow, it seems to me. I would like to ask the chairman of the committee whether, under the rulings now in force, the President's salary is exempt from taxation and whether the practice is to exempt it?

Mr. SMOOT. I want to say, in the first place, that the Supreme Court has so held. Some of the former President's have not paid taxes on their salaries. I understand that the present President is paying the tax upon his salary. I am not sure of that, because I have not asked him, but this amendment is put in following a decision of the Supreme Court, so that there will be no question about it in the future.

Mr. KING. May I say to the Senator from Florida that in the case of Miles against Graham the matter did not involve, of course, the President—that is to say, the President was not a litigant in the case, and there was no consideration of the salary paid to him—but it was with respect to a judge, and it may be that that decision goes far enough clearly to exempt the salary of the President from taxation. The point I made was that if upon further consideration of that decision I should reach the conclusion that it did not exempt the President from taxation of his salary I should offer a proviso.

Mr. SMOOT. Under the Constitution a judge and the President of the United States are on identically the same basis.

Mr. REED of Pennsylvania. Mr. President, in the Graham case it was held that inasmuch as the provision in the present law related indiscriminately to judges appointed previous and judges appointed subsequent to the passage of the income-tax amendment and of the income tax law, and inasmuch as that provision taxing judges who had been appointed previously was obviously unconstitutional, as the provisions were all inseparable, it was therefore unconstitutional as to judges subsequently appointed. Whether we are in full sympathy with that decision or not does not matter, because it is binding on us.

The provision in the Constitution about the President's salary is as follows:

The President shall, at stated times, receive for his services, a compensation, which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

Obviously the reasoning of the Supreme Court applies to the effort in the tax law to reach the President's salary, and that is the reason why this amendment is couched in the words in which it is found, so that it can not be stricken down under the principle in the Graham case.

Mr. SHORTRIDGE. Mr. President, the question is whether we shall impose this tax upon the President during the period for which he shall have been elected. I understand the matter may be brought up again if any Senator is disposed to discuss it. Up to this moment I have been disposed to oppose this proposed amendment, and I may have something to say upon the subject later on.

The PRESIDING OFFICER. Does the Senator desire that the amendment shall go over?

Mr. SHORTRIDGE. No; I do not ask that, under the statement of the Senator in charge of the bill that it may be taken up again.

The PRESIDING OFFICER. The vote by which the amendment is adopted will be subject to reconsideration. It is agreed to. The Clerk will state the next amendment.

The next amendment was, on page 20, after line 10, to strike out:

(9) Cooperative apartments: In the case of a corporation owning or leasing an apartment building and operating it on the cooperative plan, the payments to such corporation on account of taxes and interest as specified in section 23 (q).

The amendment was agreed to.

The next amendment was, on page 23, line 4, after the word "property," to strike out "assessed" and the period and insert, "assessed; but this paragraph shall not exclude the allowance as a deduction of so much of such taxes as is properly allocable to maintenance or interest charges," so as to read:

(c) Taxes generally: Taxes paid or accrued within the taxable year, except—

(1) income, war-profits, and excess-profits taxes imposed by the authority of the United States;

(2) so much of the income, war-profits, and excess-profits taxes imposed by the authority of any foreign country or possession of the United States as is allowed as a credit against the tax under section 131; and

(3) taxes assessed against local benefits of a kind tending to increase the value of the property assessed; but this paragraph shall not exclude the allowance as a deduction of so much of such taxes as is properly allocable to maintenance or interest charges.

For the purpose of this subsection, estate, inheritance, legacy, and succession taxes accrue on the due date thereof, except as otherwise provided by the law of the jurisdiction imposing such taxes, and shall be allowed as a deduction only to the estate.

The amendment was agreed to.

The next amendment was, on page 25, line 6, after the word "obsolescence," to strike out "In the case of improved real estate held by one person for life with remainder to another person, the deduction provided for in this subsection shall be equitably apportioned between the life tenant and the remainderman under rules and regulations prescribed by the commissioner with the approval of the Secretary" and insert "In the case of property held by one person for life with remainder to another person, the deduction shall be computed as if the life tenant were the absolute owner of the property and shall be allowed to the life tenant. In the case of property held in trust the allowable deduction shall be apportioned between the income beneficiaries and the trustee in accordance with the pertinent provisions of the instrument creating the trust, or, in the absence of such provisions, on the basis of the trust income allocable to each," so as to read:

(k) Depreciation: A reasonable allowance for the exhaustion, wear and tear of property used in the trade or business, including a reasonable allowance for obsolescence. In the case of property held by one person for life with remainder to another person, etc.

The amendment was agreed to.

## ASSAULT ON MRS. MARY E. MICHAEL

Mr. BLEASE. Mr. President, I shall take just a few minutes of the Senate's time. Two or three days ago, in this city, a negro went to the home of a fine white family, and, at the point of a pistol in the face of the woman who was in a room with her little 5-year-old child, forced that woman to submit to his beastly desires. He then took her down into the kitchen of the home and made her cook a meal for him to eat. After he had eaten it, he forced her back into her bedroom, and for the second time the beast satisfied his desires. He vanished, and he has not been captured.

That was right here in the shadow of the Capitol, right in the shadow of where this order a few days ago was passed, attempting to put white women on social equality with that class of animals, and forcing them to sit side by side with them for hours at a desk to work.

Mr. President, I wish to call the attention of the country to the fact that that order of Herbert Hoover is just one of the things which is encouraging exactly what happened in this city day before yesterday, and shows the negroes' appreciations.

I shall not take the time of the Senate to read it, but I have here an article from the Washington Post, in which it is stated that the negro told this white lady that this was not his first offense of the kind, and that it would not be his last. I would

like to have that article printed in the RECORD, together with an editorial from yesterday afternoon's Washington Star, in reference to it.

The PRESIDING OFFICER (Mr. FESS in the chair). Without objection, it is so ordered.

The article and editorial are as follows:

[From the Washington Post, Saturday, May 5, 1928]

WOMAN SAYS PHOTO IS OF HER ASSAILANT—MRS. M. E. MICHAEL PICKS OUT ROGUES' GALLERY PICTURE—FIVE SUSPECTS FREED

Mrs. Mary E. Michael, 20 years old, of 756 Twentieth Street NE., yesterday identified a rogues' gallery picture as that of the negro who assaulted her and held her and her 5-year-old stepdaughter, Elsie, captive at pistol point for two hours in her home Thursday afternoon.

The police department yesterday offered a reward of $300 for the capture of Mrs. Michael's assailant. The five suspects who were captured in the dragnet spread by police over the city following the attack were released yesterday. Police said they are confident none was responsible for the crime against Mrs. Michael.

While forcing her to sign a statement that he was invited into her house, Mrs. Michael told police her assailant laughingly bragged of other attacks upon white women, and said he had "jumped" bond in New York City for a similar offense. Two glasses which the negro handled while in Mrs. Michael's home were examined for finger prints yesterday, but Detective Sergt. Fred Sandberg said he found no marks.

---

[From the Washington Star, Friday, May 4, 1928]

DEFERRED JUSTICE

The atrocious attack on a young married woman in northeast Washington yesterday by a fiend, who subdued his victim with a pistol, calls attention to the fact that Philip Jackson, who attacked a woman in the shadows of the Capitol Grounds, has succeeded so far in escaping punishment, although the sentence of the court for his deed was death in the electric chair some months ago. Jackson was arrested after one of the most intensive man hunts in the history of the city and after large rewards were posted for his capture. He was given a fair trial, with no evidence offered by the defense to disprove his guilt. Yet, though condemned to die, he has succeeded in deferring the execution date.

Now comes another case of almost the same character, although more diabolical in execution. This man, who is still at large, forced his way into the house of a young married couple when the husband was away at work. He assaulted the woman, made her write a note exonerating him of guilt, boasted of similar crimes, and compelled her to cook him a meal, later sneaking out of the house into adjacent woods. Unlike the case of Jackson, however, a minute description of the criminal has been furnished, and, unless he has fled the jurisdiction, it should be comparatively easy for the police to pick him up.

When he is caught, it is to be fervently hoped that there will be no repetition of the Jackson case. By all means, give him an orderly trial to prove his guilt, but let there be no delay in carrying out the mandate of the court. Justice, swift and sure, should follow every crime of this revolting nature. Otherwise thousands of men who leave loved ones at home will undergo mental torture lest a fiend in human form, aware that clever legal tactics can probably get him off, will repeat the deeds of these scoundrels. The law is mighty, but it must dispense justice unerringly or the confidence of the public, from which it obtains its power, will be withdrawn.

HERBERT HOOVER

Mr. BLEASE. I have an article that is too long to ask to have read at the desk, which appears in the Christian Century of May 10, 1928. It is headed "The search for a candidate." I want to refer to just one matter in it and then request that the entire article be printed in the RECORD. It relates to Teapot Dome, which I think I have never mentioned before on this floor.

Mr. Herbert Hoover, who was then in the Cabinet, right at the inception of the Teapot Dome deal was notified by Mr. Helms of the situation. That part of the article which I desire to read in this connection is as follows:

On April 20, 1922, 13 days after the deal with Sinclair was made, this experienced oil man put evidence in the hands of Mr. Hoover which would indicate that the Department of the Interior was mixing up in something with a decidedly off-color aspect—the leasing of national resources of immense value without public bids and in the utmost secrecy. The appeal to Mr. Hoover was in this form:

"Have just sent the following telegram to President, and if you are interested hope you will discuss matter with him. Telegram quoted as follows: 'Will it be convenient for you to grant me a few moments on either April 25 or 26 with reference to the proposed development of Teapot Dome structure in Wyoming? As reported approved by you have just been advised by Secretary Fall that this matter is closed, but feel that my company should have had opportunity to have made a bid upon it, as we requested such an opportunity six months ago, and were then advised by both the Interior and Navy Departments that development proposition would not be considered for a very long time; and, furthermore, we requested same opportunity a few weeks ago and understood that we would have such an opportunity to submit a competitive bid. Please wire collect here.'"

Mr. Hoover, in a word, received this appeal at the very start of the Teapot Dome deal, when the secrecy of the schemers gave evidence that one bold word of public inquiry or denunciation would stop this steal before it could get started. And Mr. Hoover acted. In that he differed from Mr. Harding and the others. How did he act? The files of the Interior Department show that he forwarded his telegram from Mr. Helms to Secretary Fall with this notation:

"I should be glad to convey to this gentleman any reply that you may suggest."

That, in the cold light of the record, is Mr. Hoover's connection with the oil scandal. A member of the Government at the time it occurred; a member ever since; appealed to at the time it occurred to stop it; assuring the chief culprit in the Cabinet of his willingness to allow him to dictate his action in the matter; silent then; silent ever since.

I ask that the entire article be printed in the RECORD, as I do not care to take the time of the Senate to read it.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article is as follows:

THE SEARCH FOR A CANDIDATE

What sort of presidential candidate offers to an aroused and indignant Nation promise of the rehabilitation of our public life? The underlying immoralities of our current political situation have already been treated in these pages. Consideration has been given to the three candidates from Illinois who may be offered to lead in this work of restoring both the Republican Party and the Federal Government to a basis of sound morality. It is now necessary to treat of two other frequently mentioned aspirants for the Republican nomination. What may a nation, determined that its public life shall be purified, expect from either of these two men who will be conspicuously in the limelight at the Kansas City convention?

First, as to Mr. Charles Evans Hughes. Mr. Hughes is not an avowed candidate. He has called himself "too old." But Mr. Hughes has had such a long and honored career in public life, and has so recently—at Habana—demonstrated the persistence of those powers as agile diplomat and advocate which have placed him in the highest rank in the legal profession, that it is natural that agitation for his nomination should persist. It is generally believed that the largest uninstructed block of delegates in the Kansas City convention will be those from Pennsylvania, controlled by Mr. Mellon, and from New York, controlled by Mr. Hilles. It is altogether possible that these delegations may try to secure the nomination of Mr. Hughes.

It is hard to discuss Mr. Hughes as a candidate, because, like Mr. DAWES, he is not nominally such. His failure, therefore, to announce an open stand on the decisive issues in this campaign can hardly be held against him. Mr. Hughes once made a campaign as the Republican nominee for the Presidency. That campaign, too, came at a time of national crisis, and it is hardly too much to say that Mr. Hughes in that campaign distressed his most ardent admirers by the manner in which he perfected the technique of making meaningless campaign speeches. Should he run again, Mr. Hughes might prove to have profited by experience. But this does not go very far in answering the question as to the availability of Mr. Hughes as a candidate.

Perhaps the question should be put in this way: Is there any valid reason why citizens who are anxious to secure a cleansing of our American Government should not look to Mr. Hughes for leadership? We believe that there is. We believe that in the one question which presents the most urgent issue in the coming campaign, Mr. Hughes, by past association and present employment, is plainly estopped from taking the lead toward reform. Speaking in the recent Ohio primary campaign, Mr. THEODORE E. BURTON, that fine figure in a State where politics has been conducted on a pretty sordid level, said, according to the Chicago Tribune, that the Republican candidate in the coming presidential election "must be as far removed from the taint of oil as heaven from hades." Mr. BURTON is right. But the demand removes Mr. Hughes from serious consideration. For Mr. Hughes has for years been one of the great oil lawyers of the country. He has represented the great oil interests in case after case. And he is to-day general counsel for the American Petroleum Institute which, just a few months ago, reelected Mr. Doheny and Mr. Sinclair as its directors in the face of a general public sense of outrage. If oil is to enter the coming campaign—as it must—the Republican Party can hardly afford to have as its candidate a man now accepting income from huge oil interests with which two of the most sinister figures in the recent revelations are personally and powerfully identified.

We come now to Mr. Hoover. Mr. Hoover is generally regarded as perhaps the most efficient member of the present administration. This notion may be a mistaken one, but it is held by large portions of the public. His career, since he became a world figure in 1914, has been

a notable one. It is possible that, if a referendum could be taken among all the members of the Republican Party to-morrow, Mr. Hoover might emerge as first choice for the nomination. We are quite sure that he would be given the preference of the majority of members of the Protestant churches. It would be surprising were it otherwise. Around Mr. Hoover there still gathers the glamor of the Belgian relief. It was Mr. Hoover who showed the housewives of America how they could express their patriotism during the days of the war. When the famine rolled over Russia it was Mr. Hoover who directed that service of mercy and relief. A year ago it was Mr. Hoover who was called on to lead in the rescue and aid of the Americans driven from their homes in the flooded Mississippi Valley. Add to these humanitarian considerations the reputation which Mr. Hoover has for almost supernatural ability in the conduct of affairs, and it is natural that people who normally vote the Republican ticket if they can do so without actively outraging their own consciences should have settled on Mr. Hoover as their favorite in this campaign.

But even with this roseate background, Mr. Hoover, as a candidate for the Presidency, requires the same scrutiny that we give to the other candidates. The same tests should be applied to him that we would apply to Lowden or DAWES or Hughes or any of the others. The moral crisis with which we now have to deal is far too real and far too serious to be settled by sentimentalism. We must once more appeal to the facts. Is Mr. Hoover the man who will restore our public life to the high levels of honesty, both in word and act, which an aroused national conscience must demand? To answer, let us apply three tests.

Where does Mr. Hoover stand on foreign policy? Yes; where? Does anybody know? Does anybody pretend to know? There was a time, before Herbert Hoover, the rescuer of Europe's starving, became Herbert Hoover, the officeholder and candidate, when Mr. Hoover's views on foreign policy were available for the asking. He was in favor of American entry into the League of Nations. He was in favor of American entry into the World Court. But what does he favor to-day? Senator MOSES, one of the few complete "irreconcilables" left in public life, who hopes to be the second man on the Republican ticket if Mr. Hoover heads it, has said that Mr. Hoover stands with him in complete opposition to cooperation in any form with European nations in the search for world peace. But there is no way of knowing whether Mr. MOSES is relating fact or merely translating his personal prejudices into hopes. Mr. Hoover is a member of the administration which has dared to propose the outlawry of war as an instrument of policy to the other leading powers. Does Mr. Hoover favor the same thing? Nobody knows. He has managed, although in the Cabinet, to remain entirely mum on this vital issue during this period when Mr. Coolidge and Mr. Kellogg have been pushing it toward international action. Test Mr. Hoover at the first point, and the result is zero.

Where does Mr. Hoover stand on prohibition? Personally, he is a dry. We have heard that no liquor is served at his table in Washington, and the more honor to him for that. But as to the national issue, we have only the enigmatical letter to Senator BORAH to guide us. At the time that letter was written we commented on it, and pointed out that it was an attempt by Mr. Hoover, entered in the Ohio primaries, to hold in line the wet support which he already had in the city machines in Cincinnati and Cleveland, while angling for the dry support of the rural districts. Mr. BORAH put before Mr. Hoover a definite list of definite questions. Mr. Hoover replied by ignoring the specific questions, calling prohibition an "experiment," but opposing repeal of the eighteenth amendment and enforcement of the laws enacted thereunder. He is silent on the vital question propounded by Senator BORAH, as to whether the Republican Party shall make a platform pledge of allegiance to this policy. The letter is greatly admired by professional politicians. They regard it as proof of Mr. Hoover's developing ability to straddle, an accomplishment which they hold essential for a successful political career. Readers of The Christian Century will have to rate Mr. Hoover's standing in this second test for themselves.

This brings us to the third, and the most immediately urgent test. Where does Mr. Hoover stand on the oil-corruption issue? Congressman BURTON, in demanding that the Republican candidate be as far removed from the oil taint as "heaven from hades," was campaigning for Mr. Hoover. By the Burton measurement, how far is Mr. Hoover's heaven from Mr. Fall's hades? Mr. Hoover became one of the chiefs of the American Government on March 4, 1921. On the same day Mr. Harding, Mr. Daugherty, Mr. Weeks, Mr. Denby, and Mr. Fall assumed office. From that day there began the intrigue which culminated in Teapot Dome. Senator BORAH was well within the facts when, in his Chicago speech of last week, he said: "Nothing could be worse than the conditions lately uncovered at Washington. No one should underestimate the searching significance of these faithless and sordid transactions, and no one can overstate the profound issues which they present for the consideration of the American people." What of the relation of Mr. Hoover to these issues?

Mr. Hoover is a mining engineer. With the possible exception of Mr. John Hays Hammond, he is probably the most famous American mining engineer. He was thus the only man in the Cabinet with technical knowledge in a field collateral with that in which the corruption developed. More than that, Mr. Hoover has a restless intelligence which has impelled him to such an aggressive study of what is going on in departments of the Government other than his own that there have been frequent resentments and protests to the President. Still more than that, we now have incontrovertible proof that Mr. Hoover was made cognizant of the suspicious Teapot Dome deal almost at its inception. In Mr. Hoover, therefore, the people of the United States had in their Government from the first day of the Harding régime a technically qualified mining expert, with a keen interest in the working of all departments of the Government, and early information as to presumptive wrongdoing in a field very close to his own. What did Mr. Hoover do about it? What has he done about it from that day to this? Did he ever make a public move to expose or stop the oil corruption? Never. Has he ever said a word in public against it? Never. But, worse than that, documentary evidence shows that he actually played into the hands of those "faithless public servants," to employ the language of the Supreme Court, who conceived and carried through the Teapot Dome deal.

The record is clear. It was taken before the Senate investigating committee on April 3 of the present year. We refer to the testimony as published in the New York Herald-Tribune, a thick-and-thin Republican Party organ. It consists of the story told on the witness stand by Mr. Birch Helms, in 1921 vice president of the Texas Pacific Coal & Oil Co., and now vice president of the important banking firm of Blair & Co., of New York, together with letters and telegrams taken from departmental and other files. It shows that Mr. Helms's company, hearing that the leasing of Teapot Dome was in prospect, sent Mr. Helms to Secretary Fall early in the game, asking for a chance to bid. He was told that no such lease was contemplated. Later, hearing rumors within the oil industry, Mr. Helms went to Mr. Fall again, and this time Mr. Fall assured him that when the matter was ripe he would be glad to entertain the bid of the Texas Pacific. That was on April 10, 1922. On April 7 Mr. Fall had actually signed the notorious Teapot Dome lease! Finally finding out what had happened, Mr. Helms tried to take the case higher up. He went to Mr. Harding; he went to Mr. Christian, Mr. Harding's secretary; he went to Mr. Daugherty; he went to Mr. Weeks. In the light of revelations since made it will surprise no one that neither Mr. Harding, nor Mr. Christian, nor Mr. Daugherty, nor Mr. Weeks lifted a hand to hold up the deal. Mr. Weeks did, indeed, send the amazingly revealing reply to Mr. Helms: "For good reasons I can not become involved in the controversy," thus admitting that, even at that early stage, the matter had assumed the proportions of an open "controversy" within the administration and oil circles.

But Mr. Helms went also to Mr. Hoover. On April 20, 1922, 13 days after the deal with Sinclair was made, this experienced oil man put evidence in the hands of Mr. Hoover which would indicate that the Department of the Interior was mixing up in something with a decidedly off-color aspect—the leasing of national resources of immense value without public bids and in the utmost secrecy. The appeal to Mr. Hoover was in this form:

"Have just sent the following telegram to President, and if you are interested hope you will discuss matter with him. Telegram quoted, as follows: 'Will it be convenient for you to grant me a few moments on either April 25 or 26 with reference to the proposed development of Teapot Dome structure in Wyoming? As reported approved by you, have just been advised by Secretary Fall that this matter is closed, but feel that my company should have had opportunity to have made a bid upon it, as we requested such an opportunity six months ago, and were then advised by both the Interior and Navy Departments that development proposition would not be considered for a very long time; and, furthermore, we requested same opportunity a few weeks ago, and understood that we would have such an opportunity to submit a competitive bid. Please wire collect here.'"

Mr. Hoover, in a word, received this appeal at the very start of the Teapot Dome deal, when the secrecy of the schemers gave evidence that one bold word of public inquiry or denunciation would stop this steal before it could get started. And Mr. Hoover acted. In that he differed from Mr. Harding and the others. How did he act? The files of the Interior Department show that he forwarded his telegram from Mr. Helms to Secretary Fall with this notation: "I should be glad to convey to this gentleman any reply that you may suggest."

That, in the cold light of the record, is Mr. Hoover's connection with the oil scandal. A member of the Government at the time it occurred; a member ever since; appealed to at the time it occurred to stop it; assuring the chief culprit in the Cabinet of his willingness to allow him to dictate his action in the matter; silent then; silent ever since.

We do not write these facts concerning Mr. Hoover's candidacy wantonly. Mr. Hoover is an extremely formidable candidate. His chances for nomination seem to exceed those, at this writing, of any other Republican. But facts are facts. Mr. Hoover, in his one direct connection with corruption in public life, offered to do what the corrupted would most eagerly have desired him to do in order to secure their own immunity. And on the other vital issues Mr. Hoover turns

chameleon. That is what politicians call "playing the game." It is exactly what has reduced the American public service to a meaningless and immoral mummery.

The crisis which confronts the American people as the presidential candidates are chosen is a moral crisis. Corruption is a moral issue, and corruption will be the first issue in the coming campaign. Unfortunately the vast majority of Americans still think of corruption as something unusual, local, self-contained; something that had to do only with the Ohio gang or Teapot Dome. But this, true as far as it goes, is a fatally inadequate understanding of our national moral crisis. Teapot Dome was a piece of shameless corruption—the Supreme Court has so certified. But it was only a piece of corruption. Beneath Teapot Dome and the mulcting of the disabled veterans and the scandals of the Alien Property Custodian's office and the excesses of the Ohio gang—beneath everything against which the Democratic partisans are now preparing to unlimber their oratorical guns—lies an immorality which has yet to be challenged, and out of which all our other political immoralities grow.

This is the immorality which divests political life of candor, dignity, and honor, and reduces it to the level of a mere crafty game. It makes the politician more eager to protect the party against a scandal than to protect the Nation against being looted. It regards the people as unworthy of confidence, and makes public office a prize to be grasped by those slick professional gamesters who have succeeded in deluding the largest number of dupes. It is this immorality which really threatens our American institutions at the foundation, and with which our public opinion must deal if the Teapot Dome experience is to have lasting value in building up the strength of the Republic.

The moral rehabilitation of American politics is our problem. And the moral rehabilitation of American politics requires a leadership which will cast into outer darkness the current political methods of dodging and covering up and avoiding responsibility to the limit of human ingenuity. To force our citizens to choose between candidates whose views have been deliberately withheld and beclouded is to force them to contribute to the increasing frustration of their own form of government. Only leaders with principles clearly defined and records beyond reproach are worthy of the confidence of the people when such an hour of crisis as this comes upon us. Campaign managers will, of course, claim that their candidates are men of this type. To admit that a candidate was trying to hide his record or his principles would be to concede his defeat. But the claim is not enough. There are three issues by which the American public will put that claim to the test. Where does the candidate stand on foreign policy? Where does he stand on prohibition? Where does he stand on the oil corruption? Not one of the candidates so far scrutinized can, in our opinion, successfully submit to this test. Then shall the leader to whom we turn for reform be one of these, or shall he be a veteran of Tammany Hall?

### PULLMAN SURCHARGE

Mr. LOCHER. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial which appeared in the Cincinnati Enquirer of Friday, March 16, 1928, relating to repeal of the Pullman surcharge.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

### REPEAL THE PULLMAN SURCHARGE

It is high time that all luxury taxes put into force as war-time revenue measures were repealed. Some have been. Of those that remain there is none more burdensome than the 50 per cent Pullman surcharge. It is a penalty on passenger travel and is estimated to cost the railroads more than they get from it. It is the only war-time surtax that has not been repealed. The bill now pending in Congress to do so should be passed without delay.

It is a heavy burden on business activity. It is being opposed by the National Retail Dry Goods Association and by the National Association of Commercial Travelers, which numbers almost 1,000,000 members. It should be wiped off the statute books. When travelers have paid the regular passenger fare and the regular Pullman fare there is no justice in compelling them to pay an additional fare of one-half the Pullman rate.

It was originally intended to be a deterrent to travel in war time so as to leave more railroad facilities available to the Government. Congress enacted the law authorizing the surcharge at the request of the Director General of Railroads. There no longer being need of such restriction of civilian travel, there no longer is occasion to continue the war-time measure to restrict it. This is common-sense reasoning. Of course, the carriers will lose their share of it, but they would benefit quite as much by the additional travel that would be encouraged. Yet whether they would or not the reason for its creation having ceased, it, too, should cease.

The removal of this surcharge has been recommended by Examiner Keeler, of the Interstate Commerce Commission. Acting on his report, six of the commissioners held the surcharge to be unreasonable. The others held it to be reasonable. But because two of the six favored a reduction only, no final action has been reached. However, as the surcharge is not a rate authorized for revenue to the roads, but an enactment to penalize civilian travel when train accommodations were needed for troop movements, it is not a thing the commission has any authority over, but Congress only, and it is for Congress to repeal it, the cause for its imposition no longer existing.

### TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

The PRESIDING OFFICER. The clerk will state the next amendment.

The next amendment of the Committee on Finance was, on page 26, line 3, after the word "deduction," to strike out "allowed by this subsection"; and in line 4, after the word "lessee," to insert "In the case of property held by one person for life with remainder to another person, the deduction shall be computed as if the life tenant were the absolute owner of the property and shall be allowed to the life tenant. In the case of property held in trust the allowable deduction shall be apportioned between the income beneficiaries and the trustee in accordance with the pertinent provisions of the instrument creating the trust, or, in the absence of such provisions, on the basis of the trust income allocable to each," so as to read:

(1) Depletion: In the case of mines, oil and gas wells, other natural deposits, and timber, a reasonable allowance for depletion and for depreciation of improvements, according to the peculiar conditions in each case; such reasonable allowance in all cases to be made under rules and regulations to be prescribed by the commissioner, with the approval of the Secretary. In the case of leases the deduction shall be equitably apportioned between the lessor and lessee. In the case of property held by one person for life with remainder to another person, the deduction shall be computed as if the life tenant were the absolute owner of the property and shall be allowed to the life tenant. In the case of property held in trust the allowable deduction shall be apportioned between the income beneficiaries and the trustee in accordance with the pertinent provisions of the instrument creating the trust, or, in the absence of such provisions, on the basis of the trust income allocable to each. (For percentage depletion in case of oil and gas wells, see sec. 114 (b) (3).)

The amendment was agreed to.

The next amendment was, on page 29, after line 14, to strike out:

(q) Cooperative apartments: Amounts paid by an individual taxpayer during the taxable year to a corporation which owns or leases an apartment building and operates it under the cooperative plan if—

(1) Such amounts are bona fide expended by the corporation in the same taxable year, in payment of taxes allowable as deductions under subsection (c) of this section or in payment of interest on its bonds or on other indebtedness incurred by it in the acquisition, construction, or maintenance of such apartment building or in the acquisition of the land on which the building is located, and

(2) Such individual is the owner or lessee of an apartment in the building under a lease the term of which is twenty years or more, or under an agreement with the corporation, is entitled, by reason of stock ownership, to the use and occupancy of such apartment for a like period, and

(3) No part of the net earnings of the corporation inures to the benefit of any private shareholder or individual other than an owner or lessee of an apartment in such building or one entitled by reason of stock ownership to the use and occupancy of any such apartment.

The amendment was agreed to.

The next amendment was, on page 30, after line 11, to insert:

(q) Pension trusts: In the case of an employer establishing or maintaining a pension trust for the benefit of his employees which is exempt from tax under section 165, amounts transferred to such trust from a pension reserve fund accumulated prior to the enactment of this act, under a pension plan previously in force, to the extent that the amounts so transferred have not been theretofore allowable as a deduction. The deduction allowed by this paragraph shall be apportioned in equal parts over a number of consecutive years (beginning with the year in which the transfer is made) equal to the number of years during which such pension reserve fund was accumulated.

The amendment was agreed to.

The next amendment was, at the top of page 31, to insert:

(r) Expenses of tax adjustment: All expenses paid or incurred in contesting liability for any tax, including fees and compensation for personal services, but exclusive of expenses allowable under subsection (a).

Mr. KING. Mr. President, I am opposed to this amendment. I am willing to take it up now or let it go over, as the chairman of the Finance Committee may prefer.

Mr. SMOOT. I will ask that it go over. I will say to my colleague that it involves the attorney's fees which may be allowed.

Mr. KING. Yes; I understand.

Mr. FLETCHER. Mr. President, am I to understand that the provision allows deductions for expenses?

Mr. SMOOT. For attorney's fees.

Mr. WALSH of Massachusetts. Mr. President, would it not be well to have the chairman of the Finance Committee explain each amendment as it goes over, so that Senators between now and Monday may read his explanation in the RECORD and understand it?

Mr. SMOOT. All the amendment does is to allow a deduction for expenses and attorney's fees where a taxpayer is involved in a suit with the Government.

Mr. WALSH of Massachusetts. I understand, but my idea is that by the Senator explaining the amendments which go over for further discussion, the Senate will have the benefit of his explanation in the RECORD and be able to read it between now and Monday.

Mr. KING. It is a little broader than my colleague states it. "All expenses paid or incurred in contesting liability of any tax, including fees and compensation for personal services," and so forth, would be a deduction. I am inclined to think that would reach any contest relating to a State tax or a municipal tax, but even if it is limited only to expenses incurred in contesting the collection of a Federal tax, I am opposed to it, particularly because there is no limitation. A man might agree to pay, as some of them do, to some lawyer 50 per cent of all that the attorney may save. Suppose he saved 50 per cent; that would be the deduction, at least. I am inclined to think it would be. There is no restriction. It is an invitation to taxpayers to challenge the validity of a tax and to contest it not only through the agencies of the department, but through the courts, because they may get a rebate and a deduction for all expenses incurred in contesting the validity of the tax.

Mr. WALSH of Massachusetts. Mr. President, is the Senator opposed to the entire amendment?

Mr. KING. I am. I think if a man wants a lawsuit connected with the Government of the United States, as with private individuals, the expenses incurred in his lawsuit ought not to be allowed as a deduction in his tax. We have lawsuits that are not connected with the Government, and we do not get any deduction in those cases. The amendment presupposes that the Government is proceeding wrongfully in the collection of the tax, and it is an invitation to a man to challenge the validity of the tax and contest it, if it is important, by going to law upon the theory that he will get a deduction for all expenses incurred in the litigation. I am opposed to the entire provision.

Mr. WALSH of Massachusetts. The amendment is to go over?

The PRESIDING OFFICER. The amendment will go over.

Mr. FLETCHER. Mr. President, let me say just a word about the amendment. I do not think there will be any temptation on the part of any individual taxpayer to enter into a lawsuit with the Government and waste his time and pay lawyers' fees, and so forth, just for the sake of contesting the matter and taking the chance of getting a deduction somewhere. He would not do that unless he had a good case. There are numerous cases where the taxes have been improperly and unjustly assessed, and the taxpayer has to fight for his rights. I can see no objection to allowing the taxpayer his attorneys' fees and perhaps some other expenses in that sort of a case.

The only objection to the amendment in my mind is that it seems to be rather broad in that it includes not only fees, but compensation for personal services. That is a very elastic and all-embracing item. What would be the taxpayer's compensation for his personal services in connection with such a contest?

Mr. SMOOT. It is intended to cover accountants, and engineers in some cases.

Mr. FLETCHER. Not the personal services of the contestant?

Mr. SMOOT. Oh, no.

Mr. FLETCHER. I understand. That makes it a little plainer, but as the language reads now it is ambiguous, it seems to me, "including fees and compensation for personal services." I did not know but that it meant personal services of the taxpayer while he was conducting the contest.

Mr. SMOOT. It is compensation for personal services. The taxpayer does not pay himself for his own personal services.

Mr. FLETCHER. It means what he pays out for auditors or accountants or engineers?

Mr. SMOOT. Yes; or whatever is necessary in his case.

Mr. FLETCHER. "But exclusive of expenses allowable under subsection (a)."

Mr. SMOOT. Those are the ordinary business expenses.

Mr. FLETCHER. Where is subsection (a)?

Mr. SMOOT. It is in the same section, page 22.

Mr. FLETCHER. I think there is a great deal of merit in the amendment.

Mr. GERRY. Mr. President, may I say to the Senator from Florida that that section would also cover all legal expenses?

Mr. FLETCHER. Yes; including attorney's fees.

Mr. KING. I might mention to the Senator from Florida, so that he may have it in mind when we discuss it again, that the tax involved might be, as an illustration, only a few dollars, and a man might, because of his litigious spirit, contest it, as we know frequently men will contest over a few dollars and spend thousands of dollars in litigation. A man might pay his attorney a dozen or 50 times as much as the amount of the tax involved, and yet he would be allowed a deduction for all the expenses and costs involved in the matter.

Mr. GERRY. As the Senator from Utah has well said it is an invitation to anybody who wants to contest a tax, to make that contest and then deduct the expense of it from his future tax payments.

The PRESIDING OFFICER. The amendment goes over on request. The clerk will state the next amendment.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 32, line 4, after the word "act" to insert "(except the deductions provided for in subsections (k) and (l) of section 23)"; so as to read:

(b) Holders of life or terminable interest: Amounts paid under the laws of any State, Territory, District of Columbia, possession of the United States, or foreign country as income to the holder of a life or terminable interest acquired by gift, bequest, or inheritance shall not be reduced or diminished by any deduction for shrinkage (by whatever name called) in the value of such interest due to the lapse of time, nor by any deduction allowed by this act (except the deductions provided for in subsections (k) and (l) of section 23) for the purpose of computing the net income of an estate or trust but not allowed under the laws of such State, Territory, District of Columbia, possession of the United States, or foreign country for the purpose of computing the income to which such holder is entitled.

The amendment was agreed to.

The next amendment was, on page 32, line 13, after the word "section," to strike out "143" and insert "144," so as to read:

(c) Tax withheld on tax-free covenant bonds: For tax withheld on tax-free covenant bonds, see section 144 (a) (4).

The amendment was agreed to.

The next amendment was, on page 32, after line 13, to strike out:

(d) Cooperative apartments: No deduction shall be allowed to any corporation which owns or leases an apartment building and operates it under the cooperative plan, in respect of any expenditures by the corporation on account of taxes or interest as specified in section 23 (q) (1).

Mr. KING. Mr. President, I presume that is made necessary because of the antecedent provision with which we have dealt?

Mr. SMOOT. That is true, I will say to the Senator. I think there are one or two others similar in nature.

Mr. KING. But all relating to the same subject?

Mr. SMOOT. Yes.

The amendment was agreed to.

The next amendment was, on page 37, line 18, after the word "section," to strike out "143" and insert "144," so as to read:

SEC. 33. TAXES WITHHELD AT SOURCE.

The amount of tax withheld at the source under section 144 shall be allowed as a credit against the tax.

The amendment was agreed to.

The next amendment was, on page 37, line 23, after the word "in," to strike out "1927" and insert "1928"; in line 25, after the words "beginning in," to strike out "1926" and insert "1927"; and in the same line, after the words "ending in," to strike out "1927" and insert "1928," so as to read:

SEC. 34. ERRONEOUS PAYMENT.

(a) Credit for overpayments: For credit against the tax of overpayments of taxes imposed by this title for other taxable years, see section 322.

(b) Fiscal year ending in 1928: For credit against the tax of amounts of tax paid for a fiscal year beginning in 1927 and ending in 1928, see section 132.

Mr. SMOOT. That relates to the effective date of the tax. Let the amendment go over.

Mr. KING. It involves the same question suggested when we took up the first amendment, so it had better go over.

Mr. FLETCHER. Does it refer to any of the retroactive features in the bill?

Mr. SMOOT. It does. The amendment should go over.

The PRESIDING OFFICER. The amendment will be passed over. The clerk will state the next amendment.

The next amendment was, on page 40, line 10, after the word "taxpayer," to insert "entitled to the benefits of subsection (a)," so as to read:

(c) Change from accrual to installment basis: If a taxpayer entitled to the benefits of subsection (a) elects for any taxable year to report his net income on the installment basis, then in computing his income for the year of change or any subsequent year amounts actually received during any such year on account of sales made in any prior year shall not be excluded.

The amendment was agreed to.

The next amendment was, on page 44, line 14, after the word "year," to strike out "1927" and insert "1928"; in line 15, after the words "calendar year," to strike out "1927" and insert "1928"; and in line 16, after the word "year," to strike out "1927" and insert "1928," so as to read:

SEC. 48. DEFINITIONS.

When used in this title—

(a) Taxable year: "Taxable year" means the calendar year, or the fiscal year ending during such calendar year, upon the basis of which the net income is computed under this part. "Taxable year" includes in the case of a return made for a fractional part of a year under the provisions of this title or under regulations prescribed by the commissioner with the approval of the Secretary, the period for which such return is made. The first taxable year, to be called the taxable year 1928, shall be the calendar year 1928 or any fiscal year ending during the calendar year 1928.

Mr. SMOOT. I ask that that amendment go over. The same question is involved as in the last amendment passed over.

The PRESIDING OFFICER. The amendment will be passed over at the request of the Senator from Utah.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 46, line 22, after the word "see," to strike out "section 141" and insert "sections 141 and 142," so as to read:

(b) Consolidated returns: For provision as to consolidated returns of affiliated corporations, see sections 141 and 142.

Mr. SMOOT. That is a clerical change and is covered by the unanimous-consent agreement which has been entered into.

The PRESIDING OFFICER. That change in numbering is covered by the unanimous-consent agreement heretofore entered into.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 53, line 5, after the date "January 1," to strike out "1927" and insert "1928," so as to read:

SEC. 65. EFFECTIVE DATE OF TITLE.

This title shall take effect as of January 1, 1928.

Mr. SMOOT. That amendment should be passed over.

The PRESIDING OFFICER. The amendment will be passed over. The next amendment will be stated.

The LEGISLATIVE CLERK. On page 61, after line 11, it is proposed to insert——

Mr. WALSH of Massachusetts. Did the Senator request that the section relating to consolidated returns go over?

Mr. SMOOT. The provisions relating to consolidated returns when reached will be passed over.

Mr. WALSH of Massachusetts. I thought we had reached the item on page 46, line 21.

Mr. SMOOT. That is a mere renumbering change. The amendment on page 61 does not refer to consolidated returns. It exempts from taxation financing corporations such as the farmers' cooperative and other organizations. The Senator may have the wrong page.

Mr. WALSH of Massachusetts. I had in mind the consolidated returns, which are covered later in the bill.

The PRESIDING OFFICER. The next amendment will be stated.

The CHIEF CLERK. On page 61, after line 11, it is proposed to insert:

(13) Corporations organized by an association exempt under the provisions of paragraph (12), or members thereof, for the purpose of financing the ordinary crop operations of such members or other producers, and operated in conjunction with such association. Exemption shall not be denied any such corporation because it has capital stock, if the dividend rate of such stock is fixed at not to exceed the legal rate of interest in the State of incorporation or 8 per cent per annum, whichever is greater, on the value of the consideration for which the stock was issued, and if substantially all such stock (other than nonvoting preferred stock, the owners of which are not entitled or permitted to participate, directly or indirectly, in the profits of the corporation, upon dissolution or otherwise, beyond the fixed dividends) is owned by such association, or members thereof; nor shall exemption be denied any such corporation because there is accumulated and maintained by it a reserve required by State law or a reasonable reserve for any necessary purpose.

Mr. KING. Mr. President, there is a good deal of merit in this amendment, but I am afraid that its implications are broader than contemplated by the Senator from Mississippi [Mr. HARRISON]. I believe that under this provision corporations so organized may go further than the handling of products of agriculturists who may be members of the corporation; indeed, I am not so sure that corporations may not be formed by capitalists outside of the farmers and for the purpose of handling their products.

Mr. SMOOT. Mr. President, I will say to my colleague that this provision does not affect marketing associations in the least. The corporations covered may have capital stock, but I understood my colleague to say the amendment affected marketing associations. I repeat it has no reference whatever to marketing associations. That provision will be found in another part of the bill.

Mr. KING. What I had in mind was this: I was apprehensive that this provision would permit financing organizations to engage in speculation in the acquisition and sale of agricultural products not produced by members of the financing corporation; that it would permit financing corporations to go into the market in competition with legitimate corporations engaged in the buying and selling of farm products, as many of these organizations do.

Mr. SMOOT. I will call my colleague's attention to the fact that paragraph 13 does not refer to organizations he has in mind. They are covered by paragraph 12, beginning on page 60 of the bill, the page preceding the one on which this amendment is found.

Mr. KING. I know that there is a distinction.

Mr. HARRISON. Let me say to the Senator from Utah that experts say that the situation which the Senator has pictured would not arise under the wording of this amendment. I recall the discussion in the committee. I think then the Senator brought up that suggestion, but the experts framed the provision to take care of such a situation and to avoid it.

Mr. SMOOT. The situation referred to has been taken care of.

Mr. KING. I did not understand that it had been prepared by the experts. I will not object to its being considered now, but upon further examination, if I think there is any ground for the apprehension which I have expressed, I will move to reconsider.

Mr. WALSH of Massachusetts. I should like to ask the junior Senator from Utah upon what theory these organizations are exempted? Is it because they are farming corporations?

Mr. KING. Yes.

Mr. SMOOT. That is all.

Mr. WALSH of Massachusetts. Once we enter upon the policy of allowing exemptions to farm corporations, have we not got to extend it to manufacturing corporations and to other corporations that may be in distress from time to time?

Mr. KING. I do not know where the limit is going to be.

Mr. SMOOT. My colleague knows where it is to-day.

Mr. KING. I may say to my friend from Massachusetts that my attention recently has been called to a corporation or to an association—one of the farm organizations—that in order to destroy any competition agreed to pay to the farmers in the vicinity a higher price for a certain product than the competing private corporation was paying. Obviously it could not succeed, and so it became insolvent, owing to farmers a large amount—several hundred thousand dollars. It started over again; it is a farming organization; and it could go into competition, as stated, with legitimate business enterprises and injure them; and in the long run bring injury to the farmers; and yet it is to be protected by the gracious provisions of an act of Congress. Now we are to permit financing corporations to be organized by the farmers to finance their crops and they are to be exempt from any taxation whatever.

Mr. WALSH of Massachusetts. What influence caused this amendment to be inserted in the bill?

Mr. KING. That of the able Senator from Mississippi [Mr. HARRISON], who was the sponsor for the amendment.

Mr. WALSH of Massachusetts. I am surprised that the able Senator from Mississippi should be held responsible for this amendment. He is usually against special privilege in all forms.

Mr. HARRISON. This is a very appropriate amendment to take care of the farmers.

Mr. WALSH of Massachusetts. Is it limited to cotton-growing farmers?

Mr. HARRISON. No; it covers wheat farmers also.

Mr. FLETCHER. It seems that the members of a corporation, which is exempt under section 12, may go out and form another corporation for the purpose of financing crop operations of such members or other producers. So that if we exempt the one corporation it looks like we might exempt the other.

Mr. HARRISON. That was the theory upon which the amendment was offered.

Mr. WALSH of Massachusetts. Has the amendment gone over?

Mr. KING. No; but there is an understanding that we may reconsider it at any time.

The PRESIDING OFFICER. Without objection the amendment is agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 62, line 18, after "(A)," to strike out "no part of the net earnings of which inures," and insert "no part of their net earnings inures (other than through such payments)"; and in line 23, after the words "purpose of," to strike out "meeting losses and expenses" and insert "making such payments and meeting expenses," so as to read:

(16) Voluntary employees' beneficiary associations providing for the payment of life, sick, accident, or other benefits to the members of such association or their dependents, if (A) no part of their net earnings inures (other than through such payments) to the benefit of any private shareholder or individual, and (B) 85 per cent or more of the income consists of amounts collected from members for the sole purpose of making such payments and meeting expenses;

The amendment was agreed to.

The next amendment was, at the top of page 63, to insert:

(17) Teachers' retirement fund associations of a purely local character, if (A) no part of their net earnings inures (other than through payment of retirement benefits) to the benefit of any private shareholder or individual, and (B) the income consists solely of amounts received from public taxation, amounts received from assessments upon the teaching salaries of members, and income in respect of investments.

The amendment was agreed to.

The next amendment was, on page 63, after line 8, to strike out:

SEC. 104. ACCUMULATION OF SURPLUS TO EVADE SURTAXES—1928 OR SUBSEQUENT TAXABLE YEARS.

(a) Tax on personal holding company: If any personal holding company permits its undistributed profits for the taxable year 1928 or any succeeding taxable year to exceed 30 per cent of the sum of its net income for such year plus the amount of the dividend deduction and interest upon obligations of the United States, there shall be levied, collected, and paid for such taxable year, in addition to the tax on corporations imposed by section 13 (a), a tax equal to 25 per cent of such undistributed profits.

(b) Definitions: As used in this section—

(1) The term "personal holding company" means any corporation if (A) at least 80 per cent of its gross income for the taxable year is derived from rents, royalties, dividends, interest (whether or not tax exempt), annuities, and (except in the case of regular dealers in securities) gains from the sale of securities, and (B) either—

Eighty per cent or more of its voting stock (exclusive of stock limited as to dividends and exclusive of stock redeemable upon less than 30 days' notice) is owned or controlled, directly or indirectly, through affiliation, stock ownership, voting-trust agreements, or otherwise, by or for not more than 10 individuals, or the right to receive 80 per cent or more of the dividends distributed by the corporation is vested, directly or indirectly, through affiliation, stock ownership, voting-trust agreements, or otherwise, in not more than 10 individuals; but such term shall not include any banking or insurance corporation.

(2) The term "dividend deduction" means the deduction specified in section 23 (p).

(3) The term "interest upon obligations of the United States" means interest upon obligations of the United States issued after September 1, 1917, which would be subject to tax in whole or in part in the hands of an individual owner.

(4) The term "undistributed profits" means the net income for the taxable year increased by the amount of the dividend reduction and interest upon obligations of the United States, but diminished by—

(A) The amount of tax under section 13 (a) for the taxable year.

(B) The amount of dividends declared out of earnings or profits for the taxable year, not later than the 15th day of the third month following the close of such taxable year and payable prior to the 15th day of the sixth month following the close of such taxable year. If dividends so declared are not actually paid prior to such date, then the amount not so paid shall be included in the undistributed profits and the tax imposed by subsection (a) shall be redetermined in accordance therewith.

(c) Tax on corporation formed or availed of to evade surtax: If any corporation, however created or organized, other than a personal holding company, is formed or availed of for the purpose of preventing the imposition of the surtax upon any of its shareholders through the medium of permitting its gains and profits to remain accumulated, instead of being divided or distributed among its shareholders, there shall be levied, collected, and paid for the taxable year 1928 and succeeding taxable years in addition to the tax on corporations imposed by section 13 (a), a tax of 25 per cent of the net income of the corporation increased by the amount of the dividend deduction and interest upon obligations of the United States. Such tax shall be computed, levied, collected, and paid upon the same basis and in the same manner and subject to the same provisions of law, including penalties, as that tax. The following shall be prima facie evidence that a corporation, other than a "personal holding company" as hereinbefore defined, is formed or availed of for the purpose of preventing the imposition of surtax upon any of its shareholders:

(1) That the corporation is a mere holding or investment company; or

(2) That the gains or profits are permitted to remain accumulated beyond the reasonable needs of the business. In determining whether gains or profits are permitted to remain accumulated beyond the reasonable needs of the business there shall not be included gains or profits remaining accumulated during a prior taxable year for which the corporation has paid a tax imposed by this section.

(d) Information statements: A corporation which in the taxable year 1928 or any succeeding taxable year permits the accumulation of more than 60 per cent of its net income increased by the amount of the dividend deduction, and interest upon obligations of the United States, under regulations to be prescribed by the commissioner with the approval of the Secretary, shall (1) file as a part of its return a statement giving in detail the reasons for the accumulation and the purposes to which the amounts accumulated are to be devoted, and (2) from time to time thereafter, file reports under oath giving the disposition of the amounts so accumulated until all such amounts have been accounted for.

(e) Optional tax on shareholders: The tax imposed by subsection (a) shall not apply in respect of any taxable year if all the shareholders of the corporation include in their gross income, at the time of filing their returns, the amount of their entire distributive shares of the undistributed profits of the corporation for such taxable year. The tax imposed by subsection (c) shall not apply in respect of any taxable year if all the shareholders of the corporation include in their gross income at the time of filing their returns, the amount of their entire distributive shares of the gains and profits remaining accumulated beyond the reasonable needs of the business as determined by the commissioner. Any amount so included in the gross income of the shareholder shall be treated as a dividend received by the shareholder. A shareholder who has so included in his gross income his distributive share shall be entitled to receive exempt from tax subsequent distributions made by the corporation out of earnings or profits until such taxpayer has received exempt distributions in the amount of such share.

Mr. KING. I ask that that amendment go over.

The PRESIDING OFFICER. The amendment will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 68, lines 5 to 7, in the heading, to strike out "105. Accumulation of surplus to evade surtaxes—taxable year 1927" and insert "104. Accumulation of surplus to evade surtaxes," so as to read:

SEC. 104. ACCUMULATION OF SURPLUS TO EVADE SURTAXES.

Mr. KING. Let that amendment go over.

The PRESIDING OFFICER. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 68, line 13, after the word "for," to strike out "the taxable year 1927" and insert "each taxable year," so as to read:

(a) If any corporation, however created or organized, is formed or availed of for the purpose of preventing the imposition of the surtax upon its shareholders through the medium of permitting its gains and profits to accumulate instead of being divided or distributed, there shall be levied, collected, and paid for each taxable year upon the net income of such corporation a tax equal to 50 per cent of the amount thereof, which shall be in addition to the tax imposed by section 13, and shall be

computed, collected, and paid upon the same basis and in the same manner and subject to the same provisions of law, including penalties, as that tax.

Mr. KING. I ask that that amendment go over.

The PRESIDING OFFICER. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 74, line 23, after the word "corporation," to insert "accumulated after February 28, 1913," so as to read:

(2) If a distribution made in pursuance of a plan of reorganization is within the provisions of paragraph (1) of this subsection, but has the effect of the distribution of a taxable dividend, then there shall be taxed as a dividend to each distributee such an amount of the gain recognized under paragraph (1) as is not in excess of his ratable share of the undistributed earnings and profits of the corporation accumulated after February 28, 1913. The remainder, if any, of the gain recognized under paragraph (1) shall be taxed as a gain from the exchange of property.

The amendment was agreed to.

The next amendment was, on page 79, line 19, after the word "made," to strike out the period and "The provisions of this paragraph and of paragraph (2) shall not apply to the acquisition of such property interests as are specified in section 402(c) or (e) of the revenue act of 1921, or in section 302(c) or (f) of the revenue act of 1924 or the revenue act of 1926 (relating to transfers in contemplation of or intended to take effect at or after death, and to property passing under power of appointment)," so as to read:

(3) Transfer in trust after December 31, 1920: If the property was acquired after December 31, 1920, by a transfer in trust (other than by a transfer in trust by a bequest or devise) the basis shall be the same as it would be in the hands of the grantor, increased in the amount of gain or decreased in the amount of loss recognized to the grantor upon such transfer under the law applicable to the year in which the transfer was made.

Mr. WALSH of Massachusetts. What is the purpose of that amendment?

Mr. SMOOT. That has to do with the basis of determining gain or loss in the case of transfers in trust.

Mr. KING. It does not affect the question of taxing gifts or estates?

Mr. SMOOT. No; not at all.

Mr. KING. It does not involve that directly or indirectly?

Mr. SMOOT. No; it does not.

Mr. KING. It would involve the taxing of gifts, would it not?

Mr. SMOOT. It changes the measure of the tax. I will say to the Senator that we are not taxing gifts under this provision. If the Senator desires the amendment to go over, I am perfectly willing to have it go over.

Mr. WALSH of Massachusetts. Will the Senator state what the amendment does? It strikes out some of the provisions of the present law.

Mr. SMOOT. The committee report gives rather an extended explanation, and I will read from it.

It appears that the House bill is inadequate to take care of a number of situations which frequently arise. For example, the executor, pursuant to the terms of the will, may purchase property and distribute it to the beneficiaries, in which case it is impossible to use the value at the decedent's death as the basis for determining subsequent gain or loss, for the decedent never owned the property. Moreover, the fair market value of the property at the decedent's death can not properly be used as the basis, in the case of property transferred in contemplation of death where the donee sells the property while the donor is living.

Accordingly, the committee has revised section 113 (a) (5) and certain related sections, so as to provide that in the case of a specific bequest of personalty or a general or specific devise of realty, or the transmission of realty by intestacy, the basis shall be the fair market value at the time of the death of the decedent. In these cases it may be said, as a matter of substance, that the property for all practical purposes vests in the beneficiary immediately upon the decedent's death, and therefore the value at the date of death is a proper basis for the determination of gain or loss to the beneficiary. The same rule is applied to real and personal property transmitted by the decedent, where the sale is made by the executor. In all other cases the basis is the fair market value of the property at the time of the distribution to the taxpayer. The latter rule would obtain, for example, in the case of personal property not transmitted to the beneficiary by specific bequest, but by general bequest or by intestacy. It would also apply in cases where the executor purchases property and distributes it to the beneficiary.

Section 113 (a) (4) is amended so as to provide that the basis in the case of property passing under power of appointment, regardless of the time of acquisition, shall be the fair market value on the date of acquisition, which is the rule of the present law and of the House bill.

Section 113 (a) (3) is amended by striking out the last sentence of the House bill, with the effect of including within the paragraph all classes of transfers in trust made after December 31, 1920 (even if made in contemplation of death or to take effect in possession or enjoyment at or after death). The basis thus provided is the basis the property would have in the hands of the grantor, adjusted for gain or loss recognized to the grantor when the transfer was made.

The effect of striking out the last sentence of section 113 (a) (3) is also to make the basis in the case of gifts in contemplation of death or to take effect in possession or enjoyment at or after death, if made after December 31, 1920, the same as the basis which the property would have in the hands of the donor or the last preceding owner by whom it was not acquired by gift.

This provision is intended to cover such a case as that.

Mr. WALSH of Massachusetts. Does the Treasury Department recommend it?

Mr. SMOOT. The Treasury Department recommends it. It is a Treasury amendment.

The PRESIDING OFFICER. The amendment will go over.

The reading of the bill was resumed.

The next amendment was, on page 80, line 7, after the word "such," to strike out "acquisition;" and insert "acquisition. The provisions of this paragraph shall apply to the acquisition of such property interests as are specified in section 402(e) of the revenue act of 1921, or in section 302(f) of the revenue act of 1924 or the revenue act of 1926 (relating to property passing under power of appointment) regardless of the time of acquisition," so as to read:

(4) Gift or transfer in trust before January 1, 1921: If the property was acquired by gift or transfer in trust on or before December 31, 1920, the basis shall be the fair market value of such property at the time of such acquisition. The provisions of this paragraph shall apply to the acquisition of such property interests as are specified in section 402(e) of the revenue act of 1921, or in section 302(f) of the revenue act of 1924, or the revenue act of 1926 (relating to property passing under power of appointment) regardless of the time of acquisition.

Mr. KING. Mr. President, the amendments found on page 80, commencing with line 3, and page 81, commencing on line 1 and ending with line 11, relate to the matter which it was just suggested should go over; and I ask that they go over.

Mr. SMOOT. I will say to my colleague that these amendments refer only to gifts in contemplation of death. Of course, if he wants them to go over, I am perfectly willing.

Mr. KING. They have some relation to the same subject.

The PRESIDING OFFICER. The amendments will go over.

Mr. WALSH of Massachusetts. All that appears to have been done there is to strike out part of section 3 on page 79, and attach it to section 4 on page 80. It is just a transposition; is it not?

Mr. SMOOT. No; I will say to the Senator that the effect of this is to change it to the highest market value of such property at the time of such acquisition. That is the substance of the amendment; but if the Senator will get the report, on page 26, it goes into detail. I did not read it all. The Senator asked that it go over.

Mr. WALSH of Massachusetts. Very well.

The PRESIDING OFFICER. The amendment will go over.

The following amendment, also passed over, was, on page 80, line 14, after the word "death," to strike out "If the property was acquired by bequest, devise, or inheritance, or by a decedent's estate from the decedent, the basis shall be the fair market value of such property at the time of the death of the decedent. The provisions of this paragraph shall apply to the acquisition of such property interests as are specified in section 402 (c) or (e) of the revenue act of 1921, or in section 302 (c) or (f) of the revenue act of 1924 or the revenue act of 1926 (relating to transfers in contemplation of or intended to take effect at or after death, and to property passing under power of appointment)" and insert "If personal property was acquired by specific bequest, or if real property was acquired by general or specific devise or by intestacy, the basis shall be the fair market value of the property at the time of the death of the decedent. If the property was acquired by the decedent's estate from the decedent, the basis in the hands of the estate shall be the fair market value of the property at the time of the death of the decedent. In all other cases if the property was acquired either by will or by intestacy, the basis shall be the fair market value of the property at the time of the distribution to the taxpayer," so as to read:

(5) Property transmitted at death: If personal property was acquired by specific bequest, or if real property was acquired by general

or specific devise or by intestacy, the basis shall be the fair market value of the property at the time of the death of the decedent. If the property was acquired by the decedent's estate from the decedent, the basis in the hands of the estate shall be the fair market value of the property at the time of the death of the decedent. In all other cases if the property was acquired either by will or by intestacy, the basis shall be the fair market value of the property at the time of the distribution to the taxpayer;

The PRESIDING OFFICER. As requested, this amendment also will be passed over.

The next amendment was, on page 85, line 15, after the word "was," to strike out the word "made" and insert "made, nor any taxable year after the taxable year 1928. The basis in case of property acquired by a corporation during any period, in the taxable year 1929 or any subsequent taxable year, in respect of which a consolidated return is made by such corporation under section 141 of this act, shall be determined in accordance with regulations prescribed under section 141(b)," so as to read:

(12) Property acquired during affiliation: In the case of property acquired by a corporation, during a period of affiliation, from a corporation with which it was affiliated, the basis of such property, after such period of affiliation, shall be determined, in accordance with regulations prescribed by the commissioner with the approval of the Secretary, without regard to inter-company transactions in respect of which gain or loss was not recognized. For the purposes of this paragraph, the term "period of affiliation" means the period during which such corporations were affiliated (determined in accordance with the law applicable thereto), but does not include any taxable year beginning on or after January 1, 1922, unless a consolidated return was made, nor any taxable year after the taxable year 1928. The basis in case of property acquired by a corporation during any period, in the taxable year 1929 or any subsequent taxable year, in respect of which a consolidated return is made by such corporation under section 141 of this act, shall be determined in accordance with regulations prescribed under section 141(b).

The amendment was agreed to.

The next amendment was, on page 88, line 17, after the word "profits," to insert "accumulated after February 28, 1913," so as to read:

SEC. 115. DISTRIBUTIONS BY CORPORATIONS.

(a) Definition of dividend: The term "dividend" when used in this title (except in section 203 (a) (4) and section 208 (c) (1), relating to insurance companies) means any distribution made by a corporation to its shareholders, whether in money or in other property, out of its earnings or profits accumulated after February 28, 1913.

The amendment was agreed to.

The next amendment was, on page 88, line 21, after the word "profits," to insert "Any earnings or profits accumulated, or increase in value of property accrued, before March 1, 1913, may be distributed exempt from tax, after the earnings and profits accumulated after February 28, 1913, have been distributed, but any such tax-free distribution shall be applied against and reduce the basis of the stock provided in section 113," so as to read:

(b) Source of distributions: For the purposes of this act every distribution is made out of earnings or profits to the extent thereof, and from the most recently accumulated earnings or profits. Any earnings or profits accumulated, or increase in value of property accrued, before March 1, 1913, may be distributed exempt from tax, after the earnings and profits accumulated after February 28, 1913, have been distributed, but any such tax-free distribution shall be applied against and reduce the basis of the stock provided in section 113.

Mr. WALSH of Massachusetts. That is rather an important amendment, is it not?

Mr. SMOOT. I will say that that is restoring the present law in cases such as timberlands and other matters of that nature.

Mr. WALSH of Massachusetts. I understand now.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 89, line 21, after the word "shareholders," to insert "is not out of increase in value of property accrued before March 1, 1913, and," so as to read:

(d) Other distributions from capital: If any distribution (not in partial or complete liquidation) made by a corporation to its shareholders is not out of increase in value of property accrued before March 1, 1913, and is not out of earnings or profits, then the amount of such distribution shall be applied against and reduce the basis of the stock provided in section 113, and if in excess of such basis, such excess shall be taxable in the same manner as a gain from the sale or exchange of property. The provisions of this subsection shall also apply to distributions from depletion reserves based on the discovery value of mines.

Mr. SMOOT. That is the 1913 valuation.

The amendment was agreed to.

The next amendment was, on page 90, line 24, after the word "profits," to insert "accumulated after February 28, 1913," so as to read:

(g) Redemption of stock: If a corporation cancels or redeems its stock (whether or not such stock was issued as a stock dividend) at such time and in such manner as to make the distribution and cancellation or redemption in whole or in part essentially equivalent to the distribution of a taxable dividend, the amount so distributed in redemption or cancellation of the stock, to the extent that it represents a distribution of earnings or profits accumulated after February 28, 1913, shall be treated as a taxable dividend. In the case of the cancellation or redemption of stock not issued as a stock dividend this subsection shall apply only if the cancellation or redemption is made after January 1, 1926.

The amendment was agreed to.

The next amendment was, on page 91, line 24, after "(b)," to strike out "Teachers in" and insert "Officers and employees of"; and in line 25, after the word "an," to strike out "individual employed by Alaska or Hawaii or any political subdivision thereof as a teacher in any educational institution," and insert "officer or employee of Alaska or Hawaii or any political subdivision thereof," so as to read:

(b) Officers and employees of Alaska and Hawaii: In the case of an officer or employee of Alaska or Hawaii or any political subdivision thereof, the compensation received as such. This subsection shall not exempt compensation paid directly or indirectly by the Government of the United States.

The amendment was agreed to.

The next amendment was, on page 92, line 23, after the word "Territory," to strike out "prior to September 8, 1916," and insert "enters or has," so as to read:

(d) Income of States, municipalities, etc.: Income derived from any public utility or the exercise of any essential governmental function and accruing to any State, Territory, or the District of Columbia, or any political subdivision of a State or Territory, or income accruing to the Government of any possession of the United States, or any political subdivision thereof.

Whenever any State, Territory, or the District of Columbia, or any political subdivision of a State or Territory enters or has entered in good faith into a contract with any person, the object and purpose of which is to acquire, construct, operate, or maintain a public utility.

The amendment was agreed to.

The next amendment was, on page 97, line 18, after the word "for," to strike out "1925 or 1926" and insert "1926 or 1927"; and in line 19, after the word "year," to strike out "1925 or 1926" and insert "1926 or 1927," so as to read:

(e) Net loss for 1926 or 1927: If for the taxable year 1926 or 1927 a taxpayer sustained a net loss within the provisions of the revenue act of 1926, the amount of such net loss shall be allowed as a deduction in computing net income for the two succeeding taxable years to the same extent and in the same manner as a net loss sustained for one taxable year is, under this act, allowed as a deduction for the two succeeding taxable years.

Mr. SMOOT. Let that amendment go over.

Mr. KING. Let it go over.

The PRESIDING OFFICER. The amendment will go over.

The next amendment was, on page 111, line 4, after the words "beginning in," to strike out "1926" and insert "1927"; and in the same line, after the words "ending in," to strike out "1927" and insert "1928," so as to read:

SEC. 132. PAYMENTS UNDER 1926 ACT.

Any amount paid before or after the enactment of this act on account of the tax imposed for a fiscal year beginning in 1927 and ending in 1928 by Title II of the revenue act of 1926 shall be credited toward the payment of the tax imposed for such fiscal year by this act, and if the amount so paid exceeds the amount of such tax imposed by this act, the excess shall be credited or refunded in accordance with the provisions of section 322.

Mr. SMOOT and Mr. FLETCHER. Let that go over.

The PRESIDING OFFICER. The amendment will go over.

The next amendment was, under the subhead "Supplement D—Returns and payment of tax," on page 111, after line 11, to insert:

SEC. 141. CONSOLIDATED RETURNS OF CORPORATIONS—1929 AND SUBSEQUENT TAXABLE YEARS.

(a) Privilege to file consolidated returns: An affiliated group of corporations shall, subject to the provisions of this section, have the privi-

lege of making a consolidated return for the taxable year 1929 or any subsequent taxable year, in lieu of separate returns. The making of a consolidated return shall be upon the condition that all the corporations which have been members of the affiliated group at any time during the taxable year for which the return is made consent to all the regulations under subsection (b) prescribed prior to the making of such return; and the making of a consolidated return shall be considered as such consent. In the case of a corporation which is a member of the affiliated group for a fractional part of the year the consolidated return shall include the income of such corporation for such part of the year as it is a member of the affiliated group.

(b) Regulations: The commissioner, with the approval of the Secretary, shall prescribe such regulations as he may deem necessary in order that the tax liability of an affiliated group of corporations making a consolidated return and of each corporation in the group, both during and after the period of affiliation, may be determined, computed, assessed, collected, and adjusted in such manner as clearly to reflect the income and to prevent avoidance of tax liability.

(c) Computation and payment of tax: In any case in which a consolidated return is made the tax shall be determined, computed, assessed, collected, and adjusted in accordance with the regulations under subsection (b) prescribed prior to the date on which such return is made. Only one specific credit, computed as provided in section 26 (b), shall be allowed in computing the tax.

(d) Definition of "affiliated group": As used in this section an "affiliated group" means one or more chains of corporations connected through stock ownership with a common parent corporation if—

(1) At least 95 per cent of the stock of each of the corporations—except the common parent corporation—is owned directly by one or more of the other corporations; and

(2) The common parent corporation owns directly at least 95 per cent of the stock of at least one of the other corporations.

As used in this subsection the term "stock" does not include nonvoting stock which is limited and preferred as to dividends.

(e) A consolidated return shall be made only for the domestic corporations within the affiliated group and only for corporations the net income of which is computed under the same provisions of law.

(f) China trade act corporations: A corporation organized under the China trade act, 1922, shall not be deemed to be affiliated with any other corporation within the meaning of this section.

(g) Corporations deriving income from possessions of United States: For the purposes of this section a corporation entitled to the benefits of section 251, by reason of receiving a large percentage of its income from possessions of the United States, shall be treated as a foreign corporation.

(h) Subsidiary formed to comply with foreign law: In the case of a domestic corporation owning or controlling, directly or indirectly, 100 per cent of the capital stock (exclusive of directors' qualifying shares) of a corporation organized under the laws of a contiguous foreign country and maintained solely for the purpose of complying with the laws of such country as to title and operation of property, such foreign corporation may, at the option of the domestic corporation, be treated for the purpose of this title as a domestic corporation.

(i) Suspension of running of statute of limitations: If a notice under section 272(a) in respect of a deficiency for any taxable year is mailed to a corporation, the suspension of the running of the statute of limitations provided in section 277 shall apply in the case of corporations with which such corporation made a consolidated return for such taxable year.

(j) Allocation of income and deductions: For allocation of income and deductions of related trades or businesses, see section 45.

Mr. KING. May I say to my colleague that I think some explanation will be sought of that amendment, and we will make no time by accepting it now. An explanation will have to come later.

Mr. SMOOT. I think it was unanimously favored by the committee. If my colleague will allow it to be agreed to at this time, if he wants to revert to it later we shall be glad to do so.

Mr. KING. There is no objection to that.

The PRESIDING OFFICER. Without objection, the amendment will be agreed to on that basis.

The next amendment was, on page 114, line 16, to omit the heading "Sec. 141. Consolidated returns of corporations" and to insert in lieu thereof "Sec. 142. Consolidated returns of corporations—taxable year 1928."

The amendment was agreed to.

The next amendment was, on page 114, line 21, after the word "year," to strike out "1927 or."

The amendment was agreed to.

The next amendment was, on page 115, line 1, after the words "such return," to strike out "If return for the taxable year 1926 was made, or if return for the taxable year 1927 is made, on either of such bases, returns for the taxable years 1927 and 1928, or for the taxable year 1928, as the case may be, shall be upon the same basis unless permission to change the basis is granted by the commissioner" and insert "If return for the taxable year 1927 was made upon either of such bases, return for the taxable year 1928 shall be upon the same basis unless permission to change the basis is granted by the commissioner," so as to read:

SEC. 142. CONSOLIDATED RETURNS OF CORPORATIONS—TAXABLE YEAR 1928.

(a) Consolidated returns permitted: Corporations which are affiliated within the meaning of this section may, for the taxable year 1928, make separate returns or, under regulations prescribed by the commissioner with the approval of the Secretary, make a consolidated return of net income for the purpose of this title, in which case the taxes thereunder shall be computed and determined upon the basis of such return. If return for the taxable year 1927 was made upon either of such bases, return for the taxable year 1928 shall be upon the same basis unless permission to change the basis is granted by the commissioner.

Mr. KING. Mr. President, I presume that amendment should go over. It affects the question of retroactivity.

Mr. SMOOT. I will say to my colleague that that is exactly the same thing that we agreed to earlier in the bill. It is only carrying it out. We have to have this amendment in the bill if we are going to pass this legislation at all. It is only in conformity with what has been heretofore done.

Mr. KING. I agree with the Senator that this will be a necessary complement to the preceding section; but it may relate to the question of retroactivity.

Mr. SMOOT. We will go back to the whole subject, I will say to my colleague, if he desires, at any time. We will take up any part of the subject.

Mr. KING. I have no objection to agreeing to the amendment with that understanding.

The amendment was agreed to.

The next amendment was, on page 116, line 17, after the word "year," to strike out "1927 or," so as to read:

(f) Suspension of running of statute of limitations: If a notice under section 272(a) in respect of a deficiency for the taxable year 1928 is mailed to a corporation, the suspension of the running of the statute of limitations, provided in section 277, shall apply in the case of corporations with which such corporation made a consolidated return for such taxable year.

The amendment was agreed to.

The next amendment was, on page 118, line 14, after the word "of," to strike out "this title" and insert "law," so as to read:

(c) Law applicable to fiduciaries: Any fiduciary required to make a return under this title shall be subject to all the provisions of law which apply to individuals.

The amendment was agreed to.

The next amendment was, on page 119, line 18, after "(B)," to strike out "11½ per cent" and insert "12½ per cent," so as to read:

SEC. 144. WITHHOLDING OF TAX AT SOURCE.

(a) Tax-free covenant bonds: (1) Requirement of withholding: In any case where bonds, mortgages, or deeds of trust, or other similar obligations of a corporation contain a contract or provision by which the obligor agrees to pay any portion of the tax imposed by this title upon the obligee, or to reimburse the obligee for any portion of the tax, or to pay the interest without deduction for any tax which the obligor may be required or permitted to pay thereon, or to retain therefrom under any law of the United States, the obligor shall deduct and withhold a tax equal to 2 per cent of the interest upon such bonds, mortgages, deeds of trust, or other obligations, whether such interest is payable annually or at shorter or longer periods, if payable to an individual, a partnership, or a foreign corporation not engaged in trade or business within the United States and not having any office or place of business therein: *Provided*, That if the liability assumed by the obligor does not exceed 2 per cent of the interest, then the deduction and withholding shall, after the date of the enactment of this act, be at the following rates: (A) 5 per cent in the case of a nonresident alien individual, or of any partnership not engaged in trade or business within the United States and not having any office or place of business therein and composed in whole or in part of nonresident aliens, (B) 12½ per cent in the case of such a foreign corporation, and (C) 2 per cent in the case of other individuals and partnerships:

Mr. SMOOT. That is a rate, Mr. President. Let it go over.

Mr. WALSH of Massachusetts. I ask to have it go over.

The PRESIDING OFFICER. The amendment will go over.

Mr. WALSH of Massachusetts. Mr. President, I desire to call attention to the fact that a great many of these administrative changes that have been made by the committee met with no opposition from the minority; and I want to compliment the chairman of the committee, and the experts who have advised the committee, upon giving us a bill which I think is very far superior to the House bill. I think the improvements that have

been made in the administrative features are, in the main, very satisfactory, and constitute a great improvement over the House bill.

The next amendment was, on page 123, line 8, after the word "section," to strike out "143" and insert "144," and in line 10, after the word "to," to strike out "11½ per cent" and insert "12½ per cent," so as to read:

SEC. 145. PAYMENT OF CORPORATION INCOME TAX AT SOURCE.

In the case of foreign corporations subject to taxation under this title not engaged in trade or business within the United States and not having any office or place of business therein, there shall be deducted and withheld at the source in the same manner and upon the same items of income as is provided in section 144 a tax equal to 13½ per cent thereof in respect of all payments of income made before the enactment of this act, and equal to 12½ per cent thereof in respect of all payments of income made after the enactment of this act, and such tax shall be returned and paid in the same manner and subject to the same conditions as provided in that section: *Provided*, That in the case of interest described in subsection (a) of that section (relating to tax-free covenant bonds) the deduction and withholding shall be at the rate specified in such subsection.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The amendment will go over.

The next amendment was, on page 127, line 17, after the word "section," to strike out "148 (a) or 149" and insert "149 (a) or 150," so as to read:

SEC. 148. INFORMATION AT SOURCE.

(a) Payments of $1,500 or more: All persons, in whatever capacity acting, including lessees or mortgagors of real or personal property, fiduciaries, and employers, making payment to another person of interest, rent, salaries, wages, premiums, annuities, compensations, remunerations, emoluments, or other fixed or determinable gains, profits, and income (other than payments described in section 149 (a) or 150), of $1,500 or more in any taxable year, or, in the case of such payments made by the United States, the officers or employees of the United States having information as to such payments and required to make returns in regard thereto by the regulations hereinafter provided for, shall render a true and accurate return to the commissioner, under such regulations and in such form and manner and to such extent as may be prescribed by him with the approval of the Secretary, setting forth the amount of such gains, profits, and income, and the name and address of the recipient of such payment.

The amendment was agreed to.

The next amendment was, on page 131, line 16, after the word "section," to strike out "142" and insert "143," so as to read:

(b) Computation and payment: The tax shall be computed upon the net income of the estate or trust, and shall be paid by the fiduciary, except as provided in section 166 (relating to revocable trusts) and section 167 (relating to income for benefit of the grantor). For return made by beneficiary, see section 143.

The amendment was agreed to.

The next amendment was, on page 140, line 23, after the word "company," to strike out "11½ per cent" and insert "12½ per cent"; and in line 25, after the word "company," to strike out "11½ per cent" and insert "12½ per cent," so as to read:

SEC. 201. TAX ON LIFE INSURANCE COMPANIES.

(a) Definition: When used in this title the term "life insurance company" means an insurance company engaged in the business of issuing life insurance and annuity contracts (including contracts of combined life, health, and accident insurance), the reserve funds of which held for the fulfillment of such contracts comprise more than 50 per cent of its total reserve funds.

(b) Rate of tax: In lieu of the tax imposed by section 13, there shall be levied, collected, and paid for each taxable year upon the net income of every life insurance company a tax as follows:

(1) In the case of a domestic life insurance company, 12½ per cent of its net income.

(2) In the case of a foreign life insurance company, 12½ per cent of its net income from sources within the United States.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The amendment goes over.

The next amendment was, on page 146, line 2, after the word "company," to strike out "11½ per cent" and insert "12½ per cent"; and in line 5, after the word "company," to strike out "11½ per cent" and insert "12½ per cent," so as to read:

SEC. 204. INSURANCE COMPANIES OTHER THAN LIFE OR MUTUAL.

(a) Imposition of tax: In lieu of the tax imposed by section 13 of this title, there shall be levied, collected, and paid for each taxable year upon the net income of every insurance company (other than a life or mutual insurance company) a tax as follows:

(1) In the case of such a domestic insurance company, 12½ per cent of its net income;

(2) In the case of such a foreign insurance company, 12½ per cent of its net income from sources within the United States.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The amendment will go over.

The next amendment was, on page 154, line 3, before the word "individual," to insert "alien," so as to read:

SEC. 212. GROSS INCOME.

(a) General rule: In the case of a nonresident alien individual gross income includes only the gross income from sources within the United States.

The amendment was agreed to.

The next amendment was, on page 157, at the end of line 17, to strike out "143" and insert "144," so as to read:

(b) Withholding at source: For withholding at source of tax on income of nonresident aliens, see section 144.

The amendment was agreed to.

The next amendment was, on page 159, at the end of line 25, to strike out "143" and insert "144," so as to read:

(b) Withholding at source: For withholding at source of tax on income of foreign corporations, see section 144.

The amendment was agreed to.

The next amendment was, on page 160, at the end of line 7, to insert "or 142," so as to read:

SEC. 238. AFFILIATION.

A foreign corporation shall not be deemed to be affiliated with any other corporation within the meaning of section 141 or 142.

The amendment was agree to.

The next amendment was, on page 163, at the end of line 4, to insert "or 142," so as to read:

(b) Affiliation: A corporation entitled to the benefits of this section shall not be deemed to be affiliated with any other corporation within the meaning of section 141 or 142.

The amendment was agreed to.

The next amendment was, on page 166, at the end of line 4, to insert "or 142," so as to read:

SEC. 263. AFFILIATION.

A corporation organized under the China trade act, 1922, shall not be deemed to be affiliated with any other corporation within the meaning of section 141 or 142.

The amendment was agreed to.

The next amendment was, on page 179, line 8, after the word "before," to strike out "or after"; and in line 9, after the word "before," to strike out "or after," so as to read:

(b) Waivers: Where before the expiration of the time prescribed in section 275 for the assessment of the tax, both the commissioner and the taxpayer have consented in writing to its assessment after such time, the tax may be assessed at any time prior to the expiration of the period agreed upon. The period so agreed upon may be extended by subsequent agreements in writing made before the expiration of the period previously agreed upon.

The amendment was agreed to.

The next amendment was, on page 179, line 18, after the word "before," to strike out "or after"; and in line 21, after the word "before," to strike out "or after," so as to read:

(c) Collection after assessment: Where the assessment of any income tax imposed by this title has been made within the period of limitation properly applicable thereto, such tax may be collected by distraint or by a proceeding in court, but only if begun (1) within six years after the assessment of the tax, or (2) prior to the expiration of any period for collection agreed upon in writing by the commissioner and the taxpayer before the expiration of such six-year period. The period so agreed upon may be extended by subsequent agreements in writing made before the expiration of the period previously agreed upon.

The amendment was agreed to.

The next amendment was, on page 186, at the end of line 5, to strike out "146" and insert "147," so as to read:

SEC. 299. REMOVAL OF PROPERTY OR DEPARTURE FROM UNITED STATES.

For additions to tax in case of leaving the United States or concealing property in such manner as to hinder collection of the tax, see section 147.

The amendment was agreed to.

The next amendment was, on page 187, line 13, after the word "preceding," to strike out "transferee" and insert "transferee, but only if within three years after the expiration of the period of limitation for assessment against the taxpayer," so as to read:

(b) Period of limitation: The period of limitation for assessment of any such liability of a transferee or fiduciary shall be as follows:

(1) In the case of the liability of an initial transferee of the property of the taxpayer—within one year after the expiration of the period of limitation for assessment against the taxpayer;

(2) In the case of the liability of a transferee of a transferee of the property of the taxpayer—within one year after the expiration of the period of limitation for assessment against the preceding transferee, but only if within three years after the expiration of the period of limitation for assessment against the taxpayer—

Mr. McKELLAR. Mr. President, may I ask the chairman of the committee why three years are given on page 187?

Mr. FLETCHER. Does that extend the time of the present law?

Mr. SMOOT. No; that is a limitation, Mr. President. We limit it to three years.

Mr. McKELLAR. What is it now?

Mr. SMOOT. It is an indefinite time now.

Mr. McKELLAR. I was wondering why this time should be so long as three years. It is a very bad practice to hold these things open.

Mr. SMOOT. As I stated before when the bill was up, if it is made any less than that, it will hurt the taxpayer. He will not have his chance. The Government would have every advantage in the world of him; and we certainly want to give him three years here in order at least to have his case presented. I will say to the Senator that it is all in the hands of the taxpayer.

The PRESIDING OFFICER. The question is on agreeing to the agreement.

The amendment was agreed to.

The next amendment was, on page 192, line 17, after the word "section," to strike out "143" and insert "144," so as to read:

(e) Tax withheld at source: For refund or credit in case of excessive withholding at the source, see section 144(f).

The amendment was agreed to.

The next amendment was, on page 194, after line 16, to insert the following:

SEC. 404. CREDIT OF GIFT TAX.

Section 322 of the revenue act of 1924 (relating to the credit of gift tax against estate tax where the amount of the gift is required to be included in the gross estate of the decedent) is revived as of January 1, 1926 (the effective date of its repeal by the revenue act of 1926). Such section shall also be applied in the case of the estate tax imposed by Title III of the revenue act of 1926, in the same manner and to the same extent as in the case of the estate tax imposed by Title III of the revenue act of 1924.

Mr. KING. Mr. President, it is my present intention to offer an amendment dealing with gift taxes.

The PRESIDING OFFICER. This amendment will go over.

Mr. KING. I believe that people who receive gifts ought to be taxed, and I am offering an amendment also to the estate taxes.

Mr. GEORGE. Mr. President, I was about to say to the Senator that this amendment would not interfere with that. This section merely permits a credit where a tax has been paid upon a gift.

Mr. SMOOT. The Senator is perfectly right. It has no connection whatever with the legislation that the Senator mentions.

Mr. KING. It is not intended in any way to prevent the imposition of a tax upon gifts?

Mr. GEORGE. Not at all.

Mr. HARRISON. It prevents the payment of the estate tax and the gift tax, too.

Mr. GEORGE. On the same item; that is all.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 195, line 11, after the word "is," to strike out "$1 or less" and insert "$3 or less"; and in line 23, after the word "is," to strike out "$1 or less" and insert "$3 or less," so as to read:

PART II. TAX ON ADMISSIONS AND DUES

SEC. 411. ADMISSIONS TAX.

(a) The first two paragraphs of section 500 of the revenue act of 1926 are amended to read as follows:

"SEC. 500 (a). There shall be levied, assessed, collected, and paid—

"(1) A tax of 1 cent for each 10 cents or fraction thereof of the amount paid for admission to any place, including admission by season ticket or subscription, to be paid by the person paying for such admission; except that in case the amount paid for admission is $3 or less no tax shall be imposed, and except that in case of admission to a prize fight, or boxing, sparring, or other pugilistic match or exhibition, for which the amount paid for admission is $5 or more, the tax shall be 25 per cent of such amount: *Provided*, That an equivalent tax shall be collected on all free or complimentary tickets or admissions to such prize fight, or boxing, sparring, or other pugilistic match or exhibition, and the tax shall be on the amount for which a similar seat or box is sold at the said match or exhibition. Amounts paid for admission by season ticket or subscription shall be exempt only if the amount which would be charged to the holder or subscriber for a single admission is $3 or less."

(b) Subsection (a) of this section shall take effect on the expiration of 30 days after the enactment of this act.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The amendment will go over.

Mr. SMOOT. The question asked by the Senator from Massachusetts is as to the committee's reason for agreeing to the amendment on page 195, line 11.

Mr. HARRISON. I understood that that was to go over.

Mr. SMOOT. It is to go over.

The PRESIDING OFFICER. The amendment on page 195 has gone over.

Mr. SMOOT. Shall I proceed with my explanation?

Mr. FLETCHER. I think it should be explained.

Mr. SMOOT. I will explain it, if the Senator wishes.

Mr. WALSH of Massachusetts. I thank the Senator.

Mr. SMOOT. The present law provides a tax of 10 per cent upon all admission dues of over 75 cents. The House increased that minimum to $1. The Finance Committee increased it to $3, and that will take out the spoken drama in every place except one or two of the cities in the United States, and all taxes, perhaps, with the exception of the tax on admissions to high-priced operas and prize fights.

Mr. HARRISON. Prize fights are provided for elsewhere.

Mr. SMOOT. There is a provision in the bill as it passed the House, as well as in the Senate committee bill, imposing a tax of 25 per cent on admissions to prize fights where the admission is over $5.

Mr. WALSH of Massachusetts. This provision does not touch prize fights?

Mr. SMOOT. No; but there is a provision in the bill which does impose a 25 per cent tax on admissions to prize fights.

Mr. WALSH of Massachusetts. I understand that.

Mr. SMOOT. So far as revenue is concerned, there is very little revenue left in this class; approximately about a million dollars is all.

Mr. WALSH of Massachusetts. How much revenue is lost by this change?

Mr. SMOOT. Seventeen million dollars.

Mr. HARRISON. I understand, then, that the Senator wants to retain the tax on admissions of over $3?

Mr. SMOOT. Yes.

Mr. HARRISON. And the Government will receive only a million dollars in return, but is losing some $17,000,000 that now comes in. Can the Senator give us any idea as to the cost of administration in collecting the million dollars which the Senator would have us retain on these admission taxes?

Mr. SMOOT. There is no cost to the Government whatever.

Mr. HARRISON. It costs something to administer the law.

Mr. SMOOT. It is merely the sending out of a receipt. I do not see that there is anything else.

Mr. HARRISON. Then I understand it costs the Government nothing to collect these taxes?

Mr. SMOOT. A very slight amount.

Mr. HARRISON. I was just wondering how much that very slight amount was.

Mr. SMOOT. Nobody can tell, but it is a very small amount.

Mr. WALSH of Massachusetts. I understand that the amendment will go over?

Mr. SMOOT. It goes over.

The PRESIDING OFFICER. The amendment will be passed over.

Mr. FLETCHER. Under the bill as it passed the House admissions of $1 or less would be exempt?

Mr. SMOOT. Yes.

Mr. FLETCHER. And the Senate committee raised the minimum to $3?

Mr. SMOOT. Yes.

Mr. FLETCHER. That will reduce the revenues some $17,000,000?

Mr. SMOOT. In all, $17,000,000.

Mr. FLETCHER. Suppose we make it $2 instead of $3?

Mr. SMOOT. I have no estimate on that, but I can get one.

Mr. FLETCHER. I think it would be much wiser to eliminate the estate tax, reducing the revenues about $7,000,000

there, and make this $2, to make it up, if you want to, instead of $3. That would help make it up.

Mr. SIMMONS. Mr. President, the Senator will get into some complications if he tries to handle the matter in that way. The minority members of the committee were in favor of striking out the whole admission tax. The majority proposed simply to raise the minimum now exempted from 75 cents to $3. That is the difference. By raising the minimum to $3 the revenues would be reduced about $17,000,000.

Mr. SMOOT. That is correct.

Mr. SIMMONS. Under our proposition, eliminating the whole admissions schedule, we would make a reduction of about eighteen and one-half million dollars. That is the only difference, as I understand, between the minority and the majority view.

Mr. FLETCHER. Did the minority propose to eliminate admissions to prize fights?

Mr. SIMMONS. No; that was not included.

Mr. FLETCHER. I did not know what the position of the majority was as to that. I can not see why a man who is willing to pay $40 to see a prize fight should not pay something to the Government.

Mr. SIMMONS. Most of the majority and minority were agreed in retaining the tax on prize-fight admissions.

Mr. WALSH of Massachusetts. I understand the Senator from North Carolina is to offer an amendment wiping out all this tax?

Mr. SIMMONS. I shall do so at the proper time.

The PRESIDING OFFICER. The clerk will state the next amendment.

The next amendment was, under the subhead "Club dues tax," on page 196, line 5, after the word "to," to strike out "5 per cent" and insert "10 per cent," so as to read:

SEC. 501. (a) There shall be levied, assessed, collected, and paid a tax equivalent to 10 per cent of any amount paid——

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The amendment will be passed over.

The next amendment was, on page 198, line 3, after the word "importer," to strike out "an amount equal to 1½ per cent of the price for which such article was sold by him, or, if the tax has not been paid, an amount equal to such 1½ per cent shall be credited against the tax in respect of such article" and insert "the amount of the tax, or if the tax has not been paid, the tax shall be abated," so as to read:

SEC. 422. REFUND OF AUTOMOBILE TAX TO MANUFACTURER, PRODUCER, OR IMPORTER.

(a) Where prior to the date of the enactment of this act any article subject to the tax imposed by section 600 (1) of the revenue act of 1926 has been sold by the manufacturer, producer, or importer, and is on such date held by a dealer and intended for sale, there shall be refunded to the manufacturer, producer, or importer the amount of the tax, or if the tax has not been paid, the tax shall be abated.

Mr. SMOOT. I do not know that anyone wants to have the amendment go over. It is the tax on automobiles.

This is the situation: The House Ways and Means Committee reported the bill to the House carrying 1½ per cent. On the floor of the House that was stricken out, making automobiles free, but the House at the same time did not strike out the provision of 1½ per cent on the floor tax, and therefore, as the Senate committee decided to make automobiles free, of course we had then to strike out the provision for the floor tax as contained in the bill as it passed the House.

Mr. WALSH of Massachusetts. Was the action of the committee unanimous in regard to this matter?

Mr. SMOOT. I think the committee was unanimous as to the automobile tax. If anything should happen in the way of the Senate voting the 1½ per cent on automobiles, then we would ask for a reconsideration of this amendment.

Mr. WALSH of Massachusetts. I am in favor of the removal of the tax on automobiles.

Mr. SIMMONS. Mr. President, as the Senator from Utah has stated, the action of the committee was unanimous, but there may be some contest about it upon the floor. I thought we were probably going to take up to-day only those amendments on which there was no contest. If there is to be any contest on this amendment, I do not know anything about it.

Mr. SMOOT. If there shall be any, this amendment can be reconsidered.

Mr. FLETCHER. May I inquire of the Senator whether it exempts all sales taxes on automobiles? For instance, suppose I bought an automobile in 1927 and paid the tax. Is there any provision for a refund?

Mr. SMOOT. None whatever.

Mr. FLETCHER. I am using that simply as an illustration.

Mr. SMOOT. This is a tax that the manufacturer charged to the dealer, and where the dealer has the automobile on his floor unsold. Under the House provision he would have to pay 1½ per cent notwithstanding the machine may have been sold after the passage of the act under which there is no tax on sales of automobiles. So in that case the dealer would lose that 1½ per cent.

Mr. FLETCHER. It applies only to future transactions?

Mr. SMOOT. That is right.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. KING. We have not yet reached section 423?

The PRESIDING OFFICER. No. The clerk will report the next amendment.

The next amendment was, on page 198, line 19, after the word "section," to strike out "(1) may be applied as a credit against the tax shown by subsequent returns of the manufacturer, producer, or importer, and (2)," so as to read:

(c) Under regulations prescribed by the commissioner, with the approval of the Secretary, the refund provided by this section may be made to the dealer instead of to the manufacturer, producer, or importer, if the manufacturer, producer, or importer waives any claim for the amount so to be refunded.

The amendment was agreed to.

The next amendment was, on page 199, line 1, before the word "provided," to strike out "credit" and insert "abatement"; in line 4, after the word "or," to strike out "credit" and insert "abatement"; and in line 6, after the word "or," to strike out "credits" and insert "abatement," so as to read:

(d) When the refund or abatement provided for in this section has been allowed to the manufacturer, producer, or importer, he shall remit to the dealer to whom was sold the article in respect of which the refund or abatement was allowed, so much of that amount of the tax corresponding to the refund or abatement, as was paid or agreed to be paid by the dealer. Upon the failure of the manufacturer, producer, or importer to make such remission he shall be liable to the dealer for damages in the amount of three times the amount thereof, and the court shall include in any judgment in favor of the dealer in any suit for the recovery of such damages, costs of the suit, and a reasonable attorney's fee to be fixed by the court.

The amendment was agreed to.

The next amendment was, on page 199, line 20, after the figures "1926," to strike out "as amended by this act, and in respect of which a corresponding but greater tax was imposed by such section before its amendment by this act, (2) the contract price includes the amount of the tax imposed by such section before its amendment by this act, and (3) such contract does not permit the deduction from the amount to be paid thereunder of the whole of the difference between the tax imposed by such section before its amendment by this act and the tax imposed by such section after its amendment by this act, then the vendor or lessor shall refund so much of the amount of such difference as is not so permitted to be deducted from the contract price," and insert "and (2) the contract price includes the amount of the tax imposed by such section, and (3) such contract does not permit the deduction from the amount to be paid thereunder of the whole of the tax imposed by such section, then the vendor or lessor shall refund so much of the amount of such tax as is not so permitted to be deducted from the contract price," so as to read:

SEC. 423. REFUND OF AUTOMOBILE TAX TO VENDEE.

(a) If (1) any person has, prior to January 1, 1928, made a bona fide contract with any other person for the sale or lease, after the enactment of this act, of any article in respect of which a tax is imposed by section 600 (1) of the revenue act of 1926, and (2) the contract price includes the amount of the tax imposed by such section, and (3) such contract does not permit the deduction from the amount to be paid thereunder of the whole of the tax imposed by such section, then the vendor or lessor shall refund so much of the amount of such tax as is not so permitted to be deducted from the contract price.

The amendment was agreed to.

The next amendment was, on page 200, after line 12, to strike out:

(b) If (1) any manufacturer, producer, or importer of automobile bodies has, prior to January 1, 1928, made a bona fide contract with a manufacturer or producer of automobiles for the sale or lease, after the enactment of this act, of an automobile body, (2) the contract price includes the amount of the tax imposed by section 600 (1) of the revenue act of 1926 before its amendment by this act, and (3) such contract does not permit the deduction from the amount to be paid thereunder of such tax, then the vendor or lessor shall refund

to the vendee or lessee so much of the amount of such tax as is not permitted to be deducted from the contract price.

The amendment was agreed to.

The next amendment was, on page 201, under section 424, to strike out:

No refund shall be made of any amount paid by or collected from any manufacturer, producer, or importer in respect of the tax imposed by subdivision (3) of section 600 of the revenue act of 1924, or subdivision (3) of section 900 of the revenue act of 1921 or of the revenue act of 1918—

(a) Except pursuant to a judgment of a court in an action duly begun prior to February 28, 1927; or

(b) Unless it is established to the satisfaction of the commissioner that such amount was in excess of the amount properly payable upon the sale or lease of an article subject to tax, or that such amount was not collected directly or indirectly from the purchaser or lessee, or that such amount, although collected from the purchaser or lessee, was returned to him prior to February 28, 1927; or

(c) Unless the commissioner certifies to the proper disbursing officer that such manufacturer, producer, or importer has filed with the commissioner, under regulations prescribed by the commissioner with the approval of the Secretary, a bond in such sum and with such sureties as the commissioner deems necessary, conditioned upon the immediate repayment to the United States of such portion of the amount refunded as is not distributed by such manufacturer, producer, or importer, within six months after the date of the payment of the refund, to the persons who purchased for purposes of consumption (whether from such manufacturer, producer, importer, or from any other person) the articles in respect of which the refund is made, as evidenced by the affidavits (in such form and containing such statements as the commissioner may prescribe) of such purchasers, and that such bond, in the case of a claim allowed after February 28, 1927, was filed before the allowance of the claim by the commissioner.

And to insert:

The second proviso under the heading "Internal Revenue," in section 1 of the first deficiency act, fiscal year 1928, is repealed.

Mr. SMOOT. Let the amendment in section 424 be passed over.

Mr. KING. Yes; I ask that it may go over.

The PRESIDING OFFICER. The amendment in that section will be passed over. The clerk will report the next amendment.

The next amendment was, on page 202, after line 21, to insert:

SEC. 425. CIGAR PACKAGES.

(a) Section 3392 of the Revised Statutes, as amended, is amended to read as follows:

"SEC. 3392. All cigars weighing more than 3 pounds per thousand shall be packed in boxes not before used for that purpose containing, respectively, 3, 5, 7, 10, 12, 13, 20, 25, 50, 100, 200, 250, or 500 cigars each; and every person who sells, or offers for sale, or delivers, or offers to deliver, any cigars in any other form than in new boxes as above described, or who packs in any box any cigars in excess of or less than the number provided by law to be put in each box, respectively, or who falsely brands any box, or affixes a stamp on any box denoting a less amount of tax than that required by law, shall be fined for each offense not more than $1,000 and be imprisoned not more than two years: *Provided,* That nothing in this section shall be construed as preventing the sale of cigars at retail by retail dealers from boxes packed, stamped, and branded in the manner prescribed by law: *Provided further,* That each employee of a manufacturer of cigars shall be permitted to use, for personal consumption and for experimental purposes, not to exceed 21 cigars per week without the manufacturer of cigars being required to pack the same in boxes or to stamp or pay any internal-revenue tax thereon, such exemption to be allowed under such rules and regulations as the Secretary of the Treasury may prescribe."

(b) This section shall take effect on the expiration of 30 days after the enactment of this act.

Mr. SMOOT. The only change in existing law by this amendment is the allowing of 20 cigars in a box.

Mr. FLETCHER. Mr. President, that is an amendment affecting a rather important industry. I have not examined it.

Mr. SMOOT. It is asked for by the industry.

Mr. FLETCHER. The Senator is certain of his statement that it affects only what he has mentioned?

Mr. SMOOT. I am sure. If the Senator desires, I will show him the letters I have received in regard to the matter; and if he does not think the amendment should be in the bill, I will have the vote reconsidered.

Mr. FLETCHER. With the understanding we have had as to other amendments, that if I find a protest against it I may have the matter reopened, I will not object.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. KING. Mr. President, may I inquire of the Senator from Florida, in view of the large number of telegrams and letters which we are receiving regarding our dealings with Cuba, and the bringing into the United States of Cuban cigarettes and the fact, as it is claimed, that we are cutting off our trade with Cuba, will the Senator be willing that we shall in this tax bill deal with the question of the importation of cigarettes and cigars and tobacco?

Mr. FLETCHER. I think not. We had better let that stand on its own merits.

The PRESIDING OFFICER. The clerk will state the next amendment.

The next amendment was, on page 204, under "Part IV—Special taxes. Sec. 431. Tax on use of foreign-built boats," to strike out lines 3 to 17, as follows:

Section 702 of the revenue act of 1926 is amended by adding after the end of the first paragraph a new paragraph to read as follows: "On and after July 1, 1928, the rates shall be as follows: Yachts, pleasure boats, power boats, motor boats with fixed engines, and sailing boats, of over 5 net tons, length over 32 feet and not over 50 feet, $10 for each foot; length over 50 feet, and not over 100 feet, $20 for each foot; length over 100 feet, $40 for each foot; except that the increase in rates shall not apply to a yacht or other boat built, or for the building of which a contract was entered into, before December 1, 1927."

And insert:

Section 702 of the revenue act of 1926—imposing a tax on the use of certain foreign-built boats—is repealed, to take effect July 1, 1928.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The amendment will go over.

The next amendment was, under the subhead "Tax on narcotics," on page 205, line 7, to strike out "$1 each year" and to insert "$3 each year," so as to read:

Importers, manufacturers, producers, or compounders, $24 a year; wholesale dealers, $12 a year; retail dealers, $6 a year; physicians, dentists, veterinary surgeons, and other practitioners lawfully entitled to distribute, dispense, give away, or administer any of the aforesaid drugs to patients upon whom they in the course of their professional practice are in attendance, shall pay $3 each year or fraction thereof during which they engage in any of such activities.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The amendment will be passed over.

The next amendment was, on page 205, under "Part V—Stamp taxes," to strike out:

SEC. 441. TAX ON SALES OF PRODUCE ON EXCHANGE.

Subdivision 4 of Schedule A of Title VIII of the revenue act of 1926 is repealed, to take effect on the expiration of 30 days after the enactment of this act.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The amendment will be passed over.

The next amendment was, on page 205, after line 14, to strike out lines 15 to line 2, page 206, as follows:

SEC. 442. TAX ON SALES OR TRANSFERS OF CAPITAL STOCK.

Subdivision 3 of Schedule A of Title VIII of the revenue act of 1926 is amended, to take effect on the expiration of 30 days after the enactment of this act, by striking out "on each $100 of face value or fraction thereof, 2 cents, and where such shares are without par or face value, the tax shall be 2 cents on the transfer or sale or agreement to sell on each share" and inserting in lieu thereof "on each $100 of face value or fraction thereof, 1 cent, and where such shares are without par or face value, the tax shall be 1 cent on the transfer or sale or agreement to sell on each share."

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The amendment goes over.

The next amendment was, on page 206, line 11, to strike out "50,000" and insert "25,000," so as to read:

SEC. 441. SALE OF STAMPS AT POST OFFICES.

Title VIII of the revenue act of 1926 is amended by adding after section 807 a new section to read as follows:

"SEC. 808. The commissioner shall furnish to the Postmaster General without prepayment a suitable quantity of adhesive stamps to be distributed to and kept on sale by the various postmasters in the United States in cities of over 25,000 inhabitants. The Postmaster General may require each such postmaster to give additional or increased bond as postmaster for the value of the stamps so furnished, and each such postmaster shall deposit the receipts from the sale of such stamps to the credit of and render accounts to the Postmaster General at such times and in such form as he may by regulations prescribe. The

Postmaster General shall at least once monthly transfer all collections from this source to the Treasury as internal-revenue collections."

The amendment was agreed to.

The next amendment was, on page 207, line 5, to strike out "gallon" and insert:

gallon;

On wines containing more than 21 per cent and not exceeding 24 per cent of absolute alcohol, $1 per wine gallon.

So as to read:

On wines containing more than 14 per cent and not exceeding 21 per cent of absolute alcohol, 40 cents per wine gallon;

On wines containing more than 21 per cent and not exceeding 24 per cent of absolute alcohol, $1 per wine gallon.

Mr. HARRISON. This amendment goes over, does it not?

Mr. SMOOT. The rates mentioned here are all in conformity with the general reduction, and I have no objection to agreeing to the amendment now. But it does refer to rates.

The amendment was agreed to.

The next amendment was, on page 207, line 16, to strike out "gallon" and to insert:

gallon;

On wines containing more than 21 per cent and not exceeding 24 per cent of absolute alcohol, 25 cents per wine gallon.

So as to read:

On wines containing more than 14 per cent and not exceeding 21 per cent of absolute alcohol, 10 cents per wine gallon;

On wines containing more than 21 per cent and not exceeding 24 per cent of absolute alcohol, 25 cents per wine gallon.

The amendment was agreed to.

The next amendment was, on page 209, line 10, to strike out "or 1926" and insert in lieu thereof "1926, or 1927," so as to make the paragraph read:

(h) (1) If a notice under subdivision (a) of section 274 in respect of a deficiency for the taxable year 1922, 1923, 1924, 1925, 1926, or 1927 has been mailed to a corporation, the suspension of the running of the statute of limitations, provided in subdivision (b) of section 277 and in subdivision (l) of section 283, shall apply in the case of corporations with which such corporation made a consolidated return for such taxable year.

Mr. KING. That should go over. It deals with the retroactive feature.

The PRESIDING OFFICER. The amendment will be passed over.

The next amendment was, on page 212, line 24, after the word "before," to strike out the words "or after"; on page 213, in line 5, after the word "before," to strike out the words "or after"; on the same page, line 16, after the word "before," to strike out the words "or after"; and on the same page, line 19, after the word "before," to strike out the words "or after," so as to make the paragraphs read:

(a) Section 278 (c) and (d) of the revenue act of 1926 are amended to read as follows:

"(c) Where before the expiration of the time prescribed in section 277 for the assessment of the tax, both the commissioner and the taxpayer have consented in writing to its assessment after such time, the tax may be assessed at any time prior to the expiration of the period agreed upon. The period so agreed upon may be extended by subsequent agreements in writing made before the expiration of the period previously agreed upon.

"(d) Where the assessment of any income, excess-profits, or war-profits taxes imposed by this title or by prior act of Congress has been made (whether before or after the enactment of this act) within the period of limitation properly applicable thereto, such tax may be collected by distraint or by a proceeding in court (begun before or after the enactment of this act), but only if begun (1) within six years after the assessment of the tax, or (2) prior to the expiration of any period for collection agreed upon in writing by the commissioner and the taxpayer before the expiration of such six-year period. The period so agreed upon may be extended by subsequent agreements in writing made before the expiration of the period previously agreed upon."

The amendment was agreed to.

The next amendment was, on page 213, after line 20, to insert:

(b) Section 278 of the revenue act of 1926 is further amended by adding at the end thereof a new subdivision to read as follows:

"(f) Any agreement which would be within the provisions of subdivision (c) or (d) of this section but for the fact that it was executed after the expiration of the period of limitation extended by such agreement, shall be valid and effective according to its terms if entered into after the enactment of the revenue act of 1928 and before January 1, 1929."

(c) The amendments made by this section to the revenue act of 1926 shall not be construed as in any manner affecting the validity of waivers made prior to the enactment of this act, which shall be determined according to the law in existence at the time such waiver was filed.

The amendment was agreed to.

The next amendment was, on page 214, line 24, after "subdivision (g)," to insert "or (i)," so as to make the paragraph read:

SEC. 507. OVERPAYMENTS FOUND BY BOARD OF TAX APPEALS.

Section 284 (e) of the revenue act of 1926 is amended to read as follows:

"(e) If the board finds that there is no deficiency and further finds that the taxpayer has made an overpayment of tax in respect of the taxable year in respect of which the commissioner determined the deficiency, the board shall have jurisdiction to determine the amount of such overpayment, and such amount shall, when the decision of the board has become final, be credited or refunded to the taxpayer as provided in subdivision (a). Unless claim for credit or refund, or the petition, was filed within the time prescribed in subdivision (g) or (i) for filing claims, no such credit or refund shall be made of any portion of the tax paid more than four years (or, in the case of a tax imposed by this title, more than three years) before the filing of the claim or the filing of the petition, whichever is earlier."

The amendment was agreed to.

The next amendment was, on page 215, after line 3, to insert:

SEC. 508. CLAIMS FOR REFUND FOR 1917–1921.

Section 284 of the revenue act of 1926 is amended by adding at the end thereof a new subdivison to read as follows:

"(i) If the taxpayer has prior to January 1, 1928, filed a valid and enforceable waiver of his right to have the income, war-profits, or excess-profits taxes for the taxable years 1917, 1918, 1919, or 1920 determined and assessed within five years after the return was filed, or filed a valid and enforceable waiver of his right to have such taxes for the taxable year 1921 determined and assessed within four years after the return was filed, then such credit or refund relating to the taxes for the year in respect of which the waiver was filed shall be allowed or made if claim therefor is filed at any time prior to 90 days before the expiration of such waiver, or at any time before the expiration of one year after the waiver was filed, whichever date is earlier."

Mr. KING. Let that amendment go over, too.

The PRESIDING OFFICER. The amendment will be passed over.

The next amendment was, on page 215, after line 20, to insert:

SEC. 509. SURTAX RATES FOR 1927.

(a) Section 211 of the revenue act of 1926 is amended, to take effect as of January 1, 1927, by adding at the end thereof a new subdivision to read as follows:

"(c) Notwithstanding the rates provided in subdivision (a) the rates of surtax for the calendar year 1927 shall be the same as the rates of surtax specified in section 12 of the revenue act of 1928."

(b) Any refund or credit to which a taxpayer may be entitled by reason of this section shall be made or allowed without interest.

Mr. KING. Let that go over also.

The PRESIDING OFFICER. The amendment goes over.

Mr. HARRISON. Mr. President, may I ask the chairman of the committee with reference to that amendment?

Mr. SMOOT. That is a retroactive feature of the bill on the surtax of an individual.

Mr. HARRISON. The amendment goes over?

Mr. SMOOT. Yes.

Mr. FLETCHER. The only retroactive feature I have found so far in the bill refers only to surtaxes and certain classes of taxpayers who pay surtaxes. What is the idea of the committee? It is made retroactive as to incomes of $18,000 and over, and only as to certain classes of taxpayers within the surtax provision.

Mr. SMOOT. The way the House had it, there was no change whatever in the surtax rates of individuals. They had a provision making it retroactive for corporations, but having made no change in the rate of surtaxes on individual incomes there was no need for a provision for making it retroactive, of course. The Senate committee made a reduction in the surtax rate, and we also provide that whatever reduction is made in the bill on individual taxes over and above 1927 shall be given credit upon this year's taxes or the taxes imposed for 1927. The individual gets the credit.

Mr. FLETCHER. Does it refer to all individuals or only to those within certain brackets?

Mr. SMOOT. It refers to the surtaxes of all individuals.

Mr. HARRISON. This provision was not necessary when the bill was considered in the House, because the bill was passed in December in the House, and it is now May of the following year.

Mr. SMOOT. I would not say that. The real reason for that, as I understand the House Members—and I have talked with a number of them—was that there was no change whatever in the surtax rate in the House.

Mr. HARRISON. That is quite true.

Mr. SMOOT. Therefore they did not believe it necessary to have a provision in the bill for a retroactive feature as to individual taxpayers on their surtaxes, but they did have it apply to corporations. The majority of the Senate committee decided that we would not provide the retroactive feature for corporations, but that we would make it retroactive for individuals, and now all individuals who pay a surtax will get this reduction.

Mr. HARRISON. The matter is going over, I understand?

Mr. SMOOT. Yes.

The PRESIDING OFFICER. The amendment goes over and the clerk will report the next amendment.

The next amendment of the Committee on Finance was, on page 216, lines 22 to 25, to strike out the following: "A division shall hear and make a report to the board upon any proceeding instituted before the board and any motion thereon, assigned to such division by the chairman," and to insert in lieu thereof:

A division shall hear, and make a determination upon, any proceeding instituted before the board and any motion in connection therewith, assigned to such division by the chairman, and shall make a report of any such determination which constitutes its final disposition of the proceeding.

The amendment was agreed to.

The next amendment was, on page 217, lines 6 to 9, to strike out the words "(b) The report of the division, and any findings of fact made or opinion or memorandum opinion rendered by the division in connection therewith, shall become the report and the findings of fact and opinion," and insert in lieu thereof the words "The report of the division shall become the report," and in line 17, after the word "division," to strike out the words "and any findings of fact made or opinion or memorandum opinion rendered by the division in connection therewith," so as to make the paragraph read:

(b) The report of the division shall become the report of the board within 30 days after such report by the division, unless within such period the chairman has directed that such report shall be reviewed by the board. Any preliminary action by a division which does not form the basis for the entry of the final decision shall not be subject to review by the board except in accordance with such rules as the board may prescribe. The report of a division shall not be a part of the record in any case in which the chairman directs that such report shall be reviewed by the board.

The amendment was agreed to.

The next amendment was, on page 219, line 16, after the word "contract," to insert the words "(by renewal of contract or otherwise)," so as to read:

Hearings before the board and its divisions shall be open to the public, and the testimony, and, if the board so requires, the argument shall be stenographically reported. The board is authorized to contract (by renewal of contract or otherwise) for the reporting of such hearings, and in such contract to fix the terms and conditions under which transcripts will be supplied by the contractor to the board and to other persons and agencies.

The amendment was agreed to.

The next amendment was, on page 219, in line 25, to strike out the words, "Such rules of practice and procedure shall have the same force and effect as Federal equity rules," and insert in lieu thereof the following:

In any proceeding involving the issue whether the petitioner has been guilty of fraud with intent to evade tax, where no hearing has been held before the enactment of the revenue act of 1928, the burden of proof in respect of such issue shall be upon the commissioner.

Mr. KING. Let that go over.

The PRESIDING OFFICER. The amendment will be passed over.

The next amendment was, on page 220, to strike out lines 14 to 17, in the following words:

No decision of the board shall be modified or reversed because the board or any of its divisions has failed to consider evidence not adduced before the board or division.

The amendment was agreed to.

The next amendment was, on page 223, to strike out lines 19 to 25, and on page 224 to strike out lines 1 and 2, as follows:

Proceedings instituted after the enactment of this act under section 311 of this act or under section 280 or 316 of the revenue act of 1926 for the enforcement of the liability of a transferee or fiduciary, shall be in addition to and not in substitution for proceedings in court, at law or in equity, for the enforcement of such liability; and the commissioner may cause proceedings for the enforcement of such liability to be instituted either under such sections or in court, in his discretion.

Mr. KING. I ask that that amendment may go over.

The PRESIDING OFFICER. The amendment will go over.

Mr. SMOOT. I want to ask the Senator if he means the old section 605? There are separate amendments. Which one does he want to have passed over?

Mr. KING. Section 605 on page 223.

The PRESIDING OFFICER. The amendment will go over.

Mr. KING. I want to ask the Senator a question in regard to that. It is a legal question. It may be necessary to refer it to the experts. I approve of section 605 and subdivision (a), but I ask this question to see if I understand it correctly. Suppose that a regulation promulgated by the Treasury has been ratified by statute and has the effect of a statute in contradistinction to a regulation by the department. Would this repeal the regulation which has the effect of a statute? It occurred to me if there is any danger it might be well to add at the end of section 1108, subdivision (a) "*Provided*, That if any regulation has been approved by statute, then this provision shall not relate to such regulation."

Mr. SMOOT. I am quite sure that such an amendment is not required. The section itself covers everything the Senator has just mentioned.

Mr. KING. I will ask the experts to look into that, because I think some regulations have received the sanction of a statute and thus become law, and there is no intention of repealing such a regulation.

Mr. McKELLAR. Mr. President, may I ask the Senator a question? This has no reference to decisions of the Supreme Court where the retroactive provision of the law was included?

Mr. SMOOT. That is another provision entirely.

Mr. McKELLAR. May I ask the Senator if there is any such provision in the bill?

Mr. SMOOT. It was involved in section 611 and that was stricken out. It is at the bottom of page 228 and top of page 229.

Mr. McKELLAR. But that has been stricken out?

Mr. SMOOT. Yes.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). The clerk will state the next amendment.

The next amendment was, on page 224, line 3, to insert:

SEC. 605. RETROACTIVE REGULATIONS.

Section 1108(a) of the revenue act of 1926 is amended to read as follows:

"SEC. 1108. (a) In case a regulation or Treasury decision relating to the internal revenue laws is amended by a subsequent regulation or Treasury decision, made by the Secretary or by the commissioner with the approval of the Secretary, such subsequent regulation or Treasury decision may, with the approval of the Secretary, be applied without retroactive effect."

The amendment was agreed to.

The next amendment was, on page 224, in line 23, after the word "Secretary," to insert the words "the Undersecretary, or an Assistant Secretary," so as to read:

(b) Finality of agreements: If such agreement is approved by the Secretary, the Undersecretary, or an Assistant Secretary, within such time as may be stated in such agreement, or later agreed to, such agreement shall be final and conclusive, and, except upon a showing of fraud or malfeasance, or misrepresentation of a material fact—

And so forth.

The amendment was agreed to.

The next amendment was, on page 225, to strike out lines 18 to 24, and on page 226 to strike out lines 1 to 11, inclusive, in the following words:

(a) Payment of barred taxes: The payment of any portion of an internal-revenue tax (or any interest, penalty, additional amount, or addition to such tax) shall be considered as an overpayment if made—

(1) after the expiration of the period of limitation on assessment, if no assessment thereof was made within such period, or

(2) after the expiration of the period of limitation for collection by distraint or proceeding in court, if no distrant or proceeding for the collection thereof was begun within such period.

(b) Same refund or credit: The provisions of subsection (a) shall apply to any payment made before or after the enactment of this act, and any such payment shall be refunded or credited (even though claim therefor was disallowed prior to the enactment of this act) if claim

therefor is filed within the period of limitation properly applicable thereto.

The amendment was agreed to.

The next amendment was, on page 226, after line 12, to insert:

SEC. 607. EXTINGUISHMENT OF LIABILITY BY BAR OF STATUTE OF LIMITATIONS AGAINST UNITED STATES.

Any tax (or any interest, penalty, additional amount, or addition to such tax) assessed or paid (whether before or after the enactment of this act) after the expiration of the period of limitation properly applicable thereto shall be considered an overpayment and shall be credited or refunded to the taxpayer if claim therefor is filed within the period of limitation for filing such claim.

The amendment was agreed to.

The next amendment was, on page 227, in lines 9 and 10, to strike out the words "unless within such period suit was begun by the taxpayer," and insert in lieu thereof the following: "unless—(1) within such period suit was begun by the taxpayer, or

(2) within such period, the taxpayer and the commissioner agreed in writing to suspend the running of the statute of limitations for filing suit from the date of the agreement to the date of final decision in one or more named cases then pending before the United States Board of Tax Appeals or the courts."

So as to make the paragraph read:

(b) in the case of a claim filed within the proper time and disallowed by the commissioner after the enactment of this act, if the refund was made after the expiration of the period of limitation for filing suit, unless—

(1) within such period suit was begun by the taxpayer, or

(2) within such period, the taxpayer and the commissioner agreed in writing to suspend the running of the statute of limitations for filing suit from the date of the agreement to the date of final decision in one or more named cases then pending before the United States Board of Tax Appeals or the courts.

Mr. KING. I ask that section 608, the provision on page 227, lines 9 to 18, inclusive, may go over.

The PRESIDING OFFICER. The amendment will be passed over at the request of the junior Senator from Utah. The clerk will state the next amendment.

The next amendment was, on page 228, after line 23, to strike out:

SEC. 611. Collections stayed by claim in abatement: If any internal-revenue tax (or any interest, penalty, additional amount, or addition to such tax) was, within the period of limitation properly applicable thereto, assessed prior to June 2, 1924, and if a claim in abatement was filed, with or without bond, and if the collection of any part thereof was stayed, then—

(a) the payment of such part (made before or within one year after the enactment of this act) shall not be considered as an overpayment under the provisions of section 607, relating to payments made after the expiration of the period of limitation on assessment and collection; and

(b) a distraint or proceeding in court for the collection of such part may be begun within one year after the enactment of this act.

The amendment was agreed to.

The next amendment was, on page 232, line 2, after the word "this," to strike out "Section" and insert "section" and the following: "(f) Subsections (c), (d), and (e) of this section shall apply to a lien in respect of any internal-revenue tax, whether or not the lien is imposed by this section," so as to read:

(e) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may by regulation provide for the acceptance of a single bond complying both with the requirements of section 272 (j) of the revenue act of 1928 (relating to the extension of time for the payment of a deficiency), or of any similar provisions of any prior law, and the requirements of subsection (c) of this section.

(f) Subsections (c), (d), and (e) of this section shall apply to a lien in respect of any internal-revenue tax, whether or not the lien is imposed by this section.

(b) The second sentence of section 315 (a) of the revenue act of 1926 is repealed.

The amendment was agreed to.

The next amendment was, on page 239, after line 4, to strike out:

SEC. 702. LEGISLATIVE COUNSEL.

Section 1303(d) of the revenue act of 1918, as amended by section 1101 of the revenue act of 1924, is amended by adding at the end thereof a sentence to read as follows: "Notwithstanding the foregoing provisions, the compensation of each of the two legislative counsel in office upon the date of the enactment of the revenue act of 1928 shall, after such date, be at the rate of $10,000 a year."

The amendment was agreed to.

The next amendment was, on page 239, after line 12, to strike out:

SEC. 703. SPECIAL ASSISTANT TO SECRETARY OF TREASURY.

The salary of the Special Assistant to the Secretary of the Treasury in matters of legislation, so long as the position is held by the present incumbent, shall be at the rate of $10,000 a year.

The amendment was agreed to.

Mr. SMOOT. So that it may be referred to hereafter, I will explain that the reason the committee recommends striking those provisions out is that the proposed legislation was taken care of in one of the appropriation bills that passed early in March, and therefore it is not necessary to put the provisions in this bill.

Mr. FLETCHER. To what particular provision does the Senator refer?

Mr. SMOOT. To the provision as to the salary of the legislative counsel.

Mr. FLETCHER. On page 239?

Mr. SMOOT. On page 239. We propose to strike that out, because it is already the law.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 239, line 22, after the word "year," where it occurs the second time, to strike out "1927" and insert "1928"; on page 240, line 1, after the word "filed," to strike out "and if no claim for refund or credit in respect of such basis has been filed prior to the enactment of this act"; and in line 4, after the word "such," to strike out "basis" and insert "basis, unless claim for refund or credit in respect of such basis, or a written election not to come within the provisions of this subsection, has been filed by the estate before the expiration of the period of limitation for filing claims," so as to read:

SEC. 702. BASIS OF PROPERTY UPON SALE BY ESTATE—RETROACTIVE.

(a) If in the return of any decedent's estate for any taxable year preceding the taxable year 1928, the basis, upon which gain or loss realized upon the sale or other disposition of property acquired by the estate from the decedent was computed, was in accordance with the regulations in force at the time such return was filed, then the computation of such gain or loss shall be made upon such basis, unless claim for refund or credit in respect of such basis, or a written election not to come within the provisions of this subsection, has been filed by the estate before the expiration of the period of limitation for filing claims.

The amendment was agreed to.

The next amendment was, on page 240, line 11, after the word "year," to strike out "1927" and insert "1928," so as to read:

(b) In every other case the computation of the gain or loss realized by an estate in any taxable year preceding the taxable year 1928 from the sale or other disposition by it of property acquired by the estate from the decedent, shall be made on such basis as is in accordance with the law properly applicable thereto, without regard to any provision of this act.

The amendment was agreed to.

Mr. SMOOT. Mr. President, in the next section, relating to the deduction of estate and inheritance taxes, there is a committee amendment that has not as yet been prepared. I will ask, therefore, that the section go over, and I will present the amendment as soon as the experts have prepared the wording.

The PRESIDING OFFICER. The section will be passed over.

The reading of the bill was resumed.

The next amendment was, on page 242, after line 17, to insert:

(b) For the purpose of the revenue act of 1926 and prior revenue acts, a trust shall, at the option of the trustee exercised within one year after the enactment of this act, be considered as a trust the income of which is taxable to the beneficiaries, and not as an association, if such trust (1) had a single trustee, and (2) was created and operated for the sole purpose of liquidating real property as a single venture (with such powers of administration as are incidental thereto, including the acquisition, improvement, conservation, division, and sale of such property), distributing the proceeds therefrom in due course to or for the benefit of the beneficiaries, and discharging indebtedness secured by the trust property, and (3) has not made a return for the taxable year as an association.

So as to read:

SEC. 704. TAXABILITY OF TRUSTS AS CORPORATIONS—RETROACTIVE.

(a) If a taxpayer filed a return as a trust for any taxable year prior to the taxable year 1925 such taxpayer shall be taxable as a trust for such year and not as a corporation, if such taxpayer was considered to be taxable as a trust and not as a corporation either (1) under the regulations in force at the time the return was made or at the time of the termination of its existence, or (2) under any ruling of the commissioner or any duly authorized officer of the Bureau of Internal Revenue applicable to any of such years, and interpretative of any

provision of the revenue act of 1918, 1921, or 1924, which had not been reversed or revoked prior to the time the return was made, or under any such ruling made after the return was filed which had not been reversed or revoked prior to the time of the termination of the taxpayer's existence.

(b) For the purpose of the revenue act of 1926 and prior revenue acts, a trust shall, at the option of the trustee exercised within one year after the enactment of this act, be considered as a trust the income of which is taxable to the beneficiaries, and not as an association, if such trust (1) had a single trustee, and (2) was created and operated for the sole purpose of liquidating real property as a single venture (with such powers of administration as are incidental thereto, including the acquisition, improvement, conservation, division, and sale of such property), distributing the proceeds therefrom in due course to or for the benefit of the beneficiaries, and discharging indebtedness secured by the trust property, and (3) has not made a return for the taxable year as an association.

Mr. KING. I will ask that section 704 (b), on page 242, go over.

The PRESIDING OFFICER. Under objection, the amendment will be passed over.

The reading of the bill was resumed.

The next amendment was, on page 243, after line 5, to insert:

SEC. 705. INCOME TAX ON SALE OF VESSELS BUILT BEFORE 1914.

The second paragraph of section 23 of the merchant marine act, 1920, is amended, to take effect as of June 5, 1920, to read as follows:

"During the period of 10 years from June 5, 1920, any person, a citizen of the United States, who may sell a vessel documented under the laws of the United States and built prior to January 1, 1914, shall be exempt from all income taxes that would be payable upon any of the proceeds of such sale under the revenue act of 1918 or under any subsequent revenue act in force during such 10-year period, if the entire proceeds thereof shall be invested in the building of new ships in American shipyards, such ships to be documented under the laws of the United States and to be of a type approved by the board."

Mr. SMOOT. I have not as yet had time to discuss this subject with the Senator from Washington [Mr. JONES], but if the amendment shall be agreed to and the Senator from Washington shall not be perfectly satisfied with it, I shall ask for a reconsideration of it. The Senator from Florida [Mr. FLETCHER], who, of course, is deeply interested in the subject matter, is in favor of the provision, and more than likely the Senator from Washington will also be in favor of it. I repeat, however, that if the Senator from Washington desires a reconsideration of the amendment, and if no Senator asks that it go over, and it shall be agreed to, I shall ask that it be reconsidered.

Mr. FLETCHER. I think, Mr. President, the amendment is entirely satisfactory, and what the Senator from Utah suggests is also entirely satisfactory. We tried to accomplish the same result in the merchant marine act, but what the Senator from Utah suggests will, I am sure, meet with the approval of the Senator from Washington and will be entirely satisfactory.

The PRESIDING OFFICER. Subject to reconsideration, the amendment is agreed to.

The reading of the bill was resumed.

The next amendment was, on page 243, after line 21, to strike out:

SEC. 707. BUREAU OF INTERNAL REVENUE—PERSONNEL.

(a) The Secretary of the Treasury is authorized to fix the compensation, without regard to the provisions of the classification act of 1923, of the following officers and employees of the Bureau of Internal Revenue, appointed (whether before or after the enactment of this act) in accordance with the civil service laws: Twenty-three assistants to the general counsel at a compensation not in excess of $7,500 a year each; 26 administrative or technical employees at a compensation not in excess of $7,500 a year each; and 50 administrative or technical employees at a compensation not in excess of $6,000 a year each.

(b) Section 1201 (b) (1) of the revenue act of 1926 is repealed.

Mr. KING. Mr. President, I agree very heartily to the striking out of section 707, paragraph (a), but perhaps the reasons which prompted the striking out may not be appealing. I am told that this provision, creating these new positions with these increased salaries, is stricken out upon the theory that in the new bill for reclassification of salaries these particular positions are to be re-created and the salaries fixed for all time. I want to give notice that when the bill comes up amending the classification act, if it contains the provisions which are stricken out here, I shall object to those provisions just the same as I should object to the provisions here increasing the salaries and multiplying the number of officials who come within the provisions of this section.

Mr. HARRISON. The amendment is going over, as I understand?

Mr. KING. Oh, no; I have no objection to its being adopted.

Mr. SMOOT. It will go over, of course, if the Senator from Mississippi so desires.

Mr. HARRISON. I want it to go over. I did not know the committee had taken that action. They shifted about two or three times in relation to it.

Mr. SMOOT. No; the Senator was not at the meeting at which the action was taken. I am perfectly willing to explain in detail the reason for it.

Mr. HARRISON. I think it had better go over, in order to save time. I thought that at one of the late meetings of the committee the Senator brought it up, but he was ruled out by the votes then present. It may be that when there were certain Senators there the Senator had his way.

Mr. SMOOT. I will say to the Senator that in the salary bill which is now before the House—and I introduced a similar bill in the Senate the other day—out of the 23 persons provided for there 20 of those will be taken care of, and out of the 99 employees whose salaries have been increased there are 80 who will be taken care of in the bill now pending, which no doubt will pass the House in a very few days and will then be before this body for consideration.

Mr. HARRISON. The Senator from North Carolina [Mr. SIMMONS] is interested in this matter, and so I suggest that it go over.

Mr. SMOOT. I am perfectly willing that it shall be passed over.

The PRESIDING OFFICER. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment was, on page 244, after line 18, to insert:

SEC. 707. SALARIES OF COLLECTORS OF INTERNAL REVENUE.

Section 1301 (b) of the revenue act of 1918 is amended to read as follows:

"(b) The salaries of collectors may be readjusted and increased under such regulations as may be prescribed by the commissioner, subject to the approval of the Secretary, but no collector shall receive a salary in excess of $7,500 a year."

Mr. KING. Let that go over. I give notice that I shall oppose it.

The PRESIDING OFFICER. The amendment will be passed over.

Mr. McKELLAR. Mr. President, I desire to have the attention of the Senator from Utah for a moment. Not being on the committee, and it being such a long bill, naturally I should like to keep up with the amendments a little better than I could do by referring to the bill or the RECORD itself. I want to know if the Senator from Utah will not have all of the amendments that have gone over printed, in order, either in the RECORD or in a separate printed slip, so that we may have them before us on Monday when we come to the consideration of them? I believe it would expedite the consideration of the bill.

Mr. SMOOT. I think it would be rather confusing, would it not?

Mr. McKELLAR. Would it?

Mr. SMOOT. Yes. If the Senator will take a few moments of time after we recess to-day, I will take my bill and I will mark his bill with all the amendments that have gone over, and then he can see exactly what they are.

Mr. McKELLAR. That will be entirely satisfactory.

Mr. SMOOT. I will ask the Senator to hand me the bill he wishes me to mark, and I will mark it for him.

Mr. McKELLAR. I thank the Senator.

Mr. FLETCHER. Mr. President, I understand that the consideration of all the amendments not objected to and that have not gone over has been completed.

Mr. SMOOT. Yes; but there are a few committee amendments to be offered, which will be offered when we take up the amendments which have been passed over. All the committee amendments have now been agreed to except those that have been requested to go over, and when they are acted upon the committee has two or three more amendments to offer which are not of very great importance, but we wish to make the bill as perfect as we can.

Mr. McNARY. I desire to submit a conference report.

Mr. FLETCHER. Let us dispose of the pending matter.

Mr. HARRISON. Does the Senator from Oregon desire to have the conference report acted upon?

Mr. McNARY. Yes.

Mr. HARRISON. May I ask the Senator from Utah if we have finished all the administrative provisions as to which there is no controversy?

Mr. SMOOT. That is true.

Mr. HARRISON. Does the Senator think, then, that the other matters will be taken up on Monday?

Mr. SMOOT. Yes; on Monday morning.

Mr. HARRISON. Then, the Senate will not proceed any further this afternoon with the revenue bill?

Mr. SMOOT. We will proceed no further this afternoon.

Mr. FLETCHER. I presume the Senator is going to ask that the bill may be passed over until Monday?

Mr. SMOOT. It will go over until Monday, because we are shortly going to adjourn.

AGRICULTURAL DEPARTMENT APPROPRIATIONS

Mr. McNARY submitted the following conference report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11577) "making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 4, 5, 6, 14, 24, 41, 42, 44, 47, 48, 60, 62, 63, 64, 66, 74, 77, 83, 88, and 94.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 7, 8, 9, 10, 11, 12, 13, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 30, 31, 32, 33, 34, 35, 37, 38, 43, 45, 46, 49, 50, 51, 52, 53, 54, 55, 58, 68, 71, 72, 73, 75, 78, 79, 81, 82, 89, 90, 91, 95, 96, 97, and 101, and agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$515,200"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$105,650"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$277,140"; and the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$8,945,135"; and the Senate agree to the same.

Amendment numbered 39: That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$11,147,895"; and the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$775,000"; and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$245,000"; and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$210,000"; and the Senate agree to the same.

Amendment numbered 65: That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$8,870,105"; and the Senate agree to the same.

Amendment numbered 67: That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$11,145,105"; and the Senate agree to the same.

Amendment numbered 69: That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$52,743, of which sum $10,000 shall be immediately available"; and the Senate agree to the same.

Amendment numbered 70: That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,293,613"; and the Senate agree to the same.

Amendment numbered 76: That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,966,658"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$725,000"; and the Senate agree to the same.

Amendment numbered 92: That the House recede from its disagreement to the amendment of the Senate numbered 92, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$4,228,060"; and the Senate agree to the same.

Amendment numbered 93: That the House recede from its disagreement to the amendment of the Senate numbered 93, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$5,568,280"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 56, 59, 80, 84, 85, 86, 98, 99, 100, and 102.

CHAS. L. McNARY,
W. L. JONES,
HENRY W. KEYES,
LEE S. OVERMAN,
WM. J. HARRIS,
*Managers on the part of the Senate.*

L. J. DICKINSON,
E. H. WASON,
JOHN W. SUMMERS,
J. P. BUCHANAN,
JOHN N. SANDLIN,
*Managers on the part of the House.*

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

PRESIDENT'S PLAZA AND MEMORIAL, NASHVILLE, TENN.

Mr. McKELLAR. I ask unanimous consent for the immediate consideration of the bill (S. 3171) providing for a Presidents' plaza and memorial in the city of Nashville, State of Tennessee, to Andrew Jackson, James K. Polk, and Andrew Johnson, former Presidents of the United States.

Mr. CURTIS. Let the bill be read.

The VICE PRESIDENT. The bill will be read.

The bill was read, as follows:

*Be it enacted, etc.*, That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $300,000 as a part contribution to the establishment of a Presidents' plaza in the city of Nashville, State of Tennessee, and for the erection thereon of a proper memorial, or monuments, or statues, in honor and to the memory of Andrew Jackson, James K. Polk, and Andrew Johnson, former Presidents of the United States: *Provided, however*, That said sums shall not be payable until there has been raised, by private subscription, and/or by public appropriations by the State of Tennessee, and/or Davidson County, and/or the city of Nashville, sums aggregating an additional $300,000: *And provided further*, That said moneys shall not be paid for the erection of any memorial, monuments, or statues, plans for which shall not have been approved by the Secretary of War of the United States and the Governor of the State of Tennessee; and the said money shall be expended under the supervision of a commission composed of the Secretary of War, as a member ex officio, and six members to be appointed by the Governor of the State of Tennessee.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

H. C. MAGOON

Mr. FLETCHER. I ask unanimous consent to take up for consideration Senate bill 444, Order of Business 1004.

This is a claim bill which partially takes care of damage to a boat done by the erroneous backing of a Coast Guard cutter into the boat. The damage to the boat amounted to some $3,400, and the report shows $3,478; but the committee reported $2,500, and rather than have it delayed I am willing to have the amendment agreed to.

Mr. CURTIS. Is it a unanimous report?

Mr. FLETCHER. It is a unanimous report. It is perfectly just. There is no dispute about the fault being entirely on the part of the Coast Guard boat.

The VICE PRESIDENT. The Senator from Florida asks unanimous consent for the present consideration of a bill the title of which will be read by the Secretary.

The CHIEF CLERK. A bill (S. 444) for the relief of H. C. Magoon.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Claims with an amendment, on page 1, line 6, after the words "sum of," to strike out "$3,478.39" and insert "$2,500," so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to H. C. Magoon, out of any money in the Treasury not otherwise appropriated, the sum of $2,500 in full settlement for damages sustained on account of the Coast Guard cutter *AB–19* backing into his yacht *Ornway A–655* while tied up at Baylen Street Wharf, Pensacola, Fla., May 27, 1924.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ORDER FOR RECESS FROM TO-MORROW UNTIL MONDAY

Mr. CURTIS. I ask unanimous consent that at the conclusion of the service to-morrow the Senate shall take a recess until 12 o'clock noon on Monday, May 7.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After three minutes spent in executive session the doors were reopened.

ADJOURNMENT

Mr. CURTIS. In accordance with the unanimous-consent agreement heretofore made, I move that the Senate take a recess until to-morrow at 3 o'clock p. m.

The motion was agreed to; and (at 2 o'clock and 35 minutes p. m.) the Senate took a recess until to-morrow, Sunday, May 6, 1928, at 3 o'clock p. m.

## CONFIRMATIONS

*Executive nominations confirmed by the Senate May 5 (legislative day of May 3), 1928*

REGISTER OF THE LAND OFFICE

Arthur Wellington Doland to be register of land office at Spokane, Wash.

APPOINTMENT IN THE ARMY

COAST ARTILLERY CORPS

Chauncey Lee Fenton to be professor of chemistry, mineralogy, and geology, United States Military Academy.

PROMOTIONS IN THE ARMY

CAVALRY

Harry Newton Cootes to be colonel.
George Bowditch Hunter to be lieutenant colonel.
Leon Edward Ryder to be major.

INFANTRY

Charles Haskell Morrow to be colonel.
Charles Thomas Smart to be lieutenant colonel.
Harry Langdon Reeder to be major.
Jay Edward Gillfillan to be major.
Earl Shuman Gruver to be first lieutenant.

FIELD ARTILLERY

Charles School Blakely to be lieutenant colonel.
Warren Cole Stout to be first lieutenant.
Paul Russell Covey to be first lieutenant.

QUARTERMASTER CORPS

Richard Jaquelin Marshall to be major.

COAST ARTILLERY CORPS

Kenyon Putnam Flagg to be captain.
Joseph Burske Hafer to be captain.
Edward Lucien Supple to be captain.
Samuel McCullough to be captain.
Russell Emerson Bates to be first lieutenant.

SIGNAL CORPS

David Barbour Barton to be first lieutenant.

POSTMASTERS

ALASKA

Lillian H. White, Kodiak.

COLORADO

Walter P. Merrill, Brighton.

ILLINOIS

Louis C. Schultz, Chebanse.
Charles E. Hartman, Mount Carroll.
Willis D. Coffland, Seaton.
Burnham M. Martin, Watseka.
John F. Shimkus, Westville.

INDIANA

Harold P. Willoughby, Spencer.

KANSAS

Charles E. Schul, Grenola.
Alice M. McLavy, Morganville.
Edgar F. Brungardt, Victoria.

LOUISIANA

George W. Taylor, Franklin.
Elson A. Delaune, Lockport.
Melvin P. Palmer, Morgan City.

MICHIGAN

Laurence C. Snyder, Blanchard.

NEW YORK

Thomas C. Richardson, Auburn.
Adam Metzger, Callicoon.
Nellie Fredricson, Cornwall on the Hudson.
L. Frank Little, Endicott.
Ralph D. Sanford, Hammondsport.
Mary A. Blazina, Harrison.
Harry M. Lanpher, Lowville.
J. Frank Smith, Patterson.
Austin E. Hummel, Prattsville.
George A. Hager, Watertown.
Thomas Wheatcroft, Watervliet.
Charles J. Ryemiller, West Sand Lake.
Mabel Parker, Yulan.

NORTH DAKOTA

John W. Campbell, Ryder.

OHIO

Ralph B. Troyer, Continental.
Irvin F. Sherman, Deshler.

OREGON

George B. Bourhill, Moro.

TEXAS

Charles W. Ford, Gatesville.
Carroll T. Coolidge, Pasadena.

UTAH

Andrew Adamson, jr., North Salt Lake.

WYOMING

William G. Haas, Cheyenne.

## HOUSE OF REPRESENTATIVES

### SATURDAY, *May 5, 1928*

The House met at 12 o'clock noon.

The Right Rev. Monsignor P. C. Gavan, pastor of the Sacred Heart Church, Washington, D. C., offered the following prayer:

Almighty and everlasting Father, Spirit of truth and justice to every creature, from whom graciously comes every good and perfect gift, grant, we beseech Thee, that Thy servants, gathered here in this august assembly, may be inspired always with so great a love of this same truth and justice that all their deliberations and enactments may bring greater honor to Thy holy name, greater glory to our beloved country, and greater peace and contentment to every citizen throughout the land. We ask this favor of Thee, O Heavenly Father, through Jesus Christ, Thy Son, our Lord and Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed with an amend-

ment, in which the concurrence of the House of Representatives was requested, a bill of the House of the following title:

H. R. 10799. An act for the lease of land and the erection of a post office at Philippi, W. Va., and for other purposes.

The message also announced that the Senate agrees to the conference report and to the amendments of the House of Representatives to the amendments of the Senate Nos. 1, 10, and 11 to the bill (H. R. 9481) entitled "An act making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1929, and for other purposes," and recedes from its amendments Nos. 7, 8, and 9 to said bill.

The message further announced that the Senate had passed bills and a joint resolution of the House of the following titles:

H. R. 4357. An act for the relief of William Childers;

H. R. 6492. An act to authorize the Secretary of War to donate to the city of Charleston, S. C., a certain bronze cannon; and

H. J. Res. 177. Joint resolution authorizing the erection of a flagstaff at Fort Sumter, Charleston, S. C., and for other purposes.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11577) entitled "An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes."

ADDITIONAL CONFEREES ON AGRICULTURAL SURPLUS CONTROL BILL

Mr. HAUGEN. Mr. Speaker, the Senate appointed five conferees on the bill S. 3555, the agricultural surplus control bill. The House appointed only three. I ask unanimous consent that the number of the House conferees be increased to five.

The SPEAKER. The gentleman from Iowa asks unanimous consent that the number of the House conferees on the agricultural surplus control bill be increased to five. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, I reserve the right to object long enough to call attention to the fact that the suggestion made by the gentleman from Louisiana [Mr. O'CONNOR] must have carried very great weight overnight and have soaked into the noggin of the gentleman from Iowa [Mr. HAUGEN] sufficiently to prompt him to ask for five conferees on the part of the House.

Mr. HAUGEN. Oh, the gentleman from Iowa did not have any knowledge of the number of conferees appointed by the Senate at the time. Had I known there were to be five I would have asked for five on the part of the House.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. At the request of the chairman of the Committee on Agriculture the Chair appoints the following additional conferees.

The Clerk read as follows:

Mr. WILLIAMS of Illinois, Mr. KINCHELOE.

COMPENSATION OF WORLD WAR MOTHERS

Mr. ELLIOTT. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein a short resolution adopted by the American War Mothers of Indiana upon the subject of legislation affecting the compensation of World War veterans.

The SPEAKER. Is there objection?

There was no objection.

Mr. ELLIOTT. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following short resolution adopted by the American War Mothers of Indiana upon the subject of legislation affecting the compensation of World War veterans:

Resolution

Whereas it has been our experience as American War Mothers engaged in taking care of the needs of the service men ever since the World War, that a large part of the suffering imposed upon the veterans is due to the fact that the compensation boards and Government officials arbitrarily change the ratings adjudicated in favor of said veterans, without notice, without hearing, and without an opportunity to oppose the reduction; and

Whereas we feel the veterans of the World War should be placed upon the same plane and given the same rights and privileges of the pensioners of the former wars; and

Whereas adjudication of compensation otherwise known as a pension can not be taken away from the veterans of former wars without an opportunity to be heard against the taking away of said pension or the reduction of said pension: Be it therefore

*Resolved by the American War Mothers of Marion County in meeting assembled this 28th day of February, 1928,* That we hereby petition both the United States Senators from the State of Indiana and all Congressmen from the State of Indiana to introduce a bill prohibiting the taking away of compensation or the reduction thereof until the service man has had reasonable notice and opportunity to oppose said taking away or said reduction.

Mrs. E. May Hahn, president; Mrs. C. E. Hostetler, secretary; Mrs. Ollie Barker, Mrs. Rose M. Teighte, Mrs. C. W. Jonior, Mrs. Ella Akir, Mrs. C. H. Regula, Mrs. R. L. Fitch, board; Mrs. Zella Ryan; Mrs. Emma Flick.

Indorsed by executive board of Indiana American War Mothers March 31, 1928.

Mrs. HENRY P. PEARSON,
*State President.*
Mrs. S. C. GIBSON,
*State Legislative Chairman.*
Mrs. J. F. KUTCHBACK,
*Chairman of Legislation.*

FLOOD CONTROL

Mr. WHITTINGTON. Mr. Speaker I ask unanimous consent to extend my remarks in the RECORD upon the subject of the cost of flood control on the Mississippi River under the Jones-Reid bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. WHITTINGTON. Mr. Speaker, the conference report on S. 3740, commonly known as the Jones-Reid flood control bill, is pending before the Senate and the House. Untruthful reports as to the costs of the flood-control project are being circulated. Unfounded and inaccurate statements by selfish and designing interests as to the costs of the project have been advanced. The evident purpose of some is to deceive, while the aim of others is to delay, hinder, and oppose adequate flood control. There is no difficulty about the estimated costs.

Careful surveys and examinations have been made and exhaustive hearings have been conducted. The committees of Congress were fully and accurately advised as to the costs of the various items embraced in the project. Congress and the country are entitled to know the estimated costs of flood-control work under the pending bill. The authorization is not based upon guesses, but is based upon careful estimates. Amendments covering surveys, maintenance, repair, and improvement of tributaries were added to the original bill. The authorization has been increased by the costs of these additional items. The unfounded attacks on the pending bill are not only deceptive, but are in reality stabs in the back. They are not supported by any semblance of fact. I therefore invite the attention of all to the estimated costs of the project as shown by the record. There is no foundation for the extravagant report that the project will cost a billion or a billion and a half dollars. The real truth is that the project will cost a little more than one-third of a billion dollars.

Two plans have been under consideration for the solution of the problem of flood control, one by the Mississippi River Commission called the commission plan, and one by the Chief of Engineers called the Jadwin plan. Both plans were based upon the accumulated surveys and studies of years. Both were based upon previous investigations in the light of all great floods. Careful studies have been made of all areas. The main engineering features of the two plans are substantially the same. Both provide for flood control and for navigation. Levees and revetment, or bank stabilization, essential for both flood control and navigation, are the backbone of each plan. Both plans provide for raising, strengthening, and enlarging the levees from Cape Girardeau, just above Cairo, to the Gulf. The Jadwin plan provides for raising the levees from 3 to 5 feet along the Mississippi River. Both plans provide for a diversion through the Cypress Creek or Boeuf Basin, for a flood way through the Atchafalaya Basin and a spillway at Bonnet Carre. The Jadwin plan provides for a maximum diversion of 900,000 cubic feet through Cypress Creek, while the commission plan provides for a diversion of 600,000 cubic feet. The Jadwin plan provides for a maximum diversion of 1,500,000 cubic feet through the Atchafalaya Basin, while the commission plan provides for approximately 900,000 cubic feet.

The Bonnet Carre spillway is the same in each plan. The Boeuf and Atchafalaya diversions are wider and cover more lands under the Jadwin plan than under the commission plan. The differences between the two plans are economic rather than engineering. The commission recommends, substantially, flood control at Federal expense, while the Jadwin plan contemplates that the local interests should provide for rights of way for all levees and for flowage rights along diversions and flood ways. Both provide that the local interests furnish rights of way for the levees along the main river. The commission recommends higher levees with smaller diversions than the Jadwin plan

south of the mouth of the Arkansas River. The Jadwin plan contemplates a flood way for the relief of Cairo, while the commission recommends higher levees in the vicinity of Cairo.

JADWIN PLAN

The Jones-Reid bill adopts the project in accordance with the engineering plans recommended by Gen. Edgar Jadwin, Chief of Engineers. A board is created by section 1 of the act, and the board is to consist of the Chief of Engineers and the president of the commission and a civilian engineer to be appointed by the President. The board is to consider the engineering differences between the commission plan and the adopted project. It makes recommendations to the President of the United States. The decision of the President is final and must be followed in carrying out the project. In other words, the Jadwin engineering plan, unless modified by the President, will be followed.

Misleading statements have been made about the authority of this board as created in section 1 to involve the Government in the expenditure of large sums of money. The language of the act is that the board has no power or authority except to pass on the engineering differences of the two plans. This is a fair sample of the misrepresentations circulated as to the provisions of the bill. The board, of which the civilian engineer is a member, has no authority to make contracts. All work and contracts will continue to be handled by the commission under the supervision of the Chief of Engineers and under the direction of the Secretary of War.

It is fair to say that the commission plan in some of its details was not final. The commission recommended further study to relieve the situation at Cairo. It is also fair to say that the Jadwin plan was definite and comprehensive. It provided for the maximum flood. The plan is capable of expansion. It was the only definite plan based upon careful studies and surveys that was submitted to the committees of Congress. I make this statement in justice to the Chief of Engineers, Gen. Edgar Jadwin, a great engineer, although I do not agree with some of his conclusions and some features of his plan.

FLOWAGE RIGHTS

The local interests are to furnish rights of way for levees on the main river and rights of way for levees on the tributaries in so far as they are affected by the backwater of the Mississippi River. The bill contemplates that the Government will provide the flowage rights through flood ways, diversions, and spillways, and the rights of way for levees along the diversions. Much has been said as to the value of lands and flowage rights that must be acquired for flood ways and diversions. The United States Treasury is carefully safeguarded in the bill by the enactment of condemnation statute that provides for the acquisition of any lands, easements, or rights of way, which in the opinion of the Secretary of War and the Chief of Engineers are necessary to carry out the project. These two governmental officials are to determine the flowage rights necessary. The measure of damages for property taken or destroyed is that which obtains under the general law. This measure has not been enlarged. The provision of the Constitution as to the measure of damages obtains. The provisions of the Constitution furnish the yardstick for compensation. Condemnation proceedings may be conducted only in Federal courts.

The compensation for any property taken is determined in the courts of the United States. Commissioners to determine values are appointed only by the Federal court. State courts and local juries are eliminated.

The Jadwin plan, with the modifications contained in the bill, is the basis of the legislation. I shall hereafter call attention to the modifications.

COSTS

The bill carries an authorization of $325,000,000. If the Jadwin plan had been adopted as the project without any provisions for changes, the estimated cost, as shown by paragraph 137, page 32, of the Jadwin report, would have been $296,400,000. The said estimate includes $110,000,000 for channel stabilization or navigation, in which the whole country is interested; it includes the Bonnet Carre spillway, the raising of the levees from 3 to 5 feet along the Mississippi River; it includes the building of auxiliary levees, rights of way for which are to be furnished by the local interests; it includes mapping; and it includes levees along spillways, flood ways, and diversions. There is no guesswork about the cost of the project. If there had been no change in the project the authorization would have been the said sum of $296,400,000. What changes are made in the bill as agreed to by the conferees that increase the costs?

The President recommended a local contribution of 20 per cent. The testimony shows that he did not insist upon this amount but merely the recognition of the principle. The 20 per cent of the cost of the project, as shown by section 41, page 11, of the Jadwin report, would have amounted to $37,440,000. The President, however, made it known to Congress that he had receded from this position. He was willing to eliminate the local contribution of 20 per cent.

The late Martin Madden, on April 23, as shown by the CONGRESSIONAL RECORD of that date (p. 7024), just four days before his death, stated substantially that the administration would assume the entire liability for flood control provided the local interests furnished rights of way for all levees. It was estimated that the rights of way for levees along the diversions would cost a million dollars. I quote from the speech made by Mr. Madden April 23 (p. 7024):

> Why do you want to take the chance of losing the whole thing by veto, when by the expenditure of a million dollars you can furnish the foundation for levees, etc.?

Mr. Madden stated, substantially, that the President desired the United States to furnish the floor, to use his language, for diversions. When asked if the United States was to furnish flowage rights through diversions, as shown by page 7025 of the RECORD, Mr. Madden replied:

> It includes the construction of these spillways, it includes the supplying of the flowage rights, or the taking of the chance of that cost being assumed by the Government of the United States, as it does of the Atchafalaya.

No definite or certain plan for the local interests to furnish the rights of way for levees along the diversions that would be legally binding was suggested, and since these levees are for the benefit of the entire lower valley it was argued that the burden should not be borne by the area along the diversions. Personally, I wish these rights of way might be provided by the valley. The President receded from the requirement of local contribution. The Jadwin plan was thus modified to meet this concession. The pending bill modifies the Jadwin plan in two other particulars. The views of the President were practically met. The difference resolved itself into a question of who should furnish the rights of way for levees along the diversions. Surely neither the Executive nor Congress would withhold flood control from the lower valley because of an estimated difference of a million dollars!

Again, the bill as agreed to by the conferees merely changes the Jadwin plan in a few particulars. I call attention to the changes. I take up the bill section by section.

RIPARIAN OWNERS

First, there is the so-called Garrett amendment, which is the concluding part of section 3. This amendment provides that if in carrying out the project it is found impracticable to construct levees, either because such construction is not economically justified or because it is unsound from an engineering standpoint, and if the lands in such stretches of the river are subject to overflow and damage by reason of the construction of levees on the opposite side of the river, then the Government may acquire the lands or the floodage rights over these lands. The conferees modified and changed the Garrett amendment very materially and restricted the scope of the amendment as adopted by the House and substantially reduced the costs under the amendment. The Garrett amendment was accepted on the floor of the House under the five-minute rule by the majority leaders through their spokesman, the late Mr. Madden, not only once but twice. Twice on the floor Mr. Madden agreed to the amendment. I understand that the language of the amendment as embraced in the conference report is satisfactory to the Chief Executive. This amendment has reference to the lands along the bluffs in Tennessee, Kentucky, Louisiana, and Mississippi. It involves, as shown by page 1739 of the hearings, a small area of approximately 260,000 acres in Tennessee, about 30 per cent of which is cultivated, and about 140,000 acres in Mississippi, of which approximately 10 per cent is in cultivation. These lands would be largely covered by the flood waters of the Mississippi River if there were no levees on the opposite banks. Only the floodage rights, because of the increased water levels, are embraced in the Garrett amendment. Certainly no complaint can be made against this amendment because of increased costs, for they are relatively small and will be confined to floodage rights. The language can have reference only to great floods. It does not cover ordinary flowage rights, but only increased floodage rights.

FLOWAGE RIGHTS

Secondly, the Government is to provide flowage rights from Cairo to New Madrid, hereinafter referred to as the New Madrid flood way; for the diversion at Cypress Creek through the Boeuf Basin, hereinafter called the Boeuf diversion; for the flood way through the Atchafalaya Basin, hereinafter called the Atchafalaya flood way; and for the flood way at Bonnet Carre. The administration was represented as being favorable to being

responsible for the flowage rights. The Jadwin plan is accordingly modified in the bill to add the estimated costs of the flowage rights through the spillways, flood ways, and diversions mentioned, and to provide that the United States shall furnish the rights of way for levees along the diversions.

It is admitted that these diversions are for the benefit of the entire valley; they are not alone for the protection of southeast Missouri, Arkansas, or Louisiana. Their cost should be a common charge against the Government. Mr. Madden, manifested a fine spirit of fairness and justice in treating this great national problem, conceded that the Government should be responsible for the flowage rights.

Much has been said about the costs of lands for these diversions. Inaccurate statements have been made both as to the value and the amount of the lands for flowage rights in the diversions. The unfounded statements as to the cost of the project center very largely around the misrepresentations as to the costs of the flowage rights in the diversions. The loose and wicked statement that the project will cost a billion or a billion and a half dollars is coupled with the cost of flowage rights through diversions. I answer once and for all that any such claims or statements relative to diversions are wholly unfounded. They are not supported by the hearings, they are not supported by any statements before the committee. I now proceed to give the facts and the figures and I shall refer to the records.

NEW MADRID FLOOD WAY

I speak first of the flowage rights through the New Madrid flood way. I call attention to the testimony of General Jadwin himself. I refer to page 4072 of the hearings before the House Flood Control Committee. General Jadwin stated that there are approximately 225 square miles, or 144,000 acres, in the New Madrid flood way, and that 70 square miles, or approximately 44,000 acres, of this territory is backwater now subject to overflow, leaving 156 square miles, or about 100,000 acres, not subject to backwater, of which 60 per cent is swamp and timberland. I put it another way: General Jadwin states that the area in the New Madrid flood way, not including backwater, is 99,840 acres, and that the backwater area in this flood way is 44,800 acres, or a total of 144,640 acres. It is estimated that this flood way would be overflowed once every four or five years. I respectfully submit that the fair testimony, the reasonable testimony, as to the value of these flowage rights would not be in excess of $25 per acre, aggregating $3,500,000. The outside figure for flowage rights in this area, according to the testimony of General Jadwin and other witnesses, would not be in excess of $50 per acre, or approximately $7,000,000.

BOEUF DIVERSION

The commission plan provides for diverting 600,000 cubic feet per second through Cypress Creek and the Boeuf Basin. Careful estimates were made as to the area to be embraced in the Boeuf flood way. The exact acreage was computed and values were ascertained to provide for the diversion. The commission plan adopted the report of the diversion board. As shown by the report of the diversion board, filed and printed as Committee Document No. 3, page 9, paragraph 23, and embraced in the commission plan as shown on page 55, paragraph 250, of the special report of the Mississippi River Commission, there are in the Boeuf diversion 1,020,000 acres of land, at an estimated cost of $30 per acre, or $30,600,000.

There are also included 90,000 acres, at $20 per acre, or $1,800,000, making a total of $32,400,000 for the actual value of the lands, 75 per cent of which are swamp lands, as shown by the testimony of Col. C. L. Potter, president of the commission, and as shown by the testimony of General Jadwin on page 4115 of the hearings. This includes the value of the lands in fee. Under the Jadwin plan it is estimated that it is not necessary to acquire the fee. They would be overflowed once in 10 or 12 years. A fair estimate of the flowage rights will not be in excess of 25 per cent of the value of the fee. It may be much less. If the figure is fixed at 25 per cent, inasmuch as the lands may be used 9 out of 10 years, the value of the flowage rights for the Cypress Creek or Boeuf diversion would be approximately $8,000,000 on the estimate under the commission plan, the average for flowage rights being about $8 per acre for both cleared and swamp lands. As a matter of fact, the hearings and the record disclosed that the flowage rights could be obtained for less than this amount.

The Jadwin plan did not contemplate that the United States should provide the flowage rights. The Chief of Engineers did not state accurately in the hearings the acreage involved in the diversion. He has this day furnished me with a statement showing that under the Jadwin plan the Boeuf diversion will contain 1,195,421 acres, which is not very much in excess of the estimate of the commission. General Jadwin advises that a backwater area of 1,239,458 acres is also included in the Boeuf diversion. It is not contemplated that the Government will acquire the flowage rights for the backwater area along the Boeuf Basin, for the project does not provide for the protection of backwater areas in the alluvial valley. Nor does the project contemplate acquiring flowage rights over navigable streams or other waters in the Boeuf or Atchafalaya Basins. The acreage under the Jadwin plan is larger than under the commission plan, but this acreage obtains largely in backwater areas where no compensation would have to be paid. At $8 per acre under the Jadwin plan the flowage rights over lands in the Boeuf diversion would aggregate $9,000,000, and certainly they should not exceed $15,000,000 at the outside limit.

The Government should pay for these flowage rights. The United States permitted and consented to the construction of a levee across the mouth of Cypress Creek. There was a natural outlet, and the Government closed it. At the time Cypress Creek was closed it was thought that levees only would provide complete flood control. The local interests relied upon the judgment of the commission. They have spent millions of dollars in constructing works and in draining and improving lands in the Boeuf area. There are natural streams in the area flowing toward the south. Wherever there are backwater areas or natural streams the flowage rights will not have to be acquired.

The Secretary of War and the Chief of Engineers represent the Government. If the waters are to be diverted the diversion will be approximately 12 miles wide, with levees 12 to 15 feet high and will be 165 miles long. It will cover lands that are being cultivated; it will destroy improvements that have been made. These lands are bonded for millions of dollars to construct drainage which the commission required to be constructed before the outlet at Cypress Creek was closed. Moreover, the local interests contributed one-third the cost of the construction of the levees on the main river.

I call attention to the fact that under the Jadwin plan it has been estimated that 1,952,666 acres, as shown by page 1810 of the hearings, would be required for the flood way. This evidently includes, according to the calculations of the Government engineers who prepared this estimate, large backwater areas. The value of the flowage rights, according to this estimate, made by Army engineers, and the calculation and investigations made by the diversion board, composed of Army engineers, should not exceed $15,000,000. The acreage in the Atchafalaya flood way on said page 1810 is given at 1,088,640 acres.

ATCHAFALAYA FLOOD WAY

Fortunately, the rights of way through the Atchafalaya flood way have been carefully investigated. We are not dependent upon the investigations made immediately after the flood. On April 17, 1926, Congress provided for an investigation for the Atchafalaya flood way and Bonnet Carre spillway, and the report is printed as Document No. 95. It recommends a diversion of approximately 900,000 cubic feet through the Atchafalaya Basin, and the construction of a spillway at Bonnet Carre to divert about 250,000 cubic feet.

Col. W. P. Wooten was chairman of the spillway board. He was one of the most careful and one of the most accurate witnesses who testified. He was one of the most satisfactory engineers who appeared before the committee. He submitted to the committee a detailed statement as to the estimated costs of the Atchafalaya flood way. It covered the yardage in the levees, the changes in railway construction, the changes in highway construction, the flowage rights and easements over lands. The number of acres is given, the assessed valuation is furnished, and the acreage in each parish is detailed. There were five other eminent Army engineers on the board with Colonel Wooten. They joined with him in the report. The report is included in the commission plan, as shown by page 58, section 269, of the report of the Mississippi River Commission, submitted on November 28, 1927, and printed as Committee Document No. 1.

Colonel Wooten, as shown by page 1945 of the hearings, estimated the area in the Atchafalaya flood way at 750,000 acres, 10 per cent of which is in cultivation, the remainder of which is swamp and overflow land. He ascertained the assessed valuation of the lands and they are set forth on pages 1999 and 2000 of the hearings. While under the laws of Louisiana lands acquired for rights of way for levee purposes can not be valued in condemnation proceedings in excess of the assessed valuation, yet Colonel Wooten estimated the actual value to be largely in excess of the assessed valuation. There is no guess as to the value. It was carefully ascertained. He gives the figures, as shown on page 2000, at $7,423,000.

But the Jadwin plan provides for a diversion of approximately 1,500,000 cubic feet per second through the Atchafalaya Basin. General Jadwin estimates that the acreage in the Atchafalaya flood way is 1,278,817 acres, which includes the

backwater. The spillway board spent many months in making investigations and accumulated accurate data. The flowage rights over cleared and uncleared land are estimated at $10 per acre. Under the Jadwin plan the flood way will be wider and the value of the flowage rights can not be in excess of $13,000,000, or about $5,500,000 in excess of the value of the spillway board.

The conference committee is to be congratulated upon the material amendment in section 4. This section has been called the railroad section. The conference committee has materially amended the section as it passed the Senate and as it passed the House. The Government is only liable for flowage rights. The provision only includes a declaration that the United States will furnish the flowage rights. If the United States is to furnish the floor for the diversions, then the conference committee has met the views of the President. Flowage rights mean nothing more nor less than the floor for the diversions.

But it was suggested during the debate that the Government pay damages after the flood had wrought the destruction. This would mean that the Government would pay after each succeeding flood. I submit that the Public Treasury would be safeguarded by the Government acquiring the flowage rights in advance. It would be better than subjecting the Government to interminable litigation following each flood. Moreover, it would be fairer and it would be more just. The waters may go through these diversions once in 10 years or they may go through oftener. Whether they go through seldom or often it is a mighty river, and with the Boeuf diversion constitutes a river some 275 miles long with an average width of 12 miles, and with levees 12 to 18 feet high, from the northern boundary line of Louisiana to the Gulf of Mexico.

Again, the Government has the power of eminent domain under the rivers and harbors acts, but the Mississippi River Commission, authorized to spend millions of dollars, has not the power of eminent domain. The condemnation statute now enacted for the execution of the project is for the protection of the interests of the United States, even though it may not be exercised.

I have had considerable legal experience in flood and drainage works. I have assisted in acquiring flowage rights. They are acquired in all reservoir projects. Flowage rights in both reservoirs and diversions are essential. I know of no case where a large diversion has been constructed without flowage rights having been secured. It is admitted that the Government would be liable in the event of floods.

The wise thing to do is to protect the Government against liability by acquiring flowage rights in advance. The fair thing for the citizens and residents is for the bill to contain a declaration that the Government will be responsible for flowage if the Government does not acquire the flowage rights and if the diversion is constructed. Then the citizen would have recourse but if the declaration is not made he might have no recourse unless his property was destroyed. I challenge those who advocate the program of committing the Government to the policy of paying for damages after the flood to show a case where diversions have been constructed under such a policy. The program adopted in the pending bill by a declaration for acquiring flowage rights is the usual and proper policy to be pursued in all diversion works.

Again, the bill as agreed to by the conferees is carefully drawn. The Chief of Engineers and the Secretary of War are the judges as to what flowage rights shall be acquired. If they acquire none—if they think that none should be acquired—the diversion will not be delayed, for the property owners will not be without remedy. They can sue, and the Constitution fixes the measure of their damages. It may be that the board created by section 1 of the act will recommend a controlled diversion. It would be in line with good engineering. It would eliminate the fuse-plug levee. It would be economical for the Government, and it would protect the adjacent country. If the controlled diversion is recommended by the board in passing upon the differences between the Jadwin plan and the commission plan, it will greatly reduce the cost of flowage rights. The crevasse by the fuse-plug levee route would be eliminated. Nothing save death itself is so much dreaded in the Mississippi Valley as a crevasse in the levee.

Moreover, the conferees have agreed upon an amendment to section 4 which provides that the benefits to property shall be taken into consideration by way of reducing the amount of compensation paid. This will safeguard the Government. It will safeguard the Government in any claims that may be propounded for highway and railway damages.

I have not included any damages to highways or railways. There will be general benefits to both. Personally, I think the alleged damages to railways and highways have been exaggerated. The probability is that the project can be so worked out, except at Bonnet Carre, that it will not be necessary to make any extensive changes in railways and highways. The bill as agreed to by the conferees has eliminated relocating highways and railways. The Government will respond in damages if the flowage rights are not acquired over railways and highways. The view of the administration has been met in this regard.

The change that will be necessary in railways and highways at Bonnet Carre will not exceed the estimated cost of about $2,000,000, as shown on page 2001 of the hearings. I may add in this connection that the estimated cost of the Bonnet Carre flowage rights and rights of way, as shown on page 2000 of the hearings, is $848,000. The highway and railway relocations as stated here would not exceed $2,000,000 additional. In other words, modifications in the bill as to Bonnet Carre would not involve an increased expense in excess of about $3,000,000.

RIGHTS OF WAY

Thirdly, the bill modified the Jadwin plan by requiring the Government to furnish the rights of way for levees along the diversions. They are for the general benefit. They may be acquired by purchase or by condemnation. There is no guesswork about the number of acres required. The Chief of Engineers informs me that the area for rights of way for levees in the New Madrid flood way is 2,700 acres, in the Boeuf diversion 9,500 acres, and in the Atchafalaya flood way 9,070 acres, or a total of 20,270 acres. Much of this land is cut over. The hearings disclosed that the average value, including both cleared and uncleared lands, would not exceed $50 per acre. The costs of these rights of way would not aggregate more than $1,000,000.

ADDITIONAL ESTIMATES

I have not included the flowage rights over the lands covered by the Garrett amendment. Only a comparatively small amount is involved. It may be years before the amount is ascertained. It may require additional legislation to ascertain the amount and it will certainly require appropriations to pay it.

Section 6 provides that not more than $10,000,000 shall be spent for levee work between Cape Girardeau and Rock Island on the Mississippi River and on the tributaries and outlets of the Mississippi River in so far as they are affected by the flood waters of the Mississippi. The local interests must pay one-third the cost of the levees and must furnish the rights of way for levees and maintain them when constructed.

Section 7 provides a fund of $5,000,000 for rescue work and for repair and maintenance on tributaries. This is a proper provision. Great damages were wrought on the tributaries of the Mississippi River.

Section 10 authorizes $5,000,000 to be used for immediate surveys for flood control, reclamation, navigation, and power on the tributaries of the Mississippi. The work is to proceed immediately. The matter of reservoirs is to be investigated promptly and these surveys must be reported to Congress. The majority leaders agreed to the amendment covering surveys.

If the bill had not been amended to provide for surveys and additional work on the tributaries, the probability is that the project could have been constructed for approximately the amount of the authorization in the bill. Subsequent authorizations would have been required in the event of claims being established because of damages to railways and highways in diversions.

The following is a summary of the cost of the project with the modifications embraced in the pending bill:

| | |
|---|---|
| 1. Jadwin project, Jadwin report (p. 32, sec. 137) | $296,400,000 |
| 2. Flowage rights in New Madrid flood way, Jadwin testimony, 144,640 acres | 7,000,000 |
| 3. Flowage rights in Cypress Creek diversion, Mississippi River Commission (p. 55, sec. 249), including estimate of diversion board report, at one-fourth of fee (p. 9, sec. 21), $8,000,000, but figuring Jadwin acreage, 1,195,421 acres, not including backwater areas | 15,000,000 |
| 4. Flowage rights in Atchafalaya flood way (p. 2,000 hearings), spillway board estimate, $7,423,000, figured at Jadwin acreage, 1,278,817 acres | 13,000,000 |
| 5. Rights of way for levees along diversions, 20,270 acres | 1,000,000 |
| 6. Rights of way and flowage rights through Bonnet Carre, $848,000, including highway and railway relocation $2,000,000, approximately | 3,000,000 |
| 7. Surveys for tributaries | 5,000,000 |
| 8. Repair and maintenance on tributaries | 5,000,000 |
| 9. Levee work on tributaries | 10,000,000 |
| Total estimated cost of Jadwin plan as modified by pending bill | 355,400,000 |

Errors as to costs have found their way into the public press, and if reports be true they have reached the ears of those in authority. The country is demanding flood-control legislation. The pending bill safeguards the Treasury. I have given the estimated costs and I have relied on the record. The

legislation is the most comprehensive flood control bill ever passed by a legislative body. Every word in the bill has been inserted carefully. Every section has been revised. The conferees have materially improved the bill. The legislation is not perfect. All provisions that would have made unnecessary and unjustifiable demands on the Treasury have been eliminated. The recommendations of the Executive have been respected and largely embodied in the bill. The report of the conferees should be adopted. The reliable, authentic estimated costs of flood control of the Mississippi River will not exceed $355,400,000.

Colonel Wooten, chairman of the spillway board, as shown by pages 1997 and 1998, has estimated that the costs of railway changes in the Atchafalaya flood way are $6,883,000. The costs of highway changes in the Atchafalaya are $2,992,000. These are not guesses. They are careful estimates. As shown by page 55, paragraph 250 of the commission report, the railway changes in the Boeuf flood way are estimated at $7,800,000, the highway changes at $3,900,000, and the drainage changes at $4,600,000, or an aggregate of $16,300,000 in the Boeuf flood way and an aggregate of $9,875,000 in the Atchafalaya flood way. There will be comparatively small items covering railway and highway changes in the New Madrid flood way, but the careful estimates of the Government covering railway and highway changes in the flood ways and diversions will not exceed an additional $25,000,000. Therefore the total estimate of the cost of the Jadwin project as modified by the pending bill will not exceed $380,000,000.

If additional or increased expenses are to be incurred, they will be incurred only after the President has approved the recommendations for any increased expenditures, as provided in section 1 of the bill. He would thus be responsible for any increases over and above the estimated cost of the project. It is not expected that the President will incur additional costs. The flood control and improvement of the Mississippi River under the Jones-Reid bill will not likely exceed the estimated cost of $355,400,000 and will in no event exceed the above sum of $380,000,000.

EXTENSION OF REMARKS

Mr. DOUGLASS of Massachusetts. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD on the recent conference report upon the independent offices appropriation bill. Also, I ask unanimous consent to extend in the RECORD a speech prepared by my colleague, the late Representative James A. Gallivan, of Massachusetts, which he intended to deliver on the merchant marine bill now pending.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to extend his remarks in the RECORD upon the independent offices appropriation bill conference report, and also to extend his remarks in the RECORD by printing therein a speech prepared by the late Representative James A. Gallivan. Is there objection?

There was no objection.

RECONDITIONING OF THE "MOUNT VERNON" AND "MONTICELLO"

Mr. DOUGLASS of Massachusetts. Mr. Speaker and Members of the House, I urge that the House do now recede from the position it took when the item contained in the independent offices appropriation bill for the reconditioning of the Shipping Board vessels *Mount Vernon* and *Monticello* was previously here, prior to the measure going to the Senate, and resulting in the disagreement between the Senate and House conferees on the matter of whether the money for the work should be taken from the construction loan fund or made as a straight appropriation. I feel that whether the money for the reconditioning of these ships comes from the construction loan fund, or otherwise, as previously insisted upon by the House, is comparatively immaterial. What is agreed by most everyone with the country's best interests at heart is that the project or refitting these boats is a very desirable thing, and will prove a very fine investment for the Government.

We are all aware of the general unemployment situation throughout the country, but which as it effects our navy yard employees at this time is altogether alarming if not shameful. It is a situation that might well be given greater consideration by all of us.

Now, the refitting of the *Monticello* and the *Mount Vernon* at a cost of $12,000,000 will provide a greater volume of work than all that now being done by this Nation put together for transoceanic service. If we, without delay, pass the item appropriating the funds to commence the work on these boats we will be doing something that will provide work for a great many people now out of employment and thus relieve untold hardship to many families. The navy yards will undoubtedly bid for the work on these ships in competition with the private shipbuilding industry and either or both, the navy yard or private yard employees, will benefit by the assignment of these jobs.

There are various sound and substantial reasons why the reconditioning of these big Shipping Board boats will prove both desirable and profitable to the Government, while as far as can be ascertained the only objections to the work being done comes from foreign shipping interests, which have been outspoken and vigorous in their opposition. This is natural enough, since if we allow these ships to rot, or sell them at ridiculously below value prices, we will be once again throwing the manufactures and merchants of this country to the mercy of foreign manufactures and adverse foreign freight-pooling agreements.

The number of years these boats have been built has been raised as an argument against their being reconditioned, but we have it from the American Bureau of Shipping, which corresponds to the British Lloyds, that the hulls of these ships are in perfect condition and good for many years' service. That the two vessels when refitted will prove to be the equals of the finest steamships in the North Atlantic trade, with a speed of 20 knots an hour, and with baths with every stateroom. The fares will be those charged at present by slower ships of foreign owners, such as the *Majestic*, *Berengaria*, the *Mauretania*, and others.

As a paying proposition the reconditioning will likewise prove sound and profitable business for Uncle Sam.

To begin with these ships will earn the $1,275,000 annually paid foreign ships for carrying mail, and in addition will make it possible to save $275,000 a year on the cost of oil for the *Leviathan*. This latter expenditure amounts to the difference in cost between what the *Leviathan* now pays for oil in England, to make its return trip, and what would be saved by the *Mount Vernon* and *Monticello* carrying the *Leviathan's* return supply of oil.

It can not be denied that with an immediate assured income of $1,550,000 a year, on the above-mentioned two items alone, that the proposition to recondition the *Mount Vernon* and *Monticello* is good business and will add two vessels to the Shipping Board fleet which we may all take pride in as flying our flag.

ADDRESS OF HON. JAMES A. GALLIVAN

Mr. DOUGLASS of Massachusetts. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following speech prepared by my colleague the late Representative James A. Gallivan:

AMERICAN MERCHANT MARINE

Mr. Speaker, there are some very practical matters which must be understood, considered, and acted upon if the commercial and industrial integrity of this country is to be preserved and expanded with its future growth. Let me state some of them plainly, so that their significance can be grasped.

The United States has become predominantly and preeminently an industrial country. In agriculture and livestock industry the increase in population and the occupation of the open lands by settlers has made the raising of sheep and cattle a decreasing and declining activity. We no longer raise sufficient meats for our multiplying population to feed it at reasonable rates. Supremacy in the production of foods, cereals, and meats is passing to other lands and these necessities must be imported, and wool and hides for textile and tanning enterprises must come from the outside world. In a strict sense we have ceased to be self-producing and self-sustaining in the economic terms suitable to a nation of workers.

American industry grows more dependent daily on the raw materials of its outside world, and those imported materials must be paid for in American money or American manufactured goods.

Through the aid of tariff laws American industry is practically in control of the American market—the best on earth—but American industry is now able to supply the American market for 12 months by the labor and product of 6 months.

Unless we are able to dispose of industry's six months' surplus product somewhere—and that somewhere is to be found only in foreign markets—American industry and American workers must face the terrifying problem of every year of idle mills and shops and unemployment for their workers, with the suffering and the discontent such a condition predicates.

Idleness of industry and workers, of invested capital and labor, means a condition that even the richest democracy on earth can not face without misgiving, for here, in a representative government, under which the millions of workers are sovereigns and voters, unless we, the representatives, prevent such catastrophe by reasonable legislation, the people will find representatives who will.

It is our duty to pass the needed laws if we are to avoid national calamity, industrial disaster, and social upheaval; it is our duty to supply the foreign markets for our growing surpluses and thus prevent preventable evils.

It is axiomatic that trade follows the flag. It is equally true that trade must carry that flag to the markets it seeks, and the American flag must fly on American ships carrying American products if we are to gain foreign markets.

The carrier of cargoes sits at the first table, and when American cargoes are carried by foreign ships, flying foreign flags, the American trader must sit at the second table and take the skimmed milk, from which the foreign trader has skimmed the cream.

This question of American trade and commerce is not a political or party question; it is an American, a national, question, one that concerns every man and woman in the country, regardless of any political preference, for all share measurably for good or evil in the prosperity and adversity of the country. An idle and hungry American is not an impossibility; he is a potential and impending possibility, and he will be idle, hungry, angry, discontented, and ready for trouble in the evil day, no matter what his political faith may be, and equally ready to strike down the men and parties who have by neglect, obstinacy, ignorance, misguided partisanship, or persistent prejudice brought to America the evils that press upon the North and South, East and West, with equal severity.

With all our prosperity we are only a few jumps ahead of evil days; our foreign competitors are growing stronger and keener daily; they must be met in foreign markets, and here in our own home markets, aided and abetted by the domestic enemies inside our gates; they are undermining and underselling American industry and putting American workmen out into the streets, unemployed, unpaid, and unhappy.

We must guard the home market and conquer the foreign market. There is no altruism in commerce; no sloppy, international sentimentalism. Self-preservation is the first law of nature and nations, and enlightened self-interest the creed of commerce.

I have sought to present facts, not fancies, to this House, for America is at the crossroads of the world and these things emerge:

American social safety and industrial security demand 300 working days a year for capital and labor.

The trade and commerce upon which these are based demand foreign markets for industry's surplus.

American commerce must be borne all round the world in American ships flying the American flag, and we must frame our laws so that this end may be accomplished.

To-day most of our cargoes for foreign markets are carried in foreign ships flying foreign flags, and these ships are enabled to underbid and undersell American ships, because they are subsidized by their foreign governments to keep American shipping off the seas. American commerce pays out enough in freight charges to foreigners to support a splendid commercial navy, and the creation, fosterage, and conservation of such a navy is the sacred duty of our Government. Let us make laws and establish policies that will make it possible for an American commercial marine to live and flourish and make our industry and commerce independent in war and peace of alien intrigue and hostility.

An American merchant marine will serve every American interest—the farmer, the miner, the merchant, the manufacturer, and the worker, who is the source and support of our social condition, the American Atlas—and we must build up and sustain such merchant marine if the American Republic is to endure in peace and prosperity; the aid and evangel of America on the seven seas in peace, the ally and supplement of our Navy in the days of war and stress.

Let us never forget our experience in the World War and the price we paid on the sea to save democracy, and the price those we saved exacted from us when we went forth to save them.

In time of peace let us prepare to preserve the peace and not forget the lessons taught in war; and not the least of those lessons taught us, even if now being forgotten, was this: Trade follows the flag; fly it on the ships of the nations; the carrier of cargoes is the conqueror of commerce. An American merchant marine will carry our cargoes in peace and make us conquerors in war.

### LEAVE TO DISTRICT OF COLUMBIA COMMITTEE TO SIT DURING SESSIONS OF THE HOUSE

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent that the Committee on the District of Columbia may sit during the sessions of the House for two days to hold hearings.

The SPEAKER. The gentleman from Maryland asks unanimous consent that the Committee on the District of Columbia may have permission to sit for two days during the sessions of the House. Is there objection?

There was no objection.

### FIVE CIVILIZED TRIBES

Mr. LEAVITT. Mr. Speaker, I call up from the Speaker's desk the bill S. 3594, to extend the period of restriction in lands of certain members of the Five Civilized Tribes, and for other purposes, and ask unanimous consent for its present consideration.

The SPEAKER. The gentleman from Montana calls up the bill S. 3594, and asks unanimous consent for its present consideration. The Clerk will report the title of the bill.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the restrictions against the alienation, lease, mortgage, or other encumbrance of the lands allotted to members of the Five Civilized Tribes in Oklahoma, enrolled as of one-half or more Indian blood, be, and they are hereby, extended for an additional period of 25 years commencing on April 26, 1931: *Provided*, That the Secretary of the Interior shall have the authority to remove the restrictions, upon the applications of the Indian owners of the land, and may remove such restrictions, wholly or in part, under such rules and regulations concerning terms of sale and disposal of the proceeds for the benefit of the respective Indians as he may prescribe.

SEC. 2. That the provisions of section 9 of the act of May 27, 1908 (35 Stat. L. 312), entitled "An act for the removal of restrictions from part of the lands of allottees of the Five Civilized Tribes, and for other purposes," as amended by section 1 of the act of April 12, 1926 (44 Stat. L. 239), entitled "An act to amend section 9 of the act of May 27, 1908 (35 Stat. L. 312), and for putting in force, in reference to suits involving Indian titles, the statutes of limitations of the State of Oklahoma, and providing for the United States to join in certain actions, and for making judgments binding on all parties, and for other purposes," be, and are hereby, extended and continued in force for a period of 25 years from and including April 26, 1931, except, however, the provisions thereof which read as follows:

"*Provided further*, That if any member of the Five Civilized Tribes of one-half or more Indian blood shall die leaving issue surviving, born since March 4, 1906, the homestead of such deceased allottee shall remain inalienable, unless restrictions against alienation are removed therefrom by the Secretary of the Interior for the use and support of such issue, during their life or lives, until April 26, 1931; but if no such issue survive, then such allottee, if an adult, may dispose of his homestead by will free from restrictions; if this be not done, or in the event the issue hereinabove provided for die before April 26, 1931, the lands shall then descend to the heirs, according to the laws of descent and distribution of the State of Oklahoma, free from all restrictions: *Provided*, That the word 'issue,' as used in this section, shall be construed to mean child or children: *Provided further*, That the provisions of section 23 of the act of April 26, 1906, as amended by this act, are hereby made applicable to all wills executed under this section:"

which quoted provisions be, and the same are, repealed, effective April 26, 1931: *Provided further*, That the provisions of section 23 of the act of Congress approved April 26, 1906 (34 Stat. L. 137), as amended by the provisions of section 8 of the act of Congress approved May 27, 1908 (35 Stat. L. 312), be, and the same are hereby, continued in force and effect until April 26, 1956.

SEC. 3. That all minerals, including oil and gas, produced on or after April 26, 1931, from restricted allotted lands of members of the Five Civilized Tribes in Oklahoma, or from inherited restricted lands of full-blood Indian heirs or devisees of such lands, shall be subject to all State and Federal taxes of every kind and character the same as those produced from lands owned by other citizens of the State of Oklahoma; and the Secretary of the Interior is hereby authorized and directed to cause to be paid, from the individual Indian funds held under his supervision and control and belonging to the Indian owners of the lands, the tax or taxes so assessed against the royalty interest of the respective Indian owners in such oil, gas, and other mineral production.

SEC. 4. That on and after April 26, 1931, the allotted, inherited, and devised restricted lands of each Indian of the Five Civilized Tribes in excess of 160 acres shall be subject to taxation by the State of Oklahoma under and in accordance with the laws of that State, and in all respects as unrestricted and other lands: *Provided*, That the Indian owner of restricted land, if an adult and not legally incompetent, shall select from his restricted land a tract or tracts, not exceeding in the aggregate 160 acres, to remain exempt from taxation and shall file with the superintendent for the Five Civilized Tribes a certificate designating and describing the tract or tracts so selected: *And provided further*, That in cases where such Indian fails, within two years from date hereof, to file such certificate, and in cases where the Indian owner is a minor or otherwise legally incompetent, the selection shall be made and certificate prepared by the superintendent for the Five Civilized Tribes; and such certificate, whether by the Indian or by the superintendent for the Five Civilized Tribes, shall be subject to approval by the Secretary of the Interior, and when approved by the Secretary of the Interior, shall be recorded in the office of the superintendent for the Five Civilized Tribes and in the county records of the county in which the land is situated; and said lands, designated and described in the approved certificates so recorded, shall remain exempt from taxation while the title remains in the Indian designated in such approved and recorded certificate, or in any full-blood Indian heir of devisee of the land: *Provided*, That the tax exemption shall not extend beyond the period of restrictions provided for in this act: *And provided further*, That the tax-exempt land of any such Indian allottee, heir, or devisee shall not at any time exceed 160 acres.

SEC. 5. That this act shall not be construed to reimpose restrictions heretofore or hereafter removed by the Secretary of the Interior or by operation of law, nor to exempt from taxation any lands which are subject to taxation under existing law.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

A similar House bill was laid on the table.

Mr. LEAVITT. Mr. Speaker, under unanimous consent, I insert at this point the report of the House committee on the similar House bill (H. R. 12000), which is as follows:

[H. R. No. 1193, 70th Cong., 1st sess.]

EXTEND PERIOD OF RESTRICTIONS ON LANDS OF CERTAIN MEMBERS OF THE FIVE CIVILIZED TRIBES

Mr. LEAVITT, from the Committee on Indian Affairs, submitted the following report (to accompany H. R. 12000):

The purpose of this bill is to extend the restrictions on the lands allotted to members of the Five Civilized Tribes for an additional period of 25 years commencing April 26, 1931. It is estimated that this bill will apply to approximately 11,000 members of the Five Civilized Tribes, about 9,000 of whom are full-blood Indians. These Indians now own approximately 1,743,974 acres of land and under the terms of H. R. 12000 approximately 1,000,000 acres will be nontaxable after April 26, 1931, and the acreage of exempt land will be reduced from year to year as restrictions are removed by the Secretary of the Interior and by death.

There are on the rolls of the Five Civilized Tribes 101,506 members. The enrolled members of the Five Civilized Tribes at one time owned approximately 19,000,000 acres of land in eastern Oklahoma, covering 40 counties of that State. There were allotted to the members of the Five Civilized Tribes 15,794,218 acres. The restrictions on 14,050,244 acres have been removed by order of the Secretary of the Interior or by act of Congress, but mostly by the act of May 27, 1908 (35 Stat. L. 312–3).

The Interior Department caused a detailed individual investigation to be made of the restricted allotted Indians of the Five Civilized Tribes. These reports are exhaustive and in detail and cover 9,849 Indians. The investigation was made through the field clerks and their assistants and interpreters under the Superintendent of the Five Civilized Tribes at Muskogee, Okla. This investigation extended over a period of about six months and is regarded by the Indian Office to be as thorough as can be made. The individual reports show as far as could be obtained the name of the Indian, his enrollment number, the land he owns, and other pertinent facts. From this investigation and the record as to the lands heretofore disposed of by the Indians the Interior Department regards it as unsafe that the restricted members of the Five Civilized Tribes should be turned loose, free from governmental supervision after April 26, 1931.

Exhaustive hearings were held by the committee on the bill, and it is believed that the best interests of the restricted members of the Five Civilized Tribes require the enactment of the proposed legislation in order that these Indians may be protected in the enjoyment of their homes on and after April 26, 1931.

The favorable report of the Secretary of the Interior covering the subject matter in detail is as follows:

DEPARTMENT OF THE INTERIOR,
*Washington, March 7, 1928.*

Hon. SCOTT LEAVITT,
*Chairman Committee on Indian Affairs,*
*House of Representatives.*

MY DEAR MR. LEAVITT: There is transmitted herewith a draft of a proposed bill to extend the period of restrictions on lands of certain members of the Five Civilized Tribes, and for other purposes.

It appears, from investigation made, that the period of restrictions on the lands of these Indians of certain classes should be extended and that legislation is necessary for the purpose.

Relative to the allotments of land to the enrolled members of the Five Civilized Tribes, reference is herein made to the agreement of the United States with the Seminole Nation, contained in the act of Congress approved July 1, 1898 (30 Stat. L. 567), and the agreement with the Seminole Nation set forth in the act of Congress approved June 2, 1900 (31 Stat. L. 250); the agreement with the Choctaw and Chickasaw Nations, contained in section 29 of the act of Congress approved June 28, 1898 (30 Stat. L. 495), and the supplemental agreement with the Choctaw and Chickasaw Nations contained in the act of Congress approved July 1, 1902 (32 Stat. L. 641); the agreement with the Cherokee Nation, contained in the act of Congress approved July 1, 1902 (32 Stat. L. 716); the agreement with the Creek Nation, contained in the act of Congress approved March 1, 1901 (31 Stat. L. 861), and the supplemental agreement with the Creek Nation, as set forth in the act of June 30, 1902 (30 Stat. L. 500); the act of Congress approved March 3, 1905 (33 Stat. L. 1048), and the act of Congress approved April 26, 1906 (34 Stat. L. 137). These agreements set forth in the above-mentioned acts of Congress, under which the tribal lands were allotted in severalty to the enrolled members of the Five Civilized Tribes, contained certain restrictions against alienation or encumbrance of the allotted lands. These agreements also contained provisions relating to the nontaxability, for certain periods of time, of the allotments or parts of allotments.

By the Choctaw-Chickasaw agreement, contained in section 29 of the act of Congress approved June 28, 1898 (30 Stat. L. 495–507), it was provided that all the lands allotted to the Choctaws and Chickasaws should be nontaxable "while the title remains in the original allottee but not to exceed 21 years from date of patent."

By the Seminole agreement, contained in the act of Congress approved July 1, 1898 (30 Stat. L. 567–568), it was provided that the 40-acre homestead of each allottee should be "nontaxable as a homestead in perpetuity."

By section 7 of the Creek agreement, contained in the act of Congress approved March 1, 1901 (31 Stat. L. 861–863), it was provided that the 40-acre homestead allotment of each citizen of the Creek Nation should be "nontaxable * * * for 21 years. * * *."

By section 13 of the Cherokee agreement, contained in the act of Congress approved July 1, 1902 (32 Stat. L. 716–717), it was provided, referring to the homestead allotment of each member of the Cherokee Tribe, that "During the time said homestead is held by the allottee the same shall be nontaxable * * *."

By certain provisions of the act of Congress approved April 21, 1904 (33 Stat. L. 189–204), the restrictions upon the alienation of lands of all allottees of the Five Civilized Tribes who were not of Indian blood, except minors and except as to homesteads, were removed, and it was further provided that the restrictions upon the alienation of the lands of the other allottees of the Five Civilized Tribes, except minors and except as to homesteads, might be removed by the Secretary of the Interior upon application of the allottee and under such rules and regulations as the Secretary of the Interior might prescribe.

Sections 19 to 23, inclusive, of the above-mentioned act of Congress approved April 26, 1906 (34 Stat. L. 137–144), contained certain restrictions in the matter of alienation and leasing of the allotted and inherited land. By section 19 of the act of April 26, 1906, it was also provided that all lands from which restrictions were removed should be subject to taxation and the other lands should be exempt from taxation so long as the title remained in the original allottee.

By section 4 of the act of May 27, 1908 (35 Stat. L. 312–313), it was provided that all lands from which restrictions were removed should be subject to taxation. These provisions, however, of section 19 of the act of April 26, 1906, and section 4 of the act of May 27, 1908, to the effect that the lands from which the restrictions were removed should be subject to taxation, were held by the Supreme Court of the United States, in the case of Choate *v.* Trapp (224 U. S. 665), to be without force and effect.

Relative to the nontaxability of the lands during the exempt period and during the restriction period, and of the income therefrom, reference is herein made to the opinion dated March 15, 1924, of the Attorney General (34 Op. Atty. Gen. 275).

By the provisions of section 1 of the act of Congress approved May 27, 1908 (35 Stat. L. 312), the restrictions against alienation or encumbrance were removed from all lands, including homesteads, of allottees, including minors, of the Five Civilized Tribes enrolled as intermarried whites, as freedmen, and as mixed-blood Indians having less than half Indian blood, and also from the lands, except homesteads, of the allottees enrolled as mixed-blood Indians having half or more than half and less than three-quarters Indian blood.

By section 1 of the above-mentioned act of May 27, 1908, it was further provided that all homesteads of allottees enrolled as mixed-blood Indians having half or more than half Indian blood, including minors, and all allotted lands of enrolled full-bloods, and enrolled mixed-bloods of three-quarters or more Indian blood, including minors, should not be subject to alienation, contract to sell, power of attorney, or any other encumbrance prior to April 26, 1931; except, however, that the Secretary of the Interior might remove such restrictions, wholly or in part, under such rules and regulations as he might prescribe concerning terms of sale and disposal of the proceeds for the benefit of the respective Indians.

By these provisions of section 1 of the act of May 27, 1908, the restrictions were removed from the lands of certain classes of allottees, and the restrictions on the lands of certain other classes of allottees were extended to April 26, 1931.

In connection with the matter of restrictions on the allotted and inherited lands of Indians of the Five Civilized Tribes, reference is herein made to the provisions of sections 2 to 6, inclusive, of the above-mentioned act of May 27, 1908, and to the provisions of section 9 of that act, as modified by the provisions of section 1 of the act of Congress approved April 12, 1926 (44 Stat. L. 239).

From reports received, it appears that in 1898 the Five Civilized Tribes' country aggregated 19,525,966 acres; that of this area there has been allotted, to June 30, 1927, to the 101,506 enrolled members of the Five Civilized Tribes, in the aggregate, 15,794,218 acres. It appears that to June 30, 1927, and by and under the above-mentioned acts of

April 21, 1904, and May 27, 1908, and certain other acts, the restrictions were removed from approximately 14,050,244 acres of allotted land.

The restricted land, as of June 30, 1927, is reported to aggregate 1,743,974 acres, of which 762,000 acres are described as homestead allotment, 861,131 acres as surplus allotment, and 120,843 acres as homestead land inherited by Indians born since March 4, 1906, and restricted under section 9 of the act of May 27, 1908. There are approximately 12,000 Indians whose lands, wholly or in part, are in the restricted class.

From the above, it therefore appears that out of the 15,794,218 acres allotted only 1,743,974 acres now remain under department supervision as restricted land; and of the 101,506 allottees there are now approximately only 12,000 whose lands, in whole or in part, are in the restricted class. Under existing law, the restrictions on these lands will expire at the close of April 25, 1931.

In 1926, at the request of the House Committee on Indian Affairs, a census of the living enrolled restricted members of the Five Civilized Tribes was taken and the report in the matter stated the number of such Indians to be 11,386. Of these, it was found that 9,100 were enrolled full-blood Indians and 2,286 were mixed bloods, having one-half or more of Indian blood.

Numerous petitions and requests have been received from the full-blood and other restricted Indians of the Five Civilized Tribes urging that legislation extending the restriction period be obtained. Others also have requested and urged that, in the best interests of these Indians, the legislation be obtained.

In view of the near approach of the date of the expiration, under existing law, of the restriction period and of the many petitions and requests from the Indians and others that a legislative extension of the restriction period be obtained, a field investigation was made relative to these full-blood Indians and other Indians having restricted lands as to their living conditions, education, occupation, health, business, and ability. A mass of information was obtained by the field employees of the department relative to these full-blood and other restricted Indians and their restricted lands.

Abstracts of the field reports upon 9,849 individual cases have been received and considered. The abstracts of the field reports clearly show that the restricted Indians, by reason of age, lack of education, and business experience, or for other reasons incompetent to properly handle their business affairs and protect their property interests, are in need of the continued protection of the Government in the supervising of their affairs relating to their restricted Indian property and income therefrom. It is believed that the restrictions on alienation, lease, or encumbrance of their allotted and inherited Indian lands should be extended for an additional period of 25 years commencing on April 26, 1931.

The proposed bill, draft of which is herewith, provides, by section 1 thereof, that the restrictions against the alienation, lease, mortgage, or other encumbrance of the lands allotted to members of the Five Civilized Tribes in Oklahoma, enrolled as of one-half or more Indian blood, shall be extended for an additional period of 25 years commencing on April 26, 1931. It is further provided, however, that the Secretary of the Interior may, upon application of the Indian owners of the land, remove such restrictions, wholly or in part, under such rules and regulations concerning terms of sale and disposal of the proceeds for the benefit of the respective Indians as he may prescribe.

The proposed bill, by section 2 thereof, provides that section 9 of the act of May 27, 1908 (35 Stat. L. 312), as amended by section 1 of the act of April 12, 1926 (44 Stat. L. 239), shall be extended and continued in force and effect for a period of 25 years from and including April 26, 1931, except, however, the provisions relating to certain temporary special interests inherited in the homesteads of deceased allottees by a certain class of their heirs born since March 4, 1906.

Under the existing law the temporary special interests referred to above of these heirs, born since March 4, 1906, in the homesteads of decedent allottees, will expire on April 26, 1931. It is understood that by reason of these temporary special interests or rights under the existing law, the final settlement and partition of estates of deceased allottees among the heirs were delayed and that many complications arose. It is believed that it will be to the best interest of the greater number of the heirs of deceased allottees to permit the temporary special interests or rights of the above-mentioned class of heirs born since March 4, 1906, to expire on April 26, 1931, as provided by existing law, and that such temporary special interests or rights should not be extended for an additional period of time. This will have the result of placing the allottee's heirs born since March 4, 1906, in the same position and with the same inheritance rights as the heirs born prior to that date.

Sections 3 and 4 of the proposed bill relate to the matter of taxation during the extension period. By section 3 it is provided that all minerals, including oil and gas, produced on or after April 26, 1931, from the restricted allotted lands of members of the Five Civilized Tribes, or from the inherited restricted lands of full-blood Indian heirs or devisees of such lands, shall be subject to all State and Federal taxes of every kind and character the same as those produced from lands owned by other citizens of the State of Oklahoma. Provision is made that the tax or taxes assessed against the royalty interests of the Indian owners of the lands shall be paid by the Secretary of the Interior from the restricted individual Indian funds of such Indians. By section 4 of the proposed bill, provision is made that on and after April 26, 1931, the allotted, inherited, and devised restricted lands of each Indian of the Five Civilized Tribes in excess of 160 acres shall be subject to taxation by the State of Oklahoma under and in accordance with the laws of that State, and in all respects as unrestricted and other lands. Provision is also made for the designation of the tract or tracts, not to exceed 160 acres in the case of each Indian, to remain exempt from taxation during the extended period of restrictions, and while the land remains restricted as to alienation, lease, or encumbrance.

While keeping in mind the interests of the restricted Indians of the Five Civilized Tribes, it is believed that if the period of restrictions on their lands be extended as contemplated in the proposed bill, they should not continue to be exempt from taxation, except as to a limited acreage of their land. It is further believed that the taxation provisions of sections 3 and 4 of the proposed bill are not only fair and just to the State of Oklahoma, but to the Indians as well.

In view of the above, and it appearing that in the cases of the full-blood and other restricted Indians of the Five Civilized Tribes there is need of the continued protection of the Government in relation to their restricted Indian property and income therefrom, it is believed that, as above indicated, the restrictions on their allotted and other restricted lands should be extended for an additional period of 25 years commencing on April 26, 1931, and legislation for that purpose should be enacted. I therefore request that the proposed bill, draft of which is herewith, be introduced in Congress and recommend and urge that it be enacted.

Very truly yours,

HUBERT WORK.

### OLIVER C. MACEY AND MARGUERITE MACEY

Mr. UNDERHILL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 1648, with House amendments thereto, insist on the House amendments, and agree to the conference asked by the Senate.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to take from the Speaker's table the bill S. 1648, with House amendments, insist on the House amendments, and agree to the conference. Is there objection?

There was no objection.

The SPEAKER appointed the following conferees: Mr. UNDERHILL, Mr. SEARS of Nebraska, and Mr. BOX.

### AGRICULTURAL EXTENSION WORK

Mr. HAUGEN. Mr. Speaker, I call up the conference report upon the bill (H. R. 9495) to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefit of the act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture.

The SPEAKER. The gentleman from Iowa calls up a conference report, which the Clerk will report.

The Clerk read the conference report.

(For conference report, see House proceedings of May 4, 1928.)

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

### FORT M'HENRY

Mr. LINTHICUM. Mr. Speaker, I ask unanimous consent to have the Clerk read an article from the Evening Sun, of Baltimore, of April 4, 1928, entitled "Odor of malt and hops permeates Fort McHenry," and ask unanimous consent to proceed for five minutes.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The SPEAKER. Without objection, the Clerk will read.

The Clerk read as follows:

[From the Evening Sun, Baltimore, April 4, 1928]

ODOR OF MALT AND HOPS PERMEATES FORT MCHENRY—FINE LINE SEPARATES INSPIRATION FOR ANTHEM OF LIBERTY AND SPOT WHERE BOTTLES OF BEER ARE SMASHED BY DRYS

Between the Fort McHenry reservation proper and that portion of it used by Federal prohibition agents is an iron fence. The line thus drawn is an acute one, for south of it is the serenity of a thing centuries old; north of it the smell of beer—recent beer, that is.

The odor of malt and hops emanates from a pile of broken bottles on which three men were seen holding an impromptu "target practice." Yesterday they had a truck backed up as close as possible and were hurling loaded beer bottles on the pile.

Some of the bottles did not break at the first fall, so they were peppered with other bottles. Those that broke did so with popping that sounded like the discharge of small-caliber firearms.

COLORFUL BINS

The beer was being thrown into three separate bins, each of which held a different-colored glass. Brown bottles were broken in one bin, green in another, and white in the other. As each bottle broke it sent a little geyser of foam into the air.

Along the water front beside the pier, back of the prohibition officers, a pile of smashed beer boxes rises to a height of 15 feet. Next to it are smashed kegs, and then a pile of barrel staves. Some have fallen into the water and rise and fall with each wave.

To the south of the line, however, spring has begun her work. Shrubs around the battlements of the old star fort which, in 1814, was under heavy bombardment and inspired Francis Scott Key to write the Star-Spangled Banner, are putting out a touch of green, and grass is taking on a verdant hue.

VISITORS TO SCENE

Visitors stroll about the reservation, stopping to read the inscriptions that tell the history of the fort. They read one that tells that this is the spot on which the flagpole stood that held the flag which Key wrote about, and a few cannon balls that "were fired by the British naval forces in the bombardment of Fort McHenry, 1814."

All about there is an air of serenity and peace, hedged nicely in with a historic flavor. But above the line, on the "north side," as it were, there is the undisturbed and peaceful air also, and the flavor is of beer—recent beer.

Mr. LINTHICUM. Mr. Speaker, the Congress of the United States has designated Fort McHenry, Baltimore, as a national military reservation because of its historic interest to the people and of the part it played in the final battle before the treaty was signed in the War of 1812.

There has been appropriated two sums: First, that received for the old buildings and equipment sold after the war, amounting to $28,522.35; second, a bill which passed Congress and was approved by the President authorizing a further appropriation of $81,678, making a total of $110,200.35.

At Fort McHenry and North Point the British under General Ross were defeated and retired after they had captured Washington and burned the White House and the Capitol. At this historic point Francis Scott Key wrote the national anthem which solidified and united our country and meant more to the American arms than 10,000 bayonets.

I quote this historic synopsis that I may lead on to what I have to say in regard to the present situation. Some years ago—about 12 or 14—Congress carved from one corner of the historic grounds of Fort McHenry a piece of land upon which to erect a modern immigration station. This was erected at an expense approximating $600,000. It was thought that this location was most advantageous because of its easy access both from water and land, and, secondly, because it was thought a fine sentiment to have the hundreds of people from foreign lands who were about to become American residents and finally citizens arrive here and view the Star-Spangled Banner waving from that point which inspired Key to write the national anthem.

It was a fine sentiment and a fine location for this immigration station. The war came on. The immigration station, with its large buildings and great capacity, was recognized as a very useful unit for a large hospital, and so it was taken over by the Government for hospital purposes and gradually temporary buildings covered the whole fort grounds.

Thousands of veterans were brought here for treatment, both from the camps of this country and from the battle fields of France. A second time the old fort demonstrated its usefulness in time of war and had emblazoned upon its escutcheon the noble deeds of physicians, surgeons, nurses, and others engaged in looking after the needs of humanity.

The SPEAKER. The time of the gentleman from Maryland has expired.

Mr. LINTHICUM. May I have two minutes more?

The SPEAKER. The gentleman from Maryland asks unanimous consent to proceed for two minutes more. Is there objection?

There was no objection.

Mr. LINTHICUM. The temporary buildings have now been removed, and the fort with the appropriations is being converted into the same condition and appearance as it was when the battle between the American forces and those of Great Britain was fought. But lo, the immigration station! How it has fared is certainly not in keeping with the plans of the fort. The Treasury Department established the Veterans' Bureau in a part of the buildings, and it has proved a most admirable location.

Recently, however, against the vigorous protest of the people of Baltimore, both the wet and dry element, the Treasury Department established the Federal prohibition quarters in the other buildings, where prohibition snoopers and agents have their headquarters, where the bootleggers, automobiles, and trucks are brought, where the seized beers and liquors are taken and destroyed, where bottles pile up and scent of beer and liquor permeate the surroundings.

I ask the driest of the drys politically on the floor of this House how they like this agency established upon the grounds of this historic spot at the very same headquarters of the Veterans' Bureau and where the Star-Spangled Banner waves over this historic fort which means so much to the history and sentiment of our national independence.

To me and to my people the situation is absolutely untenable and ungenerous to Baltimore and to the country.

I shall within a few days introduce a resolution into this House asking that this Prohibition Bureau be removed to some other location, and that the building be taken over by the Government for some purpose more in harmony with the aspirations of those who are endeavoring to make this shrine one of the sacred spots of America. [Applause.]

PENSIONS

Mr. KNUTSON. Mr. Speaker, I call up the conference report on the bill H. R. 10141.

The SPEAKER. The gentleman from Minnesota calls up the conference report on the bill H. R. 10141. The Clerk will report it.

The Clerk read as follows:

A bill (H. R. 10141) granting pensions and increase of pensions for certain soldiers and sailors of the Regular Army and Navy, etc.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER. The Clerk will read the statement.

The statement was read.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10141) granting pensions and increase of pensions for certain soldiers and sailors of the Regular Army and Navy, etc., having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4 and 12.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 5, 6, 7, 8, 9, 10, 11, 13, 14, 16, 17, 18, 19, and agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the figures proposed to be inserted by said amendment, insert "$60"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with amendments as follows:

Page 2 of the engrossed amendment, in the case of Arthur E. Wilcox, strike out the figures "12" and in lieu thereof insert the figures "20."

Page 7, in the case of Catarino Armijo, strike out the figures "12" and in lieu thereof insert the figure "6."

Page 7, strike out the language "The name of William L. Curry, late scout in the United States Army, Nez Perce Indian war, and pay him a pension at the rate of $30 per month."

Page 7, in the case of George W. Peck, strike out the figures "30" and in lieu thereof insert the figures "20."

Page 8, in the case of Andrew J. Stewart, strike out the figures "30" and in lieu thereof insert the figures "20."

Page 9, strike out the language "The name of Joseph Baker, who served as Indian scout, United States Army, and pay him a pension at the rate of $50 per month."

Page 10, in the case of Ella M. Beckett, strike out the figures "30" and in lieu thereof insert the figures "20."

Page 10, in the case of Effie I. Disney, strike out the figures "30" and in lieu thereof insert the figures "12."

Page 10, in the case of Anna M. Sherman, strike out the figures "30" and in lieu thereof insert the figures "12."

Page 11, strike out the language "The name of John L. Baxter, late a scout with the United States Army, Bannock

Indian war, and pay him a pension at the rate of $20 per month, to commence March 4, 1927."

Page 11, in the case of Frank H. Wilson, strike out the figures "17" and in lieu thereof insert the figures "12."

Page 18, in the case of Wilbur B. Swafford, strike out the figures "30" and in lieu thereof insert the figures "20."

Page 18, strike out the language "The name of Bascom Prater, late of Company E, Second Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $8 per month."

And the House agree to the same.

Page 20, strike out the language "The name of Edward L. Schmiedemann, late of Company B, First Regiment Nebraska National Guard Infantry, and pay him a pension at the rate of $20 per month, in lieu of that he is now receiving."

Page 20, strike out the language "The name of Milous Day, late of Company D, First Regiment of Capital Guards Kentucky Infantry, and pay him a pension at the rate of $50 per month."

Page 20, strike out the language "The name of Samuel H. Anderson, late an employee of the Quartermaster Department in the Yellowstone Expedition, and pay him a pension at the rate of $20 per month."

Page 20, strike out the language "The name of George R. Odle, late of Capt. D. B. Randall's Company Idaho Volunteers Nez Perce Indian War, and pay him a pension at the rate of $20 per month."

Page 21, in the case of William Franklin De Spain, strike out the figures "20," and in lieu thereof insert the figures "12."

Page 22, in the case of James W. Allen, strike out the figures "20" and in lieu thereof insert the figures "12."

Page 22, in the case of Francis H. Kearney, strike out the figures "20." and in lieu thereof insert the figures "12."

Page 22, in the case of Charles A. Packwood, strike out the figures "20" and in lieu thereof insert the figures "12."

Page 22, in the case of Hubert L. Bassett, strike out the figures "20" and in lieu thereof insert the figures "12."

Page 23, in the case of Sarah R. Bates, strike out the figures "20" and in lieu thereof insert the figures "12."

Page 23, in the case of Charles E. Finch, strike out the figures "20" and in lieu thereof insert the figures "12."

And the House agree to the same.

HAROLD KNUTSON,
J. M. ROBSION,
WM. C. HAMMER,
*Managers on the part of the House.*

ARTHUR R. ROBINSON,
PETER NORBECK,
*Managers on the part of the Senate.*

STATEMENT

The managers on the part of the House on H. R. 10141 show by way of explanation that 133 House bills were included in said bill.

The committee of conference carefully examined the merits of each individual case over which any difference of opinion existed and mutually agreed to restore all bills of meritorious character.

The Senate contained the names of 153 beneficiaries and the House disagreed with the Senate on 35 items and made 23 corrections as amendments. Of the 35 items disagreed to the Senate asked that 27 of them be restored, and the House conferees agreed thereto.

The Senate took exception to 16 of the 133 House bills and agreed to the retention of 3 of them.

HAROLD KNUTSON,
J. M. ROBSION,
WILLIAM C. HAMMER,
*Managers on the part of the House.*

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

DESIGNATION OF SPEAKER PRO TEMPORE FOR SUNDAY

The SPEAKER. The Chair designates the gentleman from Massachusetts [Mr. TREADWAY] to preside as Speaker pro tempore on to-morrow, Sunday.

MERCHANT MARINE

Mr. WHITE of Maine. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill S. 744.

The motion was agreed to.

The SPEAKER. The gentleman from Michigan [Mr. CRAMTON] will please take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill S. 744, with Mr. CRAMTON in the chair.

Mr. CRAMTON. The Committee of the Whole House on the state of the Union will be in order. The Clerk will report the pending bill by title.

The Clerk read as follows:

A bill (S. 744) to further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States, and for other purposes.

The CHAIRMAN. The Clerk will proceed with the reading of the bill for amendment.

The Clerk read as follows:

TITLE III—CONSTRUCTION LOAN FUND

TERMS AND CONDITIONS OF LOANS

SEC. 301. (a) Section 11 of the merchant marine act, 1920, as amended (U. S. C., title 46, sec. 879; 44 Stat. L. pt. 2, 1451), is amended to read as follows:

"SEC. 11. (a) That the board may set aside, out of the revenues from sales, including proceeds of securities consisting of notes, letters of credit, or other evidences of debt, taken by it for deferred payments on purchase money from sales by the board, whether such securities are to the order of the United States, the United States Shipping Board, the United States Shipping Board Emergency Fleet Corporation, or the United States Shipping Board Merchant Fleet Corporation, either directly or by indorsement, until the amounts thus set aside from time to time aggregate $125,000,000. The amount thus set aside shall be known as the construction loan fund. The board may use such fund to the extent it thinks proper, upon such terms as the board may prescribe, in making loans to aid persons citizens of the United States in the construction by them in private shipyards or navy yards in the United States of vessels of the best and most efficient type for the establishment or maintenance of service on lines deemed desirable or necessary by the board, provided such vessels shall be fitted and equipped with the most modern, the most efficient, and the most economical engines, machinery, and commercial appliances; or in the outfitting and equipment by them in private shipyards or navy yards in the United States of vessels already built, with engines, machinery, and commercial appliances of the type and kind mentioned; or in the reconditioning, remodeling, or improvement by them in private shipyards or navy yards in the United States of vessels already built.

"(b) The term 'vessel' or 'vessels,' where used in this section, shall be construed to mean a vessel or vessels to aid in whose construction, equipment, reconditioning, remodeling, or improvement a loan is made from the construction loan fund of the board. All such vessels shall be documented under the laws of the United States and shall remain documented under such laws for not less than 20 years from the date the loan is made, and so long as there remains due the United States any principal or interest on account of such loan.

"(c) No loan shall be made for a longer time than 20 years. If it is not to be repaid within two years from the date when the first advance on the loan is made by the board, the principal shall be payable in equal annual installments to be definitely prescribed in the instruments. The loan may be paid at any time, on 30 days' written notice to the board, with interest computed to date of payment.

"(d) All such loans shall bear interest at rates as follows, payable not less frequently than annually: During any period in which the vessel is operated exclusively in coastwise trade, or is inactive, the rate of interest shall be as fixed by the board, but not less than 5¼ per cent per annum. During any period in which the vessel is operated in foreign trade the rate shall be the lowest rate of yield (to the nearest one-eighth of 1 per cent) of any Government obligation outstanding at the time the loan is made by the board, as certified by the Secretary of the Treasury to the board upon its request. The board may prescribe rules for determining the amount of interest payable under the provisions of this paragraph.

"(e) No loan shall be for a greater sum than three-fourths the cost of the vessel or vessels to be constructed or than three-fourths the cost of the reconditioning, remodeling, improving, or equipping hereinbefore authorized for a vessel already built.

"(f) The board shall require such security as it shall deem necessary to insure the completion of the construction, reconditioning, remodeling, improving, or equipping of the vessel within a reasonable time and the repayment of the loan with interest; when the construction, reconditioning, remodeling, improving, or equipping of the vessel is completed the security shall include a preferred mortgage on the vessel, complying with the provisions of the ship mortgage act, 1920 (U. S. S. Code title 46, ch. 25), which mortgage shall contain appropriate covenants and provisions to insure the proper physical maintenance of the vessel, and its protection against liens for taxes, penalties, claims, or liabilities of any kind whatever, which might impair the security for the debt. It shall also contain any other covenants and provisions the board may prescribe, including a provision for the summary maturing of the entire debt, for causes to be enumerated in the mortgage.

"(g) The board shall also require and the security furnished shall provide that the owner of the vessel shall keep the same insured against loss or damage by fire, and against marine risks and disasters, and against any and all other insurable risks the board specifies, with such insurance companies, associations, or underwriters, and under such forms of policies and to such amount as the board may prescribe or approve; such insurance shall be made payable to the board and/or to the parties, as interest may appear. The board is authorized to enter into any agreement that it deems wise in respect to the payment and for the guaranty of premiums of insurance."

(b) Section 11 of the merchant marine act, 1920, as in force immediately prior to the enactment of this act, shall remain in force in respect of all loans made before the enactment of this act.

Mr. WHITE of Maine. Mr. Chairman, I offer an amendment by authority of the Committee on the Merchant Marine and Fisheries.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Maine.

The Clerk read as follows:

Committee amendment offered by Mr. WHITE of Maine: Page 7, at the end of line 18, insert after the word "obligation" the words "bearing a date of issue subsequent to April 6, 1917, except postal savings bonds and."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MONTAGUE. Mr. Chairman, I wish to ask the chairman of the committee one question. On page 6, line 12, you use the words "engines, machinery, and commercial appliances. I was a little curious to know what you meant by commercial appliances.

Mr. WHITE of Maine. I will say for the information of the gentleman that that is the language of existing law. It has been on the statute books now for something more than eight years. We left it as it was. The only change made by this section on this paragraph of the existing law is in the inclusion in lines 16 and 17 of the words "or in the reconditioning, remodeling, or improvement." We have somewhat expanded in that respect the scope of this paragraph. Otherwise it stands unchanged.

Mr. MONTAGUE. As to the words "commercial appliances," I confess my ignorance of the definition.

Mr. DAVIS. That has reference to hoisting apparatus for loading and unloading.

Mr. MONTAGUE. I should say that was mechanical.

Mr. WHITE of Maine. All these are appliances for handling of cargo and facilitating loading and unloading, and so forth.

Mr. WOOD. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Indiana.

The Clerk read as follows:

Amendment offered by Mr. WOOD: Page 6, after the word "built," insert "*Provided*, That the amount of the loan to any person or citizen of the United States in any calendar year shall not exceed the sum of $10,000,000."

Mr. WOOD. Mr. Chairman, I desire to say that the figure I have placed as the limitation here may be too small, but I feel that some limitation should be placed upon the amount that may be loaned to any one firm or corporation in any one year. My reason for thinking that this amendment should be made and that it would add strength to this bill is that I can conceive of a possibility where there might be half a dozen different concerns, maybe more, some of them desiring larger and some smaller amounts, and I could conceive a scheme whereby one or two concerns might borrow all this $125,000,000 in one year, to the deprivation and perhaps to the detriment of other bidders or people desiring loans, and to the detriment of the merchant marine.

I felt I should bring this to the attention of the committee, in order that it might be considered, for the purpose of avoiding any possibility or probability of injury being done to the loan fund.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. WOOD. Yes.

Mr. WAINWRIGHT. The gentleman's amendment fixes $10,000,000 as the amount which can be loaned in any one year?

Mr. WOOD. Ten million dollars; yes.

Mr. WAINWRIGHT. I call the gentleman's attention to the fact that that probably would not build one 15,000-ton ship.

Mr. WOOD. You can not build a 15,000-ton ship in one year, either. As I have said, I am not wedded to the figure of $10,000,000. I do not know whether the committee in considering this bill gave this proposition any consideration at all or considered whether a limitation should be placed upon it.

Mr. WAINWRIGHT. I will ask the gentleman, who I know is so devoted to the principles involved in this bill, whether he does not think, in view of the objects to be accomplished, that $10,000,000 is altogether too little.

Mr. WOOD. Possibly that may be true, but I wanted to fix some figure so I could get an expression from the committee, which has been given this measure great consideration.

Mr. DYER. Will the gentleman yield?

Mr. WOOD. Yes.

Mr. DYER. Would not the gentleman's amendment interfere with the reconditioning of some of the ships if the Shipping Board should desire to have some of them reconditioned, and, perhaps, install the most up-to-date machinery and engines as well as the Dieselization of some of them? Would not the gentleman's amendment interfere with that?

Mr. WOOD. The only possible way it might interfere would be because the amount to which it is limited is too small.

Mr. DYER. It might be possible that the amount suggested in the gentleman's amendment would not be sufficient to do that.

Mr. WOOD. As I say, if this figure is too small, it can be increased to a proper amount. I have introduced this amendment for the purpose of advising this committee of the possibilities of abuse, and it is for the committee to determine whether or not there should be a limitation and determine the amount of that limitation. I would like to hear from the chairman of the committee.

Mr. WHITE of Maine. Has the gentleman yielded the floor?

Mr. WOOD. Yes; I yield the floor.

Mr. WHITE of Maine. Mr. Chairman, I rise in opposition to the amendment. It seems to me there are two solid grounds of opposition. In the first place, we are embarking here, as we hope, upon a far-reaching program of the construction of new ships in American yards for the carriage of American goods. Necessarily we must impose in some governmental agency a large degree of authority and in them we must have a substantial degree of confidence, if you are to have the flexibility necessary to achieve the results which are sought. I am opposed to this amendment in the first instance because it ties the hands and circumscribes and limits the exercise of judgment and discretion of the very body to which we must look for the execution of this law. I am opposed to it in the second place because as a practical proposition I have hopes, and I think the other members of the Merchant Marine Committee have hopes, that there will be begun the construction of vessels which may call in a single year for loans in excess of $10,000,000. You can not build under that amendment a single ship costing $15,000,000 if the builder had to rely to the extent we authorize in this bill upon the Shipping Board for funds.

Mr. DYER. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. DYER. Would the language as contained in this section prevent the Shipping Board from reconditioning a ship if they wanted to do so?

Mr. WHITE of Maine. The gentleman means under the amendment?

Mr. DYER. No; under the section as written in the bill.

Mr. WHITE of Maine. Let me confine myself to the amendment.

Mr. DYER. In any event, this amendment would interfere with that.

Mr. WHITE of Maine. I think it would. I think it limits in all directions and in every way the authority which we must put somewhere, and in this case that authority is vested in the Shipping Board. Now, what is happening illustrates, as it has been illustrated over and over again, the weakness of our whole attitude toward the merchant marine. We are not willing to go ahead and allow anybody to work out a program and perfect a program for an American merchant marine, but we are trying in this legislative body to tie it down, circumscribe it, put handicaps in the way, and embarrass the free exercise of discretion and withhold that help which I conceive the American people want to render to the American merchant marine.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. WAINWRIGHT. Is it not a fact that under the law to-day the Shipping Board has had entire discretion with reference to the present loan construction fund, which now amounts to over $100,000,000?

Mr. WHITE of Maine. There is absolutely no limit of the character suggested here in the handling of the present construction loan fund. You are injecting an entirely new element of a restrictive nature, when every effort of ours ought to be for enlarging the authority and showing a degree of liberality toward this industry and toward our commerce.

Mr. BLACK of New York. The loans are not to be on a yearly basis, anyway, are they?

Mr. WHITE of Maine. We hope and we believe it essential that the loans shall be for long periods of time because it is inconceivable to us that you will find American ship operators and American shipbuilders start in on a program if it is to be from hand to mouth, from year to year. No one is going to invest $10,000,000 or $15,000,000 in a great and hazardous undertaking of this character unless the loan is for a long period of time and upon liberal terms.

I very much hope the amendment will be rejected in its entirety.

Mr. CARSS. May I ask the gentleman to tell the committee how much a ton it costs to construct a modern, up-to-date freighter?

Mr. WHITE of Maine. The figures differ, depending upon the type of ship—depending upon many factors—but I would say $140 a ton, possibly, in an American shipyard.

Mr. DAVIS. Mr. Chairman, I wish to join the chairman of the committee, the gentleman from Maine [Mr. WHITE], in opposing this amendment. I think it would be very unwise.

As suggested by the gentleman from Maine we very sincerely hope that the enactment of this legislation will result in an early and a substantial increase of the American merchant marine and an increase of speedier and larger ships in order that we can successfully compete with our foreign competitors in this respect.

We hope it will result that American concerns will want to build ships that will cost in excess of $10,000,000, and there are many ships on the sea now the present cost of construction of which would far exceed $10,000,000. In addition, it is entirely probable that the same concern might desire to build several ships and to start the construction of them, perhaps in different yards, at the same time.

It is also quite certain that none of these prospective shipbuilders or operators will enter upon a shipbuilding program unless they can make a loan contract with the Shipping Board under which they will have the assurance of a sufficient amount of money being loaned to them that they can complete their program.

If the Shipping Board is specifically restricted to $10,000,000 or any other like amount per year, they would say, "We have not the authority to enter into a contract to let you have any more money than that." This would spread the construction over a long period of years in a large construction program on the part of any one concern. I think we are all interested in having as speedy a construction program and as early an enlargement of our American merchant marine as possible and not defer it by any provision such as the one suggested by the gentleman from Indiana [Mr. WOOD].

So I think there are many reasons why a provision of this kind is not only unnecessary but would be unwise. I therefore think the amendment should be defeated.

Mr. WOOD. Mr. Chairman, I just want to add one word in further explanation of my reason for proposing the amendment. I trust there is no one here that doubts my desire to see the greatest possible success come from this measure.

We are about to enter upon what I hope to be the beginning of the success of a real American merchant marine. I think much depends upon the manner in which we start upon this highway. I would hate to feel that by reason of our lack of precaution at the very outset we would make it possible for any man or any set of men by manipulation, by conspiracy, or otherwise, to circumvent the purpose and the desire of the Congress in the establishment of a merchant marine. There might be collusion or there might be combination without collusion for the purpose of monopolizing this fund.

As I said at the outset, $10,000,000 may be too small an amount, but I believe out of extraordinary precaution and for fear the very thing which I have predicted might happen, there should be a limitation upon the amount that may be loaned in any one year.

Mr. ABERNETHY. Will the gentleman yield?

Mr. WOOD. Yes.

Mr. ABERNETHY. Does not the gentleman have a sort of veto power, to some extent, over the actions of the Shipping Board, as chairman of the Appropriations Committee?

Mr. WOOD. No; we give them $125,000,000 to lend as they please or according to their own judgment.

Mr. ABERNETHY. Do you not go into all their transactions very carefully in the Committee on Appropriations?

Mr. WOOD. Yes; but it is pretty hard to gather up spilled milk.

Mr. ABERNETHY. I have always thought the gentleman had a sort of supervisory power over the whole board. That is the way I have always understood it.

Mr. WOOD. If I have, it has been a woeful failure.

Mr. WAINWRIGHT. Mr. Chairman and gentlemen of the committee, I rise to oppose the amendment.

It strikes me this amendment will have the effect of neutralizing and defeating the very purpose of the bill which is to liberalize the present construction-loan privilege. If adopted it will deprive the Shipping Board of the unlimited jurisdiction and the power they have to-day with regard to the loan-construction fund. In other words, we will be adopting a much less liberal policy with regard to loans than the provision of the present merchant marine act.

Mr. BLAND. Will the gentleman yield?

Mr. WAINWRIGHT. I prefer not to yield, as I have such a short time.

It seems to me, gentlemen, this bill which has had the universal approval of the press of the country and is so much in accordance with the sentiment of the country, as has been demonstrated in so many impressive ways, ought not to be amended in this manner, but that we should leave this discretion where it should be, with the Shipping Board. We should not be raising mare's nests of this kind and restricting the beneficial operation of the bill in this manner. This is a great bill, a great constructive measure. Every possible consideration involved has received the deliberate attention of the Committee on the Merchant Marine and Fisheries. This bill offers for the first time since the early days of the Republic the prospect that the American merchant marine may be again restored to the proud position it once held upon the sea. It offers the prospect, indeed the promise, that instead of carrying a mere 30 per cent of the overseas commerce of this country in American ships, instead of having but a beggarly 2 per cent of the tonnage of the world under construction in our shipyards, as is now the case, we shall have under construction in these shipyards a very substantial part of the tonnage of the world, and that before long the great majority of the ships that come from foreign ports into our ports, and that sail from our ports to foreign ports, will be flying the American flag.

Mr. Chairman, it seems to me that this bill offers such abundant hope for the realization of what the American people devoutly hope for that we should not undertake to tamper with it or modify it in any important particular. Personally, I hope to be permitted to vote for this bill just as it comes before us.

We know that we can not compete with foreign shipping in the costs of either ship construction or operation unless aid is furnished from some source to put our people in the position to equalize or neutralize those costs. And we know as well that the only source from which that aid or assistance to meet that competition can come is from the Government of the United States. If it is withheld or is not furnished in some practical and substantial manner, and that right soon, our languishing shipbuilding industry must expire and the constantly dwindling proportion of our foreign commerce carried in American ships must continue to grow less until our mercantile marine vanishes from the high seas. How can any American face that prospect with complacency or equanimity? We know how vitally important a merchant marine capable of carrying the greater part of our commerce is, not only to our prestige but to our security and prosperity. We know how vitally important it is that we should be independent of foreign shipping to carry our commerce and to serve as auxiliaries to our naval fleet and as transports in time of war, and to serve as carriers and promoters of our commerce in time of peace. Can there be any question of the expediency, of the wisdom, of the necessity—yes, of the economy—of this Government adopting proper and practicable means of fostering and developing so vital a national interest? Think of the Government aids we have extended in other directions and to other interests. Think what we have done for agriculture, the millions we have loaned to our farmers; the millions we have spent on the improvements of our rivers and harbors and upon our roads; think of what we have spent on reclamation projects, the aids we have extended to our industries, the assistance by way of land grants to the railroads, our carriers of commerce upon the land; of the fostering care and protection we have afforded our coastal and lake shipping; and then consider how long we have withheld any real aid to this primary, this basic interest—and by basic I mean original, because the development and protection of our shipping was one of the first that concerned the fathers of the Republic.

In the beginning and for more than the first century, the Government and the people stood by the merchant marine so that in the days just before the Civil War more than 80 per cent of our commerce was carried under the American flag. Then that assistance was withdrawn and latterly we have

accorded this interest practically no support. And now the time has arrived when, if ever, we must do something substantial and effective—and this bill furnishes the opportunity.

The provisions increasing the loan construction fund to $250,000,000 and authorizing loans by the Government up to 75 per cent of cost for 20 years at the lowest rate of interest paid by the Government on its own obligations, and providing for mail contracts or subventions more liberal for longer terms than ever before accorded, running up to $12 per voyage mile on ships capable of 24 knots speed, must prove attractive and serve as a great encouragement and inducement to our shipping interests. The provision that merchant officers and seamen by joining the merchant marine naval reserve may be put on a naval pay status with two months' base pay of their corresponding grades per annum can not fail to have a vastly beneficial effect upon the morale, the efficiency, and the quality of our merchant seamen, both in time of peace and in time of emergency.

Let us pass this bill, gentleman, with very little change. Then we shall have discharged our duty and ratified the act of a committee which, after weeks of deliberation, laying aside all partisan considerations, but rising to their high duty as patriotic and sensible representatives of the American people, have reported this bill to us. Then we shall be passing on to the shipping interests and the shippers and the travelers the responsibility for the development and the support of the American merchant marine. Without the loyal support of all those interests legislation alone will avail little. Afforded the facilities, it will then be up to the people whether they will sustain their merchant marine, and the merchant marine will never expand or flourish unless our shippers and voyagers are indoctrinated with the principle that it is their duty, where equal facilities are available, always to ship under the American flag, always to travel and sail under the American flag; and, may I add, that it will be at least bad form to patronize foreign shipping when American shipping is available on favorable terms for similar service.

I trust that this amendment will not prevail, gentlemen, but that the entire discretion as to loans under this bill will be left with the Shipping Board, and I devoutly hope that this bill will not only pass this House, but that it will finally be enacted into law. [Applause.]

Mr. BLAND. Mr. Chairman, I approve of everything that has been said by the gentleman from New York, and I suggest to him, in addition to what he has said, that before a man can secure his contract for three-quarters of the construction of a ship he has got to have in hand or make provision for one-quarter of the cost of the ship; he has to have the available funds. Furthermore, three-quarters of the cost of the ship is not turned over to him in cash, but, as my friend has suggested, is paid out as the work proceeds. The purpose is so that we are to get a merchant marine of modern ships that can be efficiently and economically operated as quickly as possible.

Mr. WAINWRIGHT. If the gentleman will yield, if we can trust the Shipping Board with the tremendous investment that we already have and with the responsibility they are already entrusted with, we can trust them in this particular.

Mr. BLAND. Certainly. And, further, they investigate the condition of the applicant when he files his application for the money. As I said a moment ago, the money can only be advanced as the work proceeds with the construction. In other words, the other party must first put up the one-quarter.

Mr. GIFFORD. Will the gentleman yield?

Mr. BLAND. Certainly.

Mr. GIFFORD. I would like to suggest also that they might overcome the difference of cost at home and abroad if they would build two or more ships at the same time.

Mr. BLAND. Yes; if we could get two at the same time it would materially reduce the cost.

Mr. ANDRESEN. Will the gentleman yield?

Mr. BLAND. I will.

Mr. ANDRESEN. Does the bill permit the construction of ships on the Great Lakes and rivers?

Mr. BLAND. Yes; that is, ships in foreign trade.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana.

The question was taken, and the amendment was rejected.

Mr. WOODRUM. Mr. Chairman, I ask unanimous consent to proceed out of order for one minute.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to proceed out of order for one minute. Is there objection?

There was no objection.

Mr. WOODRUM. Mr. Chairman, I ask for this time to put into the RECORD some information which I think will be of interest to the Members of the House. On Monday the House will have for consideration the Welch increase salary bill. I have prepared and ask unanimous consent to extend my remarks in the RECORD by inserting some charts which show a comparison of the existing rates under the classification act and new rates as provided by the Welch bill.

Mr. LEHLBACH. Mr. Chairman, I have no objection to the gentleman extending his remarks, but that request may not be granted in committee. However, the gentleman having been recognized I have no objection to his extending his remarks.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to extend his remarks in the RECORD by including tables and charts which he has referred to. Is there objection?

There was no objection.

Mr. WOODRUM. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following charts showing a comparison of the existing salary rates under the classification act and the new rates as provided by the Welch increase salary bill:

The Clerk read as follows:

INCREASE OF CONSTRUCTION LOAN FUND

SEC. 302. (a) There is authorized to be appropriated, to be credited to and for the purposes of the construction loan fund created by section 11 of the merchant marine act, 1920, as amended, such amounts as will, when added to the amounts credited to such fund by the United States Shipping Board under authority of law (exclusive of repayments on loans from the fund), make the aggregate of the amounts credited to such fund (exclusive of such repayments) equal to $250,000,000.

(b) When $250,000,000 has been credited to such fund (whether by the board under authority of law or from appropriations authorized by this section, but exclusive of repayments on loans from the fund) then no further sums (except such repayments) shall be credited by the board to such fund.

(c) The construction loan fund shall continue to be a revolving fund. Repayments on loans from the fund shall be credited to the fund, but interest on such loans shall be covered into the Treasury as miscellaneous receipts.

Mr. WOOD. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. WOOD: Page 10, after line 6, insert a new section, as follows:

"SEC. 303. The board is hereby authorized and directed to make loans from the construction loan fund for the total cost of construction of vessels for service in the foreign trade for citizens of the United States. Such vessels shall be constructed in American shipyards and according to designs approved by the board. Such sums as may be loaned for such construction shall be repaid to the construction loan fund by the purchaser of such newly constructed vessels within a period of 20 years: *Provided*, That the contract and preferred mortgage guaranteeing the service in the foreign trade shall provide for an initial payment of 5 per cent of the cost of the vessel on the making of the contract, and 5 per cent annually thereafter.

"The provisions of this section shall not apply to vessels entitled to the benefits of Title IV of this act relating to the transportation of foreign mails."

Mr. BLACK of New York. Mr. Chairman, I offer an amendment to the amendment by inserting the words "and Government navy yards" after the words "American shipyards."

The CHAIRMAN. The gentleman from Indiana has the floor. The gentleman from New York will have an opportunity to offer his amendment later.

Mr. WOOD. Mr. Chairman, yesterday I made a few remarks in which I attempted to point out to the committee the necessity for something being done for the cargo ships. I then stated, and I reiterate it now, that I am heartily in favor of everything there is in this bill and intend to support it. I do feel, however, that there has been great neglect of the cargo ships. We have about six or seven lines that carry the United States mails. They will be benefited, and perhaps made to prosper by reason of the mail subvention. The vast majority of our routes, however, are not mail routes; they are cargo routes, going to the farthermost parts of the earth. Unless something is done for them I am fearful that they can not long endure, or that when the vessels employed on the present routes become obsolete they will fade away, as our ships did fade away in the decline of the once mighty fleet that we had.

The amendment that I have offered provides a remedy whereby the cargo ships may be maintained. To my mind it is far more important to the United States to-day, far more important to the industries of the country, far more important to agriculture, which is suffering to-day, that we have some agency to expand our trade into European and South American nations.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. WOOD. Yes.

Mr. LAGUARDIA. Does the gentleman's amendment provide for the loan of the total amount necessary to build the ships?

Mr. WOOD. Yes. It does provide for the total amount, but 5 per cent of that amount must be paid at the time the contract was entered into. In other words, it provides for a loan of 95 per cent.

Mr. LAGUARDIA. All the borrower would have to produce is 5 per cent of the value of the ship.

Mr. WOOD. That is what he would have to produce. The title of the ship would remain in the United States Government until the last payment has been made. If our trade relations are to be extended, if our merchant marine is to do the work that we would have it do, if it is to be an agency of good for the United States, and all of the industries of the United States, then we have to look to the cargo ships to do the major part of that work. In time of peace it will be the advance agent of peace, the advance agent of good will of the United States into these foreign countries, and in time of war it will be the right arm of the Navy.

Mr. KINDRED. Mr. Chairman, will the gentleman yield?

Mr. WOOD. Yes.

Mr. KINDRED. Does the gentleman think that this amendment will suffer the handicaps that will still exist to the cargo carriers because of the La Follette law?

Mr. WOOD. Yes. I adverted to that yesterday. I do not think the La Follette law is as much of a handicap as some people would believe, and I spoke at some length on that yesterday. Now that it has been estimated, I do think, in fact, it is almost certain that the differential in cost of building in the United States as compared with the cost of building in foreign countries is a little more than 4 per cent. The amendment that I have offered would save to the buyer of the ships an amount equal to about 5 per cent, and that might cover all of the differences to which the gentleman has alluded.

Mr. LAGUARDIA. Is not the danger of the gentleman's amendment this: That with only 5 per cent of an investment in the ship the owner of the ship would operate the vessel for, say, four years, permitting his ship meanwhile to run down, without doing the necessary repairs, and then turn the ship back to the Government?

Mr. WOOD. That would be impossible for the reason that this is the property of the United States, with all of the supervisory power of the United States to protect it in every detail.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. WOOD. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WOOD. So that the Government of the United States would be protected to exercise its good judgment in the first place before it ever made a loan of this character. You are doing for these other ships; why not give the cargo ships something? It is admitted by all who have given this question study that the cargo ship that has no subvention whatever, that has no relief whatever, except the relief it may get by its own exertion in the carrying trade of the United States, can not survive without aid. I think there can be no dispute about that proposition.

If we would have a merchant marine that is composed entirely of those ships that are carrying mail or being helped in some part by the carrying of mail, it will not be long before we will not be a dot on the sea, and we will not be carrying near the proportion of the commerce of the United States that we are carrying to-day. So that it is worth while that you give this matter careful attention. This amendment no doubt will fail, as did the one I offered a while ago, but I may say I am more in earnest about this one than about that, because I feel, by reason of my information and study, that the cargo ships of this country are vastly more important than the passenger ships, and unless they have some help from somewhere they are not likely to succeed. I believe that what I am saying will bear fruit, and before Congress reassembles next session the facts of the situation will become manifest.

Mr. BLACK of New York. Mr. Chairman, will the gentleman yield?

Mr. WOOD. Yes.

Mr. BLACK of New York. Has the gentleman any amendment to suggest whereby the merchant ships may be built in the Government navy yards?

Mr. WOOD. If the building of a ship is provided for in a private shipyard, they must keep their contract or be liable on their bond; but a United States navy yard may undertake in good faith to build a ship within the time and at the price stipulated, but if it fails to do it there is no remedy and no recourse; so that if we are in earnest about this, we ought to give the builder every possible advantage. If a ship can be manufactured more cheaply in a navy yard than in a private shipyard, let it be built there. On the other hand, if it can be built more cheaply at a private shipyard than in a Government navy yard, let it be built there.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield there?

Mr. WOOD. Yes.

Mr. LAGUARDIA. If a ship is destroyed by fire while under construction, who is liable for the value of the ship? Who is responsible under the law?

Mr. WOOD. I should say the insurance company would sustain that loss.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield?

Mr. WOOD. Yes.

Mr. WAINWRIGHT. Where do you draw the line whereby they can go and borrow on a ship up to 75 per cent and up to 95 per cent?

Mr. WOOD. I have a provision attached to this amendment which provides:

The provisions of this section shall not apply to vessels entitled to the benefit of Title IV of this act relating to the transportation of foreign mail.

So that this would not necessarily involve a subsidy or any other character of help.

Mr. LAGUARDIA. Does the gentleman contend that if the ship is insured against accident and carries marine insurance the insurance company must cover all the losses?

Mr. WOOD. If it was a total loss, then there might be some loss to the Government.

Mr. BLACK of New York. I have an amendment which I wish to have read.

Mr. WHITE of Maine. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentleman from Maine is recognized.

Mr. WHITE of Maine. I have a very keen appreciation of the interest of the gentleman from Indiana [Mr. WOOD] in this subject of the merchant marine, and I know the study he has given to the problem and the extensive knowledge he possesses, and when I find myself in disagreement with him I somewhat doubt the wisdom of my own action. But I am constrained to say that in this particular instance I am in disagreement with him, and I hope the amendment will not prevail.

The members of the Committee on the Merchant Marine and Fisheries are vitally interested in the cargo ships as well as in the passenger and cargo-liner type of ships. I think myself as do others who have studied this question, that you are never going to obtain the results and you are never going to see an American merchant marine built of the right type and character and carrying cargoes as we desire unless there is an individual responsibility for that ship, the burden of financial interest which the man who owns and operates the ship must feel. He must be under the constant stress of exercising initiative, industry, ingenuity, and zeal in the task which the ship devolves upon him. On the other hand, when that man has no financial interest in that ship and the entire financial risk is borne by the Government, there is lacking the very urge that makes for success in operation; and under the amendment offered by the gentleman from Indiana the entire risk would be borne by the Government of the United States and there would be no responsibility on the man himself. I am against the gentleman's amendment on that ground.

Now, we have not neglected altogether the cargo ships. In this provision of the bill providing for ocean-mail pay we have provided that ships of as low a speed as 10 knots shall be entitled to mail compensation, and we have provided that ships of as low a tonnage as 2,500 gross tons can compete for mail contracts.

I venture the assertion that a large body of ships that will be eligible for mail contracts will fall within the class that may as appropriately be termed cargo carriers as passenger vessels. It seems to me we ought to place a premium—and this bill does it—upon the speedier ships. I do not believe it is wise at this time to go to the extent of the amendment of the gentleman from Indiana. I hope it will not prevail.

Mr. HUDSON. Mr. Chairman, will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. HUDSON. Will the cargo vessel that can not achieve the greater speed receive a contract? Would such vessels get any contract?

Mr. WHITE of Maine. Many ships now having a speed of not much in excess of 10 knots are receiving mail contracts. We have written into this bill in express terms that a vessel under contract for the carriage of mail may also carry express and engage in general commercial business. I can illustrate what might happen in a particular line. Take the Export Line, running out of New York, 21 vessels running into the Mediterranean area, and none of them exceeding 10½ knots.

That line to-day enjoys the benefit of a mail contract, and there is every reason to believe that under the provisions of this bill it also will have that privilege and be under contract to carry the mails of the United States.

Mr. BLACK of New York. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLACK of New York to the amendment offered by Mr. WOOD: In line 5 of the proposed amendment, after the word "shipyards," insert "and United States Government navy yards."

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. BLACK of New York. Mr. Chairman and gentlemen of the committee, I do not want the discussions of this bill to go off on a tangent and precipitate a fight between the navy yards and the shipyards, but the whole scheme of this bill calls for the general upbuilding of shipping conditions in this country, and the navy yards are specifically mentioned in the earlier parts of the bill. I think it was the intention that not only would private yards be used but navy yards. I do not want to go into any discussion with the gentleman from Indiana as to the relative costs of navy yards and private shipyards. I see my friend from Virginia waiting for me, too.

I only offer this amendment so that in case the amendment offered by the gentleman from Indiana is adopted the navy yards will be considered.

I do not agree with the amendment offered by the gentleman from Indiana, but it is welcome, though, to find that the new chairman of the Committee on Appropriations is going to be so liberal with Government funds. By this amendment he is perfectly agreeable to have any fly-by-night gentleman, whether he be the representative of a shipyard or not, come along and get from the Government 95 per cent of the money necessary to construct a cargo ship, and then in order to protect the Government a little bit more he insists that the navy yards have nothing to do with it.

The CHAIRMAN. The question is on the amendment to the amendment.

The amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Indiana.

The amendment was rejected.

Mr. O'CONNOR of Louisiana. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Louisiana is recognized for five minutes.

Mr. O'CONNOR of Louisiana. Mr. Chairman and gentlemen of the committee, I did not enjoy the privilege of any time under general debate to express my approval and approbation of the pending bill. Consequently I have availed myself of this pro forma motion to say a few words in behalf of it. I do not know that the committee will profit by anything I may have to say, because I believe the country is pretty well sold upon the bill as it has been presented to the House. If there be any defects in it, time will show those defects and I am quite sure proper legislation will remedy them.

We are all glad that the Congress has expressed legislatively to the people of this country the hope that it has entertained so long and has vindicated that hope that the American flag is on the seas to stay and that it is a monition to all the peoples across the Atlantic and the Pacific that the flag of our country will be seen in all the ports of the world from now on. I am glad of it not only for the commercial reasons involved, my friends, but for the patriotic reasons that are inseparably associated with this great enterprise.

I remember years ago when the American fleet made a journey around the world that it had to be accompanied with hired colliers and with vessels which are to-day regarded as absolutely essential to a perfect naval establishment and a fitting complement to it. Of course, that condition could not remain long without attracting the attention of the American people. Again in 1898 we felt the necessity of that auxiliary which would perfect our Naval Establishment, because we had to hire vessels in order to make effective our warships. Even in the World War we were at a sad disadvantage for the very evident reason that we were not supplied with those auxiliaries and with those indispensables that would make the Naval Establishment completely effective, and that is the only reason for a naval establishment—to be effective.

I am glad of it also for the reason, my friends, that under the operation of this act a strong tendency will be put into motion to continue the development of all our seaports. No one in our country is any more proud of the great metropolis of the United States of America than I am. I look at the great skyscrapers, the wonderful bridges and tunnels, and the magnificent enterprise of New York with an admiring eye, the same, I suppose, as all Americans cast upon that wonderful city that has been alluded to as Babylon and Rome combined and, as one of the great Louisiana writers, Lafcadio Hearn, has said:

> Miles of marble and tons of steel,
> Mountains of granite and peaks of steel.

We are all proud of that, but we can not forget the fact that during the World War there was a tremendous congestion in the harbor of that great city. Railroad cars were bringing freight in to be carried across the ocean to our armies, but as a result of that terrific congestion the vessels lying in the Bay of New York were unable to go out because they were unable to take on the cargoes that were destined for our armies. This condition could have become an appalling menace.

We want New York to prosper. We want it to grow great and magnificent and to be the attractive city of the world for many generations to come, but we can not be forgetful of the fact that the needs of the country require the development of other ports, because no one knows when the bugle may be again sounded and when, unfortunately for the world and for humanity and for our country, we may have to cross the seas again in order to maintain our honor, our dignity, and last but not least, our own material interests.

I want to see the harbors of the Atlantic coast developed. I want to see the harbors of the Gulf coast developed and those of the Pacific coast. I want the Great Lakes' cities to become seaports as a result of the development and completion of the proposal in regard to deepening the harbors of the Lakes and the regulation of the St. Lawrence River. I want to see the waterways of this great country developed so that the dream of Mr. Hoover—and I am not referring to him with any political purpose in view, my friends—I want his dream to become an actuality. I want to see the waterways of our country become such a great asset from the standpoint of navigation and power and irrigation and all of the other ancillary developments that go with these factors, so that they will become the greatest assets the Nation possesses. I do not want them to continue the tremendous liability that they are to-day.

I believe the Congress is in a position, by waving the congressional wand, more powerful than a magician's wand, to convert that terrific, that dreadful, that appalling liability—annual floods—into an asset of incalculable value to the whole country.

With our waterways developed, the Mississippi and its great tributaries and the other great rivers that are arteries of commerce, or should be arteries of commerce, to the United States of America, with well-developed harbors on the Gulf coast and the Atlantic coast, and the Pacific coast, I feel that that United States may become self-contained, and should the grim necessity ever require it, look across the seas and say to any threat, "I am the master of my fate."

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. O'CONNOR of Louisiana. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

Mr. GARBER. I hope no gentleman will object. The gentleman is making one of the most interesting speeches I have ever heard on this floor.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. O'CONNOR of Louisiana. The time is not far distant, my friends, when there will be no such thing as a surplus of agricultural products in the United States of America. The natural increase in our population will make for a consumption of all of the so-called surpluses we have to-day. Soon this country will have to look to other sources for raw material. I believe that all the economists of America agree that that field will lie in southern seas, that it is down in Mexico and the middle Americas and in South America that we will have to get our raw material, exchanging for that raw material our fabricated or our finished products. It is therefore essential that lines running out of the Gulf ports should be there to accommodate, promote, and stimulate the great trade that is to come to us within a quarter of a century from those beautiful countries that lie to the south of us.

Somebody said recently that our exports, after all, were but 7 or 8 per cent of the total commerce of the United States, and that if the internal commerce were stimulated to a proper extent, we would not have to care much about the export trade. Even though it superficially may appear statistically correct and satisfying to us should we have to live within our shell for a while. Of course, there is somewhat of a fallacy in this, my friends, for even though exports in percentage values to the entire trade, foreign and domestic, are small relatively, yet 50 per cent of our cotton is involved in that export trade.

I do not know, my friends, that I am going to take up the additional five minutes, but before I close I want to say this, because I believe it is an encomium that ought to be bestowed upon a gentleman who has played the part of a watchman upon the towers during many years here in the House. Though he is far from the seacoast, born and reared in Tennessee, he has given his great talent in this House for the promotion of the public welfare, it is true, as a general proposition, but we of the South could not help but feel that his splendid efforts were largely going to inure to the greater glory of the people of the Southland, among whom he was born and reared. Giving due credit to all the members of the committee, we of the South can never forget the services rendered by EWIN DAVIS, of the great Commonwealth of Tennessee, far from the seashore. With no other interest than a patriotic interest to serve, he has gone forward night and day preaching the doctrine of a merchant marine, knowing it would be for the best interests of the country from every imaginable standpoint.

Those that were born by the sea will die by the sea and those that were reared in the mountains will make their last home there, but EWIN DAVIS, coming from a mountain country, has sought the sea and has given his great service to the promotion of the vessels, the riders of the sea, that will go out from our country to all the ports of the world. I wish to congratulate

him and to thank this committee for the kind attention they have given to these few desultory remarks upon this great and important piece of legislation. [Applause.]

Let me close by saying that a paper prepared by Chairman O'Connor several years ago on the asset our merchant marine is, can not be read too often. That paper is more than an argument. It is convincing to the point of a demonstration. It is unanswerable. He shows that whatever apparent deficit there might show, it was not as real as the figures would indicate, because against that stated loss were the wages paid and spent among our merchants, the goods and foodstuffs for the provisioning of our vessels, the repairs made, the total amounts of which in dollars that tended to prevent unemployment, which, when it does occur becomes a national concern. It is a great paper and should be read frequently, lest we forget. Our flag is on the seas; who will dare haul it down?

The Clerk read as follows:

TITLE IV—OCEAN MAIL SERVICE

SCOPE OF TITLE

SEC. 401. All mails of the United States carried on vessels between ports (exclusive of ports in the Dominion of Canada) between which it is lawful under the navigation laws for a vessel not documented under the laws of the United States to carry merchandise shall, if practicable, be carried on vessels in respect of which a contract is made under this title.

Mr. WHITE of Maine. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Page 10, line 11, insert after the word "Canada" and before the parenthesis the words "other than ports in Nova Scotia."

The CHAIRMAN. The question is on the amendment of the gentleman from Maine.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

REQUIREMENTS OF POSTAL SERVICE

SEC. 402. As soon as practicable after the enactment of this act, and from time to time thereafter, it shall be the duty of the Postmaster General to certify to the United States Shipping Board what ocean mail routes, in his opinion, should be established and/or operated for the carrying of mails of the United States between ports (exclusive of ports in the Dominion of Canada) between which it is lawful under the navigation laws for a vessel not documented under the laws of the United States to carry merchandise, distributed so as equitably to serve the Atlantic, Mexican Gulf, and Pacific coast ports, the volume of mail then moving over such routes and the estimated volume thereof during the next five years, the times deemed by him advisable for the departure of the vessels carrying such mails, and other requirements necessary to provide an adequate postal service between such ports.

Mr. WHITE of Maine. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Page 10, line 23, after the word "Canada" and before the parenthesis insert the words "other than ports in Nova Scotia."

The amendment was agreed to.

The Clerk read as follows:

AUTHORITY TO MAKE CONTRACTS

SEC. 404. The Postmaster General is authorized to enter into contracts with citizens of the United States whose bids are accepted, for the carrying of mails between ports (exclusive of ports in the Dominion of Canada) between which it is lawful under the navigation laws for a vessel not documented under the laws of the United States to carry merchandise. He shall include in such contracts such requirements and conditions as in his best judgment will insure the full and efficient performance thereof and the protection of the interests of the Government. Performance under any such contract shall begin not more than three years after the contract is let, and the term of the contract shall not exceed 10 years.

Mr. WHITE of Maine. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Page 11, line 25, after the word "Canada" and before the parenthesis, insert the words "other than ports in Nova Scotia."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maine.

Mr. LAGUARDIA. Mr. Chairman, I do not exactly know the purpose of this amendment. It may be that under existing conditions it may not be advisable for the Government to make any contract as provided in section 402 at this time with any company running a line between American and Canadian ports. But there is great danger in writing into permanent law a limitation or exception of this kind. Permit me to suggest to the gentleman from Maine that by so doing you may be giving an exclusive monopoly in perpetuity to a particular company that now plies between Nova Scotia and the ports of the United States. If there is a company now operating, I do not think we should write into permanent law an exclusion of other lines between Nova Scotia and this country. I believe it is very dangerous. I would like some information from the gentleman from Maine.

Mr. WHITE of Maine. This provision is not as the gentleman suggests a limitation on the Postmaster General to contract, but rather is an express grant of authority to enter into contract with vessels plying between the United States and Nova Scotia.

Before I go on I want to state to the gentleman and to the committee—and this is simply a repetition of what I said yesterday—that this title of the bill is not an exclusive authority for the Postmaster General to provide for the carriage of mail. There are other provisions of law which are in no wise affected by this title of the bill under which the Postmaster General may enter into contracts. The fact, however, is—I do not want to withhold anything from the gentleman from New York or from the House—there is a steamship line running between the ports of the Atlantic coast, Boston and New York, to Yarmouth, Nova Scotia. As the bill stood before the amendment was offered, that line was excluded from an opportunity to contract under this title, and by the amendment it is made possible for the Postmaster General if he desires to do so to contract with the line for the carriage of the mail.

Mr. LAGUARDIA. But you exclude other ports of Canada?

Mr. WHITE of Maine. The reason for that or the fact is that is the situation under existing law. A similar provision was written in the 1891 ocean mail act and has been on the statute books for all the years. This has the approval of the Post Office Department and was expressly recommended by the Post Office Department in the discussion of the title of this bill.

Of course, speaking by and large the movement of mail to the Canadian points goes much faster by rail than by water. In this particular instance the mail will move by this steamship line from Boston to Nova Scotia in 16 hours, while it would take 36 hours to reach its destination by rail.

Mr. LAGUARDIA. Then, why could not you strike out the provision in parenthesis?

Mr. WHITE of Maine. If we struck it out it would accomplish the same thing, but the advice of the Post Office Department was against that. In other words, they did not want to be placed in the position of having to make mail contracts by water to Canadian ports, because, except in this almost single instance, mail will move faster and more frequently by rail.

Mr. LAGUARDIA. That answers fully. Therefore I do not see the purpose of the first exclusion and then an exception to the exclusion. I think it is bad legislation.

The CHAIRMAN. The time of the gentleman from New York has expired. The question is on the amendment offered by the gentleman from Maine.

The amendment was agreed to.

The Clerk read as follows:

VESSELS

SEC. 405. (a) The vessels employed in ocean mail service under a contract made under this title shall be steel vessels, shall be steam or motor vessels, and shall be either (1) American-built and registered under the laws of the United States during the entire time of such employment, or (2) registered under the laws of the United States not later than February 1, 1928, and so registered during the entire time of such employment, or (3) actually ordered and under construction for the account of citizens of the United States prior to February 1, 1928, and registered under the laws of the United States during the entire time of such employment.

(b) A vessel for the services of which a contract is entered into under authority of this title, and the construction of which is hereafter begun, shall be either (1) a vessel constructed, according to plans and specifications approved by the Secretary of the Navy, with particular reference to economical conversion into an auxiliary naval vessel, or (2) a vessel which will be otherwise useful to the United States in time of national emergency.

(c) Upon each departure from the United States of a vessel employed in ocean mail service under this title, three-fourths of the crew, exclusive of licensed officers required by law, and exclusive of the steward's department, shall be citizens of the United States.

Mr. LAGUARDIA. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 13, line 8, strike out the words "and exclusive of the steward's department."

Mr. LAGUARDIA. Mr. Chariman, if the committee will give me their attention for a few moments I desire to point out the importance of this amendment. It will be urged that the adoption of this amendment will make the operation of American passenger vessels difficult if not impossible. With that position I take issue. The steward's department is perhaps one of the most important departments on a passenger ship. It is surely the most numerous. Under present conditions American ships plying between European and Atlantic ports have loaded their stewards' department with aliens, while we have American citizens walking the streets of New York seeking employment. It is a matter of record that American citizens are constantly applying to the United States Shipping Board for employment, and can not obtain work by reason of the fact that the stewards' departments are recruited in English, French, Italian, and other European ports. Besides the discrimination against the American citizens, we have this other problem, that under the immigration law now in effect, with its quota limitations, every time a vessel lands they have a large number of desertions. Many of these men take work at lower wages, having in mind the opportunity of leaving the ship at one of its calls at an American port. It will be suggested that it is impossible to get the kind of service these ships require if they have to recruit three-quarters of their men in the steward's department from American citizens. I submit that if you go to the Mayflower Hotel, to the New Willard Hotel, to the Carlton Hotel, or to any first-class hotel in this country, you will find very intelligent, courteous service, and the majority of the men employed in that service are American citizens. It is not true that you can not recruit sufficient men to do this work in the steward's department. The answer is this, that these companies do not want to pay American wages, and the reason for the preference given to foreign labor is the possibility of compelling the men to live under conditions to which the ships would not dare to submit American citizens, and under wages that no American would accept.

I have here a comparative table of wages paid on the steamship *California*, an English vessel, and the American steamer, *President Wilson*, of the Dollar Line. The wages paid an able-bodied seaman on the *California* are $43.80 a month, while the American ship of the Dollar Line pays $10.97 a month, and why? Because the seamen are Chinese coolie labor. That is the great attraction for Chinese labor. It seems to me that if we are here providing ways under direct subsidy and assistance to American shipping, if we are providing an enormous fund to make loans under favorable conditions, if we are assisting shipping in all these ways, it is only fair to insist that three-quarters of the crew, including the steward's department, should be taken from American citizens. If the men are not available, that matter can be easily ascertained, but there has been a discrimination in New York against American citizens in the steward's department, and I make that statement knowingly.

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. GARBER. Can the gentleman give the number of the personnel in the steward's department as compared with the personnel of the crew of the ship, approximately?

Mr. LAGUARDIA. Take a ship like the *Leviathan;* I would say that there are as many men in the steward's department as there are in the engineering and the deck department combined. The steward's department in a big ship, in a modern ocean vessel, to-day affords as many opportunities for a young man as the hotel business would. A young man can enter the service like an English boy does on English ships, as a bell boy, and work his way up to an assistant steward or a steward in the second class, and then to a cabin steward, and then into the first class. There are several supervisory positions and a man can have his future there. Such positions as deck steward, smoking-room steward, library steward, are only a few of the many lucrative positions in the steward's department. It is not fair to preclude these boys who are inclined to take up this kind of work from getting employment on an American ship. You will find no aliens in the steward's department of an English ship. The minute that you write into the law an exclusion of the steward's department from the three-quarters of the crew provision you make it impossible for an American citizen to go on a ship, because the ships will recruit their men in France, Italy, Germany, England, and China at less wages, and that is the end of it.

Mr. HUDSON. The gentleman made a statement that in the port of New York they could find sufficient help for this department. Does the gentleman think that same condition holds in other ports—like the ports on the Pacific coast?

Mr. LAGUARDIA. I will tell you what the test will be. I will say to the gentleman from Michigan [Mr. HUDSON] that if we should suggest here an amendment to the effect that Chinese stewards should be paid the same rate of wages as American stewards, you will find that they will equip their ships with American stewards at once. It is simply a question of getting men to work for $10 a month, and you can not get an American citizen to work for $10 a month and live under the conditions that Chinese coolie labor are given on these ships.

Mr. SCHNEIDER. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SCHNEIDER. Is it not true that the sea service department of the Shipping Board maintains a blacklist?

Mr. LAGUARDIA. Oh, do not let us get this question confused with any other question.

You require here that three-quarters of the crew must be American citizens. It is considered all right for American citizens to go down into the hold and shovel coal, but in the steward's department you compel an American citizen to compete with the Chinaman and then the Chinaman will get the job. You shut the door to American citizens in the steward's department, where there is more of a future for the average young man and greater earnings than there is on deck or in the engine room, because for the boy who goes into the service on deck the best position he can hope to obtain is that of quartermaster. But the percentage of chances to such promotion is so small that he will probably remain a seaman. But in the steward's department, where under proper legislation he would have this chance of promotion, you shut the door.

When you provide that the owners of these ships shall receive these benefits from the people of the United States, citizens of the United States should not be excluded from the steward's department. If the purpose of this bill is to build up an American merchant marine and treat all alike we should at least give the American boy the same chance that you give to a Chinaman. Without my amendment it will not do it.

Mr. WHITE of Maine rose.

Mrs. KAHN. Mr. Chairman I rise in opposition to the amendment.

Mr. WHITE of Maine. I am glad to yield, Mr. Chairman, to the lady from California.

The CHAIRMAN. The lady from California is recognized.

Mrs. KAHN. Mr. Chairman, of course I am not acquainted with the conditions in the port of New York; I do not know anything about the conditions on the Atlantic seaboard, as described by the gentleman from New York. But I do know that on the Pacific seaboard the vessels plying between San Francisco and the Orient spend 75 per cent of the time in tropical waters. It has been found almost impossible to get white seamen, particularly in the steward's department, to stand the climatic conditions that prevail in the Orient. I do not believe they deny that they can get American citizens to fill the places. But the American generally becomes sick; he can not stand work in the Tropics. The ships find themselves undermanned through illness when they have taken on a number of American seamen.

The Dollar Steamship Co., to which the gentleman from New York [Mr. LAGUARDIA] referred, employs Chinese in the steward department, while most of the English steamships that are engaged in the oriental trade and all the oriental ships with which they must compete, employ Chinese and Lascar and oriental crews. I have not had time to obtain the figures or facts, but I think in the case of the Dollar Steamship Co. the principal reason for the employment of the oriental in the steward's department is on account of the climatic conditions.

Just to show what the Dollar Steamship Line is doing, I may say that three years ago they started an around-the-world service, and in that time it has brought new trade to this country from Penang, Singapore, and Ceylon amounting to $29,000,000 and increased the oriental trade, Chinese and Philippines, to $54,000,000. I know it is the ambition and the desire of the Dollar Steamship Co., and, indeed, all our steamship companies plying on the Pacific to the Orient, to render the best and highest service they can give, and they have found, after bitter experience, that on account of the climatic conditions it is almost impossible to employ Americans in their service in the Tropics and give the service they desire. The adoption of this amendment would seriously cripple our Pacific service, if it did not help drive our merchant marine off of the Pacific.

Mr. WHITE of Maine. Mr. Chairman, I do not think the objection to the amendment offered by the gentleman from New York [Mr. LAGUARDIA] can be overstated. To my mind the adoption of that amendment means the driving of the American flag from the Pacific Ocean. There is no general provision of law to-day requiring that the general crew on an American vessel shall be composed of American citizens. There is written in the law of 1891, the ocean mail act, a provision that there shall be in the first year one-fourth of the crew of

American citizens, and in the next two years the provision is that one-third of the crew shall be American citizens. Then, it provided that after three years one-half of the crew should be American citizens.

That provision was applicable, not generally to American ships, but to those ships under contract under that particular act. There is in the seamen's law a provision with respect to the ability of the crew to understand the language of the master, but that does not go at all to the question of citizenship. So I repeat that under the present law generally there is no provision at all requiring American citizenship of crews. It has been the law for many years that licensed officers shall be American citizens.

Now, what did your committee have in mind when it drafted this bill? There are certain positions that entail a great responsibility, such as those in the engineer department, and in the navigation department, and other positions having to do with the care and the safety of the ship.

We have taken the present provisions of law almost as they are, and we have moved that percentage up to three-fourths of the crew. In this section we are setting up a standard never before written into law in these United States. We are asking you to approve a provision that three-fourths of the men on board an American ship, outside of the steward's department, shall be of our citizenship. We think it is a provision for the betterment of standards on American ships; we believe it insures a greater degree of safety; that it works for skill and works for the dignity of the American sailor and the American master.

I hope, members of the committee, that this amendment will not prevail, because I join in the statement made by the lady from California that it means the doom of American shipping upon the Pacific Ocean, because of the conditions which are familiar to everyone who knows anything about the Oriental trade.

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. HOWARD of Oklahoma. Did not the people of California tell us a few years ago that the bringing in of Chinese would mean the doom of California, and yet now they want to open it up?

Mr. WHITE of Maine. No; not at all.

Mrs. KAHN. I want to say to the gentleman from Oklahoma that no oriental is allowed to land from any ship coming into the Bay of San Francisco. Every oriental employed is under a bond, I think, of $5,000, and they are not allowed to leave the ship in any American harbor.

Mr. GREEN. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. GREEN. Why is it they can not obtain American labor?

Mr. WHITE of Maine. Out on the Pacific, because of the climatic conditions and physical conditions alluded to by the lady from California, and because, by and large, the American boy is not willing to wait on table on board a steamer and serve nationalities of all sorts and of all races. That is the practical situation which confronts us.

The CHAIRMAN. The time of the gentleman from Maine has expired.

Mr. LEAVITT. Mr. Chairman and members of the committee, I am in favor of this amendment for reasons that have not yet been completely discussed. Theoretically the law prevents an oriental from coming ashore in an American port and makes it practically impossible to substitute another oriental wishing to return to his country and leave a younger man who has come on the ship as a steward or otherwise to remain in this country. I have, however, gotten away from the theory of what the law is down to what is the practical situation, and this situation, as I learn it from the office of the Commissioner of Immigration, is that a very large number, a very considerable number, of orientals are coming continually into this country by that means. Just within the last week in New York City a taxicab was held and there were found to be five Chinamen who were being sent as substitutes to a ship in the place of five younger Chinamen who had come in the capacity of stewards and who were remaining in this country. It is true that we can require a $500 bond from the ship company, to prevent that sort of thing, but if a young Chinaman comes here two, three, or four times as a steward they must have some cause before they refuse him permission to go ashore. We do not have arbitrary power and they do from time to time, after having made a good record, come ashore, remain ashore, and their places are taken by older orientals who have paid for the privilege and who are returning again to the Orient.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. LAGUARDIA. On board the Dollar steamship *President Wilson* they carry 24 Chinamen on the ship's register as winchmen and they pay them 12 cents a month, and the purpose of that is to transfer them to other ships when Chinamen from the other ships desert.

Mr. LEAVITT. They pay all the way from a few hundred dollars up to $1,000 for the privilege of making that substitution.

Mr. GREEN. Will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. GREEN. If we do not pay sufficient wages to attract American labor, does not the gentleman think we ought to pay proper wages and get American labor for these ships?

Mr. LEAVITT. If we need that kind of labor on the ships, we can get our own Filipinos, to whom we have some sort of responsibility; and we should amend this bill to that end. They are not citizens but they are our Territorials.

Mr. ALLGOOD. Will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. ALLGOOD. If they make the exchanges suggested by the gentleman, it would seem that the officials of the ships are not diligent.

Mr. LEAVITT. They are diligent, but it is a matter of practical fact that in spite of diligence, just as in the case of the enforcement of other laws, a very considerable number of orientals are coming into this country. We have just as many Chinamen, for example, in the United States to-day as we had back in the days when we passed our exclusion act. And the average would be just as young as it was then, through these substitutions.

Mr. LAGUARDIA. Will the gentleman add that these Chinamen reimburse the company for the $1,000 fine that they must pay?

Mr. LEAVITT. Yes; they are very willing to do that, according to the records that have been made in cases that have been taken into court.

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. HOWARD of Oklahoma. The question was raised about these people having to be used on account of being in a tropical country. Do we not send our soldiers into the Tropics, and do we not send other representatives of this country into the Tropics. We have the Filipinos, as the gentleman stated, for this service.

Mr. LEAVITT. Yes; we have the Filipinos on our own transports and on ships under our own flag to take care of this work.

Mr. SCHNEIDER. Is it not true that the large ships on the Atlantic go into the Tropics on practically every trip to South America and it is not necessary to employ Chinamen on those ships, and in many cases Americans do that work?

Mr. LEAVITT. I think that is true.

Now, Mr. Chairman, before I take my seat I wish to say that this measure is one of the most constructive which has been before this Congress, a measure to which I am giving my full support, but in respect of this matter and one or two others it seems to me we must have in mind there are other serious directions toward which action can lead. We have our immigration problem, and we must face that problem all the time, just as we must face this one of the merchant marine, and we can accomplish the same thing, in my opinion, with regard to rebuilding our merchant marine and cut out this provision, which would exclude the steward service from the provisions of this section.

Mr. TREADWAY. Mr. Chairman, I think the gentleman from New York has brought a very severe indictment against the merchant marine and against our Shipping Board, but I think the gentleman is also confusing two situations. He is talking about the Chinamen particularly traveling the Pacific, and then he tells us there are young Americans walking the streets of New York applying for jobs on board our ships who are turned down. I do not see exactly the relationship between a boy unemployed in New York City and a Chinaman on a ship in the Pacific Ocean.

Mr. LAGUARDIA. I did not expect the gentleman would.

Mr. TREADWAY. I know the gentleman would not expect that, and I admit I can not see it.

I think the gentleman from New York confuses the issue. We are trying to build up a merchant marine, we are appealing to our people to travel on our ships, and one of the things we must give them is service. The class of people who are traveling on our Atlantic ships, such as the great *Leviathan* and the other ships going out of New York, must be given proper service or these ships can not sell this class of accommodations, and one

way to give service is to have trained employees in the steward's department.

I stick up for the American boy every time, and I would like to see put in the bill a clause requiring that American-made goods only shall be used on the ships. But I do not think that because some boy may not get a job in New York City as a steward this is any reason to condemn the type of service that is being given in the Pacific Ocean, and that is all the gentleman from New York has done.

Mr. WAINWRIGHT. Will the gentleman yield for a question?

Mr. TREADWAY. Yes.

Mr. WAINWRIGHT. Is it not really the fact that you simply can not get American boys or American men with the skill and qualifications necessary to render this service at anything like the pay that the gentleman states is paid?

Mr. TREADWAY. That is exactly the point.

Mr. LAGUARDIA. The best proof of the contrary is that in the gentleman's hotel he has good, clean American boys in this service.

Mr. TREADWAY. I am not talking about my business, I am talking about the Government's business.

Mr. LAGUARDIA. So am I.

Mr. LEHLBACH. Will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. LEHLBACH. But the type of waiter the gentleman speaks of in the hotels in the city of Washington, for instance, is not required to wait on Chinese, Japanese, and negroes, as is a man on board ship.

Mr. SCHNEIDER. Would the gentleman expect a young American in bidding for a job with the United States Government to compete with a Chinaman who works for just a few cents a month?

Mr. TREADWAY. I would not, and I would agree with the gentleman from New York if he could prove his indictment against the Shipping Board, that it is not employing American citizens out of New York City on board its ships when they are available. If the gentleman could prove this, he would have a good case; otherwise he would not. Furthermore, the gentleman would have to show that they could provide sufficiently trained employees to give the type of service that you and the rest of us—the American people generally—want to have when we travel on these first-class liners.

Mr. WAINWRIGHT. The truth is that American boys will not take that kind of a job.

Mr. TREADWAY. The American boy does not want that kind of a job, and I defy the gentleman from New York to produce evidence that they are discriminated against in the port of New York. If they are, the Shipping Board ought to be called to account for it. I do not believe the gentleman can prove his statement any further than to repeat it on the floor here. That is all the gentleman has done.

Mr. LAGUARDIA. The Shipping Board has been called to account for it at various times during the last 10 years.

Mr. TREADWAY. No; the gentleman has not a case against the Shipping Board, and he knows it.

Mr. LAGUARDIA. Of course I have.

Mr. TREADWAY. And we are not here to talk politics or to play to the East Side of New York.

Mr. LAGUARDIA. And we are not here to talk about the hotel business of the gentleman from Massachusetts, and the gentleman does not know what he is talking about.

Mr. TREADWAY. Mr. Chairman, have I the floor at the present time or the gentleman from New York?

The CHAIRMAN. The gentleman from Massachusetts has the floor.

Mr. LAGUARDIA. Do not worry about the East Side of New York.

Mr. TREADWAY. We are talking about the service we need to demand of these ships in order to appeal to the patrons of the ships; and while I agree that we should employ American boys just as far as we can get them, I do not agree that they are discriminated against in the New York office of the Shipping Board.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. WHITE of Maine. Mr. Chairman, I move that all debate on this section and all amendments thereto shall close in two minutes.

The motion was agreed to.

Mr. SCHAFER. Mr. Chairman, I did not expect to speak to-day on this legislation, but I can not allow the statements of preceding speakers to go by without making some comment.

Following the theory of the gentlemen from Massachusetts and New Jersey and the lady from California that it is necessary to have Chinamen on these boats to wait on Chinese and nationals of certain other countries, we would expect them to favor legislation repealing the oriental exclusion provisions of the immigration law. Those who are leading the opposition to this amendment which would limit the employment of non-Americans on merchant marine ships also led the fight for the provisions of the immigration law which excludes orientals.

This bill provides for a substantial subsidy to the shipping interests from the Federal Treasury, and its proponents strongly urge its enactment for the purpose of building up an American merchant marine. The adoption of the pending amendment providing for the employment of American citizens in the merchant marine as against orientals and other foreigners will truly make this an American merchant marine bill. [Applause.]

The CHAIRMAN. All time has expired on this section and all amendments thereto. The question is on the amendment offered by the gentleman from New York [Mr. LAGUARDIA].

The question was taken; and on a division (demanded by Mr. LAGUARDIA) there were 35 ayes and 38 noes.

Mr. LAGUARDIA. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. LAGUARDIA and Mr. WHITE of Maine.

The committee again divided; and the tellers reported that there were 44 ayes and 51 noes.

So the amendment was rejected.

Mr. LAGUARDIA. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Page 13, line 9, after the period, insert a colon and the following: "*Provided*, That aliens employed in the steward's department shall receive the same rate of wages paid to American citizens performing a similar service."

Mr. LEHLBACH. Mr. Chairman, I make a point of order to the amendment that it is not germane. There is nothing in the bill with reference to the payment of wages.

Mr. LAGUARDIA. Mr. Chairman, I want to be heard on the point of order. The section under consideration provides for the service of vessels employed in the ocean-mail service under contract. This section provides for the personnel, officers, crews, and stewards. It necessarily carries with it the implication that these men are to be paid. There is nothing in the section that precludes any understanding that these men are not to be paid. That being so and the consideration of the amendment which has been defeated developed the fact that it was contended that these vessels engaged in the Pacific service are obliged to employ alien labor on account of climatic and other conditions. That being so, Mr. Chairman, we do not expect the American merchant marine to thrive on the exploitation of foreign labor. I hope the gentleman from New Jersey will not press his point of order. This very provision carries with it an implication of payment to the employment of the aliens, and therefore the amendment is germane and in order.

Mr. LEHLBACH. Mr. Chairman, this bill has for its purpose the development of an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States. The first portion of the bill under consideration speaks of sales of vessels, remodeling, improving, and replacing them. Title III is for construction and for the creation of a fund for the construction of ships by private parties. Title IV, which is under consideration, provides for contracts by the Government with various steamship operators for carrying the mails. In that connection we simply describe the character of the crews on the ships carrying the mails in the interest of the safety of the mail transported. The subsequent sections deal merely with maintenance, and so forth. There is nothing in the title about the payment of seamen. The next title deals with insurance, and the next title is transportation, compelling Government officials when traveling to travel on American-flag ships. Then follows the authority for appropriations and the right of the Government in times of an emergency to requisition vessels which have received the benefits of the act.

There is nowhere anything in the act that remotely has to do with the amount of wages or the payment of wages.

The CHAIRMAN. The amendment admittedly would not be in order elsewhere than on this subdivision that has to do with persons employed on ships. This provision has to do with the personnel but not at all with their wages or other requirements than citizenship. The Chair holds that the amendment is not germane and sustains the point of order.

Mr. HOUSTON of Hawaii. Mr. Chairman, I offer an amendment:

The Clerk read as follows:

Amendment by Mr. HOUSTON of Hawaii: Page 13, line 9, at the end of the line, add "or persons owing allegiance to the United States."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Hawaii.

Mr. HOUSTON of Hawaii. Mr. Chairman, I would like to be heard.

The CHAIRMAN. Debate has been closed on the section and all amendments thereto.

The question is on the amendment offered by the gentleman from Hawaii.

The question was taken, and the amendment was rejected.

Mr. FOSS. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. Foss: Page 13, line 6, after the word "title," insert the words "not less than."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts.

The amendment was rejected.

The Clerk read as follows:

AWARDING CONTRACTS

SEC. 407. Each contract for the carrying of ocean mails under this title shall be awarded to the lowest bidder who, in the judgment of the Postmaster General, possesses such qualifications as to insure proper performance of the mail service under the contract.

Mr. CARTWRIGHT. Mr. Chairman, I move to strike out the last word, and ask unanimous consent to speak out of order for three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CARTWRIGHT. Mr. Chairman, I take advantage of the opportunity to call attention to the American Poultry Association convention and the North American Poultry Show to be held at Ardmore, Okla., August 14 to 18, inclusive. In behalf of the good people of Ardmore—my district—and the State of Oklahoma, I desire to extend to the Members of Congress, the public, and especially the laymen of the poultry industry throughout North America a hearty invitation to visit this beautiful and progressive city when its glory is enhanced by the cackle of the hen. Highly improved roads pass through this section from every center of population. Splendid highways come into Ardmore like spokes into a hub. The railroad facilities are excellent and the people are the most generous and hospitable in the world. [Applause.]

The poultry business has developed into a tremendous industry, and we claim that no better breeds are grown than in our section. It has been said that if all the chickens of Oklahoma were one chicken, he could stand on the Rocky Mountains, flop his wings, and with one crow jar the bands off the planet Saturn. [Applause.] We are anxious for visitors to see this favored section at a time when its possibilities can be best appreciated.

Members of the poultry fraternity, particularly those from the Southwest who were in attendance at the World's Poultry Congress held at Ottawa, Canada, last July, and who worked energetically for the convention to be brought to Oklahoma, even though Omaha, Nebr., and Habana, Cuba, had much the lead on them in the beginning, had a vision of what could be presented by this ambitious young Southwest in the way of exhibiting prize show birds at any season of the year. Hence the program of holding a poultry show to which breeders of all varieties of birds from Canada, Cuba, and Mexico on the North American Continent, and, in fact, of all countries of the earth have been invited to exhibit.

"The Madison Square Garden Show of the Southwest" is the adopted slogan, and with the hearty cooperation that always exists between the poultrymen of the country, the matter of a large exhibit entry is thus early assured.

Lindbergh's flight to Paris or his good-will expedition to Central and South America has not been more revolutionary in execution or effect than the invasion of the cotton pests in this section. They have aroused our people to a realization of the possibilities of an industry that is changing the one-crop system, putting the farmer on a monthly pay roll, and inspiring him with hope for and confidence in a lasting, permanent prosperity. [Applause.]

Although Oklahoma is one of the youngest States in the Union, already 92 per cent of her farmers are raising poultry. It is estimated that the 13,000,000 hens on Oklahoma farms in 1927, laid 60,000,000 dozens of eggs, which, at 25 cents a dozen, were worth $15,000,000.

To arouse the keenest interest and competition, most extraordinary prizes will be offered. Among those most unusual will be "good will cups" from foreign countries and the States. Every governor in the United States has been respectfully asked to present a "good will cup" from his State and to attend the convention or send his personal representative. The very first cup up for this contest came from Gov. Henry S. Johnston, of Oklahoma, which was, indeed, fitting and proper. A number of foreign countries have signified their intention of bestowing "good will cups."

The program for the four days as tentatively suggested by the American Poultry Association committee promises to be one of the most constructive ever presented by the association. It will deal with poultry questions, issues, and problems common the world over and will be participated in by nationally and internationally known authorities on poultry breeding and all allied phases of the industry.

No convention is a perfect success where all work and no play fails to be planned, so Ardmore is making interesting and intensive plans for the entertainment of her guests. She is to be joined in this by her sister cities, each offering decidedly unique and individual forms of pleasure. Sulphur, known the country over for her wonderful medicinal waters, national park, and scenic beauty, will entertain with a swim in these wonderful waters, followed by a chicken picnic supper. Davis will entertain the convention delegates en route to Sulphur with a watermelon feast where the cutting will take place at one of the most beautiful and picturesque spots on the "Little Colorado" of Oklahoma.

In a few words, the advantage to be derived by all in attendance is the contact and information that will naturally result. For the Southwest, the poultrymen hope to sell the progress of this section to the older areas.

Ardmore is cleaning house from garrett to cellar in honor of the convention. She will offer one of the most delightful camp sites for the comfort of motorists. This will be equipped with lights, water, and all facilities for convenience and comfort. She offers in the matter of housing facilities, comfortable hotels and clean and attractive café accommodations. The location for the exhibition is all that could be desired, and the fine new convention hall, located in the heart of the city, will seat all delegates comfortably and take care of all special sessions.

I repeat a pressing invitation to take advantage of this occasion. Oklahoma will throw wide her gateways, and Ardmore will open her arms and extend to each and all who honor her with their presence a most cordial welcome. [Applause.]

The Clerk read as follows:

CLASSIFICATION OF VESSELS

SEC. 408. (a) The vessels employed in ocean mail service under this title shall be divided into classes as follows:

Class 7. Vessels capable of maintaining a speed of 10 knots at sea in ordinary weather, and of a gross registered tonnage of not less than 2,500 tons.

Class 6. Vessels capable of maintaining a speed of 10 knots at sea in ordinary weather, and of a gross registered tonnage of not less than 4,000 tons.

Class 5. Vessels capable of maintaining a speed of 13 knots at sea in ordinary weather, and of a gross registered tonnage of not less than 8,000 tons.

Class 4. Vessels capable of maintaining a speed of 16 knots at sea in ordinary weather, and of a gross registered tonnage of not less than 10,000 tons.

Class 3. Vessels capable of maintaining a speed of 18 knots at sea in ordinary weather, and of a gross registered tonnage of not less than 12,000 tons.

Class 2. Vessels capable of maintaining a speed of 20 knots at sea in ordinary weather, and of a gross registered tonnage of not less than 16,000 tons.

Class 1. Vessels capable of maintaining a speed of 24 knots at sea in ordinary weather, and of a gross registered tonnage of not less than 20,000 tons.

(b) The classification of a vessel may be based upon its speed without regard to its tonnage if the Postmaster General is of opinion that speed is especially important on the particular route on which the vessel is to be employed, and that a suitable vessel of a higher classification is not available on reasonable terms and conditions, or, on account of the character of the ports served or for other reasons, can not be safely or economically employed on such route.

Mr. WHITE of Maine. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 15, line 11, insert after the word "vessel" the words "registered under the laws of the United States."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maine.

The amendment was agreed to.

The Clerk read as follows:

COMPENSATION UNDER CONTRACTS

SEC. 409. (a) The rate of compensation to be paid under this title for ocean mail service shall be fixed in the contract. Such rate shall not exceed: For vessels of class 7, $1.50 per nautical mile; for vessels of class 6, $2.50 per nautical mile; for vessels of class 5, $4 per nautical mile; for vessels of class 4, $6 per nautical mile; for vessels of class 3, $8 per nautical mile; for vessels of class 2, $10 per nautical mile; and for vessels of class 1, $12 per nautical mile. As used in this section the term "nautical mile" means 6,080 feet.

(b) When the Postmaster General is of opinion that the interests of the Postal Service will be served thereby, he may, in the case of a vessel of class 1 capable of maintaining a speed in excess of 24 knots at sea in ordinary weather, contract for the payment of compensation in excess of the maximum compensation authorized in subsection (a), but the compensation per nautical mile authorized by this subsection shall not be greater than an amount which bears the same ratio to $12 as the speed which such vessel is capable of maintaining at sea in ordinary weather bears to 24 knots.

(c) If the Postmaster General is of opinion that to expedite and maintain satisfactory service under a contract made under this title, airplanes or airships are required to be used in conjunction with vessels, he may allow additional compensation, in amounts to be determined by him, on account of the use of such airplanes or airships. Such airplanes or airships shall be American built, and owned, officered, and manned by citizens of the United States.

(d) The Postmaster General shall determine the number of nautical miles by direct route between the ports involved and payments under any contract made under this title shall be made for such number of miles on each outward voyage regardless of the actual mileage traveled.

Mr. WHITE of Maine. Mr. Chairman, I offer the following committee amendment, which I send to the desk.

The Clerk read as follows:

Page 16, line 20, strike out the word "direct" and insert in lieu thereof the words "the shortest practicable."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maine.

The amendment was agreed to.

Mr. ARNOLD. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. Does this competitive bidding prevent a bid by a foreign vessel, or is it confined entirely to American ships?

Mr. WHITE of Maine. Mr. Chairman, contracts under this mail title, so called, are confined exclusively to American ships.

Mr. ARNOLD. Can the gentleman give us any information as to the difference in the cost of having the mails transported in American bottoms and in foreign bottoms under present conditions?

Mr. WHITE of Maine. I can not answer that question with the definiteness that I would like to. It is largely a matter of contract now or arrangement. There is a general provision that on a poundage basis, I think they call it, the American ship is paid 80 cents and the foreign vessel is paid 26 cents. That is where the mail is carried on a poundage basis.

Mr. ARNOLD. Do I understand that the Postmaster General would now be precluded from entering into a contract with foreign ships for the transportation of American mails?

Mr. WHITE of Maine. Not at all. We recognize that there may be situations, there may be ports between which it is impossible to secure American service, which we would like to have, and we do not want to so frame the law that we can not arrange for the transportation of our mails, so that the Postmaster General does have authority under existing law to contract with foreign ships for the carriage of mails, but he may not contract under this title with a foreign ship.

Mr. ARNOLD. In other words, I understand that where foreign ships and American ships touch the same ports the Postmaster General is precluded from entering into a contract with any foreign ships?

Mr. WHITE of Maine. No; that is not so. He still might if he does not think the conditions warrant the employment of the American ships. He could still employ the foreign ship between ports on which American vessels are giving service, under those conditions.

Mr. ARNOLD. Then is this competitive bidding open to all?

Mr. WHITE of Maine. This competitive bidding is between American vessels.

Mr. ARNOLD. What would determine the rate paid to a foreign vessel touching the same ports that American vessels touch?

Mr. WHITE of Maine. That would be a matter of contract between the Post Office Department and the foreign shipowner.

Mr. ARNOLD. The reason I ask is this: I understand that the Postmaster General has been contracting with American ships to the exclusion of foreign ships, and in that matter alone has added an increased item of expense of something like $3,600,000 a year to the Post Office Department.

Mr. WHITE of Maine. I do not have those particular figures in mind, but I am perfectly willing to pay that and more if he will utilize the American ship in place of the foreign ship. May I add a further statement—and this is in response to a question asked me yesterday by the gentleman from Maryland [Mr. LINTHICUM]?

I told him I would put in the RECORD a statement of the percentage of mail carried by American ships and by foreign ships. I did not hold out my remarks for revision, but I am told by the Post Office Department this morning that the percentage of mail carried abroad on foreign ships from our home ports was 30 per cent and on American ships 70 per cent. But on mail moving from foreign ports here less than 10 per cent goes in American vessels and foreign ships are used almost to the exclusion of the American ships.

Mr. ARNOLD. What I am interested in particularly is to know what governs the Postmaster General in awarding these contracts between ports served by American ships and those served by foreign ships. The gentleman says the Postmaster General is not confined to American ships?

Mr. WHITE of Maine. We do not require in express terms the use of American ships, but we say that wherever practicable he shall use American ships.

The CHAIRMAN. The time of the gentleman from Maine has expired.

Mr. TREADWAY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Massachusetts is recognized.

Mr. TREADWAY. Mr. Chairman, an incident occurred during the debate when the gentleman from New York [Mr. LAGUARDIA] offered an amendment a few moments ago—an incident that I think is worthy of record and worthy of knowledge on the part of the House. It shows the resourcefulness of a Member and also the quickness of communication to-day in this country.

The Members on the floor at that time will recall that the gentlewoman from California [Mrs. KAHN] made a very stirring speech in opposition to the amendment offered by the gentleman from New York, and the information which she furnished to the House at that time was secured by telephone to San Francisco at her own expense after the gentleman from New York had offered the amendment. I think such resourcefulness as that on the part of a fellow Member ought to be a matter of record. [Applause.]

Mr. WAINWRIGHT. Mr. Chairman, I move to strike out the last three words of the paragraph, for the purpose of asking a question of the gentleman from Maine [Mr. WHITE]. He said "wherever it was practicable" the Postmaster General must give the preference to the American ship. Does that not mean that where an American ship is available for service he must give that American ship the preference?

Mr. WHITE of Maine. I think myself that, when an American ship of the proper size and speed and able to meet the conditions of these specifications presents itself and the department may let the contract on satisfactory terms, it is the duty of the Postmaster General to do it. We have endeavored to stop short of an absolute and mandatory provision to the effect that he must employ the American ship.

Mr. WAINWRIGHT. Take the suppositious case mentioned by the gentleman where the statute says "if practicable." In that case it would be the duty of the Postmaster General to award the contract to the American ship?

Mr. ARNOLD. The thing I was particularly interested in knowing what is the basis of the cost of operation between the two lines, the American and the foreign. How is the Postmaster General to be governed in the letting of this contract?

Mr. WHITE of Maine. It is not a question between an American or British or foreign ship. Under this provision or title a foreign ship is not eligible to a contract under any circumstances. The competition contemplated under this title is competition between American ships only.

Mr. LAGUARDIA. Mr. Chairman, the gentleman from Massachusetts [Mr. TREADWAY] took his seat so quickly a moment ago that I now wish to ask unanimous consent that the gentleman from Massachusetts may revise and extend his remarks, so as to indicate the sources of the information given by the lady from California [Mrs. KAHN].

The CHAIRMAN. The Chair thinks it would be in order for the gentleman from Massachusetts to submit his own request.

Mr. ALLGOOD. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. ALLGOOD. For 50 years the question of immigration has claimed the attention of Congress. In 1879 President Hayes vetoed the first Chinese expulsion act. In 1882 President Arthur vetoed an act which had for its purpose the suspending of Chinese immigration for a period of 20 years. In 1887 President Cleveland vetoed an act excluding illiterates. A similar act was vetoed by President Taft in 1913. In 1917 President Wilson vetoed an act excluding illiterates; however, the act was passed over his veto by Congress and became a law. Thus, you can see that the executive department of this Government has in many instances favored immigration while, on the other hand, Congress has continually fought for the strengthening of our immigration laws. I am reliably informed that the State Department is opposed to applying the quota to Mexico and Canada at this time.

One of the outstanding advocates of immigration legislation was the late Representative John L. Burnett, who represented for 21 years the district that I now have the honor to represent—seventh district of Alabama. When the Democrats came in power in 1912 he was the ranking member on the Democratic side on the Immigration Committee. His services were of untold value to this Nation.

In 1916 we had trouble with foreigners (mostly Mexicans) on the Mexican border. During the World War we were brought face to face in many of our northern cities with anarchy and rebellion, which condition was fostered by aliens and foreigners who were not loyal to our Government. It was on account of so many of these violent uprisings and outbursts against our Nation that it was thought advisable to prevent a further influx of foreigners into this country. With prosperity running at high tide, with the business of this great Nation but little disturbed by the war, as in contrast with the desolation, want, and poverty that existed in Europe, it became manifest that unless greater restrictions were placed upon immigration that there would be an army of immigrants sweep over this land, the like of which had never been equaled in our history. To stop this tide of immigration Congress, in 1921, enacted a new immigration law embracing the principal of quotas. To further stop the tide of immigrants that were coming into this country Congress again in 1924 amended the 1921 act by placing a 2 per cent quota of entry on immigrants, based upon the number of people in the United States in 1890 from various countries; however the quota law was not applied to Mexico, Canada, and adjacent islands. The natives from these countries can come across the borders by simply paying a small amount, which is known as a head tax. The tide of immigration from Mexico has become so alarming that we of the South felt impelled to bring to Congress a measure to include Mexico, Canada, and adjacent countries in the quota laws.

I have introduced such a measure, as have several Congressmen from other States. I especially refer to the bill introduced by Representative Box, of Texas, who is the ranking Democratic member on the Immigration Committee.

There was a time in the history of our country when we needed immigrants, but that time has passed and gone, and to my way of thinking is gone forever. To-day we have a hundred and twenty millions of people. We have peoples from every race, clime, and nationality in the known world. We are making rapid strides in every known science, and from a financial standpoint we are the outstanding nation of the world. Railways and highways have been constructed which connect every town, city, and countryside within our vast domain. Our banking, manufacturing, and industrial agencies are equal, if not superior, to those of any other nation. Our commercial activities far surpass those of other nations. Our death rate is low, our birth rate is high; thus the population from native stock is rapidly increasing. Then why should we not further check the coming of foreigners to our country to the end that we may preserve our resources, our institutions, and possessions for the descendants of American citizens?

The basic industry of our country is agriculture. By far more people are engaged in agricultural pursuits than in any other activity. The States of the North and the West produce enormous crops of corn, wheat, and other grains. The South produces a monopoly of cotton for the world. Under present conditions of production there is and has been for several years a surplus of farm products. Farmers are producing more than the world has been able to consume at a fair price for the farmer, with the result that many who farm have not prospered.

Secretary Davis, of the Labor Department, on March 27, 1928, issued a statement to the effect that there were 1,874,000 people without jobs in the United States. An inspection of this statement indicates that there are this many more people without jobs than there were in 1925, therefore it is easily deduced that there must be 4,000,000 of people out of work at this time. He called attention to the fact that a quarter of a million of immigrants had come here in the past 12 months, most of whom were laborers. He estimated that in January of this year the manufacturing plants were working 650,000 less people than in 1925. The railroads were working 100,000 less people than in 1925. It can only be assumed, he explained, that the groups of agriculture, mining, clerical workers, domestic service, and trade have been affected in a similar degree.

The official organ of the American Federation of Labor has issued a statement that 18 per cent of the union men are jobless throughout the United States at this time; therefore it is my opinion that you can go from Maine to California or from Florida to the State of Washington, inquire of the bankers if they think we need additional foreign bankers to compete with them. Inquire of the railroad presidents and managers if this great enterprise needs foreign capital to build competing lines with theirs. Ask the merchants, the manufacturers, and industrial leaders if this country is in need of foreigners to open up competitive enterprises here. Their answer most undeniably will be "No." With 18 per cent of the men out of jobs in organized-labor forces, ask them if they think it is necessary for the good and prosperity of this country to admit more skilled laborers at this time, and they will tell you very emphatically "No."

Agriculture has been so unprofitable within the last few years on account of overproduction, which in turn had brought about low prices, that Alabama has had 19,000 farms abandoned; Georgia, 62,000 farms abandoned; Mississippi, 18,000 farms abandoned; South Carolina, 21,000 farms abandoned; Kentucky, 17,000 farms abandoned; Illinois, 12,000 farms abandoned; Indiana, 10,000 farms abandoned; Ohio, 12,000 farms abandoned; Missouri, 10,000 farms abandoned. These constitute some of the best agricultural States in the Union. With tens of thousands of native farmers driven from the farms, with hundreds of thousands of other farmers still holding on to the old farms by sheer force and grit, ask them if they need peon farmers from Mexico to compete with them in the production of crops. A protest of "No" that will reverberate to every nook and corner of this country will be your answer. From 1920 until 1925 Oklahoma has opened up 11,000 new farms and Texas has opened up 43,000 new farms. One farm often gives employment to 50 people, so you can see that in Texas with 43,000 new farms there has been a tremendous increase of farm population within the last five years in that State. A great majority of these new farms are located in the southwest and western section of Texas. They are in that section of the State nearest and most accessible to Mexico. For practically 10 long years the American settlers in Texas fought for freedom against the iron heel of Mexican rule. Texas finally won her independence and was admitted to our Union. After being admitted it became necessary to wage a war with Mexico to establish the boundary line. It is as essential that the rights of the citizens of the United States in this good year of our Lord 1928 be as well protected from Mexico as were the rights of Americans in 1845. I recently saw an estimate which placed the number of Mexicans who are now in the United States at more than 2,000,000 people.

I was born in a town in Alabama that was named for the citadel of Chapultepec at Mexico City. It was named by Alabama men who fought in the Mexican War to help establish the boundary between Mexico and Texas and thereby preserve and maintain the rights of Texas. Soldiers throughout this land, and especially from the South, volunteered for service in the Mexican War, and I think it comes with poor grace, when with conditions as they are in this country now, for a few selfish interests in southern and western Texas to attempt to work a hardship upon the descendants of those who formerly helped Texas, by now giving preference to Mexican laborers rather than to American laborers. It is estimated that 75,000 immigrants a year are coming from Mexico and the West Indies. Strict laws have been made to bar the immigrants of the Old World. The same yardstick should be applied to the immigrants of the New World entering the United States. I visited Mexico last September, but words fail to picture to you the poverty, the disease, the deplorable conditions that I saw. As a rule, when the Mexican immigrants come to this country they are willing to work for low wages. They are ignorant and are restricted in their freedom, thereby they practically become semislaves. They create distress wherever they go by under-

mining and taking the place of native American workers. They cause Americans to move away and help destroy schools, churches, and community life.

In the hearing before the Committee on Immigration a Congressman from New England made the statement that inasmuch as thousands of negroes had left the cotton farms did we not need the Mexicans to take their places to grow cotton. He also asked if the white people of the South worked in the cotton fields. My answer is this. There are 67 counties in Alabama. Three counties in the district that I represent produced 120,000 bales of cotton last year, which is one-tenth of the entire yield of the State. The 1920 census for these counties show that Dekalb County had 5,964 white farmers and only 74 negro farmers; Marshall County, 5,274 white farmers and only 89 negro farmers; Cullman County, 5,371 white farmers and 74 negro farmers. This shows that the white people do work and that we do not need the Mexicans to produce cotton.

With agriculture in the unstable condition that it is, tariff measures have been proposed at this session of Congress which seek to place a tariff around agricultural products. With some crops this may prove beneficial, and although I am a Democrat, yet I have supported Republican measures since I have been in Congress that had for their purpose the aid of the farmers. I favor a human tariff. I want a tariff that will stop the armies of peons from coming into the United States because they are helping increase and produce a surplus of products that are now grown by our own people, and they are thereby helping destroy the prosperity of American farmers. Tens of thousands of these Mexicans are being worked on the semiarid lands in southwest Texas.

These lands formerly grew grasses and hays for the production of livestock (by the way there is a shortage of livestock and especially cattle in our country to-day), but these great ranches are owned in many instances by absentee landlords and are now being commercialized for this Mexican labor in the production of cotton. Those lands do not require commercial fertilizers; improved machinery can also be used, and when worked by this cheap peon un-American labor there is constituted a competition that is not just and right or fair to the native American citizen in other sections who is attempting to rear and educate his sons and daughters, and teach them to love the flag and Government of our country.

Even if there were not a surplus of farm products, if there were no distress among our agricultural people, if there were a shortage of labor throughout the country, which most undeniably there is not, I would still favor stopping the great horde of Mexicans that are coming here, because they will eventually prove a menace and a detriment to our people. Little did the slave traders in the early history of our country dream of the tragedies that were to follow in the wake of the enterprise in which they were engaged and possibly, little did they care, because they were engaged in the business from a purely selfish standpoint of gain. To-day there are those organizations engaged in bringing Mexican laborers to this country whose activities are caused solely for the amount of money they can obtain in pursuing this nefarious business. They have no inherent love for the Mexican, neither are they interested in his welfare, nor are they interested in the welfare of those who become the beneficiaries of the labors of the Mexican peon. These agencies are simply trafficking in human beings and getting them out of Mexico across the border into the United States at so much per head. "They are as dumb driven cattle."

Seventy years ago the people of the South wanted slaves, slaves, and as a result the slave traders brought cargoes of slaves to this country, which were used in the production of cotton, to help bring prosperity to the southland. A strong protest arose against this custom and against slavery, with the result that in 1861 the nation was rent in twain, and for four years a sectional war was carried on which left a trail of death, desolation, debt, sorrow, and grief that saddens our hearts to this time.

After the surrender of General Lee at Appomattox the southern armies disbanded. The men, foot sore and weary, tattered and torn with shot and shell returned to their beloved southland, where $4,000,000,000 worth of slaves had been emancipated, where millions of dollars worth of city property had been destroyed, where farms had grown up and were turned out during the war; but to them it was home. Again they turned their hand to the plow, to the hammer, and to the saw to rebuild and reclaim their lost fortunes.

The question of slavery was settled, but to-day, my friends of the North, the East, and the West, we of the South do not want to see the possibility of another race problem arising in this country, and we ask patriotic citizens in every section of the country to assist us with this measure. I am not launching an attack against all the people of Mexico, because Mexico has many thousands of splendid people; but the class of Mexicans that migrate here, in the main are not becoming home owners or citizens, and if permitted to come in the future as they have in the past they will become a menace to those who toil throughout the land.

The following Associated Press dispatch gives a picture of conditions in Mexico:

MEXICO CITY, March 27, 1928.—Seven thousand quit miracle man's camp because of his refusal to attempt a wholesale cure of infirm, lame, and blind. The camp recently held 30,000 infirm, lame, and blind.

Can this class of people make good American citizens? Are they the kind of people you want as your neighbors and as your associates? Do you think that by admitting 75,000 peons to this country each year they will help leaven the loaf? Will they help raise our standards of living? Will they help us become a better home-loving, God-fearing people?

God built this Nation of glory and filled it with treasures untold. He carpeted it with soft-rolling prairies, pillowed it with thundering mountains studded with swift-flowing fountains, traced it with deep-shadowed forests, and filled them with song; then He called unto a thousand peoples and summoned the bravest from among them. They came from the ends of the earth, each bearing a gift and a hope; the glory of adventure was in their eyes and the glory of hope was in their souls. Out of the memory of ages and the hopes of world; out of the longing hearts and prayers of souls God founded a nation that you and I love; blest it with a purpose sublime, and we call it the United States of America. We, the descendants of these patriots, must guard well our portals; we must preserve the traditions, the institutions, and the resources of our Nation; therefore, if we do continue to admit foreigners to this country, I insist that they should represent the best class of citizens, whether from Mexico or Canada. To secure this result it is essential for Congress to apply the quota to these countries.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

PASSENGERS, FREIGHT, AND EXPRESS

SEC. 411. Any vessel operating under a contract made under this title may carry passengers and their baggage, and freight and express, and may do all ordinary business done by similar vessels.

Mr. LINTHICUM. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Maryland offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LINTHICUM: Page 17, line 18, after the word "vessels" strike out the period and insert "of other nations, including the sale of light wines and beer and other drinks not exceeding a 2¾ per cent alcohol content."

Mr. WHITE of Maine. Mr. Chairman, I make a point of order against the amendment.

Mr. LINTHICUM. Will the gentleman reserve his point of order?

Mr. HUDSON. I also will make a point of order.

Mr. KNUTSON. I suggest that the gentleman be given an opportunity to state what he has in mind.

Mr. LINTHICUM. Mr. Chairman, will the gentleman reserve his point of order for a moment—for five minutes?

Mr. HASTINGS. Mr. Chairman, I make a point of order.

The CHAIRMAN. The gentleman from Oklahoma makes a point of order. Will the gentleman state his point of order?

Mr. HASTINGS. The gentleman will have an opportunity to make a speech on prohibition later.

Mr. LAGUARDIA. They will do it now, anyhow.

The CHAIRMAN. The Chair sustains the point of order.

Mr. KNUTSON. Mr. Chairman, I want to be heard on the point of order.

Mr. LINTHICUM. Mr. Chairman, I understand I was recognized by the Chair. I want to be heard.

The CHAIRMAN. The Chair feels there is little question about the point of order and there is no question whatever in the mind of the Chair.

Mr. LINTHICUM. There is certainly an amount of courtesy due to the gentleman from Maryland.

The CHAIRMAN. The Chair will recognize the gentleman from Maryland to make a statement on the point of order.

Mr. LINTHICUM. Mr. Chairman, this paragraph provides:

Any vessel operating under a contract made under this title may carry passengers and their baggage, and freight and express, and may do all ordinary business done by similar vessels.

My amendment includes similar vessels of other nations, and the purpose of it is that we may do those things which other

nations do, and that is that we may sell light wines and beer on these vessels.

Mr. SCHNEIDER. Will the gentleman yield?

Mr. LINTHICUM. Yes.

Mr. SCHNEIDER. It is true, is it not, that one of the things which stands in the way of our merchant marine being a success is that the vessels do not carry light wines and beer?

Mr. LINTHICUM. Absolutely. That is why we can not make a success of it. Here you are trying to pass a bill to put our merchant marine on the sea and you are opposing the very thing that will help it become a success. I think the point of order ought to be overruled, because the whole thing is for the benefit of the merchant marine, and all I am trying to do is to help it.

Mr. BLACK of New York. Mr. Chairman, I would like to be heard.

The CHAIRMAN. The Chair is prepared to rule, and with great regret is obliged to sustain the point of order.

Mr. HERSEY and Mr. BLACK of New York rose.

The CHAIRMAN. The Chair recognizes the gentleman from Maine.

Mr. BLACK of New York. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. Does the gentleman from Maine yield to the gentleman from New York for the purpose of propounding a parliamentary inquiry?

Mr. HERSEY. Yes.

Mr. BLACK of New York. Mr. Chairman, I want to know whether I understood the Chair correctly in saying that he sustained the point of order with great regret?

Mr. KNUTSON. Mr. Chairman, I make the point of order that the Chair has not an open mind on the subject under consideration.

The CHAIRMAN. That point of order comes too late.

Mr. HERSEY. Mr. Chairman and members of the committee, I have something of great interest to say to you at the present time in the matter of this bill. Maine holds among her greatest statesmen the late William P. Frye. For 10 years he served this House faithfully. Then for 30 years he occupied a seat, with great distinction, in the Senate of the United States. During the last 20 years of his service there he was its Presiding Officer.

It was the dream of William P. Frye while in the House and in the Senate that this Nation should have an American merchant marine that would carry our flag on every sea and under every sky, manned by American officers, owned by Americans, and carrying the American flag. [Applause.] It was his dream that this Nation should have a merchant marine which would carry all of our products and all of our manufactured goods to all parts of the world in ships carrying the American flag and that all the valuables, all the gems, and all the beautiful things from every other nation should come to this country under the American flag.

William P. Frye, while in the House and in the Senate, had in his office in Washington a little boy, a bright youngster who had been well schooled and well trained by his grandfather, whom he loved and looked up to with veneration. He was here many years serving in the House and the Senate, with his grandfather as his helper.

Then William P. Frye died in the Senate, in harness, with all the honors of his years of toil upon him. Yet he looked upon his life as a failure because he did not get his American merchant marine.

Now, the years have slipped by. William P. Frye stands among the immortals to-day. There is but a thin veil between the seen and the unseen, and if to-day he could look down upon this House where he served he would see that boy, his grandchild, in the person of WALLACE WHITE. [Applause.] William P. Frye was the chairman of the Committee on Commerce, which takes the place of the Committee on the Merchant Marine and Fisheries. WALLACE WHITE is occupying his grandfather's place to-day as the chairman of the Committee on the Merchant Marine. He has taken the torch out of the hands of his grandfather and is to-day bearing it to victory, because we are to have an American merchant marine. [Applause.] The dream of William P. Frye has come true. Maine has noted the fight which has been made to carry out the dream of her hero and her statesman. To-day his dream has come true. "Where the vanguard camps to-day the rear shall rest to-morrow." [Applause.]

The Clerk read as follows:

NAVAL OFFICERS

SEC. 412. Naval officers of the United States on the active list may volunteer for service on any vessel employed in mail service under a contract made under the provisions of this title, and when accepted by the owner or master thereof may be assigned to such duty by the Secretary of the Navy. While in such employment such officers shall receive from the Government half pay, exclusive of allowances, and such other compensation from the owner or master as may be agreed upon by the parties; but such officers while in such employment shall be required to perform only such duties as appertain to the merchant marine.

Mr. LAGUARDIA. Mr. Chairman, I have an amendment which I have sent to the desk.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 18, line 6, strike out the period, insert a semicolon, and add the following:

"That when naval officers of the United States volunteer for such services as herein provided, the wages of other officers on said ships holding similar rating or doing similar work shall not be less than the wages paid by the owners or master of the ship plus the allowance which such naval officer receives from the Navy Department."

Mr. LAGUARDIA. Mr. Chairman, I desire to call the attention of the committee to this provision of the bill. It makes possible the volunteering of services by an officer of the Navy, and when the officer is accepted by the ship the Navy is required to pay one-half of his regular pay.

Now, gentlemen, the tendency, unless we adopt my amendment, will be to bring down the wages of the other officers to the one-half which the company pays the naval officer. This, I know, is not the intention of the committee and is not the intention, I believe, of the bill. If it is not the intention of the committee, then I do not believe the committee should resist my amendment.

The amendment simply provides that the standard of wages for the officers is to be kept uniform, whether the officer is paid one half by the owners of the vessel and the other half by the Navy Department or is paid entirely by the owners of the ship. I can see no serious objection unless, as I said before, it is the desire to bring down the wages to the one-half paid by the owners.

Mr. HUDSON. Will the gentleman yield?

Mr. LAGUARDIA. In just a moment.

We have just heard a most telling and impressive appeal made by the gentleman from Maine [Mr. HERSEY]. I was moved, as I am sure every member of the committee was, when he pictured the American merchant marine sailing the oceans of the world under the American flag and manned by American seamen, and yet just a few moments ago it was stated on the floor of the House that unless we employ Chinamen or other aliens in the steward's department, the American merchant marine will be swept off the sea. I do not believe that represents the desire of the American people.

Mr. Chairman, I appeal on behalf of the licensed officers of the merchant marine to protect them against the competition of the naval officers who would receive one-half of their pay from the Navy Department. All that my amendment does is to make sure that when the Navy officer does enter the merchant marine and does receive one-half of his pay from the Navy Department, there shall be no deduction from the regular established pay of the regular merchant-marine officer.

The chairman of the committee informs me this is the intention of the bill and is the intention of the committee. If this is so, my amendment will simply clarify that intention and make it certain. I urge the adoption of my amendment.

Mr. LEHLBACH. Mr. Chairman, the amendment of the gentleman from New York [Mr. LAGUARDIA] is based on an utter misconception and serves no useful purpose. It may, however, be mischievous and may bring about a situation which, without careful consideration by the committee, we may not appreciate at the present time; at any rate, the amendment is useless and can only do harm, if it can do anything at all. If it can not do harm, then it serves no purpose whatever and has no effect.

I want to say, Mr. Chairman, both the subcommittee that had charge of this legislation and the entire Committee on the Merchant Marine and Fisheries have painstakingly spent months on this bill, and gone over it word by word, section by section, phrase by phrase, and clause by clause and we have considered every possible phase of the question and have considered the effect of every possible word that could be put in or taken out of it.

I think for a Member who does not know anything about it, who does not belong to the committee, to come on the floor and offer an amendment that may be fraught with harm and damage to the bill and expect to have it accepted without an opportunity on the part of the Committee on the Merchant Marine and Fisheries to give it consideration is following a

practice which ought not to prevail, and in behalf of the committee, that unanimously reported this bill just as it is written, I hope this and all other amendments will be voted down. [Applause.]

Mr. SCHAFER. Mr. Chairman, I ask unanimous consent to speak out of order for two minutes.

The CHAIRMAN (Mr. TREADWAY). Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SCHAFER. I hope this amendment will be adopted. The gentleman who has just spoken ridiculed the amendment, but did not bring to the attention of the committee any valid or reasonable argument in support of his opposition. Does the gentleman who has just taken his seat mean to infer that the 435 Members of this House must vote for every bill unanimously reported by a committee, without the crossing of a t or the dotting of an i? The gentleman's address is an insult to the intelligence of the membership of the House. Thank goodness, the rules of this House do not permit czaristic domination by committees, as the gentleman would have it.

The CHAIRMAN (Mr. TREADWAY). The question is on the amendment of the gentleman from New York.

The question was taken; and on a division (demanded by Mr. LAGUARDIA) there were 11 ayes and 51 noes.

So the amendment was rejected.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. LAGUARDIA: Page 17, strike out section 412.

Mr. DAVIS. Mr. Chairman, I am sure my friend from New York [Mr. LAGUARDIA] took the suggestion of the gentleman from New Jersey too seriously. Speaking as one member of the committee, we welcome any constructive criticism or any suggestion or discussion of the bill in a reasonable way. But I do not care to pursue that matter further.

I do want to call attention of the gentleman from New York and other members of the committee to what would result if his present motion to strike out the section was adopted.

This section under discussion, section 412, page 17, is a redraft of a provision that has been in the law since 1891, and the redraft by the committee should be very much more acceptable to the gentleman from New York and others who may be of the same opinion as himself. For instance, the law as it now stands authorizes the transfer to the merchant marine of any naval officer, whether he be on the active or the inactive list or any reserve corps, and that when he is transferred to a merchant-marine ship he shall draw furlough pay, which, as I understand, is full pay.

The provision in this bill restricts the eligibility of naval officers for service in the merchant marine to those on the active list. Then it reduces the pay to half pay instead of full pay.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. Yes.

Mr. LAGUARDIA. Under the existing law, how many naval officers in active service have availed themselves of the present provisions?

Mr. DAVIS. I do not know of any, and my information is that it has not been taken advantage of, and perhaps may not be, but in redrafting the 1891 ocean mail pay act, this was one of the provisions that the committee deemed advisable to modify in the particulars indicated, so we are not writing a new law or a new provision, but we think we are improving the law as it exists.

Mr. LAGUARDIA. And may I state that the gentleman has presented a logical parliamentary opposition to my amendment, whether I agree with the gentleman or not.

Mr. DAVIS. I thank the gentleman.

Mr. LEHLBACH. And if the gentleman will yield, permit me to state that the gentleman from Tennessee was opposing an entirely different amendment than the amendment the gentleman from New Jersey was opposing.

Mr. HOUSTON of Hawaii. Mr. Chairman, I move to strike out the last two words. I hope the gentleman from New York [Mr. LAGUARDIA] will not oppose anything in this bill which will make it impossible to carry out the intention to improve the American merchant marine. As a matter of fact, the old Pacific Mail, for a long time one of the strongest merchant marine companies under the American flag, had old naval officers in the management, and for a long time their ships were, in part, captained by naval officers, and if at the present time there are no naval officers actually doing service in the merchant marine, it is because of the shortage of officers, and for no other particular reason. I may add, that if the gentleman from New York had so framed his amendment that the suggestion was that the total compensation paid to such naval officers should not exceed that which is granted to officers in similar positions throughout the companies it might not have been so objectionable, because, as I would like to point out, there are in the Panama Canal service both officers of the Navy and the Army, and there is a similar provision whereby a proportion of the pay is paid by the Army and the Navy, and the Panama Canal makes up the difference between what is paid an officer and what would be paid for the position.

Mr. WHITE of Maine. Mr. Chairman, I move that all debate upon this section and all amendments thereto now close.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The amendment was rejected.

The Clerk read as follows:

MAIL MESSENGERS

SEC. 413. Upon each vessel employed in ocean mail service under a contract made under this title, the Postmaster General shall be entitled to have transported a mail messenger for whom shall be provided a suitable stateroom, and suitable quarters for the care and assortment of the mail, all free of charge.

Mr. WHITE of Maine. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Page 18, line 10, beginning with the article "a," in line 10, strike out the balance of the section and insert in lieu thereof the following: "Such mail messengers as he may require, for whom shall be provided subsistence, suitable staterooms, and working quarters, all free of charge."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. LINTHICUM. Mr. Chairman, I ask unanimous consent to speak out of order for five minutes.

The CHAIRMAN. Is there objection?

Mr. WHITE of Maine. On what subject?

Mr. LINTHICUM. I am going to speak in accord with the amendment that I offered.

Mr. WHITE of Maine. Mr. Chairman, I do not like to be narrow——

Mr. LINTHICUM. The gentleman has his rights, and I have mine. The gentleman may use his rights if he wants to.

Mr. WHITE of Maine. I know that many Members of the House want to conclude this bill this afternoon.

Mr. LINTHICUM. If I do not speak now, the bill will not be concluded this afternoon.

Mr. MURPHY. If that is the spirit of the gentleman, I object.

Mr. LINTHICUM. I have not taken up any time on this bill.

Mr. MURPHY. We do not want the gentleman to attempt to run the House.

Mr. WHITE of Maine. I hope the gentleman from Ohio will withdraw his objection and allow the gentleman to proceed.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

Mr. MURPHY. I withdraw my objection.

Mr. HUDSON. Mr. Chairman, I object.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

AMENDMENTS AND REPEALS

SEC. 414. (a) Section 24 of the merchant marine act, 1920 (U. S. C., title 46, sec. 880), is amended to read as follows:

"SEC. 24. That all mails of the United States shipped or carried on vessels shall, if practicable, be shipped or carried on American-built vessels documented under the laws of the United States. No contract hereafter made with the Postmaster General for carrying mails on vessels so built and documented shall be assigned or sublet, and no mails covered by such contract shall be carried on any vessel not so built and documented. No money shall be paid out of the Treasury of the United States on or in relation to any such contract for carrying mails on vessels so built and documented when such contract has been assigned or sublet or when mails covered by such contract are in violation of the terms thereof carried on any vessel not so built and documented. This section shall not be applicable in the case of contracts made under Title IV of the merchant marine act, 1928."

(b) Section 7 of the merchant marine act, 1920 (U. S. C., title 46, sec. 866), is amended by striking out so much thereof as reads as follows: "The Postmaster General is authorized, notwithstanding the act entitled 'An act to provide for ocean mail service between the United States and foreign ports, and to promote commerce,' approved March 3, 1891, to contract for the carrying of the mails over such

lines at such price as may be agreed upon by the board and the Postmaster General."

(c) The act entitled "An act to provide for ocean mail service between the United States and foreign ports, and to promote commerce," approved March 3, 1891 (U. S. C., title 39, secs. 657–665), is repealed.

(d) So much of the act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1918, and for other purposes," approved March 3, 1917, as provides for contracts for the carrying of mails between the United States and Great Britain (U. S. C., title 39, sec. 666) is repealed.

(e) Subdivision (b) of section 4009 of the Revised Statutes, as amended (44 Stat. L., pt. 2, 900), is amended to read as follows:

"(b) The provisions of subdivision (a) of this section shall not limit the compensation for transportation of mail which the Postmaster General may pay under contracts entered into in accordance with the provisions of section 4007 of the Revised Statutes (U. S. C., title 39, sec. 652), section 24 of the merchant marine act, 1920 (U. S. C., title 46, sec. 880), or Title IV of the merchant marine act, 1928."

(f) Any contract made prior to the enactment of this act shall remain in force and effect in the same manner and to the same extent as though this act had not been enacted. Any such contract which expires on June 30, 1928, may be extended for a period of not more than one year from such date.

Mr. LINTHICUM. Mr. Chairman, I ask unanimous consent to speak out of order for five minutes.

The CHAIRMAN. The gentleman from Maryland asks unanimous consent to speak out of order for five minutes. Is there objection?

There was no objection.

Mr. HUDSON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Maryland yield to the gentleman from Michigan?

Mr. LINTHICUM. I do.

Mr. HUDSON. I had no intention of objecting to the gentleman's speaking a moment ago until he threatened the House that he would either be granted the right to speak or would stop the business of the House. That was the ground upon which I based my objection.

Mr. LINTHICUM. Does the gentleman never make objections except upon that ground? He made a dozen at different times when I have wanted to speak on this subject.

Mr. HUDSON. I have never objected to the gentleman's speaking on the floor of this House.

Mr. LINTHICUM. I have never objected to the gentleman from Michigan speaking, no matter what he wanted to speak about.

Mr. BLACK of New York. That is where the gentleman from Maryland made a mistake.

Mr. LINTHICUM. Mr. Chairman, I do not purpose taking up much time on this subject. I am not out of humor as some gentlemen seem to think I am. I have a right to discuss my amendment, and in all courtesy I was entitled to have gentlemen reserve their objections until I have made a few remarks. Naturally when they did not do that I did not think very well of it.

I am in favor of this bill. I have always been in favor of a merchant marine and have always voted for bills when they have come before Congress. I wish to encourage the merchant marine. I look upon the merchant marine as our real second line of defence in war and a great adjunct in time of peace. I think if you wish to make the merchant marine a real success you have to allow a little something to drink on the passenger ships. I am not asking that you give them very strong drink. I am asking that you give them something to drink which is not intoxicating—2¾ per cent beer or light wine. You can realize that such would be very, very light wine, but a fairly palatable beer.

Mr. COLE of Iowa. Mr. Chairman, will the gentleman yield there?

Mr. LINTHICUM. Yes.

Mr. COLE of Iowa. If it is not intoxicating, would it be satisfactory to the gentleman's constituents in Maryland?

Mr. LINTHICUM. Oh, my constituents in Maryland do not drink as much liquor as some people in other States of this Union. I can tell you that. My people got along very well on 2¾ per cent beer years ago. While other nations are selling intoxicating liquors on their ships, not for the purpose of intoxicating their passengers but for making the voyages a little more agreeable, we prohibit that on our vessels. If you want to make the service a success all the year round, you must conduct the service as the other nations do.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield? Under your amendment can foreign ambassadors and diplomats bring in intoxicating liquors?

Mr. LINTHICUM. Oh, on that point I have wondered frequently at the stacks of boxes I see piled up in the port of Baltimore that are unloaded there for the diplomats and those engaged in the consular service of foreign countries. I have wondered why we could not have the same opportunity. I was talking to a gentleman not long ago who went abroad on the *Leviathan*. I met him at a wedding held in Maryland, and I asked how he came back from abroad, and he said, "On a British boat." I asked him why he did so, and he said that on the *Leviathan* things were so uninteresting that he took a British ship in coming back. [Laughter.]

Mr. McKEOWN. Mr. Chairman, will the gentleman yield there?

Mr. LINTHICUM. Yes.

Mr. McKEOWN. Does the gentleman think that by a speech of that character he will help to upbuild the merchant marine?

Mr. LINTHICUM. I know it will help the merchant marine if you can give them this privilege on the ocean. Nothing you can do will help the service more.

Mr. McKEOWN. The gentleman is evidently advertising foreign wines.

Mr. LINTHICUM. No. What I am asking on my amendment is not intoxicating liquor, but only 2¾ per cent beer and light wine. If you want to make this service a success, gentlemen, you should be a little lenient with those on the ocean.

I am not trying to advertise any foreign lines. So long as we continue the enforcement of prohibition on the high seas on our passenger ships the foreign ships, who do not use such methods, will get the bulk of the business without advertising.

I wish to remove the liquor from the stateroom to the smoking room, to provide a nonintoxicating beverage which naturally creates better feeling and cheer among the passengers. What have we to-day? People providing their own liquors for consumption on the trip. Private parties in private staterooms, secrecy in drinking strong drinks, and I really believe more liquor consumed on a journey in secrecy than there would be in public.

When people go on a pleasure trip abroad they have little to occupy their time while on the ocean and naturally like to meet their friends, have a sociable drink, and talk and enjoy the voyage. If the American ships were allowed to sell light wines and beer, as I propose, we could have this same sociability on American ships as we now have on foreign ships, and you would not be doing anything to the injury of the merchant marine.

I repeat, if you will adopt my amendment providing for light wines and beer not exceeding an alcohol content of more than 2¾ per cent you will not be furnishing an intoxicating liquor, but you will be adding to the great success of the American merchant marine. [Applause.]

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. LINTHICUM. Mr. Chairman, I ask unanimous consent to revise and extend my remarks

The CHAIRMAN Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. COCHRAN of Missouri. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing an editorial which appeared in the St. Louis Post-Dispatch of May 2. I feel that if the suggestion made in that editorial is adopted it will settle this entire question.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

Mr. SCHAFER. Reserving the right to object, Mr. Chairman, on what subject is the editorial?

Mr. COCHRAN of Missouri. I will say to the gentleman from Wisconsin that it is not entirely wet or entirely dry, but about half and half. [Laughter.]

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. COCHRAN of Missouri. Mr. Speaker, many suggestions have been advanced as to the best method of settling the prohibition question and removing it from politics. The St. Louis Post-Dispatch, in its issue of May 2, 1928, carried an editorial under the heading "Submit the issue of Federal prohibition to the people," which contains an abundance of sound logic, and under the leave to print I include this editorial as part of my remarks. The editorial follows:

SUBMIT THE ISSUE OF FEDERAL PROHIBITION TO THE PEOPLE

The only sound and satisfactory solution of the Federal prohibition problem is the repeal of the eighteenth amendment. Every other proposal touching the modification of the Volstead Act or the nullification of the amendment by repeal of all enforcing legislation is a makeshift. It would only postpone the final settlement of the question.

PUT THE QUESTION TO THE PEOPLE

The issue of Federal prohibition can not be taken out of politics until it is finally and conclusively settled by the complete abandonment of Federal prohibition. So long as the eighteenth amendment remains in the Constitution the issue will persist. It will be a red herring across the trail of all other national issues, diverting the public mind from them.

Federal prohibition is a paramount issue throughout the country. There is a reason for its predominance. It has had more effect on politics and on government, on legislation and on public sentiment, than any issue in American history since the slavery question and secession.

The eighteenth amendment changed the character and spirit of the Constitution. It changed the scope and power of the Federal Government. It broke down the constitutional restrictions on Federal powers and functions. It authorized the Federal Government to violate the rights of the States and usurp their police powers guaranteed by the Constitution. It authorized the Federal Government to destroy the inherent constitutional rights of the individual. It was a deadly assault upon the individual liberty of the citizen. It impaired local self-government.

Federal prohibition has never been submitted to the American people as a clear-cut issue.

It was adopted without consulting the people as a whole. It was adopted during the war, on the pretense of being a war measure, while millions of voters were disfranchised by absence abroad or by war activities. It was adopted by indirect political methods. The Anti-Saloon League, under cover, with a huge campaign fund, took advantage of the war to elect legislators, national and State, favorable or actually pledged to the support of the Federal prohibition program.

The Anti-Saloon League program for Federal prohibition was carried through, we believe, against the convictions of a majority of the people; against the convictions of a majority of the Congress which submitted it, and of many of the State legislatures which ratified it.

The Volstead Act, enforcing Federal prohibition, which violated fundamental American principles and guaranties embodied in the Constitution, was adopted not through the convictions of Members of Congress and their free conscientious approval of it, but through compulsion of threats and fear of defeat by a powerful political organization.

These are the fundamental reasons for the submission to the people of a clear issue of repeal. But there are other convincing reasons, based upon the experience of the Nation with Federal prohibition. The effects of Federal prohibition have not justified the avowed purposes and the predictions of those who organized and managed the prohibition campaign, nor the expectations of those who with honest motives were misled into supporting it.

Instead of destroying the saloon it has increased the number of saloons and drinking places, in cities at least, and of stills and brewing plants in country districts.

Instead of promoting temperance it has increased intemperance and its consequent disorders.

Instead of protecting the young from the evils of intemperance, it has induced many to drink to excess.

Instead of stopping the manufacture and sale of intoxicating beverages it has encouraged the illicit manufacture and sale. Bootleggers have multiplied.

Instead of checking crime and emptying the jails, it has increased crime and lawlessness and filled the jails to overflowing. It has caused lawlessness and widespread corruption among public officials. It has put a huge corruption fund in the hands of the underworld.

These conditions of increasing intemperance, lawlessness, and corruption have convinced many individuals and organizations who supported Federal prohibition as the solution of the problem of intemperance and as a great moral advance that the experiment is a failure. There is increasing evidence of a reaction against Federal prohibition among the people.

The only practical way in which to get a fair plebiscite is through action by the leading political parties.

Two forces, under strong leadership, are working within the Republican Party.

Senator BORAH insists that the Republican Party shall adopt an unequivocal plank in its platform declaring for Federal prohibition and the rigid enforcement of prohibition laws.

President Nicholas Murray Butler, of Columbia University, New York, a Republican leader, declares himself emphatically in favor of repeal, and insists that the political parties should take a decisive stand on this issue.

There is nothing in the avowed principles of the Republican Party which would prevent it from deciding either way, on the ground of general public welfare or of expediency. It inclines to paternalism and centralization of power in the Federal Government, but a large element of Republicans favors repeal of the eighteenth amendment.

On the other hand, the Democratic Party, by avowed principle and tradition, is the logical guardian of the original Constitution. It was founded on the fundamental principle of the constitutional restriction of Federal powers and functions. It avows the Jeffersonian principles of the preservation of the rights and powers of the State and the guaranties of individual rights and liberties. It is the avowed defender of the principle of local self-government. It is the avowed opponent of Federal usurpation.

The Democratic Party is divided on the issue of Federal prohibition. There are leaders on both sides of the question, but the opposition to Federal prohibition within the Democratic Party is very strong in both leadership and numbers. Its two leading presidential candidates, Governor Smith, of New York, and Senator Reed, of Missouri, are against Federal prohibition on principle.

We believe the balance of strength, in leadership and in the rank and file of both parties combined, is against Federal prohibition.

If the Democratic Party were true and faithful to its principles and traditions, it would adopt a platform unequivocally favoring the repeal of the eighteenth amendment and nominate a candidate in accord with this platform.

In our insistence on the submission to the people of a clear issue of the repeal of the eighteenth amendment there is not a shadow of intention to advocate a reestablishment of the old licensed saloons. That problem can be met when the vital problem of Federal prohibition is settled.

The besetting sins of political parties, political leaders, and public officials in this country are cowardice and hypocrisy. They are deadly sins. Cowardly evasion is blighting both political and governmental action.

It is high time that cowardice, hypocrisy, and evasion should be abandoned in dealing with Federal prohibition, which so seriously affects our Government and the social and political life of the people.

The Post-Dispatch appeals to political leaders and to the people to put an end to political evasion on the question of Federal prohibition. We demand that the political parties and every candidate for an office which is concerned with Federal prohibition shall make a clear declaration on this question.

The issue of repeal of the eighteenth amendment should be submitted to the voters in the presidential campaign.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TITLE V—MERCHANT MARINE NAVAL RESERVE

SEC. 501. In addition to the pay prescribed by existing law for officers and enlisted men of the merchant marine naval reserve when not employed on active duty with the regular Navy, such officers and enlisted men of the merchant marine naval reserve as are employed on merchant vessels of United States registry regularly engaged in foreign trade shall be paid per annum by the Navy Department under such regulations as the Secretary of the Navy may prescribe an amount equal to two months' base pay of their corresponding grades, ranks, or ratings in the regular Navy, such payments so made by the Navy to be considered, in all laws or agreements referring to the officers and crew of the merchant marine, as an integral part of the total pay prescribed for such officers and crew in accordance with such laws and agreements.

Mr. FRENCH. Mr. Chairman, I have two or three amendments to offer, and I think that the House would receive a better impression of them all if I should make a short statement first and then offer the amendments. I shall send them to the Clerk's desk. With that thought I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. FRENCH. Mr. Chairman, I think that all the Members of the House and the people of the country generally are in sympathy with the building up of a merchant marine. I want to be helpful in carrying forward such a program.

The particular section of the bill that is now under consideration provides for covering into the merchant marine naval reserve certain personnel that will be upon the ships flying the American flag and the payment of these men of three months' pay of their respective grades. No one can read this section without recognizing three things:

First, that it provides indirectly a subsidy for the encouragement of the merchant marine to the extent that those who are in that service may be included in the merchant marine naval reserve. There is no question whatever about that being the effect and the intent of the language of the section as it is now framed.

Second, under the provisions of the section that subsidy will be placed upon the Navy Department. The report of the committee indicates that possibly during the early years the amount that will be added in costs to the Navy Department will be around $666,000; but I want to tell the Members of the House that that amount will increase. The figure mentioned is the thin edge of the wedge. The amount that is going to be neces-

sary to meet the subsidy under this section will increase year by year until it will reach several million dollars.

Third, we can not be oblivious to the fact that the language of the section is calculated to remove from the control of Congress the amount of money that will be required to be appropriated annually for the purpose of paying the subsidy that is provided in the bill.

And how is that done? It is done by referring back to the act of 1925, in which the merchant marine naval reserve is defined; and there, in section 30 of that act, we find the persons defined who shall be members of the merchant marine naval reserve.

The section of the pending bill, read in connection with the section to which I have referred of the act of 1925, seems to take away from Congress and from the Secretary of the Navy and the Navy Department and from the administration the power to fix the size of the merchant marine naval reserve and seeks to place that power in the hands of the shipping concerns of the country that will be flying the American flag. And how is that done? By omitting two lines that are in the act of 1925. What are those two lines? They are these:

*Provided*, That funds equal to the amount required for the purposes of this section shall first have been made available by the Congress for this specific purpose.

In other words, when Congress seeks to provide an air service for the Post Office Department it does so through consideration upon appropriation bills.

When Congress seeks to develop a policy in connection with the national forests it does not give carte blanche authority to the Forester of the United States to spend money or to engage willy-nilly whom he pleases, but it provides the funds, fixes fairly closely the number of employees, and the ones who will engage in that service.

Here you come in with a proposition that is fundamentally revolutionary. You turn that which ought to be a Government policy over to the owners of ships that are flying the American flag.

What I propose in my amendment would be as follows: First, I would transfer the cost from the Navy Department to the Shipping Board, where it ought to be. We do not intend this merchant marine primarily as a part of our Navy. Of course, it will fit into it, and it ought to; but this part of the expense ought to be borne by the Shipping Board, and not by the Navy Department, to be heralded to the country as so much more of a military burden upon our people. Second, the amendment which I shall propose would provide that the amount required for the purposes of the section shall first have been made available by the Congress for the specific purpose of the section for which the appropriation shall be made. With that explanation, then, I offer the amendments which I have sent to the Clerk's desk.

Mr. ABERNETHY. Will the gentleman yield?

Mr. FRENCH. Yes.

Mr. ABERNETHY. We had Admiral Leigh, the head of the Bureau of Navigation, before our committee, and my understanding was that he favored this law as written.

Mr. FRENCH. I have no doubt that he does favor it, not the slightest. More than that, I have no doubt that practically any department in the Government would be glad to have us turn over to that department the fixing of the size of the amount of money it may expend. I have great admiration of Admiral Leigh, one of the greatest officers in the Navy, but on that point I must differ from him. There is a policy involved here that ought to be controlled by the Congress, by the administration, and not by those who are sailing ships, even if they be flying the flag of the United States.

Mr. Chairman, I now offer the amendments.

The CHAIRMAN. The gentleman from Idaho offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. FRENCH: On page 20, in line 25, insert a comma after the word "annum" and strike out the remainder of the line.

Mr. FRENCH. The remaining words of the line, Mr. Chairman, are the words "by the Navy Department." They are the words that place the expense upon the Navy Department. If that amendment shall be adopted then I would seek to follow it in the proper place by an amendment which would transfer the cost from the Navy Department to the Shipping Board, where it properly belongs.

Mr. WHITE of Maine. Mr. Chairman, I rise in opposition to the amendment. I am disposed to judge a man's attitude toward a public question not so much by his words as by his acts. The gentleman says he is for a merchant marine, but in this amendment and in the statement just made he is proposing to strike from this bill a vital provision in behalf of an American merchant marine.

Mr. Chairman, we have undertaken in this section to make effective a provision which has been in the statutes for three years that has been wholly ineffective in the form in which it is written. The act of February 28, 1925, provided for a merchant marine naval reserve, but under the provision as it stands there has been no development of this merchant marine naval reserve. The men have not enlisted in the reserve and the law as it now stands is utterly worthless.

What did that law provide? There is nothing here to be alarmed about. There is nobody going to be dragged into the naval reserve against his wish or against his will. The 1925 act provided that there must be three essential steps before any man becomes a part of this merchant marine naval reserve and assigned to duty upon a merchant marine vessel. First, he has the option of enlisting; that option is purely a voluntary right and nothing more. No man in the merchant marine is under the least compulsion to go into this merchant marine naval reserve unless he believes it to be in his interest to do so. He may enlist. Then that enlistment and his presence upon a merchant vessel is subject to the check and approval of the master of the vessel, because no master of a merchant vessel under that 1925 act or under this act is compelled to take on board his ship a single one of these officers.

There you have two checks, the exercise of the option by the man himself and the approval of the officer of the merchant ships. Then in the third instance no officer gets on board one of these merchant vessels except with the approval of the Secretary of the Navy. There you have a third check placed around any undue expansion of this service.

I say that with these checks there is no threat to the personnel of the merchant marine. There is no harm done to the Navy, but there is this opportunity—not as great an opportunity as I would like—for officers of the naval establishment to serve upon our merchant ships for temporary periods of time and under this provision of pay.

Why is it we want these men permitted, under proper circumstances, to go upon our vessels? Gentlemen of the committee, this bill not only looks to the development of a merchant marine but it looks to the security of America. We must have, to be adequately protected, to have that security which the American people would have us possess, not only naval vessels as such, but we must have an auxiliary of cruisers and scout ships and other vessels of this type.

Do you know that of the vessels of more than 4,000 tons and with a speed of more than 15 knots, capable of conversion into scouts and cruisers, Great Britain has more than 227 while the United States has less than 70. There is this disparity between the United States and Great Britain of more than 3 to 1.

We hope by this bill there will be developed under our flag a fleet of fast vessels, built in accordance with plans and specifications of the Navy Department which may be useful to us in times of emergency. If there is reason for this hope, why is it not the part of sanity, why is it not sound judgment to make sure that the men of our merchant fleet may have an opportunity to learn the things which will be so essential in times of distress.

Why, my friends, this bill contemplates that under the limitations and with the restrictions to which I have alluded, there may be put on these merchant vessels of ours, of this particular and limited type, naval officers who may instruct those of the crew who have seen fit voluntarily to go into this reserve, in gunnery, seamanship, and all the other things that are so essential.

The CHAIRMAN. The time of the gentleman from Maine has expired.

Mr. WHITE of Maine. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Maine?

There was no objection.

Mr. WHITE of Maine. Mr. Chairman, it seemed to the members of the Merchant Marine and Fisheries Committee if we were to have ships available for the defense of this Nation in its time of need it was just as vital we should have a reserve of trained officers and trained men, because these ships without men are as idle and as useless as a painted ship upon a painted ocean.

These are naval officers. They should be paid by the Naval Establishment, to which they are subject at all times.

Mr. Chairman, I hope this particular amendment and any other amendments emasculating this provision and robbing the

American merchant marine and the Nation of this means of defense may be defeated. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho [Mr. FRENCH].

The amendment was rejected.

Mr. FRENCH. Mr. Chairman, I shall take it that the vote of the committee on this particular amendment determines the policy as to transferring the expense from the Navy Department to the Shipping Board, where I had indicated I thought it belonged. I offer, however, an amendment to page 21, at line 8, which I have sent to the Clerk's desk.

The CHAIRMAN. The gentleman from Idaho offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. FRENCH: Page 21, line 8, after the word "agreements," strike out the period, insert a colon and the following proviso: *"Provided,* That funds equal to the amount required for the purposes of this section shall first have been made available by the Congress for this specific purpose."

Mr. FRENCH. Mr. Chairman, just one word with regard to this amendment. This is the amendment that carries into the section the language of the present law under which the Congress and the administration have the authority and right to determine the amount of money that shall be expended for this purpose.

The present section in the absence of the amendment is ambiguous. You do not know whether it will be determined upon the language in the section or whether the comptroller would hold that this language is wrapped up with the law of 1925 and the words that I offer in my amendment be construed as being carried over and as pertinent to the language of the section. I hope the comptroller would so hold.

In the first place, the words I have offered ought to be added in order to remove any ambiguity; and, in the second place, they ought to be included because, as I said a bit ago, you do not know how much money will be required every year to meet this particular subsidy. The committee report indicates that it will begin with about $666,000 per year. I want to tell you it will increase, and when you shall have assumed the almost contract form of relationship between the Government and the members of the merchant marine reserve, you will be charged with bad faith if you attempt to slacken up on the amounts of money appropriated.

Mr. BLACK of New York. Will the gentleman yield?

Mr. FRENCH. Yes.

Mr. BLACK of New York. What appropriations have the Committee on Appropriations made for the merchant marine naval reserve?

Mr. FRENCH. Not necessarily the Committee on Appropriations, but Congress has appropriated a very small amount of money—I think between 70 and 80 are carried on the rolls.

Mr. BLACK of New York. Is the gentleman aware that the British appropriates for that purpose $2,000,000 a year?

Mr. FRENCH. I know they appropriated something, I do not know how much. Gentlemen must not construe from what I have said antagonism to a naval reserve. We need a naval reserve, but its size and cost ought to be controlled by the administration and Congress and not by the shipowners of ships under American registry.

Mr. CHINDBLOM. Are the other items for the merchant marine naval reserve itemized in the appropriation law?

Mr. FRENCH. Yes; and the Congress has control over them. Congress has control over practically everything in this bill, except that. You are turning over to the shipping concerns the privilege of building up a merchant marine reserve, and we are giving them a blank check with which to pay the bill.

Mr. CHINDBLOM. The estimates are furnished the Appropriations Committee, and they as a matter of good faith presume that the fund will be used for that purpose. Here you are putting this into a different form; you are requiring a specific appropriation for this particular purpose. That is out of the ordinary.

Mr. FRENCH. That is existing law. That is what I want here for estimates to come through the regular channels to Congress so that Congress may provide from year to year what it chooses to provide to maintain a merchant marine naval reserve.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. FRENCH. Yes.

Mr. LAGUARDIA. Where else will the funds be provided in these specific appropriations here made for this purpose?

Mr. FRENCH. They will be provided under the plea that we have made contracts and we will be charged with bad faith not to appropriate under such contracts—just as to-day we are called upon to appropriate for the payment of pensions, and we would be charged with bad faith if we did not do so.

Mr. LAGUARDIA. And unless the gentleman's amendment is adopted there would be no limit.

Mr. FRENCH. I am afraid not short of some millions of dollars.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho.

The question was taken; and on a division (demanded by Mr. FRENCH) there were 25 ayes and 58 noes.

So the amendment was rejected.

Mr. FRENCH. Mr. Chairman, I think with the membership here nothing would be gained by going further, yet I offer one more amendment to show what I would like to do.

The Clerk read as follows:

Page 21, line 2, after the word "amount," strike out the words "equal to" and insert "not exceeding."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho.

The question was taken, and the amendment was rejected.

Mr. LAGUARDIA. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 21, in line 8, strike out the period, insert a colon and the following: "*Provided,* That when officers and men of the merchant marine naval reserve are employed on any ship the wages of officers and men not members of the said merchant marine naval reserve holding similar rating or grade or doing similar work, shall not be less than the wages paid by the owners or master of the ship, plus the allowance which such reserve officers and men receive from the Navy Department as herein provided."

Mr. LEHLBACH. Mr. Chairman, I make the point of order that the amendment is not germane.

The CHAIRMAN. The Chair would suggest to the gentleman from New York for his consideration that this amendment is on a par with the amendment that the Chair passed upon some time ago.

Mr. LAGUARDIA. No, Mr. Chairman. Here you have the allowance made for pay. The Chair ruled on the amendment I offered to that section of the bill which excluded the stewards department from the requirements of the law and when I sought by my amendment the Chair in his wisdom—I say it with all due respect and deference—erroneously held that it was not germane for the reason that there was no pay provision in the section. But here you have a provision that the naval reserve officers and men are to receive two months' pay. That certainly makes my amendment germane. I did offer an amendment a few moments ago as to naval officers in active service. No point of order was made against that, and no point of order could have been made against it. This is surely germane when the section provides that these naval officers and men shall receive two months' pay for joining the merchant marine.

Mr. LEHLBACH. Mr. Chairman, this section deals solely with the pay of the officers and the merchant marine naval reserves by the Navy Department. It provides that members of the merchant marine naval reserves who are employed under certain circumstances shall receive under such regulations as the Secretary of the Navy may prescribe an amount equal to two months' base pay for their corresponding grades, ranks, or ratings in the regular Navy, and then it goes on and provides how such payments shall be considered. That is all that the rest of the paragraph is. The direction, the enactment into law of the provision, is directing certain pay be made by the Navy to enlisted men in the Navy, and does not deal with the wages of the crew on ships, and is not germane.

The CHAIRMAN. The section before us constitutes all of Title V of the bill. Title V of the bill and, of course, this section has to do with the merchant marine naval reserves, and does prescribe something with reference to their pay. The amendment of the gentleman from New York has to do with the pay of others than the naval reserve. It is not germane to the section to which it is offered, and, therefore, the point of order is sustained.

The Clerk read as follows:

TITLE VI—INSURANCE FUND

SEC. 601. Section 10 of the merchant marine act, 1920 (U. S. C., title 46, sec. 869), is amended to read as follows:

"SEC. 10. That the board may create out of insurance premiums, and revenue from operations and sales, and maintain and administer a separate insurance fund which it may use to insure in whole or in part against all hazards commonly covered by insurance policies in such cases, any legal or equitable interest of the United States (1) in any vessel constructed or in process of construction; and (2) in any plants or property in the possession or under the authority of the board. The United States shall be held to have such an interest in any vessel

toward the construction, reconditioning, remodeling, improving, or equipping of which a loan has been made under the authority of this act, in any vessel upon which it holds a mortgage or lien of any character, or in any vessel which is obligated by contract with the owner to perform any service in behalf of the United States, to the extent of the Government's interest therein."

Mr. GRIFFIN. Mr. Chairman, our commendation is owing to this great committee on having come to a unanimous agreement upon a bill involving a problem of such complexity. The achievement is a compliment to their good fellowship, but looking at the problem wholly from the standpoint of a Democrat, fundamentally opposed to special privileges in any form, I can not welcome a bill which partakes so much of the character of a subsidy.

After all, stripping it of apologies and generalities, this is a subsidy bill. It is an attempt to correct the inequalities in the economic structure whereby this country has been isolated. We stand alone. We can not trade with other nations, because they can not reasonably trade with us. How can we expect to sell if we will not buy? If we erect a barrier around our country so high as to constitute a commercial embargo we impair or destroy all of the traditions of comity, good will, and friendly intercourse with other nations.

Mr. COLE of Iowa. Mr. Chairman, will the gentleman yield?

Mr. GRIFFIN. I regret I can not yield at this time.

COMMERCE AS A FACTOR IN PROGRESS

Commerce has been one of the most important factors in the growth of civilization and in bringing the nations of the world into harmony and good will. It has also had a salutary influence as a stimulus to invention, spurring the genius of man in the construction of labor-saving devices, improving business methods, encouraging mutual confidence, and in the establishment of credit relations among nations. It places at the disposal of the consumers of the world those comforts and conveniences of modern life which are the mark of civilization. In the process of exchange the highly cultured nations secure coffee, tea, cocoa, ivory, and tropical fruits, spices, and medicaments, while the denizens of the jungle obtain, in return, shoes, silk shirts, clocks, phonographs, tools, and weapons.

International commercial rivalry is nothing more than tradesmanship conducted on a big scale. When carried to excess it becomes a dangerous factor in the relations of nations and is often provocative of war.

Our economic policy as a nation for some years past has been to hamper and restrict our foreign commerce. Yet, strange as it may seem, we have never abandoned the hope that the world will buy from us without our doing our part in buying from them. We seem to forget that trade is not a one-sided proposition. If we put what practically amounts to an embargo on foreign commodities, we can not expect the world to buy ours.

Having embarked on a career of artificial stimulation of industry by special tariff rates aiming to exclude foreign imports, we find ourselves the victim of high prices everywhere.

HOW THE VICIOUS CIRCLE EXPANDS

It ought to be apparent to even the most gullible that we can not give an industry a protective tariff to protect it against foreign competition without enhancing the cost of its products to the consumer. Now, when this practice is extended from one industry to another until it is practically crystallized into a system, and the whole circle of home industries is protected by these artificial restraints on trade, it is obvious that the favors shown to each is bound to be reflected in the prices of everything, including labor. In other words, we are ever enlarging the vicious circle of artificial stimulation and inflation of prices.

The inauguration of artificial restraints on international trade leads inevitably to the building up of an artificial economic structure, with ramifications extending widely into every branch of activity. The farmers complain that while they buy in a protected market they must sell in an open market in competition with the world. Now they are clamoring for special legislation putting the Government in business for their benefit. In other words, they want their share of the booty. Now come the shipping interests. They want an artificial structure created for their benefit—and this bill is the result.

On our entrance into the World War we had to make a merchant marine to order. We spent $3,000,000,000 on the job. We built ships and when the war was over we could not use them. They are rotting in our ports. What is the sense of subsidizing private individuals to build more ships? Why not use what we have?

If we are unwilling to abandon our preposterous restraints on international commerce, there is only one thing to do; that is to have the Government operate them.

We have tried that with the war-built ships, but without success. Only 30 per cent of the ships we have in operation are employed to carry American products. In other words, the very interests that derive most help through tariff favors ship their products in foreign bottoms.

Rather than give up these special tariff privileges the ruling powers in our Nation now submit this bill to complete the circle of artificial stimulation of industry to which we have been committed. The result of our one-sided policy is that the price of everything has been so inflated in this country that it is impossible for us to build ships or to produce or to sell in competition with the markets of the world.

My colleague from West Virginia, Mr. BOWMAN, introduced a table in the course of his speech the other day showing that on the 31st day of December England was building 1,500,000 tons of ships, and that on the same day we had on the ways 56,000 tons.

OUR DEPLORABLE SITUATION

Let us glance at our deplorable situation. For every ship of 2,000 tons or more which we have built since the war Great Britain has built 40, Germany 12, France 5, and Japan 4.

That is the problem that confronts us. Why is it that we can not build? Because we do not put it within the bounds of possibility under our false, awkward, artificial system. What I wish to bring home is that we can not eat our cake and still have it. If we lay an embargo against the purchase of foreign-built ships we may artificially stimulate home shipbuilding, but the increased price we have to pay for them is reflected in the handicaps attending their ownership and operation. But that is only half the story.

Having built them and sold them, the operators have then to meet the enhanced cost of operating them in competition with foreign carriers. We can not operate our merchant marine to advantage in such a competition where our costs of operation, due to the general inflation of prices, is double that of our rivals.

This is an appeal to get down to the fundamentals. Reduce the barrier of the tariff and extend the hand of fellowship to the nations of the world. Enter into friendly intercourse and commerce with them, give them an opportunity to sell, and we will have an opportunity to sell in return. Thus will our problem settle itself according to the laws of nature. Our commerce will thrive, we will be able to build our own ships, and we will be able to operate them under the American flag.

Mr. DAVIS. Mr. Chairman and gentlemen, I rise to say a word in reply to my distinguished friend from New York [Mr. GRIFFIN]. I agree with the gentleman that the party of which he and I are members has always been opposed to subsidies of all kinds, including ship subsidies. Our party has repeatedly expressed itself upon that subject. The platform on the merchant marine adopted by the Democratic National Convention in 1924 expressly declared against ship subsidies. I helped prepare the merchant marine plank in the platform, and personally wrote that particular provision. However, in reply to the gentleman, as I stated in my speech under general debate, there is no provision in this bill that can properly or correctly be classified as a subsidy. I do not think there is anything that is economically unsound from the standpoint of the Democratic Party or any other party. It is true that this bill contains some very substantial aids. It contains provisions which we hope will materially encourage and promote the construction and operation of an American merchant marine, but in my opinion none of these provisions is unsound. For instance, take the loan provision. It is no different in principle from existing law, which was enacted without division along party lines, without any suggestion of its being a subsidy, and was signed by President Woodrow Wilson, who was generally regarded as a pretty good Democrat. We propose to loan for ship construction money of the Government at a rate of interest at which the Government could borrow it if it were necessary for it to borrow it, and up to three-fourths of the value of the cost of the ship, taking a first mortgage on the ship and such additional security as the board deems advisable, and with numerous safeguards thrown around it for the protection of the Government and the loan. One very important provision is that ships constructed with such loans must be constructed in accordance with plans and specifications approved by the Navy and for use as naval auxiliaries in time of national emergency. And the authority is expressly reserved for the United States to commandeer those ships in case of a national emergency and——

Mr. GRIFFIN. We can commandeer any ship, can we not?

Mr. DAVIS. Yes; but under the provisions of this bill we are only obligated to pay for them according to the fair actual

value, not counting any enhancement because of the emergency, and not paying any consequential damages arising from such taking. Under the general law, if the Government commandeered a ship as we did during the World War, we were required to pay the market value at the time of taking, which in numerous instances was many fold what the ship was worth in peace times. So that it is valuable from a national-defense standpoint.

Now, on the question of mail pay, the provisions in this bill are no more liberal, and can not be construed as a subsidy, any more than can the 1891 mail pay act, which has been the law for 37 years. The Democrats have been in complete control on two different occasions since and did not disturb the 1891 mail pay act.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. DAVIS. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. DAVIS. There is no change whatever in principle, but the old rates are increased under this bill. In other words, the rates in the present law range from $1 to $8 per nautical mile. We increase that to a range of not exceeding $1.50 to $12 per mile, according to speed and tonnage. I am sure that the gentleman from New York will agree that these increased rates are not commensurate with the increased expense of fuel, wages, and other elements that enter into ship operation. These contracts can only be awarded to the lowest responsible American bidder after due advertisement.

Furthermore, the merchant marine act of 1920, in section 7, provides:

> The Postmaster General is authorized, notwithstanding the act entitled "An act to provide for ocean mail service between the United States and foreign ports, and to promote commerce," approved March 3, 1891, to contract for the carrying of the mails over such lines at such price as may be agreed upon by the board and the Postmaster General.

In other words, under the said 1920 act the Postmaster General can disregard the rates in the 1891 act and grant as high pay as he deems proper for the carriage of ocean mail. Our attention has been called to one case where contract made under the 1920 act by the Postmaster General with one ship line in the Pacific would be reduced under the rates provided in the pending bill.

The provision in the 1920 act just quoted is expressly repealed in this bill.

Mr. JACOBSTEIN. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. Yes.

Mr. JACOBSTEIN. Is it your idea that this difference is justified for military and naval reasons rather than for commercial reasons?

Mr. DAVIS. Yes; I think that is true, as I said, from a national standpoint.

Mr. GRIFFIN. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. Yes.

Mr. GRIFFIN. And that is the reason why you refuse to call these benefits "subsidies"?

Mr. DAVIS. They are not subsidies. For instance, the gentleman from Idaho [Mr. FRENCH] referred to the merchant marine naval reserve as a subsidy. If that is a subsidy, all that we appropriate annually for the Navy is a subsidy. It is not a subsidy in any true sense of the word.

Reverting to the mail pay, to show the gentleman from New York that there has been no change in this position so far as I am concerned, the gentleman and others perhaps remember when we had a fight in 1922 over the Lasker bill which did embrace ship subsidies. I was one of those who fought the bill and spoke against it on several occasions. But in my speeches against that bill I made a distinction between subsidies and mail pay, and that is my position now, and my present attitude is not a whit different from what it was then. In discussing the Lasker bill on this floor November 24, 1922, I stated:

> I think it is entirely proper, just as we have been doing all along, to pay for the carriage of our ocean mails. It is just as legitimate to have good ocean mail service as it is to have good land mail service. But that is not a subsidy.

Among the recommendations I made at that time and in that speech was to employ a liberal policy in the payment of compensation for the carriage of our ocean mail, the employing of American ships as far as possible, all of which is fully authorized by the act of 1891, now in force.

In other words, if we employ the services of speedier vessels and they make more frequent sailings, we can well afford to pay more. We pay more now for the carriage of mails on fast express trains than on slow trains. We pay more for the carriage of mail by airplane than on railroad trains, and we pay more for the transit of mail by means of tube service than for its transport on trucks. But all that is in keeping with American progress. We think that we should have efficient service for the carriage of the mails between this country and other countries, just as we are establishing more efficient services in this country. Furthermore, the representatives of the Post Office Department stated that under the provisions of this bill they would keep the payments within the revenues from ocean mail, and that is more than they are doing with respect to our domestic mail. For instance, they are now carrying—and the gentleman from New York and others recently voted for a liberalization of the provision under which we are carrying in this country—newspapers and magazines at a heavy loss to the Government. Summing it all up, there is not a single provision in this bill that is not already the law in principle. [Applause.]

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TITLE VII—TRANSPORTATION OF GOVERNMENT OFFICIALS

SEC. 701. Any officer or employee of the United States traveling on official business overseas to foreign countries, or to any of the possessions of the United States, shall travel and transport his personal effects on ships registered under the laws of the United States when such ships are available, unless the necessity of his mission requires the use of a ship under a foreign flag: *Provided*, That the Comptroller General of the United States shall not credit any allowance for travel or shipping expenses incurred on a foreign ship in the absence of satisfactory proof of the necessity therefor.

Mr. NEWTON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Minnesota moves to strike out the last word.

Mr. NEWTON. I want to ask a question of the distinguished gentleman who so ably presides over this committee. Just what is the occasion for this proviso?

Mr. WHITE of Maine. Mr. Chairman, one of the regrettable facts is that over and over again we read of American officials of high authority traveling, when they go abroad on official missions, upon foreign ships. We think that it is proper that it shall be written in the law that when an American official goes abroad to represent the United States he shall travel on an American ship under the American flag if that is available and practicable. [Applause.]

Mr. NEWTON. I agree with the gentleman on that, but does the gentleman feel that in order to accomplish that it is necessary to have the Comptroller General pass upon the question as to whether there should be two affidavits or one? It says "satisfactory proof of the necessity."

We all know of difficulties with the office of the Comptroller General from time to time because of highly technical constructions of statutory provisions. No administrative officer will know where he is at when proof of this character is required. As the section is now drawn it provides that the proof must be "satisfactory" to the Comptroller General. In practice that does not mean Mr. McCarl but some subordinate way down in the department some place. After the subordinate once renders a decision you have got to move everything under the sun before you can obtain a reversal. I think this provision is too drastic.

Mr. LaGUARDIA. Will the gentleman yield for a question?

Mr. NEWTON. Yes.

Mr. LaGUARDIA. I agree with this section, but has the chairman of the committee provided for interpreters, oriental and otherwise, so that these officers can speak to their steward's department?

Mr. WHITE of Maine. The gentleman has a capacity for nagging almost beyond limit; but the situation is just this: It was the view of the committee that there had been altogether too much laxity in times past by various departments of the Government in permitting men in those departments to utilize foreign ships, and we felt that some one other than the immediate superior of the men who travel should be the one to pass on the necessity of traveling in a foreign ship. The provision is drastic; I agree to that; but we were clear in our view that it ought to be drastic.

Mr. NEWTON. I merely want to say to the gentleman that if the word "satisfactory" were stricken out and the language permitted to read, "in the absence of proof of the necessity therefor," you could accomplish any reasonable purpose; but by having it read this way you leave it in the control of some subordinate in the office of the Comptroller General.

Mr. Chairman, I move to strike out the word "satisfactory" in line 15, page 22.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. NEWTON: Page 22, line 15, strike out the word "satisfactory."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

The amendment was rejected.

The Clerk read as follows:

REQUISITION OF VESSELS

SEC. 802. (a) The following vessels may be taken and purchased or used by the United States for national defense or during any national emergency declared by proclamation of the President:

(1) Any vessel in respect of which, under a contract hereafter entered into, a loan is made from the construction loan fund created by section 11 of the merchant marine act, 1920, as amended—at any time until the principal and interest of the loan has been paid; and

(2) Any vessel in respect of which an ocean mail contract is made under Title IV of this act—at any time during the period for which the contract is made.

(b) In such event the owner shall be paid the fair actual value of the vessel at the time of taking, or paid the fair compensation for her use based upon such fair actual value; but in neither case shall such fair actual value be enhanced by the causes necessitating the taking. In the case of a vessel taken and used, but not purchased, the vessel shall be restored to the owner in a condition at least as good as when taken, less reasonable wear and tear, or the owner shall be paid an amount for reconditioning sufficient to place the vessel in such condition. The owner shall not be paid for any consequential damages arising from such taking and purchase or use.

(c) The President shall ascertain the fair compensation for such taking and purchase or use and shall certify to Congress the amount so found by him to be due, for appropriation and payment to the person entitled thereto. If the amount found by the President to be due is unsatisfactory to the person entitled thereto, such person shall be entitled to sue the United States for the amount of such fair compensation and such suit shall be brought in the manner provided by paragraph 20 of section 24 or by section 145 of the Judicial Code, as amended (U. S. C., title 28, secs. 41, 250).

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word simply for the purpose of asking a question. On page 22, line 24, the term "national emergency" is used. That means, of course, nothing short of hostilities with a foreign nation, does it not, in the opinion of the chairman of the committee?

Mr. WHITE of Maine. I think it means actual hostilities or the impending of hostilities or something of a nature equally grave, found and declared by the President to exist.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

DEFINITIONS

SEC. 803. (a) When used in this act, and for the purposes of this act only, the words "foreign trade" mean trade between the United States, its Territories or possessions, or the District of Columbia and a foreign country: *Provided, however,* That the loading or the unloading of cargo, mail, or passengers at any port in any Territory or possession of the United States shall be construed to be foreign trade if the stop at such Territory or possession is an intermediate stop on what would otherwise be a voyage in foreign trade.

(b) When used in this act the term "citizen of the United States" includes a corporation, partnership, or association only if it is a citizen of the United States within the meaning of section 2 of the shipping act, 1916, as amended (U. S. C., title 46, sec. 802).

Mr. HOUSTON of Hawaii. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Delegate from Hawaii offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HOUSTON of Hawaii: On page 24, line 18, after the word "includes," add "a person owing allegiance to the United States and."

Mr. HOUSTON of Hawaii. Mr. Chairman and members of the committee, we have under the American flag and owing allegiance thereto some 12,000,000 Filipinos. They have no other flag under which they can serve. There are many of them, thousands of them, seaworthy and sea-minded people. They are clean and industrious; they are able, and they make splendid, brave seamen. I have seen some of their acts myself in my service in the Navy. There are none who are braver than they under emergencies. I have seen them jump overboard in typhoon weather, regardless of personal safety, and endeavor to save other people. Now, should they be included in that portion of the crew who are entitled by this act to be called aliens, or is it not fair to them, as long as our flag floats over their land, that they shall be classed with the citizens of the United States for the purposes of this bill?

Mr. Chairman and members of the committee, I hope you will consider this amendment of sufficient value, so that they may in the merchant marine, as they do in the Navy, serve the flag which floats at the present time over their land. [Applause.]

Mr. CHALMERS. Will the gentleman yield?

Mr. HOUSTON of Hawaii. I yield.

Mr. CHALMERS. I think the gentleman is correct and this amendment should go in this law. I hope the committee will accept it.

Mr. SCHAFER. Mr. Chairman, I move to strike out the last two words. I shall vote against the present bill because certain amendments have not been incorporated. In view of the lateness of the hour and in view of the fact that it would be mainfestly unfair to bring absent Members here I shall not force the parliamentary situation, which would require a roll call on the bill. I ask unanimous consent to extend and revise my remarks on this bill, and include the statement of Andrew Furuseth, president of the International Seamen's Union of America.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to revise and extend his remarks and include therein the statement to which he has referred. Is there objection?

There was no objection.

The statement referred to is as follows:

PETITION AND MEMORIAL TO THE CONGRESS OF THE UNITED STATES

(In re shipping bill as reported from Committee on Merchant Marine and Fisheries)

On behalf of the International Seamen's Union of America (an American organization in everything but name) whose persistent effort for some 40 years has been to get Americans to sea and whose declared purpose was then and is now "To use our influence individually and collectively for the purpose of maintaining and developing skill in seamanship and effecting a change in the maritime law of the United States, so as to render it more equitable and to make it an aid instead of a hindrance to the development of a merchant marine and a body of American seamen," and further in the name of substantially all men employed at sea under the American flag in any capacity, the undersigned most respectfully petition the House of Representatives and its Members, and the Senate and its Members, to give earnest and friendly consideration to the following amendments to S. 744, as reported to the House of Representatives from the Committee on Merchant Marine and Fisheries. We respectfully beg that the bill be amended in the following particulars:

1. On page 13, in line 8, strike out the words "and exclusive of the steward's department."

2. On page 20, strike out "Title V—Merchant marine naval reserve."

3. On page 17, strike out everything in lines 19, 20, 21, 22, 23, and 24; and on page 18, in lines 1, 2, 3, 4, 5, and 6.

As the reasons for this, our petition, we respectfully submit the following memorial:

On amendment No. 1, we respectfully beg to submit that sea power is skilled man power; that the experience of all the past proves that vessels are the tools of seamen; that the most powerful and best-equipped naval vessels are no match for vessels inferior in power and equipment if the latter be manned by men superior in skill and seamanship; that the best built and equipped merchant vessels are in safety and other usefulness less effective than inferior vessels if the latter be manned by men of greater experience and skill; that merchant vessels and average freight vessels have a steward's department equal to about

one-sixth of the total crew; that in combination passenger and freight vessels the steward's department represents from one-third to one-half, according to their tonnage and passenger accommodation; that in first-class passenger vessels (built to carry passengers, mail, and express freight) the steward's department is usually about two-thirds of the crew, except on coal burners; that while the steward's department has not the all-around experience of the men in the deck department or the mechanical skill of the men in the engineer's department, they are, with the exception of a few who are there to learn, accustomed to the sea; that is, they have acquired by experience the ability to use their hands and their faculties while they are unconsciously balancing their body on a constantly moving platform—the vessel's deck; that they are of the military age or age subject to draft; that they are able bodied; and for these several reasons, they are for the purpose of national defense at sea infinitely superior to landsmen without any sea experience. This was proven beyond any question by the experience of the Russian fleet which left the Baltic during the Russian-Japanese war and which ceased to exist within an hour after they came within the range of the Japanese guns.

Practically the whole history of the maritime struggle between England and France testifies to the supreme importance of skilled men. The same question is touched upon by Captain Mahan, quoting the expression of Admiral Nelson after his visit to Cadiz, when Admiral Nelson is reported to have said: "The ships are splendid; the Dons can build ships but they have no seamen, and when we meet them I will go alongside and take them." This actually happened, according to Captain Mahan.

For these reasons we respectfully maintain that vessels which are to receive mail pay and under the bill, as it now reads, will continue to carry Chinese in the trade with the Orient, Italians and Greeks in the trade with the Mediterranean, Germans in the trade with Germany, and English in the trade with England in their steward's department will be developing valuable men for the sea power of a new China, also for Japan, Italy, Germany, and England.

We respectfully submit that a bill, one of the main purposes of which is to develop a merchant marine and a sea power for the United States, ought not to contain a provision which historically and in present fact would work distinctly against the main purpose of the bill.

But there are other reasons which, while not of equal weight from a national point of view, ought to be given serious consideration from a social and racial point of view. Under the bill as it reads, there is no doubt that in the oriental trade the steward's department will be made up of Chinese, Japanese, or Malays.

This means that the smuggling of excluded orientals is to continue and increase. We have had what has been considered a perfect Chinese-exclusion act since 1891. There have been very few Chinese women in the United States. Notwithstanding this fact, there are more Chinese in this country to-day than there were in 1891, and on an average they are as young as they were then. The explanation of this mystery is to be found in the fact that the young Chinese come ashore and their places on the vessels are taken by the old ones who are returning home, and it is further illustrated by the following quotations from the Seattle Post-Intelligencer, quoted in the Senate by Senator KING, of Utah, on Saturday, February 14, 1925:

[From the Seattle Post-Intelligencer of February 22, 1923]

CHINESE BID HIGH STAKES FOR SHIP JOB—MONEY OFFERED FOR POSITIONS ON ORIENT-SEATTLE VESSELS REVEALED IN FIGHT AGAINST DOPE

High stakes offered for minor positions on American steamships plying between the Orient and Seattle are revealed in correspondence between Chinese and ships' officers disclosed yesterday by investigators uncovering the dope traffic here.

A letter to the purser of one trans-Pacific liner, believed to have been written at Hong Kong and dated November 9, 1922, reads:

"I went up your office this afternoon for applying the job of interpreter.

"I beg to say that I will hand over of $1,000 for the job if you can fix up for me.

"I will come to see you immediately when your ship return from Manila and I hope you will combine with the chief steward and also I will do him good when the job succeeds.

"Yours truly,

"LO WING PO."

LETTER AT MANILA

Another letter, written to the master of one of the big passenger liners, was received by him at Manila and was written on stationery of his ship. It bears the signature of H. Hong, and reads:

"Hoping that you are open to any proposition within reason and not entailing too much risk that will benefit you financially, I take the liberty of advancing my business aspirations.

"Representing the largest Chinese business club of Hong Kong, I would bid for the position of No. 1 man in the steward's department. The sum to be paid you on our arrival in Hong Kong in case you accept this bid will be $500 gold. An arrangement will be made with the chief steward separately.

"In case you care to entertain this proposition an answer as to whatever agreement you could arrive at would be very much appreciated not later than Sunday afternoon.

"We wish to know in order to have the money ready in case you desire.

"Besides the initial payment there will be more money at the other end of the voyage.

"Perhaps this may not be feasible to make a change this trip, and I hope you will consider this enough to keep me in mind for the next trip as No. 1 man.

"These trips can be very profitable to you if you are farsighted."

Reports in the possession of the Federal investigators show that the smuggling of opium, morphine, and cocaine is not confined exclusively to the Admiral Line steamers. To the contrary, it is generally admitted that narcotic drugs, in varying quantities, reach Seattle and other Puget Sound points on practically all vessels which load cargoes in the Orient.

GOOD PAY FOR CHINESE

That these ship's jobs were lucrative to Chinamen who condescended to engage in the dope trade is made clear in the confession of David J. Taylor, held on narcotic charges here. The Chinaman known as No. 1 boy, according to Taylor, usually was trusted and paid by the dope ring to secrete the narcotics aboard ship at Hong Kong and guard the stuff safely until it reached the dock here.

Customs agents have been informed in writing by narcotic agents that there are 147 tins of smoking opium that were thrown off a ship last December, according to Taylor's confession, still in the bay at Smith Cove.

It has been reported several days ago that some one was dredging for this opium, and narcotics agents supposed the searchers to be customs men. Check of Federal officers yesterday, however, disclosed that no agents of the Government were engaged in the work, and the conclusion was reached that "hi-jackers" must be attempting to salvage the stuff.

Mr. KING. A letter from one of the captains employed by the Shipping Board shows that Chinese are being employed, and that the percentage of Americans is small. I ask that it may be inserted in the RECORD without reading.

There being no objections, the letter was ordered to be printed in the RECORD, as follows:

CHINESE FIREROOM CREW—STEAMSHIP "PRESIDENT MADISON"

SEATTLE, WASH., *October 10, 1922.*

Mr. A. F. HAINES,
*Vice President.*

It appears that through some error the Chinese fireroom crew for the above-named vessel was brought over on the steamship *President McKinley*. It is my understanding that when this crew was ordered you were under the impression that the *President Madison* carried a white fireroom crew, but, as you undoubtedly know by this time, she carries a Filipino fireroom crew signed on at Manila for a round trip. We now have 34 firemen on our hands that we do not know exactly what to do with. It has been suggested that we keep these men here and transfer them to the various freighters as they arrive, but in view of the fact that this would necessitate the keeping of these Chinese here on pay for a long time I can not see how we can consistently carry out this plan.

After considering this matter from all angles my recommendation is that we retain 12 men to fill the complement in the engine room of the steamship *Hanley*, and that we transfer the other 22 men over to the *President Madison* to relieve the Filipinos at Hong Kong, where the *Madison* can ship 12 additional Chinese to replace those held over for the *Hanley*.

"I understand Mr. Horsman suggested to Mr. Wright that we retain the entire 34 men here and place them on the different freighters in various capacities; that is to say, both in the deck and engine departments. In view of the fact that these men were shipped as firemen I do not consider it practicable to put them on deck, because when employing Chinese seamen not speaking English, or speaking very little English, it is imperative that they know their business, and you can not expect a fireman to handle cargo gear and steer the vessel.

I do not see how we are going to explain this matter to the Shipping Board, but it seems to be a question of choosing the lesser evil; and, therefore, I have made the above recommendation.

ERIK G. FROBERG,
*Port Captain Foreign Department.*

The number of Chinese then carried is shown by the following table put into the CONGRESSIONAL RECORD by the same Senator at the same time.

*Shipping Board vessels—Sailings for month of January, 1924, port of San Francisco*

| Vessel | Operator | Total crew | American | Alien | Percentage American |
|---|---|---|---|---|---|
| President Cleveland | Pacific Mail | 237 | 44 | 193 | 18.5 |
| President Taft | do | 240 | 52 | 188 | 21.7 |
| Las Vegas | Swayne & Hoyt | 35 | 10 | 25 | 28.6 |
| West Jappa | do | 33 | 14 | 19 | 42.4 |
| West Ivan | Struthers & Barry | 34 | 15 | 19 | 44.2 |
| Stockton | do | 36 | 12 | 24 | 33.4 |
| Hagen | do | 35 | 31 | 4 | 88.9 |
| West Cajoot | do | 37 | 21 | 16 | 56.8 |
| Average per cent for month. | | | | | 41.8 |

NOTE.—*President Cleveland*, 134 Chinese, 56 Filipinos; *President Taft*, 134 Chinese, 52 Filipinos; *Las Vegas*, 22 Filipinos; *West Jappa*, 19 Filipinos; *West Ivan*, 16 Filipinos; *Stockton*, 24 Filipinos; *West Cajoot*, 8 Filipnos; *Hagen*, full white crew.

The last reported payment of a Chinese for being smuggled into the United States in such a way as to mingle with the Chinese population already here, is eleven hundred dollars for each person. It is necessarily the steward's department that carries on the smuggling, because all they have to do to make them look like the crew is to dress them in the same kind of clothes that the crew wear; and it is necessarily from the steward's department that they must be fed. They are only hidden when leaving port and when coming into port; at other times they are mingling with the crew. Sometimes they are apprehended, as more than 80 of them were taken out of one vessel in Seattle.

The scale for bringing excluded Europeans into the United States varies, according to the ports of departure and the eagerness of the persons to go, from two hundred to four hundred dollars; and, of course, this amount of money is not paid by men who could possibly get within the quota and obtain a visa. The records of the Immigration Service, as quoted before the Committees on Immigration and Naturalization in the House and Senate, are the warrant for this statement.

The argument used in favor of aliens in the steward's department, to the effect that Americans will not serve there, has no basis whatever in fact. They do not refuse to serve in the steward's department, but they do refuse to serve there or elsewhere together with and on an equality with the orientals. Aside from this, the Americans are working in the kitchens, hotels, and restaurants throughout this entire country, except where Chinese or Japanese are employed.

It is, therefore, most respectfully submitted that both from a national defense point of view and from a social and immigration point of view the amendment No. 1 should be adopted.

AMENDMENT NO. 2

Our second amendment to strike out "Title V—Merchant marine naval reserve" is submitted because here the Naval Reserve is lugged into this bill by the heels for the purpose of equalizing the differential in wages, which it is claimed does exist between American vessels, English and other flag vessels. In order to save the reader looking up the bill, Title V—Merchant marine naval reserve, and the reasons for the committee's recommendation that it be passed are hereby submitted as follows (p. 20, Title V, of the bill):

TITLE V—MERCHANT MARINE NAVAL RESERVE

"SEC. 501. In addition to the pay prescribed by existing law for officers and enlisted men of the merchant marine naval reserve when not employed on active duty with the regular Navy, such officers and enlisted men of the merchant marine naval reserve as are employed on merchant vessels of the United States registry regularly engaged in foreign trade shall be paid per annum by the Navy Department under such regulation as the Secretary of the Navy may prescribe an amount equal to two months' base pay to their corresponding grades, ranks, or rating in the regular Navy, such payments so made by the Navy to be considered, in all laws or agreements referring to the officers and crew of the merchant marine, as an integral part of the total pay prescribed for such officers and crew in accordance with such laws and agreements."

The following is from page 8 of the report:

"This title of the pending bill provides that in addition to this one month's base pay these officers and men who enlist in the merchant reserve shall be paid by the Navy Department an amount equal to two months' base pay of their Navy grades, this payment by the Navy to be considered an integral part of the total pay of such officers and crew. There are two purposes in this provision: First, and a purpose of the greatest national concern, is the aid it will give in building up a trained reserve of American sailors. Other maritime nations, and, in particular, Great Britain, have long realized that in addition to ships there must be trained men, and it has long maintained a merchant marine reserve of this type. Of secondary significance and importance is the fact that to the extent of the payment and in proportion to the number of officers and men on board ship who enlist in this reserve, the owner of the vessel is relieved of a portion of the wage scale."

The purpose of bringing the Naval Reserve into this bill is twofold, as follows:

"First, and a purpose of the greatest national concern, is the aid it will give in building up a trained reserve of American sailors. Other maritime nations, and, in particular Great Britain, have long realized that in addition to ships there must be trained men, and it has long maintained a merchant marine reserve of this type."

It should not be overlooked that the merchant marine reserve of Great Britain is made up in large part of fishermen, manning the fishing smacks that are operating on the banks off the coasts of Great Britain, on the banks of the North Sea, on the banks off the coasts of Norway and of Iceland, and then of merchant seamen who are of the rating of able seamen or better, or marine firemen or better ratings; that they are receiving specfic sums yearly; that they are generally called in to serve on some naval vessel for one month each year, when they are receiving the naval pay according to their rating. They are not called into active service except in case of war. These men are thoroughly accustomed to the sea and their yearly training is for the purpose of developing their skill and usefulness for naval purposes.

As the situation now stands, we have very few such men here in the United States. The yearly turnover amongst the able seamen is so great that the development in real skill and seamanship is a practical impossibility, except in comparatively few instances. According to D. N. Hoover, supervising inspector general of Steamboat Inspection Service, there have been issued since November 1, 1915, 155,635 able seamen's certificates—that is, 12,969.5 per year. The number needed to fill the rating of able seamen on inspected vessels was, in November, 1927, 16,633 men; that is to say, 12,969.5 are certificated each year to fill the required number of 16,633. In other words, there was a turnover per year of about 75 per cent in the rating of able seamen. The turnover of the men serving in the engine department can not be very easily ascertained, but there is no doubt at all that it is greater and that it reaches more than 100 per cent.

The testimony of Mr. Charles R. Page, president of the Firemen's Fund Insurance Co., found on pages 507 to 574, part 2, of the merchant marine hearings of this Congress, dealing with the question of accidents as reason for differentials in insurance premiums, is an evidence of our inefficiency of operation, both on shore and at sea and ought to be read with care by all men interested in the causes that work against the development of a merchantile marine and an efficient sea power for the United States.

It, therefore, seems plain that under our system as it is now operating, men do not remain long enough at sea to become real seamen. The reformation must begin at the base, in order that the Navy and the country may get the kind of men that will be needed in some coming period of stress and strife. So the first purpose as stated in the report, is impossible of accomplishment. The bulk of the white men employed are native born, but the condition does not afford the opportunity for them to remain in the merchant service long enough to become really useful.

Another aspect of this should not be overlooked. The bill deals with, at the most, 15 per cent of the men employed under the American flag. It will not include the men in the lake, coastwise, and intercoastal trade. And when it is maintained that this is for purposes of defense, it is difficult to understand why 85 per cent of the men employed are overlooked. The men themselves look upon it as a subsidy given to the shipowners without any justification in national welfare. The second reason for giving the shipowner this bonus is in order that they may use their industrial power to drive the men into the Naval Reserve.

As Title V and the report thereon read, the members of the merchant marine naval reserve who serve on vessels of American registry in the foreign trade for one year, will be paid two months' base pay by the Navy Department, under such rules as the Secretary of the Navy may prescribe. This two months' pay is "an integral part of" not in addition to the wages specified on the articles. The report says:

"Of secondary significance and importance is the fact that * * * the owner of the vessel is relieved of a portion of the wage scale."

The only way the owner can be relieved of the equivalent of two months' pay is by dividing the money paid by the Navy Department into 12 equal parts and subtracting the monthly part of the yearly sum from the wages specified on the articles.

That the owner will use his power to compel the members of the crew, officers, and men, to become members of the Naval Reserve, needs no argument, because for each Naval Reserve man that he has he will save the equivalent of two months' wages that the men are to receive from the Navy Department. A question might well be raised as to whether a pro rata of the money paid by the Navy for the whole year could be so apportioned as to give the man the proportionate pay for such months as he may have served during the year. The bill as it now reads, indicates the opposite.

If the Navy is really in favor of compelling the men to become members of the Naval Reserve, it can only be because they are more interested in numbers than in actual usefulness, disregarding the fact, which they can not help knowing, that the men of the merchant service, as a general proposition, are opposed to becoming Naval Reserve men to be called into service whenever the President proclaims a national emergency, while they would have no objection at all if they could only be called in in case of war. A national emergency might well be proclaimed if there was for some reason or another, such as in 1921, a general maritime lockout or strike, and the men feel perfectly satisfied that if they were to be locked out or strike, as merchant men they could be ordered to work again as Naval Reserve men. Under circumstances of a similar nature, those steps have been taken in European countries with reference to railroad men, telegraphers, and others, who were promptly called in and ordered back to work because they were in the reserve of the army. Such a condition as this would give to the shipowners an absolute control over the wages and working conditions and would inevitably result in driving from the sea men who could and would give excellent service in case of need and then drawing to the sea men, who for one reason or another, have been a failure on shore and, therefore, come to the sea as a very large number of men are now coming to escape starvation on shore.

This description does, of course, not apply to licensed officers, but they may and very likely will see the inevitable tendency and, therefore, they will seek employment on shore wherever the can obtain it. This would leave the merchant marine short of the necessary officers, even where there is no definite lockout or strike, and it is partly for this reason as we see it, that the naval officers are brought into the bill. Hence the third amendment, in which we respectfully request that the section dealing with naval officers be striken out.

AMENDMENT NO. 3

While it is true that substantially the same provision of law is in the ocean mail act of 1891, the condition between the two periods is entirely changed. At that time there was no Naval Reserve. At that time a licensed officer could not refuse to serve under his license. Unless he could give in writing an explanation satisfactory to the owner and to the department, his license was, according to law, revoked.

At the present time he may refuse to continue in service after he has completed his contract and when he is confronted with a condition in which the shipowner will determine wages and working conditions, he will seek employment on shore. We have the actual experience of some years to prove the fact that he will. The officers may thus become so scarce that the naval officers will be appealed to to fill up the gaps and is case of a lockout or strike to serve as strikebreakers.

We have no hesitation in maintaining that the owner, in the heat of passion, would demand the assistance of the Navy Department. Naval officers would be appealed to to offer their services and it would in many instances be difficult for them to refuse, no matter how degrading they would consider such service. In such a position certainly no naval officer ought ever to be placed. Whether men be in the merchant service or in the Navy, the real appeal is to their patriotism, to their pride of calling or profession, and men who are not capable of responding to that call are not the kind of men that the country can depend upon for defense in time of war.

For the reasons above stated, we earnestly and respectfully appeal to every legislator to insist that these three amendments be adopted.

Most respectfully submitted.

ANDREW FURUSETH,
*President International Seamen's Union of America.*

APRIL 30, 1928.

The CHAIRMAN. Without objection, the pro forma amendment offered by the gentleman from Wisconsin will be withdrawn.

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the Delegate from Hawaii.

The amendment was agreed to.

The Clerk concluded the reading of the bill.

The CHAIRMAN. The question is on agreeing to the committee substitute for the Senate bill as amended.

The committee substitute as amended was agreed to.

Mr. WHITE of Maine. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CRAMTON, Chairman of the Committee of the Whole House on the state of the Union, reported that the committee having had under consideration the bill (S. 744) to further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States, and for other purposes, had directed him to report the same back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. WHITE of Maine, a motion to reconsider the vote by which the bill was passed was laid on the table.

PERMISSION TO ADDRESS THE HOUSE

Mr. STEVENSON. Mr. Speaker, I ask unanimous consent that on Tuesday, after the reading of the Journal and the disposition of matters on the Speaker's table, I may have 15 minutes to discuss the recent assumption of jurisdiction by the Interstate Commerce Commission over interurban railroads.

The SPEAKER. The gentleman from South Carolina asks unanimous consent to address the House for 15 minutes, after the reading of the Journal and the disposition of matters on the Speaker's table, on Tuesday. Is there objection?

There was no objection.

THE MINING AND MINERAL INDUSTRY OF THE UNITED STATES

Mr. ENGLEBRIGHT. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of mining and the mineral industry of the United States.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ENGLEBRIGHT. Mr. Speaker and Members of the House, as a member of the Committee on Mines and Mining of this House, I feel that it is my duty to bring to the attention of Congress and the American people the fact that our Government is giving but little support to the vital mining and mineral industry of the United States.

Mining, next to agriculture, is the greatest industry of our country. It ranks second only to the agricultural industry in its contributions to our raw materials. The value of the raw materials produced by the mining industry of this Nation amounts to over $6,000,000,000 annually and provides direct support to over 10,000,000 of our people.

Mineral development and production is no less fundamental than is agriculture. It is the use of minerals in quantity that sets off the present civilization from the primitive peoples who lived on the products of their fields and flocks. Mining is essential to the advancement of mankind and to the progress of civilization.

The wealth of the mines from the dawn of time is the epic of the song and story of human advancement, of man's march along the paths of progress. Show me a people without mines and I will show you a people deep in the mire of poverty and a thousand years behind the procession of civilization. It was the mines that made the greatness of the past; that made the ancient civilizations; that made Egypt great; that made Greece great; that made Rome great; and in modern times the mines have made England and the United States great beyond the dreams of avarice.

The very existence of present-day economic life among the more highly industralized nations rests upon the continued production and consumption of the energy-producing minerals used as fuels and of metals and nonmetals. It is because the free use of fuels and metals permits the highest known production of useful goods per unit of human energy that there is in the United States and parts of Europe to-day the largest amount of distributable goods per capita ever known over any considerable period or area. Abandon mining and the value of every commodity would be insignificant, humanity would sink back to the barter and exchange age. It would be the greatest calamity that ever befell the human race.

This Nation's business of mining, treating, and using minerals must be jealously protected. Our age is dominantly a mineral age. Our future national security and prosperity are largely dependent upon the future of our mineral production.

The records of mining on the American continent form by no means the least interesting chapter in its history. The expectation of finding a land possessing greater treasures of gold and silver than existed elsewhere largely led to the discovery of the New World and was the predominating motive in the first settlements of most of it. This is especially true of South America. These golden dreams were not destined to be a disappointment, for a land had been reached whose realities of metallic wealth were capable of satisfying an almost boundless desire. Under Spanish rule the mines of Mexico and South America poured forth their treasure of silver and gold and deluged Europe with an amount of these metals far beyond anything ever before dreamed of.

The mines of South America had been worked for nearly a century before the first settlements took place upon the shores of the north Atlantic coast in what is now the United States. The early colonists of this country, it would appear, did not direct their attention to its vast mineral wealth. They confined themselves chiefly to agricultural and mechanical pursuits.

The first to turn attention to the mineral resources of the Colonies seems to have been Governor Winthrop, of Connecticut, who, from 1650 to 1660 was engaged at intervals in examining and prospecting various metalliferous deposits of the Connecticut Valley in the vicinity of Haddam and Middletown. In 1657 he obtained from the Government a license conferring on him unlimited powers for working any mines of—

lead, copper, or tin, or any minerals: As antimony, vitriol, black lead, alum, salt, salt-springs, or any other the like.

In 1661 he obtained another special grant for any mines he might further discover at or near Middletown. It was from the researches of his grandson, John Winthrop, and among the specimens he collected that the mineral columbite was found, as also the new metal, columbium. About the same period an argentiferous lead mine was being worked. In 1852 this mine was again opened, when it was found that the shaft had been sunk to a depth of 125 feet, and that the entire excavation had extended to a length of 1,500 feet, and showed extraordinary mining ability.

In 1660 it was discovered that the region about Lake Superior possessed considerable mineral wealth, as it appears from the reports of the Jesuits settled thereabouts that some attempts were made to mine copper.

In 1700 Le Sueur started to explore the Mississippi River, expressly with the view of making discoveries of the metals, and found the lead deposits in the vicinity of Dubuque, Iowa.

In 1702 the first blast furnace in the Colonies was built near the mouth of Mattakeeset Pond, in Plymouth County, Mass., by an English immigrant named Lambert Despart. Other furnaces were soon afterwards erected to work the bog ores which were abundant in the locality. About the same period ore of similar character was discovered in Rhode Island and blast furnaces erected. In 1715 Maryland, Virginia, and Pennsylvania followed with similar plants. These enterprises were looked upon with disfavor by the mother country, and in 1719 the erection of rolling or slitting mills was forbidden by act of Parliament, which became a law in 1750.

In 1709 the first chartered mining company in the United States came into existence. The charter was issued to a company formed for the purpose of working copper ores at Simsbury, Conn. A prosperous business for several years was conducted in shipping ores to England. The success of the company seems to have led to the discovery of the same type of ore in a similar geological condition at Belleville, N. J., where the Schyler mine was developed in 1719.

In 1732 the first mine was opened in Pennsylvania, the Gap copper mine, in Lancaster County. In 1754 a successful lead mine was in operation in Wythe County, western Virginia.

Between 1750 and 1760 the New Jersey copper mines attracted considerable attention. In 1762 the cobalt mine in Chatham, Conn., was worked, and about the same time the lead mine at Southampton, Mass., was developed. None of these enterprises seem to have been conducted with much success.

In 1774 Dubuque commenced operations in the upper Mississippi lead mines. During the early part of the nineteenth century nuggets of gold were occasionally found in North Carolina, and from 1824 on the search for this metal was carried on there to some extent. In 1829 and 1830, however, it became quite general through the Southern States, and considerable excitement was raised on the subject. Up to this time the attempts at regular mining had been few and far between. It is true that developments had been made in various localities, but no extensive, permanent, and productive metal mines had been opened. The lead region of the West was indeed producing largely, but such was the nature of the occurrence of the ores that systematic working and large developments were not brought about.

But in the meantime the importance of our coal and iron had begun to be appreciated and their production was increasing with rapidity. In 1820 the first cargo of anthracite was sent to Philadelphia, and in 1847 our annual consumption had nearly reached 3,000,000 tons, while our production of iron was over 500,000 tons, placing us on a level with France and only inferior to Great Britain as an iron-manufacturing country.

In 1844 a new region was opened to the miner around Lake Superior. Thither miners and speculators bent their steps, and after a few years of wild excitement and haphazard investments the business of copper mining became firmly established.

In 1849 the United States was electrified over the news of the discovery of gold in California. The production of gold in California in 1849, one year after Marshall's discovery, was $10,000,000; the output annually increased rapidly, and for the year 1852 the production was over $81,000,000. California's wealth of gold surpasses anything yet known to have been discovered, and in its influence on the march of the world is to be ranked among the great events of modern times. The discovery of gold in California gave an impetus not only to searching for this metal but to mining enterprises of all kinds throughout the whole United States, and laid the foundation for the systematic and economic development of our mineral resources.

Since 1880, the beginning of complete record, the total value of the annual output of minerals in the United States has risen from about one-third of a billion dollars to over $6,000,000,000 and totals nearly $100,000,000,000.

The total mineral products of the United States for the year 1926 was as follows:

*Mineral products of the United States: Quantities and values, 1926*

| Product | Quantity | Value |
|---|---|---|
| **METALLIC** | | |
| Aluminum | | $37,583,000 |
| Antimonial lead [1] short tons | 22,524 | 3,917,000 |
| Antimony [2] do | 2,693 | [2] 856,000 |
| Bauxite long tons | 392,250 | 2,415,000 |
| Cadmium pounds | 810,428 | 430,000 |
| Chromite long tons | 141 | 2,000 |
| Copper, [3] sales value 1,000 pounds | 1,739,622 | 243,547,000 |
| Ferro-alloys long tons | 689,258 | 61,368,000 |
| Gold 1,000 troy ounces | 2,335 | 48,270,000 |
| Iron: | | |
| Ore [4] 1,000 long tons | 69,293 | 174,016,000 |
| Pig do | 38,181 | 749,633,000 |
| Lead (refined), [3] sales value short tons | 680,685 | 108,910,000 |
| Manganese ore (35 per cent or more Mn.) [6] long tons | 46,258 | 1,229,000 |
| Manganiferous ore (3 to 35 per cent Mn.) [6] do | 1,235,431 | 3,138,000 |
| Mercury flasks 75 pounds net | 7,642 | 702,000 |
| Mercury ore short tons | 51,000 | (7) |
| Nickel (value at New York City) | 306 | 224,000 |
| Ores (crude), tailings, etc.: | | |
| Copper 1,000 short tons | (7) | (7) |
| Copper-lead and copper-lead-zinc do | (7) | (7) |
| Dry and siliceous (gold and silver) do | (7) | (7) |
| Lead do | (7) | (7) |
| Lead-zinc do | (7) | (7) |
| Zinc do | (7) | (7) |
| Platinum and allied metals (value at New York City) troy ounces | 84,981 | 9,211,000 |
| Silver 1,000 troy ounces | 62,719 | 39,136,000 |
| Tin (metallic equivalent) short tons | 8 | 10,000 |
| Titanium ore (rutile) do | (8) | (8) |
| Tungsten ore (60 per cent concentrate) short tons | 1,382 | 920,000 |
| Uranium and vanadium ores do | 31,624 | 329,000 |
| Zinc, [3] sales value | 611,991 | 91,799,000 |
| Total metallic products (approximate) | | 1,402,920,000 |
| **NONMETALLIC** | | |
| Arsenious oxide short tons | 11,805 | 674,000 |
| Asbestos do | 1,358 | 135,000 |
| Asphalt do | 1,960,340 | 19,938,000 |
| Barite (crude) do | 232,875 | 1,743,000 |
| Borates do | 115,970 | 3,128,000 |
| Bromine 1,000 pounds | 1,246 | 427,000 |
| Calcium-magnesium chloride short tons | 82,340 | 1,710,000 |
| Cement, 1,000 barrels (376 pounds net) | 164,219 | 280,784,000 |
| Clay: | | |
| Products | | (9) (10) |
| Raw 1,000 short tons | 3,852 | [5] 13,540,000 |
| Coal: | | |
| Bituminous [11] do | 578,290 | 1,272,000 |
| Pennsylvania anthracite 1,000 long tons | 75,391 | 474,164,000 |
| Coke [5] 1,000 short tons | 55,863 | (5) (7) |
| Diatomaceous (infusorial) earth and tripoli short tons | 106,242 | 1,482,000 |
| Emery do | 386 | 4,000 |
| Feldspar (crude) long tons | 209,989 | 1,607,000 |
| Fluorspar short tons | 128,657 | 2,341,000 |
| Fuller's earth do | 234,152 | 3,356,000 |
| Garnet for abrasive purposes do | 6,397 | 524,000 |
| Gems and precious stones | | (14) |
| Graphite: | | |
| Amorphous short tons | 2,975 | 41,000 |
| Crystalline 1,000 pounds | 4,989 | 179,000 |
| Grindstones and pulpstones short tons | 38,339 | 1,873,000 |
| Gypsum 1,000 short tons | 5,635 | 46,721,000 |
| Lime do | 4,580 | 40,800,000 |
| Magnesite (crude) short tons | 133,500 | 1,201,000 |
| Mica: | | |
| Scrap do | 7,667 | 131,000 |
| Sheet 1,000 pounds | 2,135 | 394,000 |
| Millstones | | $46,000 |
| Mineral paints: | | |
| Natural pigments [12] short tons | (12) | (12) |
| Zinc and lead pigments [13] do | 184,289 | 25,896,000 |
| Mineral waters 1,000 gallons | (14) | (14) |
| Natural gas 1,000,000 cubic feet | 1,320,000 | 294,000,000 |
| Natural-gas gasoline 1,000 gallons | | 136,000,000 |
| Oilstones, etc short tons | 1,640 | 218,000 |
| Peat do | 61,935 | 364,000 |
| Petroleum 1,000 barrels (42 gallons) | 766,504 | 1,440,000,000 |
| Phosphate rock 1,000 long tons | 3,210 | 10,894,000 |

*Mineral products of the United States: Quantities and values, 1926*—Continued

| Product | Quantity | Value |
|---|---|---|
| NONMETALLIC—continued | | |
| Potash ($K_2O$)—short tons | 25,000 | $1,083,000 |
| Pumice—do | 53,887 | 209,000 |
| Pyrites—long tons | 166,559 | 617,000 |
| Salt—1,000 short tons | 7,372 | 25,055,000 |
| Sand: | | |
| Glass—do | 2,000 | 3,200,000 |
| Molding, building, etc., and gravel—do | 166,000 | 103,300,000 |
| Sand-lime brick—thousands | [8] 330,586 | [8] 3,981,000 |
| Silica (quartz)—short tons | 27,743 | 274,000 |
| Slate—do | 718,000 | 12,353,000 |
| Stone—1,000 short tons | 124,000 | 184,800,000 |
| Sulphur—1,000 long tons | 2,073 | 37,300,000 |
| Sulphur acid (60° Baumé) copper and zinc smelters—1,000 short tons | 1,068 | 8,274,000 |
| Talc and soapstone—short tons | [17] 181,568 | [17] 2,111,000 |
| Total nonmetallic products (approximate) | | 4,852,000,000 |
| SUMMARY OF VALUES | | |
| Metallic products | | 1,402,920,000 |
| Nonmetallic products (exclusive of fuels) | | 1,231,800,000 |
| Mineral fuels | | 3,620,200,000 |
| "Unspecified" (metallic and nonmetallic) products partly estimated | | 7,080,000 |
| Grand total (approximate) | | 6,262,000,000 |

[1] From both domestic and foreign ores.
[2] Content of antimonial lead. Values excluded from metallic totals, as the values of the antimony are included in the antimonial lead values.
[3] Product from ores only
[4] Value not included in total value, since value of product derived therefrom, or of raw material used, is accounted for under other items.
[6] Including ore used for fluxing.
[7] Figures not available. Value of products derived from these included elsewhere.
[8] Value included in total value of metallic products. Bureau of Mines not at liberty to publish figures.
[9] Figures obtained through cooperation with Bureau of the Census.
[10] Figures not yet available. Estimate of value included in total value of nonmetallic products.
[11] Includes brown coal and lignite, and anthracite mined eleswhere than in Pennsylvania.
[12] Canvass discontinued after 1915. Value of iron ore sold for paint included under "Unspecified."
[13] Sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide.
[14] No canvass. Estimate of value included in total value of nonmetallic products.
[17] Talc only.

Source: Bureau of Mines, Department of Commerce.

The mineral industry of the United States employs approximately 2,200,000 workers, distributed through its different branches as follows:

| | |
|---|---|
| Metal mining | 126,000 |
| Metallurgical plants | 75,000 |
| Coal mining | 750,000 |
| Coke ovens | 22,000 |
| Quarry industry | 92,000 |
| Oil industry | 735,000 |
| Blast furnace and mills | 400,000 |
| Total | 2,200,000 |

With the usual assumption of a family of five for each worker, the total number of people directly dependent on the mining industry is approximately 11,000,000.

The industry has a greater importance than even these figures indicate. It is understood, of course, that the raw mineral products are rarely in a form which suits the needs of final consumers. In short, they must pass through a series of stages of production.

When the raw materials of our mines emerge from manufacture with the added expenditure of labor and capital upon them, they have a wholesale value of over $22,000,000,000, as indicated by the following:

| Manufacturers, by groups of industries | Census year | Wage earners, average number | Value of products |
|---|---|---|---|
| Metals and metal products other than iron and steel | 1925 | 275,292 | $2,833,770,000 |
| Iron and steel and their products, not including machinery | 1925 | 861,270 | 6,461,688,000 |
| Chemicals and allied products | 1925 | 381,075 | 6,438,027,000 |
| Stone, clay, and glass products | 1925 | 353,036 | 1,640,652,000 |
| Machinery, not including transportation equipment | 1925 | 858,843 | 5,020,281,000 |
| Total | | 2,719,516 | 22,394,481,000 |

In this, the second stage of application, the mineral products give employment to an additional two and a half million workers and support to about twelve and a half million more people.

A large portion of these manufactured commodities must filter through the retail trade; and from this distribution arises the support of many more millions of our population.

The raw materials from the mines supply 52 per cent of the freight carried by the class A railroads of the United States, and with the products of first stages of manufacture, 68 per cent.

It is estimated that the products of the mineral industry when they reach the consumer with transportation, manufacturing, and distribution costs added have about the same value as the products of agriculture—each, then, thus contributing about one-quarter of the total value of all of our national products.

The United States is more nearly self-sustaining in regard to mineral commodities as a whole than any other country on the globe. The following statement summarizes qualitatively our position:

Minerals of which our exportable surplus dominates the world situation: Copper and petroleum.

Minerals of which our exportable surplus constitutes an important but not a dominant factor in the world trade: Sulphur, phosphates, silver, iron and steel, coal, cement, uranium and radium.

Minerals of which our exportable surplus is not an important factor in world trade—small amounts of most of these minerals have been imported because of special grades, or cheaper sources of foreign supply, but these imports are for the most part incidental: Lead, zinc, aluminum and bauxite, gold, tungsten, molybdenum, asphalt and bitumen, pyrite, fluorspar, building stone (except Italian marble), cadmium, gypsum, lime, tripoli and diatomaceous earth, mineral paints (except umber, sienna, and ocher from France and Spain), pumice, granite, salt (except special classes), talc, arsenic, bismuth, bromine, artificial abrasives, corundum and emery (except Naxos emery), fuller's earth, mercury.

Minerals for which the United States must depend almost entirely on other countries: Tin, nickel, platinum, and metals of the platinum group.

Minerals for which the United States will depend on foreign sources for a considerable fraction of the supply: Antimony, vanadium, zirconium, mica, monazite, graphite, asbestos, ball clay and kaolin, chalk, cobalt, Naxos emery, grinding pebbles.

Minerals normally imported into the United States which in the future can be largely produced from domestic sources if it seems desirable: Nitrates (except potassium nitrates), potash, manganese, chromite, magnesite.

The classes named overlap to some extent, and it is to be expected that some of the commodities placed in one class may in the near future be transferred to another. Any judgment as to future demands or available surpluses must take into account several factors which can not be accurately measured, such as financial conditions in foreign countries, possible tariffs, and foreign competition. For this reason the foregoing statement should be regarded as only tentative.

That the mining industry might have adequate scientific aid, this Government founded in 1879 the United States Geological Survey and in 1910 the Bureau of Mines. These departments have repaid manyfold the funds expended in their support. They have performed valuable pioneer work, which has returned millions and millions of dollars to Government and industry. No branch of Federal activity has yielded more direct beneficial results than the Geological Survey and the Bureau of Mines.

The basic subjects of the Geological Survey's investigations and the material upon which the mining industry is founded are one and the same thing—the earth and the minerals that come out of it.

The investigations of the geologic branch touch directly the heart of the mining industry. Mining, which has to deal with geologic formations, deposits, and structures, is obviously dependent on geologic study for the solution of some of its fundamental problems. These problems extend far beyond the limits of a single mine and can be solved only by the study of an entire district, or even of a region including several districts. The topographic branch has charge of the making of the topographic map of the United States. The activities of the conservation branch are directed toward the wise development and use of the vast, but still imperfectly known, mineral resources of the public domain. The water-resources branch studies the ground waters, and conducts the measurement of stream flow. The section of nonmetals and of fuels conducts investigations that contribute to the discovery and mining of such deposits as phosphate, potash, cement materials, gypsum, asbestos, coal, petroleum, and oil shale. The sections of petrology and of paleontology and the division of chemistry and

physics make studies and analyses that are of basic importance and assistance.

The purposes of the Bureau of Mines as set forth by Director Scott Turner are as follows:

The service rendered by the Bureau of Mines to the Nation's great mineral industry lies within the broad fields of endeavor; conservation of the life and health of the million miners and quarrymen and the million or so workers in the metallurgical and petroleum industries; and the efficient production and utilization of the minerals which these millions of men labor to exploit for the comfort and welfare of mankind.

The Bureau of Mines was established to investigate the technology of the mining, treatment, and utilization of mineral substances; also to improve health conditions and increase safety amongst the workers; to increase efficiency and economic development and reduce the element of waste in the mining and metallurgical industries. The bureau's work of testing machinery, fuels, and explosives; on betterment of working conditions in mines and training in first-aid mine rescue work; and on improving metallurgical and mining methods has been of great fundamental importance to the industry.

To sum up briefly the activities of the two departments, with their relation to the mineral industry, it might be stated that the Geological Survey is charged with the discovery, development, and conservation of our mineral resources, while the Bureau of Mines is charged with effecting the maximum recovery of value.

As heretofore stated, since 1880 the value of the annual production of minerals in this country has increased from about one-third of a billion dollars to over $6,000,000,000, and totals almost $100,000,000,000. This eighteenfold increase is divided unevenly as between the metallic and nonmetallic products. The value of the metallic products increased about sevenfold and of the nonmetallic products about thirty-five fold. The individual mineral industries disclose wide differences of growth and some have and are rapidly declining.

A large percentage of the metal-mining industry in the United States has reached a somewhat critical and baffling stage. The pioneer period has passed. In a country before the virgin mineral resources are developed simple methods of prospecting often reveal large mineral deposits in rapid succession, many of them exposed on the surface and only awaiting the prospector's pick. Many of the deposits of this country were thus discovered and developed into large and productive mines, which have passed through the successive stages of cheap mining of rich oxidized ores at the surface to the mining of primary ores at depth where the cost of recovery, even with the best of modern methods, may soon exceed the market value of the product. As time has passed, fewer and fewer new deposits have been found. By far the greater number of the big metal mines of the United States were in operation within two generations after the discovery of gold in California. The finding of new ore bodies, on the whole, is becoming more difficult and the difficulty may be expected to increase. The problem of maintaining production involves increasing skill in ore finding and increasing skill in the use of lower-grade material. The leaders in the mineral industry are acutely aware of this necessity, even though the rest of the country may be resting in contented oblivion of the facts. The present problems of metal mining are great. Mr. Speaker, I challenge anyone here present to name half a dozen great mines that have been developed in the last decade. The industry is rapidly changing. To sustain production now, large mines, low costs, and big outputs are essential. The exhaustion of bonanzas, the depletion of those resources and conditions that readily attract the prospector and pioneer, have brought about a condition that introduces great organic, financial, mechanical, and scientific problems.

The mining industry vitally needs every assistance that can be rendered to it by the United States Geological Survey and the Bureau of Mines. These two governmental agencies, within the means of their comparatively very limited annual appropriations, are doing their utmost to meet the demands made upon them, for it is realized that the maintenance of metal mining is not merely an ambitious local project; it is part of a necessary national program to safeguard the continuance of national prosperity.

The best protection for the future apparently lies in the development of technology. There are two ways to add to the available mineral resources. The first is to discover additional bodies of material of the grade now being worked. This requires the development of new methods of prospecting and the accumulation, coordination, and analysis of additional geological data. The second method of adding to our resources is to improve methods of mining, milling, treatment, management, and financing so as to make available ore that is now considered waste rock. This has been done and can be done. Millions of tons of "ore" was added to the reserves of the Homestake Mine when cyanidation was made applicable there as effectively as though a new ore body had been found. With changes in mining methods which resulted in lower costs at the Miami Mine other millions of tons of ore came into being. The whole success of the so-called porphyry coppers, now the main reliance of the world for copper, was obtained by adapting methods so as to make available as ore that was of no value before because of the cost of production. Even so, 30 per cent of the copper now coming out is produced from material of such low grade that it was not taken into account when the first great porphyry mine was put into operation. New applications of selective flotation have added greatly to the available tonnage of lead and zinc within the last three years, and many other instances might be sighted to prove that research actually does result in greater and more economical production.

National promotion of the collection and dissemination of scientific knowledge has long been a fundamental policy of our Government. Research in order to apply the result of scientific study to industry has likewise been accepted as a responsibility of general government.

As has been demonstrated, the products of the mineral industry, when they reach the consumer, contribute about one-quarter of the total value of all our national products, and the agricultural products likewise about one-quarter. At the present time the raw products of agriculture are valued at about $12,000,000,000 annually. The Federal Government provides for the Department of Agriculture annual appropriations of about $128,000,000, yet the mineral industry with its annual production of raw materials valued at $6,000,000,000 and directly supporting 11,000,000 people, with its manufactured products valued at $22,000,000,000 and supporting an additional 12,500,000 people, only received for its advancement from the Federal Government annual appropriations of about $4,000,000. The importance of mining and the problems confronting the industry surely demands that appropriations for development and research in its behalf should be more than one thirty-seventh of the amount appropriated for agriculture. Gentlemen of the House, by this statement I do not in any manner intend to reflect upon the necessity of the amounts appropriated for the advancement of the agriculture industry.

The appropriations made for agriculture are wisely made and necessary for the proper protection and development of that great industry. I am only endeavoring to impress upon you by direct comparison, and rightly so, the fact that the mining and mineral industry of this Nation is not receiving from Congress the recognition and support that as a great basic industry it deserves and should receive. The difference between $128,000,000 and $4,000,000 is too obvious for comment. The importance of both agriculture and mining are equally obvious.

From a national standpoint there are a vast number of problems affecting the mining and mineral industry which await study and solution. In the United States, we now have the largest per capita consumption of coal, iron, copper, lead, zinc, and a long list of other minerals. This per capita consumption increases yearly so that, aside from any production for export and as a basis for foreign trade, our mines must be prepared to produce larger and larger amounts of all the common minerals, increasing not only in direct proportion to population, but at a substantially higher ratio. Between a fixed limited supply and a steadily growing demand there is an irreconcilable discrepancy. It matters little whether the known supply in reserve can be measured in terms of 5 or 10 years, although for many of the important minerals the known reserves of ore would fall somewhere within that period. Whatever the period, it remains true that within the lifetime of those now living it will be necessary to find large supplies now undiscovered and to make major changes in technology to permit production from grades now far below the economic limit.

Large amounts of iron ore, too low grade to profitably work under present practice, await the discovery of economical methods of concentration.

The future development of a profitable iron and steel industry on the Pacific coast depends largely on the efforts of the technical investigator.

In northern Minnesota immense tonnages of manganese are being marketed as a part of the iron ore in which they occur. This mineral is essential in the manufacture of steel. Proper research should be able to economically recover and make this indispensable mineral an asset.

In 1915 the gold production of this country was $101,035,700. Since the said year our annual gold production has rapidly and steadily declined. In 1926 the gold production of the

country was $48,270,000, representing a decline of over 50 per cent in 10 years. At the present rate of decline within a comparatively short period of years, the United States will become practically a nongold producing Nation. The present decrease of gold production demands serious consideration, as the maintenance of a sufficient gold reserve is essential to the security of our national finance and credit. The United States is at present the most favored nation in regard to gold reserves, holding over $3,000,000,000, or more than one-third of the gold stock of the world, but it has contracted debts on a gold basis of many times that existing before the war.

Since the outbreak of the World War prices of all commodities have increased greatly except that of gold, which as the standard of value is fixed at $20.67 per ounce. Thus the purchasing power of gold has diminished as the price of other commodities has risen. The great increase in the cost of gold mining has discouraged new enterprises and curtailed existing operations. Many mines have been compelled to close. Most of the mines that have continued operations have been able to do so only by practicing the most rigid economy and by the curtailment of development work. Every possible assistance in the way of legislation, both Federal and State, must be given to the gold-mining industry. The Government, through the Bureau of Mines, should also assist in improving the methods of mining and metallurgy of gold ore, particularly in the treatment of complex and low-grade ore. A wide field of work is presented here. It is time that a really serious effort should be made to solve the gold-production problem.

The United States still lacks in the development of adequate supplies of a number of highly essential minerals, such as tin, platinum, nickel, chromium, quicksilver, antimony, potash, and nitrates. The discovery of reserves of these highly important minerals, or the devising of methods of substitution, furnishes important fields of investigation.

The possibilities of substitution of abundant minerals for rare minerals is one of which we know little. The competition of mineral with mineral is of large, but little understood, importance. How the properties of metals can be changed by alloying with others and other similar problems demand solution.

The United States produces approximately two-thirds of the world's supply of petroleum, yet under present production methods something like 75 per cent of the oil is left unrecovered in the ground. Here is a most important subject for investigation.

In the Lake Superior country, both on the iron ranges and in the copper district, there is a definite and known limit of the tonnage that can be shipped, unless we have new methods of finding ore and new processes of treatment of material too lean to come at present within economic limits.

Nearly one-third of the Nation's enormous coal reserves are in the form of lignite, which underlies vast areas in the Northwest, in Texas, and other regions. Much is yet to be done to devise methods for making available this enormous deposit for commercial use.

Extensive research work is yet necessary to commercially make available the oil contained in mountains of oil shale that extend through our Western States.

The Bureau of Mines has many problems pending before it for solution, on which it has been unable through lack of appropriations to make a start—some of the typical problems being as follows:

Study of hydrometallurgy of low-grade manganese ores.
Studies of permissible or desirable explosives for use in metal mines (at present the study being confined to coal mining).
Geophysical methods of prospecting.
Studies of mining methods and costs.
Methods of mine sampling and valuation.
Various problems of more effective fuels utilization.
Beneficiation of fuels, notably washing of coal.
Methods of beneficiation of low-grade iron ores.
Improvements in blast furnaces and blast-furnace practice.
Experiments along the lines of selective flotation.
Problems of support of roof and underground workings, including ground subsidence, as affecting mining.
Recovery of elemental sulphur from smelter fumes.
Recovery of potash from the great salt beds of the Southwest.
Studies of American coals from the point of view of gas and by-product production.
Increased study of physical chemistry of steel making.

In the marketing of minerals and mineral products, there is a marked lack of well-selected records and sifted data.

Many important projects are pending before the United States Geological Survey for study and field investigation. As an illustration, the following list of projects have been considered from time to time, but in spite of their recognized merit and importance, through lack of appropriations, no work has been possible:

AREAL GEOLOGY

Geology of Death Valley, Calif.
Geologic map of Utah.
Geologic guide to Grand Canyon region.
Geologic guide to Yellowstone National Park.
Areal geology, Lowry Peak quadrangle, Nevada.
Correlation of Jura-Trias in Rocky Mountain region.
Correlation of Permian beds of Rocky Mountain region.
Physiography of the lower Mississippi River basin.
Areal geology of northwestern Connecticut.
Relations of geology and gravity anomalies.

GEOLOGY OF THE METALLIFEROUS MINERALS

Mining districts of Montana.
Mining districts of Idaho.
Mining districts of California.
Mining districts of Arizona.
Mining districts of Utah.
Geology and geophysical methods of prospecting.

IRON AND STEEL METALS

Iron ores of Lake Superior region.
Western iron ores.
War minerals (chrome, manganese, flourspar, tungsten, molybdenum, etc.).

NONMETALS

Building stones.
Concrete materials.
Salines.
Abrasives, diatomaceous earth, etc.
Gems and semiprecious minerals.

FUELS

Appalachian coals.
Fundamentals of coal classification and microstructure of coals.
Western coal field (additional).
Western oil and gas distribution.
Regional structures in relation to oil and gas.
Studies of source rocks of oil and gas.
Oil, gas, and water relations and characters.

All of the problems that have been mentioned and hundreds of others that could be mentioned, Mr. Speaker, if time would permit, which affect the mineral industries are of the utmost national importance.

There is an urgent need for Congress to recognize more seriously the outstanding importance of our mineral resources in maintaining our position in world affairs, and to appreciate that it is due to their wide exploitation that our great national development is to be attributed.

The support now afforded the United States Geological Survey and the Bureau of Mines, in proportion to their responsibilities, and in proportion to the value of the industry which they represent is so small as to constitute evidence of a thorough lack of understanding of the subject. Public opinion will assert itself when it has been sufficiently informed as to the real facts.

In most of the highly developed nations the mineral industry is advanced by every governmental means, and a secretary of mines or the equivalent in rank, occupies in the Cabinet a responsible and important position in the Government. If the American mineral industry is to maintain its position, it must have the benefit of continuous research of the widest and most fundamental character, and in this program the Federal Government must carry its part of the load.

The annual appropriations of the Bureau of Mines and the United States Geological Survey should be materially increased so as to enable them to properly undertake the important work with which they are confronted.

CONSTRUCTION OF RURAL POST ROADS

Mr. COLTON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 3674) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes, and consider the same in the House as in Committee of the Whole. If this consent is granted, I shall then ask unanimous consent to amend by striking out all after the enacting clause and substituting the bill H. R. 7343. The bill that passed the Senate is similar, but there are one or two matters in the Senate bill that may be objectionable to the House, and I feel sure there is no objection to the House bill. It has a unanimous report from the Committee on Roads.

The SPEAKER. The gentleman from Utah asks unanimous consent to take from the Speaker's table the bill S. 3674 and consider the same in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read the title of the Senate bill.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that the Senate bill may be considered as read, inasmuch as the House bill will be a complete substitute.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. COLTON. Mr. Speaker, I now offer the amendment.

The SPEAKER. The gentleman from Utah offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. COLTON: Strike out all after the enacting clause and insert:

That for the purposes of carrying out the provisions of the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, and all acts amendatory thereof and supplementary thereto, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the construction, by the Bureau of Public Roads, of the main roads through unappropriated or unreserved public lands, nontaxable Indian lands, or other Federal reservations—

The sum of $3,500,000 for the fiscal year ending June 30, 1929.

The sum of $3,500,000 for the fiscal year ending June 30, 1930.

The sum of $3,500,000 for the fiscal year ending June 30, 1931: *Provided*, That the sums hereby authorized shall be allocated to the States having more than 5 per cent of their area in lands hereinabove referred to, and said sums shall be apportioned among said States in the proportion that said lands in each of said States is to the total area of said lands in the States eligible under the provisions of this act.

SEC. 2. All acts or parts of acts in anyway inconsistent with the provisions of this act are hereby repealed, and this act shall take effect on its passage.

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. COLTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

A similar House bill was laid on the table.

### DEPARTMENT OF AGRICULTURE APPROPRIATION BILL

Mr. DICKINSON of Iowa. Mr. Speaker, I present, for printing under the rule, conference report on the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes.

### POSTMASTERS' SALARIES

Mr. MEAD. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill (H. R. 5837) to increase salaries of the first-class postmasters, and to include therein a report of the Postmaster General on that subject.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. MEAD. Mr. Speaker, I sincerely hope the bill introduced by Mr. SPROUL of Illinois (H. R. 5837) to increase the salaries of a number of postmasters of the larger post offices, which recently received the approval of the House Post Office Committee, as well as the approval of the House itself, will merit the favorable consideration of those whose duty it now is to pass judgment thereon.

The meager compensation of the group of postmasters this bill is intended to increase has for years been a reproach upon our Federal Government. As an illustration of the justice of this bill, let us consider the case of the postmaster of New York City.

The salary of the postmaster at New York was fixed by a special act of Congress more than 50 years ago. By comparing the office of 50 years ago with the office of to-day we find:

| | 1875 | 1927 |
|---|---|---|
| Postal receipts: | | |
| Receipts | $3,166,946.19 | $75,552,970.91 |
| Expenditures | 839,445.82 | 36,240,998.13 |
| Surplus | 2,327,500.37 | 39,303,062.78 |

Personnel assigned, number of employees, 1880, approximately 1,500; 1928, over 18,000.

Stations operated, 1880, 19; 1928, 55.

Receipts for the calendar year 1927 approximated the total appropriations made for conducting the entire Postal Service of the United States at the time the last adjustment of the salary of the postmaster was made, viz, 1875 to 1876.

The volume of business of the New York post office exceeds that of the entire Dominion of Canada.

The volume of business transacted in one month at the present time approximates more than twice the business transacted for the entire year when the salary was first fixed at $8,000 per annum.

The responsibilities of the postmaster increased corresponding to the increase of the volume of business and the personnel, and was also increased by the introduction of the following additional new activities of the Postal Service:

Postal savings established January 1, 1912.

Parcel post inaugurated January 1, 1913.

Government-owned motor-vehicle service added to the postmaster's responsibilities in December, 1917.

Central accounting system in 1920.

Distribution of supplies.

All of these added activities and the growth of the business increase the responsibilities, but no adjustment in salary has been made.

The New York post office has 55 classified stations and 265 contract stations. Over 18,000 employees are required to man the service. That which is true of the New York City post office with regard to the ever-increasing responsibility of the postmaster and the inadequacy of his salary is likewise true concerning the other offices affected by the provisions of this bill.

The following post offices are included in H. R. 5837:

New York, N. Y.; Chicago, Ill.; Philadelphia, Pa.; Boston, Mass.; St. Louis, Mo.; Kansas City, Mo.; Detroit, Mich.; Cleveland, Ohio; Washington, D. C.; Los Angeles, Calif.; San Francisco, Calif.; Brooklyn, N. Y.; Cincinnati, Ohio; Pittsburgh, Pa.; Minneapolis, Minn.; Baltimore, Md.; Milwaukee, Wis.; Buffalo, N. Y.; Indianapolis, Ind.; St. Paul, Minn.; Newark, N. J.; Atlanta, Ga.; Dallas, Tex.; Denver, Colo.; Seattle, Wash.; Des Moines, Iowa; Portland, Oreg.; New Orleans, La.; Omaha, Nebr.; Columbus, Ohio; Rochester, N. Y.; Louisville, Ky.; Springfield, Ohio; Toledo, Ohio; Richmond, Va.; Memphis, Tenn.; Dayton, Ohio; Providence, R. I.; Hartford, Conn.; Nashville, Tenn.; Oakland, Calif.; Houston, Tex.; Syracuse, N. Y.; New Haven, Conn.; Grand Rapids, Mich.; Albany, N. Y.; Fort Worth, Tex.; Birmingham, Ala.; Akron, Ohio; Harrisburg, Pa.; Oklahoma City, Okla.; and Jersey City, N. J.

The Postmaster General sent the following letter to the committee when this measure was considered in the Sixty-ninth Congress:

POST OFFICE DEPARTMENT,
*Washington, D. C., February 17, 1927.*

To the CHAIRMAN COMMITTEE ON POST OFFICES AND ROADS:

Supplementing my letter of February 14, 1927, with reference to the bill (S. 5314) amending the act of February 28, 1925, reclassifying the salaries of postmasters so as to increase the salaries at a number of the larger post offices I have to submit the following:

The basis of fixing the salaries of postmasters at the offices affected had not been changed since the act of March 3, 1883, which fixes the salary of the postmaster of New York at $8,000, until the act of June 5, 1920. In the meantime by special laws the salaries of the postmasters at Chicago, Boston, Philadelphia, and St. Louis were fixed at $8,000. The act of June 5, 1920, modified the act of March 3, 1883, so as to provide that at post offices having gross receipts of $7,000,000 or more the salary of the postmaster shall be $8,000.

The receipts of the New York post office for the year ended December 31, 1926, were $72,670,000, more than sixteen times what they were when the salary was fixed at $8,000. At the time the salary of the postmaster of New York was fixed at $8,000 the revenues of the entire postal service were only $42,818,000. At that time the number of stations or branch post offices was 16. To-day it is 50. Comparatively the same may be said of all other offices affected by the proposed legislation except those which through increasing receipts have been benefited by the act of June 5, 1920. In short, of the 48 offices affected by the proposed legislation based upon the receipts for the year ended December 31, 1925, all except 11 are fixed on the same basis as was provided in the act of March 3, 1883.

It should also be borne in mind that the money-order business has increased enormously in the period since the basis for fixing these salaries was fixed and the postal-savings bank has been established, both of which features are not reflected in the postal receipts.

In my judgment the legislation proposed is conservative in view of the vastly greater responsibility imposed on these postmasters.

Sincerely yours,

HARRY S. NEW, *Postmaster General.*

From the frank statement of the Postmaster General we can readily appreciate the unanimity of action which characterized the consideration of the bill by our committee.

In a more recent letter, addressed to the Director of the Bureau of the Budget, the Postmaster General explains the provisions of the bill in greater detail and concludes by saying its passage is fully justified:

MARCH 14, 1928.

Hon. HERBERT M. LORD,
*Director Bureau of the Budget.*

SIR: Pursuant to Budget regulations I am submitting a copy of a bill (H. R. 5837) to increase the salaries of postmasters at a number of the larger post offices, with request for information as to whether the legislation proposed is in conflict with the financial program of the President.

The basis of fixing the salaries of postmasters at the offices affected had not been changed since the act of March 7, 1883, which fixed the salary of the postmaster of New York at $8,000 until the act of June 5, 1920. In the meantime by special laws the salaries of the postmasters at Chicago, Boston, Philadelphia, and St. Louis were fixed at $8,000. The act of June 5, 1920, modified the act of March 3, 1883, so as to provide that at post offices having gross receipts of $7,000,000 or more the salary of the postmaster shall be $8,000. It provides also that the salaries of postmasters at post offices where the gross receipts amount to $600,000, but are less than $7,000,000, shall be $6,000. Thus the salaries of the postmasters of Pittsburgh, Pa., and New York, N. Y., are $8,000 and the receipts for the calendar year ended December 31, 1927, were $7,683,839 and $75,549,362, respectively. The salaries of the postmasters of Erie, Pa., and Minneapolis, Minn., are $6,000, whereas the receipts for the calendar year ended December 31, 1927, were $646,341 and $6,313,402, respectively, and the number of employees 128 and 1,042, respectively.

Under the provisions of the proposed legislation there is no change in grades and salaries except at offices where the receipts are $600,000 or more. The changes proposed correct the inequitable adjustment described above and are as follows:

| | |
|---|---|
| $600,000, but less than $1,500,000 | $6,000 |
| $1,500,000, but less than $3,000,000 | 7,000 |
| $3,000,000, but less than $7,000,000 | 8,000 |
| $7,000,000, but less than $10,000,000 | 9,000 |
| $10,000,000, but less than $20,000,000 | 10,000 |
| $20,000,000, but less than $40,000,000 | 11,000 |
| $40,000,000 and upward | 12,000 |

The receipts of the New York post office for the year ended December 31, 1927, were more than sixteen times what they were when the salary was fixed at $8,000, and at that time the revenues of the entire Postal Service were only $42,818,000. At that time the number of stations or branch post offices was 16. To-day it is 54. Comparatively the same may be said of all other offices affected by the proposed legislation, except those which through increasing receipts have been benefited by the act of June 5, 1920.

Of the 107 post offices having receipts of $600,000 or more for the calendar year ended December 31, 1927, the salaries of the postmasters will be increased at 52 offices, involving an additional cost of $82,000, as follows:

| | |
|---|---|
| 2 from $8,000 to $12,000 | $8,000 |
| 1 from $8,000 to $11,000 | 3,000 |
| 5 from $8,000 to $10,000 | 10,000 |
| 6 from $8,000 to $9,000 | 6,000 |
| 17 from $6,000 to $8,000 | 34,000 |
| 21 from $6,000 to $7,000 | 21,000 |
| | 82,000 |

It should be borne in mind that the increased revenues of these officers are affected not only by the expansion of the service conducted in 1883 but by the addition of the parcel-post system, which has greatly added to the responsibility of conducting the business of these large offices. Furthermore, the money-order business has increased enormously in the period since the basis for adjusting these salaries was fixed and the postal-savings bank has been established, both of which features are not reflected in the postal receipts.

In my judgment the legislation proposed is conservative in view of the vastly greater responsibility imposed on these postmasters and its enactment is fully justified.

Very truly yours,

HARRY S. NEW, *Postmaster General.*

In closing, Mr. Speaker, I sincerely trust in view of the fact that this legislation has the support of the Postmaster General as well as the unanimous approval of the committee that no unnecessary delay or parlimentary obstacle will prevent its becoming a law before the adjournment of the present session of Congress.

### LEAVE TO ADDRESS THE HOUSE

Mr. JACOBSTEIN. Mr. Speaker, I ask unanimous consent that on Tuesday next, after disposition of matters on the Speaker's table, I may be permitted to address the House for 20 minutes.

The SPEAKER. The gentleman from New York asks unanimous consent that on Tuesday next, after disposition of matters on the Speaker's table, he may be permitted to address the House for 20 minutes. Is there objection?

Mr. SCHAFER. Reserving the right to object, on what subject?

Mr. JACOBSTEIN. Reapportionment.

The SPEAKER. Is there objection?

There was no objection.

Mr. LEAVITT. Mr. Speaker, I ask unanimous consent to insert at the point of the consideration of the bill S. 3594 an argument setting forth in writing the report of the Committee on Indian Affairs on the bill.

The SPEAKER. The gentleman from Montana asks unanimous consent to insert a report of the committee on the bill which has just passed. Is there objection?

There was no objection.

### GRAND ARMY OF THE REPUBLIC—MEMORIAL DAY SERVICES

Mr. WOOD. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3791) to aid the Grand Army of the Republic in its Memorial Day services May 30, 1928.

The SPEAKER. The gentleman from Indiana asks unanimous consent for the present consideration of Senate Resolution 3791, which the Clerk will report by title.

The Clerk read as follows:

An act (S. 3791) to aid the Grand Army of the Republic in its Memorial Day services May 30, 1928.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.,* That the sum of $2,000 be, and the same hereby is, appropriated to aid the Grand Army of the Republic (Inc.) in its Memorial Day services, May 30, 1928, and in the decoration of the graves of the Union soldiers, sailors, and marines with flags and flowers in the national cemeteries in the District of Columbia and in the Arlington National Cemetery, in Virginia.

SEC. 2. That said fund shall be paid to the quartermaster of the Grand Army of the Republic, Department of the Potomac, for disbursement.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. WOOD, a motion to reconsider the vote was laid on the table.

Mr. CONNERY. Mr. Speaker, I want to ask the gentleman from Indiana a question. The bill just passed provides for the Grand Army, and I want to ask if anything has been done about providing flags on all of the graves at Arlington.

Mr. WOOD. This is to aid the Grand Army of the Republic, which is becoming small in numbers, and the few that are living are very feeble in their services on Memorial Day.

Mr. CONNERY. I understand, and we are all in favor of that; but what I wanted to inquire was if provision has been made for a flag on every soldier's grave on Memorial Day. There ought to be one.

### ORDER OF BUSINESS

Mr. GARRETT of Tennessee. Mr. Speaker, I would like to make an inquiry of the gentleman from Connecticut about a matter that I have been asked about. I have not looked at the order which was made two or three days ago. I believe that really the day was not mentioned, but it provided that the first open day should be Calendar Wednesday.

Mr. TILSON. Yes; and to be utilized by the Committee on the Merchant Marine for three bills which the committee has ready.

Mr. GARRETT of Tennessee. And that means next Tuesday. The matter that I have been inquired about is the conference report on the flood control bill. The idea of quite a number of Members is that it would come up on that day. I suppose the gentleman can not tell on which day it will come up?

Mr. TILSON. I do not think that anyone can tell at this time what day it will come up, except that the chairman said he would not bring it up on Monday.

Mr. LINTHICUM. Is it proposed to take up the Welch salary bill on Monday?

Mr. TILSON. That is a matter of suspension of the rules, and the Speaker will finally decide the question, as is his practice, on Monday morning.

Mr. HASTINGS. Is it understood that the Merchant Marine Committee will have the right on Tuesday under the special order?

Mr. TILSON. Yes.

LEAVE TO ADDRESS THE HOUSE

Mr. LAGUARDIA. Mr. Speaker, I have a speech in my system which I shall feel much relieved to get out. I will ask unanimous consent that I may address the House for 15 minutes after the orders heretofore granted.

The SPEAKER. The gentleman from New York asks unanimous consent that he may address the House for 15 minutes after the remarks of the gentleman from New York [Mr. JACOBSTEIN]. Is there objection?

Mr. CRAMTON. Reserving the right to object, and I shall not object, this will make 50 minutes for Tuesday and possibly one or more conference reports will come up. The Committee on the Merchant Marine and Fisheries have three bills ready, one of which will require some time unless it is modified. I shall not object to this request, but I shall feel obliged to object to any further request that will take time Tuesday.

The SPEAKER. Is there objection?

There was no objection.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled a bill of the following title, when the Speaker signed the same:

H. R. 8229. An act for the appointment of an additional circuit judge for the sixth judicial circuit.

The SPEAKER also announced his signature to an enrolled bill of the Senate of the following title:

S. 3438. An act authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval bills of the House of the following titles:

H. R. 8229. An act for the appointment of an additional circuit judge for the sixth judicial circuit;

H. R. 10536. An act granting six months' pay to Anita W. Dyer; and

H. R. 12733. An act to authorize the refund of certain taxes on distilled spirits.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 43 minutes p. m.) the House adjourned until to-morrow, Sunday, May 6, 1928, at 2 o'clock p. m.

## COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Monday, May 7, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON FOREIGN AFFAIRS

(10.30 a. m.)

To provide for the reorganization of the Department of State (H. R. 13179).

COMMITTEE ON THE DISTRICT OF COLUMBIA

(10.30 a. m.)

To authorize the merger of street-railway corporations operating in the District of Columbia (H. J. Res. 276).

COMMITTEE ON AGRICULTURE

(10 a. m.)

For the prevention and removal of obstructions and burdens upon interstate commerce in cotton by regulating transactions on cotton-futures exchanges (H. R. 11017).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To authorize the Secretary of the Navy to proceed with the construction of certain public works (H. R. 13319).

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

486. A letter from the Secretary of the Navy, transmitting draft of a proposed bill to prohibit the making of photographs, sketches, or maps of vital military and naval defensive installations and equipment, and for other purposes; to the Committee on Military Affairs.

487. A communication from the President of the United States, transmitting supplemental estimate of appropriation the fiscal year 1928, in the sum of $60,000 (H. Doc. No. 264); to the Committee on Appropriations and ordered to be printed. under the legislature establishment, United States Senate, for

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. MORROW: Committee on the Public Lands. H. R. 12113. A bill providing for the acquirement by the United States of privately owned lands situated within certain townships in the Lincoln National Forest, in the State of New Mexico, by exchanging therefor lands on the public domain also within such State; without amendment (Rept. No. 1526). Referred to the House Calendar.

Mr. HILL of Washington: Committee on the Public Lands. H. R. 10657. A bill to authorize the assessment of levee, road, drainage, and other improvement-district benefits against public lands and lands heretofore owned by the United States; without amendment (Rept. No. 1527). Referred to the House Calendar.

Mr. HOUSTON of Hawaii: Committee on the Public Lands. H. R. 10157. A bill making an additional grant of lands for the support and maintenance of the Agricultural College and School of Mines of the Territory of Alaska, and for other purposes; without amendment (Rept. No. 1528). Referred to the Committee of the Whole House on the state of the Union.

Mr. SPEAKS: Committee on Military Affairs. H. R. 13446. A bill to amend the national defense act; without amendment (Rept. No. 1531). Referred to the Committee of the Whole House on the state of the Union.

Mr. DENISON: Committee on Interstate and Foreign Commerce. H. R. 13512. A bill to amend the act entitled "An act to create the Inland Waterways Corporation for the purpose of carrying out the mandate and purpose of Congress, as expressed in sections 201 and 500 of the transportation act, and for other purposes," approved June 3, 1924; with amendment (Rept. No. 1537). Referred to the Committee of the Whole House on the state of the Union.

Mr. LEA: Committee on Interstate and Foreign Commerce. H. R. 10162. A bill for the relief of the land-grant railroad operated between the station formerly known as East Portland, in the State of Oregon, and Roseville, in the State of California; without amendment (Rept. No. 1538). Referred to the House Calendar.

Mr. JENKINS: Committee on Immigration and Naturalization. S. J. Res. 5. A joint resolution to grant a preference to the wives and minor children of alien declarants in the issuance of immigration visas; with amendment (Rept. No. 1539). Referred to the House Calendar.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. KNUTSON: Committee on Pensions. H. R. 13563. A bill granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; without amendment (Rept. No. 1525). Referred to the Committee of the Whole House.

Mr. WARE: Committee on Claims. H. R. 4776. A bill for the relief of Dr. Stanley R. Teachout; with amendment (Rept. No. 1529). Referred to the Committee of the Whole House.

Mr. HALE: Committee on Naval Affairs. H. R. 5995. A bill for the relief of John F. O'Neil; without amendment (Rept. No. 1530). Referred to the Committee of the Whole House.

Mr. RATHBONE: Committee on Claims. H. R. 10125. A bill for the relief of Leo Scheuren; with amendment (Rept. No. 1532). Referred to the Committee of the Whole House.

Mr. RATHBONE: Committee on Claims. H. R. 10126. A bill for the relief of Loretta Pepper; with amendment (Rept. No. 1533). Referred to the Committee of the Whole House.

Mr. JENKINS: Committee on War Claims. H. R. 12638. A bill for the relief of David A. Wright; with amendment (Rept. No. 1534). Referred to the Committee of the Whole House.

Mr. SPEAKS: Committee on Military Affairs. S. 162. An act for the relief of William M. Sherman; without amendment (Rept. No. 1535). Referred to the Committee of the Whole House.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. KNUTSON: A bill (H. R. 13563) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; committed to the Committee of the Whole House.

By Mr. BANKHEAD: A bill (H. R. 13564) to provide that the United States shall cooperate with the States in promoting the health of the rural population of the United States, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GIBSON: A bill (H. R. 13565) to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved July 3, 1926; to the Committee on the Civil Service.

By Mr. GRAHAM: A bill (H. R. 13566) to provide for the appointment of an additional district judge for the northern district of Illinois; to the Committee on the Judiciary.

By Mr. NEWTON: A bill (H. R. 13567) to amend sections 116, 118, and 126 of the Judicial Code; to the Committee on the Judiciary.

By Mr. RATHBONE: A bill (H. R. 13568) to create a prosperity reserve and to stabilize industry and employment by the expansion of public works during periods of unemployment and industrial depression; to the Committee on the Judiciary.

By Mr. JOHNSON of Oklahoma: Joint resolution (H. J. Res. 296) to authorize the erection on the home site of the All American Legion Post, No. 12, just north of the Kiowa Hospital near Lawton, Okla., of a monument to I-See-O; to the Committee on the Library.

Also, joint resolution (H. J. Res. 297) to authorize the erection on the home site of the All-American Indian American Legion Post, No. 12, near the Kiowa Hospital, near Lawton, Okla., of a monument to Chief Quanah Parker; to the Committee on the Library.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 13569) granting an increase of pension to Martha Lamb; to the Committee on Invalid Pensions.

By Mr. BURDICK: A bill (H. R. 13570) granting an increase of pension to Frances M. Lynch; to the Committee on Invalid Pensions.

By Mr. COLE of Maryland: A bill (H. R. 13571) for the relief of certain persons formerly having interests in Baltimore and Harford Counties, Md.; to the Committee on Claims.

By Mr. GUYER: A bill (H. R. 13572) granting an increase of pension to Martha E. Read; to the Committee on Invalid Pensions.

By Mr. HALE: A bill (H. R. 13573) for the relief of Pedro P. Alvares; to the Committee on Naval Affairs.

By Mr. HAWLEY: A bill (H. R. 13574) granting an increase of pension to Sarah A. Stephens; to the Committee on Invalid Pensions.

By Mr. HUDSON: A bill (H. R. 13575) granting a pension to Laura A. Eldred; to the Committee on Invalid Pensions.

By Mr. HUDSPETH: A bill (H. R. 13576) granting a pension to Buck Roberts; to the Committee on Pensions.

By Mr. WILLIAM E. HULL: A bill (H. R. 13577) granting an increase of pension to Katie M. Vandyke; to the Committee on Invalid Pensions.

By Mr. JENKINS: A bill (H. R. 13578) granting a pension to Sarah J. Jones; to the Committee on Invalid Pensions.

By Mr. KURTZ: A bill (H. R. 13579) granting an increase of pension to Jane Fortney; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: A bill (H. R. 13580) for the relief of Barzilla William Bramble; to the Committee on Claims.

By Mr. LOZIER: A bill (H. R. 13581) granting an increase of pension to Emma L. Bruce; to the Committee on Invalid Pensions.

By Mr. MORROW: A bill (H. R. 13582) authorizing and directing the Secretary of the Interior to issue a patent to Lucile Scarborough; to the Committee on the Public Lands.

By Mr. MURPHY: A bill (H. R. 13583) granting an increase of pension to Isabelle Simpson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13584) granting an increase of pension to Emma Teagarden; to the Committee on Pensions.

By Mr. SCHNEIDER: A bill (H. R. 13585) granting an increase of pension to Dolly Matoxen; to the Committee on Invalid Pensions.

By Mr. STALKER: A bill (H. R. 13586) granting a pension to Adalida Austin; to the Committee on Invalid Pensions.

By Mr. TATGENHORST: A bill (H. R. 13587) granting a pension to Joseph Emminger; to the Committee on Pensions.

By Mr. TREADWAY: A bill (H. R. 13588) granting a pension to Jessie L. Clark; to the Committee on Invalid Pensions.

By Mr. WELSH of Pennsylvania: A bill (H. R. 13589) for the relief of Atlantic Refining Co., a corporation of the State of Pennsylvania, owner of the American steamship *H. C. Folger*, against U. S. S. *Connecticut*; to the Committee on Claims.

By Mr. W. T. FITZGERALD: Resolution (H. Res. 186) for the payment of additional compensation to the clerk and Norman E. Ives, expert examiner of the Committee on Invalid Pensions; to the Committee on Accounts.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7433. By Mr. ESTEP: Resolution of the Uhlman-Horne Post, No. 456, Veterans of Foreign Wars, through their secretary, Henry J. Nies, 148 Penn Avenue, Pittsburgh, Pa., indorsing House bill 25, the Dale-Lehlbach bill; to the Committee on the Civil Service.

7434. By Mr. FITZPATRICK: Petition from the Mailers' Union No. 6, International Typographical Union, favoring the passage of the Griest postal bill; to the Committee on the Post Office and Post Roads.

7435. Also, petition from Paper Cutters, Binding Machine Operators, and Embossers Protective Union, No. 119, favoring the passage of the Griest postal bill; to the Committee on the Post Office and Post Roads.

7436. By Mr. GARBER: Petition of W. A. Hoover, commander Disabled Veterans of the World War, and H. Haenel, commander Post No. 169, American Legion, of Outwood, Ky., in support of Senate bill 4041 and House bill 5477; to the Committee on World War Veterans' Legislation.

7437. Also, petition of Colorado River Commission of Arizona, Phoenix, Ariz., in opposition to House bill 5773; to the Committee on Invalid Pensions.

7438. Also, petition of the United Veterans of the Republic, by Charles D. Ray, national commander, Los Angeles, Calif., in support of Senate bill 777 without amendment; to the Committee on World War Veterans' Legislation.

7439. Also, petition of Roy W. Cox, Blackwell, Okla., in opposition to Senate bill 1752; to the Committee on the Post Office and Post Roads.

7440. Also, petition of postmaster, Harry S. Magill, and rural carriers out of Garber, Okla., in opposition to the Oddie bill (S. 1752); to the Committee on the Post Office and Post Roads.

7441. By Mr. KADING: Petition of master butchers, residing at Watertown and other southern Wisconsin cities, requesting that the contemplated fish hatchery and culture station be located at Lake Mills, Wis.; to the Committee on the Merchant Marine and Fisheries.

7442. By Mr. MICHENER: Petition of sundry citizens of Jackson County, Mich., favoring the passage of House bill 11; to the Committee on Interstate and Foreign Commerce.

7443. By Mr. O'CONNELL: Petition of the Disabled American Veterans of the World War, Department of California (Inc.), favoring the passage of the Tyson bill (S. 777); to the Committee on World War Veterans' Legislation.

7444. By Mr. STEDMAN: Petition signed by Mrs. J. H. Fulton and eight residents of Surrey County, N. C., favoring the Sproul bill (H. R. 11410), to amend the national prohibition act; to the Committee on the Judiciary.

7445. By Mr. TAYLOR of Colorado: Petition from citizens of Rifle, Colo., urging legislation for increase of pensions of Civil War soldiers and widows of soldiers; to the Committee on Invalid Pensions.

## SENATE

SUNDAY, *May 6, 1928*

The Senate met at 3 o'clock p. m.

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

When the anxious hearts say, "Where?"
God doth answer, "In My care."
Were they frightened at the last?
No; the fear of death was past.
Do they need our tenderness?
"Where is love like Mine to bless?"
Father, tell us, where are they?
"In My keeping, night and day."

*Now is Christ risen from the dead and become the first fruits of them that slept.*

*For since by man came death, by man came also the resurrection of the dead.*

* * * * * * *

*Behold, I show you a mystery; we shall not all sleep, but we shall all be changed,*

*In a moment, in the twinkling of an eye, at the last trump; for the trumpet shall sound, and the dead shall be raised incorruptible, and we shall be changed.*

*For this corruptible must put on incorruption, and this mortal must put on immortality,*

*So when this corruptible shall have put on incorruption, and this mortal shall have put on immortality, then shall be brought to pass the saying that is written, Death is swallowed up in victory.*

*O death, where is thy sting? O grave, where is thy victory? The sting of death is sin; and the strength of sin is the law.*

*But thanks be to God, which giveth us the victory through our Lord Jesus Christ.*

*Therefore, my beloved brethren, be ye steadfast, unmovable, always abounding in the work of the Lord, forasmuch as ye know that your labor is not in vain in the Lord.*

O Almighty God, who hast knit together Thine elect in one communion and fellowship, in the mystical body of Thy Son, Christ our Lord: Grant us grace so to follow Thy blessed saints in all virtuous and godly living, that we may come to those unspeakable joys which Thou hast prepared for those who unfeignedly love Thee, through Jesus Christ our Lord. Amen.

The grace of our Lord Jesus Christ, and the love of God, and the fellowship of the Holy Ghost, be with us all, evermore. Amen.

### MEMORIAL ADDRESSES ON THE LATE SENATOR FERRIS

Mr. COUZENS. Mr. President, I offer the resolutions which I send to the desk and ask for their adoption.

The VICE PRESIDENT. The resolutions will be read.

The resolutions (S. Res. 227) were read, considered by unanimous consent, and unanimously agreed to, as follows:

*Resolved*, That the Senate has heard with profound sorrow of the death of Hon. WOODBRIDGE N. FERRIS, late a Senator from the State of Michigan.

*Resolved*, That as a mark of respect to the memory of the deceased the business of the Senate be now suspended to enable his associates to pay tribute to his high character and distinguished public service.

*Resolved*, That as a further mark of respect to his memory the Senate, at the conclusion of these exercises, shall stand in recess.

*Resolved*, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Mr. COUZENS. Mr. President, it seems appropriate when we gather together to-day to pay honor to my late colleague WOODBRIDGE N. FERRIS, of Michigan, to read into the RECORD the biographical sketch which the Senator himself put into the Congressional Directory:

WOODBRIDGE N. FERRIS, Democrat of Big Rapids, was born in Spencer, Tioga County, N. Y., January 6, 1853, the son of John, jr., and Estella (Reed); early education acquired in the academies of Spencer, Candor, and Oswego, N. Y.; later attended the Oswego (N. Y.) Normal and Training School, 1870–1873; was a student in the medical department, University of Michigan, 1873–74; principal of Spencer Academy (N. Y.) 1874–75; principal of Business College and Academy, Freeport, Ill., 1875–76; professor in Rock River University, Dixon, Ill., 1876–77; principal Dixon Business College and Academy, 1877–1879; superintendent of schools, Pittsfield, Ill., 1879–1884; in 1884 founded the Ferris Institute, Big Rapids, and has since been president of that institution; president of Big Rapids Savings Bank; Democratic candidate for Congress, 1892, but defeated; candidate for governor, 1904; elected Governor of Michigan for terms 1913–14 and 1915–16; married Helen F. Gillespie of Fulton, N. Y., 1875; to this union three sons were born; Mrs. Ferris passed away March 23, 1917; married Mary Ethel McCloud of Indianapolis, Ind., August 14, 1921; received the degree of master of pedagogy from the Michigan State Normal College and the degree of doctor of laws from Olivet College, the University of Michigan; and the University of Notre Dame; was elected to the United States Senate for the term beginning March 4, 1923, receiving 294,932 votes as against 281,843 for his Republican opponent, the Hon. Charles E. Townsend.

While this is a sad occasion it is yet a beautiful custom the Senate observes in coming together to pay tribute to one of our former colleagues whose services on this earth have been ended. I am thankful for this opportunity to say just a few words concerning my former colleague and friend.

On March 7 of this year, when Senator FERRIS announced he would not be a candidate for election, he said in part:

> I feel it is time I had a vacation and really took time to live. I want it distinctly understood that I do not decline to run because of any fear of the result. It is only in great emergencies that a Democrat can be elected in Michigan, but even if I felt sure of being defeated, that would not deter me from running if I thought I owed that duty to those who have supported me.

To a great extent this short statement reveals the character that the people of Michigan love so well. Not until he had reached the age of 75 did his thoughts turn to a vacation. Throughout most of his 75 years he labored in the service of his fellowmen and that he labored well and successfully will be shown by speakers to follow me which in itself demonstrates the honor that we desire to pay him.

There was spontaneous expression of sorrow and regret from everywhere the moment it was announced that he had passed on.

The statement that I just quoted expresses the courage he showed on all occasions. We all knew that he was not afraid to run, not afraid to be defeated. He was willing to make the race again even in the face of insurmountable difficulties had he not felt that after 75 years he should turn the task over to others.

While Senator FERRIS was a representative of a minority political party in Michigan, he knew that its representatives could only be elected in the time of great emergency. Yet he did not fear to face the great majority. He had the courage to fight on as one of the minority and after all there is no greater evidence of sublime courage than the willingness to accept and to continue to accept the burdens of the minority, and to voice their desires.

This is a sublime evidence of his loyalty to his friends and supporters and which continued until the ripe age of 75. He was still willing to be their standard bearer.

As boy and as man, as son and as father, as citizen and as public servant, as pupil and as teacher, as the chief executive of his State and as the ambassador from his State to the United States Senate, the life of Senator FERRIS ran its true course unto the end.

Despite the greatness of the official tributes paid him in his election as governor and as Senator, I think perhaps the greatest mark of appreciation of his worth is shown in the unofficial title by which his people knew him, the title "The Good Gray Governor." Probably that simple phrase tells a better story than anything that can be said here.

It requires a man of the finer qualities to meet the test that Senator FERRIS met and endured and to emerge from that test with the highest regard of the people of his State, with the greatest devotion from the people of his State, and with the fondest affection of the people of his State.

This was the man my State knew. This was the man I knew in Michigan and the man I knew in Washington. This was the man to whom we pay tribute to-day. We can but hope that when our records are written forever we shall deserve a place beside him in the annals of time.

Mr. GLASS. Mr. President, while in time of grief and lament words always seem unavailing, I could well wish that for this memorial occasion I had the facility of speech which is so essential when one would pay a fitting tribute to a worthy man who has departed this life. Then I might adequately express the genuineness of my own distress at the death of WOODBRIDGE N. FERRIS, and for the record appropriately appraise the loss which the Senate and the country have sustained.

There can be no mistake concerning the esteem in which the people of his adopted State held Mr. FERRIS. In social pursuits as in his business activities, as teacher and banker, as citizen and

friend, in every walk of life, he was respected and trusted by all who came within the range of his acquaintance or who were aware of his fine reputation. Twice he was elected to the highest executive office within the gift of the people of Michigan, notwithstanding the fact that in political faith he was an adversary of the overwhelming majority of the electorate. This phenomenon rarely occurs in public life, and then only when the man selected for so signal an honor is universally regarded as honest to the core, with courage and common sense comparable to his integrity. And when six years ago Michigan reacted to a period of political disturbance which was thought to involve the good name of the State the people, without regard to previous divisions, turned with confidence and affection to WOODBRIDGE N. FERRIS to represent the sovereignty of the Commonwealth in the Senate of the United States.

How well and with what discernment he performed his service here all of us fully understand. With an exceptionally clear comprehension of national problems, he applied to their solution an amount of good sense and a degree of liberal thinking which constituted an effective complement to his firmness of conviction, his steadfastness and poise on all occasions. He was dependable; there was never a question of his complete sincerity or his fidelity to his conception of duty. Reserved in manner, but with great warmth of feeling; quiet for most of the time, but outspoken when circumstances seemed to require, his counsel was sought by his associates and his opinions were greatly respected in this forum. Personally beloved for his human traits and admired for his accomplishments, those of us who knew him best can readily appreciate and share the grief of those who shall miss him most.

Mr. FESS. Mr. President, my acquaintance with WOODBRIDGE N. FERRIS extended over more than 30 years. My first contact with him was when I was associated with him on the occasion of some educational conventions which were held in the State of Pennsylvania. I very keenly recall the strong and deep impression the educator made upon that great aggregation of men and women. In those days Pennsylvania observed the custom of the annual teachers' institute, which was the largest aggregation of men and women during the year in any of the county seats outside of the great cities. I met him first in the town of Greensburg, Westmoreland County. There were 12,000 teachers present and a large group of citizens, the audience being limited only by the capacity of the hall.

Mr. FERRIS made one of the most remarkable addresses on educational philosophy that I had heard up to that time, and produced a very profound impression. From that time on I followed him in his carrer educationally, being thrown in contact with him very often. Later, I met him in his home in the town of Big Rapids. I saw him in his daily activity, where his chief forte seemed to be, at the head of the famous institution which still bears his name.

Mr. FERRIS was a man who had the ability to see the needs of the day, to organize and to manage an institution to meet those needs; and the institute that bears his name in his home town is the finest example I know of the consummation of an achievement of that sort. When I saw him standing upon the platform, looking into the faces of the young men and women that gathered by the thousand, and listened to his clarion voice as he spoke to those people on the meaning of life, I could understand something of the tremendous hold that he had upon the young life of Michigan and other States.

His work as an educator in that institution is outstanding. I understand that there are Representatives in numbers in the Chamber now that are the products of that famous institution. I speak with some personal knowledge, for I have visited Mr. FERRIS in his home and at his work more than once.

If you knew the character of the man, and could estimate the limitless influence through the young life that had come and gone in the institute, it is easy to understand why he became so popular in the State.

To know Mr. FERRIS was to love him. There was no guile in his make-up. He hated sham. He was pitiless in his criticism of anything that was not genuine; and he built himself into the generation in which he lived until there is a Ferris attitude of mind through the young life all over the great State which he honored.

When he sought the governorship, a good many people thought he could not be elected in a Republican State like Michigan; but he was elected, and passed from the office of executive of a great educational institution to the office of executive of a great State. Then he found his problem. It was under the administration of Mr. FERRIS that the unfortunate labor and capital outbreak in the iron country took place. I was a Member of the other House of Congress at the time. A serious situation developed. A resolution was introduced in the other House to make an investigation. The governor of the State wrote to his old friend and said:

> If we can only keep down socialism, and if we can only curb the demagogue, the Governor of the State of Michigan will be able to settle this problem.

Then, as now, and probably as it always will be, there was an agitation that tended to interfere with orderly processes; but the manner in which that great problem was handled was the manner of FERRIS, and the achievement that was made was his under circumstances of great emergency; and what was done reflected great honor to the State of Michigan under the leadership of this man. There is not any question, then, that when he announced himself as a candidate for the Senate, the people of the State, believing in him, sent him to this body.

Mr. President, the Senate never knew Mr. FERRIS. As a personal friend of his for 30 years, knowing his remarkable ability, often having been stirred by his clarion voice, I have sat here and wished that the opportunity would offer when FERRIS of the days when I knew him would be heard in this chamber. But he chose rather the silent course. He did his work in the committee rooms and in his counsel. Very rarely did we hear the voice that was so militant and so effective as I had heard it many, many times in the years gone by.

It is a difficult thing for one who wants to speak on an intimate friend to say just the right thing. Measured by every standard of real Americanism, he is one of the finest flowers of American democracy. Taken from every standard from which you wish to view him, whether a boy without opportunity in the beginning reaching a high plane of achievement, whether measured by the standard of success in business, he was a really great success, not only as an educator but as a business man; measured by the love of those who knew him, he was successful in the greatest degree. Measured from the standpoint of true manhood, from every standpoint, Mr. FERRIS was one of the finest examples of what a man ought to be of my entire acquaintance.

Words are inadequate when we want to express our appreciation of our departed colleague. "To live in hearts we leave behind is not to die" is certainly true of this man if it be true of anyone.

Mr. GEORGE. Mr. President, I would not attempt to give the biography of Senator FERRIS; nor would I attempt to speak of his elevation to the office of chief executive of his adopted State, though it was while chief executive of Michigan that Senator FERRIS attracted national attention, especially in his handling of a great industrial question that arose during his administration. His campaign for the Senate likewise attracted national attention; and his election to the Senate marked him as a man of unusual parts, coming, as he did, from the State of his adoption, and being, as he was, a member of the minority party within that State.

I knew Senator FERRIS first in the Senate, and I learned here to appreciate somewhat his habits of thought and of action. He was faithful in attending committees; and in one of the earliest public utterances he made after coming to the Senate, speaking upon a farm measure, he expressed very great confidence in the work of the committee, and made the statment—true of him to the end of his life—that he had attended all of the hearings, and had listened with patience to all of the facts developed at the hearings.

He did not speak often in this body. He spoke once upon the subject of agriculture, briefly, to which I have just referred. He spoke again when the Senate had under consideration the adherence of the United States to the World Court. He spoke also, and at some length, upon the question that had agitated the country, and still agitates it, the great moral question of prohibition. I well recall that Senator FERRIS began that address by reference to his life as a boy in the State of New York, more than 60 years before, as he expressed it; and then, when he stated his own convictions upon the great question so often the center of controversy, he was at pains to say that his convictions were not the result of any Sunday School emotions. That, I think, was a key to his character.

Senator FERRIS was a man of the most exacting sense of justice. He was quite as rigid with himself as with others; in fact, more so. He fully appreciated his own limitations. He took full account of his own faults, whatever those faults were.

I have said that his chief attribute and charactertistic, as it impressed itself upon me, was his sense of justice, his exacting sense of justice. It will be recalled that during his term he cast his vote on two matters well calculated to test the courage and the conviction of any Senator. On one occasion he was called upon to express his views with reference to a high

Cabinet officer. He did so without hesitation. When another distinguished gentleman of his State was named to a high office in the Government, he took occasion to state briefly that he knew the appointee as a man, that he knew him well as a man, and that as men know men, he entertained great admiration for him; but that in view of the facts brought to the attention of the Senate, he felt it to be his duty, both to the State of Michigan and to the United States, to vote against confirmation.

Senator FERRIS was actuated by a sense of duty that sprang from his love of justice. He did not think of justice in the ordinary sense which occurs to us when the word is used, but he thought of justice as absolute fidelity to his own faculties, enlightened by the lessons of history and his life's experience, and absolute trust in their conclusions and convictions. That, I think, he esteemed to be his duty to himself, unfaltering obedience to his convictions and conclusions, I think, he esteemed to be his duty to his fellow man.

He did not think of justice in the personal sense only, though he carried his concept of justice into all the relations of life. His sense of justice controlled him in his personal relations, even his most intimate personal relations, but in public affairs he thought of justice in the sense indicated in the preamble to the Constitution, where the establishment of justice is mentioned as being among the purposes of our Government. I think he thought of justice somewhat in the same sense that Edmund Burke spoke of it, as being the "standing policy of all civilized States."

In his brief address upon agriculture, Senator FERRIS referred to his experience and his confidence in the experience of others, and his reliance upon the opinion of others who had special opportunities to investigate the subject, and to furnish to those in public life information upon which they could confidently rely.

In his discussion of the World Court in this body he referred to his faith in the lessons of history, and one would infer that he based his faith upon the lessons of human history, because he took occasion to say that one could not be without faith in men who had watched the progress of man from the plane of primitive man to the plane of savagery and from the plane of savagery to the plane of barbarism and from the plane of barbarism to our present civilization.

He spoke of that distrust which not only dismembers the home and every unit of society, but which likewise paralyzes national action. In a large sense he looked upon life as being so short, the responsibilities of life so great, and the powers of the individuals to meet life and its responsibilities so limited and circumscribed that one who did not know him well might think that he felt the futility of it all. Though he did not speak much in this body, he gave to every question coming before him careful and conscientious consideration, both in his seat in the body, in his chair in the committee room, and in his investigation as time afforded opportunity to study the problems with which he had to deal. In the study of all public questions he made his appeal to his own experience and the lessons of history.

Those of us who knew him intimately knew that while he had achieved marked success as we measure success, even in financial affairs, particularly for one who had devoted his life to teaching, his real interest was in the institution of learning which he founded and over which he presided until his death.

The problems with which he had to deal while chief executive of his State and the problems before the Senate and the country did not impress him as being more important than the problem of human education. In the notable speech which he made in this body on the question of prohibition he took occasion to say that those who believed as he did upon that great question were remiss and were not free from severe criticism in failing to continue the program of education upon which he based his ultimate hope for the triumph of the cause which he held dear.

He was true to his exacting sense of duty until the last. In meeting the obligations upon him he did not hesitate to sacrifice his personal convenience and his personal strength. He remained in this body, as all his colleagues know, many days after he should have been at his home.

The last picture but one that I have of Senator FERRIS is the picture of a man more than threescore years and ten, with the snows of more than 75 winters whitening his brow, with his eyes looking into the not too distant shadowland, answering the anxious entreaties and advice of his colleagues here with the statement that his place was in the Senate. So he remained at his post until, through sheer exhaustion, the ravages of the disease which shortly was to take him off made it absolutely necessary for him to go to his home.

As an educator, as a citizen of his local community and of his State, as a public servant, as a father, as a husband, as a man, he met every obligation. This Republic would be much enriched if all its sons should measure up to the standard furnished by our distinguished friend and colaborer in whose memory these ceremonies are held.

Mr. SHEPPARD. Mr. President, the approbation of God ought to be the culminating goal of every human being. To seek, to find, and to establish the will of God in mortal affairs, such is the course which merits divine approval. To follow that will means to restore, in the proportion in which the effort is made, God's Kingdom in the world.

In his last discourse Christ emphasized the fact that all who seek and carry out the Maker's will are one with God, one with Christ, and one with each other. He further taught that the dominion of the Creator may be restored upon this sphere by love and service; that love and service are within the powers and functions of every individual; that therefore the Kingdom of Heaven is always at hand, open to all who choose to enter.

I saw the new Jerusalem
Its gates were open wide,
And all who would might enter,
And no one be denied.

The conclusion can not be avoided that the individual who qualifies others for love and service is an ideal messenger from God to humanity. Such a messenger was WOODBRIDGE N. FERRIS.

As a foundation for that messengership he was from youth to death a sympathetic and hopeful student of human nature and the human mind. He was aflame with the desire to convey to as many as he could reach, especially the young, the truth that every life has an essential and laudable part in the maintenance and advancement of civilization and to aid them in finding and performing that part.

He embodied that messengership in its most effective, secular form, the profession of teacher—a profession he began actively to follow at the age of 17 and which claimed him, with periods of absence during which he was Governor of Michigan and a Senator of the United States, until his demise nearly six decades afterwards. He awakened in his students the passion and the ability to serve. His love for humanity left its impress on their lives and made them agents of its magic power. Thus for nearly 60 years he was a true missionary of the Kingdom of God—a crusader for the will divine. The chief need of the world is for more personalities and more careers like his.

His childhood was divided between study in school and hard, incessant labor on the farm. In early youth he continued his collegiate preparation at intervals with funds he had earned while teaching. He knew what toil and struggle meant. Steadily he rose in the profession of teacher, founding two substantial private schools and piloting them to success. In 1884 he established at Big Rapids, Mich., the Ferris Institute, beginning with 15 students in two second-story rooms, witnessing its expansion within less than a generation into a group of commodious, modern buildings with an annual enrollment of more than a thousand, an enrollment approaching 2,000 in recent years. His soul became the soul of that institution and will remain its soul as long as the principles for which he stood shall be preserved and proclaimed within its walls. Through a series of lectures and addresses and through numerous personal interviews he communicated to those who sought his tutelage his inspiring philosophy. To help each student to ascertain the work in life to which he was best adapted and to shape the student's mental training with that objective in view was the distinctive, practical feature of his system. He taught that all useful callings are praiseworthy, all necessary to society. He taught that in each life the capacity for some form of valuable service existed. He combined with these teachings an expression of interest, solicitude, and affection that gave every student a new and abiding sense of dignity and worth. His gospel was the gospel of love and work for all. The period which marks love and work for all will mark the return of God's kingdom to this globe, the accomplishment of His will on earth.

I found a golden key one day
Upon the path I trod,
And it unlocked a golden door,
A door that led to God.
And as I looked inside I saw
These words upon the wall:
Your God is Love, and Love is God,
There's love and work for all.

The affection of WOODBRIDGE N. FERRIS for those whose education he supervised was returned in a most impressive degree. The dynamic power of human love is infinitely greater than that of any mechanical engine yet devised. After the Ferris Institute had been in operation a number of years the funds had been earned and set aside for the enlarged housing facilities its

growth had made imperative. When the time for reconstruction arrived, the bank in which those funds were deposited became insolvent. The outlook was apparently hopeless. Within a short time, however, the former students of Ferris Institute advanced the needed amount from their personal savings. This action was a grander tribute to WOODBRIDGE N. FERRIS than the governorship or the United States Senatorship, both of which came to him in subsequent years.

Turning to these political honors, it may properly be said that they represented triumphs as remarkable as have ever occurred in American history. The Democratic Party, of which he was a loyal and earnest member, was in the minority in his State. The dominant party there, the Republican Party, had a normal majority of several hundred thousand. He had taken nominations for Congress and governor, campaigning in the face of inevitable defeat with gallantry, determination, eloquence, and courage. He had spoken for the national tickets of his party, always attracting especial interest and commendation. He was one of the main supporters of that party with voice and pen and financial contributions through the hopeless years, solely from devotion to its principles and with no prospect of political reward.

When he won as its nominee the positions of governor and United States Senator, his success was similar to that which had been his in other lines—the incident to duty done without regard to results. Emerson evidently had men like FERRIS in mind when he said, in effect, that many of the temporarily great go fretting and fuming into nameless graves, while a few unselfish souls forget themselves into immortality.

He soon occupied a position of commanding influence in the United States Senate. He spoke rarely, because speeches rarely affect the actions of this body. He delivered in the Senate on one occasion an argument of some length for prohibition which was one of the best presentations that cause has ever had. In Senate committees and in party councils his opinion was eagerly sought and universally respected.

During most of his active life he was one of the outstanding figures on the lecture platforms of this country. One of his addresses on how to make the world better was a summary of his views of life, and won instant favor with the public.

He planted the kingdom of God in the hearts of the thousands who gathered through more than four decades in the institution he created at Big Rapids. Through their contact with others and with posterity, through the continued application of his doctrines in that institution, which is destined to expand indefinitely as the exponent of his moral power, his influence will live and grow as an inseparable part of the spiritual, intellectual, and material development of humankind. His work was the Master's work. His business was the Father's business. No mortal ever earned a sublimer epitaph.

Mr. VANDENBERG. Mr. President, from the first poignant hour when I humbly entered this high parliament to complete the interrupted term of the late United States Senator WOODBRIDGE N. FERRIS I have felt a responsibility not only to the governor whose trust I bear; not only to the great Commonwealth of Michigan, in whose name I am commissioned; not only to the precious Republic, whose immortal Constitution I am sworn to support and defend; but also and particularly to the stewardship of a great memory, in whose lengthened shadow I serve this interlude.

If it be the Nation's need that men of lofty purpose should direct its destiny, here was one who answered in maximum degree. He dreamed great rich dreams and then labored that these dreams should become reality.

If it be the Nation's need that men of clean hands and hearts should guard our heritage, here was one superlatively eligible. He counted a good name rather to be chosen than great riches. His integrity was as certain as time. His morality was as eternal as the hills. His dependability in these respects was the fabric of his very soul.

If it be the Nation's need that men of courage should stand in the trenches of unsurrendering ideals, here was one who was the perfect soldier. He never compromised with principle. He gave relentless battle for his faith.

Mr. President, these are not the mere artificial platitudes of expedient eulogy. They are my indelible measure of the stalwart life which Michigan's late patriarchal Senator gave devotedly to American democracy—himself an exemplar of this democracy in terms of personality and philosophy which it is not inappropriate to describe as Lincolnesque. I speak not alone my personal apostrophe to a cherished friend. I speak also the sentiment of Michigan, a State which, despite formidable political odds that were an almost insurmountable barrier, twice chose him as its chief executive, affectionately called him "the Good Gray Governor," and then sent him as its ambassador to Washington. Such confidence is something more than accident. It is the tribute of a trusting people to a trustworthy life. It is the crown of faith bestowed by citizenship upon a leader who understood that public office is a public trust.

May I repeat, Mr. President, that there is incalculable responsibility—to be met in humility and prayer—resting upon the successor who is sent to serve for Michigan in the forum of this late Senator's unhappily interrupted tasks. May I confess that the burden even of attempting assessment of his great dedications is heavy beyond words. Already the solemn record of this memorial session of the Senate is freighted with eloquent and significant eulogy which might seem to leave no need for the testimony with which I close this hour. And yet the rôle he played in the humanities of two epic generations still will not have been adequately portrayed—no matter who might be the orator—when the gavel falls upon our adjournment this afternoon.

You who were his colleagues in the Senate knew him largely in his political capacity and in the sunset of his useful years. He was a rugged Democrat—the greatest Democrat from Michigan since the days of Lewis Cass, who stands yonder in the Nation's hall of fame. I did not share the particular party allegiance which he chose to personify, but I did share his ideas of party loyalty and I shall hope always to share his ideals of probity and honor in political pursuits. In whatever degree this emulation becomes contagious the country will sustain a benediction in his name.

You, Senators, knew him largely in this political capacity, although these contacts inevitably disclosed the sterling character which this day's ceremony so heartfully reveres. But our Michigan knew him in other estimates and other loves. We knew him as the tireless citizen whose life was jeweled with unassuming, unremitting devotion to duty and conscience and the common weal. We knew him as the neighbor who was welcomed at unnumbered hearthstones up and down the countryside. We knew him as an oracle with the gift of tongues, an oracle whose homely yet terribly earnest words have inspired uncounted auditors not only in our own great State but also throughout America.

We knew him, Mr. President, above all else as the inimitable schoolmaster whose passion was effectual education within reach of the common throng and whose reward for a courageous lifetime in this great pursuit was the unswerving devotion of every student who passed the portals of the unique temple of learning which bears his name. He built this school on faith. Into it he poured his genius, his courage, his philosophy, his love of humankind. He pioneered in a new country. He persevered in a new and intellectual Samaritanism. His success was monumental and his monument is imperishable because it stands not alone in brick and mortar but in thousands of human lives that have been touched by the presence of his influence.

Michigan is justly famous for its educational sufficiencies. We have great colleges and universities, but no saga of Michigan's educational achievement will ever be complete without an incandescent chapter which recites that WOODBRIDGE N. FERRIS here wrought his triumphant experiment.

He was simple and kindly. He was stern, yet merciful. He uplifted truth and crushed deception. He exalted the weak and humbled the strong. He lived for his ideals. He died upon an unsullied shield. He verified—as is given to few men—the philosophy of the poetess in these lines of living grace:

I know we are building our heaven
Each day as we go on our way.
Each thought is a nail that is driven
In mansions that can not decay;
And heaven at last shall be given
To us as we build it to-day.

Mr. President, the Republic illy spares such souls. Human society is poorer when they cross the great divide. There is a sermon in such living. There is a challenge in such death. The Senate does well to memorialize such character and to keep itself in tune with such ideals. With my distinguished colleague, the senior Senator from Michigan, I bring this wreath of veneration and affection from a Commonwealth which joins us on its knees before an honored tomb.

And now, Mr. President, in the final moment of this ceremony I offer for the RECORD the late Senator's last legislative will and testament. I hold in my hand the completed manuscript of an undelivered speech which Senator FERRIS had expected to utter in this forum as his final admonition to his colleagues. It deals with the subject of public education. This is neither the time nor the place to analyze his views. Whether one agrees with their detail or whether one does not, one must respect their source and read attentively, because here was one in whom life and truth and education were inseverable synonyms.

The VICE PRESIDENT. The address sent to the desk by the junior Senator from Michigan will be printed in the RECORD as a part of the memorial proceedings.

The address referred to, which had been prepared by the late Senator FERRIS for delivery in the Senate is as follows:

UNDELIVERED ADDRESS BY THE LATE SENATOR WOODBRIDGE N. FERRIS

Mr. President, it is taken for granted by everybody that education must occupy a prominent place in the affairs of a democracy. Notwithstanding this fact, I am not at all sure that the American people and even some of its lawmakers, fully realize the absolute necessity of universal education in a democracy.

I recognize the fact that tremendous progress has been made in our attempt to educate all of the people. I have had the good fortune to stand in the classroom, as an instructor, not simply as a supervisor, for half a century. Little else than a revolution has taken place in the efforts of educators to plan and arrange courses of study that are in harmony with the needs of American children. Within the last 25 years great progress has been made in methods of teaching. However, no well informed man could maintain for a moment that we have, as yet, arrived at a science of education. The science of education is in the making.

Everybody is familiar with the fact that vast sums of money are being expended in the construction and maintenance of educational plants. Notwithstanding these evidences of progress, the World War revealed a condition that was pathetic. Thousands and tens of thousands of our soldiers could not even read or write We have not yet recovered from this shock. It would be unfair to charge this lamentable condition to the public schools. This condition simply proves conclusively that the American people have not yet awakened to an appreciation of the value of education.

When I use the term education I do not use it as an equivalent of schooling. The two terms "education" and "schooling" are not synonymous. A village or city or State may offer an immense amount of schooling; this does not mean that the educational advantages are at all commensurate with the amount of schooling. In the minds of many the expression, "I have no education," means "I have no schooling." Abraham Lincoln did not have to exceed three months of schooling, but he was one of the best educated men that America has ever produced. Schooling at its best in the United States frequently has a tendency to make the acquisition of knowledge its chief objective. Such a view is paralyzing—is unsatisfactory. Education has to do with the enrichment of life, and the enrichment of life depends upon productive thinking. Prof. Henry F. Osborne says: "To think, to act, to create, these are our great impulses inherited from far prehistoric past; these are the three objectives in the intellectual education of American youth." The wonderful accomplishments of a Franklin, an Edison, a Burbank hinge not upon schooling but upon education.

Within the last 20 or 25 years our high schools have multiplied above the rate of increase in population. Likewise our colleges and universities have commanded the attention of thousands of American youth whereas prior to that time they commanded the attention of comparatively few. Dean Raymond Walters of Swarthmore College says in an article entitled "Getting into College":

"The American secondary schools since 1900 have increased in enrollment nine times as fast as the population of the country. There are now some 12,000 public high schools offering four-year courses, with 2,500,000 pupils, of whom nearly 400,000 are graduated each year. There are more than 2,100 private high schools and academies offering four-year courses, with total enrollments of 225,000 and some 35,000 graduates yearly.

"These figures explain the source of the college expansion in the past quarter of a century—the increase from 104,000 liberal arts students in 1900 to approximately 500,000 this year. They explain the improved average preparation of college applicants—and likewise the present stricter enforcement of college entrance requirements and selective procedure.

"As for the reasons which impel three students proportionally to go to college to-day for one in the days of their fathers, there is the proverbial mixture of motives. One likes to believe that there is at least a corresponding increase in those who go because they love learning."

At first glance this might seem to constitute further evidence of educational progress. Beyond a doubt it does indicate progress to some degree. Granting, however, that it means much, that it is conclusive evidence of great progress, there remains in this country the problem of educating the masses. In other words, the very life blood of American democracy lies in the educational advantages which should be offered by the public schools.

The "hewers of wood" and "carriers of water" have never received a square deal. Millions and millions of dollars have been given to educational foundations; millions and millions of dollars have been given to colleges and universities, but very little effort has been made to take care of the great majority who can never hope to enroll in a high school. The real educational problem for America to solve is the problem of enabling the rural schools to provide a practical education through satisfactory courses of study, through adequate equipment, through the best methods of instruction, through the employment of well-trained teachers.

The correct thinking of a child is along lines precisely the same as is the correct thinking of a Newton or a Huxley. In the rural schools the fundamentals must be employed for developing in the child productive thinking. I concede that great progress has been made along certain lines in the rural schools. But broadly speaking, one great problem in American education consists in revolutionizing our rural schools for a larger degree of efficiency. Objectors will point to the "little red schoolhouse" as the place where this great scientist, this great statesman, and that great inventor received his early training as if there were some magic in the "little red schoolhouse." The truth of the matter is, Abraham Lincoln, like many other great men, made progress in spite of the "little red schoolhouse."

In lines of industry and agriculture and commerce we have discarded some of the old ways and adopted methods which are in harmony with present civilization. I am not going to worry the Senate with concrete illustrations of the special weaknesses of present rural education.

Another feature of education that has been neglected is adult education. Not infrequently, when I have had occasion to suggest education to an inquirer, he says, "I am too old." The notion widely prevails that education is for human beings from 5 to 21 years of age—that education is simply a preparation for life, whereas real education is life. Education, as I have defined it, begins with the first breath of life and ends with the last breath. When a human being ceases to do constructive thinking, ceases to find new and better ways of living, he is as dead as any corpse in a cemetery. In America our slogan ought to be "Education for all of the people all of the time." Notwithstanding the frequent failure of the schools to educate, I offer as a collateral slogan, "Schools for all of the people all of the time."

Adult education is not to be brought about by agencies of coercion or agencies of control. When the educational philosophy of America is as broad as I have outlined, there will be a demand for facilities whereby every man can secure the necessary advantages through his own ambition and efforts. True in our larger cities provision has been made to conduct night schools whereby heads of families and members of families who are past the legal school age can secure training in the arts of civilization and in the fine art of making a living. There are skeptics who claim that adults care little or nothing for these advantages. For 43 years I have conducted a unique school. Not infrequently fathers and mothers and sons and daughters have attended the school at the same time. In order to do this they have been obliged to make real sacrifices. They have had to suppress their desire to own more acres of land, their desire to have larger savings account; they have done this in order to pay their carfare, the cost of living, and the cost of tuition at the Ferris Institute. I mention this concrete example to show that when humans know that educational advantages are within their reach, they improve them. Adults in their eagerness to acquire an education and because of ruthless educational advertisers are robbed annually of more than $2,000,000. Dr. George B. Strayer, professor of educational administration, Teachers College, Columbia University, has this to say:

"Hundreds of thousands of people, adults, in the United States have been exploited by private enterprises which have taken their money without an adequate appreciation of what the job of teaching them was."

This indicates that adult education is a problem, and at present the necessary information is not at the command of the thousands of adults who are hungry for the advantages of an education.

When these reforms are suggested, taxpayers emit extra howls about the cost. The truth of the matter is the method for America to pursue, or any other country that wants to possess even material riches is to furnish opportunities for real education. Very few patriotic citizens find fault with the cost of enlightenment. It should be remembered that in the last 25 years civilization has undergone a tremendous change. We have annihilated time and distance. The automobile, wireless, radio, movie, and the uses of electricity have revolutionized the old environment.

Our education problem instead of being simplified has become more complex and difficult.

Thus far I have chiefly referred to problems of rural and adult education. This is only a beginning of an outline of educational needs. I am not going to discuss other problems in education. Many of them that I might discuss are recognized by educators and laymen alike. It is only natural that the great army of teachers should take the initiative with reference to discovering a means of solving some of the great educational problems that confront us. They are in daily touch with American youth. It may be that they are not statesmen; it may be that they overestimate what the Federal Government should do and can do in the way of solving some of their problems.

PROPONENTS OF A DEPARTMENT OF EDUCATION

I am going to quote from a few of the great men and women who appeared at the joint hearings of the Committee on Education during

the Sixty-ninth Congress and give in part their arguments for a department of education. I make these quotations because these men and women have offered what seems to me to be convincing arguments for a department of education.

Dr. George D. Strayer, professor of educational administration, Teachers College, Columbia University, said:

"It provides—and here is the real significance of the measure—that the department of education shall collect statistics and facts, and shall conduct researches and investigations, and that the results of the evidence so collected shall be made available to the people of the several States."

Dr. Charles H. Judd, director of the School of Education of the University of Chicago, said:

"I believe that if we had some central agency that could make us aware of our virtues and that could point out with perfect fairness and accuracy the results of some of our local experiments, that we could bring about exactly what we want, and certainly it would be a step in the direction of making our schools the best institutions."

Dr. S. P. Capen, chancellor of the University of Buffalo, Buffalo, N. Y., said:

"It is also patent that these several divisions of the Government that deal with education have no relation whatsoever with one another and are, for the most part, each ignorant of the other's business. We want to see the enterprises brought together so that what the Government does in education will at least represent a unified point of view and a unified policy. I think that is the first thing we want."

Dr. John H. MacCracken, president of Lafayette College, Easton, Pa., said:

"Education as we now have it in the United States is the chief occupation of more than a quarter of our population. There are 26,000,000 of our population in schools. There are over 800,000 teachers in the United States. We are spending over $2,000,000,000 a year on education. It is one of the leading industries, if not our leading industry."

Miss Selma Borchardt, legislative secretary of the American Federation of Teachers, said:

"One gentleman told me last summer that the reason he opposed a Federal department of education was because we have no national educational policy, and that therefore he would oppose the establishment of a Federal department. I asked him if we had a national agricultural policy. He said, 'Certainly we have; the wiping out of plant and animal diseases.' Well, it seems to me that the wiping out of illiteracy, the wiping out of lower educational standards, is as much a national policy as the wiping out of plant and animal diseases, because we think that our children are as deserving of attention as plants and animals."

Dr. Randall J. Condon, superintendent of schools, Cincinnati, Ohio, said:

"The thing I want to ask you men to do is this: To think of education as the finest and the biggest and the best thing in our national life and to complete the job by crowning it with a national dome that shall give us a leadership and a system of American education that shall comprehend the development of the lowest, simplest hamlet, village, town, State, and Nation—not to dominate but to lead; and we ask you as a step in that direction to give this bill a chance."

Dr. J. L. McBrien, director of rural education, State teachers college, Edmond, Okla., quoting from President Coates, of the Kentucky State Teachers College, Richmond, said:

"The trouble about this rural school problem is that the farmer and the average teacher look upon the country school as a little house on a little ground where a little teacher at a little salary for a little while teaches little children little things in a little way."

Doctor McBrien continues:

"That is severe, but the trouble with it is that it is so true. For example, take the great State of New York; in it there are 3,000 one-teacher schools with an average daily attendance of 10 or less; and I think there are 1,500 with an average daily attendance of five or less. I speak of New York just because it is a great State. I do not want to take you out into the wild and woolly West where we have not had the time to develop yet out of some things that are not so desirable."

B. M. N. Marrs, State superintendent of public instruction, Austin, Tex., said:

"We have a Secretary of Agriculture, and I believe in that department. It is promotional; but the Secretary of Agriculture has never attempted to standardize the method of raising cotton in the South; he has never undertaken to standardize the method of raising wheat in the West; but through that great department information has been disseminated in the agricultural sections, and the localities have been stimulated until the country is more prosperous on account of the workings of that department. And so I may say of Commerce and Labor. What is the department of the Government recognized by the world as standing for the cultural and the spiritual among our people? I submit this, gentlemen, as one thought that has not been developed by any other person that I have heard discuss this question."

John H. Cowles, grand commander of the Supreme Council Scottish Rite of Freemasonry, Southern Jurisdiction of the United States, says:

"Finally, I have no fear of federalization, for the provisions of the bill give no more authority to the department of education than is given to the Department of Agriculture or Commerce—in fact, not so much—and so far there has been no charge of federalizing the crops, the stock, the mines, the roads, or any industry, while the helpfulness rendered is unquestionable."

Dr. Payson Smith, commissioner of education, Commonwealth of Massachusetts, said:

"With reference to the field of research, I want to point out, Mr. Chairman and members of the Committee, that there is no possibility that this particular field will be entered into effectively by any State. I say that because I have never seen any indication that any State is undertaking that particular work for the State. Even our wealthier States, our States that have the larger State organizations, have not established departments or divisions of research in education. Even if they were to do so, it would be very extravagant for the country as a whole, because the field of research of which I speak is a field of professional research, a field of technical research; and whatever is done, for one State is likewise necessary to have done for another State. We must grant, of course, that there are very marked differences among the States with reference to administrative procedure, with reference to the ways in which they will desire to organize their schools, with reference to the extent to which they will care to carry forward education and support it. Those things are matters entirely to be determined by the several States, and I am very certain always will be so determined. But when you come to the technical practices of the schools, there is not one method of teaching reading that is better for the children of Massachusetts, and another method of teaching reading that is better for the children of Illinois, and still another that is better for teaching that subject in California. The teaching profession has come into that scientific stage where studies are greatly desired in these fields; and it is because I believe that a Federal department of education can so greatly help in these ways that I believe it is a good thing that this department should be established."

Mr. BLACK of New York, in questioning Dr. C. R. Mann, director of the American Council on Education, asked:

"In case this bill does not become a law, do you think it might be advisable to have a provision to the effect that the money used in the Bureau of Education should be used for the rural school systems of the country?"

"Doctor MANN. It is not necessary because the things that are the subjects of distinct investigation at the present time are, what are the processes of learning reading, writing, arithmetic, and geography, the fundamental things that are specified."

I now quote from the 1925 report of the Commissioner of Education. This is not quoted as a direct indorsement of the bill for a department of education. It is simply to indicate what some of the present educational needs are. The report says:

"Those responsible for schools administration in the United States are in great need of assistance in certain important fields. At the present time (1925) adequate provision is direly needed for study in the fields of curriculum organization, school finance, buildings and construction, teacher training, and secondary education."

President Coolidge, in his recent message (1927), said:

"For many years it has been the policy of the Federal Government to encourage and foster the cause of education. Large sums of money are annually appropriated to carry on vocational training. Many millions go into agricultural schools. The general subject is under the immediate direction of a Commissioner of Education. While this subject is strictly a State and local function, it should continue to have the encouragement of the National Government. I am still of the opinion that much good could be accomplished through the establishment of a department of education and relief, into which would be gathered all of these functions under one directing member of the Cabinet."

OPPONENTS OF A DEPARTMENT OF EDUCATION

In the foregoing quotations I have tried to deal with different aspects of the bill under consideration. I now make quotations from those who are opposed to the bill.

Dr. Frank J. Goodnow, president of Johns Hopkins University, made the following statement:

"The tendency will be stagnation, standardization, the termination of this process of experimentation as it is going on at the present time, because then everything will be uniform. Now, one State has one idea with regard to education; other States have other ideas; and we find out, through a process of experimentation with these various ideas, whether or not we can make advances. But what I fear will come from what, as I see it, will be the result of the passage of this bill is a standardization, a stagnation, which is going to be extremely bad for our educational system. The period of experimentation is apt to cease, and that is what we need and what we always will need, as I see it."

Valmore Gaucher, president of Assumption College, Worcester, Mass., said:

"It would be a first step, and a very important one, toward complete centralization, and thus open the way to socialism, and who can tell, to dictatorship and tyranny. Centralization is like a gear. Once enforced on one point, it will gradually extend to and corrupt all

our social organizations. This is the target at which the Socialists aim. But this centralization must be fought by every true American with all possible energy because it is utterly unpatriotic."

I am not sure that Senator BORAH was present at the hearings; however, he has said:

"The principle once admitted, the agency once established, the Federal power will ultimately direct, guide, dictate, and control the whole educational system, from the mother's knee to the final departure from the campus. Indeed, that was the original conception of the Federal plan. The original plan and arguments contemplated exactly that, to wit, that the National Government should be omnipotent in educational affairs."

Again I quote from Senator BORAH:

"The Government depends at last upon the intelligence and character of the average citizen. His constant, vigilant interest in public matters is indispensable to the success of this great experiment. The idea that the Government should be a universal provider and guarantor against all risks and wants of human existence is at war with our whole theory of government. The theory that there is a wisdom at Washington with reference to purely personal and local concerns superior to the wisdom found at home and in the communities or the States is not the theory upon which our Government was organized."

Harry Pratt Judson, president emeritus of the University of Chicago, said:

"I am strongly opposed to the pending education bill. Education belongs to the States. The Federal Government can be useful, no doubt, by gathering information as to educational procedure and disseminating this information among the States. But this can best be done through a properly supported bureau of the Interior Department. This bureau should be organized on a strictly scientific basis, like the Bureau of Standards. In the last-named bureau there have been but two heads since its organization some quarter of a century since, and the single change was made because the head resigned in order to accept the presidency of an important educational institution. Should the Bureau of Education be converted into a department with its head in the Cabinet there is the certainty of a change with every change of administration. What should be a scientific bureau becomes a political department. I deprecate turning over Federal educational agencies to partisan politics, which is the essence of this bill."

J. Gresham Machen, Princeton Theological Seminary, Princeton, N. J., has said:

"I believe that in the sphere of the mind we should have absolutely unlimited competition. There are certain spheres where competition may have to be checked, but not when it comes to the sphere of the mind; and it seems to me that we ought to have this state of affairs; that every State should be faced by the unlimited competition in this sphere of other States; that each one should try to provide the best for its children that it possibly can; and, above all, that all public education should be kept healthy at every moment by the absolutely free competition of private schools and church schools."

A. Lawrence Lowell, president of Harvard University, said:

"I am opposed to the creation of a Federal secretary of education, because I believe it would almost inevitably bring education into politics; or, in other words, make the appointment to that office a political one, whereas it seems to me that it is important to keep the educational as well as the scientific work of the Federal Government in the hands of experts. Moreover, I much doubt the wisdom of increasing the power of activity of the Federal Government in questions of education, which depend, I think, very much on sectional conditions. In the third place, action by the Federal Government is almost sure to mean a certain bureaucratic uniformity, whereas it seems to me that we need in this country a wide diversity in educational experimentation, for about education we talk much and know little."

James H. Ryan, representing the National Catholic Educational Association, said:

"There is no reason to appeal to Washington for assistance in school matters as there is no need to appeal in matters of public health, public morality, or police and fire protection. To do so is to hand over to a central bureaucracy control over local matters. A central bureau may do some things better than local agencies.

"In the long run the effects of bureaucracy are uniformly vicious. With the loss of local control goes inevitably loss of interest in local problems. Dependence on Washington will certainly result in a series of so-called national standards of education, national courses of study, national educational methods, national inspection—in a word, in a series of interference with the school which would paralyze local initiative and impose upon the community methods and standards wholly out of harmony with local needs and demands."

In questioning Edward S. Dore, president of the National Catholic Alumni Federation, Senator FERRIS had the following to say:

"But that tendency [to create a stereotyped mentality by standardization] is not peculiar to the State nor to the Nation. I am in very close touch with that set of conditions. Why is the drive that way? Why is it that as soon as a man becomes a secretary of education in the Cabinet he should do these damnable things? What in human nature obsesses him? I have heard so much about what will happen if this bill is enacted that I ask: What is the matter with human nature? You do not wish to say that the other members of the Cabinet have blossomed out into archenemies of the National Government. Why should a secretary of education be so much more likely to go wrong?"

The leading opponents of this bill are not from the army of public-school teachers. This fact is indeed significant.

POLITICAL INFLUENCE

The opponents of this bill seem to be very much alarmed over the prospect of endangering the cause of education through political influence. It is true that the heads of the different departments are appointed by the President. If we have a Democratic President, of course the appointees for the Cabinet will be Democrats. If we have a Republican President, the appointees will be Republicans.

The only possible basis for prophecy rests on what has happened in years gone by. So far as I am able to learn, the departments have not suffered seriously because of political bias. When a department has suffered it has been because of moral turpitude. To be perfectly frank about the matter, when you get down to "brass tacks," there isn't enough difference between the two great parties to permit any special worry over politics. If there are well-defined differences between the two great parties, they are not generally known to the public. It is difficult to imagine that a President of the United States, whether Republican or Democrat, would appoint a mere politician to the position of secretary of education. This would indicate that the office of President is losing its old-time importance. We hear the cry, "Keep the schools out of politics." The schools have always been in politics and always will be in politics. Sometimes this works injury to the schools, sometimes benefit. Much depends upon the quality of politics. The great army of teachers are American citizens and have a right to be in politics.

Public opinion is sufficient to ward off every danger that can arise from having the head of a department a Republican or a Democrat. The personnel of the department would not be seriously modified by a change in the secretary of education. There is no more occasion for alarm over the political attitude of a secretary of education than over a Commissioner of Education or a Secretary of Agriculture. It is true that with every administration there would be a change in the secretary of education. This cry of political influence is nothing more nor less than a scarecrow.

STANDARDIZATION

Another objection that is raised by the opponents of this bill is the anticipated malicious influence of the standardization of education. Organization, specialization, and standardization constitute the order of the day. The most serious consequences of standardization in education has been brought about by other than governmental influences.

I am not going to cite concrete instances. The matter of standardization is a matter of emphasis. It is difficult to imagine that educators are to abandon all hope of a science of education. Human nature is essentially the same in Maine, in California, in Minnesota, in Louisiana. It is difficult to imagine that there is one best method of teaching reading, arithmetic, the English language, history, geography, and civics in one State and an entirely different method for teaching these subjects in another State. If there is a science of education, there is one best method. When this best method is discovered and adopted by the 48 States, then we have efficient standardization. This form of standardization benefits the entire school population of 26,000,000 children. To fight scientific standardization is to fight progress. It is far better for the success of education to carry on research work and find out what methods and what equipment are best for the education of American youth. It is exceedingly difficult to estimate the saving in time and money that follows efficient, scientific methods.

STATE RIGHTS

In present decades there has been a revival of the State-rights doctrine. The individual State seems to be jealous of the functions of the Federal Government.

The opponents of this bill almost invariably declare that the secretary of education would control education in the 48 States. The Departments of Commerce, Labor, and Agriculture have rendered invaluable service to the 48 States, and the element of control has not been a dominating factor. There isn't any more reason for supposing that the secretary of education will exercise control in any other sense that the three departments mentioned above exercise it. The advocates of this bill deplore vicious control as enthusiastically as do the opponents of the bill.

The future progress of the world depends to no small degree upon research, and it is through research that science and invention have made marvelous progress; in fact, more progress in the last 75 years than in all previous centuries.

The opponents of the bill, with but few exceptions, pay tribute to the Bureau of Education. I am not going to take the time to argue the inability of a bureau hidden away in the Department of the Interior to do the great work that is demanded by our educational agencies. The larger part of the evidence has one trend. Many of the opponents say that if necessary funds could be provided for the Bureau of Education

the work of a department of education would be uncalled for. The fact that the bureau never has had adequate funds is sufficient argument to prove that there isn't any immediate prospect of its ever having sufficient funds.

PRIVATE SCHOOLS

The opponents of the bill are fearful that the independence of private schools will be disturbed by establishing a department of education. I have been engaged in private-school work for half a century. I realize that the testimony of a single representative is of little value. I have observed legislation in several of the States in relation to private schools. I am positive, however, that so far as my own experience in handling a great private secondary school is concerned, the supervision of private schools by the State has been beneficial.

It is impossible for me to see how the Federal Government would fail to conserve the best interests of all private schools whether they are secular or religious. Public opinion points in one direction and that is in permitting all private schools that degree of freedom which is conducive to the welfare of the State and the welfare of the Federal Government.

In the arguments of the opponents of this bill the factor of fear seems to dominate. The dynamics of the opposition is primarily emotional. For some unaccountable reason the opponents of the bill seem to be "scared stiff" over the prospect of giving the Federal Government an opportunity to better the educational opportunities for American youth.

RESEARCH, THE MAINSPRING OF PROGRESS

This applies to our commercial development, to our agricultural advance, and to educational progress. There isn't anything mysterious about research. For example, in industry it means nothing more nor less than "intelligent investigation into how to do practical things; if they are new, how they can be done in the best way; if they are old, how in a better way. In a word, it is invention. It is the most practical thing in the world."

The United States Chamber of Commerce says that "the amount expended annually by American manufacturers in conducting laboratory research alone is $35,000,000." Unquestionably this figure is well on the conservative side. This same authority places the annual saving to American industry by research at a half a billion dollars.

In the field of medical science we must appeal to the imagination in order to appreciate the tremendous change in the last 50 years. The name of Pasteur is familiar to every physician. He wrought little less than a revolution in the field of scientific research. He was not a physician, but his researches have contributed more to medical science than the researches of any other one man.

In the last 25 years agriculture has undergone a revolution. That does not mean that there isn't a farm problem. It simply means that research is of tremendous value in every form of human activity. It has recently been estimated that the aggregate producing power of persons engaged in agriculture has been increased 25 per cent since 1900. Secretary Jardine says that these changes are attributable chiefly to the results of scientific discovery. Whatever view a Congressman may take of the value of research in education, he must admit that in the lines I have already mentioned it has been of gigantic importance. I hold that the value of research would be even more valuable in education than in the fields already mentioned.

In what I have already said about research, the element of governmental control has not been an important factor. There is no reason that I can discover why educational research should lead to the dire results that the opponents of this bill outline.

The marked weakness of this age lies in the handling of our distinctive human interests. We handle the material things of this world almost as if by magic. The human mind, however, has received comparatively little consideration. Mental resources have never been adequately explored; mental possibilities are at this hour undiscovered.

If there was no other argument in favor of this bill than the one that I offer with reference to research, there would be sufficient reason for passing it. It is clearly evident to me that as a question of economy, it is a thousand times better that this lack of research should be corrected by the Federal Government than by the individual States working separately. It has been quite clearly indicated that the States work at cross purposes, so to speak. It is important that in this field of research there be unification.

After the experience we have had with the Bureau of Education, a magnificent institution, we can see plainly that if education is to have the attention it deserves, it must be through the agency of a department of education. I have been personally acquainted with two of the Commissioners of Education, William T. Harris, and Philander Priestley Claxton. No man can pay higher tribute to these two men than I. Very likely I could pay as high a tribute to some of the others if I had had the honor and good fortune of knowing them as I have known these two men. It seems to me that if it is a waste of argument to say that if the Bureau of Education had the money, it would be able to do the work that this bill provides for. The Bureau of Education never has had the money and it is reasonable to say that it will never get the necessary funds.

RECESS

The VICE PRESIDENT. Under the order made yesterday, the exercises of the day having been concluded, the Senate will stand in recess until to-morrow at 12 o'clock.

The Senate thereupon (at 4 o'clock and 5 minutes p. m.), pursuant to the order previously entered, took a recess until to-morrow, Monday, May 7, 1928, at 12 o'clock meridian.

---

## HOUSE OF REPRESENTATIVES

### SUNDAY, *May 6, 1928*

The House met at 2 o'clock p. m. and was called to order by Mr. TREADWAY as Speaker pro tempore.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Thou who art at the right hand of the Father, be with us; root and ground us in unchangeable truth. Lighten the burdens of the heavy laden and lift the loads of the overburdened and sooth all hearts that feel the hurts of life. Let us be patient in the presence of sorrow, because oftentimes the divinest benedictions assume the darkest disguise. O God, again death has entered the Chamber and beclouded our way. Make us aware of Thy consoling presence. Reveal Thyself unto us and hallow all our experiences. Be Thou the light in darkness, an assurance in affliction and an inspiration in every condition. Providence has laid a heavy hand upon us; to the realms of love one has taken his departure. A faithful servant of the people and a sincere councillor was he. Sweet peace to his ashes and heavenly rest to his soul. Give us courage to close the gap and to move forward at Thy call, through Jesus Christ our Lord. Amen.

The SPEAKER pro tempore. Without objection the reading of the Journal will be deferred.

There was no objection.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE GALLIVAN

The SPEAKER pro tempore. The Clerk will read the special order for the day.

The Clerk read as follows:

By unanimous consent,

*Ordered*, That Sunday, May 6, 1928, at 2 o'clock p. m., be set apart for memorial exercises in commemoration of the life, services, and character of the late Hon. JAMES A. GALLIVAN, former Representative from the twelfth district of Massachusetts.

Mr. CONNERY. Mr. Speaker, I offer the following resolutions.

The Clerk read as follows:

House Resolution 187

*Resolved*, That the business of the House be now suspended, that opportunity may be given for tributes to the Hon. JAMES A. GALLIVAN late a Member of this House from the State of Massachusets.

*Resolved*, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House at the conclusion of these exercises shall stand adjourned.

*Resolved*, That the Clerk communicate these resolutions to the Senate.

*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased.

The SPEAKER pro tempore. The question is on agreeing to the resolutions.

The resolutions were agreed to.

Mr. TILSON. Mr. Speaker, when I came to the Capitol this morning there was no intention on my part of attempting to add anything to the exercises of to-day. I have known the deceased, in whose honor this service is being held, since he first came to Congress and have long numbered him among my personal friends; but it has never happened that we served on the same committee of the House or were otherwise thrown together in a closer or more intimate relationship than that which comes from long service together on the floor of the House. This, however, in the case of our departed colleague, was sufficient to attract friends and cement friendships, for his was an attractive as well as a unique personality.

When anyone rises to a position of prominence, it is natural to look about for the reasons why this has occurred, and when such prominence, which may be in some instances the result of accident or special good fortune, becomes fixed and recognized as well-earned distinction, then the study of such a career becomes not only interesting, but instructive and profitable to those who make it. It is so in the case of the distinguished

colleague, whose loss we mourn and whose memory we honor to-day.

JAMES A. GALLIVAN would have been an outstanding figure in any group into which he might have been thrown. In school and in college he always played his part, whatever it might be, in such a manner as to distinguish himself and to make himself notable among his fellows. It was ever so throughout his life in whatever activity he might engage.

Mr. GALLIVAN'S rise to place and distinction in this House may be credited specially to two outstanding characteristics, each of these being the result of certain conspicuous qualities of mind and heart innate in his character.

I have spoken, as others will speak, of his attractive, pleasing personality. This inevitably brought and kept him many friends. The spirit of comradeship was his to a remarkable degree. His personal hold upon his friends added greatly to his effectiveness as a public servant.

Few who have heard him on this floor will deny him a place among the effective debaters of our day in this House. In attack his tongue like a sharp rapier clashed and cut whereever it struck. He was not given to frequent speakng during his service here. He sought opportunity to speak only when particularly interested in a subject, but when he spoke he never had to ask for an audience, and rarely did anyone who heard the beginning of his speech fail to listen until the last sentence was completed. A goodly attendance of the House alway greeted him, and if known outside in advance that he was to speak a full gallery was always on hand.

He was an artist in the use of figures of speech, which he used freely to enforce his argument as well as to hold the attention of his hearers. The effective use of alliteration in his speeches was probably never excelled. When he thought it necessary in order to destroy the force of his opponents' contention he could use the weapon of ridicule with most telling effect. In short, his powers of debate were so unusual as to make him an ally to be counted and a foe to be dreaded in the arena of debate.

Others will address themselves at greater length to the life, character, and public career of a notable public servant. I simply take advantage of this occasion to bring a brief word as a tribute of respect to the memory of a fellow worker who has passed on. The death of Mr. GALLIVAN brings sadness to us all. He will be greatly missed here and mourned wherever there are those who knew him as friend.

Mr. O'CONNOR of Louisiana. Mr. Speaker, ladies, and gentlemen, we have assembled here to-day for the purpose of paying a tribute to the life and character of the late JAMES GALLIVAN. He was one of us but is now no more. We shall never see him again, for he has sailed beyond the sunset and the path of all the western stars. He has gone to meet the great choice classic spirits of all the ages. Consoled with that belief, we can not, however, refrain from the sigh that comes with the thought that we shall never see him again. He was my friend. My tears mingled with those who loved him best when we heard that he had received the final summons "to follow knowledge like a sinking star far beyond the utmost bounds of human thought." He lived a great life. He brings to those in the land that is fairer and more beautiful than this the rich and wonderful experiences that he gathered while sojourning on this sphere. "I am a part of all that I have met" was a thought that he loved to dwell upon. Life was a great romance to this advocate of liberal thought and individual freedom. As great as was his knowledge of life in its most beautiful aspects, he would often say "and yet all experience is an arch wherethrough gleams that untraveled world whose margin fades forever and forever as I move." He was a bold thinker and possessed to a remarkable degree the courage of his convictions. He unflinchingly met every great issue that presented itself to him as a national legislator and fearlessly expressed his views in behalf of individual liberty. He loved his country as a whole, but his affection was more particularly centered upon New England. He loved the literature of that great historic section and would quote to me frequently the many gems of thought that have been imperishably translated into the English tongue by the great men and great women that came from the State in which he was born and reared. He was particularly affected by the strain and pain and the hope of Thanatopsis. He knew it by heart, and I know that if he had ever dreamed that he was to pass away and that I was to be one of the speakers at the memorial exercises that would be held in his memory that he would have asked me to recite the immortal lines. He often said that they should be set to organ music, so that their notes would roll out sonorously, carrying their great consolation unto the hearts of all that have to play their parts in the grand drama of life until out beyond the Pleiades and far beyond the sun we all meet to dwell by the great white throne of God forevermore.

To him who in the love of nature holds
Communion with her visible forms, she speaks
A various language; for his gayer hours
She has a voice of gladness, and a smile
And eloquence of beauty, and she glides
Into his darker musings, with a mild
And healing sympathy, that steals away
Their sharpness, ere he is aware. When thoughts
Of the last bitter hour come like a blight
Over thy spirit, and sad images
Of the stern agony, and shroud, and pall,
And breathless darkness, and the narrow house,
Make thee to shudder, and grow sick at heart;
Go forth, under the open sky, and list
To nature's teachings, while from all around—
Earth and her waters, and the depths of air—
Comes a still voice.

Yet a few days, and thee
The all-beholding sun shall see no more
In all his course; nor yet in the cold ground,
Where thy pale form was laid, with many tears,
Nor in the embrace of ocean, shall exist
Thy image. Earth, that nourished thee, shall claim
Thy growth, to be resolved to earth again,
And, lost each human trace, surrendering up
Thine individual being, shalt thou go
To mix forever with the elements,
To be a brother to the insensible rock
And to the sluggish clod, which the rude swain
Turns with his share, and treads upon. The oak
Shall send his roots abroad, and pierce thy mold.

Yet not to thine eternal resting-place
Shalt thou retire alone, nor couldst thou wish
Couch more magnificent. Thou shalt lie down
With patriarchs of the infant world—with kings,
The powerful of the earth—the wise, the good,
Fair forms, and hoary seers of ages past,
All in one mighty sepulcher. The hills
Rock-ribbed and ancient as the sun,—the vales
Stretching in pensive quietness between;
The venerable woods—rivers that move
In majesty, and the complaining brooks
That make the meadows green; and, poured round all,
Old ocean's gray and melancholy waste,—
Are but the solemn decorations all
Of the great tomb of man. The golden sun,
The planets, all the infinite host of heaven,
Are shining on the sad abodes of death,
Through the still lapse of ages. All that tread
The globe are but a handful to the tribes
That slumber in its bosom.—Take the wings
Of morning, pierce the Barcan wilderness,
Or lose thyself in the continuous woods
Where rolls the Oregon, and hears no sound,
Save his own dashings—yet the dead are there:
And millions in those solitudes, since first
The flight of years began, have laid them down
In their last sleep—the dead reign there alone.
So shalt thou rest, and what if thou withdraw
In silence from the living, and no friend
Take note of thy departure? All that breathe
Will share thy destiny. The gay will laugh
When thou art gone, the solemn brood of care
Plod on, and each one as before will chase
His favorite phantom; yet all these shall leave
Their mirth and their employments, and shall come
And make their bed with thee. As the long train
Of ages glides away, the sons of men,
The youth in life's fresh spring, and he who goes
In the full strength of years, matron and maid,
The speechless babe, and the gray-headed man—
Shall one by one be gathered to thy side,
By those, who in their turn shall follow them.

So live that when thy summons comes to join
The innumerable caravan, which moves
To that mysterious realm, where each shall take
His chamber in the silent halls of death,
Thou go not, like the quarry-slave at night,
Scourged to his dungeon, but, sustained and soothed
By an unfaltering trust, approach thy grave,
Like one who wraps the drapery of his couch
About him, and lies down to pleasant dreams.

Mr. ANDREW. Mr. Speaker and Members of the House, our beloved colleague, JAMES A. GALLIVAN, whose loss we lament to-day, will long live in the memory not only of all who knew him but of all who had ever seen him or heard him speak. He was a marked personality, not like anyone else. In appearance and in manner, as in his mode of expression and way of thinking, he was strikingly individual, and even when in feeble health all that he did or said was charged with such vivacity and emphasis that it is particularly hard to realize that he has now succumbed to man's inexorable destiny, and that we shall never again see him moving about this Hall.

He was one of the most widely known members of this House, one of its most brilliant and entertaining speakers, one of those who held the most pronounced opinions, and one who voiced them with a vigor and clarity all too rare. Yet I think it safe to say that our distinguished colleague will be more remembered for the great-hearted human being that he was than for anything that he did or said of an official nature.

To be sure, he was one of the few whose speeches in the House always commanded attention, for whom the benches filled when it was known that he was about to take the floor. His speeches glittered and sparkled like fireworks on a summer night. They glowed with irony, satire, and surprising words. They left no one in doubt as to where he stood upon the mooted problems that he discussed, or whom his playful wit was intended to touch. Yet his shafts glistened without burning or causing pain. After all it is not so much as JAMES A. GALLIVAN, Member of Congress, that we will remember our colleague. It is as JIMMY GALLIVAN, the keen-witted companion, everybody's friend, one of the most popular figures in the House. Everybody knew him. Everybody liked him. Everybody enjoyed his humor. Even those who were victims of his raillery were fond of him, because his pointed arrows were free from venom.

The regard in which he was held was not bounded geographically or limited to party lines. He had friends in all parts of the country and in all walks of life, as he had them in all corners of this House. There are many, I am sure, among Republicans as well as Democrats, who cherish the recollection of some occasion when JIMMY GALLIVAN went out of his way to do a friendly act. I recall the first time when I had spoken on the floor of the House. I had not said very much but he knew that it was my first appearance, and it was JIMMY GALLIVAN, the Democrat, who quickly stepped across the aisle and gave me the first reassuring handclasp. There are doubtless many others who recall a similar experience on their first appearance before the House, and who will always cherish an intimate personal remembrance of that same warm sympathy which such an act betokened.

It was JAMES GALLIVAN'S intuition and thoughtfulness of others, his innate generosity, that link him tenderly to us in memory. He was always thinking of what he could do to make life easier for others, how he could help them, how he could act as their friend. He was the idol of countless men, women, and children in the part of Boston where he lived. He was a helpful comrade to numberless veterans, a good Samaritan for the disabled and unfortunate of every sort and kind.

They will miss him, as we shall miss him, that friend of a multitude of friends, our brilliant colleague who has gone from us, JIMMY GALLIVAN.

Mr. BOYLAN. Mr. Speaker and gentlemen of the House, we come here to-day to pay tribute to the memory of our colleague who has passed on. While I did not have an opportunity of being associated with him as many years, perhaps, as others here present, yet long before I met him I had heard of him. He was no stranger to our city. I might say in passing that our Mayor Walker was a very dear personal friend of his, and he regrets exceedingly that he is unable to be present at these services to-day.

Upon meeting Representative GALLIVAN I was much impressed with him. After association with him I soon learned of the many splendid and sterling qualities he possessed. Coming, as he did, from a State noted for able men, noted for men who had made their mark in the Congress of the United States, he ever revered its traditions and carried on in a manner befitting the honor of that glorious State.

I can recall one of his outstanding attributes, that of gratitude. In my conversations with him he often spoke of the sacrifices of the dear father who, at great personal effort, gave him an opportunity to secure an education, and all during the years he said that the greatest thought he had was of the untiring zeal and devotion of that father who had sacrificed everything to give him his chance. And, let it be to his credit, he embraced it. During his service as a member of the House of Representatives of Massachusetts, as a member of the State senate, and as a city official in the city of Boston he discharged every service that was his in a highly creditable and satisfactory manner.

When the greater field of endeavor opened its doors to him as he came to this House he realized the opportunities that were his. He realized its responsibilities and its duties. Every effort made by him while sitting as a Member was to help his beloved city and State, together with working for the general welfare of our country.

That was never more fully exemplified than in an incident that occurred only yesterday, when his colleague [Mr. DOUGLASS] requested and secured permission to insert in the RECORD a speech which Mr. GALLIVAN had prepared before his passing to make on the merchant marine of our country. He ever thought of the interests of the people and the policies of our Government. Through his life every day he manifested rare strains of character—strains impelling him to perform devotedly the duties of the hour, strains giving him a high appreciation of the value of duties well done, and all woven into a beautiful pattern. And suddenly the pattern was completed, and he folded up his loom and passed on. But yet in that passing the many beautiful strains of loyalty, devotion, and duty stand out conspicuously; and while we to-day say "Farewell" to the memory of our distinguished colleague, yet we do not really say "Farewell" in the sense that we shall forget him, because the words he uttered and the duties that he accomplished here will ever live with us. And while no great memorial may be raised to his name or mark his last resting place in his beloved State, yet a far greater monument will be raised to him. A monument will be raised to him in the hearts of the men, women, and children of the great city of Boston, of the people of the great State of Massachusetts, and of hosts of friends throughout this country. In their hearts will be erected a monument more enduring perhaps than that of a material character—a monument that will ever live in their memory, founded on the respect and appreciation they held for the man who did so much for them individually, for humanity, and for his country.

Mr. REED of Arkansas. Mr. Speaker, and ladies and gentlemen of the House, again the death angel has come among us and taken from our midst a stalwart Member of this House, Hon. JAMES A. GALLIVAN, from the State of Massachusetts. Mr. GALLIVAN had been a Member of Congress for a long time, being elected to the Sixty-third and succeeding Congresses. During my four years of service, of course, I had the pleasure of knowing and to some extent, I trust, appreciating the character of this distinguished man. I will endeavor to speak of the deceased as he impressed me. Our deceased friend was an affirmative character, a trait many of us probably do not too strongly possess. He had or took early advantages in order to acquire qualifications to combat the battles of life, being an A. B. from Harvard, one of the great universities of the world.

I said that the deceased was an affirmative character. He took a decided stand for policies and measures that he deemed to be right and for the best interest of his country and advocated them forcibly and uncompromisingly. He was courteous and affable in debate though never flinching from the ideas formulated in his mind and by him reasoned to be to the best interest of his Republic. Indeed, it could be said of him that myriads of cannons could not drive him, yet a silken cord in the hands of a child could lead him. This is so often true of strong-minded individuals.

Just a few days prior to the passing of our friend I saw him in this Hall, apparently in the best of health, smiling and greeting all those with whom he came in contact. Little did we know that for the last time he heard the bells in this corridor and for the last time answered to the roll call in this Hall. Little did we think that he would be so quickly summoned to answer the final roll call in the life beyond. Should not the sudden demise of this venerable statesman serve to remind us of the certainty of death applying to each individual, irrespective of apparent physical strength or the ambition to live? I sometimes think as we move along down the hum and hustle of this life that we sometimes think and act as if death only applied to those who have lived in the past and not to those of us who yet live. It does seem that we hang on to this life with a very narrow thread, not knowing the time or the occasion when and how we shall go, with only an ambition to live and a want of appreciation of the certainty of going.

To those who were near and dear to him by the ties of blood I feel that I can speak with some degree of appreciation, being one who is acquainted with grief and not unknown to sorrow along this line.

Notwithstanding we shall miss our friend in this Hall, and notwithstanding his loved ones will miss him much, all of us should be benefited by having been associated with and gained much from the contributions he made toward the solving of questions of legislation and of the example he set as a son, husband, and father in the private life he loved so well.

To those of you who are familiar with the life's work of this great man no encomium from me would seem necessary. The tens of thousands who followed his remains to their last resting place in the world-renowned city of Boston fully attested the very high regard with which his own people held him. I was forcibly impressed with this observation at the grave, that notwithstanding the many thousands I observed who bore evidences of possessing the luxuries of this life there were many there who doubtless occupied an humble station in life; they were there to shed their tears, and I was reminded of the passage that "the common people heard him gladly."

Indeed, the ever-ready tongue of the statesman is stilled, the eloquent voice is silent, but have we not the right to expect and presume that the faculties which served him here have greater opportunity for usefulness in the bright life Elysian?

Mr. MEAD. Mr. Speaker, we gather here to-day to pay tribute to the memory of a departed colleague, Hon. JAMES A. GALLIVAN, who during his membership in this House of Representatives rendered distinguished service to the Nation.

It was my happy pleasure to have made his acquaintance at the beginning of the Sixty-sixth Congress, when I first became a member of this body.

During the intervening years I grew to know him, to admire him, and to appreciate his courage, his ability, and his character.

He was a determined fighter for the principles of government as he interpreted these principles.

He was a relentless foe when battling for a righteous cause. His fearlessness, courage, eloquence, and magnetic personality made him the leader that he was and left a lasting impression upon us all.

Everybody seemed to know JIMMY GALLIVAN, as he was affectionately called, and while Boston and Massachusetts may claim him as their own, his name, as well as his fame, is known throughout these United States. He belongs to the Nation, to the Nation he served so well during all the years of his membership in Congress. He was a staunch advocate of American rights and liberty in that terrible conflict, the World War. That was the period that tried men's souls, tried their patriotism, their endurance. Mr. GALLIVAN had patriotism, devotion, endurance. He was ever ready to meet the issue, whatever it turned out to be.

He was honest in his convictions, and he had the will to fight for them. He loved the people who sent him to Congress, and his every act and word was governed by the desire to serve them as well as the Nation. He was in turn beloved by every man, woman, and child in his district, which was proven by his being returned to Congress by immense majorities.

I personally deeply mourn the passing of our colleague and friend, and in all sorrow and reverence we commend his spirit to our Heavenly Father from whom it drew. May his soul rest in peace.

Mr. DOUGLASS of Massachusetts. Mr. Speaker and Members of the House, when our colleague, the late Hon. JAMES A. GALLIVAN, of Massachusetts, crossed the dark river, a rare and radiant personality passed on, leaving a distinct void in this legislative body. The most vital attribute of that shining personality was his capacity for friendship. He made friends rapidly and retained them. The sad news of his sudden and untimely taking off came as a shock to a host of friends who had learned to love and admire him with deep affection. In his death every one of his colleagues in this House and thousands of friends in every part of the Nation experienced a sense of personal loss. This was because to JAMES A. GALLIVAN friendship was something more than a name. It was a passion and a virtue. It was a part of his very being. His last trip from Washington to his congressional district was undertaken that he might be present in Boston to attend a testimonial banquet to a lifelong friend, a brother Elk. It was but shortly after this pilgrimage for friendship's sake that our colleague was suddenly summoned to that "undiscovered country from whose bourne no traveler returns."

JAMES A. GALLIVAN was a Bostonian born and bred. He always lived in his beloved South Boston, to whose generous people he owed all his political honors. He was born in humble circumstances and was the architect of his own fortune. He died a poor man, which was the outstanding proof of his political integrity. Had he continued in his profession of journalism, to which he devoted the earliest years of his manhood, I have always felt that, with his rare command of language and his other scholarly attainments, he would have reached the heights of fame and fortune.

He loved his native Boston and Massachusetts with more than filial devotion. To the welfare of both he gave his manifold talents unstintedly and unsparingly. He cherished the lofty traditions and high ideals of Boston and Massachusetts, and lived up to them worthily. He was a product of Boston's public schools and a graduate of Harvard College, where he distinguished himself both as an athlete and as a scholar.

In politics he was a Democrat by inheritance and by choice. As a Democrat he was staunch, unflinching, and always forceful; but he never put partisanship above principle or State or country. Socially he was the personification of good-fellowship and enlivened every gathering that he entered. Wherever he sat was the head of the table. As a man he was upright, direct, straightforward, generous and charitable to a fault, a loyal and faithful friend, ever ready and willing to help or accommodate a suitor for favor. He was an Irishman in every nerve and fiber of his being, passionately proud of his ancestry and his religion, but withal he was strenuously American to the core. As a legislator he was active and unafraid, industrious and enthusiastic. As a debator on a chosen subject he had few equals and no superiors. In legislative combat his sword knew no brother; off the floor he was the soul of contagious congeniality.

He served two years in the House and two years in the Senate of Massachusetts with honor and distinction, gaining in the legislature of that historic Commonwealth the invaluable training and experience that were to fit him for his subsequent preeminent career in the National House of Representatives. Later, for 14 years, he served his native city as street commissioner. In that capacity, out of his broad, artistic mind, he devised plans to widen and beautify the streets and avenues of Boston. By vote of the City Council of Boston, passed since his death, one of those great highways, connecting the city of Boston with the beautiful South Shore of Massachusetts Bay, will carry his name on to future generations as Gallivan Boulevard.

He was first elected to Congress in April, 1914, to fill an unexpired term in the Sixty-third Congress. From that time on he served continuously in this honorable body until his death. This 14 years of continuous service here in Washington was the longest term ever given, I believe, to a Democratic Congressman from Massachusetts. It was proverbial in Boston that JIMMY GALLIVAN, as he was affectionately called, plain, honest JIMMY GALLIVAN, friend of the veteran, benefactor of the poor and lowly, defender of every just cause, fighting, typical, brilliant representative of his race and his party, could go to Congress as long as he wished. This consensus of opinion among the belligerent Democracy of the Athens of America was indeed the acme of praise and the consummate proof of the high esteem in which our late colleague was held by his immediate neighbors and constituents.

At any time within the past decade he might have been mayor of the great city of Boston had he desired to run for that exalted office, but, as he often told me in private conversation, he preferred the life of a Congressman, exacting though he found it, because he felt that Congress offered greater opportunities for real, self-sacrificing public service. The material monument at home to his congressional service will be the new Boston post office, which was the darling project of his heart and for which, as an influential member of the powerful Appropriations Committee of this House, he labored long and successfully.

What more need I say in memory of my departed friend and yours? Eulogy, however eloquent or prolonged, the sigh, the tear, fond recollection, can not resurrect our late colleague's charming, unique personality. His eloquent voice is forever stilled. Gentlemanly, dramatic JAMES A. GALLIVAN has gone forever from this arena of his legislative labors and triumphs. "He is gone and we shall miss him." That is his best and fittest eulogy; the memory of him survives fragrant. If his gentle spirit be hovering over us in this commemorative pause—and who shall say that it hovers not?—if that hovering spirit of our departed brother could speak to us now across the ethereal, invisible bridge that separates time from eternity, it would, I feel, as his intimate friend, voice this message:

Commend not my virtues. I was but human. Pray for me.

So, friends, remembering that, as the Scripture sayeth, "It is a holy and a wholesome thought to pray for the dead," let us now, in unison, humbly and devoutly, with full Christian confidence in the infinite mercy of the Almighty, send to the foot of His throne this our supplication for our departed brother:

Eternal rest give unto him, oh, Lord, and let perpetual light shine upon him! May he rest in peace!

Mr. LUCE. Mr. Speaker, these just appreciations, so admirably phrased, leave little opportunity to make additions that are not repetitions. With these judgments I agree. To them I would contribute only that recollection of our friend which will stay in my own mind.

I never met him but I was happier for that meeting; always a word of cheer; always the embodiment in his language and in his attitude of good will and human interest; ever the avowed desire to help. He remembered the words of the Master—

He that would be greatest of all, let him be the servant of all.

Reference has been made to his long membership here. Reelection repeated so many times, from a community that has not been accustomed to give its Representatives such long opportunity, is the best proof possible that he was the servant of all. When I came to Congress it was with the expectation that I should find occasion for individual and personal service which might not be altogether pleasant; but, like all of you, I quickly found that the chance of service is one of the real compensations for such sacrifices of ease and comfort as membership in the House entails. He recognized this, that he was called to be the servant of his neighbors and friends. He gave to them his strength and his personal attention. He gave to them his time and his effort. They appreciated it, and they sent him back here because he had been their faithful servant. And after all, a tribute thus given by a man's neighbors is the most precious and the most honorable.

I would also emphasize the radiance of his life, to which reference has been made by those who have preceded me. He took life gaily; he took it happily and joyously. He might have spoken of himself the beautiful lines of Henry Van Dyke, lines that express my own judgment of the man and my own belief as to the characteristics by which he will longest be remembered:

Let me but live my life from year to year
With forward face and unreluctant soul,
Not hastening to nor turning from the goal;
Not mourning for the things that disappear
In the dim past, nor holding back in fear
From what the future veils; but with a whole
And happy heart, that pays its toll
To Youth and Age, and travels on with cheer.
So let the way wind up the hill or down,
Though rough or smooth, the journey will be joy;
Still seeking what I sought when but a boy,
New friendship, high adventure, and a crown.
I shall grow old, but never lose life's zest,
Because the road's last turn will be the best.

Mr. DALLINGER. Mr. Speaker, that grim reaper, Death, has certainly wrought havoc in the ranks of the membership of the Seventieth Congress. Three Members of the Senate and eight of our colleagues in the House of Representatives have been taken from our midst and have passed to the great beyond.

On the 3d of last month we heard with profound sorrow of the passing of our dear friend and colleague, Hon. JAMES A. GALLIVAN, a Representative from the twelfth district of the old historic Commonwealth of Massachusetts who for the past 14 years had given to his district, his State, and to the Nation able, faithful, and distinguished service.

My first recollection of JIM GALLIVAN was when, as a Cambridge school boy, I witnessed his brilliant work as second baseman of the Harvard baseball team. Then in the full vigor of his young manhood, he put his whole heart and soul into the task before him with the same energy and enthusiasm that characterized his whole private and public career in after life.

Ten years later it fell to my lot to serve with him in the Massachusetts Legislature where, although belonging to a different political party, I worked shoulder to shoulder with him in securing the enactment of legislation in the interest of the people of our own State. As a result of this work in a common cause, strengthened by the fact that his younger brother was a classmate of mine at Harvard, there grew up between us a warm friendship that increased with the passing of the years.

Even in those earlier years of his political career, he possessed the confidence and affection of the people of his district and I well remember the button which the voters of South Boston wore during the campaign with the inscription, "Our Senator."

After his retirement from the legislature he gave to the city of Boston long and honorable service as street commissioner, and early in 1914 he was elected to fill a vacancy in the Sixty-third Congress. In November of the same year it was my good fortune to be chosen a Member of the Sixty-fourth Congress, and in December, 1915, we again became colleagues in the work of legislation.

With his work in this body, my colleagues, you are as familiar as I am. No Member of the House was more devoted to the interests of his district and State than JIM GALLIVAN. The veterans of all wars, particularly of the World War, had no better friend than he. He was the fearless champion of the wage earners and the friend and comforter of the fatherless children and widows and of all who were desolate and oppressed. Above all, he was a loyal American in ever fiber of his being, proud of his city, his State, and his country. Whenever he addressed the House he was listened to with respect and attention because of the sincerity and eloquence with which he pleaded the cause which he had at heart.

Although we belonged to different political faiths and did not always agree on public measures, he was my friend and I was his friend and I loved him. In his taking away I have suffered a great personal loss. I therefore count it a privilege to pay this tribute of respect and affection to his memory and to express to his widow and family my most heartfelt sympathy in their bereavement.

For their consolation, as well as for my own, I like to think of those words of that grand old man, Victor Hugo:

When I go down to the grave, I can say, like so many others, "I have finished my day's work," but I can not say, "I have finished my life." My day's work will begin the next morning. The tomb is not a blind alley; it is a thoroughfare. It closes at the twilight to open at the dawn.

And so it is with our dear friend and colleague, JIM GALLIVAN. He has fought a good fight, he has finished his day's work here only to commence it again to-morrow on the other side of the river which we call Death.

My colleagues, the best and most enduring thing about our service here is the friendships that we make. In the words of that old familiar hymn:

Blest be the tie that binds
Our hearts in Christian love;
The fellowship of kindred minds
Is like to that above.

And that tie is not broken by the change that we call Death. The earthly bodies of our friends and colleagues may be buried in the grave, but the real selves whom we have known and loved still live and are in fellowship with us—

When for a while we part
This thought will soothe our pain;
That we shall still be joined in heart
And one day meet again.

Mr. MARTIN of Massachusetts. Mr. Speaker, we assemble to-day to pay tribute to an esteemed friend and colleague, a distinguished son of Massachusetts, who has departed from this world for the realm to which all are eventually summoned.

JAMES A. GALLIVAN is dead. A brave man has gone to receive the reward he justly earned. It was always inspiring to observe the courage with which our colleague fought for the principles he cherished. No man in public life had stronger convictions and no man was ever more steadfast in the support of those convictions. He was a stalwart Democrat, but his partisanship was not of the character which prevented him from joining in any movement for the advancement of Massachusetts, New England, and the country. Neither did his partisanship prevent his lending a helping hand to the Republican colleagues from his native State.

JIM GALLIVAN was a kindly man. He loved to help the unfortunate. No charitable cause ever failed to enlist his ready sympathy. No one in trouble ever appealed to him in vain. It was this great spirit of helpfulness so characteristic of our dead colleague which united him with grips of steel to the people of his district regardless of party affiliation.

His service in the National House of Representatives was brilliant. His ability won for him a place on the all-powerful Committee on Appropriations, where he rendered conspicuous service. He was a forceful, ready debater, and fortunate, indeed, was the cause which found in him an advocate.

With the departure of Representative GALLIVAN, Massachusetts has lost a beloved son, the Nation a splendid public servant.

Mrs. ROGERS. Mr. Speaker, Congressman GALLIVAN's campaign folder was headed "Congressman GALLIVAN Talks to His People." It might well have read "Congressman GALLIVAN Talks for His Friends." I know of no one who has been in Congress more ready to talk for his friends or more ready to perform acts for his friends. No matter with whom or how many he was talking, he always stopped to give a friendly

greeting. He personified the big warm heart of the Irish. In my own case, a beginner in the school of politics, and of the opposite party, he always gave me kindly and encouraging counsel, and I know in so many instances that he had little idea would be brought to my attention, of words of commendation that would prove helpful to me in my district. My colleagues can testify that he treated them in the same spirit. One can never forget such friendliness.

The hundreds of men, women, and children who stood with bowed heads as his funeral procession passed bore mute testimony to the love and respect in which his constituents held him.

He was always thinking of the comfort of others. It was he, while a member of the Massachusetts State Legislature, who passed the bill that street cars should be heated during the winter months. It was he that secured legislation that authorized free transfers on street cars. And it was his great heart and brain that conceived the idea and secured the enactment of the bill that authorized the erection at Rutland of a State tuberculosis hospital. This was the first State hospital of its kind to be erected in this country and is a great monument to his memory, as hundreds of lives have been saved by the care given in that hospital. His fight for the veterans' bonus was a notable one and he never stopped fighting for any cause that he considered just.

In 1923 the New York World described him as "the best fighting man Massachusetts politics had produced since the days of Ben Butler." He fought hard and he never gave quarter, but he always fought fair, and his fights on the floor of Congress were never personal fights. I doubt if he ever had a personal enemy during his entire service in the House of Representatives. He was beloved even by his political antagonists. He was one of the greatest baseball players that Harvard College ever had, and his political home runs were as effective as those on the diamond. JAMES GALLIVAN was essentially one of the people. He was not born with a silver spoon in his mouth, and everything that he accomplished he acquired by himself by persistent, hard work. He had a brilliant mind, and when the Members knew that he was to speak in the House there was a large and rapt audience. The Members recognized his great intelligence and ready wit and knew that they would have a feast of reason.

He portrayed his subject in a fascinating way. While he was in the Massachusetts House of Representatives he was appointed by the speaker of the house to write the history of a gilded codfish which has hung for generations behind the speaker's chair. The men on Beacon Hill had little idea that anyone could write an interesting literary book on this seemingly dull subject. Mr. GALLIVAN wrote the story of the emblem so interestingly that it was copied in every part of the United States and is now on the book shelves of every public library in America.

While one may remember him for one quality and another for another, the one that we all shall cherish in our hearts is the memory of his loyal friendship. Our gallant, lovable, able, patriotic American legislator and friend has died. In life he proved that "it is not life that matters but the courage that we bring into it." He has not really died, just gone on before, and the good that he did will live after him.

Mr. STOBBS. Mr. Speaker, I am very glad to have this opportunity of adding a brief word of tribute to the memory of our late colleague, Hon. JAMES A. GALLIVAN.

Coming to Congress as I did comparatively recently—a new member from his own State—I can speak only in the most grateful terms of acknowledgement of the many and gracious courtesies extended and above all, of the friendly spirit and interest displayed at all times by him toward me as a new Representative, although a member of a political party other than his own.

JIM GALLIVAN, as he was affectionately called, abounded in lovable and admirable qualities and characteristics. He had a wonderful capacity for friendship and his friends meant everything to him. There was nothing within reason he wouldn't do for his friends, and they came from all walks of life—social and financial prominence meant nothing—it was the man himself and what he stood for that appealed to JIM GALLIVAN.

He was a most effective speaker on the floor of this House and elsewhere. His speeches sparkled with wit and clear phrasing and remarkable use of alliteration.

His stand on all public questions was broad gauged and free from narrow partizanship and intolerant view point. He was absolutely fearless in his espousal of causes which appealed to his sense of justice and of fairness irrespective of party affiliation and alignment.

But his outstanding characteristic to my mind was his loyalty—loyalty to his friends, loyalty to his college, loyalty to his city and State, and loyalty to his country.

He radiated the very atmosphere of loyalty. There was no more loyal Harvard man ever lived than Congressman GALLIVAN, and no man was more proud than he of his Harvard "H" which he won playing on a Harvard baseball team.

To him Boston was literally the Hub of the Universe and anything pertaining to its welfare lay very close to his heart. How proud he always was of the old Bay State and how quickly he rallied to its defense, and how ready he was at all times to champion its cause.

But above all he loved his country—no one loved her better—no one could do more for the men who fought in its behalf than he. No one thrilled more at the gallant achievements numbered in her glorious history.

But the last bell for adjournment has rung for our colleague and he is with us no more. To those of us who were his associates here, and to everyone else who knew him, his memory will remain unchanged forever as one who was a true comrade, a gallant fighter, the most lovable and loyal of friends, and an American through and through.

The SPEAKER pro tempore. The Chair will ask the gentleman from Massachusetts [Mr. LUCE] to take the chair.

Mr. TREADWAY. Mr. Speaker, the privilege of participating in memorial services gives two distinct and opposite feelings. We all sorrow at the departure of a friend of many years' standing and a colleague with whom our relations were intimate. On the other hand, it is a source of gratification to be able to assist in chronicling the career of a man who leaves behind him such a record as that of our departed Massachusetts Member, JAMES A. GALLIVAN. Personally, I was greatly impressed by the remarks made by his pastor at the funeral services in St. Augustine's Church in South Boston on April 5. Father Coppinger emphasized the statement that, knowing Mr. GALLIVAN as well as he did, he was sure that his one request would be that he be not eulogized. The great crowds in and about St. Augustine's Church, ranging from leading citizens of the State to the humblest boy and girl in the vicinity, were in themselves a silent but complete eulogy and evidence of the respect and love in which Mr. GALLIVAN was held by his lifetime neighbors and associates.

Carrying out Father Coppinger's suggestion, I, too, will not try to eulogize Congressman GALLIVAN, but simply for the sake of the records briefly chronicle his life and give my own opinion of him as a man, citizen, and legislator.

He was born, reared, and received his elementary education in South Boston. From the Boston Latin School, where he graduated in 1884, he entered Harvard University and was a prominent member of the class of 1888. His skill as an athlete brought him into prominence, he gaining the coveted "H" of a varsity baseball player as the second baseman of the team that year. It is an interesting coincidence that one of the men assisting in his baseball training was later his colleague here in the person of Hon. Samuel E. Winslow, formerly Representative from Worcester.

Mr. GALLIVAN'S political training was started soon after his graduation when he became a member of the staff of the Boston Herald and later the Boston Globe where he followed the political activities of the city government.

He served in the State house of representatives in 1895–96 and in the State senate in 1897–98. Later he was twice an unsuccessful candidate for Congress. His principal connection with city affairs in Boston was during the years 1901 to 1914, when he was commissioner of streets. It was during this period that I first had the privilege of his acquaintance, as he was a familiar figure and a very welcome one about the corridors of the State house during the legislative sessions in those years.

Although Mr. GALLIVAN did not become a Member of the Sixty-third Congress for more than a year after that Congress convened, he being elected at a special session, he was one of a group of 25 who served continuously from that time until his death during this session of the Seventieth Congress. It may be of interest to note that when the Sixty-third Congress was called in special session in April, 1913, by the late President Wilson, there were 156 new Members. Gradually this number has been depleted until, when the Seventieth Congress convened, only 25 remained.

No one has been more actively engaged in his congressional work than JAMES A. GALLIVAN. He was a forceful, eloquent, and often a spectacular speaker. He was one of the few Members able to command the attention of his colleagues and interest the public. This was not necessarily because his audience agreed with his views, but on account of his powerful and unique methods of expressing his sentiments. No one en-

joyed a rough and tumble debate (if I may use the term) more than he did, and very few Members were his equal in repartee.

Following the war he proved his interest in the welfare of the doughboy by his active support of all legislation beneficial to the interest of the veterans. He was known as a particular friend of the Yankee Division and defended its officers from the criticisms some of the Regular Army officers made against them.

He was one of the best-known opponents in Congress of the eighteenth amendment and he rarely missed an opportunity to voice his opposition to that amendment. As a Member of the great Committee on Appropriations he was diligent in the preparation of bills submitted by the subcommittees and often participated in support of the measures reported from the committee on the floor of the House. He was a great admirer of the chairman of that committee who soon followed him into the Great Beyond.

No one knew his constituents better or was more respected by them than Congressman GALLIVAN. His familiarity with all civil affairs in the city of Boston, his intimate association with the city leaders, and his close touch with the district he represented made him both a power here and a most popular man in his district and city.

I knew Mr. GALLIVAN intimately nearly as long as any man in the Massachusetts delegation and I, like my colleagues, realize that we have lost a sincere friend and that the State we represent has lost an honored citizen and a fearless legislator.

Thus ended a career filled with usefulness, sincerity, and integrity; a man among men. We are not eulogizing him to-day, but testifying to his worth, ability, and honored citizenship.

Mr. CONNERY. Mr. Speaker, ladies and gentlemen of the House, in the passing of the Hon. JAMES A. GALLIVAN, late Representative in Congress from the twelfth Massachusetts district, the House of Representatives has lost a great Congressman. Every Member of this body well remembers his vivid personality, his laughing good humor, his fighting Irish spirit, his wonderful gift of repartee, and his whole-souled humanity. He will be sadly missed, for JIM GALLIVAN is dead!

His ability was recognized throughout the entire length and breadth of the land. His speeches were known from Maine to California, from the Great Lakes to the Gulf of Mexico.

It is futile for me to attempt to eulogize him in the manner which he deserved. The effect of the news of his death upon the membership of this House manifested most strikingly the esteem and affection in which he was held by his colleagues.

To me his death means a personal loss. JIMMY GALLIVAN was my friend. As a small boy in Lynn, Mass., the name of Gallivan on my dear father's lips was a great name to me. In the Connery home many times I heard the story of JIMMY GALLIVAN, a son of hard-working Irish immigrant stock; to use his own words, of one of the early Cunard families in contradistinction to those who boast of *Mayflower* blood; of the boy who made his start on the sandlots of South Boston, and who, when he entered the famous Boston Latin School, had already made a local reputation as a baseball player.

I heard the story of his being awarded the Franklin medal, an honor that in Boston means more to the young fellows in Boston schools that the Ph. D. grown-up men work for over a period of years.

So it was but natural that after completing his course at Boston Latin School, with his scholastic and athletic abilities already proven, he should desire to obtain a higher education. Accordingly, he entered Harvard University. This meant great financial sacrifice for the family, but these good Irish parents, true to the traditions of their race, were only too glad to make any sacrifice which would help their boy attain the heights which he sought.

Among his classmates were men who have since made great names for themselves in diplomacy, letters, arts and sciences, law, church, and public affairs.

Fate plays strange tricks. In the late eighties, when JIMMY GALLIVAN was at Harvard, the coach of the Harvard baseball team was Samuel E. Winslow. He it was who discovered the real baseball ability of GALLIVAN, took him from the substitutes, and placed him as regular second baseman on the varsity team. Is it not a coincidence that the teamwork developed by GALLIVAN and Winslow in Harvard athletics paved the way for such wonderful intellectual teamwork by these two great men in the Halls of Congress some 25 years later, when JIMMY GALLIVAN became the Hon. JAMES A. GALLIVAN, representing the twelfth Massachusetts district, and Sam Winslow became the Hon. Samuel E. Winslow, representing the fourth Massachusetts district?

Young GALLIVAN distinguished himself at Harvard not only as an athlete but as a student, for upon completion of his course he was awarded his A. B. degree, magna cum laude.

In my father's office in Lynn, from the lips of the Hon. John P. Feeney, who was probably JIM GALLIVAN'S closest friend and who is likewise an intimate friend of my father, one of Boston's foremost citizens, I heard the intensely interesting story of the days when JIMMY GALLIVAN was a newspaper man, with politics as a side line. He was born in South Boston, and it follows as a matter of course that anybody born in South Boston must have a real love for politics. South Boston is a section where politics are taken seriously 365 days in the year, and where a man who seeks public office must have the courage of his convictions. No one ever doubted the courage of JIMMY GALLIVAN.

Having established himself as a real fighter for the interests of the people, he had very little trouble in being elected to the Massachusetts State Legislature. There he served as representative in the years 1895 and 1896. He made such a fine record as a legislator that the people of his district sent him to the Massachusetts State Senate, where he served in 1897 and 1898.

In 1900 he was elected by the people of Boston as street commissioner, which office he held continuously for 14 years.

In April, 1914, he was chosen at a special election to fill an unexpired term in the Sixty-third Congress, to represent the twelfth Massachusetts district. He served as a Member of Congress until his death on April 3d last, having been reelected to the Sixty-fourth, Sixty-fifth, Sixty-sixth, Sixty-seventh, Sixty-eighth, Sixty-ninth, and Seventieth Congresses.

What shall we say of him as a Congressman?

He was intensely patriotic. He was interested in all legislation which came before the House. He liked to feel that he was not provincial, and nothing pleased him more than to be called the All-American Congressman.

Veteran legislation was close to his heart. All during the late war he fought hard in Congress for legislation which would provide for the proper equipment of the boys called to the colors so that they would be under no handicap in facing the enemy.

After the armistice the Twenty-sixth, or Yankee Division, which had made such an enviable record and, facing tremendous odds had been literally cut to pieces in the Argonne Forest was left in a stranded condition up in the mountains in France, with divisional headquarters at Montigny le Roi. No one in Congress could find out from the War Department whether this division was to be sent into Germany as part of the Army of Occupation, or whether it was to be sent home. It was my privilege to be a member of the One hundred and first Infantry of that division, and I know that all my buddies of that division, at that time, felt very keenly that we were being discriminated against in not being allowed to go into Germany in the Army of Occupation after the wonderful record of fighting which the division had made during the war.

On February 1, 1919, JIMMY GALLIVAN, in what has been called one of the finest speeches ever delivered on the floor of this House, called the attention of his colleagues and the country to the many injustices which had been inflicted on that division, as well as on other National Guard organizations in France. It took great courage for a Member of Congress, in war times, to criticize the conduct of the War Department. However, Congressman GALLIVAN, in that speech, demonstrated his fearlessness by raking the General Staff from stem to stern, sparing no one in his startling exposé of the methods then in vogue.

His speech was so effective that orders were issued shortly thereafter which brought the Twenty-sixth Division back to New England.

He was always an advocate of organized labor. On numerous occasions he went out of his way to aid in the passage of labor legislation that otherwise might have been defeated. He freely gave his time before committees and on the floor of the House in the interest of labor.

He was ever the friend of the poor and the unfortunate; his heart was big, and he gave, not only of his time, but of his purse to the needy and distressed; and JIMMY GALLIVAN was a poor man.

JIMMY GALLIVAN is dead!

Is there any Member of this House who can not visualize him, standing here before the Speaker and addressing the Members of the House? Is there anyone who will not remember his flashing eye, his perfect command of English, his expressive gestures, his ready repartee, his fine gift of oratory, his remarkable memory and his all-embracing GALLIVAN smile, whether it be after a speech of felicitation, or after a glorious battle just ended?

We will surely miss him!

He was my friend! He had been my father's friend for 50 years. When I came to Congress he acted as a father to me. I was in his office every day and he always had a cheery word or some helpful suggestion to offer. He called me his pal. I will miss him!

Like Mark Antony, gazing on the dead face of Brutus, I can but say:

His life was gentle and the elements so mixed in him that nature might stand up and say to all the world, this was a man!

May his soul rest in peace!

Mr. O'CONNELL. Mr. Speaker, my service in this House now nearing the completion of eight fruitful and delightful years of companionship and friendship has been signalized by an opportunity for the greatest education that our country now affords to any American citizen.

When we assemble in this historic Hall to pay tribute to the memories of our departed colleagues we fully realize the responsibilities and the duties that bring us here and the value of their association and services. At such a time we stand in the presence of a great mystery in which we are all eventually equal. High or low, rich or poor, millionaire or mendicant, king or subject, all must answer the same call to march through that grim and ghostly cordon beyond which we may well all meet when the sun goes down and the final day is done.

The grim reaper during the past few months has been active in our ranks, and to-day we assemble to honor the life, the achievements, and the memory of JAMES A. GALLIVAN, a Representative from the great State of Massachusetts.

I shall find it difficult to enter this sanctuary during the remainder of my tenure of this great office without thinking of my friend who is gone.

When I came here in those early days he was among the first to extend to me the hand of friendship and fellowship, and his keen experience and ripe judgment guided me aright through many a doubtful and difficult situation. He was my friend, my tutor, from the beginning. He was never too busy to lend an ear to my supplications for information and knowledge on the many great problems which confront us from time to time, and his unerring judgment and recommendations were the means of keeping me from the path of error and steering me clear in many a legislative storm.

He was a forceful and eloquent speaker, and stood up manfully for those principles in which he inherently believed. Many of his colleagues did not always agree with his logic, but every Member respected and admired his rugged honesty. At times he was an aggressive, intense antagonist, but always as generous and forgiving in the aftermath of bitter debate as he was brave and fearless in the conflict. He was a man of studious habits and of tremendous energy.

We that are spared shall miss him in our daily activities, but he will live long in our affection. As they said of the martyred Lincoln, "He now belongs to the ages."

We do not ask to forget; we do not want the so-called consolation which time brings; we would rather that the wound should ever be fresh than that the image of a friend like him should fade. He has simply joined the choir invisible.

Mr. COCHRAN of Missouri. Mr. Speaker, I have been very much impressed by the many beautiful tributes that have been paid to the memory of my friend and colleague, JAMES A. GALLIVAN.

I first made his acquaintance in 1914, when he was elected to Congress at a special election to fill an unexpired term. At that time it was my privilege to be secretary to Hon. William L. Igoe, of Missouri, whose office was on the fifth floor of the House Office Building. Mr. GALLIVAN was assigned to an office a few doors from ours. I was attracted to him from the first, and our friendship increased as the years passed on. He would often speak to me of the days of his youth and of his education in the public and private schools. He entered Harvard University at an early age, and after a brilliant career as a student secured his A. B. degree, 1888.

He first became identified with public affairs by his election to the House of Representatives of Massachusetts, and several years later became a member of the Massachusetts Senate. He was elected street commissioner of Boston in 1900 and held that office until his district sent him to Congress in April, 1914. He had the unusual honor of being elected to each succeeding Congress without practically any opposition from any other political party.

In my opinion no man ever served his district more faithfully nor more intelligently. He found real pleasure in doing the small things for his friends and constituents. No detail was too small for his personal attention. His sympathy for those in distress brought to him many pathetic appeals and made it necessary for him to give his undivided attention to the needs of his district and State, which he did willingly.

Because of his wide experience and fine education he was able to handle the very difficult national problems which confronted him, not only in the House but in the committee of which he was a member—the important Committee on Appropriations. I have heard him say that he preferred the work of his committee to work on the floor of the House, although it necessitated his being in Washington sometimes a month before and after the session. He referred with pride to the part he had taken in drafting the many difficult measures reported out of that committee and to the gigantic problems referred to it.

His ability to do things made him soon recognized as one of the strong men of the House, and his presence was always felt when he was on the floor. He was a fine orator, strong in debate, gracious in manner. He possessed a carrying as well as pleasant voice, an abundance of common sense, and a keen sense of Irish wit and humor. He possessed also that rare faculty of making and retaining intimate friendships. He had the habit of remaining in his office for hours after Congress had adjourned, and, being a near neighbor, I took advantage of the opportunity to visit with him and get his viewpoint and advice on political and legislative problems. This he willingly gave. He loved to see others rise, and it was his willingness to assist others to realize their ambitions that attracted people to him and caused them to stand by him so loyally and to honor him for so many years, as his constituents had done.

I have been told that he never went home that he did not find a group of people awaiting him at the station, many of whom had never met him, but all there—just waiting to grasp the hand of their friend and beloved Congressman.

Massachusetts has sent many brilliant men to Congress, but I know of none who served more unselfishly, honestly, and devotedly than JAMES A. GALLIVAN.

Mr. BYRNS. Mr. Speaker, in the passing of the Hon. JAMES A. GALLIVAN the House of Representatives lost one of its most brilliant and beloved Members. His death came as a great shock to his colleagues, and it is difficult for us to realize that his voice will be heard no more in this Chamber where he served for so many years.

I wish that I had the facility of speech with which I might adequately express the genuineness of my own grief at his death and my great appreciation of the friendship which existed between us from the time he became a Member of Congress in 1914. From that time until his death we served together on the Committee on Appropriations and as members of the same subcommittees. There soon sprang up a friendship between us which was only severed by his death, and which will be to me so long as I may live a pleasant memory.

JIMMY GALLIVAN was a loyal friend. Nothing pleased him more than to be able to render a service to a friend. Indeed, Mr. Speaker, a generous, kindly spirit was his chief characteristic. It was this lovable trait in his character, his friendly sympathy for his fellows, and his earnest desire to help and to serve others which made him the most popular and highly beloved citizen of South Boston, which he represented for so many years in this Chamber.

This was clearly evidenced at his funeral service in St. Augustine's Church, in Boston, on April 5, 1928, and which I had the sad privilege to attend. The church was filled with sorrowing friends from all walks of life. An even greater crowd of people were assembled on the street without, and for many city blocks people, old and young, stood with uncovered heads while the funeral cortege slowly passed, bearing all that was mortal of JIMMY GALLIVAN to his last earthly resting place in a beautiful cemetery beyond the confines of that great and historic old city of Boston. There were leading citizens of his State and city. There were prosperous and successful business men. There were the honest and hard-working laboring men who had left the workshop and factory, for JIM GALLIVAN did not number his friends among any one class. He was a friend to the poor and the humble, as well as to the rich and the proud. All these were assembled, with their wives, sons, and daughters, to pay a last loving tribute to their dead friend. And as I looked into their sad faces and read thereon the full depths of their sorrow, I thought that no greater or more eloquent tribute could be paid to the kindly and generous nature of this man who had gone in and out among them all the years of his life.

And after all, Mr. Speaker, that is the best compensation one can have for sacrifices made and services rendered in this life. We all share in the hope that we may be remembered after death for some good deed, some unselfish service rendered in life. There are thousands in Boston to-day who will revere and cherish the memory of JIM GALLIVAN as long as they live.

I will not dwell on the service rendered by him in the various public offices with which he was honored. That has been done by those who knew him for a longer time than I did. He always served with ability. He had a keen and incisive mind and a power of ridicule and sarcasm which made him a dangerous adversary in debate. Easily one of the most effective debaters in the House, he did not often speak, and when he did so it was only on some subject in which he was deeply interested and on which he had strong convictions. But on such occasions his fluent and elcquent tongue was as keen as a shining rapier in the hands of a trained swordsman. He never failed to arouse and interest his audience.

He has passed on, Mr. Speaker, to that bourne toward which we are all rapidly traveling. In time of grief and lament words are unavailing, but we are comforted by an abiding and unshakable faith that the soul is immortal and that it leaves the mortal body only to find a better and higher existence in some higher sphere of life.

Mr. TREADWAY resumed the Chair as Speaker pro tempore.

ADJOURNMENT

The SPEAKER pro tempore (Mr. TREADWAY). In accordance with the resolution previously adopted and as a particular mark of respect to the memory of the deceased the House stands adjourned until to-morrow at 12 o'clock.

Accordingly (at 3 o'clock and 30 minutes p. m.) the House adjourned until to-morrow, Monday, May 7, 1928, at 12 o'clock noon.

## SENATE

MONDAY, *May 7, 1928*

(*Legislative day of Thursday, May 3, 1928*)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the bill (S. 3791) to aid the Grand Army of the Republic in its Memorial Day services, May 30, 1928.

The message also announced that the House had passed the following bills of the Senate, each with an amendment, in which it requested the concurrence of the Senate:

S. 744. An act to further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States, and for other purposes; and

S. 3674. An act to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes.

ENROLLED BILL SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled bill (S. 3438) authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota, and it was signed by the Vice President.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Fess | La Follette | Sheppard |
| Barkley | Fletcher | Locher | Shipstead |
| Bingham | Frazier | McKellar | Shortridge |
| Black | George | McLean | Simmons |
| Blaine | Gerry | McMaster | Smith |
| Blease | Glass | McNary | Smoot |
| Borah | Goff | Mayfield | Steck |
| Bratton | Gooding | Metcalf | Steiwer |
| Brookhart | Gould | Moses | Stephens |
| Broussard | Greene | Neely | Swanson |
| Bruce | Hale | Norbeck | Thomas |
| Capper | Harris | Norris | Tydings |
| Caraway | Harrison | Nye | Tyson |
| Copeland | Hawes | Oddie | Vandenberg |
| Couzens | Hayden | Overman | Walsh, Mass. |
| Curtis | Heflin | Phipps | Walsh, Mont. |
| Cutting | Howell | Pine | Warren |
| Dale | Johnson | Pittman | Waterman |
| Deneen | Jones | Ransdell | Wheeler |
| Dill | Kendrick | Reed, Pa. | |
| Edge | Keyes | Sackett | |
| Edwards | King | Schall | |

The VICE PRESIDENT. Eighty-five Senators having answered to their names, a quorum is present.

ORDER FOR EVENING SESSION ON TUESDAY

Mr. CURTIS. Mr. President, I ask unanimous consent for the adoption of the following order.

The VICE PRESIDENT. The order will be read.

The Chief Clerk read the order, as follows:

*Ordered* (*by unanimous consent*), That on Tuesday, May 8, 1928, at not later than 6 o'clock p. m., the Senate take a recess until 8 o'clock p. m., and that at the evening session, which shall not continue later than 11 o'clock p. m., the Senate proceed to the consideration of unobjected bills on the calendar.

The VICE PRESIDENT. Is there objection?

Mr. HEFLIN. Mr. President, may I inquire on what day it is proposed to have the evening session?

Mr. CURTIS. To-morrow evening. I wish to say also that one evening later this week I shall ask for the consideration of bills under Rule VIII.

Mr. HEFLIN. Under Rule VIII a Senator can move the consideration of a bill when objection is made.

Mr. CURTIS. Not to-morrow night, but at the next evening session.

Mr. KING. Mr. President, I suggest to the Senator that he modify the unanimous-consent request and have the evening session conclude at not later than 10.30 o'clock, or that we recess not later than 5 o'clock.

Mr. CURTIS. I am willing to make it 10.30.

Mr. KING. We are busy with the tax bill and shall have to devote a great deal of time to that measure.

Mr. CURTIS. It will be satisfactory to make it 10.30.

Mr. NORRIS. Does that mean that we shall take a recess at not later than 5.30 o'clock?

Mr. CURTIS. No; not later than 6 o'clock.

The VICE PRESIDENT. The clerk will read the unanimous-consent request as modified.

The Chief Clerk read the modified unanimous-consent request, as follows:

*Ordered* (*by unanimous consent*), That on Tuesday, May 8, 1928, at not later than 6 o'clock p. m., the Senate take a recess until 8 o'clock p. m., and that at the evening session, which shall not continue later than 10.30 o'clock p. m., the Senate proceed to the consideration of unobjected bills on the calendar.

The VICE PRESIDENT. Without objection, it is so ordered.

PETITIONS AND MEMORIALS

Mr. WARREN presented resolutions adopted by the Big Horn County Farm Bureau, of Greybull, and the Natrona County Poultry Association, of Casper, in the State of Wyoming, favoring the passage of legislation to provide for aided and directed settlement on Federal reclamation projects, which were referred to the Committee on Irrigation and Reclamation.

Mr. VANDENBERG presented resolutions adopted by the councils of the villages of Riverview and Sibley, in the State of Michigan, favoring the passage of the bill (H. R. 13065) authorizing the Detroit River Canadian Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Detroit River at or near the township limits of Grosse Isle, Wayne County, State of Michigan, which were referred to the Committee on Commerce.

Mr. LOCHER presented a resolution adopted by the convention of the Ohio district, International Association of Y's Men's Clubs, at Youngstown, Ohio, favoring the adoption of the so-called Gillett resolution (S. Res. 139) suggesting a further exchange of views relative to the World Court, which was referred to the Committee on Foreign Relations.

Mr. COPELAND presented resolutions adopted by the Seneca Falls (N. Y.) Historical Society, favoring the making of a special postage stamp to commemorate the sesquicentennial of the military expedition of Maj. Gen. John Sullivan in 1779, whereby aggression on the western frontier was checked and central New York was opened for colonization, which were referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of New York State, praying for the passage of legislation requiring the taking of finger and foot prints of mother and child at birth on joined cards, the identification of persons injured, lost, or otherwise unmarked, and also requiring that every alien and traveler carry an identification card with his own proper fingerprints thereon, etc., which was referred to the Committee on Education and Labor.

Mr. BINGHAM presented a letter in the nature of a petition from Sarah Williams Danielson Chapter, Daughters of the American Revolution, of Danielson, Conn., favoring the retention

of the so-called national-origins quota provision in the immigration law, which was referred to the Committee on Immigration.

He also presented a resolution adopted by the Department of Connecticut, Veterans of Foreign Wars of the United States, favoring the passage of the so-called Gold Star Mothers bill, which was referred to the Committee on Military Affairs.

He also presented a resolution of the Connecticut Chamber of Commerce, expressing its opposition to the principle of the entry of the Federal Government into the field of private industry as proposed in the Boulder Dam bill and the Muscle Shoals resolution, which was ordered to lie on the table.

Mr. WALSH of Massachusetts presented numerous telegrams and letters in the nature of petitions from business firms of the State of Massachusetts, praying for the passage of Senate bill 3890, to amend section 5 of the act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1921, and for other purposes," which were referred to the Committee on Post Offices and Post Roads.

He also presented a letter signed by Rev. Ralph A. Baker, South Acton, Mass., scribe of the Middlesex Union Association of Congregational Churches, expressing the support of the association of the Government's efforts to put into effect the multilateral treaties having for their purpose the elimination of war, which was referred to the Committee on Foreign Relations.

He also presented petitions from officers and members of the Young Women's Christian Association, of Sprinfield, Mass., New Haven, Conn., Akron, Ohio, and Detroit, Mich.; the United Polish Societies, Jersey City, N. J.; Plymouth Church, Brooklyn, N. Y.; Yale University Christian Association, New Haven, Conn.; the Erie section of the Council of Jewish Women, Erie, Pa.; Epiphany Church, Niagara Falls, N. Y.; Kiwanis Club, and Beta Missionary Society of Westminster Church, Milwaukee, Wis.; and sundry citizens of Yonkers, N. Y., Manchester, N. H., Milwaukee, Wis., and Los Angeles, Hollywood, and Long Beach, Calif., all praying for the passage of Senate Joint Resolution 122, providing for the reunion of families of alien declarants, which were referred to the Committee on Immigration.

### POSTAL RATES ON CERTAIN MATTER

Mr. WALSH of Massachusetts. Mr. President, I present a communication from one of my constituents which strikingly calls attention to the excessive and almost prohibitive postal rates imposed upon newspapers, periodicals, and magazines when sent through the mails by other than publishers or registered news agents.

The writer also, for the purpose of emphasizing the harm that results in denying reading matter to many poor people located in some remote parts of the country, attaches a leaflet from a periodical called the Cheerful Letter, in which evidence is to be seen of the pleasure and help that result to many from receiving remailed magazines and periodicals.

I took this matter up with the Post Office Department and find that the department has made several recommendations to the Congress and that there is a bill now pending before Congress, which meets with the approval of the department, providing for substantial reductions in the postal rates for mail matter of this description.

I ask that the communication, with accompanying leaflet, be published in the RECORD and treated in the nature of a petition and referred to the Committee on Post Offices and Post Roads.

There being no objection, the letter and accompanying matter was referred to the Committee on Post Offices and Post Roads and ordered to be printed in the RECORD, as follows:

BILLERICA, MASS., *May 2, 1928.*

Hon. DAVID I. WALSH,
*United States Senate, Washington, D. C.*

DEAR SENATOR: In my mission of sending reading matter to families (especially in the South) who are in great want of this in educational and stimulating lines, I have realized for the past year or two the greatly increased cost of this service from increased postal charges on this class of mail—miscellaneous magazines, etc. On Monday I mailed two packages to North Carolina section, of weight together to equal three Literary Digests, and the postage called for was 16 cents.

This rate is practically prohibitive of this service, which certainly is one of appeal to us, and I write to ask if you will present to the Post Office Department or to the congressional committee whose authority is over these rates the fact of these excessive and prohibitive charges and ask if relief can not be had?

You will, I feel, perform a needed service in this direction if you can do this.

Respectfully yours,

EDWARD F. DICKINSON.

Will you please note these requests for reading matter on leaf inclosed? It is such as these I supply as I am able.

Requests

* * * * * * *

2. I am an 18-year-old school girl. I would be glad of any kind of good books to read, also some quilt scraps or any sort. Yours truly, Ossie Carpenter, Grassy Creek, N. C.

* * * * * * *

4. I am a mother of five children and would be glad to receive any books or magazines, and I would be more than glad to receive any kind of quilt scraps for patchwork. For my reference write to Rev. Avery Powers, Grassy Creek, N. C. (Mrs.) Claud Wallace, Grassy Creek, N. C.

5. I am a poor woman and have three little children, and would appreciate some good reading or anything, as I am badly in need. Mrs. Zenn Blevins, Silas Creek, N. C.

6. Miss Thelma Jones, of Copeland, Ark., writes: "I am a young girl, age 18 years, and will teach my first term of school this summer. And it is so far to get help of any kind here. For primary work, such as busy work, books, or pictures, I am writing to see if you will help me, and surely will appreciate your help. I would also like a correspondent. I live in a very remote district, 45 miles from the railroad, and we usually have so short a term of school I want to do all the good I can in the length of time (two months)." (This appeal came too late to be published in our summer magazine. Can we not remember Miss Jones and her needs when she teaches her second term of school? B. W. A.)

7. Am writing to thank dear Cheerful Letter friends for the help they have been to the school in helping us get a library, for it has surely been a great benefit to the school, one that certainly is appreciated. We would also like books, cards, or pictures. Help of any kind from first to third grade is needed so badly and will surely be appreciated by the school. Mrs. Hazel Watson, Copeland, Ark.

8. I have just undergone a serious operation, and it will be some time before I can get around or do any work much, and I would be so glad of something to read and would appreciate so much some reeds or raffia for basketing work. I thank all the Cheerful Letter friends for past favors. Your friend, (Mrs.) Bessie McFarland, Manchester, N. C.

9. Mrs. Lelah Mabe, of Lawsonville, N. C., would enjoy receiving the Cheerful Letter magazine each month after some one has finished reading it.

10. I am a girl and live in the mountains. There are not many girls around. I get very lonesome sometimes and would appreciate any kind of books or magazines to read. For reference I refer you to Rev. I. J. Freeman, Tellico Plains, Tenn., route 1. Miss Sarah B. Jones, Tellico Plains, Tenn., star route.

11. Mrs. Carbit Wallace, of Lansing, N. C., would appreciate very much some good reading matter for herself, also some A, B, C books and cards for her little 3-year-old daughter.

12. Miss Viola Bredwell, of Decatur, Tenn., route 1, writes: "I live with my grandparents, my mother being dead. My grandparents are both old and not able to work much. Grandmother would appreciate some quilt scraps and I would like some good books or magazines suitable for my age, which is 18 years."

13. A request has been received in behalf of Miss Alice Haynes, of Bassett, Va., saying she is a very poor and afflicted little girl; her father is a cripple. She would appreciate a little cheer from some good lady. She is destitute of the advantages that other children enjoy.

* * * * * * *

15. Bessie Smith, of Polkton, N. C., route 1, is an adopted child 15 years old. She lives in the country, 3 miles from school, and attends church and Sunday school regularly. She would like books or magazines, bits of lace or ribbon, also cards for her little 3-year-old brother.

16. I am a little boy just 11 years old. I have four little brothers and one little sister younger than I. I help mother care for them. I would appreciate the Beacon paper or a small Testament to read, if any of the Cheerful Letter ladies have them to spare. I will send a reply to every paper or book I may get. Hope to see my letter in print soon. My address is Benjy Philpott, Roanoke, Va., box 224, route 5.

17. I wish to thank you all for your good cheer and kindness. I haven't words to express my heartfelt thanks. I am a poor mother and hope you all will still remember me in my distress and lonely moments. My husband is at work several miles from home most of the time, so I am left here with the children, so sad and lonely. Will enjoy any kind of cheer. May God bless you all and aid you all in your good work. Yours, Mrs. E. F. Adams, Brandan, N. C.

* * * * * * *

20. As it has been a long time since I have written to the Cheerful Letter, I thought I would write again, as I have changed my name. I used to be Miss Grace Saunders, now I am Mrs. Grace Plemons. I married a man with four small children and my husband works away from home all the time, so we get lonesome while he is away and wish some one would send me some reading matter and bits of embroidery thread. Now, I hope I have not asked too much, and may God bless every one of you. (Mrs.) Grace Plemons, Tellico Plains, Tenn.

21. Dear Cheerful Letter: We are twin girls in high school. Our mother is a widow with seven children, two sets of twins. We live in the country. Next year we will study parts of Shakespeare and would like to have "Tales of Shakespeare" by Lamb, as our time is limited

and we have to work part of the time. Refer to Rev. Mrs. W. F. Galloway, Burlington, N. C. Thanking you all in advance. Sincerely yours, Mary and Madge Murray, Burlington, N. C., R. F. D. 7.

22. In 1923–24 your society sent me magazines and books; they were such a great help to me and to my school children.

I am going to teach at Chase City this coming session and assure all of your dear, kind people that any books or magazines would certainly be appreciated.

I am going to teach the fifth grade. I am also interested in all histories, English and American novels, and poetry. Hoping to keep in touch with you and again thanking you for the help you have given me in the past, I am, yours most truly, Clara M. Willis, Chase City, Va.

* * * * * * *

24. I am a girl 15 years old. My father is dead. I live with my stepfather and mother. Mother and I get lonesome and we would like to have good novels and short stories to read. We live 45 miles from the railroad and 10 miles from a little town. I have two little brothers that would enjoy funny papers and books for boys. My mother's name is Mrs. D. A. Dean, Rex, Ark. I will give you Rev. Elmer Waddell for reference. Beatrice Jones, Rex, Van Buren County, Ark., box 57.

25. I wish to thank all the Cheerful Letter friends for their kindness and for the things they have sent me for the past year. I have answered all that had addresses, but some didn't give any address. I surely have enjoyed the books and magazines and would appreciate any good books, literature (especially Good Housekeeping), and would pass them on to my friends; also anything suitable for my children, one girl, age 9 years, and three boys, 7, 5, 3. I have not heard from any of the dear friends for quite a while, but hope they will remember me in the coming year. I would be glad to correspond with anyone that would care to write, as I am in poor health this summer and am by myself quite a lot. Mrs. Lee M. Kilby, Rugby, Va., route 1.

## REPORTS OF COMMITTEES

Mr. NORBECK, from the Committee on Public Lands and Surveys, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 1511) for the exchange of lands adjacent to national forests in Montana (Rept. No. 1044);

A bill (S. 4022) authorizing the Secretary of the Interior to lease land in Stanley County, S. Dak., to Henry A. O'Neil for a buffalo pasture (Rept. No. 1014);

A bill (H. R. 9789) for the relief of Sallie E. McQueen and Janie McQueen Parker (Rept. No. 1015); and

A bill (H. R. 12049) to authorize the Secretary of the Interior to sell to W. H. Walker, Ruth T. Walker, and Queen E. Walker, upon the payment of $1.25 per acre, the southeast quarter section 34, township 2 north, range 14 east, Choctaw meridian, Clarke County, Miss. (Rept. No. 1016).

Mr. GOODING, from the Committee on Public Lands and Surveys, to which were referred the following bills, reported them each without amendment and submitted a report thereon.

A bill (S. 1577) to add certain lands to the Boise National Forest, Idaho (Rept. No. 1045); and

A bill (S. 1578) to add certain lands to the Idaho National Forest, Idaho (Rept. No. 1046).

Mr. CUTTING, from the Committee on Public Lands and Surveys, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 332) validating homestead entry of Englehard Sperstad for certain public land in Alaska (Rept. No. 1017);

A bill (H. R. 11716) authorizing and directing the Secretary of the Interior to issue patents to Ethel L. Saunders, and for other purposes (Rept. No. 1018);

A bill (S. 2572) granting certain land in the town of Hot Springs, N. Mex., to the State of New Mexico (Rept. No. 1019); and

A bill (S. 3136) creating the Roswell land district, establishing a land office at Roswell, N. Mex., and for other purposes (Rept. No. 1020).

Mr. CUTTING also, from the Committee on Public Lands and Surveys, to which was referred the bill (H. R. 11990) to authorize the leasing of public lands for use as public aviation fields, and for other purposes, reported it with amendments and submitted a report (No. 1021) thereon.

Mr. DALE, from the Committee on Post Offices and Post Roads, to which was referred the bill (S. 2107) to provide for steel cars in the railway post-office service, reported it with amendments.

He also, from the Committee on Commerce, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 4253) authorizing H. L. McKee, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Lake Sabine at or near Port Arthur, Tex. (Rept. No. 1022); and

A bill (S. 4254) authorizing the State of Texas and the State of Louisiana to construct, maintain, and operate a free highway bridge across the Sabine River at or near Pendleton's Ferry (Rept. No. 1023).

Mr. STEPHENS, from the Committee on Claims, to which was referred the bill (H. R. 4927) for the relief of Francis Sweeney, reported it without amendment and submitted a report (No. 1024) thereon.

Mr. NYE, from the Committee on Public Lands and Surveys, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 4173) to transfer jurisdiction over certain national military parks and national monuments from the War Department to the Department of the Interior, and for other purposes (Rept. No. 1026);

A bill (H. R. 15) authorizing an appropriation to enable the Secretary of the Interior to carry out the provisions of the act of May 26, 1926 (44 Stat. L. 655), to make additions to the Absaroka and Gallatin National Forests, and to improve and extend the winter-feed facilities of the elk, antelope, and other game animals of Yellowstone National Park and adjacent land (Rept. No. 1025); and

A bill (H. R. 9612) authorizing and directing the Secretary of the Interior to allow Norman P. Ives, jr., credit on other lands for compliances made in homestead entry, Gainesville, 021032 (Rept. No. 1027).

Mr. NYE also, from the Committee on Public Lands and Surveys, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

A bill (S. 3954) to quiet title in the heirs of Norbert Boudousquie to certain lands in Louisiana (Rept. No. 1028); and

A bill (H. R. 5695) authorizing the Secretary of the Interior to equitably adjust disputes and claims of settlers and others against the United States and between each other arising from incomplete or faulty surveys in township 19 south, range 26 east, and in sections 7, 8, 17, 18, 19, 30, 31, township 19 south, range 27 east, Tallahassee meridian, Lake County, in the State of Florida (Rept. No. 1029).

Mr. NYE also, from the Committee on Public Lands and Surveys, to which were referred the following bills, reported them each with amendment and submitted reports thereon:

A bill (S. 3537) providing for the confirmation of grant of lands formerly the United States barracks at Baton Rouge, La., to the board of supervisors of the Louisiana State University and Agricultural and Mechanical College (Rept. No. 1050); and

A bill (S. 3620) granting certain land to the Roman Catholic congregation of St. Joseph's Roman Catholic Church of the city of Baton Rouge, La. (Rept. No. 1051).

Mr. NYE also, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 3452) for the relief of George W. Abberger (Rept. No. 1030); and

A bill (H. R. 8474) for the relief of Elmer J. Nead (Rept. No. 1031).

Mr. NYE also, from the Committee on Claims, to which was referred the bill (S. 443) for the relief of Larry M. Temple, reported it with an amendment and submitted a report (No. 1032) thereon.

Mr. McNARY, from the Committee on Public Lands and Surveys, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 158) to amend chapter 137 of volume 39 of the United States Statutes at Large, Sixty-fourth Congress, first session (Rept. No. 1033);

A bill (H. R. 8307) amending section 5 of the act approved June 9, 1916 (39 Stat. L. 218), so as to authorize the sale of timber on class 3 of the Oregon & California Railroad and Coos Bay Wagon Road grant lands (Rept. No. 1034); and

A bill (H. R. 9568) to authorize the purchase at private sale of a tract of land in Louisiana, and for other purposes (Rept. No. 1035).

Mr. GOODING, from the Committee on Public Lands and Surveys, to which was referred the bill (H. R. 7946) to repeal an act entitled "An act to extend the provisions of the homestead laws to certain lands in the Yellowstone forest reserve," approved March 15, 1906, reported it without amendment and submitted a report (No. 1036) thereon.

Mr. KING, from the Committee on Immigration, to which was referred the bill (S. 717) to provide for the deportation of certain alien seamen, and for other purposes, reported it without amendment and submitted a report (No. 1037) thereon.

Mr. STEIWER, from the Committee on Claims, to which was referred the bill (S. 584) for the relief of Frederick D. Swank, reported it with an amendment and submitted a report (No. 1038) thereon.

Mr. DENEEN, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 4303) for the relief of the Smith Tablet Co., of Holyoke, Mass. (Rept. No. 1039); and

A bill (H. R. 5935) for the relief of the McAteer Shipbuilding Co. (Inc.) (Rept. No. 1040).

Mr. BLACK, from the Committee on Claims, to which was referred the bill (S. 116) for the relief of R. S. Howard Co., reported it with an amendment and submitted a report (No. 1041) thereon.

He also, from the same committee, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 3743) for the relief of C. N. Markle (Rept. No. 1042); and

A bill (H. R. 5894) for the relief of the State Bank & Trust Co., of Fayetteville, Tenn. (Rept. No. 1043).

Mr. CARAWAY, from the Committee on Claims, to which was referred the bill (S. 382) for the relief of Joseph F. Thorpe, reported it without amendment and submitted a report (No. 1047) thereon.

Mr. PITTMAN, from the Committee on Territories and Insular Possessions, to which was referred the bill (S. 4257) to authorize the payment of certain salaries or compensation to Federal officials and employees by the treasurer of the Territory of Alaska, reported it without amendment and submitted a report (No. 1048) thereon.

Mr. HALE, from the Committee on Naval Affairs, to which was referred the bill (S. 4338) to authorize the President to award, in the name of Congress, gold medals of appropriate design to Albert C. Read, Elmer F. Stone, Walter Hinton, H. C. Rodd, J. L. Breese, and Eugene Rhodes, reported it without amendment and submitted a report (No. 1049) thereon.

ENROLLED BILL PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that this day that committee presented to the President of the United States the enrolled bill (S. 3438) authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MOSES:

A bill (S. 4369) to amend the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909, as amended, in respect of mechanical reproduction of musical compositions, and for other purposes; to the Committee on Patents.

By Mr. WALSH of Massachusetts:

A bill (S. 4370) granting an increase of pension to Elizabeth A. Smith; to the Committee on Pensions.

By Mr. VANDENBERG:

A bill (S. 4371) granting a pension to Wesley H. Crockett; to the Committee on Pensions.

A bill (S. 4372) granting an annuity to Aleta Wheeler; to the Committee on Civil Service.

By Mr. PINE (for Mr. ROBINSON of Indiana):

A bill (S. 4373) to amend section 17 of the act of June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended (with accompanying papers); to the Committee on Military Affairs.

By Mr. HAWES:

A bill (S. 4374) granting a pension to Amanda Kinder (with accompanying papers); and

A bill (S. 4375) granting a pension to William B. Haring (with accompanying papers); to the Committee on Pensions.

By Mr. STEPHENS:

A bill (S. 4376) for the relief of Harry M. King; to the Committee on Claims.

By Mr. FESS:

A bill (S. 4377) granting an increase of pension to Malissa Wilson; to the Committee on Pensions.

By Mr. DENEEN:

A bill (S. 4378) granting an increase of pension to Katie P. B. Farver (with accompanying papers); to the Committee on Pensions.

By Mr. GOODING:

A bill (S. 4379) granting an increase of pension to Belle Greenslate; to the Committee on Pensions.

A bill (S. 4380) authorizing the Secretary of the Interior to execute an agreement or agreements with drainage district or districts providing for drainage and reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of such district or districts that may be benefited by the drainage and reclamation work, and for other purposes; to the Committee on Indian Affairs.

By Mr. HOWELL:

A bill (S. 4381) authorizing H. A. Rinder, his heirs, legal representatives, and assigns to construct, maintain, and operate a bridge across the Missouri River at or near Niobrara, Nebr.; to the Committee on Commerce.

AMENDMENTS TO TAX REDUCTION BILL

Mr. COUZENS submitted an amendment, Mr. COPELAND submitted three amendments, and Mr. SIMMONS submitted five amendments intended to be proposed by them to House bill 1, the tax reduction bill, which were separately ordered to lie on the table and to be printed.

ESTABLISHMENT OF ADDITIONAL LAND OFFICES

Mr. CUTTING submitted an amendment intended to be proposed by him to the bill (S. 1794) establishing additional land offices in the States of Montana, Oregon, Idaho, and South Dakota, which was ordered to lie on the table and to be printed.

POSITION OF THE UNITED STATES FLAG

Mr. HEFLIN. Mr. President, I send to the Clerk's desk a concurrent resolution, which I ask may be read.

The VICE PRESIDENT. The clerk will read, as requested.

The Chief Clerk read the concurrent resolution, as follows:

Whereas it is alleged that the Roman Catholic flag, the same design as the flag flown at the Vatican at Rome, has been recently hoisted above and flown above the United States flag on the U. S. battleship *Cincinnati* and the U. S. battleship *Florida;* and

Whereas it is the solemn duty of Congress to see to it that no flag of a foreign power or potentate shall fly above the United States flag on any foot of American soil or on any American battleship or on any other American ship or in any foreign American possession; and

Whereas the act of placing the flag in question or any other flag above the United States flag has the appearance of questioning its right to be first and of challenging its supreme authority and sovereign power: Therefore be it

*Resolved by the Senate (the House of Representatives concurring),* That it is hereby declared to be the fixed principle and policy of the United States that hereafter, nowhere on land within her jurisdiction or on her battleships or on her merchant ships, shall any other flag be placed above and flown above the United States flag.

*Resolved,* That it shall be the duty of Government officials in civil authority and in the Army and Navy to see to it that the principle and policy here set forth is strictly observed.

Mr. HEFLIN. Mr. President, I have here a picture of the battleship *Florida* with the Catholic flag flying above the Stars and Stripes. I have also a picture cut from the Washington Post within the last two months showing the Roman Catholic flag flying above the United States flag on the battleship *Cincinnati.*

I ask for the present consideration of the resolution.

Mr. CURTIS. Mr. President, this being a joint resolution, it ought to go to a committee. I suggest that it be referred to the Committee on Commerce, which has charge of shipping matters.

Mr. BRUCE. Mr. President, I object to the present consideration of the resolution.

Mr. HEFLIN. The Senator from Maryland objects?

Mr. CURTIS. It ought to go to a committee, it being a joint resolution.

The VICE PRESIDENT. The resolution is a concurrent resolution.

Mr. NORRIS. Mr. President, I would like to suggest to the Senator from Alabama that he make it a joint resolution instead of a concurrent resolution, so that if it should be passed it would become a law.

Mr. HEFLIN. It would become a law anyway.

Mr. NORRIS. Oh, no; a concurrent resolution would not receive the signature of the President. If the Senator makes it a joint resolution and it should be passed by the Senate and House and signed by the President, it would then be the same as a statute.

Mr. HEFLIN. I ask permission to do that. I thought they had the same effect.

The VICE PRESIDENT. The Senator has the right to modify his resolution.

Mr. HEFLIN. I move to strike out the words making it a Senate concurrent resolution and to insert the ordinary words which are affixed to a joint resolution.

The VICE PRESIDENT. That change will be made if there be no objection.

The concurrent resolution was changed to a joint resolution (S. J. Res. 143) to prevent the flying of a foreign flag above the United States flag, which was read twice by its title.

Mr. HEFLIN. Mr. President, I want to say that when I prepared this resolution I said to myself, "If the resolution is objected to, the Senator from Maryland [Mr. BRUCE] will be the man to make the objection."

Mr. BRUCE. The Senator was dead right for once in his life.

The VICE PRESIDENT. The joint resolution will lie on the table.

Mr. HALE subsequently said: Mr. President, this morning when I was absent from the Chamber the senior Senator from Alabama [Mr. HEFLIN] introduced a resolution to prevent the flying of a foreign flag above the United States flag. The flag to which he alluded was the usual church pennant, I understand, which is always flown above the ensign during divine service.

I took the matter up with the Navy Department, and I have from them an article on the church pennant by Evan W. Scott, Chief of Chaplains, United States Navy. I ask that it be inserted in the RECORD immediately after the introduction of the resolution by the Senator from Alabama.

The PRESIDING OFFICER (Mr. SACKETT in the chair). Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

NAVY DEPARTMENT,
BUREAU OF NAVIGATION,
*Washington, D. C., May 7, 1928.*

Hon. FREDERICK HALE,
*Naval Affairs Committee, Senate Office Building,*
*Washington, D. C.*

MY DEAR SENATOR: Complying with your telephone request this noon, I am inclosing herewith an article on the "Church Pennant," which I hope will answer your inquiry.

If there is any further information you desire, I shall be glad to furnish same.

C. H. DICKINS,
*Captain, Chaplain Corps, United States Navy.*

---

[From the Century Church Bulletin]

CHURCH PENNANT

By Evan W. Scott, Chief of Chaplains, U. S. Navy

It may be of interest to learn that when divine service is being held on any Navy vessel in commission, the church pennant is hoisted above the Stars and Stripes. As Preble states in his history of the American flag, "It is the only flag to which the national ensign shows submission."

The church pennant is a triangular white pennant charged with a blue Latin cross. The records of the Navy Department clearly show that this pennant has been in use since about 1850, as a French book on the flags of all nations, edited in 1858, shows a United States church pennant similar to that now in use. In fact, it is believed to date back to the organization of the Navy, and is supposed to have been taken over from the British Navy, along with many other customs, the uniform regulations, armament, etc., and to have been in force from the beginning.

The following is quoted from a letter from Engineer Commander, Royal Navy, H. S. Brown, acting naval attaché to the British Embassy, dated October 12, 1922, based on information received from the British Admiralty, and which would seem to bear out statements made in paragraph above:

"The present church pennant is a survival of the old 'common pennant' which went out of general use in 1864.

"The use of a pennant to signify that the ship's company was at prayers appears to have been instituted by Rodney during the American war, circa 1780. Article X of his Additional Sailing Instructions provided:

"'In order that the performance of divine service may meet with as little interruption as possible, the ships are to hoist a common pennant at the mizzen peak before they begin the same, and to keep it flying until they have finished.'

"This was adopted by Admiral Arbuthnot when commander in chief on the North American station in 1781, by Kempenfelt in 1782, and by Howe in his signal book of 1790, and became the established practice."

The earliest official recognition of such a practice in our Navy, so far as I have been able to learn, is found in the United States Navy Signal Code, 1867, approved by Hon. Gideon Welles, then Secretary of the Navy. Article 45 of this code reads: "Church pennant will be hoisted immediately above the ensign at the peak or flagstaff at the time of commencing and kept hoisted during the continuance of divine service on board all vessels of the Navy." All succeeding editions of the Signal Code have had the same provision, although a slight change in the wording (for the better) occurs in the instructions now in force, which reads: "The church pennant is to be hoisted at the same hoist and over the ensign during the performance of divine service on board vessels of the Navy."

The use of the Latin cross has no sectarian significance, though it was probably selected for historical reasons and because its shape was easily adapted to such a pennant. It is a Navy pennant, and not the pennant of any church or denomination, as some have surmised. It is absolutely nondenominational and nonsectarian. It flies only during divine service to indicate to the ship's company and to other vessels near at hand, that religious worship is being conducted on board, and that all persons should conduct themselves accordingly, to the end that the service be not interrupted. It serves a practical purpose similar to that of the powder flag, which warns that ammunition is being taken aboard, and the meal pennant, which indicates that men are at their "mess" and are not to be disturbed except in case of necessity.

Although the church pennant has no sectarian significance, it does have a distinctly religious significance. The place of honor given it clearly indicates the importance attached to religious worship by a people having neither a State church, nor a State religion, and shows that the sovereignty of Almighty God is duly acknowledged by those in authority and that the highest honor is accorded Him.

Mr. HEFLIN. Mr. President, I have been in attendance on a meeting of a subcommittee of the Committee on Agriculture and Forestry investigating the New York Cotton Exchange and its relation to the Agriculture Department regarding price predictions on cotton. A page came and told me a moment ago that some amendment to my flag resolution was being offered. I would like to have it reported.

The PRESIDING OFFICER. No amendment was offered; it was simply an article, which was ordered to be printed in the RECORD.

Mr. HEFLIN. Having reference to my flag resolution?

The PRESIDING OFFICER. Yes; but no amendment was offered.

Mr. HEFLIN. What is the source of it? Who is the author?

Mr. HALE. Mr. President, I will state to the Senator that I called up the Navy Department after I heard about his resolution this morning, and they have sent me an article written by the Chief of Chaplains of the Navy explaining the use of the church pennant. I think that explains the matter. I asked that it be put in the RECORD, and leave was granted.

Mr. HEFLIN. I have asked the Navy Department and the War Department also to give me a copy of the instructions they have issued and what their rules and regulations are regarding the uses and abuses of the flag. I want to know just what system of rules they have permitted to be worked up, and I want the Senate to go on record, and I am going to have it go on record, as to whether any flag can be flown above the United States flag. I do not want to see that done; I do not want to see anybody's church flag fly above the Stars and Stripes. I do not think the Government ought to permit it. That flag represents the sovereign power of the greatest nation in all the world, and it is entitled to be first by its position in the air and as being uppermost in everything. We are guaranteed religious freedom in the United States. It ought to be on the housetop that shelters our religious freedom. It is only by that flag and what it represents that we have religious freedom at all in the United States. I do not want any system to grow up on any battleship or in the Army or in civil life that will lead to the flying of any flag above the Stars and Stripes. Why should it be done? On to-morrow I am going to ask for some action on my resolution.

Mr. HALE. Mr. President, I think when the Senator reads this article his mind will be clarified on this matter. The pennant to which he alludes is not a sectarian pennant in any way. It is the regular church pennant that is always flown when any religious services are held on a ship.

Mr. HEFLIN. Why do they have to fly it above the American flag?

Mr. HALE. If the Senator will read the article he will see.

Mr. HEFLIN. They can not show me why they should fly that above our flag. I have my views about where it ought to fly. I would fly it below the Stars and Stripes.

Mr. HALE. Mr. President, I will read the last paragraph of the article:

Although the church pennant has no sectarian significance, it does have a distinctly religious significance. The place of honor given it clearly indicates the importance attached to religious worship by a people having neither a state church nor a state religion and shows that the sovereignty of Almighty God is duly acknowledged by those in authority and that the highest honor is accorded Him.

Mr. HEFLIN. Mr. President, there is no religion recognized in this Government that requires the pulling down of our flag when a man wants to pray to God. We carried that flag in God's name. We fled from religious persecution in the Old

World in order to create a banner like that which would represent human liberty here in the Western World.

I know what pennants represent and the significance of them. Why is the Senate thinking about permitting this thing to go by without action? They permit them to pull the flag down 2 feet or more and fly this other flag above it. I am not going to consent to it myself. I do not care whether they are church pennants, ensigns, banners, or flags, or whatever they may be called. They have no business flying above the United States flag.

That flag was born in a crusade for liberty. The ragged Continentals prayed to their God for liberty, and for success in achieving that liberty; and to tell me we have to haul the flag down when we want to have religious worship on a battleship is ridiculous. It does not have to be done. If anyone wants to put a card out announcing religious services on a ship, let him do it. But why have we got to draw that flag down in order to give space above it for another flag to fly? Its right to first place is questioned when that is done. Its supreme authority and sovereign power is challenged. I want every Senator in this body on a roll call to say whether or not he wants anybody's flag to fly above it on battleships, in the Army, or in civil life anywhere.

I cut out of the Washington Post a picture of the U. S. S. *Cincinnati* flying the cross flag above the United States flag, and just under it the simple words: "It is Sunday." The flag of the United States is good enough, thank God, to fly first all the time—Sunday, Monday, and every day in the week. I think we owe it to the flag to proclaim it first and foremost in all our dealings. Talk to me about hauling it down when we go to worship God! The God of nations blessed that flag at its birth time, and I am going to insist that the Senate and the Congress take action in the face of any regulation made by any chaplains on the battleships as to what they desire to do when they go to worship. I am going to insist that the Congress declare it as its fixed policy that no flag, here or upon the sea, shall fly above the Stars and Stripes, Old Glory.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 12030) to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes; requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. GRIEST, Mr. RAMSEYER, and Mr. BELL were appointed managers on the part of the House at the conference.

POSTAL RATES

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 12030) to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. MOSES. I move that the Senate insist on its amendments and agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. MOSES, Mr. PHIPPS, and Mr. MCKELLAR conferees on the part of the Senate.

RAILROAD VALUATION

Mr. NORRIS. I ask unanimous consent to take from the table Senate Resolution 222, which I introduced on Saturday, and I ask to have it read.

The VICE PRESIDENT. Is there objection?

Mr. SMOOT. I understood it was virtually agreed that the resolution might be taken up this morning.

Mr. NORRIS. I had an understanding before the Senate took a recess that there would be no objection made this morning to taking up the resolution.

The VICE PRESIDENT. The resolution will be read.

The resolution (S. Res. 222) submitted by Mr. NORRIS on the 5th instant was read, as follows:

Whereas in May, 1923, the National Conference on Valuation of American Railroads was organized for the purpose of securing a fair valuation of the railroads of the United States and for the purpose, in behalf of the public interest of the people of the United States, of appearing by counsel before the Interstate Commerce Commission and the courts, with a view of preventing an overvaluation of railroads. Said National Conference on Valuation was organized through the participation and cooperation of Senators, Representatives, governors of various States, mayors of some of the principal cities of the United States, several farm, agricultural, and labor organizations, traveling salesmen's associations, and national organizations of railway employees, and many similar organizations and individuals of national importance; and

Whereas by order of the Interstate Commerce Commission the National Conference on Valuation has been since 1923 a party to all valuation proceedings, has participated in said proceedings, has received notice of all hearings and copies of all the valuation reports, and has been recognized by the commission as a representative of substantial public interests and of a large percentage of travelers, shippers, and consumers dependent upon the railroads for transportation, and of organizations of employees engaged in such transportation, all of which persons have a vital and continuous interest in transportation rates which are and will be established by the commission on the basis of its valuation of the properties of the carriers; and

Whereas the National Conference on Valuation has selected Donald R. Richberg as its counsel, who, as representing said national conference, has advocated principles and methods of valuation which have been opposed by the railroads, but have been widely accepted by lawyers and economists of the highest standing, many of which principles and methods of valuation have been met with the approval of the commission; and

Whereas when the commission considered in public hearing the report upon which its order was based determining the value of the property of the St. Louis & O'Fallon Railway Co., the said Donald R. Richberg, as counsel for the National Conference on Valuation, was the only representative of a party to the proceedings who argued orally and by briefs in favor of the proposed report of the commission, while the official counsel for the commission made no argument for or against said report; and

Whereas suit has been brought by the St. Louis & O'Fallon Railway Co. to set aside the order of the Interstate Commerce Commission fixing the value of its property, which suit is generally accepted as a test case to determine the principles of railroad valuation for rate-making and recapture purposes and has already been heard by a three-judge statutory court, which refused to set aside the order of the commission, and which suit is to be heard on the appeal of the railroads which has been taken to the Supreme Court of the United States; and

Whereas under the circumstances set forth it would seem that the National Conference on Valuation, represented by the said Donald R. Richberg, having advocated the action taken by the commission in said case, should be heard on the appeal of the railroad to the courts to set aside the order of the commission; and it would seem to be in the public interest consistent with the intent of the law that the said national conference, through its counsel, the said Donald R. Richberg, should be heard as a matter of right, and provided in Thirty-eighth Statutes at Large, page 219, and Thirty-sixth Statutes at Large, page 539; and

Whereas the said Donald R. Richberg, as counsel for the National Conference on Valuation, was permitted to present an argument to the statutory three-judge court which heard the O'Fallon case, but the National Conference on Valuation not being permitted to intervene as a party to the proceedings, its counsel must make application to the Supreme Court for leave to be heard in the appeal now pending, which application, being addressed to the discretion of the court, involves primarily consideration of what is in the public interest; and

Whereas, depending upon the valuation principles and methods which may be determined by the O'Fallon case, the aggregate valuation placed on railroad properties may differ to the extent of many billions of dollars, with a consequent difference in the aggregate of transportation rates amounting to hundreds of millions of dollars, so that the O'Fallon case as a test case involved issues of wide and exceptional public interest and of immense consequence to all the people of the United States: Therefore be it

*Resolved*, That the Senate expresses its approval of the application of counsel for the National Conference on Valuation for leave to participate in the hearing of the O'Fallon case in the Supreme Court without thereby expressing its approval or disapproval of the arguments of counsel and without thereby intimating any opinion regarding the issues in the case; and be it further

*Resolved*, That the Senate hereby most respectfully requests the Supreme Court to permit the said Donald R. Richberg, as counsel for the said National Conference on Valuation, to intervene in said O'Fallon case for the purpose of making oral argument and filing a brief therein.

The VICE PRESIDENT. The question is on agreeing to the resolution.

Mr. REED of Pennsylvania. Mr. President, I should like to ask the Senator from Nebraska [Mr. NORRIS] if there is any previous instance in which the Senate has made such a request of the Supreme Court as is contained in the resolution?

Mr. NORRIS. I do not know of any, but so far as I am aware, this is the only time that any situation such as this has ever arisen in the history of the country.

Mr. REED of Pennsylvania. It seems to me, Mr. President, that we must assume that the Supreme Court is just as anxious to secure the protection of the public interest as are we, and that a request from us that the Supreme Court should make

an order of any kind in a pending case is just as dubious in propriety as would be a formal request from the Supreme Court to us that we should enact a certain law. For that reason, with all respect to the Senator from Nebraska, and with all respect to his motives in submitting the resolution, I think I shall have to ask that the resolution go over.

Mr. NORRIS. I understand that the resolution has gone over, under the rule.

The VICE PRESIDENT. No; we are in the legislative day of May 3, and that was the day on which the Senator submitted the resolution.

Mr. NORRIS. I should like, however, to call the attention of the Senator to the fact that I might not have had my way, but in consultation with the leader on this side of the Chamber, the Senator from Kansas [Mr. CURTIS] and with the agreement of the Senator from Utah [Mr. SMOOT], who has charge of the revenue bill, I consented to a recess instead of an adjournment. If the Senate had taken an adjournment the resolution would have come up regularly.

Let me say to the Senator that it is far from my purpose—and I do not believe the Senator can put such a construction on the resolution—even to suggest to the Supreme Court or to any other court by any action of the Senate what action the court should take in any matter pending before it. There is pending before the Supreme Court a case having to do with the valuation of American railroads, a case involving more money and greater values than any other litigation that has ever been commenced in the history of the world, and one in which the amounts, whatever they may be, must be paid by all the people of the United States, almost regardless of their wealth, but dependent mostly in proportion to the food they eat and the clothes they wear. This organization, of which incidentally I happen to be the president at the present time, is national in its scope; it has participated in this case from the very beginning; and I think I can say, without casting any reflections upon anyone connected with the case in any way, that the representative of the organization presented to the Interstate Commerce Commission an argument and a brief which were more closely followed in the deliberations and decision of the Interstate Commerce Commission than any other brief or any other argument that was there made. The decision reached might have come, anyway; but the National Conference on Valuation of American Railroads, which is not organized for profit, and is composed of Senators, Representatives, governors, and the representatives of the leading organizations of a social and civic nature all over the United States, has only one thing in mind, and that is to have a full and complete argument under the law before the Supreme Court. It is confronted, however, with the condition that under the rules of the Supreme Court, without the consent of both of the parties, the organization through its attorney will not be allowed to be heard. The attorney has undertaken to get the consent of the railroads in this matter, but has failed to get it. I say that even without criticizing the railroad attorneys for their action in declining to give consent. The object of the resolution is to permit this attorney to make an argument and file a brief in the Supreme Court in that case.

Mr. BORAH. As a friend of the court?

Mr. NORRIS. Yes; as a friend of the court or otherwise——

Mr. REED of Pennsylvania. Mr. President, will the Senator permit a question?

Mr. NORRIS. In just a moment—in a case in which every man, woman, and child in the country has a direct and a vital interest and in which as a matter of fact they are not directly represented. As the Senator will notice in the first resolving clause it is specifically stated that the Senate does not approve the arguments or disapprove the arguments made either by the attorney for this organization or any other attorney in the case, and does not express in any way its opinion as to the merits of the case.

Mr. REED of Pennsylvania. Mr. President, I am perfectly certain that it does not require the consent of the railways for the Supreme Court to make an order permitting this gentleman to appear and file a brief and make an oral argument as amicus curiæ. I am perfectly certain that that is the law, because I know of several cases in which they have done it. I hope very much that they will hear Mr. Richberg, and I think his connection with the case, the connection which he has with this association, should move the court to hear him as amicus curiæ. I am perfectly confident—as confident as anyone can be of the future action of some one else—that they will hear him. They ought to do so, and the reasons that lead to saying that will lead them to hear him. There can be no doubt about it. But the thing to which I call attention is what seems to me to be the impropriety of telling the Supreme Court what, in the opinion of the Senate, is the sort of order that they ought to make concerning Mr. Richberg.

Mr. BORAH. Mr. President——

Mr. NORRIS. Will the Senator from Idaho permit me to answer the Senator from Pennsylvania?

Mr. BORAH. Certainly.

Mr. NORRIS. Of course, I may be wrong; if I am and the Senator from Pennsylvania is right, there would not be any doubt about Mr. Richberg being heard. I am confident, however, that the Senator from Pennsylvania is wrong when he says that Mr. Richberg can be heard as a matter of right.

Mr. REED of Pennsylvania. I did not say he could be heard as a matter of right. I said that the Supreme Court has the power, in its discretion, to permit any counsel to file a brief or make an argument.

Mr. NORRIS. Oh, yes; but on this point I talked with Mr. Richberg himself last week and I know what he attempted to do in order to be heard there. He said the railroad attorneys had refused to grant consent for his appearance and that, under the rules of the Supreme Court, it was necessary to get the consent of both sides.

Mr. SHORTRIDGE. Mr. President, if the Senator will yield for a question, has Mr. Richberg filed a petition asking leave to intervene for the purpose of filing a brief?

Mr. NORRIS. I do not think he has, but is making preparations to do that. I do not want anyone to derive the impression that anyone here is trying to indicate to the Supreme Court what they should do.

Mr. REED of Pennsylvania. That is what the resolution says.

Mr. NORRIS. That is true only so far as Mr. Richberg being heard in the case is concerned; that is all. In this resolution we have not even suggested anything further than that; and the only object I have is to take the necessary action that I believe would enable this man to make his argument and file his brief in the Supreme Court.

Mr. REED of Pennsylvania. Let us not have any disagreement about what we mean. I hope the Supreme Court will hear Mr. Richberg. I think, under all the circumstances of this case, it is proper that he should be heard; but I do not believe it is proper that the Senate should be telling the Supreme Court how to conduct its business.

Mr. NORRIS. Oh, we are not trying to do that.

Mr. REED of Pennsylvania. We must assume that the Supreme Court is moved by motives as high as our own.

Mr. NORRIS. And I do not want the Senator to intimate that I have said anything to the contrary. We are not telling the Supreme Court or trying to tell the Supreme Court what they should do.

Mr. REED of Pennsylvania. Just to conclude, I am not going to interpose the technical objection and require this matter to lie over for a day, in view of the Senator's agreement with the Senator from Kansas [Mr. CURTIS] that we shall take a recess. I will not interpose the technical objection; but I am not going to let the resolution pass without having raised my voice in dissent, and without having shown the Supreme Court that there is one Member of the Senate who disapproves of this course of procedure.

Mr. BORAH. Mr. President, as I understand the Senator from Pennsylvania, his objection lies in the fact that he thinks it is improper for the Senate to make the request.

Mr. REED of Pennsylvania. Precisely.

Mr. BORAH. As I understand, the object of the resolution is to secure the appearance of the counsel as what may be called a friend of the court. I recall, when the Oregon case was up for consideration, that the Chief Justice, representing the Supreme Court, came to the Judiciary Committee of the Senate and requested that the Senate provide an attorney to argue the case as a friend of the court; and the colleague of the able Senator from Pennsylvania [Mr. Pepper] argued the case, and with exceptional ability.

I do not see the impropriety of the Senate requesting an opportunity to be heard as a friend of the court as compared with the propriety of the Supreme Court requesting the Senate to present a counsel as a friend of the court. The resolution does nothing more than to request the court for an opportunity to be heard. It is precisely the same nature of request as might come from a corporation or an individual or parties who were interested. If it took the form of anything like a command or a direction, of course the Senate would not approve of it; but it is in the form of a request, and it seems to me that the request has a precedent in principle in the precedent established by the Supreme Court itself.

Mr. REED of Pennsylvania. I do not think that is a precedent at all. If the court wants suggestions from us that is another matter; but for us to volunteer suggestions in particular lawsuits I think is indefensible, and has no precedent.

Mr. BORAH. It has no precedent, perhaps, coming from the Senate; but can it be said to be an impropriety for the Senate

to request an opportunity to be heard upon a matter of litigation before the Supreme Court in which the entire public is concerned, especially in view of the fact that the court has indicated by its own act that it is desirous of having cases presented in that way where the public is interested?

Mr. WHEELER. Mr. President——

Mr. SHORTRIDGE. Mr. President, may I ask the senator a question? Is not this resolution premature? I understood the Senator from Nebraska to say that no application had been made to the Supreme Court for leave to file a brief or to argue the case. Who shall say that the Supreme Court will refuse any such respectful request?

I quite agree with the Senator from Pennsylvania. I know of no written rule, and I am not at this moment familiar with any unwritten practice of the Supreme Court which would require the consent of parties litigant to an order permitting a friend of the court to present an argument; and, for reasons indicated, I have no doubt at all but that if reputable counsel, representing large interests, should, in a respectful manner, request permission to file a brief or to make an oral argument the Supreme Court would grant such a request.

Mr. REED of Pennsylvania. If the Senator will permit a further suggestion, I should like to say that this National Conference on Valuation is not the only association that is interested in this case. Take the Association of Railway Shippers, whose interest is exactly the same as that of this association, presumably, or the Association of Traveling Men. All of them want to see these valuations held down to what they consider reasonable. Are we going to undertake to say here which of these associations representing the public that uses the railroads is to be represented and which not?

Mr. NORRIS. In this national conference, Mr. President, are included, I think, the very organizations that the Senator mentions. They are part and pracel of this national organization.

Mr. REED of Pennsylvania. Very well; then we will take the other organizations. There must be many that are not represented if the body is a wieldy one.

Mr. NORRIS. It may be that there are some that are not represented. I have on my desk a copy of the petition that went to the Interstate Commerce Commission. It contains a list by name of quite a number of United States Senators, quite a number of Representatives, quite a number of governors, and quite a number of organizations. There are a great many of them. I do not think there is any question whatever but that they are national in their scope, and represent as nearly as possible in one organization of this kind all of these organizations. The travelers' associations are part of those associations that are included. There are a great many unions and quite a number of farmers' organizations. I understand, for instance, that the State Grange of the State of Michigan had circulated to all its members documents pertaining to this organization.

Mr. REED of Pennsylvania. That is all right; and that is a cogent reason why the Supreme Court should grant the petition when it is made.

Mr. NORRIS. I think so.

Mr. REED of Pennsylvania. But the Senator must remember that although this case is of tremendous importance to the public, there never passes a term of the Supreme Court but that dozens of cases of importance to the public come before that court. Constitutional questions of the utmost importance come before them every year. Is the Senate to start the precedent of advising the court to hear an amicus curiæ every time an important case comes in there?

Mr. NORRIS. No, Mr. President, I would not say that; and yet the Senator may be justified in making that kind of an argument.

Here, in the first place, is the most important litigation that has ever appeared in the Supreme Court of the United States.

Mr. REED of Pennsylvania. I do not agree with the Senator on that.

Mr. NORRIS. There may be a disagreement about it. Here is an organization that was in the hearings from the beginning, starting with the Interstate Commerce Commission, and up to the Supreme Court; but in the three-judge court that tried this case after it was commenced, when the Interstate Commerce Commission had finished with it, the order of the court did not admit this conference on valuation as a party to the suit, although it did permit the attorney to file a brief and make an argument there. So that, as a matter of fact, as the case comes to the Supreme Court this party is not, as it was before the Interstate Commerce Commission, technically a party to the litigation.

Mr. REED of Pennsylvania. I quite understand that; but the Supreme Court has the same power that the supreme courts of all our States have to send out and draw in an amicus curiæ whenever it wishes, in its complete discretion.

Mr. NORRIS. There is not any question about that. I am not disputing that; but the Senator is afraid of a precedent being established here for all things that might come in the future. In the first place, as I look at it, this is the most important case, as affecting all the people of the United States, that the Supreme Court have ever had before them. In the next place, this organization is not local in its scope. These people comprising it represent all kinds of business—farmers' organizations, laboring organizations, traveling men's organizations, governors, and Senators, and Members of the House of Representatives—and it can be said in their behalf that up to this time they have been in the case. Their attorney has been heard; and it presents a question, therefore, in which it is not an ordinary organization jumping up here or there and asking to get in or asking the Senate to get them in. Something must be done, in my judgment, not withstanding the opinion of the Senator from Pennsylvania, in order to make the proper foundation for this request to be made. While, of course, the Supreme Court have the power to do it, I am satisfied that they would have to make an exception to their practice as it is usually understood to enable this man to appear there without the consent of both parties to the suit to argue the case and to file a brief.

Mr. REED of Pennsylvania. I think we have made the difference in view clear——

Mr. NORRIS. I think so.

Mr. REED of Pennsylvania. And I hope the Senate will express its judgment.

Mr. WALSH of Montana. Mr. President, I do not share the view expressed by the Senator from Pennsylvania [Mr. REED] that there is any impropriety at all in the course proposed by this resolution. It is not at all unknown. It is a very frequent thing that a case is pending in the Supreme Court and some individual walks into the Supreme Court and says: "I am particularly interested in the question that is now before the court. I have a lawsuit pending, or one which I anticipate will be pending, and the decision of the court in this matter will be important in the determination of my own case; and I should like very much, if the court please, to have my counsel heard in this matter."

Mr. REED of Pennsylvania. That is just what I suggest be done here.

Mr. WALSH of Montana. So likewise, Mr. President, an association interested in some public question that is before the court might walk into court in exactly the same way and say: "This is a matter of very great concern to the particular branch of industry which we represent. We should like to have our counsel heard in the matter." The court might say: "We feel that this case is very well represented by counsel now. We can scarcely grant any more counsel leave to be heard in the matter," and deny the application; or they might say, "We shall be glad to hear counsel," and allot them half an hour or an hour in which to be heard.

Here is a case of tremendous importance to all the people of the United States, and certainly in some sense we represent them. What is the impropriety of the Senate sending a respectful notice to the court that they regard this case of particular importance, and that they have in mind a gentleman who has given special study to the particular question, and asking that he might be heard as amicus curiæ?

Mr. REED of Pennsylvania. Does the Senator mean to imply that we represent only the parties on one side of the controversy?

Mr. WALSH of Montana. No; but the other side, everybody recognizes, will be well taken care of.

Mr. REED of Pennsylvania. The Senator implies that the other side will not be properly taken care of.

Mr. WALSH of Montana. No; I undertake to say that they will be. Undoubtedly their selfish interest, altogether commendable, will permit them to command the very best talent that the American bar can afford.

Mr. REED of Pennsylvania. If that is clear to the Senator, why does the Senator presume that it will not be equally clear to the United States Supreme Court?

Mr. WALSH of Montana. I have no doubt that the Supreme Court will recognize that; but that is no reason why we should not respectfully ask the Supreme Court to designate an attorney who we think will well represent the interests of the people.

Mr. REED of Pennsylvania. The Senator has just outlined the procedure by which any interested individual or interested association can make his or its appeal to that court. Does not the Senator think they had better try that first before they come to the Senate to ask its interposition?

Mr. WALSH of Montana. The Senate will proceed upon its own initiative without any suggestion from anybody.

Mr. REED of Pennsylvania. Precisely.

Mr. WALSH of Montana. The Senate merely respectfully requests that this attorney be heard upon the question.

Mr. REED of Pennsylvania. It seems proper to the Senator to do that, but to me it seems an impertinence. Therefore we will have to take the judgment of the Senate upon it.

Mr. WALSH of Montana. I might say, in answer to another suggestion made by the Senator from Pennsylvania, that I do not understand that this is a request that this gentleman exclusively be heard as amicus curiæ.

Mr. REED of Pennsylvania. No; I presume that if the association of railway executives can think of an amicus curiæ that they would like to suggest Congress would then pass a resolution for that; but I should resist that just as I am resisting this.

Mr. WALSH of Montana. That is not the point I was speaking about. The Senator suggested that some other national association would have just exactly the same right to be heard as this particular association. I do not know whether that would be just exactly the same, but there is no impropriety in any general association walking in there and asking that they be represented.

I wanted to ask the Senator from Nebraska about the reference to the two statutes on page 3, where it says:

> should be heard as a matter of right, as provided in Thirty-eighth Statutes at Large, page 219, and Thirty-sixth Statutes at Large, page 539.

Mr. NORRIS. Mr. President, I have a copy of the statutes referred to before me. I did not look the matter up, but I have been told that in the United States Code these statutes were not incorporated.

Mr. WALSH of Montana. I have sent for the statutes, but I can find nothing in them which would seem to justify that statement.

Mr. NORRIS. If the Senator desires, I can read the whole thing. There is only a small part of it that has direct application here. It says:

> The procedure in the district courts in respect to cases of which jurisdiction is conferred upon them by this act shall be the same as that heretofore prevailing in the Commerce Court.

That is Thirty-eighth Statutes at Large, 219. The section referring to the Commerce Court is a long section. It is Thirty-sixth Statutes at Large, 539, section 5. That, it would seem to me, gives almost to this particular organization the right to be heard there.

Mr. WALSH of Montana. Will the Senator call my attention to the language?

Mr. NORRIS. I was trying to pick it out. I do not want to read it all. Section 5 reads, in part, "*Provided further*, That communities, associations"——

Mr. WALSH of Montana. I should say that it was a matter which we should not express any opinion about at all.

Mr. NORRIS. It is doubtful whether that statute did give it as a matter of right. The Customs Court act is probably repealed now by implication, perhaps. This was the section that applied to the Commerce Court:

> *Provided further*, That communities, associations, corporations, firms, and individuals who are interested in the controversy or question before the Interstate Commerce Commission, or in any suit which may be brought by anyone under the terms of this act, or the acts of which it is amendatory or which are amendatory of it, relating to action of the Interstate Commerce Commission, may intervene in said suit or proceedings at any time after the institution thereof, and the Attorney General shall not dispose of or discontinue said suit over the objection of such party or intervenor aforesaid, but said intervenor or intervenors may prosecute, defend, or continue said suit or proceeding unaffected by the action or nonaction of the Attorney General of the United States therein.

Mr. WALSH of Montana. My opinion is that we ought not to express an opinion as to whether one is entitled as a matter of right to appear in the Supreme Court in such a case.

Mr. NORRIS. Of course, I do not want to take any action that is in any way disrespectful.

Mr. WALSH of Montana. It would not be disrespectful at all, but it is for the Supreme Court to say whether one as a matter of right can appear in that court or not.

Mr. NORRIS. That is no doubt true.

Mr. SHORTRIDGE. Mr. President, may I ask a question?

Mr. NORRIS. Let me dispose of this. That is on page 3, the second whereas.

Mr. WALSH of Montana. I suggest that the Senator take out the second whereas on page 3.

Mr. NORRIS. I am wondering whether part of that should not be left in.

Mr. WALSH of Montana. I think it is only a repetition.

Mr. NORRIS. It reads:

> Whereas under the circumstances set forth, it would seem that the National Conference on Valuation, represented by the said Donald R. Richberg, having advocated the action taken by the commission in such case, should be heard on the appeal of the railroad to the courts to set aside the order of the commission.

Mr. WALSH of Montana. Let it stand that way.

Mr. NORRIS. And strike out from there on?

Mr. WALSH of Montana. Yes.

Mr. NORRIS. Mr. President, on page 3, after the word "commission," in line 6 of the second whereas, I will strike out the balance of that whereas.

Mr. WALSH of Montana. In line 6 of the second whereas on page 3, after the word "commission."

Mr. NORRIS. Yes.

Mr. WALSH of Montana. Then I suggest to the Senator to strike out the word "intervene" in line 11, on page 4, that word having a technical significance at law, and substitute in lieu thereof the words "appear as amicus curiæ."

Mr. NORRIS. I have no objection to that.

Mr. WALSH of Montana. So that it will read: "To appear as amicus curiæ," and so forth.

Mr. NORRIS. Very well.

Mr. BRATTON. Mr. President, the action just taken by the Senator from Nebraska in striking certain parts from the resolution relieves it of what I had conceived to be an inconsistency in its terms. If the national conference has that right, namely to intervene, obviously it could exercise it without any action on the part of the Senate.

In other parts the resolution proceeds upon the theory that the conference did not have the right; that it could intervene in the case only as a matter of grace to be extended by the court. That is my concept of the legal situation; that whether this association appears in the case as a friend of the court, and has its views argued by Mr. Richburg, is a matter of grace on the part of the court, to be extended or withheld as the court may determine.

The conference has no right as a matter of law to intervene and present its contentions. That right is confined to the parties to the litigation, those who have some property rights involved in the litigation. If this conference has some indirect interest in the subject matter of the litigation which it desires to present, it has the right, under well recognized rules of procedure, to appear by motion or application addressed to the Supreme Court praying that it be allowed to come in as amicus curiæ. That involves the extension or the withholding of an act of grace under the control of the court exclusively.

My concept of this resolution is that it amounts to nothing more than an expression of opinion on the part of the Senate that the Supreme Court should extend that act of grace to Mr. Richberg. I am unwilling for the Senate to go that far. I think we should proceed on the presumption that the court will act properly in the premises. I think we should assume that the court will grant or extend that act of grace if it should be extended, and that the court will withhold it if it should be withheld. If we assume that, I can see no reason for any action on the part of the Senate.

The illustration given by the Senator from Idaho as a precedent strikes me as being clearly distinguishable from this situation, because there the Supreme Court indicated its desire to have certain phases of the litigation then pending presented and argued by some one acting for the Senate.

Mr. BORAH. Mr. President, is it any more a breach of propriety for the Senate to indicate its desire to the court to have a certain matter argued by counsel as a friend of the court?

Mr. BRATTON. Yes; I think so, because the subject matter is pending before the court. The power to extend the act of grace and hear the attorney is exclusively within the power of the court.

Mr. BORAH. Certainly, and we only request it; we do not undertake to direct it, or order it, or anything of that kind.

Mr. BRATTON. If the court desires to hear from Mr. Richberg, as it desired to hear from some one representing the Senate, undoubtedly it will permit him to argue the case. On the other hand, if the court does not permit Mr. Richberg to appear, it will indicate conclusively that the court does not want to hear him, exactly the contrary situation to what existed in the Oregon case.

Mr. CARAWAY. Mr. President, if it is an impertinence for the Senate to request it now, why should it not be held an impertinence on the part of anybody to file a petition in the Supreme Court and ask to be heard?

Mr. BRATTON. If the Senate had some interest in the matter——

Mr. CARAWAY. It has the most vital interest in that it affects every man, woman, and child now living, and those who will come after us.

Mr. BRATTON. The Senate is concerned with legislative matters—that is, matters having a direct or indirect relation to subjects of legislation—but the Senate has no direct interest in the judicial determination of the subject matter of the litigation now pending before the courts.

Mr. CARAWAY. Let me ask the Senator another question. The Senate has undertaken to say what the rules of procedure shall be in the Supreme Court of the United States. That, according to the Senator's contention, certainly was an impertinence.

Mr. BRATTON. Oh, no; Mr. President.

Mr. CARAWAY. If everything pending before that court shall be settled according to their own views, without any reference to the views that might be entertained by somebody else—I am now talking about the mere matter of procedure—I can not see why we should have ever undertaken to impose our views with reference to what the procedure should be, and who should be parties and who not, and what their rights should be. Why not pass that up to the court and let them make the rules?

Mr. BRATTON. It should be passed on to the courts to interpret and administer existing law.

Mr. CARAWAY. This is not a question of law at all; this is a question of petitioning the Supreme Court, as a petitioner, to have the interests of certain people represented by certain counsel if the court should feel inclined to do so. I am at a loss to follow the reasoning of the Senator. I do not see where the impertinence comes in, if it is not an impertinence for anybody to request that the Supreme Court shall hear every side of a contention. I just do not follow the Senator.

Mr. BRATTON. Mr. President, the Senate is not proceeding here as an amicus curiæ. The Senate is not endeavoring to do that, either directly or through counsel.

Mr. CARAWAY. What is it trying to do, then?

Mr. BRATTON. It is asked to recommend that the court hear somebody in a given case.

Mr. CARAWAY. In which the public is interested. It is not undertaking to say to the court "You shall do it." It stands like a petitioner addressing a request to the court. It is an expression upon the part of the Senate that this case is of vital importance, and there is an association with counsel who has been so intimately connected with it that we feel that he ought to be heard when the court shall have that case under consideration.

Mr. KING. Mr. President, will the Senator from New Mexico permit a suggestion?

Mr. BRATTON. I yield.

Mr. KING. Apropos of the suggestion made by the Senator from Idaho, the Senator from New Mexico will recall that in the case which went up from Oregon there were some Senators who believed that the construction placed upon the law and the Constitution by the President was improper, and gave to the Executive authority not found in the Constitution. The Senate was interested in the case, as it directly related to its functions and powers. It is quite likely that some Senators did not perceive any impropriety upon the part of the Chief Justice of the United States in suggesting that the Judiciary Committee have some one appointed to present to the court the legal questions involved. The issues were very important and involved the authority of the President in matters in which both the Executive and the Senate were concerned.

It seems to me that there is no analogy between that case and the present one, and if there be such relation between them that the action of the Chief Justice constitutes a precedent, it should not determine our course, or justify the passage of the resolution. My view is in accord with that of the Senator from Pennsylvania and the views just expressed by my friend from New Mexico.

Mr. BORAH. Mr. President, the Chief Justice conceived that it was a question which was being discussed before the court which involved a correct construction of the Constitution and, therefore, they solicited the assistance of the Senate in presenting it through counsel who should appear as a friend of the court. That is precisely what we are doing except that we are reversing the program. If the Senate had an interest in the former question, so has it in the same general way an interest in this question.

Mr. BRATTON. Mr. President, as I recall the Oregon case, it involved the right of the President to remove an officer who had been appointed by and with the advice and consent of the Senate. The Senate had an interest there. We may call it direct or indirect, immediate or remote, as we will, but the Senate had that interest in the subject matter in litigation there. It has no such direct interest in the subject matter of litigation in the present case.

The subject matter of the litigation is pending in the Supreme Court. That tribunal alone has jurisdiction of it. We are dealing now with the extension or the withholding of an act of grace by that court in connection therewith. It is a matter that falls directly, primarily, and exclusively within the power and prerogative of that court. It occurs to me that we can not adopt this resolution without assuming in advance that the court will withhold a right when it should grant it. If we indulge the presumption that the court will grant the right because we believe it should be granted, there is no occasion for the adoption of the resolution. I think to ask the court to extend an act of grace because we think it should be extended is going entirely beyond the functions or proprieties of the Senate.

Mr. REED of Pennsylvania. Mr. President, I demand the yeas and nays.

Mr. SHORTRIDGE. Mr. President, I was a member of the Committee on the Judiciary and present when the Chief Justice appeared and made the request or suggestion that counsel be selected to assist the court in a certain case then pending. I remember his statement that the power of the Senate was thought to be involved. The President had seen fit to remove a certain Federal officer to whose appointment the Senate had given its approval. The question arose as to the President's power under the Constitution to remove such an officer and, therefore, inasmuch as the power of the Senate was in a sense indirectly involved, the request or suggestion was made that we assist the court.

If Senators will be patient for a moment, I may say that it is agreed upon all hands that the association named in the resolution should be heard by the Supreme Court, and for reasons which have been stated by the Senator from Nebraska [Mr. NORRIS] and others. It is admitted that no request has been made of the Supreme Court for permission to be heard. I said a moment ago that the resolution is premature, for, if it be proper for them to be heard, I have such confidence in that great tribunal as to feel assured that any respectful request of the kind in mind will be granted. I do not doubt it for one moment. But the resolution proceeds upon the notion that the request might be denied, and disguise as we may attempt to, it is a manifest attempt to bring about an order granting such a request, and in that sense I think the resolution highly improper. I repeat the words, to my mind it is a manifest attempt to bring to bear the influence of the Senate on the Supreme Court.

I regret that it seems necessary for me to express even that thought. I have heretofore believed that this was a legislative body. True, it has almost become a grand jury, and we have almost abandoned our function as a legislative body. But I shall not sit here silent without respectfully entering my protest against this attempt to influence the action of the Supreme Court.

Mr. WALSH of Montana. Mr. President——

The PRESIDENT pro tempore. Does the Senator from California yield to the Senator from Montana?

Mr. SHORTRIDGE. I yield.

Mr. WALSH of Montana. Will the Senator from California kindly advise us what particular act of the nature of a grand jury he objects to?

Mr. SHORTRIDGE. I have in mind a great many.

Mr. WALSH of Montana. Would the Senator specify?

Mr. SHORTRIDGE. I do not wish to bring up a subject which has engaged the attention of the Senator from Montana so long and has yielded so little. I could name a great many resolutions which I think never ought to have appeared here or claimed a moment's attention of the Senate.

Mr. WALSH of Montana. I suppose the Senator could, and I asked him if he would.

Mr. SHORTRIDGE. I may take the time to furnish a bill of particulars or bill of items of from one to a dozen or fifteen, twenty-five, or even a hundred resolutions calling for investigations of the nature of grand-jury investigations. Let not the Senator from Montana think for one moment that I am dissenting from any of his efforts in respect to the Teapot Dome or any other dome.

Mr. WALSH of Montana. Or my colleague's investigation of the Department of Justice?

Mr. SHORTRIDGE. Not at all.

Mr. WALSH of Montana. It was not those to which the Senator was referring?

Mr. SHORTRIDGE. Not at all; but better results could have been achieved, the same results could have been achieved by the ordinary legal processes of our Government. I am not saying but that the Senator's resolution originally introduced has borne good fruit. It has resulted in the cancellation of certain contracts, and very likely to the benefit of the Government; but nobody is in jail yet as a result of the Senator's efforts.

Mr. BORAH. That is the result of the action of the courts and not of the Senate.

Mr. SHORTRIDGE. That is the result of the action of the courts, and I am not ready to abandon the courts of our country. Moreover, while I am on the subject let me say that I have a reverent regard for the jury system. I believe in it and have defended it on many occasions. I am not now dissenting from any verdicts that have been rendered here or elsewhere. I bow to them, I respect them unless, of course, there is charge of fraud, corruption, bribery, or undue influence brought to bear upon jurors or upon judge. I have respect for the judges on the bench in America and I still believe in our jury system.

And now, to make an end, I have not an affected respect but a genuine respect for the intellect and the motives of the Senator from Nebraska [Mr. NORRIS], but I say to him and others that here is a case pending in our Supreme Court of far-reaching importance. Its importance can not be exaggerated or overstated. As remarked again and again, it affects the welfare of the people of the United States and clearly it affects the welfare of my people, if I may call them so, of California. We are remote from the great markets. Freight rates are vital to our prosperity. Therefore, I am in hearty accord with the Senator that any reputable association which has devoted time and thought to this problem should be heard by the Supreme Court. I have not the least doubt in the world. I repeat myself again and again, that any such reputable association appearing in that court, and making the request we have in mind, would be heard. I am deeply interested in the problem, but I am thinking of other things. I am thinking of our form of government. I am thinking of that great tribunal. I am grateful for its existence. I do not think it falls within the scope of our duty or within propriety for us at this stage in the matter to bring to bear the pressure of a resolution upon that body. Let an application be made respectfully, and if it is denied and we then feel that the case will not be presented fairly, elaborately, and capably, I may reluctantly join with others in making the request which this resolution embodies.

Mr. REED of Pennsylvania. Mr. President, I demand the yeas and nays.

Mr. FESS. Mr. President, I do not wish to detain the Senate, but I desire to say that I think the pending resolution involves more than a mere incident in legislation. It involves the relationship between coordinate departments of this Government, which I think is very important. Mr. Bryce, who, I think, wrote the greatest work on the American Government that has been written by a foreigner, called special attention to the distinguishing feature of our Government that differentiates it from all other governments in history. That particular distinction is the independence of the coordinate departments of the Government. Mr. Bryce points out that all governments are alike in that they all have legislative, executive and judicial functions, but that they differ in the power given to the individual departments. A monarchy includes in the executive department largely the legislative and judicial functions; that is especially true as to a despotism; while a pure democracy very largely ignores the executive as well as the judicial departments. There is not any such thing as an unconstitutional law in England. The body that passes the law in that country repeals it if it so desires, or it remains a law until it is repealed. There is not any such thing as a judiciary separate from the legislative that may set aside an act of parliament.

Mr. BORAH. Mr. President, the Senator from Ohio certainly does not mean to indicate that this resolution, which merely requests that some one be permitted to appear before the Supreme Court to argue amicus curiæ a particular question, it being wholly within the power of the court to refuse that request, would be an infringement upon the judicial power of the Supreme Court of the United States?

Mr. FESS. I will say to the Senator that I rather think it would be. It is a case of one branch of the legislative department suggesting to another branch of the Government that is coordinate with it what it should do.

Mr. BORAH. I desire the Senator to notice the language of the resolution, which reads:

> That the Senate hereby most respectfully requests the Supreme Court—

It is wholly within the power of the Supreme Court to reject the request. It is a mere presentation of a request upon the part of a body which represents a part of the public interest that a particular question be argued by one who has been associated with its presentation heretofore.

Mr. FESS. I am of the opinion that the Senator from Idaho is one of the Senators who insist upon each coordinate branch of the Government being left independent in the function for the performance of which it exists.

Mr. BORAH. Yes, I am; and if this were an attempt to adopt a resolution directing the court or authorizing it or bringing any pressure to bear upon it, I should not favor it; but it is simply the presentation of the request that an attorney be allowed to appear before the court. No one need get the idea that the Supreme Court is going to be overawed by an ordinary request of this kind on the part of the Senate.

Mr. FESS. Mr. President, if it is sufficiently important for the Senate to set aside time to discuss and act on a resolution expressing to the Supreme Sourt of the United States what we want it to do, then it is of sufficient importance that we ought to halt before we undertake to make such a suggestion to the Supreme Court.

As I stated a moment ago the one distinguishing feature of this Government that makes it different from any other government in history is that each of the three departments of government is not only independent in its organization but it is also wholly independent in the performance of its functions. It is true that the Supreme Court has power over the Executive under certain circumstances; it is true that this body, in conjunction with the other body, has certain control over the Supreme Court; it is true that this body has a restrictive power on the Executive in the case of treaties and appointments; it is true that the Executive is sometimes overruled by this and the other body in the exercise of the veto power; but when it comes to the exercise of the functions of either or each, neither ever attempts to interfere with the other.

In the exercise of the functions of legislation the President never goes further than to give his opinion under the requirements of the Constitution; and in the exercise of the judicial function by the Supreme Court neither the Executive nor the legislative ever undertakes to interfere. The Supreme Court never undertakes to interfere with the exercise of the function of legislation or of the enforcement of law. When the Senate, acting as a branch of the legislative body, adopts a resolution, sends it to the Supreme Court and asks that court to do what it has not requested, I insist it is an interference not only with the function of the Supreme Court but is against the very genius of our Government.

I very much deplore a tendency that might lead to legislation interfering with the judicial function or legislation permitting the Executive to interfere with the judicial function or the judiciary to interfere with either the legislative or the Executive.

The genius of American institutions calls for the preservation of the independence of the exercise of the functions of each of these departments, and I can not look with any degree of complacency upon the adoption of a resolution such as this, although it is said that it is perfectly harmless, because, if it means anything, it is an interference with the judiciary.

I admit all that has been said as to Mr. Richberg; I know him very well; he is a very capable man, and whenever he presents a case on any occasion his presentation is worth listening to. I also admit the tremendous importance of the valuation of railroads, which it was once stated would not cost over $2,000,000 and would be completed in two years. It has, however, cost considerably over $100,000,000, and as yet we are nowhere in sight of the end of such valuation. I recognize the importance of the work, but I think it is of still greater importance that, under the genius of our Government, the legislative branch, either this body acting alone or the other body acting alone or the Congress acting as a whole, should not undertake to interfere with the Executive in the performance of his functions or, especially, with the judiciary in the performance of its function. The greatest bulwark to our institutions is an independent judiciary, and any encroachment upon it from any source, especially by a coordinate branch of the Government, is, to my mind, seriously important. While I have great sympathy with what the Senator who is the author of the resolution wants to do, it seems to me the price proposed to be paid is too great; and for that reason I can not support the resolution.

Mr. PITTMAN. Mr. President, the court proceeding, as I understand, is to restrain the Interstate Commerce Commission with regard to some of its functions. The Interstate Commerce Commission in an agency of Congress. The Constitution of the United States did not grant to the executive department

nor to the Federal Government control over interstate commerce; it granted to the Congress control over interstate commerce. In the performance of that function we have delegated that authority to the Interstate Commerce Commission. The Interstate Commerce Commission has been interfered with in the performance of what it believes its function to be under that delegated authority. It would be perfectly proper, I should think, for the Congress of the United States to pass an act directing that special counsel appear for the Interstate Commerce Commission before the Supreme Court of the United States.

The Congress of the United States interfered with the Attorney General's office, another branch of the Government, by passing an act requiring the President of the United States to appoint special counsel to conduct the oil suits. The Congress of the United States are more deeply interested in this case than any other case that has recently come before the Supreme Court. The question of the constitutional authority of Congress to regulate commerce, while not directly involved, must be effected if the functions of the commission shall be circumscribed.

All that this resolution indicates is that the Senate of the United States desires additional counsel to be heard in support of the position taken by its agency, the Interstate Commerce Commission. The case involves the whole question of interstate commerce; it involves every railroad in the United States in the long run. It involves the welfare of every producer, every shipper, and every consumer.

Mr. SHORTRIDGE and Mr. LA FOLLETTE addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Nevada yield; and if so, to whom?

Mr. PITTMAN. I yield first to the Senator from California.

Mr. SHORTRIDGE. Does the Senator from Nevada think for one moment, in view of what has gone on here to-day, that the Supreme Court will deny an application permitting the argument to be made and the brief to be filed? Does anybody think the court would deny such an application?

Mr. PITTMAN. I do not think so. I do not think the Supreme Court would deny it.

Mr. SHORTRIDGE. No such application has been made as yet, as I understand.

Mr. PITTMAN. No; and I do not think the Supreme Court would deny it for the very reason that they will think it is a very reasonable, natural, and proper request. Now I yield to the Senator from Wisconsin.

Mr. LA FOLLETTE. I merely wish to direct the attention of the Senator from Nevada to the fact that when this case was argued before the Interstate Commerce Commission Mr. Richberg, representing the National Conference on Valuation of American Railroads, was the only attorney who appeared and argued in behalf of the tentative report of the commission. The chief counsel of the commission did not appear in the case at all.

Mr. PITTMAN. That is another reason why the Senate of the United States may express a desire for such special counsel to be heard on behalf of its agent, the Interstate Commerce Commission.

Mr. KING and Mr. FESS addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Nevada yield; and, if so, to whom?

Mr. PITTMAN. I yield first to the Senator from Utah.

Mr. KING. If I understand the Senator from Nevada correctly, his position is that the Interstate Commerce Commission have taken a certain position respecting an important question. We support that position, and therefore desire to have that position argued before the Supreme Court. Speaking for myself, I am not willing to adopt that view. I am not willing to say that I approve or disapprove of the action of the Interstate Commerce Commission. I have not had time to investigate it; and it does seem to me, if the Senator will pardon me, that that is one of the vices incident to the adoption of this resolution. It projects into the Senate questions which are controversial in character and compels us to diverge from our labors as a legislative body to consider controverted questions before the court, as to which we would be compelled to express an opinion and make investigations before we can act.

Mr. NORRIS. Mr. President——

Mr. PITTMAN. Let me first answer the question of the Senator from Utah.

Whether we know anything about the position of the Interstate Commerce Commission or not, we desire the law as we intended it upheld. There are some of us who may know something about it, and some of us who may know nothing about it, and others who may know more or less about it. We do know what the intent of the act was; and if we are not satisfied with the ability of the counsel of the Interstate Commerce Commission to present our intent with regard to that law, it is perfectly proper for us to represent that to the Supreme Court of the United States, as any other association or citizen or group might do.

Mr. FESS. Mr. President——

Mr. PITTMAN. If there were any coercion, if the Senate were doing anything other than is done throughout this whole country before courts by individuals, by citizens, by corporations, by associations, then I should say it might be considered an imposition upon the court, or an act of discourtesy. But is there any reason why this body should not be interested in this matter like any other body, whether it be corporate or an association? And if it is interested in the matter, and pursues exactly the same practice as every individual or corporation, is such a respectful request of this body for additional counsel on behalf of one of its agents to be considered as an improper interference with the functions of the court?

Mr. FESS. Mr. President, will the Senator yield?

Mr. PITTMAN. I yield now to the Senator from Ohio.

Mr. FESS. If it is the desire of the Interstate Commerce Commission to have Mr. Richberg appear in its behalf, it would be perfectly in order, if it did not have the authority to engage him, for Congress to give that authority. It would not be sufficient for the Senate to do it, but it would be proper for Congress to do it. That, however, is entirely different from making a request of this kind of a coordinate body like the Supreme Court.

Mr. PITTMAN. Not at all.

Mr. FESS. I think it is.

Mr. PITTMAN. If your agent were conducting a suit of vital importance to you and that agent had a counsel employed, you say it would be all right if your agent asked for additional counsel, but you deny your authority as principal to ask for additional counsel. What is the Interstate Commerce Commission but an agency of this body? It is nothing but an agency of Congress; and yet, because the Interstate Commerce Commission is satisfied with its counsel, you think that this body, which created it, should stand silent forever.

Mr. NORRIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Nebraska?

Mr. PITTMAN. I yield.

Mr. NORRIS. I should like to call the attention of the Senator from Utah to the first "*Resolved.*" It seems to me it meets his objection entirely. In that resolution we say:

> Without thereby expressing its approval or disapproval of the arguments of counsel and without thereby intimating any opinion regarding the issues in the case.

Mr. REED of Pennsylvania. Then the Senator does not agree with the Senator from Nevada, who thinks the Senate should take one side of this case?

Mr. NORRIS. No; I do not think there is any disagreement with the Senator. The Senator from Nevada argues that we have created the Interstate Commerce Commission. An attorney has argued before them on the tentative report made before the Interstate Commerce Commission sustaining it. He argued again before the court, when he got into court, sustaining the position of the Interstate Commerce Commission. So far it has been sustained. Now, we are asking if the Supreme Court will not permit this man to make an argument before them in his attempt to sustain the action of the Interstate Commerce Commission, an organization that has been created by law.

Mr. REED of Pennsylvania. But the Senator from Nevada says that Mr. Richberg represents the Senate's view of the proper interpretation of the interstate commerce act, as I understand him.

Mr. PITTMAN. I beg the Senator's pardon; the Senator from Nevada made no such assertion.

Mr. REED of Pennsylvania. Then the Senator does not believe that?

Mr. PITTMAN. I have no knowledge as to whether he does or not.

Mr. REED of Pennsylvania. But I understood the Senator to say that the Senate had a right, as a legislative body, to have its interpretation of the interstate commerce act presented to the Supreme Court.

Mr. PITTMAN. That is what the Senator from Nevada said.

Mr. REED of Pennsylvania. Is not that what I said?

Mr. PITTMAN. No, Mr. President.

Mr. REED of Pennsylvania. What is the difference between what I said and what the Senator said?

Mr. PITTMAN. What I say is that if the Senate agree that Mr. Richberg is an able lawyer and can present the intent of

this body with regard to that act, they have an absolute right, without any reflection on the Supreme Court of the United States, to request the Supreme Court, as other institutions do, to permit him to make the argument.

Mr. REED of Pennsylvania. Is it the Senator's idea that that is what we would be doing if we passed this resolution?

Mr. PITTMAN. Exactly.

Mr. REED of Pennsylvania. Then it is the Senator's idea that Mr. Richberg represents our view of the proper outcome of this controversy, and therefore we want him to be before the court to express our view?

Mr. PITTMAN. I feel that he does; yes. That is my view. I do not know about the Senator's view. If he appeals to my view, I will vote for him. If he does not, I will not.

Mr. REED of Pennsylvania. Then the Senator does not agree with the recital in the resolution that this action is taken without expressing any view as to the merits of the controversy?

Mr. PITTMAN. Undoubtedly we are not expressing any views. Those will be expressed by our counsel in the proper, legitimate way. It would be entirely improper for us to attempt to influence the court by resolutions as to what we believe should be the outcome. We simply desire to inform the court now that we will abide by any decision of the matter that they may make; we will not criticize any decision they may make; we will not attempt to prejudge that matter; we ask only that a counsel in whom we have confidence, if we have confidence in him—and those who have will vote for him—be allowed to present the case to the Supreme Court.

Mr. REED of Pennsylvania. I doubt whether the Senator's view of this resolution corresponds to that expressed by the Senator from Nevada. The Senator from Nevada bases our supposed right to pass this resolution upon our right to legislate on the subject of interstate commerce. This is a Senate resolution; it is not a joint or a concurrent resolution; and the Senate has not any more power to legislate by itself than one leg has power to walk by itself.

Mr. PITTMAN. I do not base the right on the Constitution at all. The right exists inherently in any citizen of the United States to-day to petition a court for the privilege to have a counsel appointed as amicus curiæ. That is the basis of our right. I am stating the Senator's interest in it as one of the congressional bodies. The Senate's interest is the control of interstate commerce. While we, as a separate body, can not pass an act with regard to interstate commerce, we are just as much interested in legislation as the other body or as both of the bodies; and we have a right, as a separate body, to act with regard to the protection of interstate commerce by resolution or other procedure within our separate jurisdiction. Our jurisdiction is not separate with regard to legislation, because the other House must join; but our jurisdiction is separate with regard to resolutions, and we are within our jurisdiction when we petition the Supreme Court of the United States for the hearing of extra counsel with regard to a matter in which we are deeply interested.

Mr. REED of Pennsylvania. We have a right to legislate. The litigation that follows our legislation is a matter for the judicial branch of the Government, and is none of our business.

Mr. KING. Mr. President, will the Senator from Nevada permit me to ask him a question?

Mr. PITTMAN. Certainly.

Mr. KING. Suppose that the view of the Senator from Nevada with respect to a proper interpretation of the interstate commerce act runs along certain lines—say the lines represented by Mr. Richberg, and voiced by him in his brief. Suppose that the views of myself and some other Senators should be quite different from those of my able friend.

Mr. PITTMAN. Then I would vote against him.

Mr. KING. Then, if a resolution comes here asking the court to hear Mr. Richberg, why might not those who took the other view from the Senator from Nevada submit a counter resolution asking for the appointment of somebody else who would be more in harmony with their views? Would not that result in projecting into the Senate all controversies which were before the court which involve legislation by Congress? And, finally, would we not be dividing upon controversial matters that come before the court; and might not some Senator deeply interested in some matter before the court submit a resolution recommending the court to hear A or B or C who represented his view; and might not some other Senator, having a different view, submit a counter resolution asking that some other attorney be appointed to represent his view?

Mr. PITTMAN. Mr. President, will the Senator yield there?

Mr. KING. Certainly.

Mr. PITTMAN. I do not believe that it would be a good practice for the Senate of the United States to pursue this course often. I think it should be utilized only in an extreme case, just as the Congress of the United States directed the President of the United States to employ special counsel in an extreme case.

We have done a great many things in extreme cases that we do not make a practice of doing. As I say, when the Congress of the United States passed an act practically instructing the President of the United States to take certain litigation out of the hands of the Attorney General of the United States, it did an extreme act, but it was justified. I do not believe this body should on little occasions or many occasions make a request of the Supreme Court of the United States that an amicus curiæ be heard. It should very rarely be done, and I should not vote for it unless it was an extreme matter. I do not, however, recognize at the present time any matter of greater importance before the whole country than the matter of interstate commerce. I do not know of any legislation on the statute books to-day that more vitally and directly affects every human being in this country than interstate-commerce legislation and particularly the transportation act.

I recognize this as a peculiar case. When one of our agents, the Interstate Commerce Commission, to whom was delegated our authority, is attempting to make this fight, and to make it, I believe, against the united power of all the great transportation companies of this country, I do not think we should stand back and say, "That agency has attorneys. No doubt it has good counsel." I would rather have additional counsel. If necessary, I would rather have several additional counsel. If there are other counsel abler to represent this great question that Senators know of, let them put in a resolution requesting that they be employed.

It is not a question as to whether this is the best man or not. I have confidence in this man. Others may not have. I have more confidence in him than I have in the general counsel of the Interstate Commerce Commission. To my mind, he has proven his ability, his knowledge of this subject, his capabilities; and I think this is a respectful request of the Supreme Court of the United States, the propriety of which they will readily see. They will not interpret it as coercion or interference. They will look on it as we look on it, as an effort of the Senate of the United States to have the matter ably presented to the Supreme Court.

Mr. BRATTON. Mr. President, I can not let the statements just made by the Senator from Nevada pass without question. As I understood him, he said that those of us who have confidence in Mr. Richberg will support this resolution and that those of us who lack confidence in him will oppose it.

Mr. PITTMAN. I did not mean to say that, if I did. I meant that those who did not have confidence in him would undoubtedly vote against him. They might vote against the resolution for other reasons.

Mr. BRATTON. Very well. I think I am in accord with the views Mr. Richberg has advocated in the litigation up to this time. Whether I agree with him or disagree from him is entirely aside from the question with which we are properly concerned. Whether we think he is maintaining a correct interpretation of the act involved in the litigation is foreign to the question we are considering here.

I can not concur in the view that anyone should be affected or persuaded to vote either way in regard to this resolution by whether his views are in accord or in discord with the views of Mr. Richberg. That question is entirely aside. The question with which we are concerned now is whether the Senate should go so far as to express itself in advance of the matter even being presented to the Supreme Court as to whether it should hear Mr. Richberg.

The Senator from Nevada says he is endeavoring to uphold the Interstate Commerce Commission. But we are asked to appear from an entirely different angle to the litigation; to inject ourselves into the situation and advise the Supreme Court what we think it should do respecting purely a matter of procedure in a given case.

I have no doubt that the Supreme Court will hear Mr. Richberg fully; I have not the slightest doubt that when it is made apparent to the court that this is an important case, one of unusual importance, in which the public is peculiarly interested, the court will give Mr. Richberg every opportunity to present his views in a written brief and by oral argument. I express the hope that that will be done. My observation has been that seldom in the judiciary is a reputable attorney denied the right to appear as amicus curiæ in regard to a case of public nature or concern.

I am unwilling, regardless of whether I agree or disagree with the views entertained by Mr. Richberg, to vote for a resolution that is purely advisory to the Supreme Court, advising

it that, in our opinion, it should extend an act of grace to a given attorney representing certain interests who are concerned in the subject matter of litigation pending in that tribunal.

I simply want to make clear that, regardless of the fact that I agree with Mr. Richberg, I can not give my consent to favor the resolution for the reasons indicated.

Mr. BRUCE. Mr. President, I simply desire to put myself on record in relation to this matter. I have no intention of making it the subject of anything but the briefest comment.

From the time of Montesquieu it has been considered a thing of supreme concern that the three great departments of government—the executive, the judicial, and the legislative—should be kept absolutely independent of each other. It seems to me that one of the most interesting trains of reflection that it is possible for the mind to pursue is that each of these departments performs its own functions on the whole with an extraordinary degree of success, and yet each one of them is a most inefficient instrument for the performance of the functions of the other. As I have had occasion to say more than once, I do not know a poorer executive or a poorer judge in the world than a legislative assembly, and yet, with all its infirmities and limitations, a legislative assembly is one of the most exquisite agencies, if I may use such an expression, for the preservation of human liberty; indeed, the most effective that the mind can conceive of.

This resolution is an attempt on the part of the Senate to influence the action of the Supreme Court in a manner that calls distinctly for disapproval. It is true that it is careful to say that it is not to be taken as expressing either approval or disapproval of the arguments of counsel in the case to which it relates, and does not intimate any opinion regarding the issues involved in that case; but, all the same, it does nothing less than request the Supreme Court to permit Donald R. Richberg, as counsel for the National Conference on Valuation, to intervene in the case.

The first thing that the Supreme Court has to consider is whether a proper foundation has been laid by Mr. Richberg for intervention at all. That is a judicial question; that is just as much a judicial question as is the question as to whether the valuation of the railroads of the country has been carried on in a proper manner. So, to that extent at any rate—that is, to the extent of expressing the unqualified hope that the Supreme Court will permit Mr. Richberg to intervene—this body undertakes to usurp—no other term is appropriate to the situation—one of the powers, one of the functions, of the Supreme Court of the United States.

Some years ago I stood upon this floor and insisted that the Senate had no constitutional right to ask the President to call for the resignation of Edwin Denby, or to remove him. Notwithstanding the lapse of time that has taken place since then, I have never in all my life felt more certain of the correctness of a conclusion than of that which I reached at that time. That was an unwarranted thing for the Senate to do, and what we are now considering would also be an unwarranted thing for it to do.

I have nothing but the highest degree of respect for Mr. Richberg. I know him, and have heard him quite often before the Senate Committee on Interstate Commerce since I have been a member of that committee. He is a truly able lawyer, highly qualified to look after a legal controversy of any kind, whatever its importance. But in this matter he should be allowed to rely upon the strength of his own application, and upon nothing else whatsoever, and that is just what he is not relying on.

If he is not soliciting the influence of this body in behalf of his application to the Supreme Court, if he is not seeking to affect, through the agency of this body, the decision of the Supreme Court in relation to his desire to intervene, pray what is he trying to do; pray what is his object in coming here?

If his petition is a meritorious one, there is no need for him to enlist our help. Meritorious or not, what he is seeking is to secure the very thing that it is the intent of our Constitution and laws that no man should seek, that is to say, the intervention of the legislative branch of the Government in a matter which appertains exclusively to the jurisdiction and authority of another and a distinct department of the Government.

Therefore I trust that this resolution will not receive the approval of the Senate. It is clearly an encroachment upon the domain of another independent branch of the Federal Government.

Mr. WHEELER. Mr. President, the Senator from Maryland seems to think that if we pass this resolution we will be usurping the power of the Supreme Court. I am entirely at a loss to understand how anyone can come to that conclusion with reference to this resolution.

Mr. BRUCE. Mr. President, I did not state my proposition just that way. What we are seeking to do is to bring to bear upon a conclusion of the Supreme Court, it seems to me, the force of our conclusion, whatever its force may be, that, in our judgment, whatever the Supreme Court may think, Richberg should be allowed to intervene.

Mr. WHEELER. If I understood the Senator correctly, he not only said once, but he repeated it several times, that we were attempting to usurp the power of the Supreme Court. I do not think there is anybody in the Senate who would deny the right of this body to employ counsel in this particular matter, and to ask to have counsel appear in the Supreme Court and argue and present our views to the Supreme Court of the United States.

As the Senator from Nevada [Mr. PITTMAN] pointed out a moment ago, this is a matter in which the Senate of the United States is particularly interested. It is a matter in which the Congress of the United States is interested, and it is a matter in which all the people are interested, because it has to do with the rate-making power of Congress which we have delegated to the Interstate Commerce Commission. The question involved here is the question that is constantly coming up before this body, and constantly coming up before the Committee on Interstate Commerce. We have had the question up before that committee when appointments to places on the Interstate Commerce Commission have come before us. Members of the commission and others who have been appointed have pointed out time and time again that they were not quite sure what the Supreme Court meant by some of their decisions.

In this particular case, the Interstate Commerce Commission has made a certain ruling. That went to the district court, and Mr. Richberg was permitted to intervene. My understanding of the matter is that there is a certain practice of the Supreme Court which does not permit him to appear and argue the case before the Supreme Court unless both the railroad and the Interstate Commerce Commission agree to it.

This resolution is merely a request of the Senate of the United States that Mr. Richberg be permitted to appear before the Supreme Court and argue certain phases of the case. We are doing what the Constitution prescribes we or any citizen may do; namely, petition any branch of the Government.

Mr. BRUCE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Maryland?

Mr. WHEELER. I yield.

Mr. BRUCE. Is it not a little more than that? Is it not necessarily an expression of an opinion by the Senate?

Mr. WHEELER. No.

Mr. BRUCE. Does it not follow, as a matter of course, from the fact that it requests the Supreme Court of the United States to do something that it is the opinion of the Senate that the Supreme Court of the United States ought to do it? What is that but an attempt to influence the judicial action of the Supreme Court?

Mr. WHEELER. I do not think the Supreme Court will so take it, and I do not think that they should so take it.

The request from this body would not, in my judgment, have very much more effect than the request from any other body. But the resolution also says that—

> the Senate expresses its approval of the application of counsel for the National Conference on Valuation * * * without thereby expressing its approval or disapproval of the argument of counsel and without thereby intimating any opinion regarding the issues in the case.

In view of that statement I do not see how it can be contended by the Senator from Maryland or by anybody else that this is an interference or any attempt to interfere with the Supreme Court in their ruling.

Mr. BRATTON. Mr. President——

The PRESIDING OFFICER (Mr. ASHURST in the chair). Does the Senator from Montana yield to the Senator from Arizona?

Mr. WHEELER. I yield.

Mr. BRATTON. I have already said that I am in accord with the views Mr. Richberg has advocated and presented before, and I hope the court will hear him fully, because I think it will serve a useful purpose if it will. I want the Senate to understand that my opposition to the resolution does not grow out of any disagreement with Mr. Richberg or any belief that he should not be heard. I think he should be heard, and I think he will be. My opposition to the resolution is that I think it does constitute an interference to this extent, that it undertakes to advise another branch of the Government

what it should do with reference to procedure in a given case. To that extent, and to that extent only, I am not in accord with the resolution.

Mr. WHEELER. I think the interference is so slight, if it could be termed any interference at all, that we should not hesitate about it when the matter is so important, and when any citizen would have the same right. Everybody concedes that it is extremely important to everybody in this country that this case should be presented to the Supreme Court, and that all of the views of the different groups in the country should be presented.

Let me say further to the Senator from New Mexico that I know something of the history of the case. I know the railroads' argument and something of their briefs. I know some of the arguments that will be made on behalf of the Interstate Commerce Commission. I know that Mr. Richberg holds views that are not entirely in accord with the views of either of those two groups. It is the idea of the organization which Mr. Richberg represents that certain economic views ought to be presented to the Supreme Court. I am not saying that I would fully agree with all the arguments he may present, but at least I think that he should be heard.

Mr. BRATTON obtained the floor.

Mr. SMOOT. Mr. President, may I ask that the revenue bill be laid before the Senate at this time?

Mr. CURTIS. Mr. President, I wonder if we can not get a vote on the resolution? It has been debated now for two hours.

Mr. KING. There will probably be some more debate on it.

Mr. REED of Pennsylvania. Oh, no; we are ready to vote.

Mr. WHEELER. Yes; let us vote.

The PRESIDING OFFICER (Mr. ASHURST in the chair). The Senator from New Mexico has the floor.

Mr. BRATTON. Mr. President, in view of the statement just made by the junior Senator from Montana [Mr. WHEELER], I think it is perfectly obvious that this is a proper case in which Mr. Richberg should be heard by the court. I reaffirm what I have already said that I believe he will be heard. But I think that should be brought about through the orderly procedure of the Supreme Court without any outside expression on behalf of the Senate. Let Mr. Richberg present his outside and different views from those entertained by either party to the controversy. I believe that should be done. I do not think, however, that we would be justified in going to the extent of advising the Supreme Court to transgress one of their rules, as the Senator from Montana has indicated it would be necessary for them to do. Let the Supreme Court do it of their own volition. If the case is an unusual one, justifying that course, I expect that it will be done. I hope that it may be done. I do not want my position in opposition to the resolution misunderstood. It is upon the grounds previously expressed.

Mr. REED of Pennsylvania. Let us have the yeas and nays.

The PRESIDING OFFICER. The question is on the adoption of the resolution as modified, on which the yeas and nays have been demanded and sufficiently seconded. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. CURTIS (when his name was called). I have a general pair with the senior Senator from Arkansas [Mr. ROBINSON]. Not knowing how he would vote on this question, I withhold my vote. If I were permitted to vote, I would vote "yea."

Mr. REED of Pennsylvania (when his name was called). I have a pair with the Senator from Delaware [Mr. BAYARD]. I transfer that pair to the Senator from Massachusetts [Mr. GILLETT] and vote "nay."

The roll call was concluded.

Mr. JONES. I desire to announce that the Senator from Delaware [Mr. DU PONT] has a general pair with the Senator from Florida [Mr. TRAMMELL].

Mr. BRATTON (after having voted in the negative). I have a pair with the junior Senator from Indiana [Mr. ROBINSON]. Not knowing how he would vote, I withdraw my vote.

Mr. SMITH. I have a pair with the senior Senator from Indiana [Mr. WATSON]. I transfer that pair to the junior Senator from New York [Mr. WAGNER], and vote "yea."

Mr. WALSH of Montana. The senior Senator from Arkansas [Mr. ROBINSON] is unavoidably absent. If he were present, he would vote "yea."

Mr. CURTIS. In view of the announcement just made by the Senator from Montana with reference to the senior Senator from Arkansas [Mr. ROBINSON], with whom I have a general pair, I am at liberty to vote. I vote "yea."

Mr. ASHURST. Mr. President, has the junior Senator from Arizona [Mr. HAYDEN] voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. ASHURST. The junior Senator from Arizona [Mr. HAYDEN] has been called from the Chamber by an important matter of official business. If he were present, he would vote "yea."

The result was announced—yeas 46, nays 31, as follows:

YEAS—46

So Mr. NORRIS's resolution as amended was agreed to.

The VICE PRESIDENT. Without objection, the preamble as amended is agreed to.

PORTRAIT OF CHIEF JUSTICE MARSHALL

During the consideration of Mr. NORRIS's resolution—

Mr. BRUCE. Mr. President, as I was proceeding to say the other day when I was interrupted, or as perhaps I had already said when I was interrupted, on December 13, 1927, I introduced into the Senate a joint resolution authorizing the Joint Committee on the Library to purchase a portrait of Chief Justice John Marshall.

Mr. NORRIS. Mr. President, will not the Senator let us have a vote on my resolution?

Mr. BRUCE. I am just going to make an announcement. I shall occupy only a moment. I have been trying and trying to have an opportunity to say what I desire to say, and I assure the Senator I shall take but a moment.

That resolution was introduced as far back as December 13, 1927. I have made every effort in my power to have the subject matter of the resolution acted on and to have the resolution reported to this body either adversely or favorably. Now, I simply want to say that I hope the committee will report the resolution either favorably or adversely. I certainly am entitled to that, and it seems to me the Senate is entitled to that much. I wish now merely to say that if it does not do so within a week from this time I shall feel constrained to ask the Senate to discharge the committee from the further consideration of the resolution. I do not want to do that. That is never a very agreeable thing to do; I had almost said it is a painful thing to do; but it is a thing we have to do at times. I trust that the committee, for the members of which I have a very high degree of respect, as they well know, may certainly, within the next week anyhow, report the resolution either favorably or adversely.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had recommitted to the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes, its report on that bill.

The message also announced that the House had adopted a concurrent resolution (H. Con. Res. 34) authorizing the conference committee on Senate bill 3740, the flood control bill, to include in its report a recommendation amending section 10 thereof, and providing that no point of order shall be made against the report by reason of such action, in which it requested the concurrence of the Senate.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution, and they were signed by the Vice President:

S. 3594. An act to extend the period of restriction in lands of certain members of the Five Civilized Tribes, and for other purposes;

H. R. 4357. An act for the relief of William Childers;

H. R. 6492. An act to authorize the Secretary of War to donate to the city of Charleston, S. C., a certain bronze cannon; and

H. J. Res. 177. Joint resolution authorizing the erection of a flagstaff at Fort Sumter, Charleston, S. C., and for other purposes.

FLOOD CONTROL

The VICE PRESIDENT laid before the Senate a concurrent resolution (H. Con. Res. 34) from the House of Representatives, which was read, as follows:

*Resolved by the House of Representatives (the Senate concurring)*, That the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3740) entitled "An act for the control of floods on the Mississippi River and its tributaries, and for other purposes," be authorized to include in its report on said bill a recommendation amending the proviso to the first paragraph of section 10 by striking out the words in said paragraph "board created in section 1 of this act," and inserting in lieu thereof the words "Mississippi River Commission," and no point of order shall be made against the report by reason of such action.

Mr. JONES. Mr. President, I ask unanimous consent for permission to withdraw the conference report on the flood control bill which I filed and had laid on the table two or three days ago.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. JONES. I now ask that the concurrent resolution of the House be adopted.

Mr. LA FOLLETTE. Mr. President, let the concurrent resolution be read.

The Chief Clerk again read the concurrent resolution.

Mr. JONES. I may say that the provision referred to here relates to the surveys of the tributaries. The main text of the bill provides that reports as to such surveys shall be submitted to the engineering board created in section 1, and then transmitted to the Secretary of War. This simply permits us to change the language so as to require that such reports shall be referred to the Mississippi River Commission and then that their report shall be sent by the Secretary of War to Congress.

Mr. FESS. Mr. President, will the Senator yield to me?

Mr. JONES. Yes.

Mr. FESS. I do not understand the statement that "no point of order shall be made."

Mr. JONES. This part of the section was passed by both the House and the Senate and it is desired to change it; but the conferees could not do that without making their report subject to a point of order.

Mr. FESS. Because the matter was not in disagreement?

Mr. JONES. Yes; because it was not in disagreement.

Mr. KING. Mr. President, will the Senator from Washington yield to me?

Mr. JONES. Yes.

Mr. KING. This does not commit the Senate to the amendment that is included in the provision just read?

Mr. JONES. It does not commit the Senate to the adoption of the conference report.

Mr. KING. When will that be brought up for consideration?

Mr. JONES. It has first to be acted on by the House of Representatives, but it will be up for consideration in possibly two or three days.

Mr. LA FOLLETTE. Mr. President, has the Senator from Washington considered whether or not the mere adoption of the resolution will preclude the making of the point of order?

Mr. JONES. It would preclude the making of the point of order on this ground: The two Houses can make such an arrangement as that. Of course, if the conferees have incorporated other matters that are not germane and were not in conference, a point of order could be made. Such action as this, however, has been taken in several instances heretofore.

Mr. KING. Mr. President, may I again ask the Senator——

Mr. LA FOLLETTE. A parliamentary inquiry, Mr. President.

The VICE PRESIDENT. The Senator will state it.

Mr. LA FOLLETTE. Would the adoption of this resolution by the Senate preclude any Senator from making a point of order which will lie under the rules?

Mr. JONES. It would not; except as stated.

The VICE PRESIDENT. Without this provision, a point of order would lie against this particular item.

Mr. KING. Then the adoption of the resolution means that we can not raise a point of order against this particular provision?

Mr. JONES. The point of order can not be raised as to this particular provision; that is, a point of order can not be made against the conference report, because the conferees dealt with this particular matter.

Mr. KING. Why does not the Senator give us an opportunity to appreciate the significance of this proposed amendment?

Mr. JONES. This is the explanation of the proposed change: Under the bill as passed by the House and the Senate surveys are made on tributaries and the report of such surveys must be submitted to the engineering board created in the first section and then referred by the Secretary of War to Congress. Instead of referring these reports to the engineering board, we changed the provision so that they will be referred to the Mississippi River Commission. That is for the purpose of avoiding continuing the existence of the engineering board in effect indefinitely. It is not really necessary; the Mississippi River Commission is the proper body.

Mr. FLETCHER. May I say to the Senator from Utah that I think the conferees of both bodies, the House and the Senate, unanimously agreed to this change? The conferees, however, were unable to make the change because this particular provision was not in conference. Now we are asking unanimous consent to allow this change to be made without making the whole report subject to a point of order on that account.

Mr. KING. Mr. President, I desire to ask the chairman of the committee if this change does not remove one agency which was set up under the original bill for the protection of the Government and make it easier to get money out of the Treasury for carrying out the project contemplated by a good many people?

Mr. JONES. Not at all. The board to which the Senator refers is not affected at all as to the purposes for which it was really created.

Mr. KING. If this is to remove an agency designed to protect the Government, I should be very much opposed to it.

Mr. JONES. Not at all.

Mr. KING. Because the bill is too wide open, any way, and does not give sufficient protection to the Government. If there is any agency removed, thereby making it more easy to accomplish the objects of those who are the proponents of the bill, I should dislike very much to vote for it.

Mr. JONES. The reports referred to here all come to Congress.

Mr. SMOOT. Mr. President, there is a rumor around that the conferees on this bill met with the President to-day and have come to an understanding in relation to the bill. I wish to ask the Senator from Washington if the provision as to which he desires no point of order made is for the purpose of carrying out that understanding?

Mr. JONES. It is for the purpose of carrying out one of the desires of the President.

Mr. SMOOT. And that is why the Senator from Washington is asking it?

Mr. JONES. Yes.

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution of the House.

The concurrent resolution was agreed to.

CONSTRUCTION OF POST ROADS ON PUBLIC LANDS

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 3674) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes, which was to strike out all after the enacting clause and insert:

That for the purposes of carrying out the provisions of the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, and all acts amendatory thereof and supplementary thereto, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated for the construction, by the Bureau of Public Roads, of the main roads through unappropriated or unreserved public lands, nontaxable Indian lands, or other Federal reservations—

The sum of $3,500,000 for the fiscal year ending June 30, 1929.

The sum of $3,500,000 for the fiscal year ending June 30, 1930.

The sum of $3,500,000 for the fiscal year ending June 30, 1931: *Provided*, That the sums hereby authorized shall be allocated to the States having more than 5 per cent of their area in lands hereinabove referred to, and said sums shall be apportioned among said States in the proportion that said lands in each of said States is to the total area of said lands in the States eligible under the provisions of this act.

SEC. 2. All acts or parts of acts in any way inconsistent with the provisions of this act are hereby repealed, and this act shall take effect on its passage.

Mr. ODDIE. I move that the Senate concur in the House amendment.

Mr. REED of Pennsylvania. Mr. President, may we know what the amendment is?

Mr. ODDIE. Mr. President, this is a bill providing an authorization for an appropriation for the construction of roads on the unappropriated public domain, on Indian reservations, and forest reserves. It is in addition to the regular Federal aid road appropriation bill, but the amount in addition is small. A similar bill passed the Senate this session. This bill now corresponds to the bill introduced by Representative COLTON, of Utah, in the House. The House struck out all after the enacting clause of the Senate bill and inserted the language of the so-called Colton bill. It is approved in effect by the Bureau of Public Roads, and is substantially in the form in which it passed the Senate.

Mr. BINGHAM. Let the amendment be read, Mr. President.

The VICE PRESIDENT. The amendment will be read.

The Chief Clerk read the amendment of the House of Representatives.

Mr. WARREN. Mr. President, I should like to ask the Senator what amount of money, if any, is immediately appropriated by this bill?

Mr. ODDIE. Three and a half million dollars.

Mr. WARREN. Is it an authorization or an appropriation?

Mr. ODDIE. It is an authorization for an appropriation.

Mr. WARREN. It is an authorization, but makes no appropriation?

Mr. ODDIE. That is correct.

Mr. DILL. Mr. President, I should like to ask the Senafor from Nevada whether or not it is necessary to have additional legislation authorizing appropriations for specific roads across reservations and across unappropriated public lands referred to in the bill, or whether it would be possible to have the Appropriations Committee make appropriations without further legislation?

Mr. ODDIE. It has been decided by the Bureau of Public Roads that this proposed legislation is necessary because of the enormous area of unappropriated public lands in the various Western States and the large areas of lands within forest reserves and Indian reservations. It will take care of some of the roads in those areas which can not be taken care of under present legislation and appropriations of the Federal-aid appropriation bills.

Mr. DILL. Does this become a part of the State highway programs?

Mr. ODDIE. Not necessarily. The construction of the roads is left to the Bureau of Public Roads.

Mr. DILL. The information I am trying to get from the Senator is this: I have a bill pending at the present time authorizing the appropriation of a certain amount of money for a certain road across an Indian reservation in which there are some allotments and in which there is land not taxed. Under this bill as passed will it be possible to obtain an appropriation for that road, or must I press that bill in order to secure such an appropriation?

Mr. ODDIE. I think that this bill covers the point the Senator from Washington has in mind.

Mr. DILL. That was my understanding, but I wanted to get the Senator's view of it.

Mr. ODDIE. I am not familiar with the wording of the bill to which the Senator refers, but from what I understand of it I think this bill will cover the subject.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. ODDIE. Yes.

Mr. McKELLAR. In what way does the House bill differ from the Senate bill?

Mr. ODDIE. The Senate bill provided for maintenance, while the House bill eliminates the item of maintenance in connection with public roads on the public domain and other Government reservations. The Senate bill provided that the work on these roads on the unappropriated domain should be done by the State highway departments. That provision is eliminated in the House bill, and the work provided for in this bill on the unappropriated public-domain lands will be done by the Bureau of Public Roads.

Mr. BINGHAM. Mr. President, there was so much confusion in the Chamber that I could not quite hear what the Senator said. Did he say that under the original Senate bill the work would be done by the States, while in this bill none of it is to be done by the States?

Mr. ODDIE. The original bill which was passed by the Senate provided that the work to be done on the roads across the unappropriated public domain should be done by the State highway departments, as it is done to-day. This bill eliminates that provision, so that the work can be done by the Bureau of Public Roads on these Federal lands.

Mr. BINGHAM. Is it the Senator's desire, then, that the States should give up whatever jurisdiction they may have over the construction of roads within their own boundaries?

Mr. ODDIE. It was not my intention, Mr. President, because the bill that I introduced in the Senate and which was passed by the Senate provided that the work of construction of the main roads through unappropriated or unreserved public lands be done by the respective State highway departments, under agreement with the Secretary of Agriculture, if on any other part of the Federal-aid highway system. The House bill which has been substituted for the Senate bill eliminates that provision, and the Bureau of Public Roads can build these roads on the unappropriated public domain, in the forest reserves, and on Indian reservations.

Mr. BINGHAM. What States would this bill apply to chiefly?

Mr. ODDIE. It applies to the 11 public-land States of the West, including the States of Washington, Oregon, California, Nevada, Idaho, Montana, Colorado, Utah, Arizona, New Mexico, and Wyoming.

Mr. BINGHAM. My recollection is that the Senator at a previous session of Congress stated that in his State and a number of the adjoining States the larger percentage of the area within the boundaries of the States was unappropriated public land.

Mr. ODDIE. Yes; I said in Nevada nearly 90 per cent of the land is Federal land.

Mr. BINGHAM. Nearly 90 per cent?

Mr. ODDIE. Yes.

Mr. BINGHAM. This bill provides that in the construction of roads in 90 per cent of the Senator's State the State highway commission shall have nothing to say about it, but that it shall all be done by the department in Washington.

Mr. ODDIE. Mr. President, this bill is in addition to the regular Federal aid road appropriation bill. Under the regular Federal aid appropriation bill the States initiate the road projects, build the roads, and supervise them. It is the province of the Federal Government to see that the money is expended economically and that there is no waste, as far as they can see to it. This bill, however, provides for some additional necessary road building. The public-land States of the West are all very anxious for this legislation. The American Association of State Highway Officials, which comprises the road officials of practically all of these States, is in favor of this legislation.

Mr. BINGHAM. Is it a correct assumption, then, that these States are so anxious to get this money that they are quite willing to surrender any authority that they may have over where the roads are to go or what roads are to be built within their own boundaries?

Mr. ODDIE. I do not look at it in that way. I believe the States feel that it is an additional and necessary help. It is a small amount of money provided for building some additional necessary roads, and they are not surrendering any of their rights on the main system of highways.

Mr. HARRIS. Mr. President, do I understand that the Senator from Nevada asks unanimous consent to take up this bill?

The VICE PRESIDENT. The Senator from Nevada moves that the Senate concur in the amendment of the House.

Mr. McMASTER. Mr. President, will the Senator explain whether his amendment covers Indian lands?

Mr. ODDIE. Yes; roads on Indian reservations.

Mr. McMASTER. How does it happen, then, that the bill covers only the States enumerated?

Mr. ODDIE. I refer to the States which have Indian lands.

Mr. McMASTER. North and South Dakota have Indian lands.

Mr. ODDIE. Then it would refer to those States. I may have been in error in referring only to the 11 public-land States of the West. I mention those because they are what are known as the public-land States.

Mr. McMASTER. Will the Senator explain the 5 per cent clause?

Mr. ODDIE. The 5 per cent clause has been in existence for a number of years. It is called the graduated-scale provision of the Federal aid highway act. It was passed in 1921. It provides that the States having more than 5 per cent of their area in public lands——

Mr. SMOOT. Mr. President, is this going to take long?

Mr. ODDIE. No; it will take only a few minutes.

Mr. SMOOT. If it is, I should like to get back to the tax bill. There are two hours and a half of the day gone.

Mr. ODDIE. I want to read the provision of the law of 1921 regarding the graduated scale, as it is called. This is the provision, Mr. President:

> In States containing unappropriated public lands exceeding 5 per cent of the total area of all lands in the State, the share of the United

States payable under this act on account of such projects shall not exceed 50 per cent of the total estimated cost thereof, plus a percentage of such estimated cost equal to one-half the percentage which the area of the unappropriated public lands in such State bears to the total area of such State.

It is a provision relieving the Western States of small population, and containing large areas of public lands, from the burdens which other States do not have to carry.

The VICE PRESIDENT. The question is on the motion of the Senator from Nevada [Mr. ODDIE].

The motion was agreed to.

FLOOD CONTROL (S. DOC. NO. 96)

Mr. JONES submitted the following amended report, which was ordered to lie on the table and to be printed:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendments numbered 13, 17, 18, 19, and 20.

That the Senate recede from its disagreements to the amendments of the House numbered 1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 21, 22, 24, 25, 26, 27, 28, 29, 30, 32, and 33, and agree to the same.

Amendment numbered 9: That the Senate recede from its disagreement to the amendment of the House numbered 9, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "but nothing herein shall prevent, postpone, delay, or in any wise interfere with the execution of that part of the project on the east side of the river, including raising, strengthening, and enlarging the levees on the east side of the river"; and the House agree to the same.

Amendment numbered 14: That the Senate recede from its disagreement to the amendment of the House numbered 14, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"; (C) provide without cost to the United States, all rights of way for levee foundations and levees on the main stem of the Mississippi River between Cape Girardeau, Mo., and the Head of Passes.

"No liability of any kind shall attach to or rest upon the United States for any damage from or by floods or flood waters at any place: *Provided, however*, That if in carrying out the purposes of this act it shall be found that upon any stretch of the banks of the Mississippi River it is impracticable to construct levees, either because such construction is not economically justified or because such construction would unreasonably restrict the flood channel, and lands in such stretch of the river are subjected to overflow and damage which are not now overflowed or damaged by reason of the construction of levees on the opposite banks of the river it shall be the duty of the Secretary of War and the Chief of Engineers to institute proceedings on behalf of the United States Government to acquire either the absolute ownership of the lands so subjected to overflow and damage or floodage rights over such lands."

And the House agree to the same.

Amendment numbered 15: That the Senate recede from its disagreement to the amendment of the House numbered 15, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"SEC. 4. The United States shall provide flowage rights for additional destructive flood waters that will pass by reason of diversions from the main channel of the Mississippi River: *Provided*, That in all cases where the execution of the flood-control plan herein adopted results in benefits to property such benefits shall be taken into consideration by way of reducing the amount of compensation to be paid."

And the House agree to the same.

Amendment numbered 16: That the Senate recede from its disagreement to the amendment of the House numbered 16, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "which, in the opinion of the Secretary of War and the Chief of Engineers, are"; and the House agree to the same.

Amendment numbered 23: That the Senate recede from its disagreement to the amendment of the House numbered 23, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"Including levee work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on the outlets and tributaries of the Mississippi River between Rock Island and Head of Passes in so far as such outlets or tributaries are affected by the backwaters of the Mississippi: *Provided*, That for such work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on such tributaries the States or levee districts shall provide rights of way without cost to the United States, contribute 33⅓ per cent of the costs of the works, and maintain them after completion: *And provided further*, That not more than $10,000,000 of the sums authorized in section 1 of this act shall be expended under the provisions of this section.

"In an emergency, funds appropriated under authority of section 1 of this act may be expended for the maintenance of any levee when it is demonstrated to the satisfaction of the Secretary of War that the levee can not be adequately maintained by the State or levee district."

And the House agree to the same.

Amendment numbered 31: That the Senate recede from its disagreement to the amendment of the House numbered 31, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "The sum of $5,000,000 is hereby authorized to be used out of the appropriation herein authorized in section 1 of this act, in addition to amounts authorized in the river and harbor act of January 21, 1927, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers for the preparation of the flood-control projects authorized to be submitted to Congress under this section: *Provided further*, That the flood surveys herein provided for shall be made simultaneously with the flood-control work on the Mississippi River provided for in this act: *And provided further*, That the President shall proceed to ascertain through the Secretary of Agriculture and such other agencies as he may deem proper, the extent to and manner in which the floods in the Mississippi Valley may be controlled by proper forestry practice"; and the House agree to the same.

Pursuant to House Concurrent Resolution 34, it is recommended that in the first proviso to section 10 the words "board created in section 1 of this act" be stricken out, and in lieu thereof the words "Mississippi River Commission" be inserted.

GOLD STAR MOTHERS

Mr. COPELAND. Mr. President, may I have the attention of the chairman of the Military Affairs Committee?

Mr. SMOOT. Mr. President, is it not possible now to go along with the revenue bill?

Mr. COPELAND. If the Senator from Utah will be patient for a moment, I think we will go on with the revenue bill.

I desire to ask the chairman of the Military Affairs Committee what has become of the Gold Star Mothers' bill?

Mr. REED of Pennsylvania. That bill has been referred to a subcommittee of which the Senator from Connecticut [Mr. BINGHAM] is chairman.

Mr. COPELAND. Mr. President, the bill was passed in the House on the 20th of February. It came here on the 21st of February. It has been in the hands of the committee for about 11 weeks, about 70 or 80 days. I think it is only just and fair that we should have the bill on the calendar in order that it may be dealt with.

Mr. BINGHAM. Mr. President, will the Senator yield?

Mr. COPELAND. I yield to the Senator from Connecticut.

Mr. BINGHAM. Notice has been sent to those interested, members of the committee, to ask whether it will be convenient for them to have a hearing on Thursday morning at 10 o'clock. Notice was sent out some hours ago. No reply has been received; but I assume that there will be a hearing on Thursday morning at 10 o'clock.

Mr. COPELAND. Does the Senator from Connecticut mean Thursday morning of this week?

Mr. BINGHAM. Of this week.

Mr. COPELAND. I think it is time that we took some action, Mr. President. When we wanted the sons of these mothers there was no delay. The Government reached out and took them at that time; but now, when we have this matter before us, week after week, week after week, the matter is delayed.

I hope, and I appeal to the chairman of the committee and the chairman of the subcommittee, that there shall be no further delay, but that on Thursday of this week the matter may be taken up, and then brought to the attention of the Senate.

SENATOR BURTON K. WHEELER, OF MONTANA

Mr. ASHURST. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the New York Evening World commenting upon the public services of the junior Senator from Montana [Mr. WHEELER].

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

[Copyright Press Publishing Co. (New York World), 1928]

DESPERATE TACTICS RESORTED TO BY "INTERESTS" TO BLOCK REELECTION OF SENATOR WHEELER, WHOSE "OHIO GANG" EXPOSURE DROVE DAUGHERTY FROM CABINET

WASHINGTON, MAY 5.—Few men in public life have had a tougher road to travel than Senator BURTON K. WHEELER of Montana. His troubles with powerful foes began long before he came to the Senate. His political antagonists have been unrelenting in their efforts to discredit him. Repeated failures seem to offer no discouragement to them.

BURTON WHEELER was a United States attorney out in Montana during the Wilson administration. Every possible influence was brought to bear against him at Washington.

He was the Democratic nominee for governor in 1920. He was catalogued with the "radicals" of the Dakotas and Minnesota among political pariahs with whom no decent Republican or Democrat could associate.

I recall that his presence on the Cox presidential train kicked up a lively row, especially after Governor Cox was cordial to the head of the State ticket.

After he had started his exposé of the "Ohio gang" iniquities of the Daugherty régime in the Department of Justice, every effort was made to discredit Senator WHEELER, and the method was of slight consequence. Political hirelings were engaged to frame him. The trumped-up charges resulted in an indictment against the Senator. He emerged with a clean bill of health after a disgraceful spectacle. There is no blacker mark on the record of the present Republican administration than the attempt to punish WHEELER for his having had the courage to bring the "Ohio gang" to an accounting before the American public for the political atrocities which they committed in the name of and behind the back of Warren G. Harding.

No one ever has explained how men of the personal decency of Herbert Hoover, Harry New, Hubert Work, and Charles E. Hughes countenanced such things without uttering public protest. The only thing Washington has before it is that they did not.

Moreover, George B. Lockwood, who had a lot to do with the indictment against Senator WHEELER, now is holding forth in grand style in an expensive Willard Hotel suite as head of a Hoover-for-President club.

The effort is being made to split the progressive forces in Montana so as to retire Senator WHEELER to private life. It has slight chance of succeeding. Washington is amazed that it can have any respectable standing among decent-minded persons.

As Washington gets the story, friends of Harry Daugherty are seeking revenge against WHEELER for his having driven from the Coolidge Cabinet a Harry Daugherty, whom Mr. Coolidge regarded as a "very much misunderstood man," a Harry Daugherty whose "Hello, Andy," charmed and captivated Secretary Mellon.

The copper companies are represented as leading Montana "big business" in the program to "get" Senator WHEELER, who is a candidate for reelection this year.

If the leaders of the financial cabal can defeat WHEELER, they will go after Senator THOMAS F. WALSH in 1930. They are determined to drive from public life the two great progressive Senators who have done so much to expose corruption in Washington, the Capital is told.

Sam V. Stewart, a former governor and now attorney for Standard Oil, is the man picked to beat WHEELER in the Democratic primary.

In a fight between WHEELER and Stewart the latter would not have a show. The copper crowd is endeavoring to split the Progressive vote which would go to WHEELER. Washington hears they are endeavoring to induce young George Bourquin, district judge of Butte, to enter the race. Bourquin always has been credited with progressive tendencies, and his father, a noted Federal judge, is respected by everyone.

* * * * * * *

Former Gov. Joseph M. Dixon was persuaded some time ago to become a candidate for the Republican nomination for Senator. Many of his friends had urged him to seek the gubernatorial nomination.

It is alleged Joe Dixon, a Bull Moose leader in 1912, decided to run for the Senate because the copper group, which has opposed him heretofore, gave him to understand that they would not fight him for that position.

Charles Williams, a wealthy sheepman, has been entered against Dixon, with the understanding that he will get the backing of "big business."

The hope is said to be that many Progressives will go into the Republican primary in an effort to save Dixon, and thus draw more votes from WHEELER.

MULTILATERAL PEACE TREATY

Mr. BORAH. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the London Saturday Review of April 21, 1928, on the present negotiations with reference to what is known as the multilateral peace treaty.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is here printed, as follows:

AMERICA AND PEACE

The American note on a world peace pact enlarges a draft bilateral agreement between America and France into a multilateral agreement between all the great powers. The operative clauses of the draft treaty are two. By the first the contracting powers condemn recourse to war for the settlement of international controversies and renounce it as an instrument of policy in their relations one with the other. By the second the powers agree that the settlement of all and any disputes that may arise shall never be sought except by pacific means. Opinions will differ about the practical value of propositions in terms so general. The American view is that the moral effect of a general subscription to these principles will amount to what is called an outlawry of war. France, with whom America has been negotiating, is understood to make great reservations. She points out that the Locarno treaty makes it obligatory in certain circumstances to employ the sanction of war which is formally renounced by the new-draft treaty; how, it is asked, is it possible to reconcile loyalty to the new treaty, which outlaws war, with loyalty to the old treaty, which seeks to maintain peace by providing that in certain circumstances recourse shall be had to war in order to restrain an aggressor? The essence of all European plans for preserving the peace has been the creation of sanctions against its violation. The essence of the American plan is that there shall be none but the moral sanction. The European school of thought seeks to preserve the peace by forming holy alliances to punish the aggressor; the American school rejects the idea of warlike sanctions and relies purely on the moral sanction. The one school seeks to create in a new form the old system of alliances to restrain an international criminal; the other is content to pronounce the sentence of outlawry against war and to trust to the conscience of nations to make it operative. Clearly there is a difference of principle, and it has delayed the signature of an agreement between America and France.

But it is ridiculous to argue, as some are doing, that the conflict is irreconcilable or that the Geneva and the Washington schools of international peace are mutually exclusive, and that you can only adhere to the one by renouncing the other. For think of the history that is behind both. President Wilson, who was a Democrat, had definitely come to the conclusion that America could no more isolate herself from the quarrels of Europe than could England, and on the theory that America and Europe were members of the same family was built up the whole settlement after the war. Had President Wilson, when he came to Europe, brought a few Republican Senators with him and associated the Republican Party with his policy, it might have been accepted without question. But it was repudiated on party grounds, and when the Republican Party was returned to power America once more reverted to her old isolation and refused to join the League of Nations. If there had been no coupon election in England after the war and the left-wing Liberals, traditionally opposed to European entanglements, had come into power, we should have had an exact parallel, so far as our foreign policy was concerned, to what happened in America. We should never have signed the Covenant of the League, and certainly not the pact of Locarno. But that would not have meant that we had lost all interest in European peace. Nor, in fact, has America. American foreign policy is often most easily comprehended by reference to the ideas of the mid-Victorian Liberals in England. John Bright denounced the conception of the balance of power in Europe much as Senator BORAH has attacked the League of Nations; but the motive in both cases was a keen desire to see the peace preserved.

The American policy in the new proposals that it has just put forward is one that might well recommend itself to a Morleyite English Liberal. It holds that the moral sanctions of peace are the strongest and renounces war as an instrument of policy in international relations. But if war breaks out the proposals do not necessarily commit the signatory powers to mere passive isolation from the struggle. On the contrary, the powers who have signed the American treaty may proceed to do what America did in the late war and use their influence for justice and peace in the way they think best. The difference between the American

and the Geneva school of thought is that whereas under the American plan there is freedom of choice, when the crisis comes under the covenant and Locarno the powers are committed to definite lines of action which may lead to war. The greater includes the less, and, therefore, while America may sign her new treaty without becoming a member of the league or signing any binding contract like that of Locarno, every member of the league can quite honestly sign the American treaty. They are two arches of a bridge across a river of uncertain width and rate of flow. The American treaty is the first arch, and it may suffice. If it does not, those who are free to do so may turn back, whereas others will be committed to go further; but everyone may use the first span of the bridge. We hope, therefore, that no more will be heard of the argument that because a country may be committed to go further it may not promise with America to go halfway.

It is impossible to overestimate the loss to the world of America's abstention from the league or the consequent gain if she can be induced to make, from outside the league, the same contribution to peace that she would have made if she had been a member. We regret to notice from time to time among the advocates of the league a certain theological intolerance which denounces as heretics all who prefer alternative ways to the ideal of permanent peace. But the dissenter in these matters is not necessarily damned. It was too much to expect of the United States, with her tradition bred in the bone of isolation from European quarrels, that she should commit herself in advance to specific action in certain eventualities. The wonder, indeed, is that this country has been willing to go so far as it has done. Contrast the hesitation of 1914, only resolved by the invasion of Belgium and the solemn obligation which we undertook at Locarno to throw our whole weight on the side of France or Germany if one is attacked by the other, and the distance we have traveled seems almost incredible in the time. Even now one sometimes wonders whether the conversion is as complete as it seems, and whether the masses of the people would honor the contract as generously as they did in the late war, in which there was no specific contract to bind them. It is easy, if we search our own hearts, to understand and respect the form which American service to international peace proposes to take. It may, indeed, be the form which hundreds of thousands of Englishmen would have preferred for their own country.

But however that may be, it would be madness for any European power to reject America's cooperation, however limited, because it did not go to the full length of the covenant or of Locarno. Why even this country has definitely restricted its promise of armed intervention against the aggressor to western Europe, and the broad Atlantic may well commend a further limitation to America. It is not by the actual legal promises that the value of such assistance as America now offers is to be measured, but by the spirit of sympathy and cooperation which any promise implies. This country, at any rate, will hasten to welcome American cooperation, for friends who have once committed themselves to a great principle will not as a rule part company because its execution promises to exact more sacrifices than they would have been willing to promise each other at the outset.

## TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

Mr. SMOOT. Mr. President, the first amendment will be found on page 8. I will say that the amendment applies only to the retroactive feature of the corporation tax. The individual feature will be found on page 215, in section 509.

I will say to my colleague [Mr. KING] that the first section refers simply to the retroactive feature of the corporation tax. I do not know that there is any objection at all to it.

Mr. KING. I am not sure that I understood my colleague, because of the noise in the Chamber. I think his statement, if I interpret it correctly, is accurate; namely, that the amendment to which he invited attention deals primarily with corporations.

M. SMOOT. Entirely so.

Mr. KING. But incidentally it is related to section 509, on page 215.

Mr. SMOOT. Yes; but that refers only to the surtaxes of individuals.

Mr. KING. I understand. I am willing to have the amendment considered now; but perhaps it would save time to defer its consideration until we reach page 215, section 509.

Mr. SMOOT. As I understood, there was no objection to the first amendment, applying to corporations.

Mr. KING. No. It was passed over, though, upon the theory that perhaps it related indirectly to the surtax provision and to the retroactive application of the same.

Mr. SMOOT. I will say to my colleague that if that transpires, and he desires to return to this amendment, it will be done without question.

Mr. KING. I have no objection. In order that Senators who are not members of the committee may be advised as to the nature of the provisions referred to, I desire to submit a few observations.

This bill, as it comes from the Finance Committee, contains provisions which discriminate against corporations and in favor of individuals who pay surtaxes and who are found in the brackets or classifications above $21,000. The bill reduces the surtaxes approximately $25,000,000, and applies the reduction retroactively to the calendar year 1927, so that the taxpayers concerned secure a reduction of this amount for a year which has passed.

Mr. President, unless there are appealing reasons retroactive legislation is unwise and often dangerous. There is no substantial reason, in my opinion, why individuals who have been taxed, and all of whom have paid a portion of the same and some all of it, should receive a credit or a refund of $25,000,000. And this benefit does not extend to all individual taxpayers but only to those whose incomes are in excess of $21,000. During the calendar year of 1927 these individuals carried on their business, adjusting their expenditures and their incomes upon the basis of the present revenue laws. They knew what normal taxes and what surtaxes would be required. They made their tax returns under the provisions of existing statute. Those engaged in business passed onto consumers certain costs and burdens, or conformed their procedure to the obligations imposed upon them by the revenue laws then and now in force. It is now proposed to grant them a concession of $25,000,000 for the calendar year 1927. But to corporations no such benefaction or favor is granted. Indeed, the majority party proposes to add to their burdens.

Mr. WALSH of Massachusetts. Mr. President, will the Senator allow an interruption?

Mr. KING. Yes.

Mr. WALSH of Massachusetts. In other words, the bill provides for a reduction of the surtax payers to approximately 125,000 taxpayers, and gives no retroactive benefits to 4,000,000 taxpayers.

Mr. KING. I think that is substantially correct. If I understand the Senator, he means that there are 4,000,000 persons, many of them are stockholders in corporations who will receive no benefit from the retroactive provisions as applied to the surtaxes for the year 1927. It is true that there are a large number of persons who receive dividends from corporations who are not within the surtax brackets, and hence are not benefited by this retroactive proposal. They pay the corporate tax upon the dividends distributed; that is, the corporations are taxed and pay the 13½ per cent upon their incomes, and reduce the dividend paid to stockholders pro tanto. These individuals are discriminated against in favor of those who are in the surtax brackets and who are within the retroactive amendment.

Mr. WALSH of Massachusetts. In other words, we are giving to 125,000 taxpayers, whose worth is probably more than a quarter of a million dollars each, the benefits of the retroactive features of this bill, but no other taxpayer, no other corporation, is getting any benefit?

Mr. KING. I think the Senator's statement is correct.

Mr. WALSH of Massachusetts. And there are all together about 4,000,000 individuals who make tax returns. Therefore, 125,000 out of 4,000,000 are to have the benefit of the retroactive features of this bill.

Mr. SMOOT. The rest of the 4,000,000, however, all fall within the lower brackets, and pay hardly any tax at all to-day. There are only 207 taxpayers paying over a million dollars a year.

Mr. WALSH of Massachusetts. It is true, as the Senator says, that the rest of these 4,000,000 pay no surtax at all; but they are the people in this country whose property assets are less than a quarter of a million dollars each, while the 125,000 who get the benefits of this surtax reduction have property assets of more than a quarter of a million dollars each.

Mr. HARRISON. Mr. President, as I understand, the pending amendment is merely to prevent the retroactive features applying to the corporation tax.

Mr. SMOOT. The Senator is right.

Mr. HARRISON. And both this side of the Chamber and the other side are in accord that it should not apply retroactively?

Mr. SMOOT. That is as I understand.

Mr. HARRISON. Let us vote on it then.

Mr. SMOOT. That is this amendment. I am perfectly willing to vote on it.

Mr. COPELAND. Mr. President, why was the limitation placed at 1928? Why does it not say "1928 and thereafter"?

Mr. SMOOT. It will apply thereafter. This is the revenue act of 1928, and it will stay there until an amended bill is passed which changes the year.

Mr. COPELAND. If we were to change this, and, instead of saying "1928," if we should say "1928 and thereafter"——

Mr. SMOOT. Mr. President, if the Senator will look on page 5, he will see that it says "and succeeding taxable years." The Senator has the wrong page.

Mr. COPELAND. Page 115?

Mr. SMOOT. No; we are talking about page 8. It says specifically "and succeeding taxable years" in line 5.

Mr. COPELAND. I understand that now.

The PRESIDING OFFICER (Mr. SACKETT in the chair). The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMOOT. Mr. President, in this connection there are about eight other amendments applying to corporations exactly as this does. I ask unanimous consent that they be agreed to en bloc.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request asked for? The Chair hears none, and it is so ordered.

Mr. SMOOT. The next amendment passed over was, in section 12, surtax on individuals, on page 10, after line 17, to strike out all the items to line 3, page 13, and insert the items from line 4, page 13, to line 3, page 15. I understand the Senator from North Carolina has an amendment he desires to propose to that amendment.

Mr. SIMMONS. Mr. President, I had intended to offer this amendment on Saturday, but I did not get it ready in time and failed to do so. I am going to ask the chairman of the committee, after I have introduced this amendment, to agree that it shall go over at least until to-morrow so that when it is discussed the Senate will have before it the printed amendment.

Mr. SMOOT. That is a very proper request, and I want the Senator to have the amendment printed.

Mr. SIMMONS. I offer the amendment in the nature of a substitute for the surtax amendments provided in the majority report of the committee, and ask that it be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMMONS. I would like to have it printed in the RECORD and also printed as a separate amendment.

Mr. WALSH of Massachusetts. Has the Senator any objection to the amendment being reported?

Mr. SIMMONS. None whatever, but it is a form of amendment that would not be understood unless it was printed and was before a Senator.

Mr. HARRISON. I suggest that this schedule be printed in the RECORD under the remarks of the Senator from North Carolina.

Mr. SIMMONS. I have just asked that the amendment be printed in the RECORD.

The PRESIDING OFFICER. It will be printed in the RECORD as if read.

The amendment is as follows:

(In lieu of the committee amendment)

Strike out page 13, beginning with line 4, all of page 14, and page 15, including line 3, and insert:

"(a) Rates of surtax: There shall be levied, collected, and paid, for each taxable year, upon the net income of every individual, a surtax as follows:

"Upon a net income of $12,000 there shall be no surtax; upon net income in excess of $12,000, and not in excess of $14,000, 1 per cent in addition of such excess.

"Twenty dollars upon a net income of $14,000, and upon net income in excess of $14,000 and not in excess of $18,000, 2 per cent in addition of such excess.

"One hundred dollars upon a net income of $18,000, and upon net income in excess of $18,000 and not in excess of $22,000, 3 per cent in addition of such excess.

"Two hundred and twenty dollars upon a net income of $22,000, and upon a net income in excess of $22,000 and not in excess of $26,000, 4 per cent in addition of such excess.

"Three hundred and eighty dollars upon a net income of $26,000, and upon net income in excess of $26,000 and not in excess of $30,000, 5 per cent in addition of such excess.

"Five hundred and eighty dollars upon a net income of $30,000, and upon net income in excess of $30,000 and not in excess of $34,000, 6 per cent in addition of such excess.

"Eight hundred and twenty dollars upon a net income of $34,000, and upon net income in excess of $34,000 and not in excess of $38,000, 7 per cent in addition of such excess.

"One thousand one hundred dollars upon a net income of $38,000, and upon net income in excess of $38,000 and not in excess of $42,000, 9 per cent in addition of such excess.

"One thousand four hundred and sixty dollars upon a net income of $42,000, and upon net income in excess of $42,000 and not in excess of $46,000, 12 per cent in addition of such excess.

"One thousand nine hundred and forty dollars upon net income of $46,000, and upon net income in excess of $46,000 and not in excess of $52,000, 16 per cent in addition of such excess.

"Two thousand nine hundred dollars upon net income of $52,000, and upon net income in excess of $52,000 and not in excess of $60,000, 17 per cent in addition of such excess.

"Four thousand two hundred and sixty dollars upon net income of $60,000, and upon net income in excess of $60,000 and not in excess of $80,000, 18 per cent in addition of such excess.

"Seven thousand eight hundred and sixty dollars upon net income of $80,000, and upon net income in excess of $80,000 and not in excess of $100,000, 19 per cent in addition of such excess.

"Eleven thousand six hundred and sixty dollars upon net income of $100,000, and upon net income in excess of $100,000, 20 per cent in addition of such excess."

Mr. SIMMONS. Before we leave that, I have several other amendments which I shall offer to this bill, and I might as well introduce them now and have them printed. I send to the desk five other amendments and ask that they all be printed.

The PRESIDING OFFICER. Does the Senator ask that they be printed in the RECORD as well?

Mr. SIMMONS. No; just printed as separate amendments.

Mr. WALSH of Massachusetts. Will the Senator briefly explain his amendments?

Mr. SIMMONS. They are amendments which the minority members of the committee have agreed upon. I will ask that the amendments be sent back to me, if the Senator desires to have them explained.

Mr. WALSH of Massachusetts. I wish the Senator would explain them.

Mr. SIMMONS. Does the Senator want me to explain the surtax amendment?

Mr. WALSH of Massachusetts. No; that is not necessary. I understand that amendment simply changes the brackets from the amendment offered by the majority of the committee.

Mr. SIMMONS. The amendment I now have in my hand relates to the repeal of the admissions tax. It provides for the complete repeal of all admission taxes except that upon prize fights. It retains that. It also retains the provision with reference to sales by brokers of tickets to the theater and similar places of amusement.

The PRESIDING OFFICER. Does the Senator ask that these amendments be printed in the RECORD?

Mr. SIMMONS. I do not. I stated a little while ago that I did not ask that any of these amendments, except the one relating to the surtax, be printed in the RECORD; but the Senator from Massachusetts has asked me to indicate, in brief terms, what these various other amendments I have proposed relate to.

The amendment which I now have in mind relates to the graduated tax proposed by the House.

Mr. WALSH of Massachusetts. The corporation tax?

Mr. SIMMONS. Yes; the tax upon the incomes of corporations. It is to preserve the provision as it passed the House.

Mr. WALSH of Massachusetts. Which the Finance Committee does not favor?

Mr. SIMMONS. Which it did not favor. The one I now have in my hand is to carry out the attitude of the minority with reference to what is known as club dues; that is, the minority propose to cut that tax in half and the majority insist that the tax should not be reduced. This is to accomplish the purpose of the minority.

Mr. WALSH of Massachusetts. The minority provision is in accord with the House provision?

Mr. SIMMONS. Yes. It means simply that we oppose the majority action. The amendment I now have in my hand is one that relates to original issues of bonds and stocks. It provides that the taxes provided in the present law with reference to these issues shall be cut in half. The Finance Committee opposed any cut, and this is to carry out the views of the minority with respect to that matter. The next amendment is also a part of the one I have just referred to. That is the scope of the several amendments I have proposed.

Mr. WALSH of Massachusetts. I thank the Senator for his explanation.

Mr. SMOOT. Noting that the Senator is just offering an amendment providing for a graduated income tax on corporations, I might say that the next amendment we have to take up is the amendment to the corporation-tax provision. Does he desire that that go over to-day, until he can have his amendment printed?

Mr. WALSH of Massachusetts. I should like to have that go over for to-day.

Mr. SMOOT. I want to ask the Senator from North Carolina another question. I understood the Senator to say that

his proposed amendment is exactly the same as the House provision on the graduated tax.

Mr. SIMMONS. Yes.

Mr. SMOOT. Then I will ask that this go over until to-morrow, when the Senator desires to speak upon all of these provisions.

Mr. SIMMONS. Mr. President, to-morrow I shall make a very brief statement.

The next amendment passed over was on page 15, line 19, to strike out "11½ per cent" and insert "12½ per cent."

Mr. FLETCHER. Mr. President, I ask that an article prepared by Mr. Arthur W. Machen, jr., of the Baltimore bar, entitled "The strange case of Florida against Mellon," which I regard as the ablest and clearest discussion of the Federal estate tax question that I have seen anywhere, be printed in the CONGRESSIONAL RECORD. It ought to be enlightening both to Congress and to the States and to the public generally. I can not see how anyone who feels any concern about the rights of the States should favor the Federal estate tax as it now stands.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Florida?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

THE STRANGE CASE OF FLORIDA V. MELLON[1]

Arthur W. Machen, jr.[2]

The Supreme Court of the United States throughout its history has set an example to other courts of last resort by resolutely refusing to express its opinion on questions not before it or not necessary for the decision of the case in hand. No small part of the respect in which that tribunal is held by the bar is due to its adherence to this rule, even in cases where laymen would be apt to think a settlement of some important question on the merits would be a more patriotic course than a decision on some technical point of jurisdiction or the like. In no class of cases has this self-imposed rule of judicial ethics been more scrupulously observed than in those involving the construction or application of the Constitution of the United States. For example, the court has repeatedly gone to great lengths to construe a statute in such a way as to avoid deciding a constitutional question. (U. S. *v.* Delaware & Hudson Co., 213 U. S. 366, 29 Sup. Ct. 527 (1909); U. S. *v.* Standard Brewery, 251 U. S. 210, 219, 40 Sup. Ct. 139 (1920); Missouri Pac. R. R. *v.* Boone, 270 U. S. 466, 471–472, 46 Sup. Ct. 341 (1926); Fox *v.* Washington, 236 U. S. 273, 277, 35 Sup. Ct. 383 (1915); U. S. *v.* Jin Fuey Moy, 241 U. S. 394, 401, 36 Sup. Ct. 658 (1915).) So far as the writer recalls, only once—prior to 1927—has the court after holding a case to be not properly before it either for lack of jurisdiction, defect of parties, or any similar cause, proceeded to announce its decision on a constitutional question sought to be raised on the merits; and the results in that single exceptional case—Dred Scott *v.* Sanford (19 How. 393, U. S. 1856)—were not such as to encourage a repetition of the experiment.

But in 1926 the State of Florida asked the Supreme Court for leave to file a bill against the Secretary of the Treasury to restrain him from enforcing in Florida the Federal estate tax law of that year, on the ground that the provision for "credit" of State inheritance taxes up to 80 per cent of what the Federal estate tax would otherwise be—a provision almost identical, except as to the amount of the allowable credit, with the corresponding section of the revenue act of 1924—rendered the act unconstitutional. The application was opposed on the ground that the State as such had no interest in the question and was therefore not entitled to file the bill. The interest of the State, according to the allegations of the bill as interpreted by the Supreme Court, was sought to be vindicated on two grounds:

"(a) That the State is directly injured because the imposition of the Federal tax, in the absence of a State tax which may be credited, will cause the withdrawal of property from the State, with the consequent loss to the State of subjects of taxation; and (b) that the citizens of the State are injured in such a way that the State may sue in their behalf as parens patriæ." (Florida *v.* Mellon, 273 U. S. 12, 16, 47 Sup. Ct. 265 (1927).)

It may be remarked in passing that this analysis of the grounds on which the jurisdiction was invoked is a misstatement, or at least an inadequate statement, of the position of the complainant. Even the Government's brief outlines the plaintiff's position in a fairer way. The court itself in its statement of facts admitted that the complainant alleged that "the provisions of said section constitute an invasion of the sovereign rights of the State and a direct effort on the part of Congress to coerce the State into imposing an inheritance tax to penalize it and its property and citizens for failure so to do" (ibid.)—an admission which might well have apprised the court of the insufficiency of its statement of the grounds on which Florida based her claim of an interest in the subject matter of the suit.

[1] Read before the Lawyers' Round Table of Baltimore, Nov. 5, 1927.

[2] Of the Baltimore bar.

The Solicitor General on behalf of the Government naturally assumed that the constitutionality of the credit provision was not at this stage before the court, the only question being whether the court had jurisdiction. Accordingly, his brief contains not one word in support of the constitutionality of the act. He contended merely (1) that the suit was forbidden by section 3224 of the Revised Statutes, providing that no suit to restrain the collection of a Federal tax shall be maintained in any court; (2) that the State of Florida had no direct pecuniary interest in the question of the constitutionality of the act; and (3) that the State as parens patriæ was not entitled to raise the question.

The Supreme Court, on January 3, 1927, in an opinion delivered by Mr. Justice Sutherland and concurred in by all the other members of the court, passing sub silentio the first of these three objections, sustained both the other two, and overruled both grounds on which the complainant, as its position was apprehended by the Supreme Court, sought to sustain the jurisdiction. (Supra, note 3.) "Neither ground," said the court, "is tenable."

But, mirabile dictu, having thus declared that the court had no jurisdiction to pass upon the constitutional question sought to be raised by the bill, the opinion proceeded to attempt to decide that question.

As to the contention that the tax was not geographically uniform throughout the United States, the opinion states (supra, note 3, at 17):

"The contention that the Federal tax is not uniform because other States impose inheritance taxes while Florida does not, is without merit. Congress can not accommodate its legislation to the conflicting or dissimilar laws of the several States nor control the diverse conditions to be found in the various States which necessarily work unlike results from the enforcement of the same tax. All that the Constitution (Art. I, sec. 8, cl. 1) requires is that the law shall be uniform in the sense that by its provisions the rule of liability shall be the same in all parts of the United States."

As to the contention that the credit provisions of the act are in effect not a tax upon a constitutional subject, but an effort to coerce the States into levying inheritance or estate taxes equal at least to 80 per cent of the Federal rates, the opinion declares (ibid.):

"The act is a law of the United States made in pursuance of the Constitution and, therefore, the supreme law of the land, the constitution or laws of the States to the contrary notwithstanding. Whenever the constitutional powers of the Federal Government and those of the State come into conflict, the latter must yield."

Of course, this is a manifest begging of the question. If the act is "a law of the United States made in pursuance of the Constitution," the fact that it is in conflict with State policy on purely local matters is no objection to its validity. But the very question at issue, if the court had jurisdiction, was whether the law was made in pursuance of the Constitution. With the merits of the ruling, there is, however, at this point, no quarrel. Amazement is concentrated upon the expression of any opinion on a constitutional question which the court declared it has no jurisdiction to decide. The criticism would have been the same if the court, instead of expressing approval of the controverted provisions of the revenue act of 1926, had declared it unconstitutional.

The judicial pronouncement is the more remarkable because not only did the Government's brief contain no argument in support of the constitutionality of the act, but also the briefs for the plaintiff contained little or no direct argument against its validity. The only real argument against the statute was found in briefs filed by amici curiæ, which set forth in a sketchy way some arguments against the constitutionality of the challenged provision of the revenue act of 1926, but only by way of inducement, as it were, and as a step in the process of showing that the State had an interest in the question. Moreover, only half an hour a side was allowed by the court for oral argument, on the express ground (as the writer is informed by one who was present in court at the time) that the constitutionality of the act would not be considered but only the question of jurisdiction.

At all events, it is clear that the opinion expressed by Mr. Justice Sutherland in favor of the constitutionality of the act of 1926 was quite unnecessary to the decision—which was that the Court had no jurisdiction to pass on the question, and therefore should not allow a bill to be filed to raise that question; and consequently the opinion expressed upon that question was obiter dictum, extrajudicial, and not binding either upon the Supreme Court itself or upon any inferior tribunal.

To the constitutional question upon which the Supreme Court, thus "with a light heart" expressed its obiter opinion, this article is directed.

The expedient of "crediting" taxes paid the several States against taxes due the Federal Government had its origin in section 301 of the revenue act of 1924, which after levying an excise tax upon the transfer of the net estate of every decedent subsequently dying, and after providing a graduated scale of rates up to a maximum of 40 per cent of the amount by which the net estate exceeds $5,000,000, declares that "the tax imposed by this section shall be credited with the amount of any estate, inheritance, legacy, or succession taxes actually paid to any State or Territory, or the District of Columbia, in respect of any

property included in the gross estate," subject, however, to the proviso that "the credit allowed by this subsection shall not exceed 25 per cent of the tax imposed by this section." The act of 1926 repeats the provision, almost verbatim, but increases the limit of the credit from 25 per cent to 80 per cent of what the tax would otherwise be.

The remarkable effects of this provision for "credit" are perhaps not at first apparent, and certainly have not always been recognized. A moment's thought will show, however, that one result is to produce as between the several States an inequality in rate of tax which is mitigated in degree, but not altered in kind, by the limitation of the "credit" to 25 per cent or 80 per cent of what the tax would otherwise be.

For instance, the State of Maryland, although one of the first of the States to adopt inheritance taxation, has never imposed any tax upon transmission of property to a lineal descendant of the decedent; and the State of Florida, which has never had an inheritance tax, has recently, by constitutional amendment, expressly prohibited estate, legacy, inheritance, or succession taxes. On the other hand, most of the other States impose a tax of varying amounts on both lineal and collateral descents. Now, if a resident of Maryland or a resident of Florida should die, leaving a "net estate" of $1,000,000 (computed according to sections 302 and 303 of the revenue act of 1926 after deduction of the exemption of $100,000) descending to his only son, as sole heir at law, no State inheritance or succession taxes would be payable. A Federal estate tax of $48,500 would be payable. On the other hand, if the same decedent had lived, or the property which he owned had been situated in, say, Connecticut, a tax of $40,262 would be payable to the State, and although the net amount received by the heir would be almost the same, the identical estate would have paid a Federal estate tax of only $9,700. In fact, in any State imposing on such an estate inheritance or estate taxes of an amount equal to or greater than $38,000, the Federal tax would be only $9,700.

Appended is a table showing in the case of eight States the amount of State and Federal taxes on a "net estate" of $1,000,000, and the ratio of the Federal tax (1) to the amount of the taxable "net estate" computed, under sections 301 and 302 of the Federal act, without deduction for any inheritance or estate taxes, (2) to the amount of the estate before deducting the Federal exemption of $100,000, (3) to the net amount passing to the enjoyment of the heir or legatee after payment of all taxes, both State and Federal, (4) to the amount of the estate after deducting the State inheritance or estate taxes but without deducting the Federal estate tax itself, and (5) to the amount of the estate after deducting the Federal estate tax, but without deducting the State inheritance or estate taxes.

*Table in case of "net estate" of $1,000,000 (or $1,100,000 without deducting the Federal exemption of $100,000) descending to an only son*
(Under revenue act of 1926)

| Location of estate | State succession tax | Federal estate tax | Net taxable estate under secs. 302 and 303 of Federal act | Net amount passing to heir after deducting both State and Federal taxes | Amount after deducting State tax but without deducting Federal tax | Amount after deducting Federal tax but without deducting State tax | To net taxable estate under sec. 303 of Federal act | Ratio of Federal tax | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | To amount before deducting Federal exemption of $100,000 or any taxes | To net amount passing to heir after deducting both State and Federal taxes | To amount after deducting State tax but without deducting Federal taxes | To amount after deducting Federal tax but without deducting State tax |
| | | | | | | | | *Per cent* | *Per cent* | *Per cent* | *Per cent* | *Per cent* |
| Maryland | None. | $48,500 | $1,000,000 | $1,051,500 | $1,100,000 | $1,051,500 | 4.85 | 4.41 | 4.61 | 4.41 | 4.61 |
| New York | $40,750 | 9,700 | 1,000,000 | 1,049,550 | 1,059,250 | 1,090,300 | .97 | .88 | .92 | .88 | .89 |
| North Carolina | 46,548 | 9,700 | 1,000,000 | 1,043,752 | 1,053,452 | 1,090,300 | .97 | .88 | .94 | .93 | .89 |
| Illinois | 115,842 | 9,700 | 1,000,000 | 974,458 | 984,158 | 1,090,300 | .97 | 88 | 1.00 | .99 | .89 |
| Wisconsin | 98,460 | 9,700 | 1,000,000 | 991,840 | 1,001,540 | 1,090,300 | .97 | .88 | .98 | .97 | .89 |
| Connecticut | 40,262 | 9,700 | 1,000,000 | 1,050,038 | 1,059,738 | 1,090,300 | .97 | .88 | .92 | .92 | .89 |
| Idaho | 29,585 | 18,915 | 1,000,000 | 1,051,500 | 1,070,415 | 1,081,085 | 1.89 | 1.72 | 1.80 | 1.77 | 1.75 |
| Kansas | 21,557 | 26,923 | 1,000,000 | 1,051,500 | 1,078,423 | 1,073,077 | 2.69 | 2.45 | 2.56 | 2.50 | 2.50 |

The inevitable result and, indeed, the avowed purpose, of such a system of Federal taxation, if it be valid and persisted in, is to force the States to impose in all cases inheritance or estate taxes at least equal to the "credit" allowed by the Federal law. By doing so, they add nothing to the burden borne by their own citizens, and secure to themselves a considerable revenue which would otherwise go to the Federal Government. The States, in the exercise of powers expressly reserved to them by the tenth amendment, are thus to be made mere instrumentalities for executing the policy of progressive inheritance taxation, approved by Congress for the purely State purpose of reducing "swollen fortunes."

Already the great and once sovereign State of New York—it is noteworthy that the Supreme Court in Florida *v.* Mellon, for almost the first time in its history, speaks of the States not as "sovereign," but as "quasi sovereign," (the only earlier instances recalled by the writer in which the Supreme Court has applied the term "quasi sovereign" to States of the American Union are: Georgia *v.* Tennessee Copper Co. (206 U. S. 230, 237, 27 Sup. Ct. 618 (1907), per Holmes, J.; Missouri *v.* Holland, 252 U. S. 416, 431, 40 Sup. Ct. 382 (1920), per Holmes, J.; Massachusetts *v.* Mellon, 262 U. S. 447, 482, 485, 43 Sup. Ct. 597 (1928), per Sutherland, J.)—the great and once sovereign State of New York, hearing its master's voice, has imposed an estate tax equal to the excess of four-fifths of the Federal rates over the preexisting State taxes, to continue in force only so long as the Federal law allows a "credit" for State estate taxes up to four-fifths of what the Federal tax would otherwise be. Georgia, the State of Alexander Stephens, has likewise meekly obeyed the Federal command. California, Colorado, Delaware, Maine, Massachusetts, Missouri, Montana, North Carolina, Pennsylvania, Ohio, and Vermont have done the same. Doubtless other States, if the law be continued in force, will be driven to follow their example.

It has even been proposed to raise the credit to 100 per cent of what the Federal tax would otherwise be, or, in other words, to repeal the Federal estate tax in these States imposing inheritance or estate taxes equal to or greater than the Federal rates, but to leave it in force, to a varying extent, in the remaining States.

Now, there are at least three restrictions upon, or limitations of, the power of Congress to levy an estate tax or other excise: (1) The tax must be "uniform throughout the United States"; (2) the tax must not be so laid as to obstruct the exercise by the States of the governmental powers inherent in the structure of the Union and reserved to them by the Constitution; and (3) the tax must be a real tax, and not appear on its face to be an attempt under the guise of a tax to legislate upon matters reserved by the Constitution exclusively to the States.

Since the very recent case of Nichols *v.* Coolidge (274 U. S. 531, 47 Sup. Ct. 710 (1927)), we are justified in adding a fourth restriction; namely, that the tax must not be arbitrary and whimsical in its operation. But this restriction, notable though it be, has perhaps little bearing on our present subject.

All three of the other restrictions or limitations above mentioned may, however, perhaps be claimed as invalidating the estate tax of 1924, with rates varying as we have seen in different parts of the country, and, still more, the estate tax of 1926, both of which are avowedly levied for the purpose of coercing the States into adopting higher rates of inheritance taxation than some of them have seen fit voluntarily to impose. It behooves us, therefore, to examine in all three of these aspects the system of "crediting" State taxes upon a Federal tax.

I

As every law student knows, the constitutional provision that "all duties, imposts, and excises shall be uniform throughout the United States" requires only "geographical" or "territorial" uniformity, and does not, like the equal-protection clause of the fourteenth amendment (which is applicable only to the States), require the taxes be laid according to any rule of reason either in the selection of the subjects of the tax or in fixing the rates of tax. (United States *v.* Singer, 15 Wall. 111, 121 U. S. (1872); Head Money Cases, 112 U. S. 580, 594, 5 Sup. Ct. 247 (1884); Knowlton *v.* Moore, 178 U. S. 41, 20 Sup. Ct. 747 (1900); Patton *v.* Brady, 184 U. S. 608, 622–623, 22 Sup. Ct. 493 (1902); Flint *v.* Stone Tracy Co., 220 U. S. 107, 158, 31 Sup. Ct. 342 (1911); Billings *v.* United States, 232 U. S. 261, 282, 34 Sup. Ct. 421 (1914); Brushaber *v.* Union Pacific Railroad, 240 U. S. 1, 24, 36 Sup. Ct. 236 (1916); La Belle Iron Works *v.* United States, 256 U. S. 377, 392, 41 Sup. Ct. 528 (1921).)

It is also settled that Congress in levying an excise tax is not obliged, by the requirement of geographical uniformity, to select subjects which are found, even with approximate uniformity, throughout the several States. For example, a tax on sleighs would produce considerable revenue in Maine, and none at all in Florida; but it would be none the less uniform "throughout the United States." So a tax on the production of oysters or tobacco would produce considerable

revenue in Maryland and none at all in Montana; but it would be none the less uniform in the constitutional sense. All that is necessary is that the law should say, with the White Knight in Through the Looking Glass when reproached with the unlikelihood of a mousetrap catching any mice on the back of a horse. "Not very likely, perhaps; but if they do come, I don't choose to have them running about" free of tax.

Not only is this true, but subjects of Federal excise taxation may be selected, even though their nonexistence in some States is due to the laws of those States. For instance, in the days of American liberty, an excise tax on the sale of liquor produced large revenues in the free States and none at all—if the State prohibition laws were enforced—in the prohibition States; but Federal liquor excises were nevertheless quite constitutional. As said by the Supreme Court (Flint *v.* Stone Tracy Co., supra note 11, at 174. See also License Cases, 5 Wall. 462 (U. S. 1866); Knowlton *v.* Moore, supra note 11, at 106):

"A liquor tax is not rendered unlawful as a revenue measure because it may yield nothing in those States which have prohibited the liquor traffic."

But, on the other hand, the very cases which establish this principle also outline what is meant by geographical uniformity. For example, in the leading case the Supreme Court said (Knowlton *v.* Moore, ibid. 84. Cf. Fairbank *v.* U. S., 181 U. S. 283, 298, 21 Sup. Ct. 648 (1901):

"Wherever a subject is taxed anywhere, the same must be taxed everywhere throughout the United States, and at the same rate."

And again:

"The tax is uniform when it operates with the same force and effect in every place where the subject of it is found." (Head Money cases, supra, note 11.)

And, still again, with reference to a tax on distillers levied in proportion to 80 per cent of the capacity of the distillery, whether produced or not:

"The tax is uniform in its operation; that is, it is assessed equally upon all distilleries wherever they are." (U. S. *v.* Singer, supra, note 11.)

Mr. Justice Miller, in his Lectures on the Constitution, gives a similar definition (Miller, the Constitution (1891), 240. Italics the writer's):

"They"—i. e., duties, imposts, and excises—"are not required to be uniform as between the different articles that are taxed, but uniform as between the different places and different States. Whisky, for instance, shall not be taxed any higher in the State of Illinois or Kentucky, where so much of that article is produced, than it is in New York or Pennsylvania. The tax must be uniform on the *particular article;* and it is uniform within the meaning of the constitutional requirement if it is made to bear *the same percentage* all over the United States."

How is it possible to reconcile with the principle that "if a subject is taxed anywhere, it must be taxed everywhere, and at the same rate," a law which taxes the transmission of a net estate of $1,000,000 in Maryland or Florida to a lineal descendant at 4.85 per cent, and the transmission of an estate of the same amount to a lineal descendant in New York at 0.97 per cent, and in Kansas at 2.69 per cent, as is done by the estate tax law of 1926?

Congress in taxing net income may, indeed, allow deduction of taxes paid to the State pursuant to the laws thereof in calculating the taxable subject, as has been done not only in the corporation excise tax of 1909 but also in the various revenue acts, beginning with that of 1913, passed pursuant to the sixteenth amendment. The amount of the taxable net income is thus affected by State laws, but the same tax is levied upon the same net income in one State as in another. For instance, A, residing in one State, may have an income of $100,000 over and above all exemptions and deductions other than State taxes. If his State taxes amount of $10,000, he is taxed upon a net income of $90,000, and his Federal income tax under the act of 1924 would amount to $18,600. On the other hand, B, residing in some more fortunate or more parsimonious State, may have exactly the same amount of property and the same income; but if his State taxes amount to only $2,000, his net taxable income is $98,000, and his Federal income tax under the act of 1924 is $21,940. But this is no unconstitutional discrimination against B, for both A and B are subject to the same tax on the same net income. Or, again, C, residing in the second State, may have an income of $91,836 over and above all deductions other than State taxes, and may pay State taxes of $1,836, so that his net taxable income is $90,000, upon which, like A in the first State, a Federal tax of $18,600 will be payable. He and A are treated exactly alike on the same net income, so that there is no violation of the constitutional requirement of territorial uniformity.

But suppose Congress, in order to make up to A the disadvantage of living in some State which, by reason of unfortunate circumstances or bad government, is obliged to levy comparatively high taxes, should enact that A on his net income of $90,000 should pay a tax of $12,680, or 12.68 per cent, while B on his net income of $98,000 should pay a tax of $19,940, or 20.35 per cent, and C on his net income of $90,000 should pay a tax of $16,600, or 18.44 per cent—what then? Would anybody deny that such a law would not be "uniform throughout the United States"? Yet that is what would be done by laying the tax on the income without deducting State taxes while "crediting" the State taxes in reduction of the Federal tax.

To come still closer to the subject in hand, Congress, in levying an estate tax, might impose the tax on the net estate after deducting all State estate or "inheritance" taxes levied upon the estate before distribution as distinguished from taxes levied upon the distributee and payable by him, as was in fact done by the act of 1916. Such a tax was uniform throughout the United States, although the burden was more heavily felt in those States which levied, instead of a tax on the estate in respect of the right to transmit the property to the various legatees or distributees, a tax on the several legatees or distributees after distribution in respect of their rights to receive the property from the decedent's estate. The difference between those two classes of State taxes may be almost as fine in substance—though not in theory—as that between tweedledum and tweedledee; but at any rate it is not a "geographical" or "territorial" distinction. The same taxable subject paid the same Federal tax in one State as in another.

So, too, Congress might have levied its tax on the net estate passing to the ultimate beneficiaries, after deduction of all taxes levied by State law, whether levied, technically, in respect to the right to transmit or of the right to receive; and such taxes, too, would have been "uniform throughout the United States," because, although the taxable subject, and therefore the amount of the tax, would to some extent depend on State law, yet the same subject would be taxed everywhere in the United States and at the same rate.

Yet, again, Congress might levy a tax upon the "net estate" but without permitting, in calculating the taxable estate, the deduction of any State inheritance or estate taxes, whether the latter be levied, technically, upon the estate before distribution, or on the respective distributees. This was, in fact, done by the revenue acts of 1918 and 1921, and, of course, such taxes were uniform throughout the United States.

But in the act of 1924 for the first time Congress undertook to depart from these constitutional paths and, while nominally selecting as the taxable subject the decedent's estate without deduction for State inheritance or estate taxes, yet to vary the rate of tax in different parts of the country.

Defenders of this system of State coercion insist that the method of allowing "credits" upon Federal taxes is not new but has its antetype in several provisions of the income tax laws. It is, indeed, true that the income tax laws contain several provisions for regulating the amount of Federal tax collectible by allowing certain "credits"; but none of these provisions is such as in any way to affect the geographical or territorial uniformity required by the Constitution. Thus, the revenue act of 1918 provided that the income tax as computed under other provisions of the act should in certain cases be credited with the amount of income tax paid during the taxable year to foreign countries or to any possession of the United States. (Revenue act of 1918, secs. 224(a), 238.) But as the requirement of uniformity does not extend to foreign countries or to possessions of the United States, and as the citizens or residents of all the States have precisely the same privilege with respect to crediting foreign taxes, the tax levied by Congress is none the less "uniform through the United States." Congress has power to levy certain extraterritorial taxes, such as taxes upon income from foreign real estate owned by an American citizen, or upon income earned in a foreign country by a citizen of the United States residing therein; and in levying such taxes there can be no violation of the requirement of geographical uniformity throughout the United States, provided citizens or residents of all the States are treated alike. Excises levied by Congress upon, or in respect of, property in one State—say, New York—are not required to be uniform with those levied by Congress in Porto Rico or the Philippines, in Canada, or any other foreign country; but they are required to be uniform—that is, levied at the same rate upon the same property—with taxes levied by Congress in Pennsylvania or any other State.

But, some objector may say, the discrimination in the act of 1924 and in the act of 1926 is not against certain States or parts of States "geographically" or "territorially," but is against the residents of certain places or against the estates of persons owning property in those places, because of the laws thereof. According to this view, Congress can not discriminate by name against Maryland or Florida, but it can discriminate against all residents of places where such laws prevail as those in force in Maryland or Florida, as distinguished from those in force in New York or other States.

Now, the Supreme Court has never had occasion to define the constitutional requirements of uniformity of excise taxation throughout the United States—if we except the extraordinary dictum in Florida *v.* Mellon—except to say that it contemplates nothing more than "geographical" or "territorial" uniformity and that it means that "whenever a subject is taxed anywhere" in the United States "it must be taxed everywhere" in the United States "and at the same rate." No case exists in which the Supreme Court has held an excise tax invalid because not "uniform throughout the United States." We

are, therefore, compelled to resort to a consideration of the question on principle.

Surely, however, the constitutional requirement of uniformity can not be evaded by designating the favored States by description rather than by name. For instance, an excise tax applicable only in the States where the laws prohibited slavery would, prior to the Civil War, have been clearly unconstitutional. So, too, prior to the eighteenth amendment, an excise applicable only in the free or license States would equally clearly have been invalid. Even to-day if Congress should pass an excise law applicable only, or at an increased rate, in those States whose laws permit child labor would anyone be so bold as to maintain its constitutionality?

The truth is, of course, that law—at least Anglo-American law—is local or territorial, and any discrimination based on the law prevailing in any State is necessarily a geographical or territorial discrimination, and as such prohibited by the Constitution.

Of course, Federal taxation must be superimposed upon the background of a system of rights of property and contract created and regulated by State laws, and therefore must take cognizance of and may properly be to some extent affected by variation in those State laws. For instance, in determining whether money lost in betting on a horse race can be deducted in calculating the net income subject to the Federal tax the Commissioner of Internal Revenue rules that the question depends upon whether betting be legal or illegal according to State law. Therefore, in Maryland, where betting on horse races, under certain regulations, is permitted, money lost at the races may be deducted in calculating the taxable income; but money lost in precisely the same way at precisely similar races in States where all betting is illegal may not be deducted. At first sight this may seem to be a discrimination against the latter class of States because of their laws, very similar to the discrimination against States levying low inheritance taxes, which characterizes the estate tax law of 1924. But a moment's thought and analysis will show the wide difference. Gambling losses in transactions illegal under State law can not be deducted because they are really not losses at all. It is a case where the "subject of the tax" does not exist or exists to a lesser extent in States having certain laws. Gambling losses, where gambling is illegal, are merely voluntary payments.

Another case of the fitting of the system of Federal taxation upon a system of diverse State laws, with a consequent variation in the amount of tax according to the laws of the State, is found in the provision that insurance companies in calculating their taxable income may deduct "the net addition required by law to be made within the year to reserve funds." At first blush this provision may seem to bear unequally in those States having lax insurance laws, for an addition to a reserve fund required to be made by conservative business methods can not be deducted unless it be required by the law of the State. Consequently an insurance company operating in one State may deduct an addition to a certain reserve fund made within the taxable year, while a rival company operating in another State can not deduct a precisely similar addition to a precisely similar reserve fund—and all on account of the diversity in the laws of the two States. But in all this there is no inequality within the United States, because the same income, deducting only compulsory additions to reserve funds, is taxed. The law everywhere taxes the same subject, namely, the income after deduction of compulsory additions to reserve funds.

Numerous other illustrations might be given. For example, take the case of a stamp tax on contracts. A paper which is not a contract according to the laws of one State may be a binding contract according to the laws of another. Such a paper under such a law would be taxable in the latter State but not in the former. In all this there is no violation of the constitutional requirement of uniformity throughout the United States, for the same subject—namely, an enforceable contract—is taxed everywhere and at the same rate throughout the United States.

But it may be claimed that the estate-tax provisions of the acts of 1924 and 1926 can be justified on the same principles. If it be permissible to tax only such contracts as are legally binding by the laws of the several States, why is it not permissible to tax only such inheritances as pass free of tax under the laws of the several States? To this question several answers may be given. In the first place, this is not what the acts of 1924 and 1926 do. They expressly levy the tax on the estate without deduction for any State inheritance taxes. A Federal tax on inheritances which pass free of State tax would be less objectionable than a tax on estates without deduction for State taxes, with a provision that the amount of the State tax may be "credited" on the Federal levy. A Federal tax on inheritances passing free of State tax would indeed tend to induce the States to impose some State inheritance tax; but it would have no such coercive force as the acts of 1924 and 1926, which not merely induce the States to pass inheritance taxes, but actually fix the rates of the taxes which they are required to impose. In the second place, it is one thing to lay a tax on legally binding contracts and quite a different thing to levy a tax on inheritances which the States do not tax. In the one case the thing taxed is something which State laws contributed to produce and which can not exist without the concurrence of State laws; in the other case the thing taxed exists quite independently of State laws—at least of the State tax laws—and the State laws the existence or nonexistence of which determine the imposition of the Federal tax are purely collateral. It is one thing to select for taxation objects which must have various characteristics, among which is conformity or lack of conformity to State laws, and a very different thing to select the taxable objects without reference to State laws, and then to say that they shall be taxed or not or that the rates of tax shall be fixed according to State laws on some collateral subject.

This distinction deserves to be emphasized. For example, a tax on contracts is, of course, "uniform throughout the United States," although what constitutes a contract depends upon State laws and although what would be a contract in one State may not be a contract in another. But on the other hand, a tax on contracts collectible only in States which refuse to prohibit child labor, pass State Volstead Acts, or otherwise to comply with the demands of Congress would be, it is submitted, clearly in conflict with geographical uniformity, and therefore unconstitutional.

It is one thing to select for Federal taxation objects which have certain characteristics among which is conformity or nonconformity with State laws; and quite a different thing after you have selected the objects of Federal taxation to gauge the amount or rate of Federal tax by State legislation on some collateral subject—whether such State legislation relates to taxation or any other subject.

It is claimed, however, that the effect of the provision for crediting State inheritance taxes on the Federal estate tax is to promote and not to destroy uniformity of taxation throughout the United States. Indeed, the evil against which the advocates of such measures are clamoring is the present lack of uniformity in inheritance taxation in the different States. What they consider the unsisterly action of Florida in bidding for immigration of multimillionaires by prohibiting all inheritance taxes has made them see red. They apparently fear that all the rich men of other States will leave them for the torrid—or shall we say salubrious?—climate of Florida, and that it will be necessary for other States to meet the competition of Florida by reducing their rates of inheritance taxation. How far this fear is justified or how far the present lack of uniformity in State inheritance taxation is an unmixed evil we need not pause to inquire, for, however great that evil may be, it can not be remedied by imposing an unconstitutional Federal tax. What the Constitution requires is not uniformity of all excise taxation, State and Federal, but only of Federal excise taxation. It is not permissible, in order to counteract a diversity in rates of State taxation in different parts of the country—a diversity which the Constitution permits—to create a countervailing diversity of rates in Federal taxation in different parts of the United States, a diversity which the Constitution prohibits. In order to bring about a kind of uniformity which the Constitution does not require, it can not be right to destroy the kind of uniformity which the Constitution commands.

As said by the Supreme Court in another case in which an attempt was made to justify unconstitutional legislation by the desirability of promoting uniform State laws: "There is no power vested in Congress to require the States to exercise their police power so as to prevent possible unfair competition. * * * It may be desirable that such laws be uniform, but our Federal Government is one of enumerated powers." (Hammer *v.* Dagenhart, 247 U. S. 251, 273, 275, 38 Sup. Ct. 529 (1918). Cf. Nichols *v.* Coolidge, 274 U. S. 531, 540 ("The mere desire to equalize taxation can not justify a burden on something not within congressional power").)

The question has been asked whether, if all the States imposed inheritance or State taxes to an extent equal to or greater than the Federal rates, the Federal tax would not be "uniform" even though it allowed a credit for State taxes; and, upon the assumption that this question would be answered in the affirmative, it is argued that the only valid objection to the constitutionality of the credit provision is that the purpose of the portion of the rates of taxation against which the tax credit is allowed is not the collection of revenue but coercion of the States. But even if all the States imposed taxes up to the amount of the Federal credit, it would seem that the allowance of the credit would destroy uniformity in the constitutional sense. A Federal excise is uniform if on its face it applies throughout the United States, although in fact the subjects of the tax are not found at all in some of the States; and, conversely, a tax is not uniform if it is so laid that it may not always apply uniformly throughout the country, even though for the time being, through extraneous circumstances, it operates uniformly. But even if the Federal law would be uniform and valid, if all the States had uniform State inheritance tax laws, it would cease to be uniform, and therefore become unconstitutional, as soon as one State should change its tax law. A statute which is valid when passed may by change of circumstances become unconstitutional, or vice versa. (Smyth *v.* Ames, 169 U. S. 466, 549–550, 18 Sup. Ct. 418 (1898).)

Some light may perhaps be thrown upon the meaning of geographical uniformity by decisions relating to the power to pass "uniform laws on the subject of bankruptcies throughout the United States." These

"uniform laws" must be engrafted upon a system of diverse State laws as to contracts and property. The Federal law could not give creditors in all parts of the country precisely the same rights without recasting the laws of the States on the subjects of contracts and property in one uniform mold. That, of course, is not required, and possibly would not even be permitted by the constitutional power to establish uniform laws on the subject of bankruptcies. The validity of the various claims against the bankrupt estate must be determined according to diverse State laws, and what would be a valid claim in one State might not be in another. So the extent of the bankrupt's property rights must be judged by diverse State laws, and what would be in one State a fee simple might be an estate for life in another, and wholly void in a third. In recognizing such diversities of State laws a Federal bankrupt law does not cease to be uniform.

Similarly, a Federal bankrupt act may recognize and enforce homestead and other exemptions existing by the laws of the several States without any infringement of the requirement of uniformity. (Hanover Nat. Bank v. Moyses, 186 U. S. 181, 22 Sup. Ct. 857 (1902).) Moreover, a bankrupt act may properly recognize and enforce the laws of the State respecting dower, validity of mortgages, priorities of payment, conveyances in fraud of creditors, and the like. (Stellwagen v. Clum, 245 U. S. 605, 614–5, 38 Sup. Ct. 215 (1918); Thomas v. Woods, 173 Fed. 585, (C. C. A. 8th 1909).) All these cases related to the bankruptcy act of 1898, which recognizes, in the particulars above referred to, the State law existing at the time of the bankruptcy.

A more debatable question arose under some of the earlier bankrupt acts. For example, the bankrupt act of 1867 undertook to adopt the exemptions prevailing in the several States, not at the time of the bankruptcy, but at a fixed date in the past. This provision was sustained by the circuit court for Missouri in an opinion concurred in by Mr. Justice Miller, of the supreme court. (In re Beckerford, Fed. Cas. No. 1, 209 (1870).) In 1873, by an amendatory act, Congress went still further and—as the amendment was generally, though not universally, construed—attempted to adopt the exemption laws as they existed on the statute books of the several States on a given date in the year 1871, even though some of those statutes were unconstitutional, null, and void. The validity of this amendment was sustained by a number of decisions. (In re Everitt, Fed. Cas. No. 4579 (S. D. Ga. 1873); In re Kean. Fed. Cas. No. 7630 (W. D. Va. 1873); In re Smith, Fed. Cas. No. 12986 (N. D. Ga. 1873); In re Jordan, Fed. Cas. No. 7514 (W. D. N. C. 1873); In re Jordan, Fed. Cas. No. 7515 (N. D. Ga. 1874); In re Smith, Fed. Cas. No. 12996 (N. D. Ga. 1876); Darling v. Berry, 13 Fed. 649 (C. C. Iowa, 1882).) On the other hand, the amendment was held unconstitutional in cases which, though somewhat fewer in number, are yet perhaps greater in weight by reason of the fact that in one of them the opinion was delivered by Chief Justice Waite. (In re Dillard, 7 Fed. Cas. No. 3912 (E. D. Va. 1873); In re Deckert, 7 Fed. Cas. No. 3728 (E. D. Va. 1874) (opinion by Waite, C. J.); In re Shipman, 21 Fed. Cas. No. 12791 (W. D. N. C. 1875); In re Duerson, 7 Fed. Cas. No. 4117 (D. C. Ky. 1876).)

Our present subject justifies an elaborate attempt to make a choice between these two opposing lines of authorities. Both admit that while in some cases Congress may, in enacting a bankrupt law, fail to correct a diversity due to divergent State laws, yet whenever it undertakes to legislate for itself, the regulations it prescribes must be uniform throughout the whole country. It is not very material to our present inquiry whether the State laws which Congress may suffer to continue in force must be the valid and constitutional laws of the States or whether they may be whatever for the time being is recognized and de facto enforced as law in the States. Our present inquiry does not involve the question how far Congress in enacting bankrupt laws or tax laws may allow diverse State laws to continue to operate, without impairing the constitutionally required uniformity, but rather the question whether Congress in fixing its own tax rates may allow them to be gauged according to laws of the States upon what is and must be a collateral subject. Congress may, of course, in matters of taxation, as in matters of bankruptcy, recognize State laws, and levy its taxes only on so much as remains after State laws have had their operation; but the present question is whether the tax upon whatever Congress selects for the subject of its taxation must be uniform in all the States, or whether it may vary according to the varying laws of the States upon a collateral subject.

It is also noteworthy that the Supreme Court has held that while Congress in regulating interstate commerce may prescribe different rules for different parts of the country (Clark Distillery Co. v. Western Md. Ry., 242 U. S. 311, 326–7, 37 Sup. Ct. 180 (1917)), yet when it undertakes to regulate matters of admiralty or maritime law, its regulations must be uniform throughout the States, and therefore can not give a remedy to maritime employees under the diverse workmen's compensation acts of the several States. (Knickerbocker Ice Co. v. Stewart, 253 U. S. 149, 40 Sup. Ct. 438 (1920). Accord: Washington v. Dawson, 264 U. S. 219, 44 Sup. Ct. 302 (1924).) In such a case Congress is not, as in the bankruptcy cases above referred to, merely allowing State laws to continue to operate upon matters with which the States are competent to deal in the absence of Federal legislation on the subject, but is by force of its own act attempting to extend the operation of diverse State laws to matters confided by the Constitution to the exclusive and uniform legislative jurisdiction of the United States.

This decision has a real bearing upon our present subject, because Congress in attempting to allow State taxes to be credited upon Federal taxes is not merely permitting the State laws to continue to operate—as in the bankruptcy cases—but is attempting to extend the operation of the State laws to matters confided to the exclusive control of Congress. Of course, nothing is more exclusively within the power of Congress, and more completely beyond the power of the States, than to fix the amount of Federal tax collected from a given subject; and when Congress attempts to declare that State taxes may be credited in reduction of the Federal tax collectible from a given subject, it is giving those State laws an operation and effect which proprio vigore they could never have.

Mr. Justice Sutherland's dictum in Florida v. Mellon strangely misapprehends both the effects of the acts of 1924 and 1926 and the basis of the objection thereto. In answer to the contention of lack of geographical uniformity in the Federal tax, he says (273 U. S. 12, 17):

"Congress can not accommodate its legislation to the conflicting or dissimilar laws of the several States nor control the divers conditions to be found in the various States which necessarily work unlike results from the enforcement of the same tax."

Of course, it can not; and nobody ever contended that it should. But it can, and, it is submitted, must refrain from allowing the several States to fix by their changing laws the rate of a Federal tax on any given subjeect which has been selected without reference to State laws.

The learned justice proceeds:

"All that the Constitution (Art. I, sec. 8, C. 1) requires is that the law shall be uniform in the sense that by its provisions the rule of liability shall be the same in all parts of the United States."

In this the learned judge has departed from the rule laid down by earlier cases. That "the rule of liability" shall be the same in all parts of the United States is not all that the Constitution requires. In addition, it requires that the rate of tax upon the same subject shall be the same in all parts of the United States; and it is in that particular, among others, that the acts of 1924 and 1926 depart from the constitutional standard.

Congress has fixed as the subject of the tax the net estate passing without deduction for State inheritance or estate taxes. Having done so, the constitutional mandate is that the tax must be levied at the same rate everywhere in the Union upon that subject. The State tax laws do not relate to the subject of the tax, but are purely collateral. You might as well allow a credit of fines collected by the States for violations of the prohibition laws, or the amount paid the governor of the State as a salary.

Let us recur to the definition of geographical uniformity given by the Supreme Court in Knowlton v. Moore (Supra note 11, at 84), or by Mr. Justice Miller in his Lectures on the Constitution—in order that a tax may be uniform, the "same subject," if taxed anywhere in the United States, "must be taxed everywhere, and at the same rate," or, in the words of Mr. Justice Miller, must "bear the same percentage all over the United States"—and let us try to apply it to the subject in hand. First, then, what is the "subject" of the tax, or "article taxed"? It is, according to the terms of the act itself, "the transfer of the net estate"—which by force of the definition clauses in section 300 means "the net estate as determined under the provisions of section 303"—"of every decedent dying after the passage of this act" (Sec. 301 (a)) and section 303 expressly provides that in calculating the net estate no "estate, succession, legacy, or inheritance taxes" shall be deducted. If that be the "subject" of the tax, or "article taxed," the tax is certainly not imposed everywhere in the United States "at the same rate" or "at the same percentage"; for upon a "net estate" of $1,000,000, calculated without deducting any estate, succession, legacy, or inheritance taxes and passing to a lineal descendant, the "rate" or "percentage" of Federal tax is 4.85 per cent in Maryland or Florida, and only 0.97 per cent in New York, North Carolina, Illinois, or Wisconsin.

But it may be said this is a mere matter of words. In substance, the tax is levied, not upon the net estate computed according to section 303, but upon the estate free of State inheritance, legacy, succession, or estate taxes, but before deducting the Federal tax. For the sake of argument, so be it; and what is the result? The "rate" or "percentage" of the Federal tax to the estate remaining after deduction of the State inheritance, legacy, succession, or estate taxes is 4.41 per cent in Maryland or Florida, 0.99 per cent in Illinois, 2.50 per cent in Kansas, and only 0.88 per cent in New York.

The same inequality of rate or percentage will be found to exist if we assume that the "subject" of the tax or "article taxed" is the transfer of the net estate after deduction of all taxes, State and Federal, or the net estate after deduction of the Federal estate tax, but without deduction of State inheritance, succession, legacy, or estate taxes. On the former hypothesis, the rate varies upon a "net estate" of $1,000,000 from 4.61 per cent in Maryland or Florida to 0.91 per cent in New York; and on the latter hypothesis the rate varies from

4.61 per cent in Maryland or Florida to 0.89 per cent in North Carolina, New York, Illinois, or Wisconsin.

The truth is that the tax computed according to the system of "credits" established by section 301 of the revenue acts of 1924 and 1926 is levied throughout the country at "the same rate" or "same percentage" with respect to no conceivable "subject" or "article" under the sun, and is therefore not "uniform throughout the United States."

The object of the constitutional requirement of geographical uniformity was, of course, to prevent discrimination against or in favor of any State or section, and particularly any discrimination against or in favor of any State because of its laws or institutions. The States took the risk of Congress selecting as objects of the tax commodities which are found in some only of the States, even though their nonexistence should be due not to natural circumstances but to State laws. But the States were jealous, and properly so, lest the power of Federal taxation should be so exercised as to penalize one State for failing in respect of its reserved powers to do what Congress might deem wise; hence the uniformity clause was inserted.

If such a provision as the credit clause of the estate tax law can be sustained, then the whole object of the requirement of uniformity might be frustrated.

Suppose, for example, Congress should conclude that the salaries paid the judges in some of the States are inadequate—as they undoubtedly are—and suppose Congress, in order to remedy the inequality of judicial salaries in different States, should exact that there should be credited on the amount of estate taxes collected from the estates of decedents a sum equal to the lowest salary paid a judge of a court of record in the State of the taxpayer's residence up to what Congress may fix as the minimum respectable salary, would anybody doubt that the tax levied by such a law would not be "uniform throughout the United States"? Yet how would it be possible to distinguish such a case from the "credit" provision of the estate tax law?

Suppose Congress should determine that the caliber of the probate judges—for example, in Maryland, where such judges are not required to be lawyers—does not come up to the standard, and in order to improve the quality of these courts should allow as a credit on estate taxes collected from deceased residents of the several States an amount equal to the annual salary paid the judges of the court in which the estate is administered? Justice Sutherland's reasoning would sustain such a provision. Yet who would hold it valid?

Suppose, for example, Congress should determine that the State ought to be "encouraged" to expend additional amounts on the public schools and should exact that income taxes due from residents of any State should be "credited" with their respective pro rata share of amounts expended by the State upon education. Would it be possible to sustain such a provision? Yet if it be invalid, how can the "credit" allowed by the estate tax of 1924 or 1926 be distinguished?

Yet, again, suppose that Congress should conclude, as many tax theorists now do, that the States ought to substitute income taxes for the property taxes now in force, and under the influence of that theory should enact that State income taxes paid by any taxpayer should be credited upon the Federal tax to the extent of 25, 50, or 80 per cent thereof. The States would be forced in defense of their citizens to adopt a scheme of income taxation as a substitute for the existing property taxes. Yet if the estate tax of 1924 or 1926 be valid there could be no possible constitutional objection to such a law.

Unless the uniformity clause is to become a dead letter, shorn of all vitality and efficacy, the Federal estate tax of 1924, and still more clearly the estate tax of 1926, can not be reconciled with the Constitution.

II

The second restriction upon the congressional power of excise taxation is that the tax must not be so laid as to burden the exercise by the States of governmental functions reserved to them by the Constitution.

Unlike the requirement of uniformity, this is not express but implied. It is not found in the letter of the Constitution, but is a deduction from its general spirit, purpose, and scope. It is purely judge made, and is therefore both more elastic and more uncertain in its application than the literal restriction as to uniformity.

The instances to which it has been applied include, (1) a tax on the salary of a State officer (Collector *v.* Day, 11 Wall. 113, U. S. 1870), (2) a tax on the dividends or interest paid to a municipal corporation on its investments in railway securities acquired in order to aid in construction of railways serving its people (U. S. *v.* The R. R., 17 Wall. 322, U. S. 1872; Stockdale *v.* The Ins. Co., 20 Wall. 323, 330, U. S. 1873), (3) a tax on the interest or profit received by persons contracting with a State or a municipal corporation by lending it money (Mercantile Bank *v.* N. Y., 121 U. S. 138, 162, 7 Sup. Ct. 826 (1887); Pollock *v.* Farmers' L. & T. Co., 157 U. S. 429, 583–586, 601–604, 652; 15 Sup. Ct. 673 (1895), and (4) a tax on the bond required of a State officer as a condition precedent to qualifying (Bettman *v.* Warwick, 108 Fed. 46, C. C. A. 6th, 1901, composed of Lurton, Day, and Severens, J. J.).

There is no reason to suppose, however, that such instances by any means exhaust the list of taxes prohibited by this principle. As the prohibition is implied from the objects and purposes of the Constitution, and from the dual nature of the sovereignty which it sets up or recognizes, certainly the prohibition must be coextensive with the reason for its existence.

Now, the Federal tax which we are here considering does not burden the operation of the State governments in the same way as a tax on the salaries of State officers or a tax on the income or profits derived from contracts made by the State in its governmental capacity. But, on the other hand, such a tax as the estate tax of 1924, and still more so the tax of 1926, does in fact much more seriously burden and obstruct the operation and independency of the States than an income tax levied at the same rate upon the salaries of State officers or interest on State or municipal bonds, and upon all other income "from whatever source derived." As then the latter is held to violate the general purpose and scope of the Constitution in providing for a Union of States, each independent within its proper sphere, should not the former, a fortiori, be held subject to the same constitutional objection?

The effect of such a Federal statute as the estate tax law of 1924 is to force the hands of the States, and make them in the exercise of their reserved rights mere puppets, not autonomously acting upon their own will and initiative but moving according to the congressional beck and nod. In effect, the tax is levied upon the action of the States in refraining from the passage of inheritance tax laws of sufficiently onerous character to meet the congressional approval. In Veazie Bank *v.* Fenno (8 Wall. 533, 547 (U. S. 1869)) Chief Justice Chase, speaking for the Supreme Court, said:

"It may be admitted that the reserved rights of the States, such as the right to pass laws, to give effect to laws through executive action, to administer justice through the courts, and to employ all necessary agencies for legitimate purposes of State government, are not proper subjects of the taxing power of Congress."

And again on the first hearing of the Income Tax case, the Supreme Court said, the court being unanimous on this point:

"The Constitution contemplates the *independent exercise* by the Nation and the States severally of their constitutional powers." (Pollock *v.* Farmers' L. & T. Co., supra, note 32, at 583–584. Italics the writer's.)

The same principle, if regard be had to actual results rather to names, would invalidate the credit provisions of the estate tax law of 1924 or 1926, even without regard to the lack of uniformity which it produces.

If this objection to the "credit" provision of section 301 of the acts of 1924 and 1926 be sound, it might be thought that the State of Florida should have been allowed to file its bill to enjoin the enforcement of those acts—unless, indeed, the maintenance of the suit was barred by the Revised Statutes, section 3224, prohibiting any suit to enjoin the collection of a Federal tax—and that therefore Florida *v.* Mellon is on this particular point an actual decision and not a mere dictum. But although the State of Florida did undoubtedly assign this invasion of her sovereign—or, according to Mr. Justice Sutherland, quasi-sovereign—prerogative as a ground for invoking the original jurisdiction of the Supreme Court, yet that tribunal did not so understand her contention. As already stated, Mr. Justice Sutherland seems to have grasped as the only two grounds on which jurisdiction was invoked—(1) the fear that wealthy men would be induced by the operation of the Federal tax to remove from Florida and thus reduce the State's revenues, and (2) the status of the State as parens patriae toward her citizens. The far more arguable position that the State had a right to complain of the Federal tax because it amounts in effect to an ill-disguised effort to coerce the State into legislating in a particular way on matters expressly reserved to her uncontrolled discretion by the tenth amendment, was overlooked or purposely ignored by the court. It is very provoking to counsel to have his position misrepresented by a court; but at least such misrepresentation has the advantage that the decision is a precedent, even by way of dictum, only upon the case as stated by the court and not upon the case as made by the record or as the court ought to have stated it.

Moreover, strange as it may seem, it is very doubtful whether the fact that the act in question thus operates in terrorem upon the States in the exercise of their reserved rights is sufficient to give the States as such any locus standi to challenge its validity. Before Florida *v.* Mellon, the case of Massachusetts *v.* Mellon (supra, note 9) was an authority against the right of the State to interfere on such a ground; and if the State of Florida had had the right to question the constitutionality of the credit provision on this ground, the proper course would have been to allow the bill to be filed and then decide against her on the merits. The question, therefore, would be still open, notwithstanding Florida *v.* Mellon at the suit of an individual interested.

III

A third restriction upon the Federal power of levying excise taxes is that the so-called tax must be levied, at least in part, for the purpose of raising revenues for the Federal Government, and must not appear on its face to be a mere attempt under the guise of taxation to legislate upon matters reserved exclusively to the States.

Upon this ground the act of Congress levying a tax of 10 per cent on the earnings of persons employing child labor was held unconstitutional (Child Labor Tax case, 259 U. S. 20, 42 Sup. Ct. 449 (1922), and on the same principle the act imposing a tax of 20 cents a bushel on contracts for the sale of grain for future delivery except sales on boards of trade complying with certain conditions and regulations, was held invalid. (Hill *v.* Wallace, 259 U. S. 44, 42 Sup. Ct. 453 (1922). See also Trusler *v.* Crooks, 269 U. S. 475, 46 Sup. Ct. 175 (1926).)

No critic can justly charge the Supreme Court with excess of zeal for State rights in the application of this principle, as witness the decision upholding the clearly prohibitive tax on oleomargarine artificially colored so as to resemble butter (McCray *v.* United States, 195 U. S. 27, 24 Sup. Ct. 769 (1904)), and the decision sustaining, with a blindness worthy of Justitia herself, the obvious constitutional fraud of the Harrison Drug Act. (United States *v.* Doremus, 249 U. S. 86, 39 Sup. Ct. 214 (1919).

That the estate tax laws of 1924 and 1926 are intended to effect some other purpose as well as the raising of revenue is not, under these decisions, sufficient to bring them as a whole within the ban. As said by the Supreme Court in sustaining the Harrison Drug Act:

"The act may not be declared unconstitutional because its effect may be to accomplish another purpose as well as the raising of revenue." (Ibid., 94.)

And, again, in the same case:

"* * * From an early day the court has held that the fact that other motives may impel the exercise of Federal taxing power does not authorize the courts to inquire into that subject. If the legislation has some reasonable relation to the exercise of the taxing authority conferred by the Constitution, it can not be invalidated because of the supposed motives which induced it." (Ibid., 93.)

So long as the "credit" for State taxes is limited to 25 per cent or even 80 per cent of the Federal levy, it may be difficult to maintain that the sole motive or purpose of the estate tax law as a whole appears on its face to be something other than the raising of revenue. If, indeed, the credit should be raised to 100 per cent, as some enthusiasts have proposed, then the law would seem to pass beyond the pale of the constitutionally permissible. But so long as the "credit" is appreciably less than 100 per cent, so that the act will produce some revenue, even after accomplishing its purpose of compelling the States to impose inheritance or estate taxes with rates at least as high as the Federal rates, the constitutional objection to the act as a whole must be, not the fact that it is intended to produce some other result as well as the raising of revenue, but the fact that the other purpose is to influence the legislative action of the States in the exercise of their reserved powers.

In a word, the objection to the Federal estate tax of 1924 or 1926, as a whole, is not that its purpose is something other than the raising of revenue for the United States, but that this something is the influencing of State legislation. Decisions of the Supreme Court establish that a Federal excise may be laid in part, though not exclusively, with a view to influencing the action of individuals—for example, to discourage them from selling oleomargarine colored so as to imitate butter; but no case has yet held—if Florida *v.* Mellon be excepted—that a Federal excise tax is valid which shows on its face that even one of its purposes is to influence the action of the States in the exercise of powers reserved to them as independent sovereignties by the Constitution.

Unquestionably, the estate tax law of 1924, and still more clearly the act of 1926, shows on its face that one of its purposes, in addition to the raising of revenue, is to induce the States to levy higher inheritance or estate taxes; and unless the Supreme Court is willing to hold, not merely that a Federal tax law may have as one of its professed objects something other than the raising of Federal revenue, but that this nonfiscal object may be to induce, and virtually to compel, the State legislatures to exercise one of their reserved powers according to the wishes of Congress rather than according to the wishes of their own people, then it must hold the credit provision of the estate tax law of 1924, and a fortiori the credit provision of the act of 1926, to be unconstitutional, even apart from the lack of uniformity.

This argument, however, is merely a reinforcing of the contention set forth in the former part of this article.

But while the estate tax as a whole can not be said to be invalid because its object is in part something other than the raising of revenue, yet it is certainly true that the estate tax consists of two clearly separable parts, one of which is intended to raise revenue and the other of which is intended for the sole purpose of coercing the States into levying progressive inheritance taxes. One-fourth of the estate tax of 1924 and four-fifths of the estate tax of 1926 have no revenue object whatsoever. Their sole object—and that, too, an object apparent on the face of the act—is to force, or, if you choose, to tempt, the States, to levy at least equivalent inheritance or estate taxes in every case.

This object is apparent enough on the face of the acts. It becomes if possible clearer on inspecting the committee reports on the bill which finally became the revenue act of 1926. The chairman of the Ways and Means Committee of the House reporting the revenue bill of 1926 naively admitted that the object of 80 per cent of the Federal estate tax was not to produce revenue but to induce the States to pass inheritance or estate tax laws in accordance with the congressional will:

"The loss during the calendar year 1927 will probably be from ten to twenty million dollars. Thereafter the annual loss will continue to increase, as advantage is taken of the 80 per cent credit, and in a few more years it is probable that the annual return to the Government under the estate tax will not exceed $50,000,000. The returns may even be less than this amount."

The hearings before the Ways and Means Committee which preceded the introduction of the bill of 1926 set forth its purpose with equal or greater clearness. Even if such evidence is not directly material upon the question of constitutionality, at least it is useful in illustrating the danger of abuse of any such power in Congress. Take, for example, the following colloquy between members of the committee and Governor McLeod, of South Carolina, appearing as spokesman for the State on whose behalf Calhoun once thundered and Wade Hampton fought:

"Mr. RAINEY. If something can be done which would compel the States to occupy this field and occupy it by imposing taxes, would you not favor some arrangement of that kind, if it can be done?

"Governor MCLEOD. I think I would, if it was fair in its distribution of this inheritance tax.

"Mr. RAINEY. If we compelled every State to levy the same minimum?

"Governor MCLEOD. If it was fair and equitable in its distribution to the States.

"Mr. RAINEY. And let the States occupy the field entirely and apply the revenue entirely to the liquidation of their own expenses, provided we devised some means of compelling the States to do it; would you not favor it?

"Governor MCLEOD. I think so.

"Mr. GARNER. If there was an arrangement by the Federal Government under which, when a citizen of the United States died, there could be deducted the amount due the State of South Carolina of taxes he had to pay in the State, sending the balance to the Federal Government, it would not injure your exchequer?

"Governor MCLEOD. No, sir; except that I would——

"Mr. GARNER (interposing). He would have no occasion to flee from your State to Florida, or even to a warmer climate to avoid the inheritance tax due your State?

"Governor MCLEOD. That is true, but speaking——

"Mr. GARNER (interposing). You will agree that the plan suggested that the Federal Government devise some scheme whereby we could have the inheritance taxes uniform as far as possible throughout the Republic is desirable, will you not?

"Governor MCLEOD. In that case the Federal Government would be established as a disbursing agency for the State governments.

"Mr. GARNER. Not at all. Your citizens would have deductions allowed under certain conditions. Now, there are deductions both for the estate and income taxes, and a great many deductions are made. But he would simply deduct from the amount that he would owe the Federal Government whatever he would pay your State.

"Governor MCLEOD. How would you justify the Federal Government levying taxes merely for that purpose unless those taxes are needed for the expenses of the Government?

"Mr. HULL. But there would be uniformity.

"Mr. CAREW. We are going to use this power to effect a great reform." (Hearings on revenue revision before the Committee on Ways and Means, October 19 to November 3, 1925, 370, 371.)

Dr. Thomas S. Adams, of Yale, perhaps the most influential of the expert advisers of the committee, with the assurance of the expert who would regulate the orbits of the planets and the courses of the stars, was not content with compelling the States to impose some sort of taxes, but wished to go further and dictate the particular kind of taxes they should impose:

"I would do this: I would reduce the maximum rate of the Federal tax to 15 or 20 per cent, and I would give an 80 per cent or 100 per cent credit. I would put the credit in that case on the basis of estate taxation rather than inheritance taxation by the States; putting the operation of that limitation into effect two years after, so that the States might take advantage of it.

"I believe that the State tax would be much better if it were in the form of an estate tax rather than an inheritance tax." (Hearings on revenue revision before the Committee on Ways and Means, October 19 to November 3, 1925, 463.)

The tax imposed by the act of 1926 consists of two separable parts, (1) a tax equal to 20 per cent of the rates mentioned in section 301 (a), which is imposed ostensibly for the purpose of raising revenue, and (2) a tax equal to 80 per cent of those rates which is on its face imposed not for any such purpose but solely for the purpose of inducing the States to impose estate or inheritance taxes of at least an equal amount. This portion of the so-called tax will from the outset raise no revenue at all in States whose laws conform to the congressional will, and if it becomes permanently a part of our system of Federal jurisprudence will ultimately raise no revenue anywhere.

May it not, therefore, be contended that the estate tax of 1926 consists of two clearly separable parts—20 per cent for the purpose of raising revenue and 80 per cent for the purpose, not at all of raising revenue but of inducing the States to impose inheritance or estate

taxes at least equivalent in amount, and that this latter portion is not properly a tax at all, any more than the tax on articles produced by child labor, and is therefore null and void?

The wide difference between a tax which is laid in such a way as while producing revenue yet also to accomplish some other purpose—a tax laid "with a political view," to borrow a phrase from our Maryland declaration of rights—and a so-called tax which is not imposed in any degree for the raising of revenue but solely for some other purpose, and is therefore void, may be emphasized by an illustration. The estate tax laws from the beginning, and the income tax laws since 1916, have allowed charitable or religious bequests or gifts, with certain qualifications, to be deducted in determining the taxable estate or income, as the case may be. Now, this practice undoubtedly tends to encourage charitable or religious contributions. The taxpayer knows that every dollar he gives to charity goes net, and that he does not have to pay anything to the Government by way of tax on the money so given. But, on the other hand, he does not save anything in tax on his other estate or other income and therefore is under no pressure or inducement to make a gift unless his inclinations prompt him to do so. But suppose Congress instead of declaring that charitable or religious contributions shall be deducted in ascertaining the taxable estate or the taxable income, should enact that they should be credited on the tax. As a result, everybody would be virtually forced to contribute to charity. He would have the option between giving the money to the Federal Government and giving it to God; and most persons, for the good of their souls, would choose the latter alternative.

Indeed, if this system of "credits" be once firmly established, there is absolutely no limit to the powers of Congress.

For instance, suppose Congress should determine that fathers should be prevented from disinheriting their children. The purpose could be accomplished by the simple expedient of providing that a certain proportion of every estate bequeathed or descending to a child shall be credited on the estate tax.

Or, again, suppose Congress decides that wages paid day laborers should be increased. All it need do is to provide that the income tax of every corporation or other employer of labor shall be credited with amounts paid laborers up to, say, $10 per day apiece.

Is it not clear that the only alternative to allowing virtually unlimited powers to be concentrated in Congress is to hold that wherever Congress attempts to allow as a credit against a Federal tax any payment that depends upon the volition of the taxpayer or of the State, the statute, at least to the extent that the credit is allowed, ceases to be a revenue measure and becomes an unconstitutional attempt on the part of Congress to legislate on matters which are beyond its powers?

IV

After Florida *v.* Mellon it would, perhaps, require some legal boldness to ask a reexamination—or more properly, in view of the casual nature of the opinion of Mr. Justice Sutherland—an examination of the constitutionality of the credit provision of the estate tax laws of 1924 and 1926. Nevertheless, to acquiesce in the validity of those provisions is fraught with such momentous consequences, and would be a precedent of so pernicious a character, that this paper can not be concluded without briefly considering what would be the effect of holding the provisions unconstitutional, and what methods may be available for contesting their constitutionality.

If the credit provisions of the acts of 1924 and 1926 are invalid, one of three consequences must follow. Either—

(1) Section 301(b), which contains the provision for a credit should be eliminated from the act, leaving the rates based by section 301(a) in force without any provision for credit, or—

(2) The tax must be severed and held valid to the extent of 75 per cent in the case of the act of 1924 and 20 per cent in the case of the act of 1926 and invalid only as to so much thereof as the credit can apply to.

(3) The whole of the estate-tax provisions of the acts of 1924 and 1926 must fall.

The first of these three possible views is absolutely untenable. The legislative history of the enactments, the reports of congressional committees, and the like, as well as the text of the acts themselves, show beyond peradventure that Congress never intended to impose the high rates of section 301(a) unless the credit provided for by subsection (b) should be allowed. It is superfluous further to elaborate this point. Any competent lawyer can readily convince himself, if the text of the acts leaves him in any doubt, by examining the CONGRESSIONAL RECORD and the committee reports.

The second of the three possible views—namely, that 75 per cent of the tax imposed by the act of 1924 and 20 per cent of that imposed by the act of 1926 should be held valid, and only the portion against which the credit is provided stricken down—has more to be said in its favor.

If it be tenable, the constitutionality of the credit provisions can be raised easily and in a very satisfactory way. All that is necessary is in any case where there is no State inheritance tax—for example, in any case in Maryland where the entire estate passes to lineal descendants—to pay the Federal tax and, after filing a claim for refund, sue the collector to recover back 80 per cent of the amount paid.

Thus to split up what was intended as one entire tax would certainly seem a novel exercise of judicial power. Yet the result would be equitable and probably in accord with what Congress would have wished. It is certainly possible to segregate in this way the clearly constitutional portion of the tax from the portion which, if the views above expressed be sound, is unconstitutional. It would carry out, too, the spirit of the following section of each act:

"If any provision of this act or the application thereof to any person or *circumstance*, is held invalid, the remainder of the act and the application of such provision to other persons *or circumstances* shall not be affected thereby." (Act of 1924, 43 Stat. 231, sec. 1103 (1924); act of 1926, 44 Stat. 130, sec. 1213 (1926). Italics the writer's.)

The remaining view—namely, that if the credit provisions of section 301 (b) are invalid, the whole of the estate tax must fall with it—may seem to many lawyers easiest of the three to sustain. On this hypothesis, either (a) there has been no constitutional Federal estate tax in force since 1924, and all such taxes collected on estates of decedents dying since that time should be refunded, or else (b) the estate tax of 1921 continues in effect.

Section 1200 of the act of 1924 (a) repeals the estate-tax provisions of the act of 1921; but subsection (b) provides that those provisions shall nevertheless continue in force "until the corresponding tax takes effect under the provisions of this act." If this means the date which under the terms of the act of 1924 its estate-tax provisions were to take effect—i. e. [under section 1100(a)] "upon the enactment of this act," or in other words, on June 2, 1924—then the act of 1921, in so far as it levied an estate tax, expired on that date, whether or not it was replaced by another valid tax.

If, on the other hand, section 1200(b) means that the act of 1921 shall continue in force until its place is taken by another valid estate tax, then the estate-tax provisions of the act of 1921 have never been repealed.

The act of 1924, as originally passed, in section 300(a) levied rates which were approximately 25 per cent higher than those imposed by the act of 1921, and while the law was in this state it would have been a simple matter, on the hypothesis we are now considering, to raise the question of the constitutionality of the act of 1924. Where the tax under the act of 1924 would be higher than the tax under the act of 1921—and in Maryland whenever the whole estate passed to a widow or children, this was bound to be the case—the excess could be paid under protest; and a suit brought to recover it back would raise the question of the constitutionality of the act of 1924.

But the act of 1926 retroactively reduced the tax imposed by section 301(a) of the act of 1924 to the level of the rates imposed by the act of 1921. After this was done, few cases could arise in which it would be more beneficial to an estate to be taxed under the act of 1921 than under the act of 1924 as retroactively amended. The ordinary taxpayer, therefore, had no longer any interest in contending that he should be taxed under the act of 1921 instead of under the act of 1924.

The act of 1926 for the future increases the exemption and, in some cases, still further reduces the rates, while increasing the credit from 25 per cent to 80 per cent. If the whole of the estate-tax sections of the act of 1924 are invalid, a fortiori the same thing is true of the corresponding provisions of the act of 1926; but the taxpayer would, in most cases, be out of the frying pan into the fire. There may indeed be some exceptional case in which it would be less burdensome to an estate to be subject to the act of 1921 than to that of 1926. For instance, the prima facie presumption raised by the act of 1921 that any transfer of a material part of a decedent's estate, without fair consideration, within two years prior to his death, shall be taken to have been made in contemplation of death, is made conclusive by the act of 1926. Now, if we suppose a case in which a gratuitous transfer of a large part of the estate was made within two years before the decedent's death, but in which the motive of the transfer can be proved to have been something other than contemplation of death, then (if it be constitutional to create in such a case a conclusive presumption—which, after Schlesinger *v.* Wisconsin (270 U. S. 230, 46 Sup. Ct. 260 (1926)) and Nichols *v.* Coolidge (supra note 10), must be regarded as very doubtful) it might be better to be subject to the act of 1921 than to that of 1926. But, save in some such very exceptional circumstance, any estate would be better off under the act of 1926 than under the act of 1921, and nobody would have any standing to contend that the act of 1921 continues in force.

Even upon this hypothesis there is one way in which the constitutionality of the credit provision can be raised. As already mentioned, a number of States—such as New York—have passed laws levying estates taxes equal to 80 per cent of the Federal levy to continue in force only so long as the Federal law allows a credit of at least 80 per cent for State taxes. Now, if this provision in the Federal statute purporting to allow the credit is unconstitutional, null and void, there is no Federal law in force allowing the credit, and the State tax is un-

collectible. In any such case, any estate can by contesting the imposition of the State tax, raise the question of the constitutionality of the credit provisions of the Federal act. From a decision of the highest court in the State, the question could be carried to the Supreme Court of the United States. But it would take a very patriotic taxpayer to raise the question in this way; for even if successful, any money he might save in State taxes would, if the act of 1921 is still in force, have to be paid to the Federal Government in increased Federal tax; and he might even be worse off than if he had accepted the Federal statute as valid to its full extent.

Therefore unless the estate tax provisions of the acts of 1924 and 1926 are wholly void, and unless the act of 1921 is not thereby continued in force, it would seem that the most practicable way of attacking the validity of the credit provision of the Federal law is to contend that the effect is to invalidate the Federal tax of 1924 to the extent of 25 per cent, and that of 1926 to the extent of 80 per cent, confining the Federal tax legally collectible to 75 per cent and 20 per cent, respectively, of the nominal rates. Any careful lawyer would hesitate to assert that the chances of success in any such contest would be worth to any estate of ordinary size the expense of the litigation. And yet as a matter of patriotic duty the dictum in Florida *v.* Mellon surely ought not to be accepted as the final word. The power of the purse is throughout Anglo-American history the only means by which liberty and independence have been achieved or preserved. In an attempt to snatch it from the people Charles I lost his head; and, rather than surrender it, the American Colonies reluctantly severed connection with a mother country which they loved. If our States have yielded it up, in respect to their internal affairs—if Congress can by a cunning device dictate to them what taxes they shall levy for local purposes—then they are no longer States but satrapies. The Supreme Court has not hesitated more than once to overrule prior decisions if convinced of their error. Is it too much to expect of the patriotism and fair-mindedness of a great court to disregard the hasty dictum of Florida *v.* mellon?

Mr. SIMMONS. Mr. President, I will say to the Senator from Utah that there are two additional amendments which I have not yet had prepared which I will have prepared to-day. I will state to the Senator from Massachusetts that these additional amendments relate to transfers of stock on exchanges.

Mr. SMOOT. Produce and stock?

Mr. SIMMONS. Yes.

Mr. SMOOT. I ask unanimous consent now that when the Senator introduces his amendments, even though the Senate shall have adjourned, they may be printed and lie on the table.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. SIMMONS. The amendments were not prepared, because it may be that upon further reflection it will be decided that it is not necessary to offer them, but merely to oppose the committee amendments.

Mr. SMOOT. There is no need of offering them, but I was not going to say that to the Senator.

Mr. SIMMONS. I would rather have my statement in the RECORD, because there has been some misconception in the country as to the attitude of the minority with reference to the tax upon transfers of stock, and I would like to have it known that my attitude is the same with reference to that as it is with reference to original issues of stock; that is, that it should be, for business reasons, reduced one-half.

Mr. SMOOT. In other words, the minority agree with the House provisions in both cases?

Mr. SIMMONS. Yes.

Mr. SMOOT. The next amendment is on page 31, line 1.

The next amendment passed over was, at the top of page 31, to insert:

(r) Expenses of tax adjustment: All expenses paid or incurred in contesting any liability for any tax, including fees and compensation for personal services, but exclusive of expenses allowable under subsection (a).

Mr. KING. Mr. President, when this amendment was up for consideration, I asked that it go over, and noted at that time my objection to the amendment. I want very briefly to state now that I am opposed to this proposed amendment. The object of it is to allow a deduction to taxpayers of all the expenses incurred by them in contesting any tax, whether it be a Federal, State, or municipal tax. I understand that the contention has been made that the object of it is merely to allow a deduction for expenses incurred in contesting the validity of a Federal tax, but the report of the committee goes further than that declaration.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. WALSH of Massachusetts. Do I understand that these large fees that are paid to corporations which have disputes with the Treasury Department about adjusting their taxes would be allowed and deducted under the provisions of this amendment?

Mr. KING. Not only large fees paid by corporations but by individuals, and also all expenses incident to litigation. For instance, if the Senator had an assessment levied against him by the State of Massachusetts, or the city of Boston, or by the Federal Government, and he employed lawyers, paying them a contingent fee or a direct fee, he would be permitted to deduct that fee as an item in determining the amount of the tax, and also all expenses incurred in connection with the litigation.

Mr. WALSH of Massachusetts. Would it not invite collusion in the matter of fees and expenses?

Mr. KING. I think so.

Mr. HARRISON. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Mississippi?

Mr. KING. I yield.

Mr. HARRISON. As I understand it—and I want to ask the Senator if this is his understanding—under the law a corporation which is forced to employ an attorney and go to expense with the Government in a case is allowed to deduct those expenses; but an individual who might be put upon the same footing with that corporation and have the same kind of a case would not be permitted to deduct his attorney's fees and expenses. Is not that the Senator's understanding?

Mr. KING. I am inclined to think that under existing law if an attorney were regularly employed by a corporation the fees which he received for his employment would be included in the corporate expenses for which deductions would be allowed. I am not sure that if the corporation employs an attorney outside of its regular legal staff to contest the validity of a tax levied by the Federal Government or a State or municipal government that that would be allowed as a deduction and a credit; but——

Mr. HARRISON. My impression is that in the hearings before the Finance Committee it was stated that the fees and expenses would be deductible if it were a corporation, even though they had gone outside of their regular retinue of attorneys and had employed accountants, and so forth. It seems to me, if that is true with reference to a corporation, and it ought to be true—they ought to be permitted to get an attorney to defend their cause if the Government files suit against them—it certainly ought to apply also to the individual.

Mr. SMOOT. That is exactly what the provision does.

Mr. HARRISON. That is the way I understood it.

Mr. SMOOT. As my colleague has said, it not only applies to Federal cases in which there is a dispute but to State cases and municipal cases or any division of Government. The amendment is as broad as that.

Mr. KING. The report of the chairman of the committee reads as follows, relating to this amendment:

This is an entirely new deduction. It embraces all expenses paid or incurred in contesting liability for any tax, whether Federal, State, municipal, or otherwise, which are not deductible under section 23 (a) as a business expense. The purpose of the new deduction is to place individuals on a parity with corporations so far as this item of expense is concerned. Though payment of taxes is not, strictly speaking, a business expense to individuals in all cases, the committee believes it is more like a business expense than a living or personal expense and that it should be so treated.

Mr. President, it does seem to me, as suggested by the Senator from Massachusetts [Mr. WALSH] that this invites collusion. I do not see why the expenses incurred by an individual in the State of Massachusetts or in the State of Texas, in contesting the validity of some local assessment, irrigation assessment, or municipal assessment of some State or city tax, should be allowed as a deduction in determining the amount due as a Federal tax.

We know with respect to Federal taxes that there are hundreds of lawyers and experts and accountants, and many who are neither, who are profiting to the extent of enormous amounts each year—and I am not criticizing—in contesting the validity of tax levies by the Federal Government. I am told that in most of the tax cases the attorneys or agents representing the taxpayers have contingent-fee contracts. The contingent fee in some instances is 50 per cent. Under this provision of the bill that amount, plus all expenses incurred, including expenses of the individual himself, expenses incurred in hiring accountants and what not, would be allowable as a deduction.

It seems to me that is going entirely too far. Certainly if we are to allow deductions at all they ought to relate only to Federal taxes, and not to contests related to State of munici-

pal taxes. In the committee there was a good deal of dubiety expressed in regard to the wisdom of the amendment. It was there stated that in many of these cases 20 or 30, 40 or 50 per cent was allowed. The first suggestion was made that where it was a contingent fee it should not be allowed as a deduction, but that finally was abandoned because of various objections which were urged.

Mr. WALSH of Massachusetts. And difficulties.

Mr. KING. And difficulties were urged, too. As it was conceded that in most of these cases the legal expenses were contingent—that is to say, attorneys and agents and those who had the cases had them upon a contingent basis of from 10 to 50 per cent. It seems to me it is an improper deduction. If we allow credit for attorneys' fees in contested cases, I do not know where the end might be. Of course, there should be no discrimination and if attorney fees and other expenses connected with the contesting of a tax are to be allowed corporations, they should be allowed to individuals.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Montana?

Mr. KING. I yield.

Mr. WALSH of Montana. In the case of a corporation conducting any ordinary business such as the mercantile business, the expenses of litigation go in as a part of the expenses of the conduct of the business, do they not?

Mr. KING. Yes.

Mr. WALSH of Montana. And the net income becomes a basis for the assessment of the income tax. Does not the ordinary business man now, in figuring the profits of his business as the basis for the assessment of taxes, take credit for attorneys' fees and other expenses?

Mr. KING. I am told that in many cases that has not been done, particularly the large contingent fees.

Mr. WALSH of Montana. Take such a firm as Woodward & Lothrop, who are conducting a large department store here in Washington. Someone sues them for injury, because of being run over by one of their trucks. The cost of that suit goes into the ordinary expenses of the business. Someone sues them for failure to carry out a contract of sale that they made, and secures judgment for damages against them, and, of course, that comes out, as well as the attorneys' fees and other expenses of the litigation.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit me to explain the situation?

Mr. KING. Certainly.

Mr. REED of Pennsylvania. Under the first paragraph of this section the expenses deductible by any taxpayer are those necessarily incurred in any trade or business. Therefore the bureau has held, and I think unfairly, that when a corporation engages counsel to fight a tax case, that expense is necessarily incurred in carrying on its trade or business; but when an individual does the same thing he can not make the same deduction, because it is a tax on his personal income and is not a part of his business of making a livelihood.

Mr. WALSH of Montana. The amendment is intended to correct that?

Mr. REED of Pennsylvania. The amendment is intended to put the individual on the same basis as is the corporation to-day.

Mr. KING. I am in favor of that, but my contention is that neither should be permitted the deduction, or at least that there should be some limitation upon the credit to be given the taxpayer as a deduction.

Mr. WALSH of Montana. How would the Senator differentiate? Here is a corporation doing business and they have absolutely no profit at all by reason of the fact that they have been compelled during the current year to carry on a very expensive litigation possibly involving the title to all their property, and they have paid out that money.

Mr. KING. That would be a permissible deduction because it is in their business.

Mr. WALSH of Montana. Yes; of course. That would include, of course, all expenses they incurred in the conduct of the business in protecting themselves, as they think, against an unlawful tax exaction or some other unlawful exaction, as they claim, and that all comes out of the profits of the business. The balance becomes the basis for the assessment. How could we tax that corporation without taking out expenses of that kind incurred in the conduct of the business?

Mr. KING. Because of the opportunities for abuse I felt that to allow either to a corporation or an individual the expenses incurred in contesting the validity of a tax would be improper, or at least that there should be some reasonable restrictions imposed upon the credits allowed. If the amendment is rejected, then at the appropriate place in the bill I intend to offer an amendment denying to the corporation a deduction for the expenses incurred by it in contesting the validity of a tax.

Mr. HARRISON. I agree with the Senator that if the individual is deprived of that right, certainly the corporation ought to be deprived of the right, but I think both the corporation and the individual should have the right. For instance, may I call the Senator's attention to the fact with which we are familiar that the other day the Board of Tax Appeals rendered a very important decision, a decision in which the Ford Motor Co. or one of its corporations could put in as a deduction the attorneys' fees and expenses incurred in contesting with the Government that particular piece of litigation, while one of the individuals, one of our colleagues, not being a corporation but having gone to enormous expense of the same nature, would not be permitted to deduct it in his income-tax return. It seems to me that shows the fallacy of the proposition.

Mr. SMOOT. I could call attention to a number of cases of which my colleague is well aware. The Grand Central Mining Co., for instance, was engaged in a law suit which covered about five years. I think about four years out of the five the attorney's fees alone were more than was actually made. Without the provision here proposed the company would have to pay taxes upon money that was earned and paid out immediately, and so far as the company is concerned it never made anything at all. There was no profit, but really a loss.

Mr. KING. I was not referring to the fees which are paid in the ordinary business of the individual or corporation. I was only referring to fees which are paid in contesting the validity of a tax. I am sure Senators will take cognizance of the fact, because it is a matter of common knowledge that there are tens of thousands of dollars paid out annually to attorneys in contingent fees which they are receiving and for which, under the proposed amendment, the taxpayers will be allowed deductions.

Mr. WALSH of Montana. Let me inquire of the Senator whether the attorney is not compelled to pay a tax upon his fees?

Mr. KING. He does in his income tax if he is within the taxable brackets.

Mr. WALSH of Montana. Then we get it just the same. We are simply transferring the tax from the client to the attorney.

Mr. KING. Of course, it would be in a different bracket, probably.

Mr. HARRISON. Of course a gentleman in a contest with the Government would not pay 25 per cent to an attorney in order to pay the other 75 per cent to the Government.

Mr. KING. The Senator knows that many of the fees are paid on a contingent basis and amount to as much as I have indicated.

Mr. WALSH of Montana. I dislike to place any obstacle in the transfer to the law practice of a small amount of profits made from industrial operations.

Mr. KING. I presume the Senator and I, of course, being lawyers, are rather interested in attorneys, and yet in this matter I have a greater interest in the Government and in having it protected.

Mr. SIMMONS. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. SIMMONS. I think, probably, the majority and the minority members of the Finance Committee agreed to this provision; but I am interested in the discussion by the Senator from Utah. There is only one phase of the question that gives me any trouble at all. It has occurred to me since our action. There was not much discussion about it in the committee. I think it was rather hurriedly agreed to, but I am not recanting at all. But I should like to have the views of both Senators from Utah upon the question of whether it is wise public policy to allow deductions for the entire expense when the contesting taxpayer loses, when he fails to make good his contention in any respect whatever.

Mr. SMOOT. Such a taxpayer is more unfortunate than the one who wins his case.

Mr. SIMMONS. I understand; but is that a misfortune which should cause the United States Government to lose a part of its income tax?

Mr. SMOOT. The taxpayer is allowed to deduct whatever expense there may be, no matter whether he loses or wins his case.

Mr. SIMMONS. I am afraid that will encourage persons who have very slim and feeble cases to contest the payment of their taxes.

Mr. SMOOT. The Government gets the tax anyway. If it does not get it from the corporation it will get it from the

individual. The individual may not fall in a bracket that would bring 12½ per cent under the surtax, but he would fall under whatever bracket his income would reach. The Government may lose a little if he falls under a bracket lower than the 12½ per cent bracket.

Mr. SIMMONS. Whatever bracket the income falls under, the Government does lose the entire expense of the litigation instituted by the particular taxpayer which the court may say was without justification.

Mr. SMOOT. I think if the Government starts suit against a taxpayer and there is no basis for the suit, the Government ought to lose it.

Mr. SIMMONS. Take the ordinary case in court. If the plaintiff prevails in some jurisdictions he is entitled to have his expenses reimbursed by the defendant; but if the defendant succeeds then a different rule might obtain. I do not know of any municipal jurisdiction where a litigant who fails has the tax levied against the defendant who wins; but in this particular case, where the Government is the complainant and the taxpayer is the contestant or defendant, if the taxpayer loses the Government has to pay the expenses of the suit.

Mr. SMOOT. That is, it loses the tax on the expenses.

Mr. SIMMONS. It loses that much of the tax, which is just the same thing.

Mr. SIMMONS. Mr. President, I desire to say that I am not doing more than calling the attention of the junior Senator from Utah [Mr. KING] to this point as the one thing about which I have a question. If the junior Senator from Utah wishes to offer an amendment to the provision, he may do so; otherwise I shall support the action of the committee, because I feel bound to pursue that course.

Mr. KING. Mr. President, I do not know that I care to offer an amendment in respect to this matter, but I did intend to offer an amendment, as I indicated a moment ago, so as to make the rule uniform as between corporations and individuals. I certainly feel that such expenses ought not to be allowed as a deduction for litigating controversies between individuals and the States or between individuals and municipalities, whether cities or school districts or other political subdivisions within a State.

I believe, Mr. President, that if this amendment shall be adopted it will mean a considerable loss of revenue; that it will lead to an increase in the number of contingent agreements which will be entered into by taxpayers who are contesting the validity of taxes. I am told that in many cases where corporations are involved and have their own attorneys the attorneys do not get a contingent fee; that they are paid under their usual retainers and the fees which are paid them annually; but there are many cases where the fees of the attorneys are provided for upon a contingent basis. This will induce contingent agreements and, of course, will multiply the amounts which will be paid to the attorneys and increase the aggregate amount to be allowed as deductions. I feel sure that it will considerably reduce the amount of taxes which are paid. Whether or not the Government will recoup in part from the income tax of the attorneys, is a question to be determined. I feel quite sure that the recoupment will not be equal to the amount which the Government will lose by reason of permitting deductions of this kind.

Mr. SIMMONS. The Senator will realize that in such a case I put a little while ago there would be no such thing as recoupment.

Mr. KING. I think the Senator is right.

Mr. SIMMONS. The Government would simply lose the tax upon the entire expense of an unsuccessful litigation.

Mr. KING. Yes; there is no doubt about that.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. SMOOT. Mr. President, the next committee amendment passed over is on page 63, sections 104 and 105. I perhaps should briefly state what those two amendments propose. Section 104 has relation to the accumulation of surpluses to evade taxes for 1928 or subsequent taxable years.

Mr. GERRY. Mr. President, may I interrupt the Senator from Utah to inquire to what amendment he is referring?

Mr. SMOOT. I am referring to the amendment striking out section 104, on page 63, and to section 105, on page 68. Section 104 was adopted by the House for the purpose of providing against accumulation of surpluses in order to evade taxes for 1928 or subsequent taxable years. Section 105 is the old section 220 of the present law, with some modifications, which had in view the same purpose. I have had a number of House Members tell me that section 104 was put in there without very serious consideration. The Finance Committee decided to strike out section 104, and then make section 105 correspond to section 220 as it is in the law to-day. That is all there is to the amendment on striking out section 104, on page 63, and the amendment to section 105, on page 68.

Mr. SIMMONS. That means, as I understand the Senator, that we revert to the present law?

Mr. SMOOT. Word for word we incorporate section 220 of the present law.

Mr. SIMMONS. Very well.

The PRESIDING OFFICER. The question is on agreeing to the amendment striking out section 104.

The amendment was agreed to.

Mr. SMOOT. Mr. President, I think there is an amendment on page 68 which was passed over.

Mr. SIMMONS. Before we leave the amendment just agreed to, let me say that I think the feeling of the committee was that that particular section had never been very vigorously enforced, if enforced at all.

Mr. SMOOT. That was true up until about two years ago.

Mr. SIMMONS. I was going to say that it had never been enforced until very recently, when probably there have been 1 or 2 or 3 cases brought under it; at any rate, but a very few cases.

Mr. SMOOT. There are 252 cases under it now pending.

Mr. SIMMONS. Under the old law?

Mr. SMOOT. Yes; under the old law; but they have been brought forward and begun perhaps within the last two years.

Mr. SIMMONS. Only recently the department has begun to give any consideration to that section. I think the committee was persuaded to adhere to the present law very largely from consideration of the fact that taxes have been very much reduced and the incentive to accumulate surpluses for the purpose of evading taxation has grown very materially less.

Mr. SMOOT. That is correct.

Mr. SIMMONS. As they have grown less, the department seems to have become more active, and as they grow still less the department probably will become more active. However, while the temptation was very great, and while the practice was very general, I think it may be said without contradiction that the administration did not make much of an effort, if any, to enforce this section of the law.

Mr. SMOOT. I wish to say to the Senator, however, that the section has been enforced, so that there are now 252 cases pending applying to back years. The Senator I presume is about correct, however, in what he says.

Mr. KING. Mr. President, I think the provision adopted by the House had a meritorious object. Senators will recall that the late Senator from New Mexico, Mr. Jones, contended that many corporations were accumulating inordinately large reserves and surpluses, and, for the purpose of evading taxation, were not distributing them as dividends. It is true that as taxes have been reduced, excess profits tax abolished, and surtaxes materially diminished, the reasons for their existence are not so powerful. Nevertheless, some corporations still persist in the policy of accumulating very large reserves—larger than are warranted by sound business procedure. Stock dividends are not infrequently declared—based upon their unnecessarily large reserves.

I am not certain that the limitations found in section 105, pages 68 and 69, of the pending bill are a sufficient curb or guide to the Secretary of the Treasury in exercising the great discretion allowed him in dealing with this question of reserves. The Secretary alone is to determine, if I interrupt the section correctly, what would be a proper reserve or accumulation, before the penalty of 50 per cent is applied. One Secretary of the Treasury or one Federal official connected with the revenue branch of the Government might regard a certain amount of reserve or surplus as proper. A different rule might be prescribed by his successor. In dealing with questions of this character, as well as many others in revenue measures, the legislative branch of the Government has difficulty in steering between Charybdis and Scylla. If there are too many limitations in statutes, difficulties arise. It is impossible to foresee all the complications and conditions that will arise. I have sometimes thought we have too many revenue laws, too many provisions attempting to deal with every conceivable situation that may arise, and a burdensome lot of Treasury regulations which bewilder and mystify officials, courts, and taxpayers. It may be that we shall be driven to enact a new revenue law which will be simple and short, and which will confer greater authority upon the administrative branch. Great Britain has certainly achieved results which we might profitably strive to attain. Great Britain writes her revenue law in a few pages, and allows a wide discretion to be exercised by those who administer the law. We take scores of pages to write our law. Great Britain

collects substantially $4,000,000,000 of revenue, largely death dues, corporation taxes, and income taxes, with but a limited number of employees.

We have more than 10,000 employees engaged in collecting approximately $2,000,000,000 of revenue. In this amount I do not include customs collections. In that division of the Treasury Department there is an army of Federal employees.

Great Britain's revenue laws are less complicated than those enacted by Congress. They announce, so to speak, fundamental principles. The administrative features are simple and, as I have indicated, confer more latitude and authority upon those who execute the law. The discretion granted the officials is wisely exercised. The personnel, generally speaking, are men of ability and character familiar with the law and with procedural matters. It is said that the British taxpayer does not seek to evade the payment of taxes, though they are onerous and oppressive. An examination of the revenue laws enacted by Congress during and since the war will reveal how far short of clarity and certainty we have fallen in our revenue legislation. Our revenue laws have been complicated, oftentimes filled with contradictions and uncertainties. Those charged with their enforcement differ in their interpretations of statutory provisions. Decisions rendered by officials in the department to-day are changed upon the morrow. Not infrequently taxpayers have followed certain interpreted regulations of the revenue laws, only to find several years later contrary rulings to their disadvantage. Not only the officials of the Treasury Department fail to agree upon the meaning of various provisions of the statutes but eminent lawyers differ, as well as the Board of Tax Appeals and the courts.

I am told that a volume has recently been published by the Treasury Department containing 10,000 pages of recent rulings and regulations. The charge has often been made that our revenue laws and the regulations of the Treasury Department, based upon the same, can not be understood and seem to be designed to encourage litigation. Certain it is that controversies in regard to taxes are not diminishing. Cases are being daily brought to the Board of Tax Appeals for adjudication and its decisions are insufficient to keep pace with the multiplied appeals. Tens of thousands of cases are now pending for settlement, and there seems to be nothing in sight indicating that the mountain of tax controversies and lawsuits will be removed. I sometimes wish that we could burn our tax laws and all our regulations and start afresh. We might be able to write a simplified bill, one that could be understood by those who enacted it and those who administer it, and by the taxpayers who are more interested in simple, just, and equitable revenue laws than are Congress and the officials of the Treasury Department. Recurring to the provision now before us: How much shall be allowed as a surplus before the penalty shall be applied? I do not know. Should we attempt to circumscribe those engaged in business and limit the amount of reserves and accumulations before the penalty of 50 per cent is applied, or should the entire matter be committed to the discretion of those administering the law?

I am not satisfied with this section, and yet I am not in position to offer an amendment to supersede it. The Finance Committee considered the House amendment, which was intended to clarify the situation; and I think that after due consideration the committee reached the conclusion that instead of clarification it would add to the uncertainty and dubiety if attempts were made to prescribe the limitation upon the amount allowed as reserves and the circumstances under which such reserves should be set up.

Mr. SIMMONS. Mr. President, I think Senators on this side agree with the general propositions laid down by the Senator from Utah. We have criticised this provision in the present law ever since it was enacted. We have recognized the fact that it lodged almost unlimited discretion in the Secretary of the Treasury; and we have complained bitterly that for many years after its original enactment the Secretary of the Treasury did not exercise that discretion at all, but permitted these surpluses to be accumulated in gigantic sums, without taking any action to force their distribution.

In all of our discussions about this question, however, we have all realized the fact that sound economy in the conduct of a business by a corporation made it necessary that they should set aside a certain part of their annual earnings for purposes of enlargement, for purposes of improvement of their methods and their equipment, and that the requirements of one class of corporations in this respect were different from those of another class of corporations; that it was almost impossible to lay down any fixed rule to regulate the distribution of these accumulated surpluses which would not be to the disadvantage of some and to the advantage of other corporations. In that state of inability to adjust what the several corporations of the country might legitimately and reasonably require in order to be upon a safe footing in the conduct of their business, and to enlarge and develop their business and improve their methods, we felt that we were hopeless unless the Secretary of the Treasury would enforce this provision of the law.

I know that both sides of the Finance Committee have sought to devise some method that might place safeguards around an unwise exercise of discretion on the part of the Secretary of the Treasury, or might coerce him to enforce the law; but I confess that neither side of the committee up to this time has been able to suggest any satisfactory solution of that problem. To my mind, the House provision is not a satisfactory solution of it; and the exigencies created in the present condition of things with respect to this matter are nothing like so urgent, nothing like so great and important, as they were when taxes were higher than they are now.

The PRESIDING OFFICER. The Secretary will state the next amendment passed over.

The next amendment passed over was, on page 68, line 13, after the word "for," to strike out "the taxable year 1927" and insert "each taxable year," so as to read:

(a) If any corporation, however created or organized, is formed or availed of for the purpose of preventing the imposition of the surtax upon its shareholders through the medium of permitting its gains and profits to accumulate instead of being divided or distributed, there shall be levied, collected, and paid for each taxable year upon the net income of such corporation a tax equal to 50 per cent of the amount thereof, which shall be in addition to the tax imposed by section 13, and shall be computed, collected, and paid upon the same basis and in the same manner and subject to the same provisions of law, including penalties, as that tax.

Mr. SIMMONS. What is that amendment?

Mr. SMOOT. That is just a verbal amendment.

The amendment was agreed to.

The next amendment passed over was, on page 79, line 19, after the word "made," to strike out the period and "The provisions of this paragraph and of paragraph (2) shall not apply to the acquisition of such property interests as are specified in section (402) (c) or (e) of the revenue act of 1921, or in section 302 (c) or (f) of the revenue act of 1924 or the revenue act of 1926 (relating to transfers in contemplation of or intended to take effect at or after death, and to property passing under power of appointment)," so as to read:

(3) Transfer in trust after December 31, 1920: If the property was acquired after December 31, 1920, by a transfer in trust (other than by a transfer in trust by a bequest or devise) the basis shall be the same as it would be in the hands of the grantor, increased in the amount of gain or decreased in the amount of loss recognized to the grantor upon such transfer under the law applicable to the year in which the transfer was made.

The amendment was agreed to.

The next amendment passed over was, on page 89, line 7, after the word "such," to strike out "acquisition;" and insert "acquisition. The provisions of this paragraph shall apply to the acquisition of such property interests as are specified in section 402(e) of the revenue act of 1921 or in section 302(f) of the revenue act of 1924 or the revenue act of 1926 (relating to property passing under power of appointment) regardless of the time of acquisition," so as to read:

(4) Gift or transfer in trust before January 1, 1921: If the property was acquired by gift or transfer in trust on or before December 31, 1920, the basis shall be the fair market value of such property at the time of such acquisition. The provisions of this paragraph shall apply to the acquisition of such property interests as are specified in section 402(e) of the revenue act of 1921, or in section 302(f) of the revenue act of 1924 or the revenue act of 1926 (relating to property passing under power of appointment) regardless of the time of acquisition.

The amendment was agreed to.

The next amendment passed over was, on page 80, line 14, after the word "death," to strike out "If the property was acquired by bequest, devise, or inheritance, or by a decedent's estate from the decedent, the basis shall be the fair market value of such property at the time of the death of the decedent. The provisions of this paragraph shall apply to the acquisition of such property interests as are specified in section 402 (c) or (e) of the revenue act of 1921, or in section 302 (c) or (f) of the revenue act of 1924 or the revenue act of 1926 (relating to transfers in contemplation of or intended to take effect at or after death, and to property passing under power of appointment)" and insert "If personal property was acquired by specific bequest, or if real property was acquired by general or specific devise or by intestacy, the basis shall be the fair market value of the property at the time of the death of the decedent.

If the property was acquired by the decedent's estate from the decedent, the basis in the hands of the estate shall be the fair market value of the property at the time of the death of the decedent. In all other cases if the property was acquired either by will or by intestacy, the basis shall be the fair market value of the property at the time of the distribution to the taxpayer," so as to read:

(5) Property transmitted at death: If personal property was acquired by specific bequest, or if real property was acquired by general or specific devise or by intestacy, the basis shall be the fair market value of the property at the time of the death of the decedent. If the property was acquired by the decedent's estate from the decedent, the basis in the hands of the estate shall be the fair market value of the property at the time of the death of the decedent. In all other cases if the property was acquired either by will or intestacy, the basis shall be the fair market value of the property at the time of the distribution to the taxpayer.

Mr. KING. Mr. President, I should like to inquire whether this amendment will apply retroactively to meet some of those decisions of the court, one of which was contrary to the decision of another court?

Mr. SMOOT. This just covers this year; and this is one of three amendments, the Senator will remember, upon this subject. This is the second one. They all fit in as one, and we agreed to the whole amendment as a unit. They are in different places, but this is the second one.

Mr. REED of Pennsylvania. This has nothing to do with the gift tax?

Mr. SMOOT. Not at all.

Mr. REED of Pennsylvania. It merely has to do with capital gains resulting from the sale of property acquired from the estate of a decedent, and will apply to transactions in the current calendar year 1928 and subsequently, but is not retroactive before the first of this year.

Mr. KING. That is what I was inquiring—whether by any construction it could be applied retroactively.

Mr. BINGHAM. Mr. President, I desire to make a parliamentary inquiry. I should like the attention of the Senator from Pennsylvania. Will the adoption of this amendment at this time affect in any way the possibility of voting later on the amendment which the Senator knows I presented for the repeal of the estate tax?

Mr. REED of Pennsylvania. It has nothing to do with the estate tax. This deals only with capital gains of living taxpayers. I might say to the Senator from Utah, further, that later on in the bill there is a retroactive amendment that affects this same question to some extent, but this is not retroactive.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment passed over was, on page 97, line 18, after the word "for," to strike out "1925 or 1926" and insert "1926 or 1927"; and in line 19, after the word "year," to strike out "1925 or 1926" and insert "1926 or 1927," so as to read:

(e) Net loss for 1926 or 1927: If for the taxable year 1926 or 1927 a taxpayer sustained a net loss within the provisions of the revenue act of 1926, the amount of such net loss shall be allowed as a deduction in computing net income for the two succeeding taxable years to the same extent and in the same manner as a net loss sustained for one taxable year is, under this act, allowed as a deduction for the two succeeding taxable years.

Mr. SMOOT. That is just changing the years in accordance with the amendments we have already adopted.

The PRESIDING OFFICER. Is that included in the Senator's unanimous-consent agreement of some time ago?

Mr. SMOOT. It is just to carry out the year that we changed in the first amendment.

The PRESIDING OFFICER. That is included in the previous unanimous-consent agreement, then?

Mr. SMOOT. It is.

The amendment was agreed to.

The next amendment passed over was, on page 111, line 4, after the words "beginning in," to strike out "1926" and insert "1927"; and in the same line, after the words "ending in," to strike out "1927" and insert "1928," so as to read:

SEC. 132. PAYMENTS UNDER 1926 ACT.

Any amount paid before or after the enactment of this act on account of the tax imposed for a fiscal year beginning in 1927 and ending in 1928 by Title II of the revenue act of 1926 shall be credited toward the payment of the tax imposed for such fiscal year by this act, and if the amount so paid exceeds the amount of such tax imposed by this act, the excess shall be credited or refunded in accordance with the provisions of section 322.

Mr. SMOOT. That is the same thing. It merely refers to the years.

The PRESIDING OFFICER. That has already been adopted.

The next amendment passed over was, on page 119, line 18, after "(B)," to strike out "11½ per cent" and insert "12½ per cent," so as to read:

SEC. 144. WITHHOLDING OF TAX AT SOURCE.

(a) Tax-free covenant bonds: (1) Requirement of withholding: In any case where bonds, mortgages, or deeds of trust, or other similar obligations of a corporation contain a contract or provision by which the obligor agrees to pay any portion of the tax imposed by this title upon the obligee, or to reimburse the obligee for any portion of the tax, or to pay the interest without deduction for any tax which the obligor may be required or permitted to pay thereon, or to retain therefrom under any law of the United States, the obligor shall deduct and withhold a tax equal to 2 per cent of the interest upon such bonds, mortgages, deeds of trust, or other obligations, whether such interest is payable annually or at shorter or longer periods, if payable to an individual, a partnership, or a foreign corporation not engaged in trade or business within the United States and not having any office or place of business therein: *Provided*, That if the liability assumed by the obligor does not exceed 2 per cent of the interest, then the deduction and withholding shall, after the date of the enactment of this act, be at the following rates: (A) 5 per cent in the case of a nonresident alien individual, or of any partnership not engaged in trade or business within the United States and not having any office or place of business therein and composed in whole or in part of nonresident aliens, (B) 12½ per cent in the case of such a foreign corporation, and (C) 2 per cent in the case of other individuals and partnerships:

Mr. HARRISON. That goes over.

Mr. SMOOT. Let that go over, because it is a rate.

Mr. COPELAND. What about the amendment on page 115?

The PRESIDING OFFICER. That was agreed to.

Mr. COPELAND. With regard to that, among other letters I have is one from the president of the Delaware & Hudson Railroad, in which he says:

Section 141 of the pending revenue measure provides for consolidated returns in respect of the taxable years 1927 and 1928, but, at the end of that period, without further legislation, the privilege of rendering such returns would expire.

I wish earnestly to urge upon you the desirability of modifying this section to the extent of omitting the proposed limitation, leaving the provisions for consolidated returns in the bill and in such form that it will continue in effect as long as other provisions of the revised measure.

Mr. SMOOT. That is exactly what the amended provision does, just what the letter says.

Mr. COPELAND. So that is taken care of?

Mr. SMOOT. That is taken care of in the amendment agreed to.

Mr. COPELAND. This amendment meets the objection raised by Mr. Loree?

Mr. SMOOT. I do not know who the writer is, but the objection has been met.

Mr. COPELAND. Very well.

Mr. KING. Mr. President, I would like to inquire whether the amendment in subdivision (b), page 112, was agreed to?

Mr. SMOOT. That was agreed to the other day.

The PRESIDING OFFICER. The clerk will state the next amendment passed over.

The next amendment passed over was, on page 123, line 10, to strike out "11½ per cent" and insert "12½ per cent."

Mr. SMOOT. That involves a rate.

The PRESIDING OFFICER. That will go over, under the agreement.

The next amendment passed over was, on page 140, line 23, after the word "company," to strike out "11½ per cent" and insert "12½ per cent"; and in line 25, after the word "company," to strike out "11½ per cent" and insert "12½ per cent."

Mr. SMOOT. That involves a rate.

The PRESIDING OFFICER. That goes over, under the agreement.

The next amendment passed over was, on page 146, line 2, after the word "company," to strike out "11½ per cent" and insert "12½ per cent"; and in line 5, after the word "company," to strike out "11½ per cent" and insert "12½ per cent."

Mr. SMOOT. That goes over, being in relation to a rate.

The PRESIDING OFFICER. The amendment will go over, under the agreement.

Mr. SMOOT. The next amendment passed over, outside of those involving rates, is on page 215. There are some of the

rate amendments that we can take up later, and I will call attention to them after we get through with the administrative features.

The next amendment passed over was, on page 215, after line 3, to insert:

SEC. 508. CLAIMS FOR REFUND FOD 1917–1921.

Section 284 of the revenue act of 1926 is amended by adding at the end thereof a new subdivision to read as follows:

"(i) If the taxpayer has prior to January 1, 1928, filed a valid and enforceable waiver of his right to have the income, war-profits, or excess-profits taxes for the taxable years 1917, 1918, 1919, or 1920 determined and assessed within five years after the return was filed, or filed a valid and enforceable waiver of his right to have such taxes for the taxable year 1921 determined and assessed within four years after the return was filed, then such credit or refund relating to the taxes for the year in respect of which the waiver was filed shall be allowed or made if claim therefor is filed at any time prior to 90 days before the expiration of such waiver, or at any time before the expiration of one year after the waiver was filed, whichever date is earlier."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment passed over was, on page 215, after line 20, to insert:

SEC. 509. SURTAX RATES FOR 1927.

(a) Section 211 of the revenue act of 1926 is amended, to take effect as of January 1, 1927, by adding at the end thereof a new subdivision to read as follows:

"(c) Notwithstanding the rates provided in subdivision (a) the rate of surtax for the calendar year 1927 shall be the same as the rates of surtax specified in section 12 of the revenue act of 1928."

(b) Any refund or credit to which a taxpayer may be entitled by reason of this section shall be made or allowed without interest.

Mr. KING. Mr. President, this amendment was briefly called to the attention of the Senate when we began the discussion of the bill this afternoon. I stated then that the object of the amendment was to give to a limited number of individuals who were paying surtaxes the benefit of a reduction upon their 1927 taxes of $25,000,000. Instead of the bill applying in future in its entirety, so far as this provision is concerned it has a retroactive effect, and gives to individuals who are within certain surtax brackets a credit or refund of $25,000,000 for the year 1927.

This means a loss to the Government of this large amount. It seems to me that there is no justification for denying to the millions of small taxpayers who are not within those brackets the benefit of this retroactive provision. I have not heard any reasons, either in the committee or outside, to justify the application of this retroactive provision.

Mr. SMOOT. May I call the attention of my colleague to one of the bases for taking this action? The House did not change any of the rates whatever. It left the inconsistencies in rates on individuals as they were in the 1926 law. The chart on the wall shows how inconsistent and how unfair certain taxpayers were treated, particularly as the incomes run from $18,000 up to $90,000. In other words, some of them are paying a higher rate to-day than they were paying back in 1917. The income-tax rates as we provided them by an amendment to the House provision take care of those intermediate-bracket taxpayers, and we reduced those rates.

Those taxpayers have been the ones who have suffered in the past. They have not been taken care of, and therefore we provide here that they shall have a retroactive provision, trying to equalize what they have been forced to pay in the past under the taxes that were imposed unequally, at least. That is the reason we want the provision in the bill. That is one of the principal reasons.

Another thing is this, whatever tax was imposed was put in as an expense of the corporation paying it. But the individual is yet to receive the relief that he ought to have. He never ought to have paid it in the first place, and therefore we provide this bill shall be retroactive for the year 1927. So, if an individual has paid his first quarter tax for 1927 the next quarter, which will end on June 15, he will take whatever credit is due him under this provision out of that payment. If he has paid his taxes in full, then he makes a claim, and the Treasury Department will know immediately what it is and remit him the amount provided for in this provision.

That, substantially, is why the action was taken; and I think that the action of the committee was really a wise provision to right a wrong as far as we could by law.

Mr. KING. Mr. President, the report of the majority submits persuasive arguments for reducing the taxes upon corporations. I do not think the argument submitted by my colleague just now is sufficiently persuasive to justify us in favoring the individuals of large incomes and in so doing dealing unjustly with corporations and a large number of taxpayers. The corporations and their stockholders are the ones who have suffered most by failing to secure equitable and nondiscriminating tax reductions. The last revenue law increased the corporate tax to 13½ per cent. I felt then that there was no justification for the increase, and voted against it. We made substantial reductions in the income taxes that were imposed upon individuals, but increased the corporate taxes. It is apparent that we acted unwisely and unfairly. The fact that a large surplus has resulted justifies the position taken by Senators at that time when they insisted upon greater reductions in the tax bill, and opposed the increase of corporate taxes.

It is now proposed to reduce the income taxes of certain taxpayers, but to grant no relief to corporations. I am in favor of giving the corporations the reduction of $25,000,000 proposed to be applied retroactively to certain groups of individuals who pay surtaxes, and at the same time reducing the present tax laid upon corporations.

Mr. COPELAND. Mr. President, did the committee give any consideration to the question raised by the junior Senator from Utah?

Mr. SMOOT. As far as the committee was concerned, yes; and I think the committee was nearly unanimous.

Mr. KING. If the Senator will pardon me——

Mr. SMOOT. Nearly so, I say.

Mr. KING. If the Senator from New York means to ask whether the committee gave consideration to the question of reducing taxes upon corporations, yes; but it was not unanimous, because the minority were in favor of materially reducing the taxes upon corporations, whereas the majority are demanding a 13½ per cent corporate tax.

Mr. SMOOT. I understood the Senator to refer to reductions to individuals.

Mr. COPELAND. What I had in mind was this: The Senator has raised a question about the return in certain brackets to individuals. Was consideration given to the return to corporations under this new rate?

Mr. SMOOT. Certainly it was given consideration.

Mr. COPELAND. I mean with a retroactive provision in mind?

Mr. SMOOT. The House provided that it should be retroactive, but the Senate committee decided not to allow it as to corporations, but to allow it to individuals, for this reason: The individual can not pass the tax on, but has to pay it, whereas it is contended by a great many that the corporations knew what the facts were and therefore provided for the tax and passed it on. That was the position taken by the majority of the members of the committee.

Mr. KING. I have stated that I regard retroactive legislation, generally speaking, as unwise. I opposed in the committee applying retroactively any reductions carried in the measures which we were to report, either to individuals or to corporations. I favored reducing the surtax within certain brackets and also favored a material reduction in the corporate taxes. Though I believed that the tax upon corporations was too high and should be reduced, I was unwilling to apply it retroactively. The corporations have adjusted their business activities in the calendar year 1927 to the tax rates provided in existing law. Many corporations have passed on to the consumer the taxes which they knew would have to be paid. Manifestly, it would be unfair to remit a part of the tax for 1927 in view of the fact that many of the corporations collected the same from those with whom they were doing business.

Mr. GERRY. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. GERRY. Is not the reason for this the fact that the Finance Committee in the last revenue bill underestimated the revenues?

Mr. KING. Undoubtedly.

Mr. GERRY. They increased the corporation tax to 13½ per cent. They have this surplus and now they want to make the law retroactive, but I should like to ask the chairman of the committee how we can very well come to a vote on this section until we know what the surtax rate is going to be? I understand there is an amendment to be introduced by the Senator from North Carolina [Mr. SIMMONS], or perhaps it has been introduced and passed over.

Mr. SMOOT. That would make no difference.

Mr. GERRY. But until that is voted on how can we tell what we are voting to pay back, except on the very general principle that we are going to vote whatever the amendment calls for?

Mr. SMOOT. Whatever retroactive provision may be made in the bill, the money has already been collected and is in the Treasury now.

Mr. GERRY. I understand that perfectly.

Mr. SMOOT. So even if it were more than this it would not come out of the revenues for the coming year. The retroactive feature covers what has already been collected. The Treasury is perfectly willing to have the retroactive feature applied to corporations as well, which would make $82,000,000 more; that is, it would mean a 1 per cent reduction. Therefore the committee decided that the retroactive feature was proper for the individual, but would not agree to the retroactive feature as applied to corporations.

Mr. GERRY. Admitting that the Treasury say, "We made a mistake and now we want to pay this money back," nevertheless what we are doing now is to ask the Senate to vote to make a retroactive provision in the surtax rates when we have not yet decided what those surtax rates shall be.

Mr. SMOOT. Every member of the committee knows that it will make no difference, as a matter of principle, whether we take the minority rate or the majority rate.

Mr. GERRY. That is a matter of theory, but we can not tell what the surtax rate is going to be until after we vote on it, certainly. The minority amendment might be amended on the floor of the Senate.

Mr. SMOOT. It would make just a few dollars difference, no matter which rate is taken.

Mr. GERRY. But suppose another amendment is introduced on the floor of the Senate and is agreed to?

Mr. SMOOT. Then we have ample money to take care of it in the Treasury of the United States, already collected.

Mr. GERRY. It seems to me a very queer procedure.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from North Carolina?

Mr. KING. I yield.

Mr. SIMMONS. I think the situation is about this: We have not up to this time passed a single tax reduction bill in which we have not given the individual taxpayers the benefit of retroactivity as to the previous year. The House did not reduce surtaxes at all, and therefore the House bill had in it no provision similar to this one. But the House bill did provide for a retroactive provision in the case of corporation income taxes. The Senate Committee on Finance did not agree to the House provision with respect to corporations, and therefore the matter will be thrown into conference. But I think both sides of the committee did agree—I think the junior Senator from Utah probably objected, but I am not sure about it—that the deductions made in behalf of individuals should be retroactive.

Mr. KING. No; I agreed to what might be denominated the minority reductions in the surtaxes of individuals, but I was opposed to making them retroactive.

Mr. SIMMONS. That is what I said. I thought the Senator took that position.

Mr. KING. My position was that if we were to make any reductions, as we call them, we should take them off of the corporations. We should take the $25,000,000 that was to be given back to individuals by reason of the retroactive provision, and give that benefit to the corporations by reducing the amount that we would impose upon them from 13½ per cent, which our Republican friends insisted upon, to 13 per cent or 12½ per cent. At any rate, we would give the corporations the benefit of a reduction of $25,000,000.

Mr. SIMMONS. I think the Senator did take that position with reference to corporate taxes.

Mr. SMOOT. The junior Senator from Utah made the broad statement, and has made it on the floor to-day consistent with the statement he made before the committee, that he was opposed to any of the retroactive features of the bill.

Mr. KING. I was opposed to making the tax retroactive, whether benefits or disadvantages.

Mr. SIMMONS. That is what I said. I said I thought the junior Senator from Utah disagreed to the provisions with reference to the retroactivity of the surtaxes upon individuals.

Mr. KING. I apologize. I did not understand the Senator's statement.

Mr. SIMMONS. I simply stated that in every bill we had passed up to this time reducing taxes we had always given the individual taxpayer the benefit of the reduction upon his surtaxes. As to the retroactivity of the bill with reference to corporations, the Senate Committee on Finance did not approve. The House, however, had approved it, and therefore that matter goes into conference. That is about the situation as I understand it. But in that situation, whether the amendment proposed by the majority to the House bill with reference to surtaxes is agreed to or whether that proposed by the minority through myself is agreed to, I think the vote was unanimous in the committee, with the exception of the junior Senator from Utah [Mr. KING], that it should be retroactive.

Mr. KING. I am inclined to think that is correct.

Mr. SMOOT. Yes; that is correct.

Mr. SIMMONS. Now, the Senator from Connecticut [Mr. BINGHAM] made a very pertinent point, which I think will be disposed later, but I think probably it is not pertinent at this time, and that is as to the difference in the effect of the retroactive provision as to surtaxes in the amendment which I propose for the minority as compared with the amendment proposed by the Senator from Utah [Mr. SMOOT] for the majority. The amendment of the Senator from Utah proposes a reduction of surtaxes all along the line up to millions of dollars, while the amendment which I offer only proposes a reduction within certain brackets. That is the only difference between the two propositions.

Mr. SMOOT. I would like to qualify that in this way, that the majority proposition is to have the reduction all along the line down to the $80,000 point, or up, as the case may be.

Mr. SIMMONS. Both up and down. In the Senator's amendment it is both down and up. In my amendment it is only down.

Mr. SMOOT. No; it is not down and up. It is all down from the very beginning where there is a decrease. The only difference between the minority proposition and the majority proposition is this: The minority have arranged their schedule so that when the taxpayer reaches $100,000 he does not get any reduction whatever, whereas the majority amendment gives him whatever the deductions in the brackets down to $100,000 amount to. In other words, under the majority amendment a taxpayer whose income is $100,000 receives a reduction of $440. The taxpayer whose income is $1,000,000 receives only $440. But the minority amendment does not allow him anything from his present tax if he gets above $100,000.

Mr. SIMMONS. I think the Senator has pretty nearly accurately stated it.

Mr. SMOOT. I have accurately stated it.

Mr. SIMMONS. The amendment which I have offered confines the reduction to incomes between $10,000 and $70,000. It does not give the taxpayer above that the benefit of any reduction at all.

Mr. SMOOT. That is exactly what I said.

Mr. SIMMONS. The amendment which the Senator from Utah has offered gives everybody from $20,000 up as high as the income of the taxpayer may go the benefit of the reduction.

Mr. SMOOT. Yes; but over $100,000 he pays straight 20 per cent. The man who pays on $90,000 gets a reduction of $440. The man who pays $5,000,000, if there were any such, would only get a credit of $440; whereas the Senator's amendment provides that he should not get a cent of credit.

Mr. REED of Pennsylvania. Mr. President, will the Senator from North Carolina permit me to ask a question?

Mr. SIMMONS. I have not started to discuss the amendment. I had hoped we would postpone the discussion of the amendment until to-morrow. I was simply referring to a certain statement made by the junior Senator from Utah [Mr. KING] in an attempt to clarify the situation. I do not desire now to enter into a discussion of the amendment itself.

Mr. REED of Pennsylvania. We will let it go over until to-morrow then.

Mr. SIMMONS. I do not think there is any reason why we should not act upon the matter now before the Senate, but as to the proposition as presented by the majority members of the Finance Committee and the minority members of the Finance Committee, I desire to postpone action until the amendment is printed. But the question of whatever surtax scheme of reduction may be provided, whether it should be retroactive or not, I think is an entirely different question and may be acted upon now.

Mr. GERRY. Mr. President, I hope the chairman of the committee will let this matter go over.

Mr. SMOOT. Certainly, if the Senator requests it. I have done that whenever a Senator made such a request.

Mr. GERRY. There are some other Senators who desire to consider it and possibly to discuss it.

The PRESIDING OFFICER. The amendment will go over. The clerk will state the next amendment passed over.

The CHIEF CLERK. The next amendment of the Committee on Finance passed over is on page 219, line 25, where the committee proposes to strike out the words "Such rules of practice and procedure shall have the same force and effect as Federal equity rules" and to insert in lieu thereof the following:

In any proceeding involving the issue whether the petitioner has been guilty of fraud with intent to evade tax, where no hearing has been held before the enactment of the revenue act of 1928, the burden of proof in respect of such issue shall be upon the commissioner.

Mr. SMOOT. I think that was agreed to. However, to be perfectly secure, let us now vote upon it again.

The PRESIDING OFFICER. The question is upon agreeing to the amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance passed over was on page 223, line 17, where the committee proposes to strike out the following provision:

Proceedings instituted after the enactment of this act under section 311 of this act or under section 280 or 316 of the revenue act of 1926 for the enforcement of the liability of a transferee or fiduciary, shall be in addition to and not in substitution for proceedings in court, at law or in equity, for the enforcement of such liability; and the commissioner may cause proceedings for the enforcement of such liability to be instituted either under such sections or in court, in his discretion.

The amendment was agreed to.

The next amendment passed over was on page 227, lines 9 and 10, where the committee proposes to strike out the words "unless within such period suit was begun by the taxpayer," and insert in lieu thereof the following:

unless—(1) within such period suit was begun by the taxpayer, or

(2) within such period the taxpayer and the commissioner agreed in writing to suspend the running of the statute of limitations for filing suit from the date of the agreement to the date of final decision in one or more named cases then pending before the United States Board of Tax Appeals or the courts.

So as to make the paragraph read:

(b) in the case of a claim filed within the proper time and disallowed by the commissioner after the enactment of this act, if the refund was made after the expiration of the period of limitation for filing suit, unless—

(1) within such period suit was begun by the taxpayer, or

(2) within such period the taxpayer and the commissioner agreed in writing to suspend the running of the statute of limitations for filing suit from the date of the agreement to the date of final decision in one or more named cases then pending before the United States Board of Tax Appeals or the courts.

The amendment was agreed to.

The next amendment passed over was, on page 242, after line 17, to insert:

(b) For the purpose of the revenue act of 1926 and prior revenue acts, a trust shall, at the option of the trustee exercised within one year after the enactment of this act, be considered as a trust the income of which is taxable to the beneficiaries, and not as an association, if such trust (1) had a single trustee, and (2) was created and operated for the sole purpose of liquidating real property as a single venture (with such powers of administration as are incidental thereto, including the acquisition, improvement, conservation, division, and sale of such property), distributing the proceeds therefrom in due course to or for the benefit of the beneficiaries, and discharging indebtedness secured by the trust property, and (3) has not made a return for the taxable year as an association.

The PRESIDING OFFICER. The question is on the adoption of the amendment.

Mr. KING. Mr. President, I ask the chairman of the Committee on Finance, or any other Senator, if this provision is not too broad? I call attention to the provision under subdivision 2 of paragraph (b), and particularly on page 243. I shall have to read back in order to get the context. If an individual is selected for the purpose of acquiring, improving, conserving, dividing, and selling a property, and distributing the proceeds thereof "in due course to or for the benefit of the beneficiaries, and discharging indebtedness secured by the trust property," then such individual would be regarded as a trustee?

Mr. SMOOT. I think the Senator would be perfectly correct in the statement he has just made if this applied other than retroactively. Let me read the report of the committee to the Senator, and I think he will understand the matter in a minute.

Mr. KING. This is not intended to be prospective, but merely retroactive?

Mr. SMOOT. It is intended to be retroactive.

Mr. KING. Whether it deals with the future or only with the past there is danger of its being so construed as to cover transactions not contemplated by the Senate. There are many real-estate transactions not yet completed where I am inclined to believe the language of the bill may be so construed as to render immune from taxation enterprises or trusts from which large profits will be received. That the bill will relieve associations or trusts there can be no doubt. How it will operate as to trusts or associations not yet completed it is difficult to predict.

Take a case of a tract of land purchased several years ago for division and sale, the title being in a trustee authorized to handle and subdivide into lots and sell and pay off a mortgage to secure the purchase price. It may require several years yet before he sells a sufficient number of lots to discharge the mortgage. When this is done, then further sales will yield large profits. Is it intended to relieve the beneficiaries of the enterprise from all taxation upon such profits? It will be observed that in this supposed case—and there are hundreds of a similar character—the transaction or scheme covers several years and is projected into the future. How is the matter to be dealt with? What taxes will be paid? Where is the dividing line between the retroactive and prospective features of the business?

Mr. SMOOT. This is a retroactive provision, and if the Senator will notice, he will see that such a situation as he has referred to is taken care of later in this bill so far as that is concerned; and I think there will be no question from now on as to what is going to happen in all such cases.

Mr. KING. I want to be perfectly sure that the trustee who dates the source and limitation of his power to an anterior period shall come within the provisions of this bill for future taxation; that is, will be taxed upon profits made after the bill becomes law.

Mr. REED of Pennsylvania. He will in the future.

Mr. KING. Mr. President, let me ask my colleague and the tax experts on this subject whether in the case which I shall present the profits in the enterprise would be immune from taxation. Suppose that five years ago a tract of land was purchased for a million dollars and conveyed to A to hold in trust, to divide and to sell and pay off an incumbrance placed upon the property, and prior to the passage of this bill he is able to dispose of sufficient land to discharge the incumbrance, and there is still a large amount of property available from which profits will be derived, would that trust, which was created five years ago, be subject to taxation in the future upon the profits hereafter realized?

Mr. SMOOT. Such a property would not be subject to taxation in the past but it would be subject to taxation in the future, I will say to my colleague.

Mr. KING. The question is where are we going to draw the line? Is that a trust in the future, or is it a trust in the past?

Mr. SMOOT. The bill refers to "the taxable year as an association"; in other words, from now on its profits would be taxable as an association or as a corporation.

Mr. KING. I am not sure, Mr. President. I have no objection to giving some retroactive benefits in cases of certain trusts, because of the uncertainty and dubiety which heretofore has existed; but in the case which I have just put, if the profits are in futuro, and will be realized by those who formed the trust, I think they ought to be subject to taxation.

Mr. REED of Pennsylvania. Mr. President, under the bill as it now stands they will be. This language refers only to taxes which were due under the 1926 law and its predecessors. Under this proposed law taxes will be assessed against the trustee as if the individual were a corporation, so that there will be no doubt for the future.

Mr. COUZENS. Mr. President, I should like to suggest to the junior Senator from Utah that if the corporation which he has described was organized five years ago the trustee will have a year during which time he may exercise the option of having the income taxed to the beneficiaries of the trust or as an association. Having once exercised the option, he remains under that classification until the property shall have been liquidated.

Mr. REED of Pennsylvania. No, Mr. President; he has a year to exercise his option as to which method of taxation shall be adopted for the earnings during the year 1927 and prior years, but he has no option for any length of time as to the method of accounting to be adopted for 1928 and subsequent years.

Mr. COUZENS. Even though the corporation had been organized five years ago?

Mr. REED of Pennsylvania. No matter when the corporation was organized.

Mr. KING. I should want to be certain that the costs and expenses in the preceding years would not be a charge against the profits which would be made in the future. I would want the trustee to stand in the same situation as if an association or trust were formed after the passage of the act, and pay the same tax on the profits of the enterprise as if the organization to take over a scheme of this kind were formed after the passage of the act.

Mr. REED of Pennsylvania. There can be no doubt about that, Mr. President.

Mr. KING. If there can be no question I shall be satisfied.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment passed over was, on page 243, after line 21, to strike out:

SEC. 707. BUREAU OF INTERNAL REVENUE—PERSONNEL.

(a) The Secretary of the Treasury is authorized to fix the compensation, without regard to the provisions of the classification act of 1923, of the following officers and employees of the Bureau of Internal Revenue appointed (whether before or after the enactment of this act) in accordance with the civil service laws: Twenty-three assistants to the general counsel at a compensation not in excess of $7,500 a year each; 26 administrative or technical employees at a compensation not in excess of $7,500 a year each; and 50 administrative or technical employees at a compensation not in excess of $6,000 a year each.

(b) Section 1201 (b) (1) of the revenue act of 1926 is repealed.

Mr. SMOOT. Mr. President, I understand the Senator from Mississippi [Mr. HARRISON] desires that amendment as well as the amendment covering section 707 relating to the salaries of collectors of internal revenue to go over. I will ask the Senator from Mississippi if I am correctly informed?

Mr. HARRISON. Yes; for the present I think it would probably be better to have them go over. Is the Senator going to insist on the amendment striking out the House provision?

Mr. SMOOT. I think that I can explain it to the Senator, so that he will be perfectly satisfied with the action of the committee.

Mr. HARRISON. I think it had better go over.

Mr. SMOOT. I can explain it at this time or I can do so to-morrow; I do not care which.

Mr. COUZENS. Mr. President, I think before we strike out that section we ought to have some action on the bill which the Senator described to the committee under which the personnel is to be taken care of. I should not feel disposed to vote to strike out that provision and then have fail the bill which the Senator has introduced and which has not as yet been acted on.

Mr. SMOOT. The House is going to act on that bill.

Mr. COUZENS. We do not know what the House may do or what the Senate may do. I have no assurance that this body is going to take action on the bill, because of the late hour we have reached in the session.

Mr. SMOOT. I do not think there is any question in the world about action being taken on the bill to which I have referred. If I did, I would not stand here and say that the provision in this bill should be stricken out.

Mr. COUZENS. I am not questioning the Senator's sincerity; but I should like to see some action on the bill to which he has referred, and the committee has not acted on it as yet.

Mr. SMOOT. The reason the committee has not acted on it I will state frankly is this: The chairman of the committee came to me day before yesterday, on Saturday, and asked me whether the committee should report the bill out. I said to the chairman, "I do not think the committee had better do so because the House has before it a bill which is identical, word for word, with three additional provisions, and it would be better for us to allow the House bill to come here and not report my bill, but report the House bill." That is why the committee has not acted, as I understand.

Mr. COUZENS. May I ask the Senator when, in his judgment, that bill will come before the Senate?

Mr. SMOOT. Within the next couple of days, I assume.

Mr. COUZENS. I should like to suggest, before the Senate agrees to the elimination of this provision, that we see what the House does with that bill. We have time enough to consider the matter after the Senate shall have passed on the question of rates.

Mr. SMOOT. I know what the House is going to do, because they have a rule for the consideration of that bill, but I do not know just what day it is coming up. If the Senator desires, however, I will give him a copy of the bill that the House is going to pass.

Mr. COUZENS. I see no necessity of haste in agreeing to the elimination of this section of the pending bill until after we shall have fixed the rates.

Mr. SMOOT. The bill referred to is satisfactory to the President, it is satisfactory to the Secretary of the Treasury, and I might add that it is satisfactory to the representatives of the employees of the Government. I do not know of any objection to it.

Mr. COUZENS. It will be satisfactory to me when it is an accomplished fact.

Mr. SMOOT. It will be an accomplished fact.

Mr. HARRISON. Does the bill to which the Senator refers provide for taking care of the employees named here?

Mr. SMOOT. It provides for 80 of them out of the 99, and the Treasury Department says that they can get along with that number.

Mr. HARRISON. The bill referred to then merely provides for those in the classified service?

Mr. SMOOT. That is all.

Mr. HARRISON. Then the unfortunates working with the Court of Claims, who are getting $5,000 a year, can not be taken care of in that bill?

Mr. SMOOT. That is true.

Mr. HARRISON. Then I shall insist that they be taken care of in this bill.

Mr. SMOOT. That is all right. Such an amendment can be offered to-morrow.

Mr. HARRISON. I know the Senator is in entire sympathy with me.

Mr. SMOOT. Absolutely; there is not any question about that; but they are not in the classified service.

Mr. GEORGE. I should like to have section 707 considered and acted on this afternoon.

Mr. SMOOT. If the Senator from Mississippi [Mr. HARRISON] wishes that done, I have no objection.

Mr. GEORGE. I understand the position of the Senator from Mississippi is that certain officials of the Court of Claims are not taken care of. This has nothing to do with them.

Mr. SMOOT. Nothing whatever.

Mr. GEORGE. The position of the Senator from Michigan is that the preceding section ought not to be stricken out unless the bill which the Senator from Utah has introduced or the amendment he has suggested to the Welsh bill shall be finally enacted. Section 707 relates entirely to the salaries of collectors of internal revenue.

Mr. SMOOT. I have no objection to the provisions of section 707.

Mr. GEORGE. That section has no bearing upon the contention made by the Senator from Mississippi.

Mr. SMOOT. I understood the Senator from Mississippi asked that that amendment go over.

Mr. COUZENS. The Senator from Mississippi, I think, does not object to section 707 being adopted because his amendment would not apply to that section.

Mr. GEORGE. It would have no application to it.

Mr. SMOOT. I should be glad to have it taken up if there is no objection.

Mr. KING. I am opposed to that amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 244, after line 18, it is proposed to insert:

SEC. 707. SALARIES OF COLLECTORS OF INTERNAL REVENUE.

Section 1301 (b) of the revenue act of 1918 is amended to read as follows:

"(b) The salaries of collectors may be readjusted and increased under such regulations as may be prescribed by the commissioner, subject to the approval of the Secretary, but no collector shall receive a salary in excess of $7,500 a year."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. GEORGE. Mr. President, section 707, which has just been read by the clerk, simply authorizes the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to readjust and to increase the salaries of the internal-revenue collectors in the several districts throughout the United States, but to a sum not exceeding $7,500 per year.

These collectors now are limited in salary to a sum not exceeding $6,000 per year. Many of them, of course, have whole States, large territory. In most instances they render a very valuable service to the taxpayers of the States, and a salary of $6,000 is not adequate for the man who collects the internal revenue of a whole internal-revenue district in the country. He ought at least to be entitled to have, if the Commissioner of Internal Revenue and the Secretary of the Treasury approve, a salary equal to the highest salary paid under the classified service, which is $7,500 per year.

This section merely authorizes a readjustment and an increase of salary for these field internal-revenue agents up to $7,500, and not in excess thereof. At the present time they are limited to a salary not exceeding $6,000. The section does not mean that the internal-revenue collector's salary in every instance would be increased to $7,500, but the maximum salary

may be fixed at $7,500, in the discretion of both the Commissioner of Internal Revenue and the Secretary of the Treasury.

Mr. KING. Mr. President, I know it is an ungracious task to oppose increases in salaries. The other day the Senate considered the so-called retirement bill. It has frequently been claimed that under the retirement system now in force the Government would not be called upon to pay any part of the annuities.

The Government has already paid millions of dollars into the retirement fund, and figures submitted by actuaries indicate that at the end of 30 years the Government will be called upon to pay hundreds of millions of dollars into the retirement fund and, of course, will be required to pay several millions of dollars annually during that period. My colleague just stated that a bill will be reported in a day or two increasing the salaries of Federal employees. The pay roll of the employees covered by the retirement act amounted on July 1, 1927, to $798,000,000. That huge sum did not meet all the salaries and the compensations of all persons employed by the Government. There are many individuals receiving compensation from the Government who are not within the provisions of the retirement act. It is safe to say that the Government will pay during the next fiscal year considerably more than eight hundred millions of dollars in salaries and compensations to its employees.

The estimated receipts for the Government for the next fiscal year—1929—are $3,854,700,000. It will be perceived that a very large part of the entire revenue from all sources will be consumed in paying the employees of the Government. It has been said that the cost of running the Federal Government is greater than that of any government in the world. We are constantly increasing the number of bureaus and Federal agencies and multiplying personnel. Appeals are constantly made for increases in salaries, and these appeals are not denied. Only a few years ago the reclassification act was passed, increasing very largely the salaries of Federal employees. But with each demand responded to, other demands quickly follow. Scarcely any opposition is encountered and we spend much of the time of Congress in dealing with the compensation of Federal employees.

The Senator from South Dakota [Mr. NORBECK], when the retirement bill was under consideration a few days ago, suggested that before fixing the amount of retirement to be paid employees there should be some relation between the amount of the earnings of the farmers of the country. It is known that the wages of the farmers, the clerks in the stores throughout the country and in the banks, and the millions of wage earners are much less than many of the Federal employees. I am not challenging attention to these matters for the purpose of expressing disapproval of the retirement bill or opposing reasonable compensation to employees of the Government, but I do feel that Congress in providing revenue should take into account the enormous demands which are made upon the Public Treasury. I believe that this is not the time for a general increase in salaries in all branches of the Government. In my opinion there are many salaries which are too high and in various grades the compensation is too low.

But, Mr. President, we are attempting by this bill to provide revenue for the future. We must consider what demands are made upon the Government and provide revenue adequately to meet the same. During the past few weeks I have had some doubts as to the wisdom of passing any tax bill because of the increasing demands for appropriations, some of these demands aggregating hundreds of millions of dollars. Before Congress met in December I believed that taxes could be reduced to the amount of $400,000,000. If Congress had acted prudently and economically, instead of a tax bill calling for $200,000,000 reduction, we could have safely enacted a revenue law reducing the tax burdens at least $400,000,000. However, there are now before the Congress a number of bills which, if enacted into law, will justify Congress in pausing before passing any tax bill. We may, however, perceive the impropriety of acceding to these enormous demands and adjourn Congress without stripping the Treasury or producing a situation precluding a tax reduction bill which will prove of some advantage to the country.

The Senator from Georgia [Mr. GEORGE] desires to increase the salaries of the collectors. Mr. President, I venture the assertion that for every collector appointed the Senators or Congressmen from their respective districts had many applicants for the same position. If every collector should resign tomorrow, Senators and Congressmen would be flooded with petitions and telegrams from hundreds of applicants for the vacated positions. It is not necessary to increase Federal salaries to secure competent men.

The Federal employees in the main are getting larger compensation than individuals in the private activities of life throughout the country. I think that the salaries now paid to collectors are ample. There is no reason for increasing the salaries at this time. If we continue increasing the salaries, next year we shall be paying in salaries to Federal employees $1,000,000,000, and in a few years the amount will be, of course, very much greater. That means increased taxes.

If Congress continues its present policy of creating new Federal agencies with their necessary personnel and extending the activities of the General Government into various fields of business and into the domain which belongs to the States, there will be no hope of future tax reductions. Indeed, the taxes for the fiscal year 1930 will be increased.

And where will the revenue come from? Shall we impose a sales tax? That is desired by some. They would tax consumption instead of wealth. To me that is reprehensible. I do not believe in consumption taxes if it is possible to avoid them. In case of war they are justifiable. Our future revenues will be derived largely from income taxes upon individuals, corporate taxes, and death dues or estate taxes.

There is a determination to abolish death dues and inheritance taxes and estate taxes; and if we abolish the Federal inheritance tax, and the great propaganda in favor of so doing may be successful, there will be an insistent demand for the abolition of any form of death dues in the States. Florida imposes no estate taxes, nor does Alabama or the District of Columbia or Nevada. There is tremendous propaganda in favor of an abolition of all Federal inheritance taxes or estate taxes; and, as I state, when that is accomplished there will be tremendous pressure to abolish all forms of State inheritance taxes. The Federal Government will have to rely principally upon the income taxes and taxes upon corporations.

If we investigate the matter, the figures will demonstrate that more and more there is a diffusion of corporate stock. In many of the great corporations from 30 to 40 or 60 per cent of the stock is held by persons having small holdings. Many employees of corporations are the owners of no small portion of the aggregate corporate stock of their employing company. An examination of the record shows the dividends paid by corporations will prove surprising, as it will reveal a large number of persons of small incomes who are paying taxes out of dividends which they have received from corporations. When we increase corporate taxes we are imposing taxes not upon persons of great wealth, but upon hundreds of thousands of people of limited means.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. COPELAND. Does the Senator think that we would be justified this year in reducing the tax on corporations to about 10 per cent?

Mr. KING. Mr. President, in October, when I came to Washington, I prepared a bill reducing the tax upon corporations to 10 per cent, and in interviews which I gave at that time I stated that we ought to reduce the corporate tax to 10 per cent; but the situation has changed, and I fear that it would be unsafe to make so great a reduction. The enormous appropriation bills which we are passing, the demands which are being made upon the Federal Treasury, seem to forbid a reduction of corporate taxes to 10 per cent, much as many of us would like to see done. No one—and I say it with the utmost good will—seems disposed to challenge any of the appropriation bills. They come here, carrying hundreds of millions of dollars, and pass with scarcely a word of debate and with but slight opposition.

Mr. COPELAND. I hope the Senator will not follow the Senators on the other side and propose a rate as high as 12½ per cent.

Mr. KING. Indeed I shall not.

Mr. COPELAND. Because I fully agree with the Senator that nothing can do the country more good than to reduce the corporation tax.

Mr. KING. I agree with my friend.

Mr. COPELAND. I should like to see it brought down to 10 per cent.

Mr. KING. I share the Senator's views; and if we had practiced economy we could have reduced the corporation tax to 10 per cent and then would have had something in the Treasury at the end of the year and would have had no deficit.

Mr. COPELAND. If the Senator will bear with me again.

Mr. KING. Yes.

Mr. COPELAND. Many of the expenditures that we are talking about or proposing are not immediate. Does not the Senator feel that with the bad guessing on the part of the Treasury we might be justified in reducing the corporation tax to 10 per cent and still be within the bounds of reason?

Mr. KING. Mr. President, when we come to deal with the question of revenue I feel that there should be no partisanship,

and no attempt to play politics. We must face the situation, unpleasant as it may be. Congress is, in my opinion, too generous in its appropriations, and is now acting unwisely in its expenditures. But if appropriations are made—no matter how improper and profligate they may be—provision must be made to meet them. There should be no deficit. In view of the extravagance and unwise appropriations made and to be made before we adjourn, I confess that I look with some apprehension upon any proposition calling for a great reduction in taxes for the coming year.

Mr. COPELAND. Mr. President, will the Senator bear with me a moment?

Mr. KING. Certainly.

Mr. COPELAND. Let us for just a moment review the situation. I remember when the colleague of the Senator said we could not have a bonus and have tax reduction, and various estimates were made. There was a gloomy prediction by the senior Senator from Utah, and at various times since then the Treasury has made estimates about what the surplus would be, or what the deficit would be, as the case might be but, as a matter of fact, the guesses of the Treasury have invariably been so far wrong that the aggregate of them is in the billions. I believe the country demands lower taxes. When you think that practically one-ninth of all the earnings of our people are spent for taxes in this country, there is no question but that the country demands lower taxes, and there must be found a way to bring that about.

Mr. KING. Let me say to my friend from New York that for the next year the Federal expenditures will be between four and five billions, and county, State, and municipal expenditures will be between seven and eight billion dollars. There will be expenditures aggregating approximately $12,000,000,000. So that more than one-ninth of the earnings of all the people of the United States will be consumed in taxes—Federal, State, and municipal.

Mr. COPELAND. I think last year, if the Senator will bear with me, the Federal taxes amounted to about $4,000,000,000, the State taxes to one billion, and the local taxes to five billions, making in all $10,000,000,000, against an earning production on the part of our people of ninety billions. So that it was one-ninth last year, and now the Senator anticipates that a still larger sum will be spent in taxes in the aggregate.

Mr. KING. Mr. President, I have detained the Senate longer than I had intended. I rose to briefly reply to the Senator from Georgia.

I regret that this amendment is before us. I do not like to oppose measures increasing salaries, but have felt constrained to do so upon several occasions. I wish higher wages could be paid to those who toil and that labor generally could receive higher rewards. Yet when we are paying more than $800,000,000 of our taxes this year for Federal salaries—and we will add to that list before we adjourn at least $30,000,000 more—and when I examine the measures calling in the aggregate for billions of dollars from the Federal Treasury, I confess that I look with some degree of apprehension upon our future fiscal policies and the general course of our country in its dealing with national problems.

If we continue the present policies we will soon be compelled to increase taxes. It will be inevitable. And where will the increase begin? Obviously on corporations and incomes. There will be no general sales tax, and excise taxes will not be tolerated. So there will be but a limited number of springs from which to draw. The tax on tobacco in its various forms is enormous. Perhaps four or five hundred million dollars will be collected next year from this source. The receipts from our customs duties will be between five and six hundred million dollars. Then we must rely upon income and corporate taxes for the residue of our demands.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMOOT. Mr. President, that concludes all of the amendments except those that were passed over to-day, and nearly all of those involve rates. Therefore I now ask that the bill be temporarily laid aside.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

### DIVERSION OF COMMERCE FROM UNITED STATES PORTS

Mr. WALSH of Massachusetts. Mr. President, I ask unanimous consent to call up Senate Resolution 220, relating to the diversion of commerce from United States to Canadian ports.

Mr. CURTIS. Mr. President, this is a resolution which has come over from a previous day, and I would like to have it disposed of. I understand there is no opposition to it.

Mr. KING. Let it be read.

The PRESIDING OFFICER. The resolution will be read.

The Chief Clerk read the resolution (S. Res. 220) submitted by Mr. WALSH of Massachusetts on the 3d instant, as follows:

Whereas during the past 10 years there has been diversion of commerce from United States ports to Canadian ports, particularly in grain and other farm products, so great as to threaten the foundation of the future commerce and prosperity of the ports of the United States and to affect seriously the agricultural and transportation interests of this country, including the development of its merchant marine;

Whereas this diversion of commerce is the result of (1) more favorable railroad rates between points in the United States and Canadian ports than between the same points and United States ports, (2) more stringent regulations as to grading and inspection of grain at ports of the United States than at Canadian ports, especially the higher grain standards and the dockage rules of the United States, (3) the preferential customs regulations of Canada, giving lower tariffs on products imported into Canada directly through Canadian ports than on those routed through ports of the United States, and (4) the preferential schedules of other parts of the British Empire, imposing lower duties or more favorable regulations on products of the United States routed through Canadian ports than on those shipped from United States ports; and

Whereas the adoption by Congress of constructive legislation to meet these conditions is imperative and depends on the solution of problems within the respective provinces of the Department of State, the Department of Agriculture, the United States Shipping Board, and the Interstate Commerce Commission: Therefore be it

*Resolved*, That the Secretary of State, the Secretary of Agriculture, the United States Shipping Board, and the Interstate Commerce Commission are requested (1) to investigate, in cooperation with each other, the factors which are contributing to the diversion of commerce from ports of the United States to Canadian ports and practicable remedies for preventing such diversion, and (2) to report thereon to the Senate at the beginning of the next regular session of the Seventieth Congress.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

Mr. WALSH of Massachusetts. Mr. President, for some weeks Senators from the States of Maryland, Pennsylvania, Virginia, New York, Maine, and Massachusetts have been in conference in reference to the decline in exports from the Atlantic seaports, particularly in grain and other farm products. It is a condition which threatens seriously our future commerce. The result of these conferences, which were participated in by representatives of maritime organizations, has led to the presentation of the resolution which is now before the Senate.

The country should be brought to a full realization of the conditions and Congress should undertake to apply a remedy. The conditions are beyond dispute. The factors which are contributing to them are manifest. The remedies are available. I propose briefly to consider these three aspects of the problem.

First, as to the facts of the diversion of our own export trade to Canadian ports. The figures are fairly startling.

Grain shipments from the port of Montreal for the 12 months ending March 31, 1927, aggregated 122,000,000 bushels. Of this, 75,000,000 bushels was Canadian grain and 47,000,000 bushels United States grain. In other words, practically 40 per cent of all the grain exported through the port of Montreal for that year was of United States origin.

Taking the different grain commodities separately, nearly 35,000,000 bushels of United States wheat were shipped through the port of Montreal during the year ending March 31, 1927, as compared with 25,000,000 bushels of our wheat shipped through Montreal during the year ending March 31, 1922.

In 1922 Montreal handled less than a million bushels of Canadian rye and not quite 6,000,000 bushels of United States rye. In 1927 shipments of Canadian rye through Montreal have substantially declined to half a million bushels, and shipments of United States rye have increased to seven and a half million bushels.

In 1922, 7,000 bushels of United States barley passed through the port of Montreal. In 1927 a million and eight hundred thousand bushels of United States barley passed through that port.

Now, let us see what has been happening to grain shipments through United States ports in recent years.

In 1906 there were exported through the port of Boston 18,000,000 bushels of United States grain. In 1916, 33,000,000 bushels of United States grain passed through the port of Boston. And in 1926 less than 4,000,000 bushels of United States grain were exported from Boston.

In 1923 the export tonnage from Portland, Me., approximated 625,000 tons. In 1926 it was only 266,000 tons.

In 1913, 111,000,000 pounds of pork products and lard were exported through Boston, but now this business has practically

disappeared, and the export business which Portland and Boston and other north Atlantic ports have lost is now moving through Montreal and other Canadian ports.

Three factors have contributed materially in the transfer of this export business from United States ports to Canadian ports.

First and foremost is the matter of railroad rates. Montreal enjoys a 2-cent rail differential under the New York rates. Differentials also apply in favor of the ports of St. Johns and Halifax.

That Canada's intention is to further increase her own export business at our expense is well indicated by the recent request for a rate reduction ordered by the Railway Commission of Canada in the rail haul from Buffalo, N. Y., to St. Johns, a distance of 1,185 miles. Grain may then be hauled for the same money that is paid to move it from Buffalo to New York, a distance of only 425 miles.

A second factor in promoting the diversion of export shipments of United States grain through Canadian ports is the difference between the Canadian regulations and United States regulations relative to the grading and inspection of grain. The United States regulations are promulgated by the Secretary of Agriculture, in accordance with the United States grain standards act, and Canadian regulations are imposed in accordance with the Canada grain act of 1912. I do not intend at this time to go into the details of the differences in the two sets of regulations. Suffice it to say that our own regulations set up exacting standards which are rigidly enforced, and the Canadian regulations, so far as they apply to United States grain shipments, are very liberal indeed. A detailed examination of the Canadian regulations discloses that while they are rigid enough with respect to their own grain shipments, they offer to the shipper of United States grain much greater latitude in the matter of inspection.

At the present time, under our own Federal regulations governing grading and inspection of grain, 2 per cent is deducted for dockage on all United States grain exported through the north Atlantic ports. In the case of United States grain handled through Canadian ports for export, no such deduction is made. This deduction approximates a loss of 3 cents per bushel on United States grain shipped through our own seaports. The term "dockage" as applied in the grain trade means foreign material which is intermingled with the grain itself.

The third factor which has contributed to the upbuilding of Canadian ports has been the preferential customs and regulations of Canada, Great Britain, and Australia. The constant vigilance and alertness of our neighbors to the north has resulted in the enactment of legislation highly beneficial to their own port developments and very detrimental to our own ports. Canada allows preferential duties on all merchandise destined for Canada which is routed directly through Canadian ports.

Great Britain has a regulation which provides in substance that cattle shipped from a Canadian port are admitted to the United Kingdom for feeding purposes, while cattle from the United States must be slaughtered in quarantine within 10 days after arrival at a port in the United Kingdom.

In 1912, prior to the enactment of this legislation, 26,730 cattle were exported through the port of Boston. Last year not a single head of cattle was shipped through that port. Statistics of other ports show similar declines.

Since January 1, 1927, products from the British Empire destined for Canada, but routed through the United States, are not entitled to the rates of the British preferential schedule of the Canadian tariff.

Only recently a shipment of canned meat from the Argentine to Canada was diverted from one of our north Atlantic seaports, even though the shippers were willing to patronize the United States Shipping Board's American Republic Line, but because of the 10 per cent discount in customs duty if forwarded to Great Britain and then transshipped to Canada the Shipping Board's vessels did not carry the goods.

Australia is putting into effect a similar series of regulations which is affecting the business of our Pacific coast ports.

The Maritime Association of the Port of New York, the Ocean Traffic Bureau of the Port of Philadelphia, and other organizations have protested these various regulations.

Prior to the establishment of the Canadian aggressive policy of protection there was maintained in Portland, Me., a water service to Liverpool, Glasgow, London, Leith, Newcastle, and Havre. Now they have only the Newcastle service.

Congress ought to take cognizance of this situation and do what it can to enable our own ports to recover the trade which is being taken away from them. It is a subject which is part and parcel of our whole merchant-marine policy. It is axiomatic that adequate cargoes are quite as necessary as the ships themselves in the development of a merchant marine under the American flag. The economic health of our seaports is being undermined and our commercial independence is jeopardized. It involves the question of rail and water rates and raises questions of foreign policy.

What are the remedies? Some readjustment of our own freight rates will undoubtedly be necessary. Such readjustments can be made and ought to be made without further legislation. Our own regulations in the matter of grain inspections and grain standards ought to be so modified that there shall be no handicap imposed on the shipments of our own grain passing through our own ports. If the United States shipper can escape the dockage charge by shipping by Montreal, we can not expect him to submit to that deduction at the port of New York.

Perhaps we ought to enact a preferential customs regulation favoring our own ports for our protection similar in character to the preferential treatment which Canada gives to her imports. There is no question that a very large volume of business is now moving into the United States via Canadian ports. We have the means at hand to bring these imports to us direct through our own ports, and we ought to do this in the interest of the prosperity and welfare of our own country.

Nothing more need be said to indicate that the problem is of vital importance to our agricultural as well as our transportation interests both by land and sea. Measures have been proposed in both Houses which should be studied and, if possible, a constructive legislative program presented for enactment. To this end I have presented this resolution calling for a study of this whole subject by the four departments of the Government whose functions are interrelated with this problem, and ask for its immediate favorable consideration.

Mr. REED of Pennsylvania. Mr. President, I hope the Senator's resolution will be adopted. It suggests the necessity of information upon a condition of affairs which is increasingly difficult, not only for the ports on our eastern seacoast but for the farmers of most of the United States. At the present time—and I mean to speak but a sentence—the trade in grain normally belonging to American ports is being deflected to Canadian ports, to the joint injury of American shippers, American port exporters, and American farmers. I hope the resolution will be adopted.

Mr. COPELAND. Mr. President, I think the Senator from Massachusetts is to be commended for bringing this matter so forcibly to the attention of the Senate. It is a serious matter when we find 93,000,000 bushels of American grain diverted from American ports and sent to Canada, and the purpose the Senator has in mind, I have no doubt, is that these various administrative heads of departments will confer and bring about a solution. I think the Senator is to be thanked in the name of every American for his energetic action.

Mr. HALE. Mr. President, I want to say a word about the resolution of the Senator from Massachusetts. My home city of Portland, Me., used to be one of the great grain-shipping ports of the country. That business is practically gone now, and we ship very little grain now out of the port of Portland. It has gone to Canada. The matter certainly requires investigation, and I very much hope the Senator's resolution will be agreed to. I will not say more lest I delay the Senate in taking action before it adjourns to-night.

The PRESIDING OFFICER. The question is on agreeing to the resolution of the Senator from Massachusetts.

The resolution was agreed to.

The PRESIDING OFFICER. Without objection, the preamble is agreed to.

MEMBERS OF SAME FAMILY IN GOVERNMENT SERVICE

Mr. BLEASE. Mr. President, I desire to call up a resolution coming over from a previous day.

Mr. CURTIS. Mr. President, I hope the resolution may be considered to-night.

The PRESIDING OFFICER. The resolution will be read.

The Chief Clerk read the resolution (S. Res. 226) submitted by Mr. BLEASE on the 5th instant, as follows:

*Resolved*, That the heads and chiefs of any and all the various departments, bureaus, commissions, and other establishments of the United States Government be, and the same are hereby, directed and required to forward, on or before the 3d day of December, 1928, a report to the Senate, setting forth with particularity the names and addresses of any and all husbands, wives, and other members of the same immediate family employed in the Government service, together with the place of such employment, the salary received by each therefrom, the date of appointment to the said service, and by whom made.

*Resolved further*, That any person or persons failing or refusing to make the said report as hereinabove directed, or making a false state-

ment in reference to any item or items thereof, shall forthwith be adjudged in contempt of the Senate, and shall suffer therefor such penalty or penalties as may be prescribed.

Mr. CURTIS. Mr. President, I desire to ask the Senator about the last clause in his resolution. I doubt if we have the right to include such a penalty in the resolution. I would suggest to the Senator that he eliminate the last clause.

Mr. BLEASE. Very well; I have no objection to striking out the clause referred to.

Mr. REED of Pennsylvania. Mr. President, was the resolution introduced to-day?

The PRESIDING OFFICER. No; it is a resolution coming over from a preceding day. The last resolve is stricken out.

Mr. CURTIS. Let the resolution as modified be read.

The PRESIDING OFFICER. The resolution as modified will be read.

The Chief Clerk read the modified resolution.

Mr. REED of Pennsylvania. Mr. President, let us stop for just a moment to consider what that means. As the resolution now reads, it would require the Secretary of War to find out from every one of the 120,000 enlisted men and 12,000 officers whether they had any wives or sons or daughters in the service of the Federal Government anywhere.

Mr. BLEASE. Not at all.

Mr. REED of Pennsylvania. That is just what it would mean.

Mr. CURTIS. I do not believe that is the intention. I think the resolution refers only to clerks employed in the various departments.

Mr. REED of Pennsylvania. Then the resolution ought to say so. It requires the head of every department to furnish such a list, and that includes the head of the War Department.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. REED of Pennsylvania. I ask that it may go over so that we may consider its wording. I am sure the Senator does not mean to require any such thing as I have suggested.

Mr. BLEASE. I am willing that it should go over to enable the Senator from Pennsylvania to give it consideration.

The PRESIDING OFFICER. The resolution will go over.

### PUBLIC HEALTH SERVICE

Mr. JONES. I send to the desk a conference report and ask for its immediate consideration.

The report was read, as follows:

The committee of conference on the disagreeing votes of the House on the amendments of the Senate to the bill (H. R. 11026) to provide for the coordination of the public-health activities of the Government, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 14.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 16, 17, 18, 19, 20, and 21, and agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "*Provided*, That the term of service of the Surgeon General of the Public Health Service shall be for four years: *And provided further*, That no person who has served for a period of eight years either before or after the passage of this act shall be eligible for reappointment as Surgeon General"; and the Senate agree to the same.

W. L. JONES,
CHARLES L. MCNARY,
DUNCAN U. FLETCHER,
*Managers on the part of the Senate.*
JAMES S. PARKER,
CARL E. MAPES,
CLARENCE F. LEA,
*Managers on the part of the House.*

Mr. KING. Mr. President, I would like to ask the Senator to explain the recessions of the Senate conferees.

Mr. JONES. The Senate recedes from the amendment on page 5, striking out the words "if selected from commissioned officers of the regular corps." That indicated that selections must be made from the regular corps. The Senate receded because we thought that it ought to be open for the President to select outside if he desires.

The modification of the House provision is where it reads that "The term of the Surgeon General shall be for four years unless sooner relieved and returned to the grade and number of the regular corps that he occupied previous to his appointment as Surgeon General." The committee left out the words "unless sooner relieved and returned to the grade and number of the regular corps that he occupied previous to his appointment as Surgeon General." We leave in the provision that no one shall serve more than eight years.

Mr. KING. It does not attempt to fix his status after he is relieved from service?

Mr. JONES. No; it does not.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

### SALE OF PRISON-MADE GOODS

Mr. METCALF. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial appearing in the New York World entitled "A bad plan for a good cause."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

#### A BAD PLAN FOR A GOOD CAUSE

A measure pending before Congress, known as the Hawes-Cooper bill, furnishes another example of the tendency to extend the powers of the Federal Government over the States in the administration of their local affairs. This measure aims at the exclusion of prison-made goods from interstate commerce. It would deprive such goods of their interstate character when shipped from one State to another by making them subject to the regulations of the States into which they are sent.

A number of States have attempted in the past to impose severe restrictions on the sale of prison-made goods, but such laws have been held to be unconstitutional in so far as they affected commerce between the States. The Hawes-Cooper bill proposes to meet the constitutional objections by having the Federal Government delegate to the States the right to regulate this kind of commerce.

As we are in full sympathy with most of the efforts to prevent competition between the products of convict labor and free labor, we find it difficult to oppose a measure conceived with this purpose. Yet the States face many difficult and diverse problems in dealing with their prison populations, and we should be loath to see their troubles multiplied by this invocation of the Federal power. If there were grave abuses the situation might be different, but the amount of prison-made goods entering into interstate commerce is relatively small and their exclusion would have little effect on general trade. Whatever advantage might accrue from the exclusion of prison goods from competition with others would probably be more than counterbalanced by this further encouragement of Federal interference in the domestic affairs of the States.

### COTTON-PRICE PREDICTIONS

Mr. HEFLIN. Mr. President, I ask unanimous consent for the present consideration of Calendar 866, the bill (S. 3845) to prohibit predictions with respect to cotton prices, in any report, bulletin, or other publication issued by any department or other establishment in the executive branch of the Government.

Mr. CURTIS. Let the bill be read.

The PRESIDING OFFICER. The bill will be read.

The Chief Clerk read the bill.

Mr. HEFLIN. The word "grain" has been stricken out and it only applies to cotton. The Senator from Rhode Island [Mr. METCALF] wanted to have an opportunity to look into it. He has done so and I do not think he has any objection to its consideration now.

Mr. SHORTRIDGE. Mr. President, the Senator from California is somewhat interested in the matter.

Mr. HEFLIN. The Senator from California, I am sure, when he understands it, will agree with me. It provides a penalty for the prediction of prices of cotton. I am sure nobody wants to give the power to any department to predict prices either up or down. It is a dangerous power. We have provided in the Agricultural Department appropriation bill that this must not be done, but there is no penalty. In every other such instance there is a penalty. The bill for which I am asking consideration provides a penalty for the violation of the law prohibiting the making of predictions as to prices of cotton up or down. That is all it does. The Senator is interested in the cotton question?

Mr. SHORTRIDGE. I am, indeed.

Mr. HEFLIN. I am anxious to get it through so the House may give it consideration.

Mr. SHORTRIDGE. I shall have to object for the moment.

The PRESIDING OFFICER. Objection is made.

Mr. HEFLIN. Mr. President, I give notice that on to-morrow I shall discuss this question, the flag question, and the candidacy of Governor Smith for the Presidency. I shall consume some time in discussing those questions. I do not propose to have this cotton bill objected to first by one Senator

and then another. It looks like a concerted effort to defeat it. I want everything that is against it to be brought out in the open. I am going to insist on doing that.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until to-morrow at 12 o'clock noon.

The motion was agreed to; and the Senate (at 5 o'clock and 15 minutes p. m.) took a recess until to-morrow, Tuesday, May 8, 1928, at 12 o'clock meridian.

## CONFIRMATIONS

*Executive nominations confirmed by the Senate May 7 (legislative day of May 3), 1928*

POSTMASTERS

IDAHO

Peter W. McRoberts, Twin Falls.

MAINE

Roy A. Evans, Kennebunk.
Lyman E. Stinson, Stonington.

NEBRASKA

William I. Tripp, Belvidere.
Hannah Price, Bennet.
Harold L. Mackey, Eustis.
Charles C. Cramer, Hardy.
Arthur H. Logan, Ponca.
Albert E. Pratt, Tobias.

SOUTH CAROLINA

Clarence L. Knight, Ellenton.
Jesse J. Glass, Trough.

## HOUSE OF REPRESENTATIVES

MONDAY, *May 7, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Again, our dear Heavenly Father, our eyes are open to the wide reaches of the impartial love of Thy providence. We thank Thee for the outlook of the day and week. Help us to bring buoyant hearts and minds to our tasks. Impress us that it is always best to seek the best and do the best. Faithfulness to principle is essential to Thy favor and to the esteem of our fellows. Direct us by Thy wisdom, give us courage to conquer every temptation and strength to rise above every failure. Keep us this day in the folds of Thy benediction, which is truth, righteousness, and peace. Amen.

The Journals of Saturday, May 5, 1928, and Sunday, May 6, 1928, were read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 444. An act for the relief of H. C. Magoon;

S. 1857. An act authorizing the Delaware & New Jersey Bridge Corporation, a corporation of the State of Delaware, domiciled at Wilmington, Del., its successors and assigns, George A. Casey, of Wilmington, Del.; Clifford R. Powell, of Mount Holly, N. J.; and Anthony J. Siracusa, of Atlantic City, N. J., their heirs, executors, administrators, or assigns, to construct, maintain, and operate a bridge across the Delaware River at or near Wilmington, Del.; and

S. 3171. An act providing for a Presidents' plaza and memorial in the city of Nashville, State of Tennessee, to Andrew Jackson, James K. Polk, and Andrew Johnson, former Presidents of the United States.

The message also announced that the Senate had passed the following resolution:

Senate Resolution 227

*Resolved*, That the Senate has heard with profound sorrow of the death of Hon. WOODBRIDGE N. FERRIS, late a Senator from the State of Michigan.

*Resolved*, That as a mark of respect to the memory of the deceased the business of the Senate be now suspended to enable his associates to pay tribute to his high character and distinguished public service.

*Resolved*, That as a further mark of respect to his memory the Senate, at the conclusion of these exercises, shall stand in recess.

*Resolved*, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

EXTENSION OF REMARKS

Mr. WHITE of Maine. Mr. Speaker, I ask unanimous consent that all Members of the House may have three legislative days within which to extend their remarks on the merchant marine bill which was passed on Saturday last.

The SPEAKER. Is there objection?

There was no objection.

THE PINK BOLLWORM

Mr. EDWARDS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a telegram from the State entomologist of Georgia upon the question of the pink bollworm.

The SPEAKER. Is there objection?

There was no objection.

Mr. EDWARDS. Mr. Speaker, the pink bollworm is a great menace and will work greater damage than the boll weevil has. It came into this country, as did the boll weevil, from Mexico. It seems our country should stay in touch with Mexico with respect to cotton pests, and since we are such close neighbors and our interest with respect to fighting cotton pests are much the same, there should be cooperation in keeping out foreign pests that might be brought in.

The pink bollworm is at the stage in this country where it can be exterminated. It will cost much less to exterminate it by establishing noncotton zones in Texas, where it has been found, than it will later cost in trying to control it.

I want to incorporate a telegram in the RECORD from our State entomologist, which is as follows:

ATLANTA, GA., *May 1, 1928.*

Hon. CHARLES G. EDWARDS, M. C.,
*Washington, D. C.:*

The agricultural workers in all Southern States believe that Buchanan resolution appropriating $5,000,000 for eradication pink bollworm should pass. You can render great service to the South and the Nation by putting your efforts behind this resolution. If it should fail of passage this session ten to fifteen million will be required one year hence.

E. LEE WORSHAM,
*State Entomologist.*

This resolution should be speedily enacted and the pink bollworm exterminated.

VOCATIONAL EDUCATION

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to extend my remarks upon the subject of vocational education.

The SPEAKER. Is there objection?

There was no objection.

Mr. REED of New York. Mr. Speaker, I wish to call the attention of my colleagues who are interested in farm relief to the bill introduced in the House by Mr. MENGES, of Pennsylvania. This bill is now in the Rules Committee. The real aim and purpose of this measure is to provide rural educational facilities that will tend to retain a larger percentage of energetic children on the farm.

Much has been done to improve rural education, but even so only about a quarter of the possible field has been touched. Rural education has been neglected until even the successful farmer has moved to the city to give his children the benefit of an education. The removal of the successful farmer from the country to the city has left either an abandoned farm behind or tenants who have little or no interest in the community and its problems. The result is to leave unprogressive mediocrity to run the farm and conduct the social and civic activities of rural society.

The city school and the rural school has each failed in its adaptability to rural needs. Moreover, the influence of both the city and rural school has been away from the farm. The school is the only agency that can turn the current of the child's interest toward rural life.

In the all too few communities where the experiment of agricultural vocational training has been tried it has been found that more than 60 per cent of the boys have engaged in agriculture as their life work.

The purpose of the Menges bill, as I have stated, is to bring this type of education into more schools throughout the country.

I want to see the boy and girl on the farm have the same educational advantages in the country to prepare them for farm life that the city boy or girl has in the city to prepare them for business or professional life. When we cheat the farm boy and girl out of the opportunity for farm vocational education we are robbing the country of its chief asset. We are injuring the basic industry of our country.

The call for boys and girls of personality, energy, capacity, convictions, and aspirations to continue this basic industry by the application of scientific knowledge and practical training is a call that is long and loud.

POSTAL RATES

Mr. GRIEST. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 12030) to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating the postal rates, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to take from the Speaker's table the bill H. R. 12030, with Senate amendments thereto, disagree to the Senate amendments, and ask for a conference.

The Clerk will report the bill.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, reserving the right to object, as I understand it the Senate makes just one amendment, substituting the 1920 rate for the 1921 rate?

Mr. GRIEST. Oh, the Senate made several amendments. They made the amendment to the second-class rate to which the gentleman refers, and an amendment to the third-class rate and to the fourth-class rate, and also made two or three other immaterial amendments.

The SPEAKER. Is there objection?

There was no objection.

The Chair appointed the following conferees: Mr. GRIEST, Mr. RAMSEYER, and Mr. BELL.

NIGHT DIFFERENTIAL IN POSTAL SERVICE

Mr. KELLY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the night differential in the Postal Service bill passed by the House, including certain excerpts from a brief prepared by the postal employees' organization.

The SPEAKER. Is there objection?

There was no objection.

Mr. KELLY. Mr. Speaker, the Sproul night differential bill (H. R. 5681), which will give deserved consideration to postal employees who are compelled to work at night, has been unanimously passed by the House. It should be enacted into law before the end of this session.

This measure is sound and salutary legislation.

It will lighten the load of night work, the greatest hardship in the Postal Service. It will automatically terminate trivial and unnecessary night work by imposing a 10 per cent additional pay factor for such work.

It will emancipate 20,000 postal employees from dreary labor in dingy quarters during the hours when recreation and rest are both natural and essential.

It will cost must less than the estimates of the department which are figured on the basis that all present night work will be continued. Its benefits will enormously outbalance even the estimates given. Its passage will be proof that no arguments can not prevail against human values.

It will add to postal efficiency, not lower it, for much of the work now performed is on circular and other mail where a few hours delay will do no harm, even though it be necessary. It will mean more output and fewer mistakes for it will put many workers on the daylight tours which are most conducive to well-being and efficiency.

It will result in a tremendous gain in health values and a lessening of the ills which accompany abnormal, unwholesome night work.

It will mean more workers enabled to live normal lives, enjoy family companionship and have opportunities for social and fraternal activities and fewer workers deprived of these advantages. It will bring joy to many wives and many little children.

It will be the accomplishment of a purpose expressed by committees of the House and Senate in three different Congresses and recommended by three Postmasters General. It will mean the attainment of a goal sought for many years by those most concerned.

It will be like a burst of sunshine to a great host of faithful employees who have been starting on their work at the time most workers have finished their labors. It will brighten many lives which have been gray, monotonous, and depressing because of continuous night tours of duty. It will transform their dejection and discouragement into energy and enthusiasm for daytime tasks.

It will give extra pay to every worker compelled by the needs of the service to work at night, and thus enable him to make up for his low condition of employment by a slightly higher standard of living. It will permit him to buy a little better food and have a little better medical treatment.

It will put all postal workers on the same plan now used for the night work of employees of the mail-bag repair shop, who are also paid from postal revenues.

It will lead later to the adoption of the principle that all night workers shall have shorter hours than those who work during the day. It will reduce night work to the minimum, and then those who perform the necessary night tasks will be given such a time differential as will conserve their health and lives. It will relieve a great many employees and will open the door for action which will relieve all from hours which, no matter what the pay, produces strained, worn, and haggard workers.

Because of what this bill is, because of its aims and purpose, because of what it will surely lead to in the future, it should be enacted into law without further delay.

Mr. Speaker, I wish to insert in the RECORD as a part of my remarks excerpts from a brief prepared by Thomas F. Flaherty, secretary-treasurer National Federation of Post Office Clerks, and William M. Collins, president Railway Mail Association, on this question of postal night work.

This brief is unquestionably the most thorough and comprehensive statement ever compiled on this subject. In it mention is made of numerous sources of additional information for those who may want to follow up certain phases of the night-work question.

The matter referred to is as follows:

THE PROBLEM OF NIGHT WORK IN THE POSTAL SERVICE

1. THE EXTENT OF NIGHT WORK IN THE POSTAL SERVICE

When most of the world's work is finished for another day; when the great majority of busy men and women have dropped their pens and their tools; when rest and recreation is the order of the day—then the activity within the post offices is just reaching its height. Post-office clerks and railway mail clerks are just beginning to make a dent in the mass of mail which stands between them and their homes. Every piece must be sorted according to its destination (6, p. 67) (the authorities referred to by number are listed at the end) and on its way to start the world's work afresh next morning.

POST-OFFICE CLERKS

In 1922 the Postmaster General reported that over 25,000 post-office clerks were working part or all of their "tours" at night, between 6 p. m. and 6 a. m. (8, pp. 3–4.) There were 56,029 post-office clerks and supervisors in first and second class post offices at that time. (25, p. 108.) So nearly every other clerk was working at night. (5, p. 8.)

Forty-two per cent of the clerks in the Chicago post office in 1922 began work at 5 p. m. or later. On top of that, 34 per cent worked from one-half to six and one-half hours at night. Only 24 per cent were on purely day tours, between 6 a. m. and 6 p. m. (6, p. 41.) In the Philadelphia post office, over 75 per cent of the clerks had to work at night.

In the Boston post office in 1922, 61 per cent of the clerks worked at night (6, p. 18):

| | |
|---|---|
| Worked 8 hours at night | 141 |
| Were in the post office 6 hours at night | 59 |
| Were in the post office 5 hours at night | 317 |
| Worked 1 to 4 hours at night | 334 |
| Worked 1 hour or less at night | 174 |
| Night workers | 1,025 |
| Day workers | 664 |
| Total number of post-office clerks | 1,689 |

At the Varick Street terminal station in New York City in the same year, 84 per cent of the 1,300 clerks worked at night (6, p. 51). In the New York City central post office there are still (1926) about 75 per cent of the clerks who put in their tours between 4 p. m. and 9 a. m.

Night work has not abated since these facts were brought out at hearings before the Senate Committee on Post Offices in 1922 (6; 5, p. 8) for nothing effective has been done to check it. The Post Office Department testifies that its peak load is between 6 and 7 in the evening (6, p. 4) and that three-quarters of the mail comes in between 5 and 10 in the evening (5, p. 8; or 140, p. 3). During the rest of the 24 hours the equipment lies almost idle. This evening peak is heaviest in the big cities (6, p. 7).

RAILWAY MAIL SERVICE

Night work in the Railway Mail Service as shown by the figures of the Post Office Department in 1924 (the last available) was as follows:

Clerks assigned to offices of superintendents and chief clerks, 786; all day work.

Clerks assigned to transfer offices, 874; 50 per cent night work.

Clerks assigned to terminal railway post offices, 3,470; 50 per cent night work.

Clerks assigned to Class A lines, 1,631; practically all day work.

Clerks assigned to Class B lines, 12,142; 60 per cent night work.

Thus it will be noted that 9,427 clerks, or slightly more than 57 per cent of the 17,243 employees of the Railway Mail Service engaged in the distribution of mail, work at night, in whole or in part. The clerks assigned to the offices of superintendents and chief clerks perform office duties in which no night work is involved, and the work of the clerks on the Class A lines (branch lines) is largely in daylight hours, though a part of such clerks do not finish their runs until 7, 8, or 9 o'clock in the evening. But in all other branches of the Railway Mail Service the percentage of night work is heavy. It will be seen that 50 per cent of transfer clerks, who supervise the dispatching and loading of mails at important railroad centers, are engaged in night work. Terminal clerks, who distribute mails at the more important railroad stations in order to save space in trains, are also engaged to the extent of 50 per cent in night work, while 60 per cent of the clerks on Class B lines are engaged in night work.

This is not only the largest and most important group in the Railway Mail Service, but their duties are the most arduous, owing to the fact that these clerks man the mail cars on the heavy trunk lines and night fast-mail trains.

"Mail early" campaigns by the post office have not cut down night work. "The results were insignificant," said the Joint Commission on the Postal Service of the Sixty-seventh Congress (9). The "distributors," who sort the mail, bear the brunt of late mailing. To help the campaign, the National Federation of Post Office Clerks, paid for "mail early" advertisements (5, pp. 8, 12). But the habits of the business public are fixed. The post-office clerks and railway-mail clerks can expect no relief from that quarter. They are dependent on Congress.

2. THE NATURE OF THE WORK

"Distributing" is grinding work to do either day or night. Mail postmarked before a certain time must be quickly sorted to catch a train leaving at a certain time. Then another batch must be made ready for another train. Then another. Mail must be "thrown" into compartments, row on row, that look just alike. The clerk's mind must not waiver. His eyes can get no rest. He is on his feet all the time. For a moment he can lean against a rest-bar and "throw" letters. Then he has to move on to other compartments (27, p. 6).

The pile of parcel-post packages has to be cleaned up the same evening. This is heavier work, but less nerve straining (27, pp. 8, 46). By midnight there is little but circulars left for the midnight shift to sort. The Post Office Department is officially of the opinion that this less important mail ought to be put off and sorted in day hours. If there were a penalty on night work, this would be done.

Many of the most important mail trains are those operating at night to handle the "peak load" of evening first-class mail and the first editions of morning daily newspapers from all large cities. From the standpoint of satisfactory postal service, the ideal mail train is one operating on a fast schedule at night, so that the mail may be distributed en route after the close of the business day and be ready for early morning delivery at the beginning of the next business day.

The work on these fast night-mail trains is extremely arduous. Added to the heavy volume of mails to be distributed under artificial light are the handicaps of unnatural hours of labor, the swaying floor of a swiftly moving car upon which the railway mail clerk must stand for long hours in distributing mail. Working under such conditions, it frequently happens that clerks on these trains suffer from train sickness, which is similar to seasickness. It is recognized that the night fast-mail train is an absolutely essential part of our postal system, but under existing departmental rules the employees who must work on such trains are required to work as many trips per annum as the workers on day trains. If a time differential for night work were established, railway-mail clerks on night-mail trains would be relieved to a certain extent by having their number of trips per annum reduced.

Eye trouble and fallen arches afflict the post-office clerks and railway-mail clerks, for they must stand up continually and continually glance from address to the rack and from the rack back to another address. The workers did not themselves realize how widespread eye strain and fallen arches were among them until the United States Public Health Service examined a thousand postal employees in New York City and Chicago. Many were told that their eyes needed glasses. Flat feet were found to be 34 per cent more frequent than in the general population, although distributers were not the only employees examined (29; 92).

What makes it worse is that night work is most common in the post offices of big cities, where life at best is a strain. City workers have less resistance. For instance, their death rate from tuberculosis for men over 35 is "enormously greater" than in the country districts (98, p. 346).

3. HOW NIGHT WORK IS ALLOCATED

Quite a large percentage of post-office clerks and railway-mail clerks perform service at night. In 1922 a census of 137 representative post offices showed that—

Eighty-two, or 60 per cent, had straight shifts.

Twenty-two, or 16 per cent, had rotating shifts.

Thirty-three, or 24 per cent, had both kinds (6, p. 68).

In the post offices and terminal railway post offices straight shifts mean that many clerks are assigned steadily at night work. The newest, youngest men are at night work or evening work. When their seniority brings them a chance at a day "tour" they seize it eagerly, but in many instances a clerk is well along in years before attaining sufficient seniority to give him a day assignment.

Where the clerks rotate from night work to day work, even the younger men now and then get a chance to work in the day and play with their fellows in the evening. But night work bulks so large that they can not hope for a straight day tour as often as every other week or every other month. In Philadelphia, in 1922, there were 4 day tours to 13 tours substantially at night (6, p. 15). In the New York City central post office in 1922 half of the clerks had four months of day work and eight months of work substantially at night (6, p. 17). They changed every two months from a day tour to an evening tour, and from there to a tour after midnight. Since then night work has abated so little that in 1926 a clerk in the New York City central post office in four shifts works twice in the evening, once after midnight and once during the day. A "day" tour, however, sometimes begins as early as 5 a. m. or lasts as late as 9.30 p. m.

4. NIGHT WORK SHOULD GO

"Night work is in all respects undesirable," decided the joint commission on Postal Service of the Sixty-seventh Congress (9). John H. Bartlett, First Assistant Postmaster General, says that of "the hardships of the service * * * perhaps the main one is the night service" (6, p. 31).

"I am not in favor of night work for anybody," says Doctor Hayhurst, consultant of the Ohio State Board of Health (104). The British Government's health of munitions workers committee engaged Doctor Vernon to study British women making munitions. He concluded that their working at night "should not be allowed in peace times" (144, p. 95). Professor Lee goes further and says night work is not "justifiable even in the emergency of war" (126, p. 70).

To be sure, the post office can not function efficiently without some night work. But if post-office clerks and railway-mail clerks who work at night are given a time allowance, if their tours are shortened a little, then this load of night work will be a little more easy to carry. And, what is more, it will not come around to them as often as it does now, or to so many of them. Night work can be cut down if there is an inducement to cut it down. The Post Office Department once thought it could not get along without overtime work. In 1913 Congress decided that the post office should pay for overtime. Since then overtime has nearly disappeared. The postmasters think now that they can not reduce night work any further. If it is penalized by a time allowance they will undoubtedly find a way to reduce it; for example, by more strictly postponing the handling of circulars and other less important mail till the morning after it is received.

A time allowance is a system under which 45 or 50 minutes' work done after 6 p. m. counts for an hour toward the established eight-hour shift.

The time allowance does not mean that every hour is shortened, but only those worked between 6 p. m. and 6 a. m. A typical case would be that of a clerk who might work four ordinary hours before 6 p. m. and four shortened hours in the evening. A time allowance affects only that part of a shift which comes within the hours defined as night hours. It is a flexible system. No matter what fraction of a "tour" falls after 6 p. m., it is a simple matter to make the proper allowance for the burdensome night hours.

5. WHO IS AGAINST NIGHT WORK?

Medical experts, efficiency experts, industries, governments all over the world, congressional committees, postmasters, post-office clerks, railway-mail clerks—they are all called as witnesses against night work in the pages that follow.

II

THE HARM NIGHT WORK DOES TO THE CLERKS

1. POST-OFFICE WORK STRAINS THE EYES

When men become postal clerks 92.7 per cent of them have normal vision in one eye or both eyes. When they have been at work six months only 79 per cent of them still have it. When they have been at work three years only 71 per cent still have it. In those two and a half years the number with normal vision drops off 10 per cent. If they are employed in intensive eye work, as letter separators are, the number with normal vision drops off still more sharply—13 per cent. Persons with defective sight are not usually eligible for the Postal Service (10), and persons entering the service average 92.7 per cent

normal vision. But after they take up postal work their eyesight falls off so much that only 62.4 per cent of the indoor postal employees are normal in one eye or both eyes. The only occupations that are harder on the eyes than indoor postal work are the garment and chemical industries. Normal vision is 42 per cent more frequent among cement workers than among postal clerks.

These facts were reported in 1923 by the United States Public Health Service (27, pp. 49–63). They examined the eyes of two-thirds of the indoor workers at the City Hall Station and at the general post office in New York City. They made 2,449 examinations. Four-fifths of the workers examined were white males, so figures are given here only for white males. After the age of 45 a man's vision drops off anyway, irrespective of occupation. So to be safe we disregard employees over 45, who are about one-fifth of the workers examined. Normal vision is defined as twenty-twentieths or better.

The eyes of night workers deteriorate more than the eyes of day workers. The letter separators, who are used for night work more than the average indoor postal employee, suffer most heavily. Of the 2,449 employees examined, 45 per cent were letter separators, or else newspaper separators, whose eye work is nearly as intensive as that of the letter separators. The report says:

"A letter separator reads on the average between 30 and 40 addresses a minute. His work may require adjustment of both the external and the internal muscles of his eyes 80 times a minute. If the intensity of light on the letter is different from the intensity of light on the case, he has to adjust his eyes not only for distance but also for difference in illumination." (27, p. 45.)

2. POST-OFFICE WORK IS UNHEALTHY

Congress can not disregard the health of Government workers. They are its wards. It should not ask them to continue year in and year out at night work which undermines their health, unless it is ready to ease the load by a time allowance for hours put in at night. The post-office clerks and railway-mail clerks who work nights have an elemental human right to health. At the same time the Postal Service can not afford to allow the health of its personnel, who keep the mail moving, to deteriorate.

Post-office employees are not up to the physical standard of the average man in other respects besides eye troubles. They are not as healthy after a period of service despite the fact that they must pass a medical examination to get their jobs. An applicant is rejected if he has a fallen or misplaced arch in his foot, a rupture, hardening of the arteries, or an uncompensated organic disease of the heart (10). Nevertheless, the effect of postal work, much of which is night work, is to make these and other impairments more frequent among postal employees than among the general population. The United States Public Health Service determined this when they examined 985 postal employees a few years ago. (29, 9.) The workers who volunteered for examination were actively employed and apparently in good health. Nevertheless, the Public Health Service found the following physical defects per 1,000 men:

| Defects | General population | Postal employees | Excess in post office |
|---|---|---|---|
| | | | *Per cent* |
| Heart disturbances | 97 | 187 | 93 |
| Rupture (hernia) | 51 | 80 | 57 |
| Dilation of serotal veins (varicocele) | 81 | 110 | 36 |
| Flat feet | 164 | 220 | 34 |
| Hardening of the arteries | 195 | 250 | 28 |

Compared with garment workers, postal employees have three to nine times as many cases of—

Diseases of the circulatory system.

Hardening of the arteries (arteriosclerosis).

Aortic diseases.

Mitral diseases.

Tricuspid diseases.

Myocarditis.

They have a much higher rate than garment workers for—

Dilation of the sciotal veins (varicocele).

Varicose veins (29).

There is a "high ratio of impairment" among postal employees, says Doctor Fisk, medical director of the Life Extension Institute (96). He bases this on the impairments which the Public Health Service found. Of 1,000 postal workers—

One hundred and forty-two had serious physical defects requiring immediate medical or surgical attention.

Two hundred and thirty-four had advanced physical impairments requiring systematic medical or surgical attention.

Three hundred and forty-one had moderate defects requiring medical supervision as well as hygienic correction.

Two hundred and sixty-one had moderate defects requiring hygienic correction or minor medical, surgical, or dental attention.

Twelve had minor defects requiring observation or attention.

Five had no physical defects.

3. ALL NIGHT WORK IS UNWHOLESOME

The low health record of postal employees is only to be expected for a group laboring under unrelieved night work (84, pp. 75–113; pp. 3, 8, 10–13). City letter carriers who rarely work at night were included in the examination (except eye examinations). If they had not been included the health record would have been much blacker for the remaining workers—the post-office clerks—for they do the work at night.

There is a consensus of opinion that night work is unhealthy, and this is "supported by incontestable evidence," says Professor Lee. He adds that only "exceptional circumstances" will justify men's working at night, for "it is unnatural, unphysiological, and abnormal, and must ever remain so" (126, pp. 68, 72). The next pages give the medical case against night work.

4. THE NORMAL CONDITIONS WHICH THE NIGHT WORKER'S BODY NEEDS

While a man works his nerves and muscles are wearing down. Fatigue wastes are the result. They pile up in his body. This process begins even before he feels tired (14, p. 34). There is fatigue or breaking down even when a person rests. But when he works the amount of poisonous wastes rises. He breathes out twice as much carbon dioxide as before (103, p. 265).

The work of post-office clerks and railway-mail clerks causes heavy accumulations of fatigue wastes. The effort of the muscles in standing up and in continually "throwing" mail is part of this. But the work is especially a great strain on the nerves. And fatigue is chiefly fatigue of the nervous system (14, p. 36). The work is monotonous, and the monotony of doing the same thing over and over and over "is a true factor in inducing fatigue," says Miss Goldmark. It wears down the nerves. She adds that even "the monotony of so-called light and easy work may thus be more damaging to the organism than heavier work which gives some chance for variety" (103, pp. 67, 68).

This wearing-down process in the body must be balanced by building up. Under ordinary conditions the body will rebuild itself silently (103, p. 13). But if there is too much breaking down or too little building up the result is a physical deficit. If the deficit comes regularly, work night after work night, the outcome is physical bankruptcy. Then the body begins to protest loudly in tiredness and disease. The facts about the health of postal employees which have been presented indicate roughly how near many post-office clerks and railway-mail clerks are to physical bankruptcy. The figures do not, however, show the amount of piled-up fatigue that is still hidden and has not yet come out openly in disease (14, p. 129). And the Public Health Service could not include in its study the employees who had dropped out because the night work was too wearing.

Sleep is the most important thing needed to build up again the nerves that fatigue has worn down (84, pp. 26–46). There is no substitute for sleep (103, p. 281). Doctor Kraft, the Swiss physiologist, says:

"Men as well as animals die sooner of lack of sleep than they do of hunger. * * * We may consider that we have experimental proof, corroborated by much general experience, of the fact that the deprivation of * * * sleep is sure to bring on severe and lasting injuries" (123).

There is much similar testimony; for instance, from Doctor Carozzi, in Italy (88, p. 80); Doctor Sterling, in England (139), and Hough and Sedgwick, in the United States (110).

Sunlight is the second most important thing in the continuous rebuilding of the body (84, pp. 47–59; 62; 104). Professor Lee says: "Man's body needs the stimulus of sunlight and is adapted to the atmospheric conditions of the day" (126, p. 61).

Collis and Greenwood say that daylight "stimulates a healthy skin reaction and exerts a beneficial effect."

They add that sunlight tends to kill most germs:

"The more daylight, therefore, there is in the rooms where workers are congregated together, the less is the chance of the spread of infectious diseases and the better will be their general health" (89, pp. 314–315).

Daylight is just what night workers do not get.

5. THE NIGHT WORKER WORKS UNDER ABNORMAL CONDITIONS

The strain of industrial work is heaviest for the night worker. He especially is likely to run up a physical deficit and not be able to rebuild what has worn down in his body. The evidence for this lies in the results of night work. At night output is less, and spoiled work, lost time, and accidents are more frequent.

The first reason for the night worker's bodily deficit is the "medical commonplace" (144, p. 97), that night work is more tiring than daywork. In France, for example, Professor Proust concurs in this (135), and in Germany Doctor Herkner (107).

The high accident rate at night shows that night work creates abnormal fatigue.

When a post office has rotating shifts, as in New York City, the night workers very often do not get the full benefit of their occasional day shift because even in the daytime much of the work is done by artificial light, and so even their daywork is abnormally fatiguing, though night work is much more so. Examples of post offices that have to use artificial light are given in the report which the Public Health Service put

out in 1923 (27, pp. 31–43). On the first floor of the general post office in New York City 19 locations at which post-office clerks work had no natural lighting even in the daytime. In 13 other locations there was part natural and part artificial lighting. In no place was natural light alone enough. In the basement only five places had part natural lighting. The other 21 had only artificial light. At the City Hall postal station in New York City the amount of natural light was insignificant.

*Foot-candles of light in city-hall post office*

| Floor | Artificial | Natural |
|---|---|---|
| Basement | 4.2 | 0.0 |
| First floor | 3.8 | .7 |
| Mezzanine | 2.6 | .1 |

A very small number of the post-office clerks and laborers at the two stations worked solely under natural light, even during the daytime:

| Daytime lighting | City hall | General |
|---|---|---|
| | *Per cent* | *Per cent* |
| Artificial light all the time | 87.3 | 27.4 |
| Part artificial and part natural | 9.4 | 42.8 |
| Natural light all the time | 3.3 | 29.7 |
| Total clerks and laborers: | | |
| In per cent | 100 | 99.9 |
| In numbers | 883 | 2,276 |

The use of artificial light during the day and the fatigue it brings can not easily be escaped, for most post offices will not wear out for a long time. Even when they do, natural light will still be hard to get in a crowded city. The burden of this unfortunate condition should not be shifted to the post-office clerks and railway-mail clerks.

Bad lighting for night work (and day work) increases the fatigue of the clerks (89, p. 317; 14, p. 98). Either too little light or too much glare means many eye adjustments and greater eye fatigue (27, pp. 45–46). The lighting of post offices has been much bettered in recent years. But to the extent that it falls short of good natural lighting it entitles the workers to special consideration. As recently as 1923, the Public Health Service reported that of 127 post offices to New York City, Brooklyn, Philadelphia, Boston, Detroit, and Chicago only—

Sixty-three per cent had adequate natural lighting, 57 per cent had adequate artificial lighting, 34 per cent had both sorts adequate, and 15.7 per cent used gas for their artificial lighting (27, pp. 2–3).

They added that the lighting in the City Hall Station and the general post office in New York City "is generally below that of the requirements of the State codes of lighting and is generally lower than the mean illumination furnished employees doing similar work in private industries" (27, p. 103).

Night work is more tiring not only because artificial light is used, but also because "it imposes on a physiological organism attuned to one sequence of events a different and abnormal sequence" (126, pp. 70–72). The body varies its heat so as to allow for greater activity during the day. Under night work its habits can be "modified, but not reversed" (61, p. 27).

8. THE NIGHT WORKER IS CUT OFF FROM NORMAL SOCIAL CONTACTS

When men work at night they do not get a chance to live. The British health of munitions workers committee warned that "social intercourse, recreation, and amusement may be seriously interfered with. Suitable opportunities for attendance at instruction are impossible, unless special facilities are allowed" (14, p. 98).

The post-office clerks and the railway-mail clerks have a right to recreation (104). Amusement facilities center in the evening. This is just when most of these men are at work or perhaps returning hungry from work. They have a right to education. Workers' education projects are all arranged for day workers (84, pp. 263, 275). They have a right to home life (84, pp. 255–256). "The night work very largely interferes with family life," the Joint Commission on the Postal Service reported to the Sixty-seventh Congress (9). As early as 1887 the Swiss factory inspector reported that with night work, "the number of meals necessary in the family budget is increased, extra cooking must be done, and the family order and system are disjointed. Night product is inferior * * *. Switzerland does not hesitate to condemn night work, and she has put a stop to it even in many industries where other countries regard it as indispensable (137; or 84, p. 260).

Night work interferes with the clerks' right to adequate and well-timed leisure in which they can associate with their fellow man (104).

The clerks need leisure so that they shall not fall behind physically, and so that they may have life more abundantly. But in the large cities "the postal employees are either obliged to travel to distant suburbs to secure the advantages of desirable dwellings, or else dwell in crowded tenements. * * * When they have to travel to distant suburbs they find the means of transportation infrequent at the very time they would utilize them, and they thus lose much of their leisure time, and make the journey at considerable inconvenience." (Joint Commission on the Postal Service, 67th Cong., 9; 103, p. 143.)

Leisure hours are also eaten into, because "the great majority of post-office clerks are under the constant necessity of studying so-called 'schemes' of mail distribution. These 'schemes' consist of the names of thousands of post offices in every State in the country. These 'schemes' indicate the railway train that will carry the mail to these thousands of post offices.

"The average post-office clerk is compelled to memorize and carry in his head anywhere from 3,000 to 10,000 names of different post offices." (House Post Office Committee, unanimous report in the 64th Cong. (2; or 5, p. 3).)

The post-office clerk or railway-mail clerk may not be immediately concerned over the gradual deterioration of his health. But he is keenly aware that he is cut off from social contacts. The new clerks are assigned to night jobs most often. They are young and the lack of social opportunities irks them especially. Their morale suffers as a result. Output depends on morale. Doctor Fisk says that output is hindered by "mental poison such as home worries, suppressed or thwarted emotions or aspirations. * * *" (91, pp. 442–443, 359–360; 61, p. 27; or 84, p. 4.)

In his annual report to the first session of the Sixty-ninth Congress Postmaster General New said of the undesirability of night work:

"Naturally night duty is regarded as more irksome and undesirable than day work, as it deprives employees of social life in the evenings and keeps them from their families at night. It is believed, therefore, that this matter should have serious consideration and some compensation provided for it." (25, p. 17.)

5. NIGHT WORK MAKES IT HARD TO GET GOOD MEN

The Postal Service needs a steady supply of capable young men. Else the mails are held up. The pay and the work of post-office clerks and railway-mail clerks are not so attractive that men will shut their eyes to the discomforts and dangers of the night work which the service demands of them. And with the night work in mind the decision is too often against the service (141, pp. 4–5; 6, p. 7).

Also resignations result from night work. Often clerks quit before they have learned enough to earn their pay. Or if they have acquired skill in sorting letters and have learned the "schemes" of distribution, all this skill is lost to the service when they quit because of the night work. In any case the service has to find a new man to replace the old one whom the attractions of day work have taken away. The service, then, has to pay the cost of breaking in the new man (6, p. 7).

Responsibility for resignations can be laid largely to night work. The United States Public Health Service studied two large plants during the war. In one plant the departments which involved night work had a labor turnover 23 per cent greater than the average. In the other it was 6 per cent greater (26, or 98, pp. 164–165).

An English study of the women working in a biscuit factory showed that the largest labor turnover was among the night workers (113, or 98, p. 162):

| Reasons for quitting | Yearly per cent of turnover | | Night exceeds day |
|---|---|---|---|
| | Day shift | Night shift | |
| Single women: | | | *Per cent* |
| All reasons | 88.7 | 153.6 | 73 |
| Ill health and physical disability | 20.6 | 43.8 | 113 |
| Dissatisfaction | 36.9 | 62.7 | 70 |
| Married women: | | | |
| All reasons | 142.3 | 204.3 | 44 |
| Ill health and physical disability | 44.4 | 62.3 | 40 |
| Dissatisfaction | 33.0 | 58.0 | 76 |

So it is not surprising to find that night work increases the resignations in the Postal Service. The city mail carriers do little night work. Their resignation rate is low. The city post-office clerks who do night work have a resignation rate of 183 per cent higher than the carriers (25; pp. 16, 39, 108), as shown by the table below:

*Comparative resignation rates of postal employees*

| Division of service | Employees, June 30, 1925 | Resignations, fiscal year, 1925 | Per cent of resignations | Relative to carriers' rate |
|---|---|---|---|---|
| City carriers | 46,251 | 667 | 1.44 | 100 |
| City post office clerks | 65,071 | 2,658 | 4.08 | 283 |

6. NIGHT WORK MAKES IT HARD TO GET GOOD WILL

The Postal Service needs the good will of the clerks. If they are disgruntled their work suffers. The night work is "in ill favor with the employees," reported the Joint Commission on the Postal Service to

the Sixty-seventh Congress (9). This remains true because there is no time allowance to offset the evils of working at night. To the postmasters it presents a very hard problem. They feel that the morale of the post-office clerks and railway mail clerks is sapped by night work as it stands. In 1922 the Post Office Department took a census of the postmasters' opinions on night work (6, pp. 22–30):

Ninety-two postmasters from among the 100 largest post offices answered.

Forty-four, or 48 per cent, stressed the fact that night work lowers morale and output.

Seventy-six, or 83 per cent, said that the solution was special conditions for night work.

Forty-seven, or 51 per cent, said that the solution was a time allowance for night work.

Some of them were also disturbed by the ill effects of night work on health, social life, and labor turnover.

INDUSTRIES THAT HAVE GIVEN NIGHT WORKERS THEIR RIGHTS

1. NIGHT WORK IS INFREQUENT BECAUSE IT IS NOT ECONOMICAL

Night work is not popular in the United States, nor anywhere else. It is true that a factory cuts down its overhead cost if its plant and machinery are not idle at night. But this has not made night work popular even with employers. Its counterbalancing costs to the company and to the workers are too great. It is true that methods of artificial lighting have been enormously improved. But this has not made night work prevalent, as Doctor Frankel, of the post-office welfare division, points out. (5, p. 12.) It prevails only in continuous process industries and in seasonal industries. Collis and Greenwood say that it is so infrequent because leaders of industry are fast coming to see that "optimum output is obtained not by allowing fatigue to exceed physiological limits; that the goal of economists—output—can be best attained through the same agencies as allow the medical man to obtain his objective—health." (89, p. 79.)

As long ago as 1907 a South Carolina State bulletin reported that none of the big cotton mills ran at night any more since "it seems to be generally regarded as a losing proposition to undertake night work." (36; or 84, p. 309.)

The book and job printing industry, at its center in New York City, has an agreement with its electrotypers that they shall not be asked to work at night.

The German wood-working industry signed a national collective agreement in 1921 which forbade work between 5 p. m. and 7 a. m. for 430,000 workers. In 1922 the German building industry also signed an agreement forbidding night work for 350,000 workers. (38, pp. 25–26.) The Dutch printing industry allows night work only for morning newspapers. (43, p. 28.)

In the 1890's many countries in Europe supplemented the laws against night work for women by laws against night work for men. (84, pp. 316–323.) To know how to proceed, Belgium in 1898 made a study of how existing night work laws had functioned. The investigators discovered that employers felt the laws had made great improvement. England reported that no one wished to repeal the law. France reported that the opposition of the manufacturers was gradually disappearing. Switzerland reported unanimous approval for the law of 1877, one section of which prohibited night work. The Swiss leaders of industry had found that "night production is very inferior both in quality and in quantity to daytime production; and it is much more costly."

Austria reported sentiment among the employers in favor of extending the rules to forbid night work for men. (72, pp. 43, 69, 85, 120, 169; or 84, pp. 277–280, 316–317.)

2. ALLOWANCES FOR NIGHT WORKERS ARE USUAL

It is customary for night workers to receive special consideration in return for the special hazards and discomforts of night work, particularly when there is just as much work to be done at night as there is on the day shift. In such cases the undesirability of night work is allowed for in the scale of wages or hours or both. The Postal Service and the Railway Mail Service are in startling contrast to private industries, for in these services the evening work is more intense than the day work, and yet there are no special conditions allowed the workers.

The British postal service at one time allowed any 7 hours worked between 10 p. m. and 6 a. m. to count as 8 hours. This system of time allowance worked so well that the period was made to begin at 8 p. m. (6, p. 83.)

The New York City book-and-job printing industry works only 44 hours a week on daywork, but for night work the hours are only 40, and in addition the night pay is $3 a week more. On the third shift, after midnight, typographers work only 35 hours and get $6 more a week. Pressmen, feeders, sheet straighteners, and paper handlers work only 32½ hours on the third shift. The foreign-language typographers work very short hours at night. Their largest group, the Bohemian-Slavonic, works only 36 hours at night and gets $3 a week more pay at night in both newspaper and book-and-job printing (118; or 21, p. 840.)

The entire newspaper-printing industry of the United States averages shorter hours at night than in the day. On top of that, the pay for an hour worked at night more than makes up for the fact that fewer hours are worked, so that night workers in addition to shorter hours get more pay per week than day workers do. The average union scales for 1925, computed by the United States Bureau of Labor Statistics (22, p. 985), show the following percentage allowances in favor of night workers:

| United States newspapers crafts | Night allowances | |
|---|---|---|
| | Hours per week | Pay per hour |
| | *Per cent* | *Per cent* |
| Web pressmen | 10 | 17 |
| Stereotypers | 10 | 17 |
| Photo-engravers | 5 | 18 |
| Hand compositors | 2 | 10 |
| Machinists | 1 | 12 |
| Machine operators (time-work) | 1 | 9 |

In the Australian printing industry (22, p. 1256) the daywork calls for only 44 hours a week, but the prevailing week for night work is only 42 hours. Besides weekly pay is higher for night work than it is for daywork:

| Craft | Melbourne | Sydney |
|---|---|---|
| | *Per cent* | *Per cent* |
| Proof readers | 20 | 13 |
| Machinists | 15 | 9 |
| Compositors | 10 | 9 |
| Stereotypers | 9 | 5 |

In South Africa, too, the typesetting-machine operators work only 43 hours a week on day work, but only 40 hours on night work. In addition, they get 10 per cent more pay a week (79, p. 254).

In London the printers work 48 hours a week on day work, but only 42 on night work (40, p. 22). In South Africa the prevailing hours in printing and bookbinding are 46 on day work (43 for machine typesetters) and 40 on night work (79, p. 254). In Switzerland the hours in newspaper printing are 8 a day, but if as many as 4 of the hours fall between 7 p. m. and 6 a. m. the shift is only 7 hours (42, p. 21). In Italy the machine typesetters in Bergamo who work three shifts have an 8-hour day shift, but only 7 hours on the night shifts (41, p. 33). In Great Britain the cloth bleaching, dyeing, and printing trade works 48 hours on daywork and only 43¾ on nightwork (47, p. 79). The prevailing hours in Mexico are 8 in the day and 7½ at night (19, p. 889).

When night workers are not given a time allowance, the hazards and discomforts of night work are recognized in another way—by extra pay for the night shift. The Federal Government is now paying workers at the Government Printing Office an allowance of 20 per cent extra for work done between 5 p. m. and 8 a. m. It is paying workers at the arsenals and the mail-bag repair shop an allowance of 10 per cent more for night work, and at the navy yards 5 per cent (5, p. 4). But as yet there is no allowance for post-office clerks and railway mail clerks.

The Federal War Labor Board recognized the hardships of night work and regularly awarded night workers an allowance of 5 per cent more than the day rate (5, p. 9). The telephone companies of the United States have a policy of giving night workers a pay allowance. The Morse telegraph operators have an agreement that provides for night rates more than 20 per cent higher than the day rates (20, pp. 73–74).

The typographical workers of the United States regularly get a higher scale for night work than for daywork (118). For instance:

*Weekly night-pay allowances for hand compositors in the 10 largest cities in the United States*

| City | Number of union members | Night differential | |
|---|---|---|---|
| | | Book and job printing | Newspaper printing |
| New York City | 9,684 | $3.00 | $3.00 |
| Chicago | 5,346 | 4.00 | 5.00 |
| Philadelphia | 1,187 | 4.55 | 3.00 |
| Detroit | 830 | 2.20 | 2.94–3.36 |
| Cleveland | 837 | 4.00 | 5.20 |
| St. Louis | 1,272 | 2.20 | 5.00 |
| Boston | 1,849 | 5.72 | 1.76 |
| Baltimore | 732 | 3.00 | 3.00 |
| Pittsburgh | 726 | 3.00 | 3.00 |
| Los Angeles | 929 | 3.00 | 3.00 |

The machine typesetters' allowances are the same or nearly the same as these handwork allowances. The average union scale in the United

States for machine typesetters on piece work is 7 per cent higher for night work than for day (22, p. 985). The third shift, after midnight, often has still further allowances. The book and job typographers in New York City work only 35 hours on the third shift, instead of 44, and get $6 more a week. In Detroit they get a pay allowance of $7.80–$9.80 a week. The newspaper typographers in Philadelphia work 42 hours on the third shift instead of 48 and get $66 instead of $42 a week. In Detroit they get a pay allowance of $10.08–$11.52 a week. In Cleveland they work 42 hours instead of 45 and get $6.75 allowance. In Boston they get $3.52 allowance (118).

In Belgium the printing and bookbinding industry has special rates for work between 7 p. m. and 7 a. m. Up to 9 p. m. there is a pay allowance of 20 per cent extra and after that 50 per cent (39, p. 24). In Dutch breweries any work done after 6 p. m. is paid 50 per cent extra, or where there is a regular night shift it is paid 25 per cent extra after 10 p. m. (43, p. 28). The Government Railways of Japan give pay allowances for night work (77, pp. 1–2).

It is a common practice in Europe to recognize the hazards of night work by paying higher rates for overtime work done at night than for overtime during the day. The rate often rises as high as 100 per cent extra for late night work. The International Labor Office has published rates of this sort for Italy, Switzerland, Holland, and Czechoslovakia (41, pp. 18, 26, 28, 33–34; 42, p. 21; 43; 44, pp. 26–32, 37–38, 44).

### 3. THE CLERKS SHOULD HAVE THE CUSTOMARY ALLOWANCE

It appears from this mass of evidence that it is well recognized that when there has to be night work the night workers should have special conditions of labor. The most prominent example is the printing industry all over the world. The work of post-office clerks and railway-mail clerks is much like the work of typographers. It is just as hard on the eyes and on health in general, and there is the additional strain of constantly standing. The printers have won relief through their collective action. The clerks, however, are in Government service. The charters of the National Federation of Post Office Clerks and of the Railway Mail Association stipulate that there shall be no strikes. The clerks depend on action by Congress. So far they have had no relief from the hardships of their work at night, with the result that the standards of life of two large groups of employees of the United States remain below the standards of life of employees of privately owned industries.

## V

### GOVERNMENTS THAT GIVE NIGHT WORKERS THEIR RIGHTS

All civilized nations recognize that night work is undesirable (61 or 84, p. 291). Many have forbidden it by law. In 1919 Holland, Switzerland, and Czechoslovakia passed laws which prohibited night work for both men and women (43, pp. 9–10; 117 v. 14, p. 207; 44, p. 9). Belgium followed in 1921 and Portugal in 1925 (47, p. 405; 22, p. 1260). Great Britain forbids stores to stay open at night, and in 1925 the Argentine and Dominican Republics did so, too (53, p. 173; 23, pp. 120–121). In 1923 Belgium restricted the ordinary working day in brickmaking to the hours between 5 a. m. and 7 p. m. (54, p. 383).

Baking has always furnished an outstanding case of night work and its ill effects on the workers. Night work was abolished for baking in—

1906 in Norway.
1908 in Switzerland (Tessin), Italy, and Finland.
1912 in Denmark and Greece.
1918 in Uruguay.
1919 in Germany, Czechoslovakia, France, Austria, Spain, Holland, Sweden, and Poland.
1921 in Belgium.
1923 in Hungary (57).

At the 1924 conference of the International Labor Organization, which has 57 governments as members, the vote was 73 to 15 in favor of an international convention against night work for bakers. On June 8, 1925, a second vote made the convention official (20, pp. 177, 181; 52, p. 119). Each of the 57 governments has passed a law against night work to conform with the convention or is about to do it.

Although laws against night work for men have reached a tremendous proportion, most night-work legislation has confined itself to forbidding night work for women. The reason for this has been that the dangers of night work are more apparent in the case of women. The pitiable effects of night work on women who were bearing children were more obvious than the slow deterioration of men under night work. The wife seemed more urgently needed at home to keep the family together and to rear the children. (90 or 31, p. 68; 74 or 103, p. 266.) Men could win for themselves relief from night work or better conditions during the night shift. Women, it seemed, could not protect themselves as well, and so they needed laws to protect them.

When the legislature of a civilized country became convinced of the evils of night work it usually undertook to remedy first that situation which seemed to need remedying most. The result was "women and children first." The man power of the country, also important, had to take its chances.

The men were often able to meet the situation and win some freedom from night work by organizing. If it is impossible to fight bad working conditions in this way, says Professor Freund of police power fame:

"If for any reason such organization is impossible or ineffective, the right of the State to exert its power can not in reason be disputed. (100; or 91, p. 828.)

The State has exerted it for women, where organization is ineffective. The State has forbidden them to work at night almost everywhere.

But the State has not yet exerted this right on behalf of the post-office clerks and railway-mail clerks, whose organizations forbid them to win relief from night work for themselves, since they are public servants. The duty of Congress to protect them from suffering for this devotion to the public service "can not in reason be disputed."

The history of the gradual legal recognition by civilized countries of the hazards of night work covers nearly a century. In 1833 England forbade night work for children, and in 1844 it forbade it for women between 5.30 p. m. and 5.30 a. m. Others followed:

NIGHT WORK LAWS BEFORE 1906

1844. England.
1864. Switzerland (Glaris), men and women.
1877. Switzerland (federal law), men and women.
1881. New Zealand.
1885. Austria.
1889. Netherlands.
1890. Massachusetts.
1891. Germany.
1892. France.
1902. Italy. (83, pp. viii, 344.)

The International Congress of Hygiene and Demography, which met in Vienna in 1887, resolved that "the limitation of working hours, and above all the prohibition of night work, must be demanded on grounds both of health and of morals." (83, p. ix.)

An international conference on night work which met in Berlin in 1890 was officially attended by 14 European powers. It voted in favor of prohibiting night work for women. (120; or 83, p. ix.)

In 1906 a conference of 14 European powers met at Berne, Switzerland, and agreed upon the Berne convention. It provided for 11 consecutive hours' rest at night in all industrial undertakings of more than 10 workers. These hours were to include the seven hours between 10 p. m. and 5 a. m. Many of the powers already had laws more stringent than this. The others proceeded to bring their laws up to this standard, and on January 14, 1914, the convention was completely in force. Some of the powers made their laws more stringent than the convention required. (83; 87; 117; vol. 2, pp. 38, 389; vol. 3, p. 335; vol. 5, p. 236; vol. 6, p. 156; vol. 7, pp. 26, 47, 265; vol. 10, p. 14.) The convention took in "colonies, possessions, or protectorates" (art. 6). So Great Britain extended its rule to Ceylon, the Fiji Islands, Gibraltar, the Gold Coast, the Leeward Islands, New Zealand, Northern Nigeria, Trinidad, and the Uganda Protectorate. France extended them to Martinique, Guadaloupe, and Reunion. (117, vol. 11, p. 74.)

Many powers which had not signed the convention passed laws while the signers were doing it. (117.) Serbia, Greece, Liechtenstein, and Bosnia and Herzegovina passed laws that went beyond the standards of the Berne convention. Legislation against night work was also put through in Bulgaria, Greece, Russia (textiles), India, Japan, Canadian Provinces, the Australian States, and the Argentine (Buenos Aires).

The restrictions on night work for women had become widespread when the World War began. The warring countries often relaxed these restrictions in order to get more output. But the "economic, physical, and moral disabilities" of night work were still there (14, p. 56), and the British war cabinet committee on women in industry said that "much of this relaxation was found to be uneconomical and baneful" (64).

Even before the end of the war many of the restrictions were put back. Where they were not restored it was because the governments felt it necessary to take "a short and not a long view of the subject" (61, p. 26).

In 1919, 30 powers met in the International Labor Conference at Washington and adopted the terms of the Berne convention against night work, but applied them to all public and private undertakings, however small. The Washington convention came into force on June 21, 1921 (37, p. 102). By October, 1925, appropriate laws had been passed and the convention had been ratified by 16 powers (58): Austria, Belgium, Bulgaria, Czechoslovakia, Estonia, France, Great Britain, Greece, Hungary, India, Irish Free State, Italy, Netherlands, Rumania, South Africa, and Switzerland.

The administrations in seven countries had recommended the convention to the legislatures: Argentina, Brazil, Denmark, Germany, Latvia, Lithuania, and Spain.

Three powers had passed appropriate laws, but had not yet ratified: Japan, Poland, and Serb-Croat-Slovene Kingdom.

Four other powers had legislation in progress or in preparation: Bolivia, Norway, Portugal, and Uruguay.

**The Berne convention still governs: Sweden, Luxemburg, and Danzig.**

The world is almost unanimous in condemning night work. All Europe, except Finland, Monaco, Albania, and Turkey forbids it for

women, and many of the laws include men. In Asia, India and Japan forbid night work for women; in Africa, Tunis, Algeria, the Union of South Africa, Uganda, Northern Nigeria, and the Gold Coast; in the Pacific, the Australian States and New Zealand; in North America, 16 of the United States, Mexico, and the Canadian Provinces (except the Yukon and Prince Edward Island, which are not industrial); in Central America, a separate international convention between Costa Rica, Guatemala, Honduras, Nicaragua, and Salvador; in South America, the Argentine and Brazil (partial), and Bolivia and Chile have undertaken legislation which will forbid all night work for women.

In the United States there are in 1926 laws forbidding night work for women in various occupations in 16 States and 1 Territory: California, Connecticut, Delaware, Indiana, Kansas, Massachusetts, Nebraska, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, South Carolina, Washington, Wisconsin, and Port Rico (24).

State laws, however, can never affect the situation of the Federal post-office clerks and railway-mail clerks, even though they work within State limits. The responsibility remains with Congress, and Congress should not disregard the fact that the votes of almost all the other lawmaking bodies in the world condemn night work.

Mr. Speaker, I also desire to incorporate in my remarks a speech on the night work subject made by Thomas J. Mitchell, post-office clerk, Kansas City, Mo., who is president of Local No. 67, National Federation of Post Office Clerks. Mr. Mitchell has made an intensive study of the problem of night work and his views are the result of many years practical experience in post-office employment. It is as follows:

NIGHT WORK

After all that has been orated or pictured by graphic pen, not half has been written that comes from the experience of men and women who actually perform work during these unnatural hours.

Men are deprived of social intercourse, family association, evenings at home, talking with wife, and romping with children.

Home, a consecrated hearthstone, an institution that welds the ribs of State, launches all government functions worth while, gives life and power to effectually sail the turbulent sea of life, no matter how fierce

the outward elements rage. Home is the haven of all havens where weary hearts or buoyant hearts can with one accord commune together.

Impair this institution, lift one arrow and thrust it into this sacred institution, and you have belamed all. Yea, the poisoned instrument, "night work," aims at the hallowed place of thousands of postal workers.

In my city—industrial center that it is—stores, stock exchange, board of trade, what conditions do you find? Men and women arise when the life of the day lays aside his night robe, peeks up from the Eastern horizon and with one sweep of his rays gilds the world with glory and life, and the men of the soil with one common assent say, "His morning rays give greatest strength to man and vegetation."

We see this waking people busy in their daily toil and at 5 or 6 o'clock return to their homes. Father with rustic face, children playing around his knees and mother singing lullabys to the baby at her breast.

Ah, then, I want to go to Washington, D. C. Go into that silent cemetery with spade in hand, resurrect that body, speak life to that mortal remains, place him on sacred ground, call for the loveliest maiden in all the world, bid her clasp him to her breast and plant the everlasting kiss of affection upon the brow of John Howard Payne, and call him blessed; then with one accord let the choir assembled peal out that matchless melody, "Home, Sweet Home."

But we have to return to these places of daily activity. After 6 p. m. what do we find? A silent watchman blowing the smoke from his cob pipe with a snarling bulldog or a bob-tailed Airedale following behind him as he makes his round? No; there is one man left in the building. He rushed out at 6.30 p. m., and the watchman, after hushing the growl of his faithful dog, asks: "What makes you so late?" The man replies, "I was assembling some invoices I wanted to go on the 9 a. m. train to-morrow. The goods were shipped by freight."

I then go to the post office, linger from 10.30 p. m. till 2 a. m., a place of impaired activity, its wheels turning slowly. On wandering around I spy a man clad in Stars and Stripes, with a tobacco-bestained goatee, leaning up against a post. Ask him what's the matter with his machine, sparks don't seem to hit, has a flat tire. He says: "Machine is all right, but we just can't get the speed out of it at night; but just come around in the morning at 7 a. m. and watch her start. You'll see her leap like a fawn eluding the chase of a hound on a western plain."

In the mailing division, where I work, the "ghost" walks not to disseminate the shining shekels of brightest day. Not when noonday sun is scattering his rays of life and happiness. Ah, when does he come? He does not come. Yes; he comes, changes his habits, changes his coat, changes his nature, changes his life, enters into the silent hushes of night beneath the canopy of a starless Heaven. A tiger with hideous stripes, snarling, growling, springs, and with one bound fastens his ferocious teeth in the very vitals of all good moral happiness and contentment and leaves his prey lifeless, to be consumed by the vultures of seeming eternal despair, and the boy with dark eyes bright or the little girl with golden hair, on Mission Hills or Kansas plains, waits in vain for a happy, contented papa. The buoyant lad, in anticipation of the company of the blushing maiden, slinks away in despair.

What shall we do? Basest crime is committed at night; wild animals roam forth in scent of prey; the hoot owl sits on limbs of leafless trees watching for innocent victims and pours out his doleful note on the crags and rocks of the sleeping hills; the cunning coyote goes forth from his lair and with hideous cries that awakens the boy with terrifying imaginations in his prairie home, to prey upon the young of the innocent cows and bring desolation to their breasts; the basest needs of men. The basest deeds of animals are disseminated when the veil of night obscures the light of day.

Day is the time for man; then you get what there is in him. What shall be done for night workers? Shall we meet in convention, drop a few iced tears, repose in lethargic robes of warmth? No; no tears shall be shed, no lethargic robes shall be worn. No, verily! But as bold men with steeled determination arise and under the very Dome of our Nation's Capitol, grab the arms of our "Flaherty," lift them high, for it may be they are tired holding the burning torch that is directing us to a noble victory on time differential.

### FLOOD CONTROL

Mr. REID of Illinois. Mr. Speaker, I ask unanimous consent that the conference report upon the bill (S. 3740) for the control of floods on the Mississippi River, and for other purposes, be recommitted to the conference committee.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the conference report upon the bill referred to be recommitted to the conference committee. Is there objection?

There was no objection.

Mr. REID of Illinois. Mr. Speaker, I ask unanimous consent for the present consideration of the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Concurrent Resolution 34

*Resolved by the House of Representatives (the Senate concurring)*, That the committee on conference on Senate bill No. 3740, "An act for the control of floods on the Mississippi River and its tributaries, and for other purposes," be authorized to include in its report on said bill a recommendation amending the proviso to the first paragraph of section 10 by striking out the words in said paragraph "board created in section 1 of this act," and inserting in lieu thereof the words "Mississippi River Commission," and no point of order shall be made against the report by reason of such action.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

### INFORMATION FOR PROHIBITION ADMINISTRATORS

Mr. LAGUARDIA. Mr. Speaker, under rule 22 I call up House Resolution 179, and move to discharge the Committee on the Post Office and Post Roads from further consideration of the same and agree to the same.

The SPEAKER. The gentleman from New York moves to discharge the Committee on the Post Office and Post Roads from further consideration of House Resolution 179, and to agree to the same.

The Clerk will report the resolution.

The Clerk read as follows:

House Resolution 179

*Resolved*, That the Postmaster General be, and he is hereby, directed to inform the House of Representatives, if not incompatible with the public interest, as follows:

1. Have the postmasters and postal employees been authorized, directed, or ordered by the Postmaster General or any official in authority in the Post Office Department to obtain information for prohibition administrators or for other prohibition officials?

2. If such authorization, direction, or orders have been given, submit date and contents of same.

3. Have the postmasters, superintendents of stations, or other postal employees in the counties of Allegheny, Armstrong, Beaver, Bedford, Blair, Butler, Cambria, Clarion, Clearfield, Crawford, Elk, Erie, Fayette, Forest, Greene, Indiana, Jefferson, Lawrence, McKean, Mercer, Somerset, Venango, Warren, Washington, and Westmoreland, in the State of Pennsylvania, been authorized, directed, or ordered by the Postmaster General or any authorized official in the Post Office Department to obtain confidential information concerning citizens and particularly certain private, business, political, religious, family, and other information concerning prospective jurors in the Federal Court of the Western District of Pennsylvania?

4. Have postmasters or other employees in the counties in Pennsylvania above mentioned requested authority or made inquiries of the Post Office Department concerning the propriety and the legality of their complying with instructions contained in a letter from the prohibition administrator of Pittsburgh, Pa., dated April 23, 1928, inclosing a questionnaire with the names and addresses of prospective petit jurors in the Federal Court in the Western District of Pennsylvania and seeking information concerning the business, wealth, lodge and political affiliations, religion, and family of said jurors?

5. If such requests for authority as described in paragraph 4 hereof have been made, what instructions, orders, or directions were given to said postmasters and postal employees?

6. How many employees and how many postmasters were employed in obtaining the information requested by the prohibition administrator of Pittsburgh, Pa., and how was this information collected and submitted to the said prohibition administrator?

7. Have postmasters and postal employees been instructed, ordered, or directed to scrutinize mail received by prospective jurors in the Federal courts in order to ascertain and obtain information requested in the questionnaire described in paragraph 4 hereof?

8. Have prohibition administrators located in other parts of the United States sought the assistance of postmasters and postal employees in obtaining information concerning jurors serving in the Federal courts?

9. What instructions, orders, or directions have been issued by the Postmaster General or other organized officials in the Post Office Department concerning such duties to postmasters and employees located outside of the counties in Pennsylvania above mentioned?

Mr. KELLY. Mr. Speaker, I make the point of order on the ground that the Committee on the Post Offices and Post Roads has not had opportunity to consider this resolution.

Mr. LAGUARDIA. Mr. Speaker, I do not believe I need to reply to that point of order.

Mr. CRAMTON. Mr. Speaker, I make the further point of order that the resolution contains a request for matters of opinion, and not solely a request for information.

Mr. LAGUARDIA. Mr. Speaker, in reply to that, the resolution will speak for itself. Unfortunately the gentleman from Michigan [Mr. CRAMTON] has no copy of the resolution before him.

Mr. SNELL. Will the gentleman withhold that until we can get some copies of the resolution? It was difficult to follow the reading.

The SPEAKER. The Chair has read the resolution with a good deal of care, and does not think that it is anything but a straight resolution of inquiry. It does not call for any opinion or conclusion, and is therefore not subject to a point of order.

Mr. CRAMTON. Mr. Speaker, I could not hear the resolution read.

Mr. LAGUARDIA. How can the gentleman make a point of order when he says he has not been able to get the purport of the resolution to which he wishes to make a point of order?

Mr. SNELL. Mr. Speaker, I suggest that the gentleman withhold until we can get some copies of the resolution. It is rather unfair to consider this matter without copies of the resolution before us. The gentleman will not lose any of his rights by withholding for a few moments.

Mr. LAGUARDIA. I think I can explain that resolution in five minutes and have it adopted. I ask to proceed.

The SPEAKER. The gentleman from New York is recognized.

Mr. LAGUARDIA. Mr. Speaker and gentlemen of the House, I will take very little time if I can get the attention of my colleagues, because I realize that the Consent Calendar will soon be on, and I know there are very many important matters on that calendar in which Members are interested.

I took occasion to call the attention of the House some 10 days ago to a circular letter, of which I have here one of the originals, which was sent to the postmasters located in the western judicial district of the State of Pennsylvania. Immediately after my remarks several of my colleagues asked me what I am going to do about it, which is a natural inquiry to make when a Member protests against an apparent violation of the law. I thereupon introduced three resolutions of inquiry in order to bring before the House all the facts officially coming from the three departments involved.

One resolution was directed to the Secretary of the Treasury and referred to the Committee on the Judiciary, and the reply from the department fully answered the inquiry. It is now contained in the report of the committee. In that reply the Secretary of the Treasury categorically answered every question contained in the resolution. The second resolution was directed to the Attorney General. The reply to the Committee on the Judiciary stated that the resolution did not require an investigation, and that the giving of the information would not be incompatible with the public interest. Notwithstanding that report the Committee on the Judiciary refused to report the resolution favorably, and reported it unfavorably.

My third inquiry was directed to the Post Office Department to ascertain whether or not the postmasters and postal employees were directed by the Post Office Department to obtain this information called for by the district attorney for the western district of Pennsylvania. The letter which was sent out by Mr. Pennington reads:

(Office of prohibition administrator western judicial district of Pennsylvania and State of West Virginia)

TREASURY DEPARTMENT,
UNITED STATES PROHIBITION SERVICE,
*Pittsburgh, Pa., April 23, 1928.*

DEAR SIR: This office is very anxious to know something about the caliber of men who have been drawn for petit jury service for the May term of United States district court beginning Monday, May 21, 1928, at Pittsburgh.

Inclosed are forms to be filled out regarding the jurors belonging to your post-office district. Would you be good enough to furnish the information desired and return the forms to us at the earliest date possible?

We will greatly appreciate your favor.

Yours very truly,

JOHN D. PENNINGTON,
*Federal Prohibition Administrator.*

Now, there is attached to the circular letter to the postmasters and postal employees a form in which the postmasters and postal employees are called upon to ascertain the following information and to forward it to the prohibition administrator in Pittsburgh. It contains these directions:

1. Name.
2. Address.
3. Education.
4. Age.
5. Approximate wealth.
6. Occupation.
7. If in business for himself, what business?
8. If employed by others, by whom?
9. If employed by a firm or corporation, who is his immediate superior or boss?
10. To what lodge does he belong?
11. To what church does he belong or attend?
12. Has this man ever been involved in any litigation?
13. Has this man ever been reported to have been in any crooked or shady transactions?
14. Is he a drinking man?
15. What friends, if any, does this man have among lawyers?
16. To what political party does he belong?
17. Who are the political friends of this man?
18. Do you know if any particular person controls or influences his vote, and if so, whom?
19. What attitude does he have toward railroad corporations?
20. As to liquor questions:
    1. Is he dry?
    2. Is he wet?
21. How many children has he?
22. How many daughters and what are their ages?
23. In your opinion, would he make a good juror?

Now, there is only one inference to draw, and that is this, that the Post Office Department, the postmasters, and the postal employees were called upon to provide this information about the individual political and religious and family history of the man by virtue of the fact that in the performance of their duty they naturally came in contact with the man's mail and can obtain this information.

Mr. SNELL. Mr. Speaker, will the gentleman yield there for a question?

Mr. LAGUARDIA. In a moment I will.

After I made my remarks the Commissioner of Prohibition sent this statement to the press, and his justification is this, that he did not seek this information concerning one juror but all of the jurors. He stated this, that he did so at the order of the district attorney for the western district of Pennsylvania. The Secretary of the Treasury says he has no knowledge and that he did not authorize any information.

Now, gentlemen, all that I ask in my resolution is this: Have the postmasters been authorized by the Post Office Department to furnish such information? That can be answered yes or no. If such information is authorized to be given, I ask them to submit a copy of the same.

Mr. RAMSEYER. Mr. Speaker, will the gentleman yield there?

Mr. LAGUARDIA. Not now.

Then I asked specifically concerning the postmasters in the various counties comprising the western district of Pennsylvania; I asked if postmasters had made inquiry of the Postmaster General whether they should do this or not, and that requires a yes or no answer. If they have made inquiries, I ask what instructions are given. That is a matter of record, and they may submit the instructions given.

I ask how many employees were used in this work, and that they can answer. Then I continue the inquiry to ascertain whether or not this has been going on in any of the districts other than the western district of Pennsylvania.

Mr. CHINDBLOM. Mr. Speaker, I will say that I have no objection to the gentleman's resolution generally, but I think this last inquiry, No. 8, may be difficult for the Postmaster General to answer.

All of the other inquiries go directly to information in the hands of the Postmaster General, but this question, I think, goes further than that. It reads:

Have prohibition administrators located in other parts of the United States sought the assistance of the postmasters and postal employees in obtaining information concerning jurors serving in the Federal courts?

That is information which must be obtained from all of the many thousands of postmasters and postal employees in the United States, and the Postmaster General personally can not have that information nor can it be in the department.

Mr. LAGUARDIA. I only ask for information that they have in the department. If he has not the information the answer is, "I do not know."

Mr. CHINDBLOM. It might start an investigation among all the postmasters of the United States and it should not do that.

Mr. LAGUARDIA. If the gentleman can find any parliamentary method by which I can strike out the eighth section of the resolution without losing my rights in the situation I will be willing to have that section stricken out.

Mr. CHINDBLOM. Why not limit the inquiry to information now in the department?

Mr. LAGUARDIA. All right.

Mr. CRAMTON. If the gentleman will yield, under the rules the gentleman's resolution is not privileged because of several matters it calls for which are not in the department. Under the rules a resolution loses its privilege if it requires an investigation. Now, the matter which the gentleman asks for under subdivisions 6 and 8 would require an investigation.

Mr. LAGUARDIA. No; an inquiry.

Mr. CRAMTON. It is information which would not be available in the department.

Mr. LAGUARDIA. No; it is only an inquiry.

Mr. CRAMTON. And the gentleman's resolution is subject to a point of order. I may have lost my rights but I did not have the resolution before me.

Mr. LAGUARDIA. I have introduced many of these resolutions and I have been licked on a good many of them, so I think I know how to draw them now. This simply asks for information. If they do not have the information then all they have to reply is that the information is not available without an investigation.

Mr. CHINDBLOM. The gentleman is satisfied to get the information now in the hands of the Postmaster General?

Mr. LAGUARDIA. Absolutely.

Mr. CHINDBLOM. And in the department in Washington?

Mr. LAGUARDIA. Yes; there would be no objection to that.

Mr. KELLY. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. KELLY. I am very much in favor of having the truth about this entire situation and letting the sunlight into it, but I think the reply from the Postmaster General, without any doubt, will be that no regulations and no orders have been issued by the Postmaster General regarding this matter.

Mr. LAGUARDIA. Fine. Then I can go right to Pittsburgh.

Mr. KELLY. This is also true—that in the case of a soldier asking for a discharge from the Army the commanding officer sends to the postmaster and asks for information concerning facts as to family income, and so forth. That is not a matter which comes under regulations of the Post Office Department but is simply the desire of the officer, as an official representative, to get such information.

Mr. LAGUARDIA. I am sure the gentleman does not want the Post Office Department to become an annex of the snooping bureau of the prohibition office.

Mr. KELLY. Not at all.

Mr. LAGUARDIA. We ought not to contaminate the Post Office Department, but when you ask the Post Office Department to inquire in the State of Pennsylvania about what a man's attitude toward railroads is, let me tell the gentleman from Pennsylvania, who believes in law enforcement, that the purpose of such information is not to enforce the law but to evade the law.

Mr. ADKINS. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. ADKINS. When a man is a new candidate for public office, an elective office, an appointive office, or whatever it may be, has it not been the custom for at least 20 years for interested parties to send questionnaires to citizens, just such questionnaires as the gentleman has brought to our attention? Has not that been the situation?

Mr. LAGUARDIA. But this is to the Post Office Department.

Mr. ADKINS. Well, is not that the situation?

Mr. LAGUARDIA. No. You do not ask for intimate family matters.

Mr. ADKINS. As a matter of fact, I know that such a line of questions has customarily been sent out by interested parties. Now, the question I want to ask is this: Would not a man, whether he is employed in the post office, in a bank, or wherever he may be employed, have the right to answer such questions, whether he happened to be a postal employee, a bank clerk, a farmer, or whoever he might be?

Mr. LAGUARDIA. The gentleman does not understand the inquiry. This is a questionnaire concerning citizens, and it is a questionnaire sent to the Post Office Department for the purpose of having an investigation or an inquiry made concerning citizens through the mail they get. That is the only reason for it.

Mr. RAMSEYER. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. RAMSEYER. Under the section which the gentleman read a while ago who, is it claimed, sent out that order?

Mr. LAGUARDIA. It was sent out by the prohibition administrator at Pittsburgh at the direction of the district attorney for that district.

Mr. RAMSEYER. He sent it to postmasters and postal employees.

Mr. LAGUARDIA. Yes.

Mr. RAMSEYER. Has the gentleman any information that this prohibition inspector first got consent or authority from the Postmaster General?

Mr. LAGUARDIA. That is what my resolution asks.

Mr. RAMSEYER. Has the gentleman any information about that?

Mr. LAGUARDIA. If I had I would not put in a resolution to find out.

Mr. RAMSEYER. The gentleman would not?

Mr. LAGUARDIA. No.

Mr. RAMSEYER. Because an inspector sent out a questionnaire to postmasters and postal employees, the gentleman jumps at the conclusion that he first consulted the Postmaster General for the right to do this or else he is suspicious that he would not have done it unless he had first had the consent of the Postmaster General.

Mr. LAGUARDIA. What would the gentleman from Iowa do, as a legislator, if he wanted official information? Would not the gentleman ask the proper department for the information?

Mr. DENISON. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. DENISON. I am sure the gentleman does not want to do any injustice, but I think the gentleman does an injustice when he says this information is sought in order to authorize the postmaster or postal employees to get the information from the mails. There is not anything in the letter that would justify that conclusion.

Mr. LAGUARDIA. Why, I will say to the gentleman from Illinois one can not escape that inference.

Mr. DENISON. What is there in the letter that would justify such an inference?

Mr. LAGUARDIA. For this simple reason: The district attorney has marshals and deputy marshals, the prohibition office has inspectors and agents, the Department of Justice has investigators, and the Treasury Department has an intelligence unit; yet all these agencies are not used, but the information is sought from the post office. You ask concerning a man's lodge and his church and who his political friends are; considering the fact they already have these various fact-gathering agencies at their disposal, what other inference is the gentleman going to draw except they want this intimate private information which the post office gets?

Mr. DENISON. If the gentleman will yield further, the gentleman knows that postmasters and postal employees by virtue of the performance of their various duties come in contact with the people of the community and they get information from their knowledge of or acquaintance with the people and not through the mail they receive. That is where the gentleman is mistaken. The gentleman ought to be fair.

Mr. LAGUARDIA. I say this is my inference, and, of course, the gentleman is entitled to draw a different inference. Would the gentleman say that when this questionnaire goes to the postmaster and he passes it on to the man on the route, he says to this man, "You forget all about the mail of this man, you forget all about his lodge notices, and just go out and get this information"? Is the gentleman in favor of using the post office for this purpose? That is the whole thing involved.

Mr. DENISON. If I want information which is not of a confidential nature and I can get it from a postmaster, I have as much right to get it from him as from anybody else; but, of course, this does not mean that he should get it from the mail, but from his acquaintanceship in the community.

Mr. KELLY. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. KELLY. I want to say to the gentleman I should not oppose the passage of the resolution if it would give any information, but it is a perfectly futile proposition. The crux of the gentleman's resolution is whether it is proper for the Department of Justice to get certain information regarding prospective jurors before they appear in court.

Mr. LAGUARDIA. Oh, no.

Mr. KELLY. And the gentleman is addressing his resolution to the Postmaster General, who has nothing whatever to do with the matter.

Mr. LAGUARDIA. The gentleman misses the point of my resolution entirely.

Mr. KELLY. Then what is the point?

Mr. LAGUARDIA. I want to get just what part the Post Office Department has taken in this matter and I want to establish, if necessary, by legislation that the Post Office Department must not be used for such purposes.

Mr. GILBERT. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. GILBERT. If I remember correctly, when the gentleman first introduced this matter, a week or two ago, he stated that bootlegging in Pittsburgh has political protection. Am I correct about that statement?

Mr. LAGUARDIA. I do not think I stated it in that way. I said that bootlegging was a matter of political patronage in Pittsburgh.

Mr. GILBERT. The Secretary of the Treasury is the political boss of Pittsburgh, and I believe the gentleman inquired whether he had any information about this matter, and he said he had not.

Mr. LAGUARDIA. Yes; that he had not.

Mr. GILBERT. I wonder if he has any more information about bootlegging in Pittsburgh and its being a matter of patronage than he has about Sinclair oil campaign contributions.

Mr. LAGUARDIA. I will say if the Secretary of the Treasury, who is a resident of Pittsburgh, does not know that bootlegging is going on there under wholesale methods and that it is political patronage, he is the only man in Pittsburgh that does not know it.

Mr. GILBERT. He knows it.

Mr. CRAMTON, Mr. RAMSEYER, and Mr. GREEN rose.

Mr. LAGUARDIA. Mr. Speaker, I reserve the balance of my time.

Mr. RAMSEYER. Mr. Speaker, I would like to have five minutes.

Mr. CRAMTON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. Does the gentleman yield for a parliamentary inquiry?

Mr. LAGUARDIA. I yield for that purpose.

Mr. CRAMTON. Mr. Speaker, is it too late for me to make a point of order against the privilege of the resolution on the ground that it calls for an investigation or calls for matters not within the knowledge of the Postmaster General—information that he can only secure by an investigation?

The SPEAKER. The Chair thinks that point of order comes too late, in view of the fact that debate has been had. The Chair examined the resolution pretty carefully.

Mr. CRAMTON. I did not have the resolution at hand at the time and could not direct the attention of the Chair to the resolution specifically, but subdivision 6, for instance, asks how many employees and how many postmasters were employed in obtaining the information requested by the Prohibition Administrator of Pittsburgh.

Now, if any were so employed the Postmaster General has no knowledge of it and can only make inquiry by sending out and making an investigation, but possibly I am too late in making the point. I did not have the resolution at hand at the time.

Mr. LAGUARDIA. The resolution is so framed that there is no question about it. The House can take judicial notice that there is the time kept of every employee in the service and is available.

Mr. Speaker, I yield five minutes to the gentleman from Iowa [Mr. RAMSEYER].

Mr. RAMSEYER. Mr. Speaker, this resolution was introduced several days ago, and technically, under the rule, it can be called up. What is the common practice of a Member in this House who introduces a resolution and really wants information? He goes to the chairman of the committee and asks that the committee consider it and report it out. If the chairman of the committee and the committee refuse to act within a week or seven legislative days, then, of course, the rule provides that the introducer of the resolution can call it up.

What are the facts? Neither the chairman of the Committee on the Post Office and Post Roads nor any other member of the committee had heard of this resolution before the gentleman from New York called it up. The Post Office Committee has not had a meeting since the resolution was introduced. The Post Office Committee will meet to-morrow morning, and if the House votes down this resolution they will take it up for consideration and the House will get in an orderly way all the information that the gentleman from New York seeks.

If the gentleman was desirous of information he would have proceeded in the manner I have indicated. As a matter of fact, the gentleman from New York has sought another opportunity to make a wet speech on the floor of this House, and that is all there is to it. He has had the opportunity and ought to be satisfied, and the House ought to vote down the resolution and let the Post Office Committee proceed on it in the usual way. I, as a member of the Post Office Committee—and I think I have the consent of the chairman of that committee to make this statement—say that this House will get all the information within the possession of the Postmaster General in a very reasonable time, and get it in an orderly way, and it will be presented to the House.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. RAMSEYER. Yes.

Mr. LAGUARDIA. The gentleman is a member of the Post Office Committee?

Mr. RAMSEYER. I happen to be.

Mr. LAGUARDIA. This resolution was introduced 10 days ago. I am calling it up now, and the gentleman says that the members of the committee are taken by surprise. Is that the attitude of the gentleman?

Mr. RAMSEYER. I state that as a fact.

Mr. LAGUARDIA Did not the gentleman know that the resolution was referred to his committee?

Mr. RAMSEYER. I did not know it until this morning.

Mr. LAGUARDIA. Then the gentleman is not on his job. [Laughter.]

Mr. RAMSEYER. Has the gentleman from New York called on the chairman of the committee and asked for a hearing?

Mr. LAGUARDIA. No. I am looking after bills referred to my committee.

Mr. RAMSEYER. Why did not the gentleman ask the chairman of the committee for a hearing?

Mr. LAGUARDIA. If the gentleman is sincere in his statement about getting information he can get it now by voting for the resolution.

Mr. RAMSEYER. I want to get it in an orderly way and therefore I ask the House to vote down this resolution. Mr. Speaker, how much time have I left?

The SPEAKER. The gentleman has one minute.

Mr. RAMSEYER. I yield that to the gentleman from Pennsylvania, the chairman of the committee.

Mr. GRIEST. Mr. Speaker, I want to confirm what the gentleman from Iowa has just said, and in addition I want to say that to-morrow morning will be the first meeting of the Post Office Committee that we have had any opportunity to consider the gentleman's resolution. The reason we did not have a meeting a week ago was on account of members being absent at a funeral, and, further, because the chairman of the committee was ill. I want to assure the gentleman from New York that there is no disposition to avoid an investigation or giving consideration to his resolution. We will consider it if we have the opportunity to-morrow morning.

Mr. LAGUARDIA. Mr. Speaker, I yield two minutes to the gentleman from Kentucky [Mr. GILBERT].

Mr. GILBERT. Mr. Speaker, I hope this resolution will pass. I never cast a wet vote in Congress or out, but I am getting disgusted with a lot of the methods now being employed by the Government and certain quasi-governmental agencies which are bringing into disrepute the cause that I love so dearly.

Mr. LAGUARDIA. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken; and on a division (demanded by Mr. LAGUARDIA) there were 72 ayes and 81 noes.

Mr. LAGUARDIA. Mr. Speaker, I object to the vote on the ground that there is no quorum present.

The SPEAKER. The Chair will count.

Mr. LAGUARDIA. Mr. Speaker, I withdraw the objection.

Mr. SCHAFER. I renew it.

The SPEAKER (after counting). Two hundred and twenty-six Members are present, a quorum.

So the resolution was rejected.

## CONSENT CALENDAR

The SPEAKER. The Clerk will call the first bill on the Consent Calendar.

### GRANTING CERTAIN LANDS TO NEW MEXICO

The first business on the Consent Calendar was the bill (H. R. 9207) granting to the State of New Mexico certain lands, for reimbursement of the counties of Grant, Luna, Hidalgo, and Sante Fe, for interest paid on railroad-aid bonds, and for the payment of the principal of railroad-aid bonds issued by the town of Silver City, and to reimburse said town for interest paid on said bonds, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. MORROW. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection.

MONTEZUMA NATIONAL FOREST, COLO.

The next business on the Consent Calendar was the bill (H. R. 6854) to add certain lands to the Montezuma National Forest, Colo., and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, this is a bill which I objected to on the last consent day in order that I might obtain some information. Since that time I have taken the matter up with the Department of Agriculture, and they have given me the information I sought at the time. Seemingly there is no opposition to the bill now. I understand that the Department of the Interior has written a supplementary report.

Mr. TAYLOR of Colorado. Yes. I have their supplementary report favoring the bill.

Mr. LAGUARDIA. I suggest that the gentleman extend his remarks in the RECORD by inserting that report.

Mr. TAYLOR of Colorado. Very well. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on this measure, including therein the report referred to and two or three other items, and the three reports of the departments on this bill.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. TAYLOR of Colorado. Mr. Speaker, in pursuance of the request of the gentleman from New York [Mr. LAGUARDIA], I insert herewith a resolution from the board of county commissioners of Dolores County, Colo., as follows:

Resolution

Whereas it appears that there are many thousand acres of land belonging to the United States Government which is adjacent to the Montezuma National Forest and at this time is not included in said forest reserve; and

Whereas it appears the Government and the counties are deriving no revenue from said lands: It is therefore

*Resolved*, That it is the opinion of the board of county commissioners of Dolores County, Colo., that for the best interests of all concerned that Congress should consider this matter and include the land described in the bill within the Montezuma National Forest Reserve, that the Government and counties interested may receive a revenue therefrom; it is further

*Resolved*, That a copy of this resolution be sent to all the United States Senators and Congressmen of the State of Colorado, and that they be hereby requested to give this matter attention and by proper action in Congress have the lands as hereinabove described included within the Montezuma National Forest that the interests of all concerned may be best protected.

Passed and approved this 20th day of October, A. D. 1927.

Respectfully submitted.

W. E. QUINE, *Chairman*,
EDWARD BAER,
S. M. CONN,
*County Commissioners, Dolores County, State of Colorado.*

Also, a resolution from the board of county commissioners of San Miguel County, Colo., as follows:

STATE OF COLORADO,
*County of San Miguel, ss:*

At a regular meeting of the board of county commissioners for San Miguel County, Colo., held at the courthouse in Telluride on Monday the 3d day of October, A. D. 1927, there were present: Howard Davis, chairman; J. P. Whiteley, commissioner; John J. Tracy, commissioner; J. M. Woy, county attorney; and Harold T. Hogan, clerk, when the following proceedings, among others, were had and done, to wit:

"Whereas there is a very good stand of timber in township 42 north, ranges 17 and 18 west, which adjoins the Montezuma Forest, which said land is more valuable for timber-production purposes than for any other use; and

"Whereas said land is now part of the public domain and that the local residents will not suffer any material damage in any way if the said premises be added to the Montezuma Forest: Therefore be it

"*Resolved*, That the board of county commissioners of San Miguel County, Colo., are in favor that said tract of land shall be added to and included in the Montezuma National Forest, and that Congress be respectfully petitioned to pass the necessary act; and be it further

"*Resolved*, That a copy of this resolution be sent to each of the United States Senators and each of the Congressmen of the State of Colorado, and that they be respectfully urged to give favorable support to an act to include the above premises to the Montezuma Forest."

STATE OF COLORADO,
*County of San Miguel, ss:*

I, Harold T. Hogan, county clerk and ex officio clerk of the board of county commissioners in and for the county and State aforesaid, do hereby certify that the annexed and foregoing order is truly copied from the records of the proceedings of the board of county commissioners for said San Miguel County now in my office.

In witness whereof I have hereunto set my hand and affixed the seal of said county at Telluride, Colo., this 7th day of October, A. D. 1927.

[SEAL.] HAROLD T. HOGAN, *County Clerk.*

I also insert the report of the Acting Secretary of Agriculture on the bill, as follows:

DEPARTMENT OF AGRICULTURE,
*January 23, 1928.*

Hon. N. J. SINNOTT,
*Chairman Committee on the Public Lands,*
*House of Representatives.*

DEAR MR. SINNOTT: Reference is made to your letter of December 15 inclosing copy of (H. R. 6854) a bill to add certain lands to the Montezuma National Forest, Colo., and for other purposes, with a request that your committee be advised of the views of the department on the proposed legislation.

The measure would add to the Montezuma National Forest, Colo., and thereby place under national forest administration a tract of approximately 21,500 acres of which approximately 17,500 acres are owned by the United States. The lands lie adjacent to the Montezuma National Forest and because of climatic and topographic conditions are unsuited to cultivation. They, for the most part, are timbered, containing a stand of western yellow pine estimated at approximately 54,500,000 board feet.

This area is adapted to the growing of timber and without doubt this is its highest economic use. It is logically a part of the adjoining Montezuma National Forest. The protection of the timber cover from fire and the removal of the timber under proper regulation would undoubtedly be in the public interest. If added to the national forest the timber would be available for sale. There is now a large lumber company cutting national forest and private stumpage in the region and its operations will reach this timber within 8 to 10 years. The stumpage available should yield in receipts not less than $100,000, or $5.65 per acre. The life of the operation which involves over $1,000,000 investment will be prolonged two years and the area will be left after cutting in a productive condition insuring another crop of timber if added to the national forest. Your committee, of course, appreciates that 25 per cent of these receipts now go to the State of Coorado, and 10 per cent are obligated for the improvement of roads and trails under the direction of the Forest Service.

These lands lie within an area which was formerly a part of the Ute Indian Reservation, but was ceded to the United States, and under the provisions of an act approved June 15, 1880 (21 Stat. 199), the Indians were to receive compensation therefor at the rate of $1.25 per acre when the lands were entered under the public land laws. Manifestly, if the lands are placed within a national forest and therefore not subject to disposal otherwise, the Indians should be compensated therefor to the extent contemplated by the above-mentioned act. Sections 2 and 3 of the bill under consideration would take care of this situation by providing that payment for the lands shall be taken from the unobligated portion of the receipts from the Montezuma National Forest.

If these lands are placed under national forest administration, they can be handled as a part of the Montezuma National Forest without any material increase in the cost of administration of that forest. The department recommends that favorable consideration be given to the proposed legislation.

Sincerely yours,

R. W. DUNLAP, *Acting Secretary.*

Also the first report of the Secretary of the Interior, made last January, as follows:

DEPARTMENT OF THE INTERIOR,
*Washington, January 24, 1928.*

Hon. N. J. SINNOTT,
*Chairman Committee on the Public Lands,*
*House of Representatives.*

MY DEAR MR. SINNOTT: I have your request for report on H. R. 6854, proposing to add the therein described area in Colorado to the Montezuma National Forest and provide for payment to the Ute Indian fund for the public lands therein at the rate of $1.25 an acre from the unpledged portion of the net receipts from such national forest.

The area adjoins the forest on the west and contains approximately 21,560 acres. The records of the General Land Office of this department show that there are outstanding permits to prospect for oil and gas under the mineral leasing law of February 25, 1920 (41 Stat. 437), covering all but 120 acres of the public lands involved, that 16,597 acres are surveyed, and that 680 acres thereof have been disposed of under the public land laws and 1,080 acres are embraced in unperfected entries under the stock-raising homestead laws.

The area is practically all within that portion of the former Ute Indian Reservation which has been opened to entry under the acts of June 15, 1880 (21 Stat. 199), July 28, 1882 (22 Stat. 178), June 13, 1902 (32 Stat. 384), and February 24, 1909 (35 Stat. 644), with provision for payment to the Indians of the proceeds of the lands when dis-

posed of at a price of not less than $1.25 per acre. In this portion of the former reservation the Indians are also credited with receipts from bonuses, rentals, and royalties under the mineral leasing laws.

Certain of the ceded Indian lands, not, however, including the area under consideration, have heretofore been added to national forests, and the claim of the Ute Indians to payment at $1.25 an acre for the public lands therein was examined by the Court of Claims in 1910 and 1911 under authority of the act of March 3, 1909 (35 Stat. 788), and the Indians were awarded judgment of over $3,500,000 for such lands and the Ute fund credited with the net amount of such judgment under the act of March 4, 1913 (37 Stat. 912, 934).

The general policy of Congress as to additions of public lands to national forests appears to be set forth in section 8 of the act of June 7, 1924 (43 Stat. 653), which only contemplates addition of lands chiefly valuable for timber production and stream flow protection.

Data on file in the Geological Survey of this department indicate that the area described in the bill is prospectively valuable for its oil and gas content; that there is little or no merchantable timber on the lands, and that they are used as cattle and sheep range for seven or eight months a year. The department therefore declined to recommend withdrawal of this identical area in 1925 when the Department of Agriculture requested its withdrawal with a view to recommending addition of the land to the forest under the above-mentioned act of June 7, 1924. That department has recently requested reconsideration of the matter and an early field examination by employees of this department has been directed for the purpose of securing further information regarding the character of the lands.

In view, however, of the data now before the department, I recommend that the bill be not enacted.

The Director of the Bureau of the Budget advises that this report is not in conflict with the financial program of the President.

Very truly yours,

HUBERT WORK.

I also insert the supplementary favorable report of the Secretary of the Interior, made May 4, 1928, as follows:

THE SECRETARY OF THE INTERIOR,
*Washington, May 4, 1928.*

Hon. N. J. SINNOTT,
*Chairman Committee on Public Lands,*
*House of Representatives.*

MY DEAR MR. SINNOTT: On January 24, 1928, I submitted report upon H. R. 6854, proposing to add certain lands to the Montezuma National Forest, Colo. In that report I stated that further field investigation would be made by this department.

In view of the fact that field examination is said to be impracticable at this season of the year, a telegraphic report, based upon familiarity of one of the departmental inspectors with the area, was submitted. In view of this report and of information furnished by the Department of Agriculture, which states that the lands are for the most part timbered, containing approximately 54,500,000 board feet of yellow pine, and that the land in question is adapted to the growing of timber, I now have to advise you that this department has no objection to the enactment of the bill, if Congress shall deem such action advisable.

Very truly yours,

HUBERT WORK.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the following-described lands be, and the same are hereby, included in and made a part of the Montezuma National Forest, subject to all prior valid, adverse rights, and that said land shall hereafter be subject to all the laws affecting national forests:

Southwest quarter section 16, southeast quarter section 17, sections 19, 20, 21, 22, southwest quarter section 25, sections 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, township 42 north, range 17 west; east half section 8, sections 9, 10, 15, east half and northwest quarter section 16, northeast quarter section 17, east half section 21, sections 22, 23, 24, 25, 26, 27, east half section 28, east half section 33, sections 34, 35, 36, township 42 north, range 18 west; and sections 1, 2, and 3 of township 41 north, range 18 west, all from the New Mexico principal meridian.

SEC. 2. The Secretary of the Interior is hereby directed to determine, from the official records of the General Land Office, the number of acres of public land in the tracts described in section 1 of this act, and to compute the value thereof at the rate of $1.25 per acre, and he shall certify the computed value of said lands to the Secretary of the Treasury.

SEC. 3. The Secretary of the Treasury is hereby directed to place to the credit of the confederated bands of Ute Indians for their benefit, as provided in the act of Congress approved June 15, 1880 (21 Stat. L. 199), the amount certified to him by the Secretary of the Interior under section 2 hereof, which amount shall be taken from the unobligated portion of the net receipts from the Montezuma National Forest, beginning with the fiscal year in which this act is approved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

SUIT ON BEHALF OF INDIANS OF CALIFORNIA

The next business on the Consent Calendar was the bill (H. R. 491) authorizing the attorney general of the State of California to bring suit in the Court of Claims on behalf of the Indians of California.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, this is the bill which the gentleman from California [Mr. LEA] has had passed over once or twice in order that I might have an opportunity to make some study of it. I have completed that study and have suggested some amendments that are agreeable to the gentleman from California. I shall not take the time now to go into those amendments unless some Member desires me to. I shall offer the amendments when the bill comes up for consideration. I do not object, though I want it understood that I have the right to offer these amendments.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read as follows:

*Be it enacted, etc.*, That for the purposes of this act the Indians of California shall be defined to be all Indians who were residing in the State of California on June 1, 1852, and their descendants now living in said State.

SEC. 2. All claims of whatsoever nature the Indians of California as defined in section 1 of this act may have against the United States by reason of lands taken from them in the State of California by the United States without compensation, or for the failure or refusal of the United States to compensate them for their interest in lands in said State which the United States appropriated to its own purposes without the consent of said Indians, may be submitted to the Court of Claims by the attorney general of the State of California acting for and on behalf of said Indians for determination of the equitable amount due said Indians from the United States; and jurisdiction is hereby conferred upon the Court of Claims of the United States, with the right of either party to appeal to the Supreme Court of the United States, to hear and determine all such equitable claims of said Indians against the United States and to render final decree thereon.

It is hereby declared to be the judgment of the Congress that the loss to the said Indians on account of their failure to secure the lands and compensation provided for in the 18 unratified treaties is sufficient ground for equitable relief.

With the following committee amendments:

Page 2, line 18, strike out "to be the judgment of the Congress."

The committee amendment was agreed to.

The Clerk read as follows:

SEC. 3. If any claim or claims be submitted to said courts, they shall settle the equitable rights therein, notwithstanding lapse of time or statutes of limitation or the fact that the said claim or claims have not been presented to any other tribunal, including the commission created by the act of March 3, 1851 (9 Stat. L. 631): *Provided*, That any decree for said Indians shall be for an amount equal to the just value of the compensation provided or proposed for the Indians in those certain 18 unratified treaties executed by the chiefs and head men of the several tribes and bands of Indians of California and submitted to the Senate of the United States by the President of the United States for ratification on the 1st day of June, 1852, including the lands described therein at $1.25 per acre. Any payment which may have been made by the United States or moneys heretofore or hereafter expended for the benefit of the Indians of California shall not be pleaded as an estoppel, but expenditures under specific appropriations for the support and civilization of Indians in California made prior to July 1, 1928, may be pleaded by way of set-off.

With the following committee amendments:

Page 3, beginning in line 12, strike out the remainder of the section and insert:

"Any payment which may have been made by the United States or moneys heretofore or hereafter expended to date of award for the benefit of the Indians of California, made under specific appropriations for the support and civilization of Indians in California, shall not be pleaded as an estoppel but may be pleaded by way of set-off."

Mr. CRAMTON. Mr. Speaker, I offer the following amendment to the committee amendment, which I send to the desk.

The Clerk read as follows:

Mr. CRAMTON offers an amendment to the committee amendment on page 3: "Amend the committee amendment by inserting in line 21, after the word 'support,' the words 'education, health,' and in line 22, after the word 'California,' insert 'including purchases of land.'"

The SPEAKER. The question is on agreeing to the amendment to the committee amendment offered by the gentleman from Michigan.

The amendment to the committee amendment was agreed to.

The committee amendment as amended was agreed to.

The Clerk read as follows:

SEC. 4. The claims of the Indians of California under the provisions of this act shall be presented by petition, which shall be filed within three years after the passage of this act. Said petition shall be subject to amendment. The petition shall be signed and verified by the attorney general of the State of California. Verification may be upon information and belief as to the facts alleged. Official letters, papers, documents, and public records, or certified copies thereof, may be used in evidence, and the departments of the Government shall give the said attorney access to such papers, correspondence, or furnish such certified copies of records as may be necessary in the premises free of cost.

SEC. 5. In the event that the court renders judgment against the United States under the provisions of this act, it shall decree such amount as it finds reasonable to be paid to the State of California to reimburse the State for moneys expended by the State in the employment of attorneys to prosecute the claims of the Indians and for all necessary costs and expenses incurred by said State: *Provided*, That no reimbursement shall be made to the State of California for the services rendered by its attorney general.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that the following two amendments, which I send to the desk, be considered together.

The SPEAKER. The Clerk will report the amendments.

The Clerk read as follows:

Page 4, lines 14, 15, and 16, strike out the words "for moneys expended by the State in the employment of attorneys to prosecute the claims of the Indians and"; and in line 17, after the word "State," insert a comma and the words "other than attorneys' fees."

Mr. CRAMTON. Mr. Speaker, I offer this explanation. The State of California has adopted legislation authorizing the attorney general to begin this suit. That is a commendable interest on the part of the State of California. However, while it is an important suit it will not be unduly complicated, and the action that the Federal Government takes in this bill is very generous, and California may well be likewise generous to its own citizens. The amendments I offer to this section mean that the State of California will be reimbursed by the Indians for the expenses of the suit other than attorneys' fees. Inasmuch as the attorney general's office can supply the legal talent necessary, it will save the Indians a number of thousands of dollars and be a generous action on the part of the State, which, it seems to me, it may very well take, and I hope it will.

The SPEAKER. Without objection, the amendments will be considered together.

There was no objection.

The SPEAKER. The question is on agreeing to the amendments.

The amendments were agreed to.

The Clerk read as follows:

SEC. 6. The proceeds of any judgment when appropriated shall be placed in the Treasury of the United States to the credit of the Indians of California and shall draw interest at the rate of 4 per cent per annum and shall be disposed of as Congress shall hereafter direct: *Provided*, That the Secretary of the Treasury is authorized and directed to pay to the State of California, out of the proceeds of the judgment when appropriated, the amount decreed by the court to be due said State, as provided in section 5 of this act.

With the following committee amendments:

Page 4, line 20, strike out the word "proceeds" and insert the word "amount," and in the same line strike out the words "when appropriated."

The committee amendments were agreed to.

Mr. CRAMTON. Mr. Speaker, I offer amendment No. 4 on the sheet I have sent to the Clerk's desk.

The SPEAKER. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 4, line 24, strike out the words "disposed of as Congress shall hereafter direct" and insert in lieu thereof the following: "Thereafter subject to appropriation by Congress for educational, health, industrial, and other purposes for the benefit of said Indians, including the purchase of land and building of homes, and no part of said judgment shall be paid out in per capita payment to said Indians."

Mr. CRAMTON. Mr. Speaker, the purpose of that amendment is to provide that no per capita cash payments be made to the Indians that would be of little benefit to them, but it insures to them the benefit of this money through expenditures for the purposes set forth in the amendment.

In this connection permit me to say that this is a most important bill, providing for adjustment of long-standing claims of the California Indians. From my study of the hearings on this bill and a somewhat similar bill in the Sixty-sixth Congress, and from information furnished me by the Bureau of Indian Affairs, I am satisfied these Indians have claims which should be examined and finally adjudicated.

The principal claims of the California Indians are based upon the failure of the United States Senate to ratify 18 treaties entered into with them in the years 1851 and 1852, which treaties appear in the hearings before the Committee on Indian Affairs, House of Representatives, March 23, 1920 (Sixty-sixth Congress), beginning on page 13 and ending on page 55.

These proposed treaties were considered by the Senate but were returned to the President without favorable action thereon. (See Senate resolution appearing on pages 66, 67, 68, and 69 of the hearings referred to above.)

It is claimed that the reason for the failure to ratify the treaties at that time was because of the discovery of gold in California. Under the terms of these treaties the Indians of California gave up a large amount of land but they failed to receive the benefits that were to accrue to them under the terms of said treaties.

It is estimated that the California Indians, under the terms of these unratified treaties, were to receive approximately 7,500,000 acres of land. Under the terms of the jurisdictional bill they are to be compensated at the rate of $1.25 per acre for these lands, which would amount to $9,375,000.

These Indians were to receive other miscellaneous benefits under the terms of the treaties, which will be included in their claims to be presented to the Court of Claims in the event of the passage of the jurisdictional act. The principal claim, however, is for the loss of land.

The Indians will never have a more loyal friend or Congress a more reliable source of information as to the Indian problem than the Assistant Commissioner of Indian Affairs, Mr. Meritt. He has said to me about this bill:

There are probably no Indians in any State of the Union who have been more unjustly treated than have the California Indians. The failure of the Federal Government to ratify the treaties with these Indians and at the same time to accept the benefits of those treaties was a gross injustice. These Indians should have their day in court.

I am glad that it appears that their day in court is near at hand.

Two matters in the bill have given me especial concern. First, the jurisdictional bill is so worded that only the specific appropriations that have been made for the benefit of the California Indians will be included as set-offs. This does not include the amounts that have been expended for the benefit of the California Indians from general appropriations. The expenditures from specific appropriations up to July 1, 1927, amount to approximately $4,199,793.93. Expenditures for the California Indians from the general appropriations to July 1, 1927, amount to approximately $8,062,815.97, and from reimbursable appropriations to the same period approximately $1,480,000.46, or a total expenditure from 1852 to July 1, 1927, from Government funds for the benefit of the California Indians approximately $13,742,610.36.

One will not have dreamed, who has heard the constant denunciation of the United States for neglect of the California Indians, that actually over $13,000,000 has been spent in their behalf. And the end is not yet.

As a matter of law and equity, there is as much reason for setting up expenditures of Federal funds for the benefit of these Indians under a general appropriation as under a special appropriation. In either case the money is spent, and the purpose served is the same. To exclude consideration of the general appropriations therefore is as lacking in logic as it is unusual. Certainly such a provision can not be conceived of as a precedent.

But to insist on a full statement of Federal appropriations for benefit of these Indians, as I was at first inclined to do, would make it useless for them to go into court. And I think it desirable the California Indian situation be finally determined and on a generous basis.

If the Government were permitted to plead as set-off all appropriations, both specific and general, for the California Indians,

by the time the judgment was entered by the Court of Claims, and with the additional amounts that will be expended for the benefit of the California Indians in the meantime, they would receive nothing, but would be indebted to the Government in an amount approximating $5,000,000.

At the same time I was reluctant to see the suit result in a large verdict for the Indians, soon to be dissipated in per capita distribution of cash among them, and have them soon destitute and objects of gratuity appropriations from the Federal Treasury. I have felt their fund should be safeguarded from dissipation and used in a wise and constructive program for their development and upbuilding. In the desire to work this out I have greatly appreciated the cooperation of the gentleman from California [Mr. LEA], whose broad and far-seeing views on this have made possible passage of this legislation at this time.

The bill we are passing to-day safeguards in an unusual degree the future welfare of these Indians. By reason of the amendment just offered on page 4, the money due them will be conserved and be available for expenditure in a constructive program of health, education, home building, and industrial development, and the generosity of the Federal Government in the statement of the account will not be wasted. I am happy to support the bill under these circumstances.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

SEC. 7. For the purpose of determining who are entitled to be enrolled as Indians of California, as provided in section 1 hereof, the Secretary of the Interior, under such rules and regulations as he may prescribe, shall cause a roll to be made of persons entitled to enrollment. Any person claiming to be entitled to enrollment may within two years after the approval of this act make an application in writing to the Secretary of the Interior for enrollment. At any time within three years of the approval of this act the Secretary shall have the right to alter and revise the roll, at the expiration of which time said roll shall be final and conclusive as to the rights of the persons entitled to be enrolled: *Provided*, That the Secretary of the Interior, under such rules and regulations as he may prescribe, shall also cause to be made, within the time specified herein, a roll of all Indians in California other than Indians that come within the provisions of section 1 of this act.

With committee amendments, as follows:

On page 5, line 10, strike out the word "two" and insert in lieu thereof the word "three"; and on line 13, strike out the word "three" and insert the word "five."

Mr. CRAMTON. Mr. Speaker, as to those two amendments, which may be acted on together, the gentleman from California and I have agreed that those amendments should be disagreed to, in order that the time may be nearer in which the Indians may realize the benefits of this legislation.

The SPEAKER. The question is on agreeing to the two amendments just read.

The question was taken, and the two amendments were rejected.

The SPEAKER. The Clerk will read the other amendment.

The Clerk read as follows:

Page 5, line 15, strike out the words "final and conclusive as to the rights of the persons entitled to be enrolled" and insert in lieu thereof "closed for all purposes and thereafter no additional name shall be added thereto."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HASTINGS. Mr. Speaker, I wish to ask the gentleman from Michigan and the gentleman from California what provision is made in the bill as amended for the expenses of the attorneys' fees.

Mr. CRAMTON. They will be advanced by the State of California and reimbursed by the Indians.

Mr. HASTINGS. I wanted to know if there was some provision to that effect.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

BRIDGE ACROSS THE OHIO RIVER AT EVANSVILLE, IND.

The next business on the Consent Calendar was the bill (H. R. 11357) authorizing the State of Indiana to construct, maintain, and operate a toll bridge across the Ohio River at or near Evansville, Ind.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SCHAFER. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER. The Clerk will report the next bill.

DESCHUTES RECLAMATION PROJECT IN OREGON

The next business on the Consent Calendar was the bill S. 1186) to provide for the construction of the Deschutes project in Oregon, and for other purposes.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Reserving the right to object, Mr. Speaker, would the gentleman from Oregon want to press that to-day? I shall feel obliged to object to-day.

Mr. SINNOTT. Mr. Speaker, I ask unanimous consent to have it passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The SPEAKER. The Clerk will report the next bill.

COWLITZ TRIBE OF INDIANS

The next business on the Consent Calendar was the bill (H. R. 167) to amend the act of February 12, 1925 (Public, No. 402, 68th Cong.), so as to permit the Cowlitz Tribe of Indians to file suit in the Court of Claims under said act.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the act approved February 12, 1925, entitled "An act authorizing certain Indian tribes, or any of them, residing in the State of Washington to submit to the Court of Claims certain claims growing out of treaties or otherwise," be, and the same is hereby, amended so as to permit the Cowlitz Tribe of Indians to file suit or suits in the Court of Claims in like manner as the other tribes mentioned therein, and jurisdiction is hereby conferred upon the Court of Claims to hear and determine any and all suits brought hereunder and to render final judgment therein the same as if the said Cowlitz Tribe of Indians had been included within the terms and provisions of the act of which this is an amendment.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

PHILIPPINE CONSTABULARY AND REGULAR ARMY OFFICERS

The next business on the Consent Calendar was the bill (H. R. 9496) to recognize commissioned service in the Philippine Constabulary in determining rights of officers of the Regular Army.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLACK of Texas. Mr. Speaker, I object.

Mr. CRAMTON. I object.

Mr. LAGUARDIA. Mr. Speaker, I object.

The SPEAKER. Three objections are noted. The Clerk will report the next bill.

SETTLEMENT ON FEDERAL RECLAMATION PROJECTS

The next business on the Consent Calendar was the bill (H. R. 9956) to provide for aided and directed settlement on Federal reclamation projects.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLACK of Texas. I object.

The SPEAKER. Objection is heard. The Clerk will report the next bill.

MEMORIAL HIGHWAY IN VIRGINIA

The next business on the Consent Calendar was the bill (H. R. 4625) to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, I object.

The SPEAKER. Objection is heard. The Clerk will report the next bill.

BRIDGE ACROSS THE MISSISSIPPI RIVER AT BATON ROUGE

The next business on the Consent Calendar was the bill (S. 2449) to authorize the construction of a bridge across the Mississippi River at or near the city of Baton Rouge, in the parish of East Baton Rouge, and a point opposite thereto in the parish of West Baton Rouge, State of Louisiana.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLACK of Texas. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

The SPEAKER. The Clerk will report the next bill.

CONTRACTS CONNECTED WITH THE PROSECUTION OF THE WAR

The next business on the Consent Calendar was the bill (S. 1347) to amend an act entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919, as amended.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA and Mr. SPROUL of Kansas objected.

The next business on the Consent Calendar was the bill (H. R. 11411) to amend an act entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919, as amended.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA and Mr. SPROUL of Kansas objected.

ACQUISITION OF PROPERTY FOR THE LIBRARY OF CONGRESS

The next business on the Consent Calendar was the bill (H. R. 9355) to provide for the acquisition of certain property in the District of Columbia for the Library of Congress, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLACK of Texas. Mr. Speaker, reserving the right to object, can the chairman of the committee give us any information as to the assessed value of this particular land? Has any inquiry been made as to that matter?

Mr. LUCE. Mr. Speaker, detailed inquiry was made. The gentleman's question prompts me in saying a word on that phase of the situation.

Mr. BLACK of Texas. I would be glad if the gentleman would give the House any information he has available and the reason I ask for it is this: It is well known by everyone that there has been a real and substantial decline in real estate values in the city of Washington. If you go out and undertake to sell a piece of property in the ordinary real-estate market you will find that out, and yet the Government continues to purchase, apparently, without taking into consideration the fact that there has been a real and substantial decline in real-estate values in the city of Washington, and I have wondered whether, in the purchase of this real estate, the Government is to be protected against that situation.

Mr. LUCE. Mr. Speaker, gentlemen of the Committee on Appropriations, finding that the system of assessment in the District was unsatisfactory, came to the conclusion that in order to improve it, if possible, bills authorizing the appropriation of money to buy land in the District might well contain a stipulation that not more than 25 per cent above the assessed price should be paid. That stipulation was put into the bill relating to the purchase of land for the arboretum, but in that case, as in the case of the purchase of land for the new Botanic Garden, great difficulty has been found in securing the sale of the land within the limits prescribed. The chief cause for the situation, I think, is to be found in the imperfect condemnation law of the District. Certain gentlemen greatly interested have given much thought to the perfecting of this law and recently have presented their views to the Committee on the District of Columbia. I welcome this opportunity to express to any members of that committee who may be here the great importance of speedy action upon the matter. If it can be secured before the end of this session the public improvements now in progress will be greatly expedited.

When it came to the drafting of this bill I was greatly perplexed by the situation. I found that in the opinion of the assessors the land in question could not be bought or secured by condemnation at a price 25 per cent above its assessed value. Indeed, the assessors indicated their expectation that under condemnation proceedings it would be necessary to pay 80 per cent above the assessed value.

I must take a personal responsibility, for the committee saw fit to follow my advice to take an arbitrary limit of 40 per cent, and this bill is figured out on that basis. I have grave doubts whether we can get that land under condemnation for 40 per cent above assessed valuation; I am quite sure we can not get it all by trade, because the attempt to bargain in the matter of the Botanic Garden land has resulted in no offer being submitted at less than 100 per cent above valuation. One offer is for more than 200 per cent and one offer is for more than 500 per cent.

Mr. BLACK of Texas. That was just the complaint I wanted to make. It is well known to every Member of the House that there has been a very substantial decline in real-estate values in the city of Washington. I do not think any well-posted man would dispute that for a moment; and yet when the Government goes to buy an effort is made to get the price that prevailed three or four years ago.

I shall not object to this bill, in view of the statement the chairman has made, to wit, that the committee has reduced the original figure from $780,000 to $600,000, and I assume the committee amendment will be adopted. However, I hope no hurry will be made in the purchase of this land until the condemnation law can be amended so that the Government will have better protection than now exists. We should be as economical as possible in the purchase of any needed real estate.

Mr. LUCE. I may say to the gentleman that I am extremely doubtful whether the land can be purchased for the figure set forth in the bill before we get a proper, just, and fair condemnation law.

Mr. BLACK of Texas. Then it might be well to wait a while if it can not be purchased within that figure.

Mr. CRAMTON. Mr. Speaker, reserving the right to object, I have been very glad to hear the suggestion of the gentleman from Massachusetts, after his study of this question, as to the need of a new condemnation law, and his suggestion with reference to this situation simply emphasizes the fact that the development of the District and the development of Government projects here are being handicapped and held back because of the lack of a proper condemnation law. The 25 per cent provision is a very crude way to get at it, and is ineffective, and until we can have a condemnation law in which Congress can have confidence many such desirable projects as this are going to lag. I believe there is nothing more important before the District of Columbia Committee than the framing and reporting of the law to which the gentleman has referred.

Mr. GILBERT. If the gentleman will permit, we are holding hearings on that bill now and hope to report it in such form as to be satisfactory to the Congress. There are some provisions in the pending legislation which undoubtedly go too far. It provides for the taking of property before paying for it and retaining it without setting out any definite bounds.

Mr. CRAMTON. I hope the gentleman from Kentucky will feel that the House is in earnest about having an effective condemnation law, something that has some teeth in it that will protect the interests of the Government, and that even if a provision is a little different from what the gentleman is accustomed to I hope he will not be in opposition to it.

Mr. GILBERT. I will say to the gentleman that not only in condemnation matters but in many other ways enforcement of law in the District of Columbia has largely broken down.

Mr. CRAMTON. I would like to ask a question of the gentleman from Massachusetts [Mr. LUCE]. I wonder if the gentleman would object to an amendment—which I will not insist on, of course—to include the ranking minority member of the Committee on the Library as a member of this commission. I think it customary to give the minority representation, and I am glad to have the minority share part of the responsibility. I hope to offer the amendment when the bill is taken up, and I now withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That there is hereby created a joint commission to be composed of the chairman of the Committee on the Library of the Senate, the chairman of the Committee on the Library of the House of Representatives, and the Architect of the Capitol. The chairman of the Committee on the Library of the Senate shall act as chairman of the commission. The commission is authorized to sit and act at such times and places within the District of Columbia as it deems advisable. The chairman of the Committee on the Library of the House of Repre-

sentatives shall continue to serve upon the commission if he has been reelected to the House of Representatives, notwithstanding the expiration of the Congress. The members of the commission shall receive no additional compensation for their services as such members, but they shall be reimbursed for necessary expenses incurred by them in the performance of the duties vested in the commission. The commission shall cease to exist six months after the date of final acquisition of the property under the provisions of section 2 of this act.

SEC. 2. For the purpose of providing a site for additional buildings for the Library of Congress the commission is authorized and directed to acquire on behalf of the United States, by purchase, condemnation, or otherwise, at a cost not to exceed $780,000, all the privately owned land, including buildings and other structures, in squares Nos. 760 and 761, in the District of Columbia, as such squares appear on the records in the office of the surveyor of the District of Columbia as of the date of the enactment of this act. Any condemnation proceedings necessary to be instituted under the authority of this act shall be in accordance with the provisions of section 3 of the act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1891, and for other purposes," approved August 30, 1890, as amended.

SEC. 3. All such land, buildings, and structures, when acquired, shall be under the jurisdiction and control of the Architect of the Capitol, who is authorized, pending the demolition of such buildings and structures and the use of the land for Library purposes, (a) to lease any or all of such property for such periods and under such terms and conditions as he may deem most advantageous to the United States, (b) out of such appropriations as may be made therefor, to provide for the maintenance, repair, and protection of such property and to incur such other expenses as may be necessarily incident to such jurisdiction and control, and (c) to render available for the use of the Library, upon the request of the librarian, such portions thereof as may be suitable temporarily for storage or other purposes.

The proceeds of any leases hereunder shall be covered into the Treasury as miscellaneous receipts, and the Architect of the Capitol shall include in his annual report a detailed statement of his action under this section during the period covered by such report.

SEC. 4. The Architect of the Capitol is authorized to remove or to provide for the removal of such buildings and structures or such part thereof as may be necessary, upon request of the Joint Committee on the Library, when it shall become apparent to such committee that such land or any part thereof is needed for the purpose of commencing the construction of any additional building or buildings for the Library of Congress.

SEC. 5. After the demolition of the buildings and structures acquired hereunder, the Commissioners of the District of Columbia, upon request of the Joint Committee on the Library, are authorized and directed to close and vacate that part of A Street SE. lying between the east side of Second Street and the west side of Third Street SE., and the portion of such street so closed and vacated, together with the land acquired under this act, shall thereupon become a part of the grounds of the Library of Congress.

SEC. 6. Appropriations made for carrying out the provisions of this act shall be disbursed by the disbursing officer of the Interior Department.

With the following committee amendments:

Page 2, line 17, strike out "$780,000" and insert in lieu thereof "$600,000."

Page 2, line 18, strike out the language "in squares Nos. 760 and 761" and insert "in square No. 761, and so much thereof in square No. 760 as is south of the north side of the alley, being lots Nos. 15 to 30, inclusive, and including any easements or rights of reversion."

Page 4, line 15, strike out the words "and the portion of such street" and insert "and also the alley intersecting square No. 760 as described above in section 2, and the portion of such street and the whole of said alley."

The committee amendments were agreed to.

Mr. CRAMTON. Mr. Speaker, I offer several amendments, which I would be pleased to have considered together.

On page 1, in line 4, after the word "chairman," insert the words "and ranking minority member"; and in line 5, after the word "chairman," insert the same language; and on page 2, line 2, after the word "chairman," insert the same language.

Mr. ALLGOOD. Does that include the ranking minority member of the Senate Committee?

Mr. CRAMTON. That would include the ranking minority members of the Senate and of the House.

Mr. LUCE. Mr. Chairman, I have not the slightest objection to the amendments, but I would take the opportunity they give to say that the minority members of the Committee on the Library have cooperated with the majority members in such a whole-hearted way that I shall be pleased to have public record here made of their keen interest in the Library and their constant and active share in the promotion of its welfare.

Mr. CRAMTON. I felt it was more oversight than otherwise.

There should be one more amendment coupled with these amendments, page 2, line 4, strike out the words "he has" and insert "they have."

The SPEAKER. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 1, in line 4, after the word "chairman," insert the words "and ranking minority member"; in line 5, after the word "chairman," insert the words "and ranking minority member"; on page 2, line 2, after the word "chairman," insert the words "and ranking minority member"; and at page 2, line 4, strike out the words "he has" and insert in lieu thereof the words "they have."

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

### THE NATIONAL ARCHIVES

The next business on the Consent Calendar was the bill (H. R. 10545) to create an establishment to be known as the national archives, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object——

Mr. LANHAM, Mr. EDWARDS, and Mr. BLACK of Texas objected.

### INVESTIGATION OF WATERS OF GILA RIVER, N. MEX. AND ARIZ.

The next business on the Consent Calendar was the bill (H. R. 10786) authorizing surveys and investigations to determine the best methods and means of utilizing the waters of the Gila River and its tributaries above the San Carlos Reservoir in New Mexico and Arizona.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, has the gentleman from New Mexico got the consent of the State of Arizona with respect to this matter of water?

Mr. MORROW. Yes; this is an agreement between Arizona and New Mexico, if we can get the survey under which they will apportion these waters.

Mr. LAGUARDIA. I understood Arizona was resisting the attempt of any other State in any way to deprive it of the full and complete enjoyment of all its waters.

Mr. MORROW. The gentleman from Arizona is right here.

Mr. ARENTZ. In view of the manner in which the other State has recognized the equities of the matter, we are sure nothing will be done that would be harmful to Arizona.

Mr. LAGUARDIA. Does the gentleman from Nevada expect that by this Christian conduct on his part and others we can get Arizona to see the evil of its ways?

Mr. ARENTZ. In this case we are not going to smite the other cheek, but we are going to return good for evil.

Mr. LAGUARDIA. Wait until Boulder Dam legislation comes in and we will see about it.

Mr. MORROW. This is a case where Arizona is perfectly willing to agree.

Mr. LAGUARDIA. That is good for Arizona.

Mr. CRAMTON. Mr. Speaker, reserving the right to object, this bill provides for an expenditure from the Treasury. As I understand, it is agreeable to the gentleman from Arizona and the gentleman from New Mexico to have the expenditure made from the reclamation fund, and the gentlemen intend to provide for a local contribution. I therefore withdraw any objection, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior is hereby authorized and empowered to make all necessary surveys and investigations to ascertain the best methods and means of utilizing the waters of the Gila River and its tributaries above the San Carlos Reservoir for irrigation and other purposes in the States of New Mexico and Arizona. The Secretary of the Interior is further authorized and empowered to prepare plans and make estimates of the cost of constructing dams, canals, and other works necessary for the utilization of such waters.

SEC. 2. That there is hereby authorized to be appropriated for this purpose $25,000 from any money in the Treasury not otherwise appropriated.

Mr. MORROW. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Page 2, strike all of section 2 and insert in lieu thereof the following:

"SEC. 2. That there is hereby authorized to be appropriated for this purpose a sum not to exceed $12,500 from any money in the reclamation fund: *Provided further,* That the appropriation herein authorized shall not be available unless or until contributions of an equal amount shall have been provided from local sources."

The SPEAKER. The question is on the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MORROW, a motion to reconsider was laid on the table.

GRATUITY TO DEPENDENT RELATIVES OF OFFICERS, ENLISTED MEN OR NURSES

The next business on the Consent Calendar was the bill (H. R. 5548) to authorize payment of six months' death gratuity to dependent relatives of officers, enlisted men, or nurses whose death results from wounds or disease not resulting from their own misconduct.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I have no objection to the bill, but it is improperly drawn. It is inartistic to amend the law by referring to certain lines in the original bill. That is the proper way to amend a bill on the floor of the House, but not to amend existing law. I have prepared an amendment which recites the entire paragraph as it would read when amended. I think that is the way it ought to be done. Otherwise you have the necessity of referring to the original bill, and unless you get the right edition, the right print—and you may have a copy in pamphlet form—and there would be uncertainty. Here it is proposed to "amend by inserting after the 'colon in line 16' of said provision the following additional proviso," and so forth. In my amendment I refer to the act of June 4, 1920, Forty-first Statutes at Large, page 822, section 943, title 34, United States Code, and so forth, and amend "to read as follows." And then I put the amendment in the paragraph where it belongs.

The SPEAKER. The Clerk will report the bill.

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent that my amendment which I have sent to the desk may be read in lieu of the bill, as it strikes out all after the enacting clause.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Strike out everything after the enacting clause and insert in lieu thereof the following:

"That the provision contained in the act approved June 4, 1920 (41 Stat. L. p. 824; sec. 943, title 34, U. S. C.), is hereby amended to read as follows:

"'943. Allowance on death of officer or enlisted man or nurse, to widow, child, or dependent relative. Immediately upon official notification of the death from wounds or disease, not the result of his or her own misconduct, of any officer, enlisted man, or nurse on the active list of the regular Navy or regular Marine Corps, or on the retired list when on active duty, the Paymaster General of the Navy shall cause to be paid to the widow, and if there be no widow to the child or children, and if there be no widow or child to any other dependent relative of such officer, enlisted man, or nurse previously designated by him or her an amount equal to six months' pay at the rate received by such officer, enlisted man, or nurse at the date of his or her death. The Secretary of the Navy shall establish regulations requiring each officer and enlisted man or nurse having no wife or child to designate the proper dependent relative to whom this amount shall be paid in case of his or her death. Said amount shall be paid from funds appropriated for the pay of the Navy and pay of the Marine Corps, respectively: *Provided,* That if there be no widow, child, or previously designated dependent relative the Secretary of the Navy shall cause the amount herein provided to be paid to any grandparent, parent, sister, or brother shown to have been actually dependent upon such officer, enlisted man, or nurse prior to his or her death, and the determination of such fact by the Secretary of the Navy shall be final and conclusive upon the accounting officers of the Government: *Provided,* That nothing in this section or in other existing legislation shall be construed as making the provisions of this section applicable to officers, enlisted men, or nurses of any forces of the Navy of the United States other than those of the regular Navy and Marine Corps, and nothing in this section shall be construed to apply in commissioned grades to any officers except those holding permanent or probationary appointments in the regular Navy or Marine Corps: *Provided,* That the provisions of this section shall apply to the officers and enlisted men of the Coast Guard, and the Secretary of the Treasury will cause payment to be made accordingly.'"

The SPEAKER. The question is on the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

READJUSTING THE PAY AND ALLOWANCE OF COMMISSIONED AND ENLISTED PERSONNEL OF THE ARMY, NAVY, MARINE CORPS, COAST GUARD, COAST AND GEODETIC SURVEY, AND PUBLIC HEALTH SERVICE

The next business on the Consent Calendar was the bill (H. R. 5718) to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service."

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, this bill is similar to the other and seeks to amend by changing the last five lines of said paragraph 5 after the word "grade" and semicolon immediately following, and so forth.

Mr. BLACK of Texas. Further reserving the right to object, I will say that the bill carries a provision that will render it retroactive to July 1, 1926, and that retroactive clause will cost the Government $15,000. There really is no justification for that. I have consulted with some members of the Naval Affairs Committee, and they seem to be agreeable that that clause shall be stricken out. I shall offer an amendment to strike out this retroactive clause and thus save the Government about $15,000.

Mr. LAGUARDIA. Mr. Speaker, I have no objection, providing I offer an amendment.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.,* That paragraph 5, section 1, of the act approved June 10, 1922 (vol. 42, Stat. L., chap. 212, p. 626), entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," be, and the same is hereby, amended by changing the last five lines of said paragraph 5, after the word "grade" and semicolon immediately following, to read as follows: "and to lieutenant commanders and lieutenants of the Staff Corps of the Navy, and lieutenant commanders, lieutenants, and lieutenants (junior grade) of the line and engineer corps of the Coast Guard whose total commissioned service equals that of lieutenant commanders of the line of the Navy, drawing the pay of this period": *Provided,* That this amendment shall be effective from July 1, 1926.

Mr. LAGUARDIA. Mr. Speaker, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 1, strike all of line 9 and strike out all of page 2 and insert in lieu thereof the following, so that it will read as follows:

"The pay of the fourth period shall be paid to lieutenant colonels of the Army, commanders of the Navy, and officers of corresponding grades who are not entitled to the pay of the fifth or sixth periods; to majors of the Army, lieutenant commanders of the Navy, and officers of corresponding grades who have completed 14 years' service, or whose first appointment in the permanent service was in a grade above that corresponding to second lieutenant in the Army, or who are appointed to the Regular Army to fill vacancies created by the increase of the commissioned personnel thereof in 1920; to captains of the Army, lieutenants of the Navy, and officers of corresponding grades who have completed 17 years' service, except those whose promotion is limited by law to this grade and who are not entitled under existing law to the pay and allowances of the higher grade, and to lieutenant commanders and lieutenants of the Staff Corps of the Navy and lieutenant commanders, lieutenants and lieutenants (junior grade) of the line, and engineer corps of the Coast Guard, whose total commissioned service equals that of lieutenant commanders of the line of the Navy during the pay of this period: *Provided,* That this statement shall be effective from July 1, 1926."

Mr. BLACK of Texas. Mr. Speaker, I reserve the point of order on the amendment. This bill we now have before us is

designed to affect only 11 officers of the Navy. It seems to me that the gentleman is offering an amendment that will cover a wide field.

Mr. LaGUARDIA. Exactly. I have not offered anything new. The amendment changes only the last five lines of the act referred to, and I did not put anything new in it.

Mr. BLACK of Texas. Has the gentleman examined the language in his amendment very carefully to see that it does not go beyond the scope of the present bill?

Mr. LaGUARDIA. Of course I have. All I have done is to rewrite paragraph 5 as it is amended by the present bill. I would not think of doing anything else. Does the gentleman intend to offer an amendment striking out the retroactive feature?

Mr. BLACK of Texas. I have sent an amendment to the desk to do that. I ask that the reading of my amendment be changed so as to amend the LaGuardia amendment by striking out the proviso in the LaGuardia amendment and inserting the proviso which I have sent to the desk.

The Clerk read as follows:

Amendment by Mr. BLACK of Texas to the amendment offered by Mr. LaGUARDIA: Strike out from the LaGuardia amendment the following: "*Provided*, That this amendment shall be effective from July 1, 1926," and insert in lieu of the matter stricken out the following language: "that no back pay or allowance shall accrue by reason of the passage of this act."

The SPEAKER pro tempore (Mr. SNELL). The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

MECHANICS' HELPERS, POST OFFICE DEPARTMENT

The next business on the Consent Calendar was the bill (H. R. 7354) to allow the Postmaster General to promote mechanics' helpers to the first grade of special mechanics.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the third paragraph of section 6 of the act entitled "An act reclassifying the salaries of postmasters and employees of the Postal Service, readjusting their salaries and compensation on an equitable basis, increasing postal rates to provide for such readjustment, and for other purposes," approved February 28, 1925 (43 Stat. L. 1060), is amended to read as follows:

"Mechanics' helpers employed in the motor-vehicle service shall receive a salary of $1,600 per annum: *Provided*, That on and after the passage of the salary reclassification act of February 28, 1925, and upon the presentation of satisfactory evidence of their qualifications after one year's service, mechanics' helpers may be promoted to the first grade of general mechanics or special mechanics, as vacancies occur."

With the following committee amendment:

Page 1, line 9, after the figures "1060" insert "United States Code, title 39, section 116, paragraph 2."

The committee amendment was agreed to and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

MOTOR-VEHICLE SERVICE EMPLOYEES, POST OFFICE DEPARTMENT

The next business on the Consent Calendar was the bill (H. R. 8728) to authorize the Postmaster General to give motor-vehicle service employees credit for actual time served on a basis of one year for each 306 days of 8 hours served as substitute.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LaGUARDIA. Mr. Speaker, I have no objection to the merits of the bill, but the gentleman from Iowa [Mr. RAMSEYER], who is a very careful legislator, I think has forgotten to put in a cross reference to the United States Code. He referred to the Forty-third Statutes, page 1064, but that does not give us the proper cross reference to the United States Code.

Mr. RAMSEYER. It is there right after the figures "1064," in line 8, page 1, continuing on line 1 of page 2.

Mr. LaGUARDIA. Then I have not that print.

Mr. RAMSEYER. The gentleman has not the copy of the bill that was reported out.

Mr. LaGUARDIA. What section have you of the code?

Mr. RAMSEYER. Section 104, title 39.

Mr. LaGUARDIA. Because the Forty-third Statute, page 1064, is carried on in about 14 sections of the United States Code.

Mr. RAMSEYER. The gentleman has a copy of the bill before it was amended.

Mr. LaGUARDIA. That answers the question. I knew the gentleman was too careful a legislator to let anything like that get by.

Mr. RAMSEYER. I try to keep up with the pace set by the distinguished gentleman from New York.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That section 11 of the act entitled "An act reclassifying the salaries of postmasters and employees of the Postal Service, readjusting their salaries and compensation on an equitable basis, increasing postal rates to provide for such readjustment, and for other purposes," approved February 28, 1925 (43 Stat. L. 1064), is amended by adding thereto the following:

"Substitute clerks, substitute garage-men drivers, substitute driver-mechanics, substitute general mechanics, and substitute special mechanics, when appointed regular clerks, garage-men drivers, driver-mechanics, general mechanics, or special mechanics in the motor-vehicle service, shall be given credit for the actual time served as a substitute on the basis of one year for each 306 days of eight hours, and shall be appointed to the grade to which such clerk, garage-man driver, driver-mechanic, general mechanic, or special mechanic would have progressed had his original appointment as a substitute been made to grade 1. Substitute service shall be computed from the date of original appointment as a regular classified substitute, and the salaries of the employees shall be fixed accordingly upon the date of their advancement to a regular position under the act of February 28, 1925, and thereafter."

With the following committee amendments:

Page 1, line 8, after the figures "1,064," insert "United States Code, title 39, section 104."

Page 2, line 4, after the word "driver-mechanics," insert the word "and."

Page 2, line 5, strike out "and substitute special mechanics."

Page 2, line 6, after the word "driver-mechanics," insert the word "or."

Page 2, line 7, after the word "mechanics," strike out the comma and the words "or special mechanics."

Page 2, line 11, after the word "driver-mechanics," insert the word "or."

Page 2, line 12, after the word "mechanic," strike out "or special mechanic."

The committee amendments were agreed to and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

STANDARDS FOR HAMPERS AND BASKETS

The next business on the Consent Calendar was the bill (H. R. 8907) to fix standards for hampers, round-stave baskets, and splint baskets for fruits and vegetables, and for other purposes.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LaGUARDIA. Mr. Speaker, reserving the right to object, I have one or two amendments here that I believe are necessary from my study of the bill. I would like to know the views of the Member who introduced the bill, but inasmuch as he is not on the floor at this time I ask unanimous consent that the bill may be passed over without prejudice.

Mr. LOWREY. I am not the sponsor of the bill, but I am a member of the committee which reported it. This bill has been passed over many times. It is so heartily approved and heartily appealed for over and over by both the trade and the dealers that I think it should be passed. There has been a strong sentiment for the passage of this bill for four or five years. I think it has been before our committee at least that long. I should hate to see it delayed.

Mr. LaGUARDIA. Would the gentleman object to the amendment?

Mr. LOWREY. What amendment?

Mr. LaGUARDIA. On page 5 you can relieve the dealer from responsibility if he can produce a signed guaranty from the manufacturer of these hampers. I would tighten that up a little. Also, at the bottom of page 5, lines 25 and 26, I think the language is ill-chosen and may lead to confusion. Instead

of referring to the person who made the purchase I would name him as the person who offers the article for sale.

Mr. LOWREY. I do not think there would be any objection to that last amendment. Will the gentleman state the first one again?

Mr. LAGUARDIA. Yes. On page 5 your bill reads that—

No person shall be prosecuted under the provisions of this act when he can establish a guaranty signed by the manufacturer, wholesaler, shipper, or other party residing within the United States from whom the hampers were purchased.

That establishes the party who signs the guaranty. I would place the guaranty on the man who offers the article.

Mr. LOWREY. I would not object to that guaranty.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.,* That the standard hampers and round stave baskets for fruits and vegetables shall be of the following capacities: One-eighth bushel, one-fourth bushel, one-half bushel, three-fourths bushel, 1 bushel, 1½ bushels, and 2 bushels, which, respectively, shall be of the cubic content set forth in this section. For the purposes of this act a bushel standard dry measure has a capacity of 2,150.42 cubic inches.

(a) The standard one-eighth-bushel hamper or round stave basket shall contain 268.8 cubic inches.

(b) The standard one-fourth-bushel hamper or round stave basket shall contain 537.6 cubic inches.

(c) The standard one-half-bushel hamper or round stave basket shall contain 1,075.21 cubic inches.

(d) The standard three-fourths-bushel hamper or round stave basket shall contain 1,612.8 cubic inches.

(e) The standard one-bushel hamper or round stave basket shall contain 2,150.42 cubic inches.

(f) The standard 1½-bushel hamper or round stave basket shall contain 3,225.63 cubic inches.

(g) The standard 2-bushel hamper or round stave basket shall contain 4,300.84 cubic inches.

With a committee amendment, as follows:

Section 1, page 2, line 21, after the word "inches" insert: "*Provided,* That nothing herein contained shall prohibit or interfere with the farmers or market gardeners, or others, using five-eighths-bushel baskets in gathering, delivering, and selling their products to canning, packing, or wholesale houses."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The Clerk will proceed with the reading of the bill for amendment.

The Clerk read as follows:

SEC. 2. That the standard splint baskets for fruits and vegetables shall be the 4-quart basket, 8-quart basket, 12-quart basket, 16-quart basket, 24-quart basket, and 32-quart basket, standard dry measure. For the purposes of this act a quart standard dry measure has a capacity of 67.2 cubic inches.

(a) The 4-quart splint basket shall contain 268.8 cubic inches.

(b) The 8-quart splint basket shall contain 537.6 cubic inches.

(c) The 12-quart splint basket shall contain 806.4 cubic inches.

(d) The 16-quart splint basket shall contain 1,075.21 cubic inches.

(e) The 24-quart splint basket shall contain 1,612.8 cubic inches.

(f) The 32-quart splint basket shall contain 2,150.42 cubic inches.

SEC. 3. That the Secretary of Agriculture shall in his regulations under this act prescribe such tolerances as he may find necessary to allow in the capacities for hampers, round-stave baskets, and splint baskets set forth in sections 1 and 2 of this act in order to provide for reasonable variations occurring in the course of manufacturing and handling. If a cover be used upon any hamper or basket mentioned in this act, it shall be securely fastened or attached in such a manner, subject to the regulations of the Secretary of Agriculture, as not to reduce the capacity of such hamper or basket below that prescribed therefor.

SEC. 4. That no manufacturer shall manufacture hampers, round-stave baskets, or splint baskets for fruits and vegetables unless the dimension specifications for such hampers, round-stave baskets, or splint baskets shall have been submitted to and approved by the Secretary of Agriculture, who is hereby directed to approve such specifications if he finds that hampers, round-stave baskets, or splint baskets for fruits and vegetables made in accordance therewith would not be deceptive in appearance and would comply with the provisions of sections 1 and 2 of this act.

SEC. 5. That it shall be unlawful to manufacture for sale or shipment, to offer for sale, to sell, to offer for shipment, to ship, or to import or cause to be imported into the continental United States, hampers, round-stave baskets, or splint baskets for fruits or vegetables, either filled or unfilled, or parts of such hampers, round-stave baskets, or splint baskets that do not comply with this act: *Provided,* That this act shall not apply to Climax baskets, berry boxes, and till baskets which comply with the provisions of the act approved August 31, 1916, entitled "An act to fix standards for Climax baskets for grapes and other fruits and vegetables, and to fix standards for baskets and other containers for small fruits, berries, and vegetables, and for other purposes" (39 U. S. Stat. L. 673), and the regulations thereunder. Any individual, partnership, association, or corporation that willfully violates this section shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not exceeding $500: *Provided further,* That no person shall be prosecuted under the provisions of this act when he can establish a guaranty signed by the manufacturer, wholesaler, shipper, or other party residing within the United States from whom the hampers, round-stave baskets, or splint baskets, as defined in this act, were purchased, to the effect that said hampers, round-stave baskets, or splint baskets are correct, within the meaning of this act. Said guaranty, to afford protection, shall contain the name and address of the party or parties making the sale of the hampers, round-stave baskets, or splint baskets to such person, and in such case such party or parties making such sale shall be amenable to the prosecution, fines, and other penalties which would attach in due course under the provisions of this act to the person who made the purchase.

Mr. LAGUARDIA. Mr. Speaker, I offer an amendment.

The SPEAKER pro tempore. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 5, line 13, after the word "guaranty," insert the words "and identified." On line 14, strike out the words "signed by"; and in line 15, after the word "States," insert "who signed such guaranty and."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. LAGUARDIA. Mr. Speaker, I offer another amendment.

The SPEAKER pro tempore. The gentleman from New York offers another amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 5, line 25, after the word "made," insert "or offered to make a resale," and strike out all of line 26.

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The Clerk will proceed with the reading of the bill for amendment.

The Clerk read as follows:

SEC. 6. That any hamper, round stave basket, or splint basket for fruits or vegetables, whether filled or unfilled, or parts of such hampers, round stave baskets, or splint baskets not complying with this act, which shall be manufactured for sale or shipment, offered for sale, sold, shipped, or imported, may be proceeded against in any district court of the United States within the district where the same shall be found and may be seized for confiscation by a process of libel for condemnation. Upon request the person entitled shall be permitted to retain or take possession of the contents of such hampers or baskets, but in the absence of such request, or when the perishable nature of such contents makes such action immediately necessary, the same shall be disposed of by destruction or sale, as the court or a judge thereof may direct. If such hampers, round stave baskets, splint baskets, or parts thereof be found in such proceeding to be contrary to this act, the same shall be disposed of by destruction, except that the court may by order direct that such hampers, baskets, or parts thereof be returned to the owner thereof or sold upon the payment of the costs of such proceeding and the execution and delivery of a good and sufficient bond to the effect that such hampers, baskets, or parts thereof shall not be sold or used contrary to law. The proceeds of any sale under this section, less legal costs and charges, shall be paid over to the person entitled thereto. The proceedings in such seizure cases shall conform as nearly as may be to the proceedings in admiralty, except that either party may demand trial by jury of any issue of fact joined in such cases, and all such proceedings shall be at the suit and in the name of the United States.

SEC. 7. That this act shall not prohibit the manufacture for sale or shipment, offer for sale, sale, or shipment of hampers, round stave baskets, splint baskets, or parts thereof to any foreign country in accordance with the specifications of a foreign consignee or customer not contrary to the law of such foreign country; nor shall this act prevent the manufacture or use of banana hampers of the shape and character now in commercial use as shipping containers for bananas.

SEC. 8. That it shall be the duty of each United States district attorney to whom satisfactory evidence of any violation of this act is presented to cause appropriate proceedings to be commenced and prose-

cuted in the proper courts of the United States in his district for the enforcement of the provisions of this act.

SEC. 9. That the Secretary of Agriculture shall prescribe such regulations as he may find necessary for carrying into effect the provisions of this act, and shall cause such examinations and tests to be made as may be necessary in order to determine whether hampers, round stave baskets, and splint baskets, or parts thereof, subject to this act, meet its requirements, and may take samples of such hampers, baskets, or parts thereof, the cost of which samples, upon request, shall be paid to the person entitled.

SEC. 10. That for carrying out the purposes of this act the Secretary of Agriculture is authorized to cooperate with State, county, and municipal authorities, manufacturers, dealers, and shippers to employ such persons and means, and to pay such expenses, including rent, printing, publications, and the purchase of supplies and equipment in the District of Columbia and elsewhere, as he shall find to be necessary, and there are hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary for such purposes.

SEC. 11. That sections 5 and 6 of this act shall become effective at but not before the expiration of one year following the 1st day of November next succeeding the passage of this act.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

The SPEAKER pro tempore. The Clerk will report the next bill.

COMMUNITY MAIL BOXES ON RURAL ROUTES

The next business on the Consent Calendar was the bill (H. R. 12605) to enable the Postmaster General to purchase and erect community mail boxes on rural routes and to rent compartments of such boxes to patrons of rural delivery.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I reserve the right to object, for the purpose of obtaining information. On page 2, line 1, it is provided that the units of said boxes and space in said racks or stands shall be rented at their option to patrons of the rural delivery service. Is there any need for that wording in the bill?

Mr. KENDALL. That was put in so as not to compel the person to rent a box if he didn't want one.

Mr. LAGUARDIA. In other words, it will be better if persons who wish to avail themselves of it pay out of their own private funds?

Mr. KENDALL. That is the object.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That under such regulations as he may provide the Postmaster General be, and he is hereby, authorized to purchase community boxes with or without separate compartments for incoming and outgoing mail and to erect and maintain such community boxes and suitable sheltered racks or stands for rural mail boxes, in such selected localities as he may determine. The units of said boxes and space in said racks or stands shall be rented at their option to patrons of the rural delivery service at such monthly or annual rates as the Postmaster General shall determine, based on the cost of installation and maintenance. The cost of such installation and maintenance of said community boxes and sheltered stands, not exceeding $2,000 per annum, shall hereafter be paid from the appropriation for rural delivery.

With a committee amendment as follows:

On page 1, line 5, strike out the words "or without."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

THOMAS A. EDISON

The next business on the Consent Calendar was House Joint Resolution 243, to provide for the coinage of a medal commemorative of the achievements of Thomas A. Edison in illumining the path of progress through the development and application of inventions that have revolutionized civilization in the last century.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. HOOPER. Mr. Speaker, reserving the right to object, I want to say I have nothing against the bill itself, but I do not see the gentleman from New Jersey [Mr. PERKINS] present and something has come to my attention which I would like to investigate. Therefore I am going to ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Without objection it is so ordered.

There was no objection.

CONSOLIDATION OF COPYRIGHT ACTS

The next business on the Consent Calendar was the bill (H. R. 8913) to amend sections 27, 42, and 44 of the act entitled "An act to amend and consolidate the acts respecting copyrights," approved March 4, 1909.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LANHAM. Mr. Speaker, at the request of the chairman of the Committee on Patents, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Without objection it is so ordered.

There was no objection.

STANDARDIZATION OF LIME BARRELS

The next business on the Consent Calendar was the bill (H. R. 43) to amend an act entitled "An act to standardize lime barrels," approved August 23, 1916.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, since the gentleman from Ohio [Mr. CHALMERS] talked to me one thing has occurred to me. Who assumes the responsibility for the quality, as well as the weight of this lime, when it is sold by what the gentleman calls in the bill the shipper?

Mr. CHALMERS. The shipper guarantees the quality.

Mr. LAGUARDIA. In other words, the mere fact that he does not put the name of the manufacturer on the barrel does not relieve him of responsibility?

Mr. CHALMERS. No. He assumes all responsibility for the weight and quality.

Mr. LAGUARDIA. Is this reselling from the manufacturer done by irresponsible concerns, so that there is a way out of assuming responsibility as to weight and quality?

Mr. CHALMERS. No. It protects the public, as I understand it.

Mr. LAGUARDIA. Then the shipper would assume responsibility as to quality and weight?

Mr. CHALMERS. Absolutely.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That sections 2 and 3 of the act entitled "An act to standardize lime barrels," approved August 23, 1916, are amended to read as follows:

"SEC. 2. That it shall be unlawful for any person to sell or offer for sale lime imported in barrels from a foreign country, or to sell or offer for sale lime in barrels for shipment from any State or Territory or the District of Columbia, to any other State or Territory or the District of Columbia, unless there shall be stenciled or otherwise clearly marked on one or both heads of the small barrel the figures "180 lbs. net" and of the large barrel the figures "280 lbs. net" before the importation or shipment, and on either barrel in addition the name of the shipper or manufacturer of the lime and where manufactured, and, if imported, the name of the country from which it is imported.

"SEC. 3. When lime is sold in interstate or foreign commerce in containers of less capacity than the standard small barrel, it shall be sold in fractional parts of said standard small barrel, and the net weight of lime contained in such container shall by stencil or otherwise be clearly marked thereon, together with the name of the shipper or manufacturer thereof, and the name of the brand, if any, under which it is sold, and, if imported, the name of the country from which it is imported."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ENLISTED MEN IN THE NAVAL SERVICE

The next business on the Consent Calendar was the bill (H. R. 5644) to enable an enlisted man in the naval service to make good time lost in excess of one day under certain conditions.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That every enlisted man in the naval service who, without proper authority, absents himself from his ship, station, or duty for more than one day, or who is confined for more than one day under sentence, or while awaiting trial and disposition of his case, if the trial results in conviction, shall be liable to serve, after his return to a full-duty status, for such period as shall, with the time he may have served prior to such unauthorized absence or confinement, amount to the full term of his enlistment.

With the following committee amendment:

In line 7 strike out the words "shall be liable to" and insert in lieu thereof the words "may be permitted to."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ADVANCEMENT OF PUBLIC FUNDS TO NAVAL PERSONNEL

The next business on the Consent Calendar was the bill (H. R. 11621) to authorize the Secretary of the Navy to advance public funds to naval personnel under certain conditions.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I have an amendment to offer to this bill. I have talked it over with the gentleman from Georgia [Mr. VINSON]. He is engaged in committee work just now, but I believe he would not object to the amendment, and with that understanding I will withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Navy is hereby authorized, in accordance with such regulations as may be approved by the President, to advance public funds to naval personnel when required to meet expenses of officers and men detailed on shore patrol duty, or emergency duty: *Provided*, That the funds so advanced shall not exceed a reasonable estimate of the actual expenditures to be made and for which reimbursement is authorized by law.

Mr. LAGUARDIA. Mr. Speaker, I offer an amendment. In line 7, strike out the words "shore patrol duty or" and after the word "emergency" insert the word "shore," so it will read "expenses of officers and men detailed on emergency shore duty."

The SPEAKER pro tempore. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: In line 7, strike out the words "shore patrol duty or," and after the word "emergency" insert the word "shore."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE OHIO RIVER

The next business on the Consent Calendar was the bill (S. 797) granting the consent of Congress to the J. K. Mahone Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River, at or near Wellsburg, W. Va.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I hope the gentleman from West Virginia will understand that this is simply following a policy in connection with these bridge bills. Does the gentleman know the grantee in this bill?

Mr. BACHMANN. I might say to the gentleman from New York that Mr. Mahone, who originally wanted the permit to build this bridge, on investigation did not turn out to be a satisfactory and proper party. The gentleman from Ohio [Mr. MURPHY], whose district parallels mine and whose district the bridge touches, and I investigated Mr. Mahone. As the gentleman will note, we objected to the passage of the bill the last time it was before the House. We did that in order to have an opportunity to have the town council at Wellsburg make an investigation. That has been done, and the town council is in favor of this bridge and the community is back of it.

Mr. LAGUARDIA. Is the permit to go to Mahone?

Mr. BACHMANN. It goes to the Mahone Bridge Co.

Mr. LAGUARDIA. And this corporation will build the bridge itself?

Mr. BACHMANN. Yes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the J. K. Mahone Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Ohio River at a point suitable to the interests of navigation at or near Wellsburg, Brooke County, W. Va., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the J. K. Mahone Bridge Co., its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches and terminals as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation and expropriation of property in such State.

SEC. 3. The said J. K. Mahone Bridge Co., its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of West Virginia, the State of Ohio, any political subdivision of either of such States within or adjoining which any part of such bridge is located, or any two or more of them jointly may at any time acquire or take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of, first, the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; second, the actual cost of acquiring such interests in real property; third, actual financing and promotion cost, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property; and fourth, actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the States or political subdivisions thereof as provided in section 4 of this act, and if tolls are charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the cost of maintaining, repairing, and operating the bridge and its approaches, to pay an adequate return on the cost thereof, and to provide a sinking fund sufficient to amortize the amount paid therefor, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient to pay the cost of acquiring the bridge and its approaches shall have been provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper care, repair, maintenance, and operation of the bridge and its approaches. An accurate record of the amount paid for acquiring the bridge and its approaches, the expenditures for operating, repairing, and maintaining the same, and of the daily tolls collected shall be kept, and shall be available for the information of all persons interested.

SEC. 6. The J. K. Mahone Bridge Co., its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War a sworn itemized statement showing the actual original cost of constructing such bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, at any time within three years after the completion of such bridge, investigate the actual cost of constructing the same; and for such purpose the said J. K. Mahone Bridge Co., its successors and assigns, shall make available all of its records in connection with the financing and the construction thereof. The findings of the Secretary of War as to the actual original cost of the bridge shall be conclusive, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to the J. K. Mahone Bridge Co., its successors and assigns; and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendments:

Page 1, line 3, strike out the words "the consent of Congress is hereby granted to" and insert the words "in order to promote interstate commerce, improve the Postal Service, and provide for military and other purposes."

Page 1, line 6, after the word "assigns," insert the words "be and is hereby authorized."

Page 2, line 12, strike out the words "and terminals."

Page 2, line 19, strike out the word "and" and insert the word "or."

Page 3, line 5, after the word "any," insert the words "public agency or."

Page 3, line 11, after the word "condemnation," insert the words "or expropriation."

Page 3, line 13, after the word "condemnation," insert the words "or expropriation."

Page 3, line 16, after the word "condemnation," insert the words "or expropriation."

Page 4, line 1, strike out the word "interest" and insert the word "interests."

Page 4, line 3, after the word "shall," insert the words "at any time."

Page 4, line 5, after the word "are," insert the word "thereafter."

Page 4, line 7, after the word "the," insert the word "reasonable."

Page 4, line 9, after the word "approaches," insert the words "under economical management."

Page 4, line 11, after the word "therefor," insert the words "including reasonable interest and financing cost."

Page 4, line 15, after the word "sufficient," strike out the words "to pay the cost of acquiring the bridge and its approaches" and insert the words "for such amortization."

Page 4, line 17, after the word "been," insert the word "so."

Page 4, line 20, after the word "proper," strike out the word "care."

Page 4, line 21, after the word "approaches," insert the words "under economical management."

Page 4, line 23, after the word "the," insert the word "actual."

Page 5, line 5, after the word "War," insert the words "and with the highway departments of the States of West Virginia and Ohio."

Page 5, line 11, after the word "may," insert the words "and upon request of the highway department of either of such States shall."

Page 5, line 14, after the word "investigate," strike out the words "the actual cost of constructing the same" and insert the words "such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of cost so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge."

Page 5, line 19, after the word "for," strike out the word "such" and insert the word "the." And in the same line, after the word "purpose" insert the words "of such investigation."

Page 5, line 22, after the word "the," insert the word "construction," and in the same line, after the word "and," strike out the words "the construction" and insert the word "promotion."

Page 5, line 24, after the word "the," strike out the words "actual original cost" and insert the words "reasonable cost of the construction, financing, and promotion."

Page 6, line 1, after the word "conclusive," insert the words "for the purposes mentioned in section 4 of this act."

The committee amendments were agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

The title was amended.

A motion to reconsider the vote by which the bill was passed was laid on the table.

INTERNATIONAL STREET, NOGALES, ARIZ.

The next business on the Consent Calendar was the bill (S. 2004) authorizing the paving of the Federal strip known as International Street, adjacent to Nogales, Ariz.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, I have gone over the peculiar circumstances in this case at some length with the gentleman from Arizona [Mr. DOUGLAS]. The circumstances here seem to be entirely different from what we are apt to find at any other place, and they are so different I feel reassured that granting this paving would not constitute a precedent on which claim could be made for paving adjacent to public buildings.

Mr. DOUGLAS of Arizona. It could not be so construed.

Mr. CRAMTON. In this case we own the fee simple of the land, while we do not in the other cases. The estimate furnished carries a number of frills that really ought not to be provided at our expense. If the city of Nogales wants to provide them, I think there would be no objection. If the gentleman from Arizona will consent to a reduction of the amount to $40,000, I would withdraw any objection to the bill. This amount would provide the roadway, but would eliminate some of the ornamentation.

Mr. DOUGLAS of Arizona. In order that the road may be paved I would be willing to accept that as an amendment.

Mr. CRAMTON. I withdraw any objection.

Mr. DOUGLAS of Arizona. I thank the gentleman.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause the grading and paving of the Federal strip of land known as International Street, belonging to the United States, along the international boundary line between Mexico and the United States, and adjacent to the city of Nogales, Ariz., said paving to extend from the east side of Nelson Avenue to the top of the hill beyond West Street, with the necessary retaining walls, storm sewers, the installation of an ornamental lighting system, and other items necessary in connection therewith, at a limit of cost of $60,000.

Mr. CRAMTON. Mr. Chairman, I offer an amendment striking out $60,000 and insert $40,000.

The SPEAKER pro tempore. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: On page 2, line 2, strike out "$60,000" and insert in lieu thereof "$40,000."

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ZUNI RESERVATION, N. MEX.

The next business on the Consent Calendar was the bill (S. 1456) to authorize an appropriation for a road on the Zuni Indian Reservation, N. Mex.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That there is hereby authorized an appropriation of $8,000, out of any money in the Treasury not otherwise appropriated, for the construction of that portion of the Gallup-St. Johns highway within the Zuni Indian Reservation, N. Mex., under the direction of the Secretary of the Interior and in conformity with such rules and regulations as he may prescribe: *Provided*, That Indian labor shall be employed so far as practicable: *And provided further*, That the proper authorities of the State of New Mexico or the county of McKinley shall agree to maintain such road free of expense to the United States.

Mr. CRAMTON. Mr. Speaker, I move to strike out the last word.

It is my understanding if this bill becomes law the Government of the United States will be put to no further expense in the construction or maintenance of this road.

Mr. MORROW. That is what the bill provides.

Mr. CRAMTON. And that with this appropriation toward construction the county will take the road over and whatever is done in the future will be done by the county.

Mr. MORROW. Yes.

Mr. CRAMTON. On this basis I have offered no objection to the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

Mr. MORROW. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting in the RECORD the report on this bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

The report is as follows:

Mr. MORROW, from the Committee on Indian Affairs, submitted the following report (to accompany S. 1456):

The Committee on Indian Affairs, to whom was referred the bill (S. 1456) to authorize an appropriation for a road on the Zuni Indian Reservation, N. Mex., having considered the same, report thereon with a recommendation that it do pass without amendment.

This bill has the approval of the Secretary of the Interior and the Director of the Bureau of the Budget.

When constructed, the road will connect two State highways, providing access to markets for Indians of the Zuni Reservation. The road is not on the State's approved 7 per cent system and therefore not eligible for Government aid under the Federal highway act. The State has built a good road to the reservation line on each side, and this will eliminate a link which is almost impassable at times.

In order that the greatest possible benefit may accrue to the Indians, provision is contained in the bill that Indian labor shall be employed so far as practicable.

The State of New Mexico or the county of McKinley must agree to maintain the road free of expense to the United States before construction is started.

Your committee, after full consideration, believes that construction of the road is not only wise but desirable and that proper safeguards are placed in the bill.

The Secretary of the Interior reports favorably, as follows:

DEPARTMENT OF THE INTERIOR,
*Washington, January 18, 1928.*

Hon. LYNN J. FRAZIER,
*Chairman Committee on Indian Affairs,*
*United States Senate.*

MY DEAR SENATOR FRAZIER: This will refer further to your letter of December 17, transmitting for report and recommendation a copy of S. 1456, proposing to authorize an appropriation of $8,000 for the construction of that portion of the Gallup-St. Johns Highway on the Zuni Indian Reservation, N. Mex.

This road is a link in the National Park-to-Park Highway. It also connects with the famous Petrified Forest and El Morro, or Inscription Rock. The State has built a good road up to the reservation line on both sides, but as the Indian land is not subject to taxation, the State feels that the Government should provide funds for that part of the road on the reservation, or about 15 miles. However, this road is not on the State's approved 7 per cent system and hence it is not eligible for Government aid under the Federal highway act.

This department has no appropriation for road work on the Indian reservation; hence we have not been able to do more than try to keep the road open to traffic by making the most urgent repairs with the limited funds available. It is stated that the road is in bad condition; that part of it is almost impassable at times; and that travelers suffer great inconvenience and discomfort on account of the difficulty encountered in getting across the reservation. It is very desirable to have the road rebuilt on a par with the State highway on each side of the reservation, at a cost of approximately $8,000, the amount carried in the bill.

Under the circumstances, therefore, and for the reasons given above, it is recommended that S. 1456 be enacted into law.

The Director of the Bureau of the Budget advises that this report is not in conflict with the President's financial program.

Very truly yours,

HUBERT WORK.

ADMINISTRATION OF OATHS OF OFFICE

The next business on the Consent Calendar was the bill (H. R. 12408) authorizing custodians and acting custodians of Federal buildings to administer oaths of office to employees in the custodian service.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, is the gentleman from Indiana [Mr. ELLIOTT] here?

Mr. DENISON. The gentleman has gone out to the election, I will say to the gentleman from New York.

Mr. LAGUARDIA. Oh, yes. There is a reference here to section 2693 of the Revised Statutes, and I do not know whether this is an error or not. I spent a great deal of time trying to locate this section of the Revised Statutes but could not find it. I located section 1790 very readily. I simply wanted to call attention to this, but if there is any mistake I suppose they can catch it in the Senate. I do not think it is sufficiently important to hold up the matter.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.,* That hereafter custodians and acting custodians of Federal buildings shall be competent to administer oaths of office to employees in the custodian service, required by sections 1790 and 2693 of Revised Statutes.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BATTLE BETWEEN THE SIOUX AND PAWNEE INDIAN TRIBES

The next business on the Consent Calendar was the bill (H. R. 9194) authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle between the Sioux and Pawnee Indian tribes, Hitchcock County, Nebr., fought in the year 1873.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. CRAMTON. Reserving the right to object, I understand it is probable these lands will be donated. Will it be agreeable to the gentleman to have an amendment providing for that?

Mr. SHALLENBERGER. I have a letter from the American Legion saying that they will acquire the land.

Mr. CRAMTON. It can be accomplished by striking out line 4 and inserting a statement that we accept the donation.

Mr. LAGUARDIA. The gentleman from Nebraska will not object to my proposed amendment which I am offering to all bills of this character providing that the monument shall be the work of some artist a citizen of the United States?

Mr. SHALLENBERGER. No.

The Clerk read the bill, as follows:

*Be it enacted, etc.,* That the Secretary of the Interior is hereby authorized and directed to acquire, by condemnation or otherwise, such land as may be deemed appropriate, not exceeding 40 acres, on the site of the battle between the Sioux and Pawnee Indians near the Republican River in Hitchcock County, Nebr., the last battle between Indian tribes on American soil, and to erect thereon a suitable monument and historical tablets.

SEC. 2. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $10,000, or so much thereof as may be necessary to carry out the provisions of this act.

With the following committee amendment:

Page 2, section 2, line 3, strike out the figures "$10,000" and insert in lieu thereof the figures "$7,500."

The committee amendment was agreed to.

Mr. CRAMTON. Mr. Speaker, I offer the following amendment:

The Clerk read as follows:

Page 1, strike out line 4 and insert in lieu thereof "and accept the donation of."

The amendment was agreed to.

Mr. LAGUARDIA. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Page 2, after the word "act" in line 4 strike out the period, insert a colon and the following: "*Provided,* That said work shall be the work of an artist who is a citizen of the United States."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. SHALLENBERGER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing the report on this bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The report is as follows:

The monument proposed to be erected is to commemorate the last great battle between Indian tribes fought on American soil. As far back as records are available the Republican Valley was famous as a hunting ground for the Pawnee and other Indian tribes. After white men learned of the game to be found there, it became the region most favored for buffalo hunting in the West. Railroads were built up the Platte Valley to the north and across Kansas to the south, which resulted in the buffalo being soon driven from those sections, but there were still plenty in the great valley lying between the pioneer railroads. Both Buffalo Bill and Dr. W. F. Carver are said to have considered this region the best big-game hunting ground in the world in the early sixties and seventies.

Many famous buffalo-hunting expeditions visited the Republican Valley region, where it is proposed to erect this monument. Probably the most celebrated was that of the Russian Grand Duke Alexis and a party of distinguished men of the Russian Empire. The hunt was a national event, planned by Gen. Philip Sheridan as the representative of our Government and under the immediate command of General Custer. W. F. Cody, "Buffalo Bill," was chief of scouts at Fort McPherson, where the hunting party was outfitted, and was in actual charge of the details of the hunt. Spotted Tail, war chief of the Brule Sioux, accom-

panied the hunting party with a band of 300 Sioux warriors and buffalo hunters. The party hunted over the same ground in 1872 that the Pawnee and Sioux warriors fought over in August of 1873.

From the earliest times the Republican Valley had been the hunting ground for the great Pawnee Nation. They claimed it as their special hunting preserve. When a treaty was agreed to between the Federal Government and the Pawnee, the Indians had reserved to themselves the right to hunt buffalo in the Republican Valley to provide them necessary meat and leather supply.

The Government agents and Army officers divided the hunting grounds in western Nebraska into north and south Platte sections. They required that the Sioux must hunt north of the Platte and leave the valley of the Republican River for the sole use of the Pawnee Nation. The Pawnees were historically and essentially the Nebraska Indian Nation. The name Nebraska is a Pawnee word meaning Broad Waters, the Indian name for the State's principal river. The river's name was later changed into the more modern version, the Platte.

The Pawnee Nation was divided into three tribes or clans—the Loup Pawnee, the Grand Pawnee, and the Republican Pawnee. The Loups lived north and east of the Platte and gave their name to the principal river in that section. The Grand Pawnees occupied the valley of the Platte or middle ground, and the Republican Pawnees claimed the region farther south.

When the nation engaged in its great annual hunt or went into battle this same organization was always followed. The Loups hunted or fought upon the right wing, the Grand Pawnee in the center, and the Republican Pawnee upon the left. Hence the north river on the right was named the Loup and the south river, or left as the nation moved west to hunt, was named Republican for the left wing tribe.

In the summer of 1873 the Pawnee Nation was occupying a reservation on the north of the Platte River and in northeastern Nebraska, not far from the site of the city of Columbus. The Indians petitioned the Government agent for permission to make their annual hunt for buffalo in the Republican Valley. They wanted to secure their meat and robe supplies for the coming winter. Permission was granted.

In July, 1873, about 600 buffalo hunters and warriors, with some women and children to do the work, started westward up the Platte Valley. They were accompanied by two white men as agents of the Government to see that they conducted themselves peacefully and did not commit depredations upon any white settlers or hunters they might encounter.

The hunting party turned south from the valley of the Platte at a point near Plum Creek and traveled over into their favorite hunting ground on the Republican and its tributaries. They hunted there for nearly a month, killing many buffalo and curing much meat and many skins.

On the 5th of August they had hunted westward to a point in Hitchcock County west of the north fork of the Republican, now called the Frenchman River. Sky Chief was in command of the Pawnee hunting party at this time. Word was brought to him by two white hunters who were fleeing down the valley eastward that a large war party of Brule Sioux had crossed over the Platte and were now in the Republican Valley and evidently looking for opportunity to battle with their hereditary foe, the Pawnee.

Sky Chief's scouts reported buffalo in great numbers near their camp on the north bank of the river. He scoffed at the threat of danger, boasted that his young men were not afraid of any band of Sioux that might have come into their valley, and said to his people, "The white men are only trying to frighten us from this good hunting ground."

On the morning of August 6, 1873, the Pawnee moved out in hunting formation up what is now known as Massacre Canyon to a point where it heads out into the open country. There they discovered a big band of buffalo. The hunters had killed a large number, the warriors had dismounted, and the women and boys had come up to skin and dress the game when scouts came riding in and reported a Sioux war party coming in upon them at full speed.

Sky Chief rallied his warriors quickly and determined to make battle at the head of the canyon. The women and children tried to escape down the canyon, which was quickly crowded to its walls by the rush of those attempting to reach the camp in the valley below. Sky Chief and his bravest warriors fell in the fight at the head of the canyon. With courage equal to that of Leonidas and his 300, the Pawnee fought to stop the victorious Sioux and save the women and children. The white agent, Williamson, was with the Pawnee and has written a graphic account of the battle. His estimate is that from 1,200 to 1,500 Sioux warriors battled with the Pawnee who tried to stop the onrush of their enemy. After losing most of their young warriors the Pawnee battle line broke and the remnant of their band was driven down the canyon and out on the valley, never stopping their flight until they had crossed the river and turned to make a last stand upon the south bank of the stream.

The Sioux before continuing their attack stopped long enough to round up and seize all the supplies the Pawnee had gathered in their weeks of hunting, and drove off between five and six hundred ponies belonging to the defeated Pawnee. Just as the Sioux war chiefs were mustering their warriors for another charge, United States Army bugles were heard sounding the call for battle action. Down the valley to the eastward on the north bank of the river several troops of United States Cavalry were seen deploying for battle. The Sioux took one look at the flag and pennants that told them that the dreaded regular Cavalry were coming. They quickly rounded up their spoils of war, picked up their dead and wounded, fled back up the canyon, and disappeared to the north.

They never stopped until they were back over the Platte River and returned to the reservation from which they had slipped away. The Pawnee Nation lost all their ponies and other tribal property. Their principal war chiefs and warriors fell in the battle on the mesa and in the retreat down the canyon. The total loss in killed and wounded was more than 50 per cent of the Pawnee engaged in the battle. Williamson, the white agent with the Pawnee, was ordered by the Government agent at Omaha to return and bury the fallen. He counted 146 dead Pawnee that were buried on the battle field. He estimated that the Sioux must have lost 50 or 60 warriors in the earlier hour of the conflict. The wounded were many. The crush of the fleeing Pawnee in the canyon after their warriors gave way was terrific. The Sioux rode on either side upon the rim of the canyon and poured a deadly fire into the crush of fleeing Pawnee that was so thick they could not miss.

Many brave deeds performed that day by Pawnee warriors are still told at their tribal councils. Two thousand red warriors fought fiercely in this last great battle between red men on this continent.

The occasion that brought on the battle was an historic hunt for the buffalo that once were countless on these western plains. Both the warriors and the buffalo are now gone from there forever. A monument on the site selected would be a fitting memorial to the Indian and his wars and the buffalo, the most numerous and valued of animals that once covered our western plains.

The site upon which it is proposed to erect this monument is on the Goldenrod Highway and is readily accessible to visitors. The Massacre Canyon Battle Association have for the past 10 or a dozen years held their annual reunion at this place.

Your committee recommends the passage of H. R. 9194, with the following amendment:

Page 2, section 2, line 3, strike out the figures "10,000" and insert in lieu thereof the figures "7,500."

THE BATTLE OF KETTLE CREEK

The next business on the Consent Calendar was the bill (H. R. 9965) to erect a tablet or a marker to mark the site of the Battle of Kettle Creek in Wilkes County, Ga., where, on February 14, 1779, Elijah Clarke, of Georgia, and Colonel Pickens, of South Carolina, overtook the Tories under Colonel Boyd, killing him and many of his followers, thus ending the British dominion in Georgia.

The Clerk read the title to the bill.

The SPEAKER pro tempore. Is there objection?

Mr. CRAMTON. Reserving the right to object, it seems that the Committee on the Library is going to have monuments and markers all over the country wherever there has been a gun fired. In this case the bill when introduced only asked for $1,000. It seems to me that that is sufficient to take care of any markers. If it will be agreeable to the gentleman from Georgia to let it go at $1,000 I shall not object. The committee amendment raises it to $2,500 simply because they have agreed to $2,500 in other cases, and this evidently violates the rules of the union.

Mr. GILBERT. Mr. Speaker, that was not the reason. You can not get anything suitable for $1,000. It is either $2,500 or nothing. For $1,000 you could not get any kind of a marker. We felt that this deserved recognition, and that it would require $2,500.

Mr. CRAMTON. This was a minor affair, and if we are going to have markers all over the country I think that we ought to have them for $1,000 and not make them all $2,500.

Mr. GILBERT. In my opinion this great Government ought not to be so economical in providing markers for historical sites.

Mr. CRAMTON. I think it is more important to take care of folks who are living than to provide stone markers for battle sites. I know of many ways in which the Government is cutting pretty close in education, care of the health, and general living.

Mr. GILBERT. I think we need a little inspiration in historic knowledge.

Mr. CRAMTON. I doubt whether a marker for the site of the Battle of Kettle Creek is going to have any great effect on our historical knowledge. I object.

Mr. BRAND of Georgia. Will the gentleman withhold his objection?

Mr. CRAMTON. I will.

Mr. BRAND of Georgia. The gentleman from Michigan speaks about building markers all over the country. I want to say that as far as my district is concerned, which has been represented here by such men as Judge Lawson, William M. Howard, Alexander Stephens, and partly by Benjamin Hill, that no bill has ever been introduced asking for a single dollar from the Government for my district. I have never known a marker to be established in my district during the 11 years I have been a Member of Congress; neither have I known of the Government being asked to spend a dollar for that purpose in the State of Georgia. The general, sweeping statement of the gentleman from Michigan [Mr. CRAMTON] that we are going to broaden out and put one at every insignificant spot wherever a gun was fired I think is more or less subject to criticism. Why aim at this particular spot, the Kettle Creek battle ground, covering an area of about 12 acres, on which was fought the last battle of the Revolution, thus ending British dominion in Georgia? It was at this place in Wilkes County our people drove the British out of my district and State, the British and the Tories giving this county the name of the "Hornet's nest of the Revolution." If the gentleman from Michigan will refresh his memory, he will find that the Battle of Kettle Creek is referred to in 8 or 10 different histories written by historians of distinction. I respectfully submit a request to the gentleman not to insist on a reduction of this amount.

Mr. CRAMTON. Mr. Speaker, I shall withdraw my objection in response to the gentleman's appeal in the interest of the calendar, but make this statement: If the Committee on the Library is going to continue to bring in bills of this kind to place monuments at every place they can think of, I shall object to all of them. The amount of money that is involved in these bills is simply ridiculous. I withdraw my objection.

Mr. GILBERT. Mr. Speaker, reserving the right to object, as a member of the Committee on the Library I say to the House right now that I favor marking with a suitable marker every historical spot in the United States.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the sum of $1,000 be, and is hereby, authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the purpose of erecting a tablet or marker on the grounds of the Battle of Kettle Creek, in Wilkes County, Ga., where, on February 14, 1779, Elijah Clarke, of Georgia, and Colonel Pickens, of South Carolina, overtook the Tories under Colonel Boyd, killing him and many of his followers, thus ending British dominion in Georgia, said tablet or marker to be placed on the portion of this battle ground now owned by the Daughters of the American Revolution, said sum to be dispensed by the Secretary of War after he shall have approved the plans of said tablet or marker.

With the following committee amendment:

Page 1, line 3, strike out "$1,000" and insert "$2,500."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ALABAMA AND COUSHATTA INDIANS, POLK COUNTY, TEX.

The next business on the Consent Calendar was the bill (H. R. 5479) to provide for the purchase of land, livestock, and agricultural equipment for the Alabama and Coushatta Indians in Polk County, Tex., and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice. I am making a study of it and I have not yet been able to complete that study.

Mr. BRIGGS. Mr. Speaker, I should like to ask the gentleman from Michigan if there is any prospect of satisfying him so that this legislation may be enacted at this session of Congress. The situation of these Indians is desperate and I call the attention of the House to a telegram just received from the district judge and other officials and prominent and worthy citizens of Polk County, reading as follows:

LIVINGSTON, TEX., *May 7, 1928.*

Hon. CLAYSTONE BRIGGS:

We commend you for your faithful efforts in behalf of the Alabama and Coushatta Indians and pray that the Congress will pass your measure to relieve the suffering of these worthy and starving red men.

J. L. MANRY, *District Judge.*
E. T. MURPHEY, *Representative.*
JAMES E. HILL, *County Judge.*
FRED NORRIS, *County Superintendent.*
R. D. HOLLIDAY, *Sheriff.*
Z. L. FOREMAN, *County Attorney.*
C. F. FAIN, Jr.
Rev. C. W. CHAMBERS, *Missionary.*

Mr. CRAMTON. Mr. Speaker, the gentleman knows something of my views. I am impressed by the report of the Polk County Chamber of Commerce that appears in the hearings. In the first place the bill asks for too much money. If I could feel sure that it was going to secure lands that could be farmed by these Indians, and not the kind of lands that they live on at the present time, which can not be farmed, and that those lands could be secured at a reasonable price and not an exorbitant price, I would be more friendly. Joined with that I should like to know that the locality and State that have the responsibility were going to join in along some such line as the Polk County Chamber of Commerce has suggested in the way of providing a road that would make the lands acceptable, and in providing supervision of their agricultural activities.

Mr. BRIGGS. Mr. Speaker, let me suggest to the gentleman from Michigan that undoubtedly the Polk County Chamber of Commerce and every other interest will have at heart in every possible way the success of these Indians and will aid in that success. But these Indians need help now and need it desperately, and the Federal Government should provide unconditionally the relief recommended by the Indian Affairs Committee in this bill.

Mr. CRAMTON. If they would provide an exact statement in advance of the appropriation, what lands are available in the vicinity of the home of these Indians, and at what price particular tracts of land may be purchased, it would be well, because then, if the appropriation is made, the Indian Bureau could examine these several tracts and make its choice feeling sure that the price has not been tilted up because of the appropriation.

Mr. BRIGGS. It is manifestly impracticable to get options on any territory to await action by the Federal Government without even any legislation.

Mr. CRAMTON. It is not at all impossible in such a situation as this for the Polk County Chamber of Commerce to get a price on large areas of cut-over lands that are in this vicinity, without a formal, legal option, to get a proposition of what acreage is available and what it will cost. Then we can tell better whether we can afford to do business with them or not.

Mr. BRIGGS. The gentleman will remember, if he has read the hearings, that the testimony reflects that from $7.50 to $10 per acre has been indicated by Polk County representatives and by the report of the Government investigator in 1918, as the price for which suitable land can be obtained.

Mr. CRAMTON. And the testimony also indicates that the lands they expect to buy are adjacent to and similar to the lands the Indians have, and of those lands not over one-third the acreage is suitable for agriculture. This bill as it stands, in my judgment, would be certain to be of advantage to the land owners to sell the land to the Government. I am not sure that it would mean much to the Indians.

Mr. BRIGGS. My opinion is that it would be of tremendous value to the Indians and the testimony at the hearings reflects that only the interest of the Indians, and not of land owners, is being considered. I have no objection to setting a fair limitation on the price to be paid for the land, and the land to be acquired, and its desirability for the Indians, will be left entirely to the Government and the Indian Bureau to determine.

Mr. LAGUARDIA. Mr. Speaker, will the gentleman yield?

Mr. CRAMTON. I yield.

Mr. LAGUARDIA. I looked the matter up when it was first on the Calendar. Judging from the report that this land is available now at $10 an acre, I have prepared an amendment to be offered when we come to that stage of the proceedings, to provide that the land shall not be purchased at to exceed $10 per acre.

Mr. CRAMTON. When we put a limitation of $10 an acre on the purchase price, we are providing a limitation that is materially above what cut-over lands should cost. I do not

think we ought to take the time of the calendar with so many bills waiting to be called, and I am willing to let this go over and agree to have a definite proposition ready for the gentleman before the next call of the calendar. Otherwise I shall have to object.

Mr. BRIGGS. Mr. Speaker, in view of the urgent need of the Indians, I insist on the consideration of the bill. I am ready to accept a limitation on the other proposition.

Mr. CRAMTON. Mr. Speaker, I object.

The SPEAKER pro tempore. It is necessary that three objections be made. One objection has been noted.

Mr. LAGUARDIA. I understand the gentleman from Texas will accept a limitation of $10 an acre.

Mr. BRIGGS. I will.

Mr. LEAVITT. And that will be satisfactory to the Committee on Indian Affairs.

Mr. MAPES. I object.

Mr. HOOPER. I object.

The SPEAKER pro tempore. Three objections are noted, and the Clerk will call the next bill.

SEPARATION OF JURIES IN FELONY CASES, DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (H. R. 12350) to regulate the separation of juries in felony cases in the District of Columbia.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. ROMJUE. Mr. Speaker, reserving the right to object, I call the attention of the House to an amendment that I propose to offer to the second section of the bill, if the bill is to be considered. In line 9 after the word "defendant" the proposed amendment would add the following: "Such agreement, if any, shall be in writing and noted of record by the judge presiding in any such case."

The second section provides for the separation of juries in noncapital cases, but it provides also that the jury may be separated upon an agreement between the counsel on the two sides of the case. There is nothing in the language of the bill which requires the agreement to be in writing, and consequently it may be oral between the two attorneys, and in that case there is no record. There is nothing requiring a record to be made of it. The amendment is that such agreements shall be in writing and noted in the record by the judge presiding. In the trial of a defendant where it is agreed by the counsel on the two sides that the jury may be separated and there is no record preserved of that agreement, and the case goes up on appeal, I think you will find, if the bill is not amended, that there will be opportunity for dispute between the counsel for the defendant and the State.

It is an important matter, as it seems to me. There ought not to be any opportunity for a dispute to arise between the counsel after the trial of the case as to just what was agreed to. Therefore the agreement should be made a matter of court record.

Mr. LAGUARDIA. This is rather unusual. May not either side, the district attorney or the other attorney, in order to relieve the jury, compel a quick decision? It occurs to me that that is a matter that should be considered very carefully. I do not think it should be left to the discretion of the court whether he would hold the jury or not.

Mr. ROMJUE. I am not pressing the matter as to the first section, but personally my view is that the second section, which provides for the trial of noncapital cases, ought to be amended so that in cases where the jury is separated that fact ought to be entered as of record. In every State of the Union where a man is tried for a capital offense the separation of the jury its not permitted, and a failure to keep the jury together is a reversible error in every State of the Union that I know anything about. This amendment provides that the court when it deems it necessary may separate the jury. Although I am not pressing that now, as to capital cases, I think that fact ought to be entered on the record in cases where the attorneys are permitted to agree as to the separation of the jury.

Mr. LAGUARDIA. What is the purpose of section 919 (b), page 2? Is it to require the consent of both sides as to the separation of a jury?

Mr. BRAND of Georgia. I shall be glad to answer the gentleman. Under the common law which prevails in this district, the judge trying a felony case less than a capital has the discretion, without the consent of the district attorney or the attorney representing the defendant, to separate the jury and let them mix and mingle with the multitude at their will. That is, he has full power to turn the jury loose, for instance, in the afternoon or at night until the court convenes in the morning following.

Mr. LAGUARDIA. Is not that the usual course?

Mr. BRAND of Georgia. It is in the District of Columbia but not the rule in the States. Such rule, I think, is exceedingly bad practice in the District of Columbia. Under the common law it is discretionary with the court in the trial of felony cases less than capital and in the District of Columbia it has been the practice to allow the juries to separate in all cases. This amendment provides that they may be allowed to separate provided the defendant's counsel and the district attorney consent to it. It does not take away the right of separation, but takes away from the judge the right to turn them loose unless the district attorney and the defendant's attorney agree that the jury may separate. Under the laws of the States that I have investigated—and I have investigated about 60 per cent of them—the statutory law gives this discretion to the judge, which is only enactment of the common law, in the trial of felony cases less than capital, but the usual practice is in these States when objection is made by counsel to keep the jury together.

Mr. O'CONNELL. That is not compulsory. It is within the discretion of the judge. This, however, makes it compulsory.

Mr. BRAND of Georgia. If the judge in his discretion turns the jury loose until the next morning, the responsibility for the evil consequences is upon him by reason of this separation. This amendment relieves the judge of the responsibility of turning the jury loose and thus allow them to come in contact with the jury fixers, the briber, and the criminally minded generally, and also relieves the district attorney of the embarrassment of objecting to separation.

Mr. O'CONNELL. Is Washington in a better condition in that respect than other jurisdictions?

Mr. BRAND of Georgia. I do not think so.

Mr. ROMJUE. I think this is a good bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I wish to be heard further.

The SPEAKER pro tempore. Is there objection?

Mr. MORTON D. HULL. The regular order, Mr. Speaker.

The SPEAKER pro tempore. The regular order is demanded. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. I will object if I can not be heard.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

CONVENTION OF THE AMERICAN LEGION AT APPALACHIA, VA.

The next business on the Consent Calendar was the bill (H. R. 11804) authorizing and directing the Secretary of War to lend to the town of Appalachia, Va., 500 canvas cots, 500 blankets, 1,000 bed sheets, 500 pillows, 500 pillowcases, and 500 mattresses or bed sacks, to be used at the convention of the American Legion, Department of Virginia, to be held at Appalachia, Va., on August 13, 14, and 15, 1928.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.,* That the Secretary of War be, and he is hereby, authorized to lend, at his discretion, to the entertainment committee of the American Legion, Department of Virginia, whose convention is to be held at Appalachia, Va., on August 13, 14, and 15, 1928, 500 canvas cots, 500 blankets, 1,000 bed sheets, 500 pillows, 500 pillowcases, and 500 mattresses or bed sacks: *Provided,* That no expense shall be caused the United States Government by the delivery and return of said property, the same to be delivered at such time prior to the holding of said convention as may be agreed upon by the Secretary of War and the chairman of said entertainment committee, J. A. Gardner: *Provided further,* That the Secretary of War before delivering said property shall take from said J. A. Gardner a good and sufficient bond for the safe return of said property in good order and condition, and the whole without expense to the United States.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

ALABAMA AND COUSHATTA INDIANS

Mr. LEAVITT. Mr. Speaker, I ask unanimous consent to return to Calendar No. 592, H. R. 5479, and allow the bill to go over without prejudice.

The SPEAKER pro tempore. The gentleman from Montana asks unanimous consent that the objection to Calendar No. 592,

H. R. 5479, may be considered as withdrawn and that the bill may be passed over without prejudice. Is there objection?

There was no objection.

TENTS AND CAMP EQUIPMENT FOR THE CONVENTION OF THE AMERICAN LEGION FOR THE DEPARTMENT OF WASHINGTON

The next business on the Consent Calendar was House joint resolution (H. J. Res. 236) authorizing the Secretary of War to lend tents and camp equipment for the use of the housing committee for the convention of the American Legion for the Department of Washington, to be held at Centralia, Wash., in the month of August, 1928.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

There was no objection.

The Clerk read the resolution, as follows:

*Resolved, etc.*, That the Secretary of War be, and he is hereby, authorized to lend, at his discretion, to the housing committee of the American Legion for the Department of Washington, for its use, in connection with the ninth annual convention of the American Legion for the Department of Washington, to be held in Centralia, Wash., on the 9th, 10th, and 11th of August, 1928, such tents and other camp equipment as may be required at such convention: *Provided*, That no expense shall be caused the United States by the delivery and return of said property, the same to be delivered to said committee at such time, prior to the holding of said convention, as may be agreed upon by the Secretary of War and F. W. Schwab, of Centralia, Wash., general chairman of said housing committee: *Provided further*, That the Secretary of War, before delivering said property, shall take from the said F. W. Schwab a good and sufficient bond for the safe return of said property in good order and condition, and the whole without expense to the United States of America.

The resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the resolution was passed was laid on the table.

WARRANT OFFICERS OF THE REGULAR ARMY

The next business on the Consent Calendar was the bill (H. R. 8314) to amend an act of Congress approved March 4, 1927 (Public, No. 795, 69th Cong.), to provide for appointment as warrant officers of the Regular Army of such persons as would have been eligible therefor but for the interruption of their status caused by military service rendered by them as commissioned officers during the World War.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MORTON D. HULL. Mr. Speaker, I ask that this bill be passed over without prejudice as I want to offer an amendment to it; but before doing so I want to confer with the gentleman from Texas [Mr. WURZBACH], the introducer of the bill, and he is now out of the city.

Mr. CRAMTON. Mr. Speaker, reserving the right to object to that request, I have a letter from the Director of the Budget with reference to this bill which I would like to put in the RECORD and commend it to the attention of those in charge of the legislation. I ask unanimous consent to extend my remarks by inserting this letter.

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD by inserting the letter referred to. Is there objection?

Mr. SCHAFER. Mr. Speaker, I object.

Mr. MORTON D. HULL. Mr. Speaker, what disposition has been made of my request that the bill may be passed over without prejudice?

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

Mr. COLLINS. Mr. Speaker, I object.

ISSUANCE OF PATENT FOR CERTAIN LAND TO THE CITY OF BUHL, IDAHO

The next business on the Consent Calendar was the bill (H. R. 12192) authorizing the Secretary of the Interior to accept a deed to certain land and issue patent therefor to the city of Buhl, Twin Falls County, Idaho.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, may I ask the gentleman from Idaho the necessity of having this land deeded from the State to the Government and then from the Government to a city or municipality?

Mr. SMITH. This action is necessary for the reason that the Federal Government has already patented the land to the State of Idaho as a part of a large tract and the State does not now desire it. The city of Buhl wishes the land for a dumping ground. It is necessary to have this legislation in order to make it available. The Federal Government can not accept title to this land without authority of Congress.

Mr. LAGUARDIA. Why can not the State deed it directly to the city of Buhl?

Mr. SMITH. Because of the fact that the State has no authority under its constitution to dispose of State land without the payment of $10 per acre. The State has no use for this land and is willing to deed it to the Federal Government in order that it may be deeded by the Federal Government to the city of Buhl.

Mr. LAGUARDIA. The purpose of this is to avoid the requirement in the constitution of the gentleman's State that before any land is sold to municipalities there shall be a certain consideration paid?

Mr. SMITH. That is right.

Mr. LAGUARDIA. This was originally Government land, and under this legislation it will revert to the Government and then to the municipality?

Mr. SMITH. Yes.

Mr. LAGUARDIA. This will entail no expense to the Government?

Mr. SMITH. None whatever.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized to accept a deed from H. C. Baldridge, Governor of the State of Idaho, to the following-described lands: The southeast quarter of the southeast quarter of section 23, township 9 south, range 14 east, Boise meridian, Idaho, containing 40 acres, and to issue a patent for said lands to the city of Buhl, Twin Falls County, Idaho, for use as a public dumping ground.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ALLOWANCE OF SIOUX BENEFITS

The next business on the Consent Calendar was the bill (H. R. 9046) to amend section 17 of the act of March 2, 1889, entitled "An act to divide a portion of the reservation of the Sioux Nation of Indians into separate reservations and to secure the relinquishment of the Indian title to the remainder, and for other purposes," as amended by the act of June 10, 1896.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That section 17 of the act of March 2, 1889 (25 Stat. L. 888), entitled "An act to divide a portion of the reservation of the Sioux Nation of Indians into separate reservations and to secure the relinquishment of the Indian title to the remainder, and for other purposes," as amended by the act of June 10, 1896 (29 Stat. L. 321, 334), be, and the same is hereby, amended to provide as follows:

"That the articles enumerated in said section 17 of the act of March 2, 1889 (25 Stat. L. 888), to be provided for the persons therein mentioned, or the payment of the commuted value thereof as provided in the act of June 10, 1896 (29 Stat. L. 321, 334), shall be furnished or paid to all persons whose allotments of land have been made and approved under the provisions of the act of March 2, 1889: *Provided, however*, That no person shall receive more than one allowance of such benefits, nor shall any single person under the age of 18 years, or any person who is or has been married, where the right has been claimed and allowed by either the husband or wife as the head of a family, be entitled thereto. The right to such benefits is expressly limited to the person entitled to receive the same and, if not allowed during the lifetime of such person, the same shall lapse."

With the following committee amendment:

Strike out all after the enacting clause and insert:

"That the Secretary of the Interior be, and he is hereby, directed to continue the allowance of the articles enumerated in section 17 of the act of March 2, 1889 (25 Stat. L. 894), or their commuted cash value under the act of June 10, 1896 (29 Stat. L. 334), to all Sioux Indians who shall have taken or may hereafter take allotments of land in severalty under section 19 of the act of May 29, 1908 (35 Stat. L. 451), and who have the prescribed status of the head of a family or single person over the age of 18 years, and his approval shall be final and conclusive, claims therefor to be paid as formerly from the permanent appropriation made by said section 17 and carried on the books of the Treasury for this purpose. No person shall receive more than one

allowance of the benefits, and application must be made and approved during the lifetime of the allottee or the right shall lapse."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended.

A motion to reconsider was laid on the table.

OLYMPIC NATIONAL FOREST, WASH.

The next business on the Consent Calendar was the bill (H. R. 9297) authorizing the adjustment of the boundaries of the Olympic National Forest, Wash., and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, may I ask the gentleman from Washington [Mr. HILL] the purpose of exchanging this land? Are we giving good land for some bad land or can not this desirable land be attached to the National Forest without an exchange?

Mr. HILL of Washington. This applies to privately owned lands, principally, outside of the National Forest, within 3 miles of the National Forest on two sides and 12 miles on one side.

Mr. LAGUARDIA. We could acquire this land by purchase.

Mr. HILL of Washington. This bill provides for an exchange either in land value or in timber value, the idea being to bring land that is desirable for forestry purposes into the National Forest by exchanging therefor land values or timber values within the National Forest.

Mr. LAGUARDIA. In whose discretion does that rest?

Mr. HILL of Washington. That is within the discretion of the Secretary of Agriculture.

Mr. LAGUARDIA. As to values?

Mr. HILL of Washington. As to values; yes. The Secretary of Agriculture fixes the values.

Mr. LAGUARDIA. You have certain specific land in mind that you are going to take in, and I suppose the value of that land has been estimated?

Mr. HILL of Washington. I am not advised as to that. I presume they may have some estimates on it, but I do not know whether there has been a survey made for that purpose or not.

Mr. LAGUARDIA. Is it customary or is it the purpose in this case to give some timberland for some land already stripped of its timber?

Mr. HILL of Washington. The idea is to reforest this land on the outside that is suitable for forestry purposes by bringing the land within the forest and to exchange for this land ripe timber within the limits of the forest.

Mr. LAGUARDIA. It strikes me, as a tenderfoot, that it is a very poor conservation measure to give away good timberland and take in exchange land where the timber has been wasted.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. LAGUARDIA. Certainly.

Mr. SUMMERS of Washington. That is not the purpose at all. The value of the land exchanged is always taken into consideration. It might be an exchange of 100 acres in one instance for 200 acres in another. It goes on value, and the exchange is not made acre for acre. Oftentimes it helps to adjust the boundaries so as to make the administration of the forest better.

Mr. HUDSON. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. HUDSON. Does this mean that the land that is taken out of the national forest is to be cut over and then brought back into the national forest by an exchange again at the expense of the Government after the lumber companies have taken off the timber?

Mr. LAGUARDIA. It hits me that way.

Mr. SUMMERS of Washington. There is nothing of that kind contemplated at all.

Mr. HUDSON. If it is the purpose to reforest this land, why not take the land and reforest it without giving up any other land?

Mr. LAGUARDIA. These trees are very many years old, are they not?

Mr. HILL of Washington. Yes; it is mature timber.

Mr. LAGUARDIA. The trees are 100 years old, so two weeks would not make much difference, and therefore I ask unanimous consent that the bill may go over without prejudice so that I may be better advised about it.

The SPEAKER pro tempore. Without objection, the bill will be passed over without prejudice.

There was no objection.

LASSEN VOLCANIC NATIONAL PARK, CALIF.

The next business on the Consent Calendar was the bill (H. R. 11406) to consolidate or acquire alienated lands in Lassen Volcanic National Park, in the State of California, by exchange.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, the gentleman from California [Mr. ENGLEBRIGHT] is not present. There have been some developments in connection with this situation since the bill was reported, so that I imagine the gentleman might not want to press it. I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

RIGHT OF WAY THROUGH CHALMETTE NATIONAL CEMETERY

The next business on the Consent Calendar was the bill (H. R. 11758) authorizing the Secretary of War to grant a right of way for a levee through the Chalmette National Cemetery.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Reserving the right to object.

Mr. O'CONNOR of Louisiana. This is to authorize the Secretary of War to grant a right of way through the cemetery on account of the breaking of the levee in the National Cemetery. I might say that the military appropriation bill carries an appropriation to make the necessary changes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of War is hereby authorized to grant the Lake Borgne Basin levee board, an agency of the State of Louisiana, a right of way through the Chalmette National Cemetery Reservation, St. Bernard Parish, La., in such location as may be designated by him, for the purpose of constructing and maintaining a new levee to replace the existing levee in front of said reservation.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ACQUISITION OF LANDS IN HAWAII

The next business on the Consent Calendar was the bill (H. R. 11847) to authorize the acquisition of the Queen Emma and Damon estates and the Halawa site in the vicinity of Fort Kamehameha, Hawaii, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. BLACK of Texas. I object. This bill involves more than a million dollars and should not be considered on the Calendar for Unanimous Consent when the Military Affairs Committee can call it up on Calendar Wednesday.

Mr. JAMES. Let me say to the gentleman that the Military Affairs Committee will not have a Calendar Wednesday this session and there is no way of getting the bill up except by unanimous consent. We must have it because the Army and the Navy need it and the sooner we condemn the land the more it will save the Government.

Mr. BLACK of Texas. There are two tracts of land involved here. One is to cost at the rate of $300 an acre, and there are 1,434 acres. Another tract contains 862 acres and is to cost around $900 per acre.

Mr. CRAMTON. Will the gentleman yield?

Mr. BLACK of Texas. I will.

Mr. CRAMTON. This bill at first impressed me much as it does the gentleman from Texas, but I took it up with the Governor of Hawaii, Mr. Farrington, in whom I have very great confidence. I have a statement from him which I will ask unanimous consent to put in the RECORD as a part of my remarks. I suggest to the gentleman from Michigan [Mr. JAMES] that if the gentleman from Texas is reluctant about letting the bill pass that the gentleman from Michigan ask unanimous consent to have it go over without prejudice and I will ask the gentleman from Texas in the meantime to read the statement which I have put in.

Mr. BLACK of Texas. I will be very glad to do so.

Mr. CRAMTON. In connection with that I will say that I want to put in also some discussion of the way the Army officers have handled land matters in Hawaii. In my judgment the Army officers in Hawaii have conducted themselves as con-

quering officers in a subdued nation, in connection with their attitude toward disposal of valuable territorial lands turned over to the War Department for military purposes, and I want to put in also some information with reference to that.

Mr. BLACK of Texas. Let me say that I would have to investigate a situation thoroughly before I would be willing to let a bill pass to pay $900 an acre for 300 acres and approximately $300 an acre for another tract of 1,400 acres. I will have to be convinced that there is some real good substantial reason for paying such a price.

Mr. CRAMTON. I will say to the gentleman that if this was a proposition to allow the Army officers to make an exchange of land, I would agree absolutely with the gentleman from Texas, but this does provide for condemnation of the land, and it is not probable that the land can be secured for any less price.

Mr. BLACK of Texas. Mr. Speaker, I ask unanimous consent that the bill go over without prejudice.

The SPEAKER pro tempore. Is there objection?

The Chair hears none.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to extend my remarks by inserting certain correspondence with the Governor of Hawaii and also the other matter I referred to.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. CRAMTON. I have considerable contact, personally and officially, with Governor Farrington, and I have implicit confidence in his business judgment and his zeal for the public interest. The statement from him which I present satisfies me that the passage of the pending bill is desirable. It further satisfies me that the Army officers in Hawaii have been reckless in their waste of the public domain and that something should be done to prevent continuance of such reckless dissipation of lands in their control in Hawaii of great public value.

I am advised otherwise that the transfer to Dillingham was consummated without any public notice or discussion and two miles of valuable water front was disposed of without proper consideration. I do not criticize Dillingham, but the facts themselves are an indictment of the Army administration of valuable property intrusted to it. Action should be taken by Congress to prevent any further repetition of this waste. The letters from Governor Farrington are as follows:

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,
*Honolulu, April 25, 1928.*

Hon. LOUIS C. CRAMTON,
*Member of Congress, Washington, D. C.*

MY DEAR CONGRESSMAN CRAMTON: I inclose confirmation copy of our telegram sent to you by naval radio in answer to your inquiry regarding the James bill for the purchase of land to give the War Department a proper aviation field in the vicinity of Pearl Harbor and the coast defenses of the island of Oahu.

I hope I have made myself clear in expressing cordial approval of the speedy acquiring of this property by the Federal Government.

In my opinion the most approved method for the Government to secure possession of private land is through the medium of condemnation proceedings. The fact that a tentative value for this land was secured for the information of Congressman JAMES indicates that the private owners, realizing that the land may be condemned and must, in the natural order of events, come into the possession of the Federal Government, have placed what they would consider a fair value. I am not disposed to dispute this value, but, on account of my experience and observation with and of Army methods of handling public lands, I have a very poor opinion of the experience, judgment, and degree of responsibility possessed by the officers who have handled Army land matters in this Territory during the period of my administration.

In this connection I could tell you a long story regarding the acquiring of a 254-acre tract, known as the Kalena tract, located in the midst of the Schofield Barracks Reservation. Summerall, when first assuming command down here, at the beginning of my administration, tried his best to force me to carry out a land exchange which would have resulted in the Territory giving up control of over 2,000 acres to private interests, in order that the Army might secure 254 acres of the Kalena tract. I insisted that the land should be condemned. Last December the final trial was held in connection with the condemnation proceedings. The price of the Kalena land and all charges against it amounted to $58,000. That money has been appropriated, I think, during the present session of Congress. The folly of Summerall's program is now brought into clear relief.

Last year the local Army officers were endeavoring to manipulate a land exchange to secure possession of the land included in the present James bill. The things that they proposed to do with public lands that were originally Territorial and made over to the War Department by Executive order during Governor Pinkham's administration were simply outrageously foolish. I inclose a copy of a letter which I wrote Major General Lewis bearing on this subject relating to another field at Waianae.

I have a very definite opinion on the propriety of the War Department returning to the administration of the Territory all the public land not required for the immediate uses of the War Department. The fact that the War Department was ready and would undoubtedly have exchanged the land had the Delegate and myself not protested directly to the President makes it clear that these lands, which I mention generally and can define specifically if desired, are not a factor of military necessity to the War Department.

Reverting again to the land area covered in the James bill, there is no doubt in my mind that this land will never be available at a lower figure. If it remains in private hands, it will be filled from dredgings of Pearl Harbor and vicinity and sold privately at a very much increased value. Should war ever come, there is no doubt in my mind that immediate possession would have to be taken of this property by the military authorities. It is the natural and logical location for the aviation field. It is, therefore, sound business for the Federal Government to acquire possession of the land at the present time, and thus allow the military authorities to develop their defensive program in a normal manner and at the lowest cost to the country.

I can go into all these land transactions in detail, if it is desired. Congressman JAMES made a very careful and intensive survey of the situation from a military standpoint. I most cordially support him in all his programs, except possibly when he suggests in a casual conversation that the Government might sell some of the property, once Territorial but now made over to the Army by Executive order, and use the money for local military programs. My answer to this is that the land, being originally Territorial, should revert to the Territory for public use. This Territory pays its normal share of taxes into the Treasury, and I do not feel that we should be specially assessed and placed in the position of having to buy back from private interests what was once public property. This condition exists on the water front of Honolulu at the present time, as the Territory in order to round out its harbor-terminal scheme must buy back from a private citizen a land area originally made over to the War Department by Executive order and through the War Department channels placed in private hands by exchange. This will cost the Territory approximately from $100,000 to $150,000. There is nothing of sound business in such a program.

I am delighted to know that you are continuing your interest in the affairs of Hawaii from every standpoint.

Yours sincerely,

W. R. FARRINGTON,
*Governor of Hawaii.*

---

AUGUST 15, 1927.

Maj. Gen. E. M. LEWIS, U. S. Army,
*Commanding, Hawaiian Department,*
*Honolulu, Hawaii.*

MY DEAR GENERAL LEWIS: Responding to your request of August 11, regarding the possibility of the Territory undertaking to condemn land on the island of Oahu that might be turned over to the Army, I am of the opinion that such a proceeding could not be of any immediate value to you. There are legal difficulties that would make the procedure long drawn out and in any event the final consummation of the program would properly await confirmation by the legislature of 1929.

I should say it would be better to seek an appropriation from Congress, so that the lands desired may be condemned and purchased by the Federal Government.

While inspecting Territorial lands in the Waianae region on Friday last, I had the opportunity of viewing the tract at Makaha that I am informed is the area sought by the Army as a landing field. I have been informed that the program of exchange contemplates the transfer to the Waianae plantation or allied private interests of a portion of the near-by land now controlled by the War Department (being designated as Waianae-kai parcel No. 2, Executive Order 2900, July 2, 1918), containing approximately 153 acres; also several hundred feet (approximately a thousand) of the beach frontage on Waianae Bay (designated on map as Pokai Bay) in the vicinity of the Dowsett residence.

For your information, the Territory has usually been able to consummate exchanges of this nature on the basis of giving acre for acre, for land of the same general character. This would appear to be possible in this case. Consequently the inclusion of the beach frontage appears to be unnecessary. The 153-acre tract referred to produced an income of $811 a year under lease from the Territory previous to its being set aside for the purposes of the Army on the recommendation of Governor Pinkham.

My experience in dealing with private landholders in the Territory of Hawaii on matters of exchange does not lead me to believe that any branch of the Government need feel that private holders are conferring any particular favor on the Government when indicating a willingness to exchange. On my present information, I fail to see why any branch of the United States Government should transfer any portion of the Waianae Bay frontage to private interests.

A fair sample of what happens is now furnished by the conditions near the Maile Beach area. The 62 acres, carrying approximately 6,000 feet of beach frontage, that was deeded to W. F. Dillingham in a land

exchange completed by the Hawaiian Department, includes over a mile of the best beach in the Maile Beach section of the Waianae district.

The construction of an improved highway, for which the Territory has appropriated approximately $600,000, makes this region easily accessible from the more populous sections of the island of Oahu. Already petitions have been presented to me to secure an opening for the public on the so-called Maile Beach, that was placed under the control of W. F. Dillingham through exchange with the Army. I am informed that a 47-acre tract of land located across the main highway from this Maile Beach section recently sold for $40,000. Other sales of approximately $1,000 an acre are reported in this section. There is an increasing demand for access to the beach in that vicinity. The section of the beach a mile distant still controlled by the Territory is the rockiest portion and the least attractive for public use.

You can thus readily understand why the Territory views with concern the alienation of any of this beach area when it has become obvious that the retention of the beach area by the Army is not a matter of military necessity.

Judging from some of the proposals of exchange that have come to my attention as having been made under the authority of the act of Congress approved January 31, 1922 (entitled "An act to provide for the exchange of Government lands for privately owned lands in the Territory of Hawaii"), officers of your department have not resided in the Territory long enough to appreciate the importance of continued public control of beach areas. Hawaii has gone through the experience of allowing private interests to secure control of beach land, and then, as a result of the lack of foresight, the taxpayers have been forced to buy back these lands at a very high cost.

A portion of the public park at Waikiki was bought back by the city and county of Honolulu at a cost of $30,000, and only recently the site for the present war memorial at Waikiki was bought back at the cost of $200,000.

I can not bring myself to believe on any information now at my disposal that there is need or justification under the heading of either military necessity or national financial economies to alienate to private interests another foot of land along the Waianae Beach area or any other beach section of the island of Oahu.

There is an investment value in this property, and if there is any advantage to be gained it should be for the benefit of the public, not for private interests.

Yours very truly,

W. R. FARRINGTON,
*Governor of Hawaii.*

SALE OF SURPLUS WAR DEPARTMENT REAL PROPERTY

The next business on the Consent Calendar was the bill (H. R. 11953) to authorize the sale under the provisions of the act of March 12, 1926 (Public, No. 45, 69th Cong.), of surplus War Department real property.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, does this clean up all the surplus real property under the control of the War Department?

Mr. JAMES. I hope not. I do not think we ought to keep any real property that can be disposed of.

Mr. LAGUARDIA. The gentleman from Michigan and I have never agreed about the disposition of surplus real property. In the light of past experience in the sale of real property will not the gentleman agree that it has not been very successful?

Mr. JAMES. In some places the Government has got more than was expected.

Mr. LAGUARDIA. It is impossible to get the gentleman from Michigan to agree to the fact.

Mr. JAMES. No; we have overridden the War Department time after time. I am not taking any orders from the War Department.

Mr. LAGUARDIA. The gentleman will recall that when he came before the House with the first bill I opposed it, and we were assured by the gentleman that if we sold the real property it would be sufficient to finance the building program.

Mr. JAMES. Oh, I never made any such statement as that.

Mr. LAGUARDIA. I think that was the impression that the House got.

Mr. JAMES. I hope not.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.,* That the Secretary of War be, and he is hereby, authorized to sell or cause to be sold under the provisions of the act of March 12, 1926, the several tracts or parcels of real property hereinafter designated or any portion thereof, upon determination by him that said tracts or parcels are no longer needed for military purposes, and execute and deliver in the name of the United States and in its behalf any contracts, conveyances, or other instruments necessary to effectuate such sale and conveyance, to wit: Amaknak Island, Alaska (that portion under the control of the War Department); Carlstrom Field, Fla.; Door Field, Fla.; East Jordan Range, Mich.; Fort Griswold, Conn.; Fort Independence, Mass. (portion only); Camp Lee, Va.; Fort Madison, Me.; Fort Sewall, Mass. The expense of sale of these properties shall be paid from the proceeds thereof, and the net proceeds shall be deposited in the Treasury of the United States to the credit of the military-post construction fund: *Provided,* That the net proceeds of the sale of East Jordan Range, Mich., shall be credited to the State allotment of funds for the Michigan National Guard.

With the following committee amendment:

Page 2, line 14, after the word "guard," insert "pursuant to the act of Congress approved May 12, 1917."

The committee amendment was agreed to.

Mr. FROTHINGHAM. Mr. Speaker, I move to amend on page 2, lines 7 and 8, by striking out "Fort Sewall, Mass."

The SPEAKER pro tempore. The gentleman from Massachusetts offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. FROTHINGHAM: Page 2, line 7, strike out the words "Fort Sewall, Mass."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

APPOINTMENT OF WARRANT OFFICERS, UNITED STATES ARMY

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to revise and extend my remarks upon the bill (H. R. 8314) to provide for appointment as warrant officers of the Regular Army of such persons as would have been eligible therefor but for the interruption of their status, caused by military service rendered by them as commissioned officers in the World War, by inserting a letter.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. CRAMTON. The letter is as follows:

BUREAU OF THE BUDGET,
*Washington, May 2, 1928.*

Hon. LOUIS C. CRAMTON,
*House of Representatives.*

MY DEAR MR. CRAMTON: On the 20th ultimo you wrote me with regard to H. R. 8314, a bill to amend the act of Congress approved March 4, 1927, to provide for appointment as warrant officers of the Regular Army of such persons as would have been eligible therefor but for the interruption of their status, caused by military service rendered by them as commissioned officers during the World War.

The act of March 4, 1927 (44 Stat. 1416), authorizes the counting of commissioned service in the Army during the World War as the equivalent of service as quartermaster clerks, but does not authorize the counting of such commissioned service as the equivalent of detached service away from the permanent station or duty beyond the continental limits of the United States.

The act of August 29, 1916 (39 Stat. 625), specifically requires 12 years of service to establish eligibility for appointment as field clerks, Quartermaster Corps, with the provision that at least 3 years of such service must have been on detached duty or on duty beyond the continental limits of the United States or both. The bill under consideration (H. R. 8314) among other things contemplates amending the act of March 4, 1927, so as to have commissioned service during the World War count not alone for the equivalent of service as clerks, Quartermaster Corps, but also for the detached service or foreign duty prescribed by the act of August 29, 1916.

As it has been decided by Congress that the commissioned service shall count as equivalent to service as clerks, Quartermaster Corps, there would seem to be no objection to the commissioned service being counted as the equivalent of detached service or foreign duty. However, H. R. 8314 goes far beyond this and authorizes the counting of "all classified service rendered as clerks in the Military Establishment." None of the laws relating to the appointment of warrant officers, including the last enactment of March 4, 1927, has authorized the counting of all classified service rendered as clerks in the Military Establishment and to make this departure now for the eight men who would be the beneficiaries under H. R. 8314 would establish a precedent for all classes of these people who have been given an enlisted or warrant status or a commissioned status. While the amount involved for the eight men would not be large, the establishment of a precedent might prove to be extremely costly.

Sincerely yours,

H. M. LORD, *Director.*

DONATING REVOLUTIONARY CANNON TO NEW YORK STATE

The next business on the Consent Calendar was the bill (S. 805) donating Revolutionary cannon to the New York State Conservation Department.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of War, in his discretion, is hereby authorized to deliver to the order of the New York State Conservation Department five Revolutionary cannon stored in the Watervliet Arsenal at Watervliet, N. Y., and marked "W. A. 60," "W. A. 61," "W. A. 62," "W. A. 63," and "W. A. 64": *Provided*, That the United States shall be put to no expense in connection with the delivery of said cannon.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

SALES BY UTILITIES IN THE ARMY

The next business on the Consent Calendar was the bill (H. R. 7938) to regulate sales by utilities in the Army.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I object.

The SPEAKER pro tempore. This takes three objections.

Mr. SCHAFER. Mr. Speaker, I object.

Mr. COLLINS. Mr. Speaker, I object.

The SPEAKER pro tempore. Three objections are noted, and the Clerk will call the next bill.

UNITED STATES BARRACKS AT BATON ROUGE, LA.

The next business on the Consent Calendar was the bill (H. R. 11852) providing for the confirmation of grant of lands formerly the United States barracks at Baton Rouge, La., to the board of supervisors of the Louisiana State University and Agricultural and Mechanical College.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read as follows:

*Be it enacted, etc.*, That the patent issued by the United States General Land Office to the board of supervisors of the Louisiana State University and Agricultural and Mechanical College in trust for the Louisiana State University and Agricultural and Mechanical College under date of February 20, 1903, by virtue of the authority conferred by an act of Congress approved April 28, 1902, entitled "An act providing for the transfer of the title to the military reservation at Baton Rouge, La., to the Louisiana State University and Agricultural and Mechanical College," which conveyed full and complete title to the buildings and grounds of the United States barracks at Baton Rouge, La., for the purpose of said university and college, being sections 44 and 71 of township 7 south, range 1 west, St. Helena meridian, State of Louisiana, containing 211.56 acres be, and the same is hereby, approved and confirmed; and the right of the board of supervisors of the Louisiana State University and Agricultural and Mechanical College to sell or lease any of the said grounds or buildings in its development of said university is fully recognized, the proceeds to form part of the funds of the said Louisiana State University and Agricultural and Mechanical College and to be used for the purposes of said university and college.

With the following committee amendments:

Page 2, line 18, after the word "college" insert "excepting from the force and effect of this act the parcel of ground containing about 2.45 acres granted to the Roman Catholic congregation of St. Joseph's Church of the city of Baton Rouge, by act of Congress approved September 30, 1890 (26 Stat. 503); and further excepting that portion of land that lies westward of a line 100 feet east of the center of the railroad tract of the Louisville, New Orleans, & Texas Railroad Co.: *Provided*, That if the said railroad company shall cease to use and occupy such land it shall thereupon become subject to all the provisions of this act.

The committee amendment was agreed to and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

GAME REFUGES ON THE OUACHITA NATIONAL FOREST

The next business on the Consent Calendar was the bill (H. R. 8130) authorizing the creation of game refuges on the Ouachita National Forest, in the State of Arkansas.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I shall not object if the gentleman from Arkansas [Mr. REED] will agree to accept an amendment striking out lines 1 and 2 on page 2. If this is going to be a bird sanctuary, let us make it so; if it is going to be a bird refuge, let us make it so. But if it is going to be a hunting ground, let us say so.

Mr. REED of Arkansas. Mr. Speaker, of course, I would object to the striking out of lines 1 and 2 on page 2.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Mr. Speaker, I object.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed a bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3699. An act for the relief of the land-grant railroad operated between the station formerly known as East Portland, in the State of Oregon, and Roseville, in the State of California.

The message also announced that the Senate insists upon its amendments to the bill (H. R. 12030) entitled "An act to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39) regulating postal rates, and for other purposes," disagreed to by the House of Representatives, agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MOSES, Mr. PHIPPS, and Mr. MCKELLAR to be the conferees on the part of the Senate.

The message further announced that the Senate had concurred in the following concurrent resolution:

House Concurrent Resolution 34

*Resolved by the House of Representatives (the Senate concurring)*, That the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3740) entitled "An act for the control of floods on the Mississippi River and its tributaries, and for other purposes," be authorized to include in its report on said bill a recommendation amending the proviso to the first paragraph of section 10 by striking out the words in said paragraph "board created in section 1 of this act," and inserting in lieu thereof the words "Mississippi River Commission," and no point of order shall be made against the report by reason of such action.

THE CONSENT CALENDAR

BRIDGE ACROSS THE OHIO RIVER AT NEW CUMBERLAND, W. VA.

The next business on the Consent Calendar was the bill (H. R. 5475), granting the consent of Congress to the R. V. Reger Bridge Co. to construct, maintain, and operate a bridge across the Ohio River.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. Without objection, the Clerk will read the committee amendment.

There was no objection; and the Clerk read as follows:

Strike out all after the enacting clause and insert:

"That in order to facilitate interstate commerce, improve the postal service, and provide for military and other purposes, the New Cumberland Bridge Co., its successors and assigns, be, and is hereby, authorized to contruct, maintain, and operate a bridge and approaches thereto across the Ohio River, at a point suitable to the interests of navigation, at or near the city of New Cumberland, W. Va., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

"SEC. 2. There is hereby conferred upon the New Cumberland Bridge Co., its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

"SEC. 3. The said New Cumberland Bridge Co., its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

"SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of West Virginia, the State of Ohio,

any public agency or political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value, (2) the actual cost of acquiring such interests in real property, (3) actual financing and promotion costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interests in real property, and (4) actual expenditures for necessary improvements.

"SEC. 5. If such bridge shall be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected, shall be kept and shall be available for the information of all persons interested.

"SEC. 6. The said New Cumberland Bridge Co., its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War, and with the highway departments of the States of West Virginia and Ohio, a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States shall, at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said New Cumberland Bridge Co., its successors and assigns, shall make available all of its records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

"SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to the New Cumberland Bridge Co., its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

"SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved."

The committee amendment was agreed to; and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended to read: "A bill authorizing the New Cumberland Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near New Cumberland, W. Va."

A motion to reconsider the vote by which the bill was passed was laid on the table.

### BRIDGE ACROSS LITTLE CALUMET RIVER, ILL.

The next business on the Consent Calendar was the bill (H. R. 11917) granting the consent of Congress to the county of Cook, State of Illinois, to widen, maintain, and operate the existing bridge across the Little Calumet River in Cook County, State of Illinois.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby given to the county of Cook, State of Illinois, to widen, maintain, and operate the existing highway bridge and approaches thereto across Little Calumet River at or near Halstead Street, within section 8, township 36 north, range 14 east, in said county and State, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

### LEGALIZING WHARF IN DEER ISLAND, ME.

The next business on the Consent Calendar was the bill (H. R. 11950) to legalize a pier and wharf in Deer Island thoroughfare on the northerly side at the southeast end of Buckmaster Neck at the town of Stonington, Me.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, how was this pier originally constructed?

Mr. DENISON. It was constructed without authority of law. This is to legalize it.

Mr. LAGUARDIA. There is not much navigation on this stream?

Mr. DENISON. No; but the law is general in respect to such matters.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the pier and wharf built by Marguerite S. Morrison in the Deer Island thoroughfare, State of Maine, on the northerly side at the southeast end of Buckmaster Neck, which is about 2 miles north of the wharf at the town of Stonington, in the State of Maine, be, and the same is hereby, legalized to the same extent and with like effect as to all existing or future laws and regulations of the United States as if the permit required by the existing laws of the United States in such cases made and provided had been regularly obtained prior to the erection of said pier and wharf: *Provided*, That any changes in said pier which the Secretary of War may deem necessary and order in the interest of navigation shall be promptly made by the owner thereof.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

### BRIDGE ACROSS THE TENSAS RIVER IN LOUISIANA

The next business in order on the Consent Calendar was the bill (H. R. 11980) granting the consent of Congress to the Fisher Lumber Corporation to construct, maintain, and operate a railroad bridge across the Tensas River, in Louisiana.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SCHAFER. Reserving the right to object, Mr. Speaker, I would like to inquire whether or not this bridge is to be constructed on some property which is to be acquired as a flood way under the terms of the relief bill that we recently passed?

Mr. DENISON. I am unable to state definitely where the flood way is, but I will say to the gentleman from Wisconsin that this bill only authorizes the construction of a temporary bridge.

Mr. SCHAFER. And we might conclude that under this proposition, if the Government is going to purchase land along these flood ways, we may have to pay damages on account of the construction of this bridge?

Mr. DENISON. The flood way bill does not contemplate the Government purchasing anything but flowage rights. This does not interfere in any way.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the Fisher Lumber Corporation, incorporated under the laws of the State of Delaware, its successors and assigns, to construct, maintain, and operate a railroad bridge and approaches thereto across the

Tensas River, in Louisiana, at a point suitable to the interests of navigation at or near the dividing line between sections 1 and 12, township 12 north, range 9 east, Louisiana meridian, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to the Fisher Lumber Corporation, its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized to exercise the same as fully as though conferred herein directly upon such corporation.

SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

CLAIMS OF LOWER SPOKANE AND LOWER PEND OREILLE OR LOWER CALISPELL TRIBES OF INDIANS, STATE OF WASHINGTON

The next business on the Consent Calendar was the bill (H. R. 5574) authorizing the Lower Spokane and the Lower Pend Oreille or Lower Calispell Tribes or Bands of Indians in the State of Washington, or any of them, to present their claims to the Court of Claims.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Reserving the right to object, Mr. Speaker, I have certain amendments that I will not take time now to enumerate unless I am requested to do so. I understand those amendments are agreeable to the gentleman from Washington [Mr. HILL].

Mr. HILL of Washington. Yes.

Mr. CRAMTON. With that understanding I shall withhold any objection, and offer the amendments at the proper time.

Mr. HILL of Washington. Mr. Speaker, the bill S. 1480 is identical with this bill and is on the Union Calendar. I request that the Senate bill 1480 be considered in lieu of the House bill 5574, and that the House bill be laid on the table.

The SPEAKER. The gentleman from Washington asks unanimous consent that the Senate bill 1480 be considered in lieu of the House bill. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the Senate bill.

Mr. CRAMTON. Mr. Speaker, it is a rather long bill, and unless somebody is interested in hearing it read I will ask unanimous consent that it be considered as read.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Senate bill reads as follows:

S. 1480, Seventieth Congress, first session

A bill authorizing certain Indian tribes and bands, or any of them, residing in the State of Washington, to present their claims to the Court of Claims.

*Be it enacted, etc.*, That jurisdiction is hereby conferred on the Court of Claims, with the right to appeal to the Supreme Court of the United States by either party, as in other cases, notwithstanding the lapse of time or statutes of limitation, to hear, examine, and adjudicate and render judgment in any and all legal and equitable claims of the Lower Spokane and the Lower Pend Oreille or Lower Calispell Tribes or Bands of the State of Washington, or any of said tribes or bands, against the United States arising under or growing out of the original Indian title, claim, or rights of the said Indian tribes and bands, or any of said tribes or bands (with whom no treaty has been made), in, to, or upon the whole or any part of the lands and their appurtenances claimed by said Lower Spokane Tribe or Band of Indians, in the State of Washington, and embraced within the following general descriptions, to wit:

Commencing in the State of Washington on the east and west Government survey township line between townships 24 and 25 north at a point whose longitude is 119° 10′ west; thence east along said township line to the first draw leading and draining into Hawk Creek in Lincoln County, Wash.; thence down the center of said draw to said Hawk Creek and down the center of said Hawk Creek to its conflux with the Columbia River; thence up and along the south and east bank of the Columbia River to the north bank of the Spokane River at its conflux with the Columbia River, which said boundary lines separate the lands of said Lower Spokane Tribe or Band of Indians from those, the several so-called Colville and Okanogan Tribes or Bands of Indians; thence easterly up and along the north bank of the said Spokane River to a north and south line whose longitude is 118° west; thence south along said line to its intersection with the forty-seventh parallel of latitude; thence west along said forty-seventh parallel to a line whose longitude is 119° 10′ west; thence north on said line to the point of beginning, which two latter lines of boundary separate the lands of the said Lower Spokane Tribe or Band of Indians from the lands of the confederated Yakima Indians as defined by the treaty between the United States and said Yakima Indians concluded at Camp Stevens, Walla Walla Valley, Washington Territory, June 9, 1855 (12 U. S. Stat. L. 941, 956); lands in the States of Idaho, Montana, and Washington, claimed by said Lower Calispell or Lower Pend Oreille Indian Tribe or Band of Indians and embraced within the following description, to wit:

Commencing at a point in the State of Idaho at the forty-ninth parallel latitude on the divide between the waters of the Flat Bow or Kootenai River and those of the Clark Fork River and its tributaries; thence southerly and southeasterly along said summit of the divide, known as the Cabinet Mountain, to the headwaters of Thompsons River in Sanders County, Mont.; thence southerly along the divide between Thompsons River and the tributaries of the Flathead River to the town of Plains, Mont., and continuing southwesterly on a line drawn through St. Regis, Mont., to the summit of the Calispell or Coeur d'Alene Range of the Bitter Root Mountain (which said boundaries separate the original habitat and lands of said Lower Calispell or Lower Pend O'Reille Indians from those of the Cooteney, Upper Pend O'Reille, and Flathead Tribes or Bands of Indians as defined by the treaty between the United States and said last-named tribes or bands of Indians executed July 16, 1855) (12 Stat. L. 975–979); thence northwesterly along the summit of said Calispell or Coeur d'Alene Range and the divide between the waters of the said Clark Fork and those of the Coeur d'Alene River, and along said course extend to and across the Spokane Plains and continuing in a general northwesterly direction to the divide separating the waters of said Clark Fork River from the Spokane River and its tributaries to the main ridge of the Calispell Mountains in the State of Washington; and thence in a northerly direction, along the summit of main ridge of said Calispell Mountains, and said course extending to the international boundary line between the Province of British Columbia and the State of Washington; then east along said international boundary line to the point of beginning, which last-named boundaries separate the original habitat and land of said Lower Calispell or Lower Pend O'Reille Indians from those of the Coeur d'Alene, Spokane, Colville, and Lake Tribes or Bands of Indians; which said lands or rights therein or thereto are claimed to have been taken away from said Indian tribes and bands, or some of them, by the United States, recovery therefor in no event to exceed $1.25 per acre; together with all other claims of said tribes or bands of Indians, or any of said tribes or bands, arising under or growing out of fishing rights and privileges held and enjoyed by said tribes and bands, or any of them, in the waters of the Columbia River and its tributaries; or arising or growing out of hunting rights and privileges held and enjoyed by said tribes and bands, or any of them, in common with other Indians in the "common hunting grounds" east of the Rocky Mountains as reserved by and described in the treaty with Blackfoot Indians October 17, 1855 (11 Stat. L. 657–662), and which are claimed to have been taken away from said tribes and bands, or any of them, by the United States without any treaty or agreement with such Indian claimants therefor and without compensation to them.

SEC. 2. Any and all claims against the United States within the purview of this act shall be forever barred unless suit or suits be instituted or petition, subject to amendment, be filed as herein provided in the Court of Claims within five years from the date of the approval of this act, and such suit or suits shall make the said Lower Spokane and Lower Calispell or Lower Pend O'Reille Indian Tribes or Bands of Washington, or any of said tribes or bands, party or parties plaintiff and the United States party defendant. The petition shall be verified by the attorney or attorneys employed to prosecute such claim or claims under contract with the Indians approved in accordance with existing law; and said contract shall be executed in their behalf by a committee or committees selected by said Indians as provided by existing law. Official letters, papers, documents and records, maps, or certified copies thereof may be used in evidence, and the departments of the Government shall give access to the attorney or attorneys of said Indians to such treaties, papers, maps, correspondence, or reports as they may require in the prosecution of any suit or suits instituted under this act.

SEC. 3. In said suit or suits the court shall also hear, examine, consider, and adjudicate any claims which the United States may have against the said Indian tribes and bands, or any of them, but any payment or payments which have been made by the United States upon any such claim or claims shall not operate as an estoppel, but may be pleaded as an offset in such suit or suits, as may gratuities, if any, paid to or expended for said Indian tribes and bands of any of them.

SEC. 4. Any other tribes or bands of Indians the court may deem necessary to a final determination of any suit or suits brought hereunder

may be joined therein as the court may order: *Provided*, That upon final determination of such suit or suits the Court of Claims shall have jurisdiction to fix and determine a reasonable fee, not to exceed 10 per cent of the recovery, by any one of said tribes or bands, and in no event to exceed the sum of $25,000 for any one of said tribes or bands of Indians, together with all necessary and proper expenses incurred in the preparation and prosecution of such suit or suits to be paid to the attorney or attorneys employed as herein provided by the said tribes or bands of Indians, or any of said tribes or bands, and the same shall be included in the decree, and shall be paid out of any sum or sums adjudged to be due said tribes or bands, or any of them, and the balance of such sum or sums shall be placed in the Treasury of the United States, where it shall draw interest at the rate of 4 per cent per annum.

Mr. CRAMTON. Mr. Speaker, I submit my amendments and ask that they be considered together.

The SPEAKER. The Clerk will report the amendments offered by the gentleman from Michigan [Mr. CRAMTON].

The Clerk read as follows:

Amendments offered by Mr. CRAMTON: Page 6, line 18, after the word "them," strike out the comma and the words "but any" and insert in lieu thereof a period and the word "Any"; on line 7 of page 7 strike out the words "any one" and insert in lieu thereof the word "all"; and in line 17, page 7, strike out the period after the word "annum" and insert a comma and the following: "subject to appropriation by Congress for the health, education, and industrial advancement of said Indians, including the building of homes."

The SPEAKER. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote whereby the Senate bill was passed was laid on the table.

The similar House bill was laid on the table.

HOWARD SEABURY

The next business on the Consent Calendar was the bill (H. R. 12379) granting the consent of Congress to Howard Seabury to construct, maintain, and operate a dam to retain tidal waters in an unnamed cove which is situated and extends from Cases Inlet into section 28, township 21 north, range 1 west, Willamette meridian, in Pierce County, State of Washington.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the consent of Congress is granted to Howard Seabury to construct, maintain, and operate, at a point suitable to the interests of navigation, a dam for the purpose of retaining tidal waves in an unnamed cove which is situated and extends from Cases Inlet into section 28, township 21 north, range 1 west, Willamette meridian, in Pierce County, State of Washington. Work shall not be commenced on such dam until the plans therefor, including plans for all accessory works, are submitted to and approved by the Secretary of War, who may impose such conditions and stipulations as he deems necessary to protect the interests of the United States, which may include the condition that Howard Seabury shall construct, maintain, and operate, in connection with such dam, and without expense to the United States, a lock, boom, sluice, or any other structure or structures which the Secretary of War at any time may deem necessary in the interests of navigation, in accordance with such plans as he may approve. This act shall not be construed to authorize the use of such dam to develop water power or to generate hydroelectric energy.

SEC. 2. The authority granted by this act shall terminate if the actual construction of the dam hereby authorized is not commenced within one year and completed within three years from the date of the passage of this act.

SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved.

With committee amendments, as follows:

Page 1, line 6, strike out the word "waves" and insert in lieu thereof the word "waters." Page 2, line 5, after the word "War," insert "and the Chief of Engineers." On page 2, line 6, strike out the words "he deems" and insert "they deem"; page 2, line 12, after the word "War," insert the words "and the Chief of Engineers." On page 2, line 14, strike out the word "he" and insert the word "they."

The SPEAKER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

BRIDGE ACROSS THE SABINE RIVER, STATES OF TEXAS AND LOUISIANA

The next business on the Consent Calendar was the bill (H. R. 12386) authorizing the State of Texas and the State of Louisiana to construct, maintain, and operate a free highway bridge across the Sabine River at or near Pendleton's Ferry.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes, the State Highway Commission of Texas and the Louisiana Highway Commission be, and are hereby, authorized to construct, maintain, and operate a free highway bridge and approaches thereto across the Sabine River, between Sabine County, Tex., and Sabine Parish, La., at a point suitable to the interests of navigation, at or near Pendleton's Ferry, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. There is hereby conferred upon the State Highway Commission of Texas and the Louisiana Highway Commission all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

BRIDGE ACROSS THE OUACHITA RIVER

The next business on the Consent Calendar was the bill (H. R. 12677) to amend section 2 of an act approved March 12, 1928, granting consent of Congress for the construction of a bridge across the Ouachita River at or near Calion, Ark.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That section 2 of an act approved March 12, 1928, granting consent of Congress for the construction of a bridge across Ouachita River at or near Calion, Ark., shall read as follows:

"SEC. 2. If tolls are charged for the use of such bridge, the rates of toll shall be so adjusted as to provide a fund sufficient (1) to pay the reasonable cost of maintaining, repairing, and operating the bridge and its approaches; (2) the interest on borrowed money necessarily required and financing charges necessarily incurred in connection with the construction of the bridge and its approaches; and (3) to provide a sinking fund sufficient to retire the bonds issued and sold in connection with such original construction. All revenue received from the bridge shall be applied to the foregoing purposes and no bonds issued in connection with the construction of the bridge and its approaches shall be made to mature later than 20 years after the date of issue thereof.

"After a fund sufficient to retire such bonds in accordance with their provisions shall have been so provided, the bridge shall thereafter be maintained and operated as a free highway bridge, upon which no tolls shall be charged. An accurate and itemized record of the original cost of the bridge, and its approaches, the expenditures for maintaining, repairing, and operating the same, the interest charges paid and the tolls charged and the daily revenues received from the bridge shall be kept by the State Highway Commission of Arkansas, and shall be available at all reasonable times for the information of all persons interested."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS RED RIVER

The next business on the Consent Calendar was the bill (H. R. 12676) to amend section 2 of an act approved February 14, 1926, granting consent of Congress for the construction of a bridge across Red River at or near Fulton, Ark.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That section 2 of an act approved February 14, 1926, granting consent of Congress for the construction of a bridge across Red River at or near Fulton, Ark., shall read as follows:

"SEC. 2. If tolls are charged for the use of such bridge, the rates of toll shall be so adjusted as to provide a fund sufficient (1) to pay the reasonable cost of maintaining, repairing, and operating the bridge and its approaches; (2) the interest on borrowed money necessarily required and financing charges necessarily incurred in connection with the construction of the bridge and its approaches; and (3) to provide a sinking fund sufficient to retire the bonds issued and sold in connection with such original construction. All revenue received from the bridge shall be applied to the foregoing purposes, and no bonds issued in connection with the construction of the bridge and its approaches shall be made to mature later than 20 years after the date of issue thereof.

"After a fund sufficient to retire such bonds in accordance with their provisions shall have been so provided, the bridge shall thereafter be maintained and operated as a free highway bridge, upon which no tolls shall be charged. An accurate and itemized record of the original cost of the bridge and its approaches, the expenditures for maintaining, repairing, and operating the same, the interest charges paid and the tolls charged and the daily revenues received from the bridge shall be kept by the State Highway Commission of Arkansas, and shall be available at all reasonable times for the information of all persons interested."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

TIMES AND PLACES FOR HOLDING COURT FOR THE EASTERN DISTRICT OF NORTH CAROLINA

Mr. WARREN. Mr. Speaker, I ask unanimous consent to return to Calendar 716 and call up Senate bill 3947, to provide for the times and places for holding court for the eastern district of North Carolina. I will state to the House that at the last session a bill was passed which inadvertently destroyed the entire court procedure of the eastern district of North Carolina. This bill is to remedy that situation. It is an emergency and is of great public importance.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the terms of the District Court for the Eastern District of North Carolina shall be held at Durham on the first Monday in March and September; at Raleigh a one-week civil term on the second Monday in March and September and a criminal term only on the second Monday after the fourth Monday in April and October; at Fayetteville on the third Monday in March and September; at Elizabeth City on the fourth Monday in March and September; at Washington on the first Monday in April and October; at New Bern on the second Monday in April and October; at Wilson on the third Monday in April and October; and at Wilmington a two-weeks term on the fourth Monday in April and October: *Provided*, That this act shall take effect on July 1, 1928: *And provided further*, That at Wilson and Durham it shall be made incumbent upon each place to provide suitable facilities for holding the courts.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE SUWANNEE RIVER

The next business on the Consent Calendar was the bill (S. 3173) authorizing the St. Johns River Development Co., a corporation of the State of Florida, its successors and assigns, to construct, maintain, and operate a bridge across the Suwannee River at a point where State Road No. 15 crosses the Suwannee River, State of Florida.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. COOPER of Wisconsin. Mr. Speaker, reserving the right to object, I want to ask a question about this bridge. Is this a toll bridge?

Mr. DENISON. It is.

Mr. COOPER of Wisconsin. I saw the other day a newspaper statement that there had been more toll bridges authorized by Congress during the last year and a half or two years than had been authorized in the previous 25 years, and that as a result of this a corporation had been organized and was printing advertisements that it would now attend to the selling of the bonds and stocks of toll-bridge corporations. I wonder whether Congress is being used to enable a corporation organized for the purpose of selling toll-bridge bonds and stocks to exploit the people. This matter of putting up toll bridges and the consequent obstructing of free intercourse between the States may degenerate into a very great evil. I would like to be informed whether this particular bridge company is going to have its stocks and bonds sold by this corporation.

The SPEAKER. Is there objection?

Mr. COOPER of Wisconsin. Mr. Speaker, I object.

Mr. COCHRAN of Missouri. Will the gentleman withhold his objection?

Mr. COOPER of Wisconsin. I will withhold it until I get a statement showing what is going on.

Mr. COCHRAN of Missouri. Mr. Speaker, I will say to the gentleman that I saw the statement in the papers to which he has referred. I wrote to the officials of Maryland and asked what change had been made in the charter, and they answered by saying that the original incorporators had amended their charter so as to read that they would build and purchase toll bridges. I have the names of the incorporators in my office and have been watching the bills to see if any of them were interested in any of the bridge bills presented here, but their names have not appeared.

Mr. DENISON. Does the gentleman from Wisconsin wish me to make a statement?

Mr. COOPER of Wisconsin. I do; yes.

Mr. DENISON. The gentleman from Wisconsin has asked a question, and I feel as though some member of the committee ought to try to answer it. The fact that some company may have wanted to amend its charter so that it can deal in bridge bonds has no special significance unless it comes before our committee asking for some special privileges. Such a concern has never been before us so far as I have ever heard. I myself never heard of the corporation the gentleman refers to.

Mr. COOPER of Wisconsin. The gentleman from Missouri [Mr. COCHRAN] has just said that he had heard about that toll bridge stock and bond corporation and has been in correspondence respecting it with the officials of Maryland.

Mr. DENISON. I say I have never heard about it myself.

Mr. COOPER of Wisconsin. The gentleman has read about it?

Mr. DENISON. I will again state that I have never heard or read of the corporation, but I will be glad to have the name of it. It has never been called to the attention of our committee. I have heard of no member of our committee who knows about it. If we can get information in regard to such a concern, we would be very glad to have the information and would endeavor to prevent its having any connection with any bridges that we authorize.

Mr. COOPER of Wisconsin. Does not the gentleman think he had better suspend until he gets the information before passing any more of these bills?

Mr. DENISON. I do not think so. The Member who introduced this bill is just as vitally interested in having this bridge bill passed as any other Member in his bill. It is a matter of vital interest to his district. He assures us this is being built by local parties who are not connected with any other concern.

There is a reason why there are more applications for toll bridges now. There have been more roads built in the last 5 or 10 years than were ever built before in the history of this country, and as improved roads are being built demands for bridges are increasing. No such bridge is built except at places where there are tolls charged by ferries, and a modern bridge is an improved method of crossing a river; and nine times out of ten the charges for crossing by the bridge are reduced below those charged by the ferries; and in every instance we provide for protecting the public against indefinite charging of tolls and against excessive tolls. It should be remembered that the Federal Government can regulate the tolls charged on any bridge we authorize, and we provide for recapture of all bridges at any time by public authorities.

Mr. COOPER of Wisconsin. Can the gentleman from Missouri [Mr. COCHRAN] tell the House what correspondence he

has had with the Maryland authorities about this corporation?

Mr. COCHRAN of Missouri. I wrote the officials of the State of Maryland when I saw the article in the paper and I requested information as to how they amended their original charter. I was advised the amendment provided they should have the right to build and buy toll bridges, and that the original incorporators had asked for the amendment and it was granted. I have this letter in my office, together with the names, which I do not now recall. I have checked up on the bridge bills, and so far I have not seen the names of the people who are interested in this corporation. I realize this is a very important matter and one that should be watched, and if I come across their names in connection with any bill I will certainly call the attention of the committee to it.

Mr. COOPER of Wisconsin. Mr. Speaker, I shall have to object at this time until I can get more information upon this exceedingly important matter.

THE AIR CORPS

Mr. JAMES. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 12814) to increase the efficiency of the Air Corps.

The SPEAKER. The gentleman from Michigan moves to suspend the rules and pass the bill H. R. 12814, which the Clerk will report.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of War shall cause to be prepared an Air Corps promotion list on which shall be placed the names of all officers of the Air Corps of the Regular Army below the grade of colonel. The names on this list shall be arranged in the same relative order that they now have on the Army promotion list and shall be removed from the Army promotion list, and no officer whose name appears on the original Air Corps promotion list shall be considered as having less commissioned service than any officer whose name is below his on this list. All officers commissioned in the Air Corps after the formation of the original Air Corps promotion list shall be placed thereon in accord with length of commissioned service. Any officer whose position on the Air Corps promotion list is changed by sentence of a general court-martial or by law shall be deemed to have the same commissioned service as the officer next below whom he may be placed by such change.

SEC. 2. Except as herein provided, Air Corps flying officers shall be promoted to the grade of first lieutenant when credited with three years' commissioned service; to the grade of captain when credited with seven years' commissioned service; to the grade of major when credited with 12 years' commissioned service; to the grade of lieutenant colonel when credited with 20 years' commissioned service; to the grade of colonel when credited with 26 years' commissioned service. All flying officers of the Air Corps below the grade of colonel shall be promoted in the order of their standing on the Air Corps promotion list: *Provided*, That the number of Air Corps officers in the grade of colonel shall not be less than 4 per cent nor more than 6 per cent and the number in the grade of lieutenant colonel shall not be less than 5 per cent nor more than 7 per cent of the total number of officers on the Air Corps promotion list, and the aggregate number of Air Corps officers in the grades of colonel, lieutenant colonel, and major shall not be less than 26 per cent nor more than 40 per cent of the total number of officers on the Air Corps promotion list, and in so far as necessary to maintain said minimum percentage, Air Corps flying officers of less than the required years of commissioned service shall be promoted to the grades of colonel, lieutenant colonel, and major, and only in so far as their promotion will not cause said maximum percentages to be exceeded shall officers who have completed the prescribed years of commissioned service be promoted to the grades of colonel, lieutenant colonel, and major. Nonflying officers of the Air Corps shall be promoted as provided for other branches of the Army.

SEC. 3. When an officer of the Air Corps has served 30 years, either as an officer or soldier, he shall, if he makes application therefor to the President, be retired from active service and placed on the retired list: *Provided*, That, except in time of war, in computing the length of service for retirement credit shall be given for one and one-half the time heretofore or hereafter actually detailed to duty involving flying and credit shall also be given for all other time now counted toward retirement in the Army: *Provided further*, That the number of such voluntary retirements annually shall not exceed 6 per cent of the authorized strength of the Air Corps. When a flying officer of the Air Corps reaches the age of 54 years he shall, if he makes application therefor to the President, be retired from active service and placed on the retired list. Officers of the Air Corps who become physically disqualified for the performance of their duties as flying officers shall be eligible for retirement for physical disability.

SEC. 4. An officer of the Air Corps, may, upon his own request, be transferred to another branch of the service, and when so transferred shall take rank and grade therein in accordance with his length of commissioned service as computed under existing laws governing the branch to which transferred.

SEC. 5. All laws or parts of laws in so far as they may be inconsistent herewith or in conflict with the provisions of this act are repealed.

The SPEAKER. Is a second demanded?

A second was not demanded.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

Mr. FURLOW. Mr. Speaker, the problem of adequately caring for Air Corps officers now on the promotion list has been studied by many boards and committees of Congress and we now have before us H. R. 12814, which, in my opinion, will go a long way toward correcting the injustices which admittedly exist.

Military organization demands that its officers have the appropriate rank for their commands and responsibilities. The Army Air Corps is no exception to this principle.

Ever since the formation of the single promotion list of the Army, which includes the officers of the Air Corps with those of other branches, it has become more and more apparent that additional legislation was needed to correct a situation in the Air Corps which has been growing worse rather than better under the principles governing that list.

Prejudiced at the very beginning by their position in the lower files of the promotion list due to the greater period of training required and also greatly affected by the exceedingly high casualty rate as compared with other branches, the Air Corps officers have presented a problem that has been repeatedly investigated. As early as the spring of 1922 a War Department board of officers headed by Maj. Gen. David Shanks reported:

The board is of the opinion that this situation will affect adversely the efficiency of the Air Service.

And it is particularly significant that this board also stated:

The Air Service is the only branch or arm of the service which is adversely affected by the promotion situation.

Another War Department board nearly two years later reported:

The prejudice to the Air Service incident to having some of its officers on the promotion list well below their contemporaries in other branches should be remedied.

Other investigations have continued to disclose this unfortunate situation existing in the Air Corps and to bring to light the fact that year after year the relative rank of this corps with respect to the other branches has become lower and lower. It is the exception rather than the rule that officers of the Air Corps hold the appropriate rank for their commands and responsibilities.

The report—1277—submitted by the gentleman from New York [Mr. WAINWRIGHT] on the bill H. R. 12814, which has been unanimously passed by the House, sets forth the situation outlined above and enunciates what this bill will accomplish. In addition, it might be stated that over two-thirds of the officers commissioned in the Air Corps to-day are in what is commonly known as the World War hump, and these officers are almost entirely in the lower files of that hump. Their prospects for promotion under any system which would keep them on the single promotion list of the Army are always jeopardized by the fact that thousands of other officers in this World War hump must be promoted before reaching them. And yet the principal cause of their position is, as above stated, simply that they were required to undergo a greater period of training for their specialized work than officers of other branches.

The two officers who made that world-famed flight from San Francisco to the Hawaiian Islands, Lieutenants Hegenberger and Maitland—and these officers are typical of that great group of over 600 in the Air Corps who are thus affected—told our committee that their prospects, under the present system, of promotion to the grade of major indicate this would not occur until 1948, after 31 years of service and when both of these officers were 50 or more years of age. Yet both of them have already held the responsibilities of field officers for several years.

Lieut. Eric Nelson, who represents a smaller group of Air Corps officers, nevertheless, is an example of the situation which H. R. 12814 will tend to correct. Lieutenant Nelson, it will be remembered, was a member of the flight which encircled the world in 1924. He participated in the flight of Army planes which went to Alaska and back and was also on the flight from the United States to Porto Rico and return. For his accomplishments Congress saw fit to pass a special bill advancing him 500 files on the promotion list. Still this officer is a first lieutenant, and his prospects, under the present system, of becoming a major are little better than those of Lieutenants Hegenberger and

Maitland, above cited. He would be nearly 60 years of age at that time. Lieut. H. A. Dinger, who appeared before the Military Affairs Committee, is nearly 42 years of age, and is likewise adversely affected. There are several lieutenants in the Air Corps older than Lieutenant Dinger.

Military flying will no doubt always be hazardous, as the factors which contribute to the safety of commercial flying must in war planes give way to speed, greater fire power, larger bomb loads, and other desirable military characteristics. Combat will require decidedly different maneuvers from commercial flying. During the past five years, even with the introduction of the parachute and the increased efficiency of aircraft, the Army Air Corps, with less than a thousand officers, has borne the burden of nearly 40 per cent of all the casualties on the active list of approximately 12,000 officers in the Army. The accident death rate is nearly nine times as great as that in other branches.

Colonel Lindbergh brought out the point that "if a flying officer meets his death the vacancy should be filled by an Air Corps officer of equal experience." This principle is eminently sound and is the very basis upon which this Air Corps promotion list is built.

H. R. 12814 provides a reasonable rate of promotion. It contemplates the advancement of air officers so as to keep in step with the responsibilities placed upon him. It provides an inducement to candidates to enter the Air Corps, where now there is a tremendous stagnation in the promotion situation, and always that great hump of thousands of officers of other branches above them.

This bill recognizes the principle enunciated in the very first sentence of my remarks, that military organization must have its proper ranks. It recognizes the greater casualty rate, and assures to the average officer advancement to a field grade during his active flying career.

Annually 2.4 per cent of the commissioned personnel of the Air Corps lose their lives in air accidents. It is obvious that in about 20 years' flying an Air Corps officer has even chances of keeping off that casualty list. During that period he has given the best years of his life to the service of the Government in a profession which is recognized as many times more hazardous than any other Army activity. It is but a meager reward and recognition for this service to permit him to retire after this period of service should he care to do so.

There is also a provision in this bill that officers who become physically unfit or reach the age of 54 years may be retired. Laws have already been enacted which contemplate keeping the Air Corps at a high state of flying efficiency. This can only be accomplished by enacting retirement provisions for those who have lost their usefulness as active flying officers.

It is to be noted that the cost of this bill is very small compared with the results to be obtained. Although an increase in the rate of promotion is provided, the pay of officers is under existing law based primarily on years of service and not on rank. A large number of first lieutenants in the Air Corps, who have over 10 years of service, will receive no increase in pay when passing into the grade of captain, and similarly the captains when promoted after 12 years' service to the grade of major receive no increase in pay. It is true that there are some small increases, due to increased rank, but these come principally because of length of service.

It is obviously necessary to maintain the national defense at its maximum state of efficiency and, with a limited number of commissioned personnel in the Air Corps, their quality should be of the best. Efficiency in this line can not adequately be maintained if officers continue to work under prospects of stagnation in promotion, such as have existed for several years. An officer's morale is greatly increased if given rank commensurate with his command. Furthermore, the whole command responds with greater enthusiasm when the organization is properly balanced in the various grades. The officers of the Air Corps do not lack in quality or type, but they do lack in rank.

The Lassiter Board, which recommended several years ago a 10-year program, approved in principle by the Secretary of War, for the development of the Air Corps, stated:

> We can not improvise an Air Service, and yet it is indispensable to be strong in the air at the very outset of a war.

This principle has become more and more apparent with the development of aircraft and its increasing importance in the scheme of national defense. The five-year development program provided in the Air Corps act of July 2, 1926, provides for 1,650 regular officers in the Air Corps. This will permit of the organization of a number of units which will constitute the foundation for an expansion in time of emergency. This foundation should be strong, well balanced, and of the finest quality that can be obtained.

The morale of the air officers has been low, many have resigned because of poor prospects for their future. There probably would have been more, except for the fact that anticipation of better prospects has been stimulated by the repeated investigations that have taken place. Lieutenant Hegenberger stated before the House Military Affairs Committee:

> Since the war we have had the subject under constant discussion and it has always seemed that the solution was imminent, and it has always been an incentive to hang on in hope that the situation would be corrected.

There is no doubt the present bill will very greatly increase the morale of the officers, as well as provide a better organization.

Summarizing his testimony, Colonel Lindbergh stated:

> I believe our air forces should constitute a first line of defense—they must be ready to take the initiative when danger threatens our Nation; there may be no time permitted for preparation. Efficiency will be gained by proper peace-time provisions to care for the personnel. The expectancy of life for the flying officer is far less than in other occupations; the rate of attrition is high, the strain on the physical resistance from combat flying is excessive, the period of greatest flying efficiency is limited; responsibilities of air officers are heavy; promotion for a large proportion appears to have stagnated. These observations have led me to believe the problem of the air officers is special and requires consideration by itself.

I believe in a separate promotion list for the Air Corps as provided by this bill in order that the air officers may be given rank commensurate with command and responsibility, in order that World War veterans may have a chance to command with the proper grade, in order that vacancies caused by casualties in the Air Corps may be filled by properly qualified Air Corps officers, in order that morale may be enhanced and the efficiency of the Air Corps be increased, in order to offer additional incentive to candidates and to increase the Air Corps up to that strength contemplated by the Air Corps act of 1926, and to provide proper recognition of the hazardous service to which our air officers have devoted themselves.

H. R. 12814 is truly in the interests of national defense. It aims to increase and to bring to a high state of efficiency our Army air forces; it singles out no one for individual benefits.

From personal investigation, I am firmly convinced that the enactment of this bill into law is awaited with keen expectation by the personnel of our Air Corps. I have no hesitancy in stating my opinion that, should it fail of passage by both Houses of Congress, there will be a great number of our most expert pilots leaving the service and accepting attractive offers now being held out in the fields of commercial aviation.

We can ill afford to lose these seasoned and experienced officers and we need have no fear of having them resign if we but meet them half way, and give them an opportunity for advancement in their chosen line of endeavor.

With aviation making rapid strides throughout the world the United States should ever keep in mind the needs of its own Air Corps and its proper development. Modern equipment is of little avail if we forget the human side—and that means the fliers themselves.

## AMENDMENT OF SALARY RATES IN THE COMPENSATION SCHEDULES OF THE CLASSIFICATION ACT

Mr. LEHLBACH. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 6518) to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services," as amended.

The SPEAKER. The gentleman from New Jersey moves to suspend the rules and pass the bill (H. R. 6518) as amended.

The Clerk will report the bill as amended.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That section 13 of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services," be amended to read as follows:

SEC. 13. That the compensation schedules be as follows:

### PROFESSIONAL AND SCIENTIFIC SERVICE

The professional and scientific service shall include all classes of positions the duties of which are to perform routine, advisory, administrative, or research work which is based upon the established principles of a profession or science, and which requires professional, scientific, or technical training equivalent to that represented by graduation from a college or university of recognized standing.

Grade 1 in this service, which may be referred to as the junior professional grade, shall include all classes of positions the duties of which are to perform, under immediate supervision, simple and elementary

work requiring professional, scientific, or technical training as herein specified, but little or no experience.

The annual rates of compensation for positions in this grade shall be $2,000, $2,100, $2,200, $2,300, and $2,400.

Grade 2 in this service, which may be referred to as the assistant professional grade, shall include all classes of positions the duties of which are to perform, under immediate or general supervision, individually or with a small number of subordinates, work requiring professional, scientific, or technical training as herein specified, previous experience, and, to a limited extent, the exercise of independent judgment.

The annual rates of compensation for positions in this grade shall be $2,600, $2,700, $2,800, $2,900, and $3,000.

Grade 3 in this service, which may be referred to as the associate professional grade, shall include all classes of positions the duties of which are to perform, individually or with a small number of trained assistants, under general supervision, but with considerable latitude for the exercise of independent judgment, responsible work requiring extended professional, scientific, or technical training and considerable previous experience.

The annual rates of compensation for positions in this grade shall be $3,200, $3,300, $3,400, $3,500, and $3,600.

Grade 4 in this service, which may be referred to as the full professional grade, shall include all classes of positions the duties of which are to perform, under general supervision, difficult and responsible work requiring considerable professional, scientific, or technical training and experience, and the exercise of independent judgment.

The annual rates of compensation for positions in this grade shall be $3,800, $4,000, $4,200, and $4,400.

Grade 5 in this service, which may be referred to as the senior professional grade, shall include all classes of positions the duties of which are to perform, under general administrative supervision, important specialized work requiring extended professional, scientific, or technical training and experience, the exercise of independent judgment, and the assumption of responsibility for results, or for the administration of a small scientific or technical organization.

The annual rates of compensation for positions in this grade shall be $4,600, $4,800, $5,000, and $5,200, unless a higher rate is specifically authorized by law.

Grade 6 in this service, which may be referred to as the principal professional grade, shall include all classes of positions the duties of which are to act as assistant head of a major professional or scientific organization, or to act as administrative head of a major subdivision of such an organization, or to act as head of a small professional or scientific organization, or to serve, as consulting specialist, or independently to plan, organize, and conduct investigations in original research or development work in a professional, scientific, or technical field.

The annual rates of compensation for positions in this grade shall be $5,600, $5,800, $6,000, $6,200, and $6,400, unless a higher rate is specifically authorized by law.

Grade 7 in this service which may be referred to as the head professional grade shall include all classes of positions the duties of which are to act as assistant head of one of the largest and most important professional or scientific bureaus, or to act as the scientific and administrative head of a major professional or scientific bureau, or to act as professional consultant to a department head or a commission or board dealing with professional, scientific, or technical problems, or to perform professional or scientific work of equal importance, difficulty, and responsibility.

The annual rates of compensation for positions in this grade shall be $6,500, $7,000, and $7,500, unless a higher rate is specifically authorized by law.

Grade 8 in this service, which may be referred to as the chief professional grade, shall include all classes of positions the duties of which are to act as the administrative head of one of the largest and most important professional or scientific bureaus, or to perform professional or scientific work of equal importance, difficulty, and responsibility.

The annual rates of compensation for positions in this grade shall be $8,000, $8,500, and $9,000, unless a higher rate is specifically authorized by law.

Grade 9 in this service, which may be referred to as the special professional grade, shall include all positions which are or may be specifically authorized or appropriated for at annual rates of compensation in excess of $9,000.

SUBPROFESSIONAL SERVICE

The subprofessional service shall include all classes of positions the duties of which are to perform work which is incident, subordinate, or preparatory to the work required of employees holding positions in the professional and scientific service, and which requires or involves professional, scientific, or technical training of any degree inferior to that represented by graduation from a college or university of recognized standing.

Grade 1 in this service, which may be referred to as the minor subprofessional grade, shall include all classes of positions the duties of which are to perform, under immediate supervision, the simplest routine work in a professional, scientific, or technical organization.

The annual rate of compensation for positions in this grade shall be $1,020, $1,080, $1,140, $1,200, $1,260, and $1,320.

Grade 2 in this service, which may be referred to as the under-subprofessional grade, shall include all classes of positions the duties of which are to perform, under immediate supervision, assigned subordinate work of a professional, scientific, or technical character, requiring limited training or experience, but not the exercise of independent judgment.

The annual rates of compensation for positions in this grade shall be $1,260, $1,320, $1,380, $1,440, $1,500, and $1,560.

Grade 3 in this service, which may be referred to as the junior subprofessional grade, shall include all classes of positions the duties of which are to perform, under immediate supervision, subordinate work of a professional, scientific, or technical character, requiring considerable training or experience, but not the exercise of independent judgment.

The annual rates of compensation for positions in this grade shall be $1,440, $1,500, $1,560, $1,620, $1,680, and $1,740.

Grade 4 in this service, which may be referred to as the assistant subprofessional grade, shall include all classes of positions the duties of which are to perform, under immediate supervision, subordinate work of a professional, scientific, or technical character, requiring considerable training or experience, and, to a limited extent, the exercise of independent judgment.

The annual rates of compensation for positions in this grade shall be $1,620, $1,680, $1,740, $1,800, $1,860, and $1,920.

Grade 5 in this service, which may be referred to as the main subprofessional grade, shall include all classes of positions the duties of which are to perform, under immediate or general supervision, subordinate work of a professional, scientific, or technical character requiring a thorough knowledge of a limited field of professional, scientific, or technical work, and the exercise of independent judgment, or to supervise the work of a small number of employees performing duties of an inferior grade in the subprofessional service.

The annual rates of compensation for positions in this grade shall be $1,800, $1,860, $1,920, $1,980, and $2,040.

Grade 6 in this service, which may be referred to as the senior subprofessional grade, shall include all classes of positions the duties of which are to perform, under immediate or general supervision, subordinate but difficult and responsible work of a professional, scientific, or technical character, requiring a thorough knowledge of a limited field of professional, scientific, or technical work, and the exercise of independent judgment, or to supervise the work of a small number of employees holding positions in grade 5 of this service.

The annual rates of compensation for positions in this grade shall be $2,000, $2,100, $2,200, $2,300, and $2,400.

Grade 7 in this service, which may be referred to as the principal subprofessional grade, shall include all classes of positions the duties of which are to perform, under general supervision, subordinate but responsible work of a professional, scientific, or technical character requiring a working knowledge of the principles of the profession, art, or science involved, and the exercise of independent judgment, or to supervise the work of a small number of employees holding positions in grade 6 of this service.

The annual rates of compensation for positions in this grade shall be $2,300, $2,400, $2,500, $2,600, and $2,700.

Grade 8 in this service, which may be referred to as the chief subprofessional grade, shall include all classes of positions the duties of which are to perform, under general supervision, subordinate but difficult and responsible work of a professional, scientific, or technical character, requiring a thorough working knowledge of the principles of the profession, art, or science involved, and the exercise of independent judgment, or to supervise the work of a small number of employees holding positions in grade 7 of this service.

The annual rates of compensation for positions in this grade shall be $2,600, $2,700, $2,800, $2,900, and $3,000.

CLERICAL, ADMINISTRATIVE, AND FISCAL SERVICE

The clerical, administrative, and fiscal service shall include all classes of positions the duties of which are to perform clerical, administrative, or accounting work, or any other work commonly associated with office, business, or fiscal administration.

Grade 1 in this service, which may be referred to as the under clerical grade, shall include all classes of positions the duties of which are to perform, under immediate supervision, the simplest routine office work.

The annual rates of compensation for positions in this grade shall be $1,260, $1,320, $1,380, $1,440, $1,500, and $1,560.

Grade 2 in this service, which may be referred to as the junior clerical grade, shall include all classes of positions the duties of which are to perform, under immediate supervision, assigned office work requiring training or experience but not the exercise of independent judgment.

The annual rates of compensation for positions in this grade shall be $1,440, $1,500, $1,560 $1,620, $1,680, and $1,740.

Grade 3 in this service, which may be referred to as the assistant electrical grade, shall include all classes of positions the duties of which

are to perform under immediate or general supervision, assigned office work requiring training and experience and knowledge of a specialized subject matter or the exercise of independent judgment or to supervise a small section performing simple clerical operations.

The annual rates of compensation for positions in this grade shall be $1,620, $1,680, $1,740, $1,800, $1,860, and $1,920.

Grade 4 in this service, which may be referred to as the main clerical grade, shall include all classes of positions the duties of which are to perform, under immediate or general supervision, responsible office work requiring training and experience, the exercise of independent judgment or knowledge of a specialized subject matter, or both, and an acquaintance with office procedure and practice, or to supervise a small stenographic section or a small section performing clerical operations of corresponding difficulty.

The annual rates of compensation for positions in this grade shall be $1,800, $1,860, $1,920, $1,980, $2,040, and $2,100.

Grade 5 in this service, which may be referred to as the senior clerical grade, shall include all classes of positions the duties of which are to perform, under general supervision, difficult and responsible office work requiring considerable training and experience, the exercise of independent judgment or knowledge of a specialized subject matter, or both, and a thorough knowledge of office procedure and practice, or to supervise a large stenographic section or any large section performing simple clerical operations or to supervise a small section engaged in difficult but routine office work.

The annual rates of compensation for positions in this grade shall be $2,000, $2,100, $2,200, $2,300, and $2,400.

Grade 6 in this service, which may be referred to as the principal clerical grade, shall include all classes of positions, the duties of which are to perform, under general supervision, exceptionally difficult and responsible office work requiring extended training and experience, the exercise of independent judgment or knowledge of a specialized and complex subject matter, or both, and a thorough knowledge of office procedure and practice, or to serve as the recognized authority or adviser in matters requiring long experience and an exceptional knowledge of the most difficult and complicated procedure or of a very difficult and complex subject, or to supervise a large or important office organization engaged in difficult or varied work.

The annual rates of compensation for positions in this grade shall be $2,300, $2,400, $2,500, $2,600, and $2,700.

Grade 7 in this service, which may be referred to as the assistant administrative grade, shall include all classes of positions the duties of which are to perform, under general supervision, responsible office work along specialized and technical lines requiring specialized training and experience and the exercise of independent judgment, or as chief clerk to supervise the general business operations of a small, independent establishment or a minor bureau or division of an executive department, or to supervise a large or important office organization engaged in difficult and specialized work.

The annual rates of compensation for positions in this grade shall be $2,600, $2,700, $2,800, $2,900, and $3,000.

Grade 8 in this service, which may be referred to as the associate administrative grade, shall include all classes and positions the duties of which are to perform, under general supervision, difficult and responsible office work along specialized and technical lines requiring specialized training and experience and the exercise of independent judgment, or to supervise a large or important office organization engaged in work involving specialized training on the part of the employees.

The annual rates of compensation for positions in this grade shall be $2,900, $3,000, $3,100, $3,200, and $3,300.

Grade 9 in this service, which may be referred to as the full administrative grade, shall include all classes of positions the duties of which are to perform, under general supervision, exceptionally difficult and responsible office work along specialized and technical lines, requiring considerable specialized training and experience and the exercise of independent judgment, or as chief clerk, to supervise the general business operations of a large independent establishment or a major bureau or division of an executive department, or to supervise a large or important office organization engaged in work involving technical training on the part of the employees.

The annual rates of compensation for positions in this grade shall be $3,200, $3,300, $3,400, $3,500, and $3,600.

Grade 10 in this service, which may be referred to as the senior administrative grade, shall include all classes of positions the duties of which are to perform, under general supervision, the most difficult and responsible office work along specialized and technical lines, requiring extended training, considerable experience, and the exercise of independent judgment, or to supervise a large or important office organization engaged in work involving considerable technical training and experience on the part of the employees.

The annual rates of compensation for positions in this grade shall be $3,500, $3,600, $3,700, $3,800, and $3,900.

Grade 11 in this service, which may be referred to as the principal administrative grade, shall include all classes of positions the duties of which are to perform the most difficult and responsible office work along specialized and technical lines requiring extended training and experience and the exercise of independent judgment, or to supervise a large or important office organization engaged in work involving extended training and considerable experience on the part of the employees.

The annual rates of compensation for positions in this grade shall be $3,800, $4,000, $4,200, and $4,400.

Grade 12 in this service, which may be referred to as the head administrative grade, shall include all classes of positions the duties of which are to perform the most difficult and responsible office work along specialized and technical lines requiring extended training and experience, the exercise of independent judgment, and the assumption of full responsibility for results, or to supervise a large and important office organization engaged in work involving extended training and experience on the part of the employees.

The annual rates of compensation for positions in this grade shall be $4,600, $4,800, $5,000, and $5,200, unless a higher rate is specifically authorized by law.

Grade 13 in this service, which may be referred to as the chief administrative grade, shall include all classes of positions the duties of which are to act as assistant head of a major bureau, or to act as administrative head of a major subdivision of such a bureau, or to act as head of a small bureau, in case of professional or scientific training is not required, or to supervise the design and installation of office systems, methods, and procedures, or to perform work of similar importance, difficulty, and responsibility.

The annual rates of compensation for positions in this grade shall be $5,600, $5,800, $6,000, $6,200, and $6,400, unless a higher rate is specifically authorized by law.

Grade 14 in this service, which may be referred to as the executive grade, shall include all classes of positions the duties of which are to act as assistant head of one of the largest and most important bureaus, or to act as head of a major bureau, in case professional or scientific training is not required, or to supervise the design of systems of accounts for use by private corporations subject to regulation by the United States, or to act as the technical consultant to a department head or a commission or board in connection with technical or fiscal matters, or to perform work of similar importance, difficulty, and responsibility.

The annual rates of compensation for positions in this grade shall be $6,500, $7,000, and $7,500, unless a higher rate is specifically authorized by law.

Grade 15 in this service, which may be referred to as the senior executive grade, shall include all classes of positions, the duties of which are to act as the head of one of the largest and most important bureaus, in case professional or scientific training is not required, or to perform work of similar importance, difficulty, and responsibility.

The annual rates of compensation for positions in this grade shall be $8,000, $8,500, and $9,000, unless a higher rate is specifically authorized by law.

Grade 16 in this service, which may be referred to as the special executive grade, shall include all positions which are or may be specifically authorized or appropriated for at annual rates of compensation in excess of $9,000.

CUSTODIAL SERVICE

The custodial service shall include all classes of positions, the duties of which are to supervise or to perform manual work involved in the custody, maintenance, and protection of public buildings, premises, and equipment, the transportation of public officers, employees or property, and the transmission of official papers.

Grade 1 in this service, which may be referred to as the junior messenger grade, shall include all classes of positions, the duties of which are to run errands, to check parcels, or to perform other light manual or mechanical tasks with little or no responsibility.

The annual rate of compensation for positions in this grade shall be $600, $660, $720, $780, and $840.

Grade 2 in this service, which may be referred to as the office-laborer grade, shall include all classes of positions the duties of which are to handle desks, mail sacks, and other heavy objects, and to perform similar work ordinarily required of unskilled laborers; to operate elevators; to clean office rooms; or to perform other work of similar character.

The annual rate of compensation for positions in this grade shall be $1,080, $1,140, $1,200, $1,260, $1,320, and $1,380: *Provided*, That charwomen working part time be paid at the rate of 45 cents an hour and head charwomen at the rate of 50 cents an hour.

Grade 3 in this service, which may be referred to as the minor custodial grade, shall include all classes of positions the duties of which are to perform, under immediate supervision, custodial, or manual office work with some degree of responsibility, such as guarding office or storage buildings; operating paper-cutting, canceling, envelope-opening, or envelope-sealing machines; firing and keeping up steam in boilers used for heating purposes in office buildings, cleaning boilers, and oiling machinery and related apparatus; operating passenger or freight automobiles; packing goods for shipment; supervising a large group of charwomen; running errands and doing light manual or mechanical tasks with some responsibility; carrying important documents from

one office to another; or attending the door and private office of a department head or other public officer.

The annual rates of compensation for positions in this grade shall be $1,200, $1,260, $1,320, $1,380, $1,440, and $1,500.

Grade 4 in this service, which may be referred to as the undercustodial grade, shall include all classes of positions the duties of which are to perform, under general supervision, custodial work of a responsible character, such as supervising a small force of unskilled laborers, directly supervising a small detachment of watchmen or building guards, firing and keeping up steam in heating apparatus and operating the boilers and other equipment used for heating purposes, or performing general semimechanical new or repair work requiring some skill with hand tools.

The annual rates of compensation for positions in this grade shall be $1,320, $1,380, $1,440, $1,500, $1,560, and $1,620.

Grade 5 in this service, which may be referred to as the junior custodial grade, shall include all classes of positions the duties of which are to have general supervision over a small force of watchmen or building guards, or to have direction of a considerable detachment of such employees, to supervise the operation and maintenance of a small heating plant and its auxiliary equipment, or to perform other work of similar character.

The annual rates of compensation for positions in this grade shall be $1,500, $1,560, $1,620, $1,680, $1,740, and $1,800.

Grade 6 in this service, which may be referred to as the assistant custodial grade, shall include all classes of positions the duties of which are to assist in the supervision of large forces of watchmen and building guards, or to have general supervision over smaller forces, to supervise a large force of unskilled laborers, to repair office appliances, or to perform other work of similar character.

The annual rates of compensation for positions in this grade shall be $1,680, $1,740, $1,800, $1,860, $1,920, and $1,980.

Grade 7 in this service, which may be referred as to the main custodial grade, shall include all classes of positions the duties of which are to supervise the work of skilled mechanics; to supervise the operation and maintenance of a large heating, lighting, and power plant and all auxiliary mechanical and electrical devices and equipment; to have general supervision over large forces of watchmen and building guards; or to perform other work of similar character.

The annual rates of compensation for positions in this grade shall be $1,860, $1,920, $1,980, $2,040, $2,100, and $2,200.

Grade 8 in this service, which may be referred to as the senior custodial grade, shall include all classes of positions the duties of which are to direct supervisory and office assistants, mechanics, watchmen, elevator conductors, laborers, janitors, messengers, and other employees engaged in the custody, maintenance, and protection of a small building, or to assist in the direction of such employees when engaged in similar duties in a large building, or to perform other custodial work of equal difficulty and responsibility.

The annual rates of compensation for positions in this grade shall be $2,000, $2,100, $2,200, $2,300, and $2,400.

Grade 9 in this service, which may be referred to as the principal custodial grade, shall include all classes of positions the duties of which are to direct supervisory and office assistants, mechanics, watchmen, elevator conductors, laborers, janitors, messengers, and other employees engaged in the custody, maintenance, and protection of a large building, or to assist in the direction of such employees when engaged in similar duties in a group of buildings, or to perform other custodial work of equal difficulty and responsibility.

The annual rates of compensation for positions in this grade shall be $2,300, $2,400, $2,500, $2,600, and $2,700.

Grade 10 in this service, which may be referred to as the chief custodial grade, shall include all classes of positions the duties of which are to direct supervisory and office assistants, mechanics, watchmen, elevator conductors, laborers, janitors, messengers, and other employees engaged in the custody, maintenance, and protection of a group of buildings, or to perform other custodial work of equal difficulty and responsibility.

The annual rates of compensation for positions in this grade shall be $2,600, $2,700, $2,800, $2,900, and $3,000.

CLERICAL-MECHANICAL SERVICE

The clerical-mechanical service shall include all classes of positions which are not in a recognized trade or craft and which are located in the Bureau of Engraving and Printing, the mail equipment shop, the duties of which are to perform or to direct manual or machine operations requiring special skill or experience, or to perform or direct the counting, examining, sorting, or other verification of the product of manual or machine operations.

Grade 1 shall include all classes of positions in this service the duties of which are to perform the simplest operations or processes requiring special skill and experience.

The rates of compensation for classes of positions in this grade shall be 50 to 55 cents an hour.

Grade 2 shall include all classes of positions in this service the duties of which are to operate simple machines or to perform operations or processes requiring a higher degree of skill than those in grade 1.

The rates of compensation for classes of positions in this grade shall be 60 to 65 cents an hour.

Grade 3 shall include all classes of positions in this service the duties of which are to operate machines or to perform operations or processes requiring the highest degree of skill, or supervise a small number of subordinates.

The rates of compensation for classes of positions in this grade shall be 70 to 75 cents an hour.

Grade 4 shall include all classes of positions in this service the duties of which are to perform supervisory work over a large unit of subordinates.

The rates of compensation for classes of positions in this grade shall be 85 to 95 cents an hour.

The heads of the several executive departments and independent establishments of the Government whose duty it is to carry into effect the provisions of this act are hereby directed to so administer the same that the positions and employees affected herein shall retain in the classification schedules herein provided the same relative position or positions within their respective grades as they hold at the time this law goes into effect: *Provided*, That nothing herein shall prevent the promotion or allocation for an employee to a higher grade: *Provided further*, That nothing contained in this act shall operate to decrease the pay of any present employee, nor deprive any employee of any advancement authorized by law and for which funds are available.

Whenever in any case the basic qualifications of any already existing grade or subdivision of a service are by this act made the basic qualifications of a higher grade or subdivision, the positions of all employees in said existing grade or subdivision are by this act advanced to said higher grade or subdivision of a service.

SEC. 2. Upon the passage of this act the board shall forthwith make a survey of the classes of civilian positions in the various field services, exclusive of the Postal Service, Foreign Service, and employees in the mechanical and drafting groups whose wages are now or have heretofore been fixed by wage boards or similar authority, and shall present a report to Congress at its first regular session following the passage of this act, such report to contain: (a) Compensation schedules for such classes of positions, which shall follow the principles and general form of the compensation schedules contained in the classification act of 1923; (b) such additional services and grades as may be necessary according to the fields of work peculiar to the establishments concerned; (c) adequate descriptions of all the classes of positions within the scope of this act, including the title of the class, a statement of its characteristic duties and responsibilities, illustrated where desirable by examples of typical tasks or of typical positions included in the class, a statement of the minimum qualifications as to education, experience, knowledge, and ability required for the satisfactory performance of the duties and the discharge of the responsibilities of the class and the salary rates for the class; (d) a list prepared by the head of each department, after consultation with the board, and in accordance with a uniform procedure prescribed by it, showing the allocation of all positions covered by this act to their respective classes and grades and fixing the proposed rate of compensation of each employee thereunder in accordance with the rules prescribed in section 6 of the classification act of 1923; (e) recommendations as to principles and procedures for putting such compensation schedules into effect, for assuring uniform compensation of like positions under like employment and local economic conditions, and for carrying out the administrative steps necessary to keep the descriptions of classes and the allocations of positions to classes current accordingly as positions may be abolished or created or their duties or responsibilities changed; and (f) such statistical or other information as is necessary or desirable in exposition of the board's findings of fact as a result of its survey, or in explanation of its recommendations.

SEC. 3. The heads of the several executive departments and independent establishments are authorized to adjust the compensation of certain civilian positions in the field services, the compensation of which was adjusted by the act of December 6, 1924, to correspond, so far as may be practicable, to the rates established by this act for positions in the departmental services in the District of Columbia.

SEC. 4. The provisions of this act shall not apply to employees in the Government Printing Office whose rates of pay are set under authority of the "act to regulate and fix rates of pay for employees and officers of the Government Printing Office," approved June 7, 1924. (U. S. C., p. 1417, sec. 40.)

SEC. 5. This act shall take effect July 1, 1928.

Mr. LEHLBACH (during the reading of the bill). Mr. Speaker, I ask unanimous consent that so much of the reading of the bill be dispensed with as deals with the compensation schedules, inasmuch as it is routine matter and serves no useful purpose to be read unless the person has the material for comparison before him.

Mr. NEWTON. It will appear in the RECORD as if read?

Mr. LEHLBACH. Yes.

The SPEAKER. The gentleman from New Jersey asks unanimous consent that the sections of the bill dealing with

compensation schedules be printed in the RECORD and be considered as having been read. Is there objection?

There was no objection.

The SPEAKER. Is a second demanded?

Mr. WOODRUM. Mr. Speaker, I demand a second.

Mr. LEHLBACH. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from New Jersey asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from New Jersey is entitled to 20 minutes and the gentleman from Virginia 20 minutes.

Mr. LEHLBACH. Mr. Speaker, early in the session there was introduced by the gentleman from California [Mr. WELCH] a bill (H. R. 6518) which contemplated a complete permanent revision of the compensation schedule carried in the classification act of 1923. The best estimate as to the increased annual cost in salaries that the original Welch bill would carry was $68,000,000.

The committee held extensive hearings, and it found that it had not sufficient information—that the witnesses at the hearing could not furnish sufficient information to make a thorough comparison of the pay in Government service with the pay for similar work in private enterprise, and it was found that there could not be made adequate comparisons between the pay in the different services of the Government, particularly in the field.

The committee had the hearty cooperation of the Bureau of the Budget and other governmental agencies in considering the question, and it was decided that forthwith there should be made a complete survey of the employment situation in the Federal Government, and that in the meantime relief properly could be granted to employees in circumstances in which it was generally admitted that the compensation existing at the present time was too low.

Mr. CRAMTON. Will the gentleman yield?

Mr. LEHLBACH. Yes.

Mr. CRAMTON. Will the survey include the field service?

Mr. LEHLBACH. Yes; the field service, and the bill particularly takes care of that and I will come to that in a few minutes. It is in this bill. The increase provided in this bill is a temporary tide over until Congress can legislate permanently on the subject of salary revision. It carries about $18,000,000 annual increase, of which it is estimated that about $6,000,000 is for increase in the District of Columbia and about $12,000,000 in the field, distributed among various field services.

Mr. McMILLAN. Will the gentleman yield?

Mr. LEHLBACH. Yes.

Mr. McMILLAN. Will this include the animal inspectors and the customs service?

Mr. CRAMTON. Does it reach the Indian Service?

Mr. LEHLBACH. I have no reason to believe that it will not give an equitable increase to the Indian Service.

Mr. McMILLAN. Will the provisions of the bill cover employees in the navy yards in naval stations and the United States arsenals?

Mr. LEHLBACH. No; they are specially excluded because they do not want to be included. They do not want to come under the classification, because the mechanics in the Government service, such as the gentleman describes, have their wages fixed by a wage board in accordance with the prevailing rate of wages in the communities in which they are employed.

Mr. KINDRED. Will the gentleman yield?

Mr. LEHLBACH. Yes.

Mr. KINDRED. Will the provisions of this bill cover the medical service?

Mr. LEHLBACH. Surely, it covers all Government employees, in the District and field exclusive of the Postal Service, exclusive of skilled laborers and mechanics in the various arsenals and navy yards of the country.

Mr. COCHRAN of Missouri. Does it take care of the deputy collectors in the Internal Revenue Department and the deputy marshals who, as I understand, are not under civil service?

Mr. LEHLBACH. It makes no difference whether they are in the classified civil service or not. The bill provides in the meantime for a report in December to be made of a complete classification for the field service such as contemplated when the classification act passed in 1923.

Mr. WOODRUFF. Will the gentleman yield?

Mr. LEHLBACH. Yes.

Mr. WOODRUFF. Do the employees in the Shipping Board, not under civil service, come under this act?

Mr. LEHLBACH. I should say they would.

Mr. HASTINGS. Mr. Speaker, I did not understand the gentleman's reply to the inquiry of the gentleman from Michigan, as to whether or not the provisions of this bill extended to the Indian field service?

Mr. LEHLBACH. I said that I believed that an equitable share of the increase designed for the field service would be accorded to the Indian Service, for this fiscal year commencing on the 1st of July, 1928. In the meantime there will be prepared a classification which will include the Indian Service as well as all other field services, which will be the basis of legislation when this Congress reconvenes in its next session.

Mr. BACHMANN. Mr. Speaker, I understand the gentleman to say that this bill brings into the classified service now those men who are not under the classified service under the act of 1923?

Mr. LEHLBACH. Classification has nothing to do with the classified civil service. An employee of the Government who is not in the armed forces of the Government, such as the Army, the Navy, and the Marine Corps, unless he is in the Postal Service, unless he is a skilled laborer or a mechanic in the navy yard or arsenal, is under the classification act, regardless of whether his position is subject to civil-service regulations or not. The classified civil service is one thing and the classification for purposes of salary is a different thing. There is no necessary correlation between the two.

Mr. BACHMANN. Yes; but those employees in the Indian Service who are now not under the classification act of 1923 will not get increases under this bill.

Mr. LEHLBACH. Yes; they will, because, as I said, the act of 1924 makes the District of Columbia schedules applicable as far as possible to all the field service.

Mr. TREADWAY. Mr. Speaker, will the gentleman yield further?

Mr. LEHLBACH. Yes.

Mr. TREADWAY. I notice some charts have been prepared and are in the lobby, and following down those lines there are several places where there is no increase in pay. Is not that an error in the chart?

Mr. LEHLBACH. Unfortunately, in the preparation of those charts—and I had nothing to do with the preparation of them—there has crept into the comparisons a very grave error. For instance, in the professional service the existing grade 4 was split into two new grades, 4 and 5. Consequently old grade 5 in the existing law is now the new grade 6 in the Welch bill. The comparison should be made between the old grade 5 and the new grade 6, and not the two grades 5. The old grade 6 is to be compared with the new grade 7, and the old grade 7 with the new grade 8, and the same thing obtains in the clerical, administrative, and fiscal services, because there grade 11 was split into two grades. Grade 11 is 11 and 12 in the new grades, and consequently the old grade 12 is to be compared not with the new grade 12 but with the new grade 13, and old grade 13 is to be compared with the new grade 14, So when you look at those charts you want to remember to make a comparison in a proper way and not in an improper way.

Mr. TREADWAY. As I understand the language of the bill, every Government employee in the classified service will under this bill receive some increase of salary.

Mr. LEHLBACH. That is the purpose of the bill, and as far as humanly possible it has provided for that. I reserve the remainder of my time.

Mr. WOODRUM. Mr. Speaker and gentleman of the House, in the long, extensive hearings held by the Civil Service Committee on this bill some 200 Members of the House appeared before that committee indorsing the principle of an increase in salary of Federal employees. As we come to consider to-day the so-called Welch bill, however, I think it proper to say to you that there is no more resemblance between the Welch bill to-day and the Welch bill then being considered by the Civil Service Committee than there is a resemblance between the Declaration of Independence and the Apostles' Creed.

The gentleman from California [Mr. WELCH] deserves the credit for having brought to the attention of Congress and the Nation the inadequacy of the salaries paid certain Federal employees, but the gentleman from California and the Civil Service Committee and the House of Representatives have been deprived of their functions as legislators, because the Bureau of the Budget, or else some subordinate in that bureau—I have no idea and no information has been given as to who the functionary is that prepared these schedules—decided how much money could be spent on an increase in salaries, and prepared the bill and sent it to the Civil Service Committee with the information that they could take that or nothing. So to-day we have, instead of the Welch bill which was prepared and indorsed by the National Federation of Federal Employees, a bill that was prepared by the Bureau of the Budget, with some slight amendments being permitted to be made by the distin-

guished chairman of the Finance Committee of the Senate. He was allowed to invade the sanctum sanctorum and add a couple of million dollars to the bill; but nobody else dared change any of the schedules of the bill.

I am in favor of an adequate increase in the salaries of the lower-paid Federal employees. I have advocated that consistently during the hearings and in the executive hearings of the committee. I think it is a crying need that should be remedied by Congress; but I can not support this bill for many reasons, and I shall try in the few moments allotted in the consideration of this important legislation to point out to you some of the reasons why I can not support it.

In the first place, there are 554,000 employees in the Federal Government. This revision of salaries affects only about 135,000. It does not affect at all the employees in the Postal Service; it does not affect other great groups of employees. Some of them possibly do not need a revision of their salaries, but there is an urgent, crying need in the Government for a careful and comprehensive revision of all of the pay schedules of the different departments of the Government in order that there may be something like a consistent and coordinated wage schedule for Federal employees. Let us see just who is affected by this bill.

According to a statement issued by the National Federation of Federal Employees, quoting figures issued by the Bureau of the Budget:

| | |
|---|---|
| The total number of employees in the Government service are | 554,175 |
| Employees in the Postal Service not affected by the Welch bill | 310,161 |
| Other groups not affected: | |
| Estimated number of other mechanical employees | 80,000 |
| Government Printing Office | 4,076 |
| Navy-yard employees | 38,000 |
| State Department employees | 3,791 |
| Board of Tax Mediation | 36 |
| Board of Tax Appeals | 154 |
| National Advisory Committee on Aeronautics | 187 |
| War Finance Corporation | 65 |
| Commission of Fine Arts | 2 |
| Federal Reserve Board | 202 |
| Railway Administration | 34 |
| Total | 436,708 |
| | 117,467 |

Figures furnished from the Personnel Classification Board estimate that 135,000 employees will be affected by the operation of the Welch bill. This estimate was based upon 45,000 employees in the District of Columbia and 90,000 in the field service.

When we approach this bill we find that unquestionably some of the employees of the 135,000 affected will receive adequate increases in their salaries. Some will receive something and some of them will receive a mere pittance—$5 a month or less. In my judgment as a member of the committee who has tried to understand this difficult and complicated scheme, a great many will receive nothing whatever; but bear in mind that there is one group about whom there will be absolutely no question but that they will receive a very handsome increase in their salaries.

As you will recall, the Civil Service Committee reported out a bill identical with the present bill you are considering, but it left out of the bill grades 8 and 9 in the professional and scientific service and grades 15 and 16 in the clerical, administrative, and fiscal service. The object of these new grades was to make it possible to raise the salaries of those affected from $7,500 to $9,000 per year. I exhibit before you here certain charts showing a comparison of the pay rates under existing law and the new rates contained in the Welch bill:

PROFESSIONAL AND SCIENTIFIC SERVICE

*Grade 1*

| | |
|---|---|
| Existing law | $1,860, $1,920, $2,000, $2,100, $2,200, $2,300, $2,400 |
| Welch bill | $2,000, $2,100, $2,200, $2,300, $2,400 |

*Grade 2*

| | |
|---|---|
| Existing law | $2,400, $2,500, $2,600, $2,700, $2,800, $2,900, $3,000 |
| Welch bill | $2,600, $2,700, $2,800, $2,900, $3,000 |

*Grade 3*

| | |
|---|---|
| Existing law | $3,000, $3,100, $3,200, $3,300, $3,400, $3,500, $3,600 |
| Welch bill | $3,200, $3,300, $3,400, $3,500, $3,600 |

*Grade 4*

| | |
|---|---|
| Existing law | $3,800, $4,000, $4,200, $4,400, $4,600, $4,800, $5,000 |
| Welch bill | $3,800, $4,000, $4,200, $4,400 |

*Grade 5*

| | |
|---|---|
| Existing law | $5,200, $5,400, $5,600, $5,800, $6,000 |
| Welch bill | $4,600, $4,800, $5,000, $5,200 |

*Grade 6*

| | |
|---|---|
| Existing law | $6,000, $6,500, $7,000, $7,500 |
| Welch bill | $5,600, $5,800, $6,000, $6,200, $6,400 |

*Grade 7*

| | |
|---|---|
| Existing law | $7,500 |
| Welch bill | $6,500, $7,000, $7,500 |

*Grade 8 (new grade)*

| | |
|---|---|
| Welch bill | $8,000, $8,500, $9,000 |

*Grade 9 (new grade)*

| | |
|---|---|
| Welch bill (positions specifically authorized) | $9,000 |

SUBPROFESSIONAL SERVICE

*Grade 1*

| | |
|---|---|
| Existing law | $900, $960, $1,020, $1,080, $1,140, $1,200, $1,260 |
| Welch bill | $1,020, $1,080, $1,140, $1,200, $1,260, $1,320 |

*Grade 2*

| | |
|---|---|
| Existing law | $1,140, $1,200, $1,260, $1,320, $1,380, $1,440, $1,500 |
| Welch bill | $1,260, $1,320, $1,380, $1,440, $1,500, $1,560 |

*Grade 3*

| | |
|---|---|
| Existing law | $1,320, $1,380, $1,440, $1,500, $1,560, $1,620, $1,680 |
| Welch bill | $1,440, $1,500, $1,560, $1,620, $1,680, $1,740 |

*Grade 4*

| | |
|---|---|
| Existing law | $1,500, $1,560, $1,620, $1,680, $1,740, $1,800, $1,860 |
| Welch bill | $1,620, $1,680, $1,740, $1,800, $1,860, $1,920 |

*Grade 5*

| | |
|---|---|
| Existing law | $1,680, $1,740, $1,800, $1,860, $1,920, $1,980, $2,040 |
| Welch bill | $1,800, $1,860, $1,920, $1,980, $2,040 |

*Grade 6*

| | |
|---|---|
| Existing law | $1,860, $1,920, $2,000, $2,100, $2,200, $2,300, $2,400 |
| Welch bill | $2,000, $2,100, $2,200, $2,300, $2,400 |

*Grade 7*

| | |
|---|---|
| Existing law | $2,100, $2,200, $2,300, $2,400, $2,500, $2,600, $2,700 |
| Welch bill | $2,300, $2,400, $2,500, $2,600, $2,700 |

*Grade 8*

| | |
|---|---|
| Existing law | $2,400, $2,500, $2,600, $2,700, $2,800, $2,900, $3,000 |
| Welch bill | $2,600, $2,700, $2,800, $2,900, $3,000 |

CLERICAL, ADMINISTRATIVE, AND FISCAL SERVICE

*Grade 1*

| | |
|---|---|
| Existing law | $1,140, $1,200, $1,260, $1,320, $1,380, $1,440, $1,500, |
| Welch bill | $1,260, $1,320, $1,380, $1,440, $1,500, $1,560 |

*Grade 2*

| | |
|---|---|
| Existing law | $1,320, $1,380, $1,440, $1,500, $1,560, $1,620, $1,680, |
| Welch bill | $1,440, $1,500, $1,560, $1,620, $1,680, $1,740 |

*Grade 3*

| | |
|---|---|
| Existing law | $1,500, $1,560, $1,620, $1,680, $1,740, $1,800, $1,860, |
| Welch bill | $1,620, $1,680, $1,740, $1,800, $1,860, $1,920 |

*Grade 4*

| | |
|---|---|
| Existing law | $1,680, $1,740, $1,800, $1,860, $1,920, $1,980, $2,040, |
| Welch bill | $1,800, $1,860, $1,920, $1,980, $2,010, $2,100 |

*Grade 5*

| | |
|---|---|
| Existing law | $1,860, $1,920, $2,000, $2,100, $2,200, $2,300, $2,400 |

*Grade 8*

| | |
|---|---|
| Existing law | $2,700, $2,800, $2,900, $3,000, $3,100, $3,200, $3,300 |
| Welch bill | $2,900, $3,000, $3,100, $3,200, $3,300 |

*Grade 9*

| | |
|---|---|
| Existing law | $3,000, $3,100, $3,200, $3,300, $3,400, $3,500, $3,600 |
| Welch bill | $3,200, $3,300, $3,400, $3,500, $3,600 |

*Grade 10*

| | |
|---|---|
| Existing law | $3,300, $3,400, $3,500, $3,600, $3,700, $3,800, $3,900 |
| Welch bill | $3,500, $3,600, $3,700, $3,800, $3,900 |

*Grade 11*

| | |
|---|---|
| Existing law | $3,800, $4,000, $4,200, $4,400, $4,600, $4,800, $5,000 |
| Welch bill | $3,800, $4,000, $4,200, $4,400 |

*Grade 12*

| | |
|---|---|
| Existing law | $5,200, $5,400, $5,600, $5,800, $6,000 |
| Welch bill | $4,600, $4,800, $5,000, $5,200 |

*Grade 13*

| | |
|---|---|
| Existing law | $6,000, $6,500, $7,000, $7,500 |
| Welch bill | $5,600, $5,800, $6,000, $6,200, $6,400 |

*Grade 14*

| | |
|---|---|
| Existing law | $7,500 |
| Welch bill | $6,500, $7,000, $7,500 |

*Grade 15 (new grade)*

| | |
|---|---|
| Welch bill | $8,000, $8,500, $9,000 |

*Grade 16 (new grade)*

| | |
|---|---|
| Welch bill (executive positions to be specifically authorized in excess of $9,000) | $9,000 |

CUSTODIAL SERVICE

*Grade 1*

| | |
|---|---|
| Existing law | $600, $630, $660, $690, $720, $750, $780 |
| Welch bill | $600, $660, $720, $780, $840 |

*Grade 2*

| | |
|---|---|
| Existing law | $780, $840, $900, $960, $1,020, $1,080, $1,140 |
| Welch bill | $1,080, $1,140, $1,200, $1,260, $1,320, $1,380 |

*Grade 3*

| | |
|---|---|
| Existing law | $900, $960, $1,020, $1,080, $1,140, $1,200, $1,260 |
| Welch bill | $1,200, $1,260, $1,320, $1,380, $1,440, $1,500 |

*Grade 4*

| | |
|---|---|
| Existing law | $1,140, $1,200, $1,260, $1,320, $1,380, $1,440, $1,500 |
| Welch bill | $1,320, $1,380, $1,440, $1,500, $1,560, $1,620 |

*Grade 5*

| | |
|---|---|
| Existing law | $1,320, $1,380, $1,440, $1,500, $1,560, $1,620, $1,680 |
| Welch bill | $1,500, $1,560, $1,620, $1,680, $1,740, $1,800 |

*Grade 6*

*Grade 4*

| | | |
|---|---|---|
| Existing law | per hour | 80 cents, 90 cents |
| Welch bill | do | 85 cents, 95 cents |

If you will refer to chart 1 [indicating] of the professional and scientific service you will find that grades 8 and 9 are new grades. The purpose of that is to permit employees in grade 7, where they are now receiving $7,500, to receive as high as $9,000; and by passing this bill we shall write into the organic law of the land a provision that will permit any appropriation bill to be brought in here and increase salaries even above $9,000.

My objection to that is this, gentlemen: There may be a need in some of the departments of the Government to increase salaries from $7,500 to $9,000, but if there is such a need it has not been brought to the attention of the Committee on the Civil Service. I hold in my hand the hearings, and in those hearings no representative of the Budget, no member of the Cabinet, no departmental head is shown to have come before our committee or represented to us that for the sake of the efficiency of the service certain salaries should be increased by $1,500 a year.

But our committee eliminating these four new grades took the position that we should pass a temporary bill, and that this comprehensive survey spoken of by the gentleman from New Jersey [Mr. LEHLBACH] might follow and then if a real need were shown for these higher salaries Congress could consider the matter, and pass appropriate legislation. The bill was reported out without the four grades mentioned, but it was promptly rejected by the Bureau of the Budget, and the Civil Service Committee was given to understand that unless these higher grades were included we might expect no legislation at this Congress.

It is my deliberate judgment that with these higher grades included, if we pass this bill to-day you will find it is the last consideration of Government salaries we will get for years to come.

The whole original purpose of this salary increase bill was to help the employees in the lower grades, the people receiving $1,100 and $1,200 and $1,400 a year. Now it is proposed to give them a raise of only $60 a year, or $5 a month, and then give to those people who are in the higher grades, men getting $7,500 a year, an increase of up to $1,500 a year. This bill, if passed, will add chaos to the present confusion. I venture to say there is no Member of this House who has not received repeated protests and criticism from his constituents against the discrimination and favoritism that is shown in the Government departments in the matter of its method of efficiency ratings and promotions of employees; and if you pass this bill, you put the power in the hands of the Classification Board and the departmental heads to add still more to that discrimination of which we complain.

Now, referring to the custodial service, I want to say frankly that these schedules provide with fair adequacy for the custodial service. They increase the maximum of grade 1 to $840, and these other grades, as indicated in the first line of this chart [indicating], showing the rates under existing law and the second line showing the new schedule.

A great many Members have had letters from men in the custodial service complaining about the operation of grade 2 in that service. I may say I had 125 letters in my mail yesterday morning complaining about grade 2 in that service. Let us look at that for a moment. Under existing law the salary ranges in that grade from $720 to $1,140. The criticism made against the provision with regard to the custodial service is this: It is said there are practically no employees in the custodial service who are now drawing $1,020 or less. Therefore the elimination of the rates $780, $840, $900, $960, and $1,020 means practically nothing, and these employees think—and they have a great deal of reason so to think—that when you come to $1,080 and $1,140, which is what most of those in the custodial service are getting, and is the first two classes in the grade as provided in the Welch bill, that discretion is left with the heads of the department to keep them at that rate and give them no increase at all.

Let us go over here for a moment to the clerical, administrative, and fiscal service. Bear this in mind, gentlemen of the House, that this bill does not provide any automatic increase of salaries. It simply provides a change in the maximum and the minimum wage scale, and it is still left in the discretion of the Personnel Classification Board and the administrative heads as to where they will allocate the employee within the salary limit of that grade. Of course, they must be brought up to the minimum. They can not be carried beyond the maximum.

Now, you gentlemen know that by the manipulation of the efficiency ratings of the employees many have been constantly discriminated against. To illustrate: You will find, say, in the employees of grade 4, of the clerical, administrative, and fiscal service, doing work now that ought to be assigned to grade 5, and if they were put in their proper grade under existing law they would receive an increase of salary. Let us refer to the chart showing the clerical administrative service, grade 1. We see the minimum under the existing law is $1,140, the maximum $1,260. Under the Welch bill the minimum is $1,260, the maximum $1,320.

Now, what does that mean? It means that employees in the two minimum classes getting $1,140 or $1,200 under existing law must be brought up to the minimum of the new schedule, which is $1,260. That is to say, a novice who is just entering the Government service, without any experience in the Government service, must automatically be given a $120 raise if he is fortunate enough to be in the minimum class of the grade. In the second place, an employee receiving $1,200 can, in the discretion of the Personnel Classification Board or departmental heads, be increased $60 or to $1,260, or if they carry him up two steps he can be brought to $1,320. But what about the man in the top of that grade, the man who has given years of patient and efficient service and gotten to the top of his grade? He can only, under any circumstances, receive a raise of $60 a year, or $5 a month.

That applies as to the first four grades, but when we come to grade 5 we see that under existing law the maximum of grade 5 is $2,400, but under the Welch bill, if passed, the maximum of that grade is still $2,400; when we get down here we see a man in grade 5 at $1,860 to-day, and if we pass the bill he gets an automatic increase of $140, which brings him up to $2,000. But what about the man who by years of service and efficient application to duty has reached the maximum of the grade and is getting $2,400? He can not receive any increase at all because you can not carry him beyond the maximum of his grade. The answer to that is that he will be promoted into another grade, but you who have had any experience with how hard it is for an employee to be promoted from one class to another, to say nothing of how hard it is to be promoted from one grade to another, know how long it would be until the board or departmental head would carry him to the next grade. But suppose he should make that hurdle and get into another grade. What happens? He goes from the maximum grade 5, which is $2,400, to the minimum of grade 6, which is $2,300, so that he loses $100 a year, but they could then carry him to a second step to $2,400, so that he would get the same salary that he got in his other grade. But what a situation! He has had a promotion and he has had some honor, if no money. But if they carry him up three steps out of the grade he is already in to a place in the next grade, then he can get a raise of $100. But in the meantime what have you done to the morale of your service, when you take a man out of one grade and carry him two or three steps into the next grade, and what are the employees in the minimum of these grades going to say when a man goes over their heads into the next grade?

The SPEAKER. The time of the gentleman from Virginia has again expired.

Mr. WOODRUM. Mr. Speaker, I yield myself two additional minutes. Now, gentlemen, this is such a big subject and so little is known about it by anybody, myself included. I could talk all day long and just speculate as to the possible effect of this bill, but there is a way that these employees could have had an increase in their salaries, and that way I

suggested to the House through the bill I introduced. That was a bill to give a flat horizontal increase to the employees in the Federal service, and I submit to you it is perfectly reasonable and perfectly consistent with good finance and good economics. Everybody says this is a temporary measure and, of course, my proposition would be a temporary measure. My suggestion was to give every one of these 135,000 employees a flat increase of $300. [Applause.] That would be $25 a month to everybody. The man getting $1,000 a year would be very much helped by receiving an increase of $300. The man getting $7,500 possibly would not think so much of it; but if a man working for the Government who gets $7,500 a year is so rich that he will turn up his nose at an increase of $300, then I do not think you need worry about him.

Mr. KINDRED. Can the gentleman tell us how much the expense would be to the Government under his bill?

Mr. WOODRUM. The bill I introduced would cost the Government $40,500,000. It would apply to everybody. There would be no manipulation—no opportunity to change it or to chisel the employees out of their raise. Of course, gentlemen, the amount of the raise could be decreased. The amount could be cut to $150 annually. That would cost approximately what this bill costs. I care not so much about the amount. That could be at the discretion of Congress, but I submit the principle is sound and workable.

Mr. O'CONNELL. And the heads of departments could not interfere with the raise taking effect?

Mr. WOODRUM. No. [Applause.] But that is water that has gone over the dam because the present bill is here to-day under suspension of the rules, and not subject to amendment or a motion to recommit.

I reserve the balance of my time, Mr. Speaker.

Mr. LEHLBACH. Mr. Speaker, I yield five minutes to the gentleman from California [Mr. WELCH]. [Applause.]

Mr. WELCH of California. Mr. Speaker, I ask unanimous consent that all Members of the House may be granted five legislative days in which to extend their remarks on the bill H. R. 6518.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. WELCH of California. Mr. Speaker, the bill under consideration, H. R. 6518, which has for its purpose an increase in salaries of Government employees holding certain positions within the District of Columbia and in the field service, is by no means new legislation. Similar bills have been before Congress for years past. Congressman John I. Nolan, who represented the fifth California district for many years, sponsored a salary increase bill, and with the assistance of Congressman James R. Mann, of Illinois, who at the time was Republican floor leader, secured its passage. The bill passed the Senate, but was held up on a motion to reconsider during the last days of the session. My immediate predecessor, the late Lawrence J. Flaherty, also introduced the bill during the brief time he was in Congress, and upon succeeding him I became its sponsor.

Mr. Speaker, this meritorious and humanitarian measure might well be called the child of the fifth California district. The bill in its present form does not provide the relief hoped for by the proponents of the original bill. It is, however, a step in the right direction and will in a measure bring comfort to the thousands of faithful men and women in the employ of our Government.

It has been repeatedly demonstrated that from a strictly business standpoint it is true economy to secure and retain well-paid, contented employees; that a contented state of mind on the part of the employees themselves has a direct effect upon the quantity and quality of their product. The present inadequate rates of compensation in the Federal service render it increasingly difficult to secure and retain a quality of employees necessary to carry on efficiently the business of our Government. I maintain that a readjustment of the rates of pay of these employees even to the extent provided for in the amended bill will inure to the benefit of the employer as well as the employee; that it will reduce turnover, which is at present dangerously high, and retain the service of experienced employees who are leaving the service of the Federal Government, the loss of whose experience and training and the resultant cost of breaking in new employees amount to a staggering total in money value each year.

This bill wisely provides for a classification of the field service, exclusive of the Postal Service and Foreign Service, by the Personnel Classification Board, which consists of the Bureau of the Budget, Bureau of Efficiency, and the Board of Civil Service Commissioners, who shall present a report to Congress at its first regular session following the passage of this act. With this information at hand Congress can then proceed in an intelligent and comprehensive manner, and provide equitably and fairly for all Government employees, who come under the provisions of this bill. [Applause.]

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. WELCH of California. I yield; yes.

Mr. HOWARD of Oklahoma. The gentleman from Michigan and also the gentleman from Oklahoma have asked the question whether or not the employees in the field service of the Indian Bureau come under this bill——

Mr. WELCH of California. It is my information they will come under the bill.

Mr. HOWARD of Oklahoma. Can not some one who is the author of the bill tell us whether they will or not come under the bill?

Mr. LEHLBACH. Mr. Speaker, I yield three minutes to the gentleman from West Virginia [Mr. BACHMANN]. [Applause.]

Mr. BACHMANN. Mr. Speaker and gentlemen of the House, this bill ought to pass. There is only one issue now before the House. Do we want to increase the salaries of 135,000 Federal employees $18,000,000 annually or do we want to refuse them this increase?

The gentleman from Virginia supported practically this same bill in committee. He complained then about the employees in the higher grades. The rates were not all satisfactory to him. He amended the bill by cutting out sections 8 and 9 of the professional and clerical service and 14 and 15 of the clerical, administrative, and fiscal services. When they were taken out of the bill it was satisfactory, but to-day with the amendments of the committee it is not satisfactory. Why? If you leave in the higher grades, he is against the bill. If we take out these grades, he is for the bill.

Let me tell the Members of the House what this amounts to. The total increase for grades 7 and 8 in the professional and scientific service only amounts to $77,750. The total increase in grades 14 and 15 in the clerical, administrative, and fiscal services only amounts to $103,500, or a total of $181,250 out of a grand total of increase of about $18,000,000.

Mr. LEHLBACH. Will the gentleman yield?

Mr. BACHMANN. Yes.

Mr. LEHLBACH. Thirty-two thousand dollars of that is in grade 7, the third from the top grade in the clerical, administrative, and fiscal service.

Mr. BACHMANN. That is true, because grade 7 and the other grade had to be changed in order to allow for these increases.

Mr. LEHLBACH. So there is only $149,000 involved in those four grades.

Mr. BACHMANN. In grades 7 and 8 and grades 15 and 16. I yield back the balance of my time.

Mr. HASTINGS. I would like to ask the gentleman a question.

Mr. BACHMANN. All right.

Mr. HASTINGS. We have been trying to find out whether or not these increases apply to the field service of the Indian Bureau. What can the gentleman say about that?

Mr. BACHMANN. I can not answer the gentleman from Oklahoma with respect to that. My understanding is this bill takes care of the same employees that were taken care of in the classification act of 1923.

Mr. HASTINGS. Is there any member of the committee who can give us that information?

Mr. BACHMANN. The gentleman from New Jersey [Mr. LEHLBACH], I think, can answer the question.

Mr. WOODRUM. Mr. Speaker, I yield myself the remainder of my time, three minutes.

Gentlemen of the House, I will answer the gentlemen's question about the Indians.

I want to say to you, gentlemen of the House, there are a lot of good Indians who think they are going to get something under this bill and there are a lot of good Congressmen who think they are voting for something for some of their constituents who are going to be sadly disillusioned when the roll is called.

Gentlemen, I am sure my friend from West Virginia did not intend to leave the impression on the House that this bill was ever satisfactory to me. It was not. I have fought it right from the jump. I made a speech on the floor of the House and condemned the Welch bill. The Welch bill was very much better than this bill because it did provide something for everybody. This bill does not even do that.

I have objected to the bill all along, and inasmuch as my name has been brought up I may state that these little increases here for these four top grades of the clerical, administration, and fiscal service were put in at my insistence, as well as an amendment requiring the employees to retain their relative positions in

grades in this bill. They would not go any further than that with me.

Gentlemen, this is a bad bill. Nobody can tell what it will do. The distinguished chairman of the committee very frankly told you he did not know what it will do.

Now, what about the high salaries? I do not care if it does not add but ten cents to the annual pay roll, it is wrong in principle to ask the Committee on Civil Service and the House of Representatives to delegate to departmental heads and the Personnel Classification Board the right to increase salaries from $7,500 to $9,000. When I vote to increase salaries to that extent I want at least to have some idea of who is going to get the money, what they are doing and whether or not they deserve to receive it.

It is not a question of amount at all; it is a question of principle. What will the Personnel Classification Board do with this survey that is called for? Your bill calls for a classification of the field service. Let me call attention to the fact that in 1923 you passed a bill requiring a classification of the field service, and it is a known fact to every Member of the House and the chairman of this committee that that board defied the mandate of Congress, and you have to-day no classification of field service. I have no right to believe that you will do any different under this bill.

I think if you do pass the bill you will get a little temporary relief and then beyond that you will get no survey, and it will reflect on Congress and nobody will be satisfied. It is immaterial to me what you do. I have no personal interest whatever in the matter, and it is immaterial to me how any Member may vote. I have discharged my duty. I have attempted to point out the glaring defects in the bill, and the rank and file of the Federal employees are not satisfied with the bill. [Applause.]

Mr. LEHLBACH. Mr. Speaker, I will again say what I have said before, that there is no classification of the field service, and that the $18,000,000 increase in this bill will give that service $12,000,000 or two to one—and what is to be spent in the field service is to be allocated to the various services in the field, including the Indian Service. It is only temporary until we get a classification, including the Indian Service, under the survey which is to be made.

The gentleman says that a person of the custodial service in grade 2 will go down in the range of salaries and receive no benefits. He knows that the bill provides—

> The heads of the several executive departments and independent establishments of the Government whose duty it is to carry into effect the provisions of this act are hereby directed to so administer the same that the positions and employees affected herein shall retain in the classification schedules herein provided the same relative position or positions within their respective grades as they hold at the time this law goes into effect: *Provided,* That nothing herein shall prevent the promotion or allocation for an employee to a higher grade: *Provided further,* That nothing contained in this act shall operate to decrease the pay of any present employee, nor deprive any employee of any advancement authorized by law and for which funds are available.

Do you want to make $18,000,000 available for the employees of the Federal Government? If you do, vote "yes"; if you do not, vote "no." [Applause.]

The SPEAKER. The question is on the motion of the gentleman from New Jersey to suspend the rules and pass the bill.

Mr. CRAMTON. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. The gentleman from Michigan demands the yeas and nays. All those in favor of taking the vote by yeas and nays will rise. [After counting.] Twenty-seven Members have risen, not a sufficient number, and the yeas and nays are refused.

The question was taken; and on a division (demanded by Mr. WOODRUM) there were 281 ayes and 14 noes.

So two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

### EXTENSION OF REMARKS—SALARY INCREASES FOR GOVERNMENT EMPLOYEES

Mr. COHEN. Mr. Speaker, under the leave to extend my remarks in the RECORD I wish to submit the following:

For some months the question of increase of salaries for Government employees in the classified service has been investigated and discussed. There has been a great difference of opinion as to the method and amount of increases, both by the employees, the heads of the departments, and the Members of Congress. It has seemed impossible to arrive at a conclusion satisfactory to all, and the bill introduced in the House by Mr. WELCH of California has finally come up for action and been passed by the House to-day.

I am of the opinion that a great many of my colleagues feel as I do about this bill and are not at all pleased with many of the features of it. It has been changed until it could not be recognized as the original bill, and even then it does not meet the requirements.

I certainly feel that the higher-paid employees should have had the increase given them for, unfortunately, Uncle Sam is known as an employer who never overpays, and our big commercial enterprises have been fortunate in securing the services of many of our scientists and experienced men and women who could not easily be spared in the places they were filling, solely because they could not afford to stay with the Government and see no future before them.

However, it is the poorly paid Government clerk I feel should have the most consideration, and under this bill, I understand, many of them will only receive a benefit of $5 a month. Is it any incentive to give the best in you, and be interested and attentive to your work, when you feel you are facing a stone wall, with no chance of advancement? The "bread and butter" problem is a very vital one to all those in the small-salaried positions and, with prices soaring to the sky from month to month, a $5 increase does not go very far.

I want to say here, as I have said before since taking my seat as a Member of the House of Representatives, that I have never in my whole business experience met with such courtesy and readiness to serve as that received from the Government employees, from those at the head down to the humblest worker. And it can not be said that it was because I was a Member of Congress, for in many cases no possible gain could come to those with whom I had come in contact and who were most courteous and helpful.

I understand this is to be only a temporary measure, and I certainly trust it will be and that a survey will be made immediately so that before many months these faithful and efficient employees will be given a wage commensurate with the services performed and the cost of living to-day.

### RETIREMENT OF OFFICERS OF THE ARMY, NAVY, AND MARINE CORPS

Mr. SNELL, chairman of the Committee on Rules, presented the following resolution for printing under the rule:

House Resolution 188

*Resolved,* That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for consideration of S. 777, an act making eligible for retirement, under certain conditions, officers, and former officers of the Army, Navy, and Marine Corps of the United States, other than officers of the Regular Army, Navy, or Marine Corps, who incurred physical disability in line of duty while in the service of the United States during the World War. That after general debate, which shall be confined to the bill and shall continue not to exceed five hours, to be equally divided and controlled by those favoring and opposing the bill, the bill shall be read for amendment under the five-minute rule. At the conclusion of the reading of the bill for amendment the committee shall arise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and the amendments thereto to final passage without intervening motion, except one motion to recommit.

### FLOOD CONTROL

Mr. REID of Illinois presented the conference report on the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, for printing under the rule.

### ONE HUNDRED AND FIFTIETH ANNIVERSARY OF THE CONQUEST OF THE NORTHWEST TERRITORY

Mr. LUCE. Mr. Speaker, I move to suspend the rules and pass Senate Joint Resolution 23 as amended.

The Clerk read as follows:

Senate Joint Resolution 23, Seventieth Congress, first session

Senate joint resolution providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779

Whereas the expedition of George Rogers Clark into the territory northwest of the Ohio River in 1778–79, culminating in the capture on February 25, 1779, of Fort Sackville, at Vincennes, with its British garrison and the British commander of all the northwest region, was instrumental in adding to the 13 Atlantic seaboard States possession of the great Northwest Territory, which now contains the States of Ohio, Indiana, Illinois, Michigan, Wisconsin, and part of Minnesota; and

Whereas the march of George Rogers Clark and his men from Kaskaskia to Vincennes, February 7–23, 1779, was one of the most dramatic examples of patriotism, endurance, and heroism afforded in the whole

course of the war for the independence of the United States, the memory of which is worthy of perpetuation by a grateful country; and

Whereas the conquest of the old Northwest, in which the capture of Fort Sackville was the culminating event, contributed largely to the present greatness of the Republic and started the march of the American flag toward the Pacific; and

Whereas national recognition of the winning in the Revolutionary War of the country west of the Appalachian Mountains is appropriate upon the one hundred and fiftieth anniversary of Clark's decisive victory at Vincennes, and links the East and the West together in our common heritage of national independence and continental expansion; and

Whereas the campaigns of George Rogers Clark aided materially during the Revolutionary War in the protection of the whole western frontier of the United States in bringing the war of independence to a successful conclusion and in bursting the barriers which threatened to limit the new Republic to the Atlantic seaboard; and

Whereas the State of Indiana has by legislative enactment provided for the purchase of the site of Fort Sackville and has made provision for its proper maintenance as a national shrine and has created the George Rogers Clark Memorial Commission; and

Whereas no adequate recognition has been given by the Nation to the acquisition of the old Northwest and to the great achievements of George Rogers Clark and his associates: Therefore be it

*Resolved, etc.*, That there is hereby established a commission to be known as the George Rogers Clark sesquicentennial commission (hereinafter referred to as the commission) and to be composed of 11 commissioners, as follows: 3 persons to be appointed by the President of the United States; 4 Senators by the President of the Senate; and 4 Members of the House of Representatives by the Speaker of the House of Representatives. The commissioners shall serve without compensation, select a chairman from among their number, and appoint a secretary at such salary as the commission may fix.

SEC. 2. There is hereby authorized to be appropriated, out of money in the Treasury not otherwise appropriated, the sum of $1,000,000 to be expended by the commission in cooperation with the George Rogers Clark Memorial Commission of Indiana, the county of Knox, Ind., the city of Vincennes, Ind., and such other agencies, public or private, as the commission may determine, for the purpose of designing and constructing at or near the site of Fort Sackville in the city of Vincennes, Ind., a permanent memorial, commemorating the winning of the old Northwest and the achievements of George Rogers Clark and his associates in the war of the American Revolution: *Provided*, That the State of Indiana shall furnish the site for such memorial and that full, complete, and absolute title to the land shall be vested in the State of Indiana, free and clear of all liens and encumbrances, and that the State of Indiana shall assume, without expense to the Federal Government, the perpetual care and maintenance of said site and the memorial constructed thereon, after such memorial shall have been constructed.

SEC. 3. The commission may in its discretion accept from any source, public or private, sums of money to be added to the amount herein authorized to be appropriated for said memorial, or gifts for its embellishment.

SEC. 4. All expenditures of the commission shall be allowed and paid upon the presentation of itemized vouchers therefor approved by the chairman of the commission, but no expenditure shall be made or authorized by the commission except with the approval of a majority of the commissioners.

SEC. 5. The United States shall not be held liable for any obligation or indebtedness incurred by the State of Indiana, the George Rogers Clark Memorial Commission of Indiana, the county of Knox, Ind., the city of Vincennes, Ind., or any other agency or officer, employee, or agent thereof, for any purpose for which the commission may under the provisions of this resolution make expenditures.

SEC. 6. Before any of the funds herein authorized to be appropriated shall be expended, the plans and designs of the said memorial shall be approved by the National Commission of Fine Arts.

SEC. 7. No fee or charge of any character shall be imposed or made for admission to the said memorial or the grounds on which it may stand after the memorial shall have been completed and accepted by the commission.

SEC. 8. The commission shall cease and terminate June 30, 1931.

The SPEAKER. Is a second demanded?

Mr. GILBERT. Mr. Speaker, I demand a second.

Mr. LAGUARDIA. Mr. Speaker, I demand a second.

Mr. LUCE. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Massachusetts is entitled to 20 minutes and the gentleman from Kentucky [Mr. GILBERT] is entitled to 20 minutes.

Mr. LUCE. Mr. Speaker, the time available under a motion to suspend the rules, of course, does not permit any extended narration of the episode that is to be commemorated. If granted permission to extend my remarks, I shall insert the report accompanying the bill, which tells the story.

Mr. CRAMTON. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Yes.

Mr. CRAMTON. The gentleman, however, expects to make enough of a statement to the committee so that the pending proposition may be favorably presented?

Mr. LUCE. Oh, certainly. I am referring simply to the historical narrative that is set forth in the report. It will be sufficient for the moment to say that this episode is one of the most striking in the world's annals for heroism, suffering, and results. [Applause.] It accomplished the securing of what was long known as the old Northwest for the Union, and to this gallant march, the bravery of Clark, the boldness of his conception, and the success of its execution, historians largely attribute the presence in the Union to-day of Kentucky, Ohio, Indiana, Illinois, Michigan, Wisconsin, and part of Minnesota.

Next February comes the one hundred and fiftieth anniversary of the culminating point in the campaign, the capture of Vincennes, together with the British commander, the lieutenant governor of the English territory in the Northwest, and all the garrison of the fort. As a result of this the control of the British over the Indians was so weakened that it was possible to colonize Kentucky more and thereby bring to the region settlers enough to protect it against further disastrous inroads by the red men as well as to prevent the British themselves from attacking the struggling States on the seaboard from the rear.

In recognition of the great importance of this affair the State of Indiana, the county of Knox, in that State, and the city of Vincennes have undertaken to expend about $720,000 next year in celebration and commemoration. Representatives of the locality immediately concerned came to Congress with a request for an appropriation of $1,750,000, of which $250,000 was to be used for historical celebrations in the way of pageants. The remainder, $1,500,000, was to be used in the erection of a memorial of the same general plan as the Lincoln Memorial here in Washington, but, of course, not on so large a scale. The site of the old Fort Sackville was covered with factories, warehouses, and other buildings of commerce, and it was necessary to clear the land after the purchase of these unsightly edifices. That is the part which Indiana will play. The part asked of the Government is the building of the memorial itself.

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Certainly.

Mr. SNELL. I did not understand how much the State of Indiana is going to appropriate for this celebration.

Mr. LUCE. Already the action of the Indiana Legislature brings in sight about $720,000.

Mr. SNELL. Is that to purchase land and help build the memorial?

Mr. LUCE. No; that is for purchase of the land, clearing from it the buildings, and preparing the site. The edifice itself is to be the work of the Federal Government.

Mr. SNELL. And this bill carries an appropriation of $1,000,000?

Mr. LUCE. One million dollars for the edifice. As the estimates were laid before the joint committee, they totaled one and a half million dollars, but your Committee on the Library, after study of the details, came to the conviction that $1,000,000 would suffice, and we cut the resolution as it came to us from the Senate to the extent of $500,000, taken off the estimate for the cost of the memorial, and eliminated altogether the $250,000 for the pageants. The reasons are set forth in the report.

Mr. SNELL. The entire million dollars appropriated here is to go for the memorial?

Mr. LUCE. Entirely for the memorial.

At the same time we changed the bill by reason of our belief that the money of the Nation should be expended by the Nation. As the resolution came to us from the Senate, it provided that we were to turn this money over to the Indiana commission. This was contrary to precedent, and not in accord with the judgment of your committee. Therefore, in substituting the House resolution we provide for the usual form of commission—three to be appointed by the President, four by the President of the Senate, four by the Speaker of the House—who shall expend this million dollars.

Mr. LAGUARDIA. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Yes.

Mr. LAGUARDIA. Will the gentleman explain to the House why the State of Illinois withdrew from material participation in this movement?

Mr. LUCE. It is a thing that can not be explained, as far as I have been able to learn, a thing that is greatly to my regret. Perhaps some gentleman from Illinois—one already stands before me—will answer the question.

Mr. RATHBONE. Mr. Speaker, if the gentleman will permit, Illinois could not withdraw, because she did not participate in the first place. We are very heartily in favor of this memorial. I appeared before the committee and supported it to the best of my ability, but on the soil of Illinois there occurred an event which is of perhaps equal importance—namely, the capture of Kaskaskia—and we are going to devote our energies not only to making the Vincennes memorial a success, but also to make suitable provision for the celebration of the capture of Kaskaskia, which occurred in Illinois and at the opposite part of the State on the Mississippi River.

Mr. LAGUARDIA. Do I understand the gentleman to say that they have withdrawn from this because the State of Illinois intends to finance the other projects of which he speaks?

Mr. RATHBONE. We have not withdrawn, because the Legislature of Illinois has never acted on this particular proposal. But our people are very much interested in it, and we intend to support it.

Mr. LAGUARDIA. Is it true that the people of Illinois are willing to appropriate a large amount of money to establish a monument to King George? [Laughter.]

Mr. RATHBONE. I will say to the gentleman that the Legislature of Illinois will not be in session until next winter. At that time I look for action for a suitable memorial to be erected commemorating the capture of Kaskaskia.

Mr. LUCE. We were told a year ago that the State of Illinois and the State of Ohio and other States interested would join in this celebration at Vincennes; but, greatly to the regret of the committee, the legislatures of those States have not seen fit to act. We hope they yet will see the desirability of sharing with Indiana and the Nation in commemorating an event of precisely as much significance and import to them as to that State where the fort happened to be, on the one side of the river instead of the other.

Mr. CRAMTON. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Yes.

Mr. CRAMTON. What has become of the proposition for use of Federal funds for the ornamentation of a memorial toll bridge at this point?

Mr. LUCE. We were assured in the hearings that Illinois would build half of this bridge and Indiana the other half, and that the ornamentation would be provided by private subscription. Illinois has withdrawn, as I understand, and declines to take part in the building of this bridge. They reduced the people of Vincennes to the regrettable necessity of asking Congress to provide a toll bridge to mark the spot where Abraham Lincoln and his family crossed the Wabash River on the journey from Indiana to Illinois. It is to be hoped that this strange proposal will not prevail to the extent of a charge for passage of the bridge.

Mr. LAGUARDIA. Are commissioners authorized to act in connection with this celebration?

Mr. LUCE. These commissioners will serve, as in the case of the landing of the Pilgrims, without pay, but with a paid secretary who will serve as their executive officer.

Mr. LAGUARDIA. Is it not the gentleman's experience that once we create these commissions, and some time elapses before the members are appointed, and when appointed they commence their labors, they then come in and seek to amend the bill by providing a salary? If once we start on that there will be no end to it.

Mr. LUCE. It has not been done with respect to any commission created on advice of the Committee on the Library, since I have had the honor to be a member of that committee. It was not done in the case of the Plymouth commission.

Mr. SNELL. Has there been any other similar occasion except the big memorial to Lincoln that has cost so much as this?

Mr. LUCE. I do not recall one. When commemoration has been by way of an exposition, as in the case of the settlement of Jamestown and the acquisition resulting from the Louisiana Purchase, the Federal appropriation was much larger.

Mr. SNELL. I think this is the first time we shall have ever appropriated a million dollars for such a memorial.

Mr. LUCE. I think it is the largest appropriation of the sort thus far.

Mr. KETCHAM. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Yes.

Mr. KETCHAM. In response to the question propounded by the gentleman from New York [Mr. SNELL], I may call his attention to the fact that no other such event has taken place in our history. Therefore it is worthy of an unusual expenditure.

Mr. RATHBONE. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Yes.

Mr. RATHBONE. I would like to ask the gentleman on what he bases the statement, if I understood him correctly, that Illinois had withdrawn from any offer it had made? I know of no offer from an official source made by Illinois in this matter.

Mr. LUCE. The assurances will be found in the testimony given before the hearings of the Joint Committee on the Library a year and more ago.

Mr. CRAMTON. While the gentleman from Illinois is on the floor the House will be glad to know if the gentleman from Illinois has introduced a similar bill for the ceremony at Kaskaskia?

Mr. RATHBONE. I have introduced such a bill. Illinois is desirous of playing a broad and generous part, and Illinois is perfectly willing to have the Vincennes memorial made the principal memorial. But we do feel that there should be another memorial on the capture of Kaskaskia, which was the first great achievement of George Rogers Clark, and therefore should not be passed unnoticed.

Mr. LUCE. There have been bills introduced by Members from Illinois and Kentucky, but in no instance except in the case of Indiana have the persons interested secured a local contribution. If Kentucky and Illinois and any other States concerned should follow the example of Indiana and demonstrate willingness to take part in the expenditure the proposal would receive prompt consideration from the Committee on the Library.

Mr. CRAMTON. Has the gentleman from Massachusetts in mind the idea that if the gentleman from Illinois would introduce a bill to permit equally generous participation by Illinois the Federal Government would furnish a million dollars to match that generous participation?

Mr. LUCE. The gentleman from Massachusetts is not warranted in giving any assurance. He feels quite safe, however, in awaiting the offer of any money from any other State. [Laughter.]

Mr. LOWREY. Will the gentleman yield?

Mr. LUCE. Certainly.

Mr. LOWREY. Can the gentleman tell us how much money the Federal Government spent on the Washington Monument and how much on the Lincoln Memorial?

Mr. LUCE. I do not remember about the Washington Monument, but my impression is that the Lincoln Memorial cost between $3,000,000 and $4,000,000.

Mr. RATHBONE. Will the gentleman yield?

Mr. LUCE. Certainly.

Mr. RATHBONE. Replying to the question of the gentleman from Michigan, which seemed to reflect, in a way, upon my State, I will say that the only thing which the bill I have introduced provides for is an authorization of $100,000, and I have stated in the presence of the committee that we would be satisfied with less. We are not asking for any great memorial. Moreover, in fairness to our State, it should be stated by the chairman of the committee that there has been no session of the Illinois Legislature at which this matter could have been acted upon since this particular bill has been introduced and brought before the Congress, and Illinois, before aspersions are cast upon the State, should be given a fair opportunity to act, which I am satisfied she will do.

Mr. LUCE. I cast no aspersions; I express a prayerful hope. [Applause.]

The report of the committee is as follows:

[H. Rept. No. 1386, 70th Cong., 1st sess.]

GEORGE ROGERS CLARK MEMORIAL

Mr. LUCE, from the Committee on the Library, submitted the following report (to accompany S. J. Res. 23):

The President, in his address to this Congress at its opening, said:

"February 25, 1929, is the one hundred and fiftieth anniversary of the capture of Fort Sackville, at Vincennes, in the State of Indiana. This eventually brought into the Union what was known as the Northwest Territory, embracing the region north of the Ohio River between the Alleghenies and the Mississippi River. This expedition was led by George Rogers Clark. His heroic character and the importance of his victory are too little known and understood. They gave us not only this Northwest Territory but by means of that the prospect of reaching the Pacific. The State of Indiana is proposing to dedicate the site of Fort Sackville as a national shrine. The Federal Government may well make some provision for the erection under its own management of a fitting memorial at that point."

On every hand there is approval for commemoration of Clark, his expedition, and the achievement that gave us what was long known as the old Northwest.

It was a great enterprise, boldly and skillfully planned, heroically executed. Clark, a young Kentucky pioneer from Virginia, conceived that the way to protect the infant settlements of the Ohio Valley, to win the favor of menacing Indians between the Ohio and the Lakes, to oust the British from the vast region that had been yielded to them

by the French, and thus to remove the menace from the rear that in the darkest months in the Revolutionary War threatened ominously the States strung along the seaboard, was to strike the enemy unexpectedly on the flank and from behind. To that end and in the summer of 1778, with a force of less than 200 men, he started downstream from the Falls of the Ohio. Leaving the river near the mouth of the Tennessee he marched overland and took Kaskaskia, a thriving French town near the Mississippi, and then Cahokia, farther up, near what is now St. Louis. Next he sent a detachment eastward to Vincennes, on what is now the Indiana bank of the Wabash River. It yielded without resistance.

When the news of this reached Colonel Hamilton, lieutenant governor of the western British possessions, with headquarters at Detroit, he marched at the head of a considerable force to recover the Illinois territory, and had no trouble in overpowering the few men who were garrisoning Fort Sackville at Vincennes. There he prepared to pass the winter, never dreaming that he might be attacked at that time of the year. Clark, however, frontiersman and fighter, paid no heed to the perils of the season, and early in February of 1779 with only about 130 men started through the rains and mud of an Illinois winter on his audacious march. It proved to be of nearly 240 miles, by reason of detours to avoid the areas deeply overflowed and to reach places where the swollen streams could be crossed. The desperate venture is not equaled in American annals, nor surpassed by any in the recorded history of any other land. For nearly three weeks they struggled through the mire, often wading, sometimes up to their necks, in the icy waters. For the last six days they were virtually without food. Hamilton, completely taken by surprise, quickly surrendered. Without the loss of a man Clark thus gained possession of the town and the fort, with the garrison and colonel prisoners of war.

Clark hoped to follow this up with the capture of Detroit. Circumstances frustrated him, but the hold of the British on the region had been so shaken that thereafter such offensives as came from the Lakes were fruitless, and though Indian trouble continued, Clark's achievement, by giving the Kentucky region security enough to encourage the incoming of many more settlers, had so increased the number of fighting men and the volume of supplies as to make the conquest permanent. By the time of the treaty of peace American dominance of the Ohio Valley was so clear that England made no persistent attempt to assert title to the vast region involved. This was the region that became the States of Kentucky, Ohio, Indiana, Illinois, and Michigan, with possibly Wisconsin, Iowa, Minnesota, and the Dakotas to be included.

To commemorate this the State of Indiana has authorized expenditure by itself, the county of Knox, and the city of Vincennes, which is expected to amount to $720,000. This is chiefly, if not wholly, to be used for the purchase of the site of the old Fort Sackville, the removal of the buildings thereon, and the conversion of the spot into a beautiful park with attractive water front. It is hoped to raise a substantial amount in addition by further public action or private contribution to carry out the details of a program that is ambitious but, in the belief of those actively interested, not beyond the deserts of the praiseworthy object in view.

The Federal Government has been asked to contribute $1,500,000 for a memorial structure to be erected on the site of the old fort, with $250,000 for historical celebration. The Senate has sent to the House a bill granting the request for the full $1,750,000. Your committee, while sympathizing with the purpose and seeking to be generous in the matter, yet for the following reasons thinks it would not be warranted in recommending authority to appropriate more than a million dollars.

In matter of both national and local concern, the rough-and-ready standard of division of cost spoken of colloquially as "50-50," allotting half the contribution to each party, has become generally accepted as reasonable. Deviation in this instance may be warranted by the possibility that the local contribution will be increased, but that its total will reach more than a million dollars, if indeed that much, is distinctly a hope rather than a fact.

At the hearing before the joint committee a year or more ago, besides eminent witnesses from Indiana there were in attendance gentlemen from Kentucky, Ohio, Illinois, and Michigan, who united in emphasizing that this was to be commemoration of an episode that virtually involved the destinies of the whole region from Kentucky to the Lakes, making it of direct interest to all the States that have been carved out of the old Northwest. We were given to understand that all these States should and would join somehow in this commemoration. No State outside of Indiana, however, has yet shown any inclination to contribute.

On the other hand the State outside that is most concerned, Illinois, has actually withdrawn the incidental help we understood to have been assured. We were told that Illinois would share in building a new bridge across the Wabash, which separates Indiana and Illinois at this point. It was said a steel bridge would cost $350,000, and a bridge of the ornamental type $500,000. Illinois was to pay half the cost of a steel truss bridge, Indiana the other half, and Vincennes would provide the extra money necessary to make it a concrete bridge, fittingly ornamental. Since then Illinois has decided not to pay even half of the cost of a steel truss bridge.

In this regrettable dilemma, for which of course the Vincennes people were not responsible, they sought to meet the situation by backing a bill presented to Congress for a toll bridge, which meant that the traveling public would in the end make good the outlay that Illinois had avoided. The proposal to charge toll on a bridge designed to commemorate the passage of the Wabash by Abraham Lincoln and his family on the way to an Illinois home, somehow grates on the sense of propriety.

Possibly the Illinois authorities may yet decide to reverse their position and conclude to take some part in the commemoration of an episode that was of just as much importance to Illinois as to Indiana. Clark's heroic march was through what is now Illinois, and that its object was a fort happening to be on one bank of the river rather than the other should not deprive any of those who now dwell in the country saved for them, of the opportunity to show an interest in the memorial proposed, particularly when that interest would not seem to go beyond the material, practical needs of modern highway travel.

There is another aspect of this bridge matter that should not be overlooked. The architect of the proposed memorial says in his report:

"It would be nothing less than a tragedy if this bridge were not made a thing of beauty. It will be in such close proximity to the George Rogers Clark Memorial that a mere utilitarian structure or iron trusses perched on slender concrete piers would ruin the entire picture. I strongly advise that your commission make every effort to induce the States of Indiana and Illinois to erect a worthy bridge at this point. Unless you can succeed in so doing, I should be strongly inclined to recommend that you do not attempt to build an important memorial at or near the site of Fort Sackville. It would be far better to go to the other end of the town."

It will be seen that this so complicates the situation as to make difficult an estimate of what should be the Federal appropriation if on the basis of equal share. This increases our reluctance to authorize appropriation beyond the evident needs of a structure alone.

We are of the belief that such a structure could be built for a million dollars. This belief is based on the figures of the items in the estimate laid before us. They total $797,740 for the construction work. To this is added in the estimate the following:

| | |
|---|---|
| Mural paintings | $200,000 |
| Sculpture | 225,000 |
| Drives, planting, fountain, river wall, grading, seeding, and sodding | 153,309 |
| Architect's fee | 123,951 |
| Total | 702,260 |

It will be seen that the outlay for decoration, with so much of the architect's fee as its based thereon (if on a 10 per cent basis), would amount to $467,500. While your committee believe in artistic treatment of memorials, it doubts whether such lavish outlay as is here proposed would be justifiable. Question arises as to whether it would comport with the character of the man or the nature of the episode to be commemorated. Remembering the impressive dignity, the solemn simplicity of the Lincoln Memorial here in Washington, to memorialize a hardy backwoodsman for such a feat as the capture of Vincennes with something ornate, elaborate, gorgeous, brilliant savors of the incongruous.

It has been urged, to be sure, that this edifice is also to commemorate the winning of the West. Even so, the occasion for such extensive ornamentation does not appear.

If, however, that should after all be deemed desirable, it might well be accomplished in part by gifts of the desired works of art from the other States directly concerned, from patriotic organizations, or from individuals of wealth who might be glad to share in such a memorial.

Inasmuch as the river wall, the landscape gardening, and the other beautification of the site will inure to the advantage of Vincennes by giving it a beautiful park, it would not be unreasonable to view the item for this as properly to be included in the providing of the site for the memorial structure.

The Senate bill would permit the expenditure of $250,000 for an historical celebration, expected to consist chiefly of pageants, and to continue through several months.

Your committee urged the proponents of the bill to secure some reasonably definite estimates in this particular, but nothing has been submitted to us. We have, however, ourselves given some study to one phase of the matter. Vincennes in 1920 had less than 20,000 population. There may be 200,000 more within 50 miles, less than 900,000 within 100 miles, and the nearest large center of population is more than 100 miles away. It is improbable that to witness pageants any large throng would come repeatedly for several months from a distance farther than would easily permit a round trip of a day by automobile, with stay long enough to allow enjoyment of the spectacle, nor could a city of less than 20,000 furnish accommodations to a throng from a distance for stay overnight were it desired, which is of itself improbable. Our conclusion is that a very much smaller

outlay for celebration would conform to the conditions, an outlay indeed so small that it could easily be borne by the community, particularly if nearly all those taking part should be townsfolk, as is desirable if the benefits of pageants are to be secured in fullest measure. This would seem to make Federal appropriation unnecessary even if it were wise to establish the precedent of having the Government finance celebrations of this sort, which is far from clear.

Taking these considerations all into account, it has seemed to your committee that a reasonable authorization would be for enough to cover the structural cost contemplated, with a quarter of that amount added for the architect's fee and such ornamentation as it might permit, which would make the total $1,000,000.

It is our judgment that this should be expended by the National Government. Appropriation can be justified only on the ground that it is a matter of national interest which is to be commemorated. On general principles wherever possible the money of the Nation should be spent by the agencies of the Nation, agencies chosen by itself, agencies that can be held directly accountable. Presumably it was with this in mind that the President said: "The Federal Government may well make some provision for the erection under its own management of a fitting memorial." Agreeing with this view, your committee recommends pursual of the usual course—the appointment of a commission of 11, 3 named by the President, 4 Senators named by the President of the Senate, and 4 Members of the House of Representatives named by the Speaker. This commission is to cooperate with the George Rogers Clark Commission of Indiana, the county of Knox, the city of Vincennes, and such other agencies as may be concerned. Provision for a paid secretary is designed to secure competent executive management under the direction of the commission. Presumably the commission also, as is usual, will represent the Nation in such formal exercises as may take place in connection with the memorial.

Accordingly your committee recommends striking out all after the enacting clause of the Senate bill and appropriate insertion as herewith.

Mr. GILBERT. Mr. Speaker, I yield 10 minutes to the gentleman from Indiana [Mr. GREENWOOD]. [Applause.]

Mr. GREENWOOD. Mr. Speaker, in the century and a half since our country threw off the yoke of monarchy, we as a people have made unparalleled strides toward wealth and influence in the family of nations. History discloses no finer or better proportioned national development.

From 13 struggling colonies of 3,000,000 souls scattered along the Atlantic seaboard with a lack of coordination—with relations at times bordering on enmity—we have expanded into a Union of States from sea to sea. We now have a population of 115,000,000 occupying the heart of a great continent and reputed to be the wealthiest nation of all time.

We must acknowledge that the first great factor which contributed to greatness of these United States was the spirit possessed by our colonial ancestry, viz, the spirit of independence—the love of liberty. It was this spirit that impelled them to fight the War of the Revolution and following that to build a constitutional Government safeguarding the rights of the individual against the encroachments of tyranny. We gave the world a new vision of representative democracy when we substituted for the ancient creed—the divine right of kings; a new doctrine, emphasizing the declaration, "The king is not the law, but the law is king."

To this achievement of democratic Government as a factor in our phenomenal progress must be added our territorial expansion and material development. Our present imperial greatness as a nation must be credited to a large extent to geographical location. Let us search our hearts and reread our histories and seriously ask ourselves: Whence came this opportunity for our Nation's territorial growth? We are to-day a Nation whose lands stretch from the Atlantic to the Pacific and even to the islands of the sea.

I would not venture to assert that this territorial expansion was due to the efforts of any one man. Nevertheless, I think of one heroic soul who in the militant flower of young manhood caught the vision, lead the campaign that opened the gateway to our infant struggling Nation through which she advanced to build a glorious state, filled with opportunity for a free people.

This intrepid youth, a son of old Virginia, Col. George Rogers Clark, possessed the courage and imagination to lead the way and conquer a wilderness filled with bloodthirsty savages conspiring with British soldiers. It was no task for a soldier who loved only the tinsel of dress parade. It called for heroic action. While his native State of Virginia claimed the territory north of the Ohio by colonial grant, it had never possessed this land. With a commission to raise an army, along with appropriation for 500 pounds of powder, Colonel Clark became as a military leader what John Randolph described as "The Hannibal of the West."

He crossed the mountains, builded his own boats and followed the Ohio, recruited and drilled his forces at the Falls, sailed on to the mouth of the Tennessee, traversed the forests of southern Illinois and captured the English post at Kaskaskia without the firing of a gun on July 4, 1778. Much of his success followed from a masterful understanding of men and knowledge of frontier life. It called for courage of the highest order, shrewd military strategy, and an enduring tenacity of spirit. Colonel Clark had a wonderful combination of these essential qualities.

At Kaskaskia, Clark by both threats and diplomacy was able to control the Indians, dislodge from their savage minds the belief that the British were as powerful as "the big knives," the significant name that had been given to the Americans. He formed treaties with the Indian tribes which removed a menace from the inner frontiers and allowed the settlers to join Washington's army in the East.

From Kaskaskia, Clark proceeded on another step of his campaign and captured Vincennes and placed it under the command of Capt. Leonard Helm. Upon learning of this capture of the fort at Vincennes, Hamilton, the British commander at Detroit, sent forces from Detroit and recaptured the fort in December, 1778. The situation was desperate, and Clark decided upon immediate heroic action. With the assistance of Father Gibault, a Catholic priest, the leader among the French Creoles, and Francis Vigo, a Spanish merchant of St. Louis, who advanced funds, Clark recruited his forces, obtained supplies, and with 170 men started in midwinter across the Illinois country to retake Fort Sackville on the east banks of the Wabash. Words can not properly picture to you that little band advancing upon the British at Vincennes.

It was a journey filled with unparalleled hardship. There were icy swamps, swollen streams, and prairies covered with slush. It required physical endurance and patriotic courage to continue on through icy streams from ankle depth to their armpits. When on the last terrible day they reached the Indiana shore they had been four days without fire or food. Upon that desperate last day with no breakfast for the weakened discouraged band Major Bowman made this entry in his diary: "No provisions. God help us." The men were weak with cold and starvation, yet with no disposition to mutiny. Clark delivered a patriotic address, smeared his face with water and gunpowder, gave a war whoop and sprang into the water, and the loyal, fighting company struggled on.

By perseverance, strategy, and shrewd diplomacy he was able to compel a surrender of the fort and send the commander, General Hamilton, back to Virginia in irons.

At this time George Rogers Clark was 26 years of age, and he deserves the highest praise for his accomplished leadership of men.

Much of the success of this military venture was due to the sympathy extended by Patrick Henry, Governor of Virginia, Thomas Jefferson and George Mason, both of whom used their influence to get action by the Virginia Legislature.

It was at Kaskaskia that Clark formed the friendship of two men who contributed much to the future success of his campaign. One of these was a Catholic priest, Father Pierre Gibault, and the other a Spanish merchant, Col. Francis Vigo.

Father Gibault, when he learned that Clark extended full religious liberty to his people and made no confiscations of property, became a devoted patriot to the cause of American independence. He came and went among his French Creole parishoners, who possessed no love for their British former foes in arms, the reverend father promoted among his devoted followers an allegiance that was a great contribution to the cause of American independence. This volunteer, patriot, priest—Father Gibault—should receive proper recognition, in marble or bronze, in the memorial at Vincennes, which this legislation proposes to build. Gibault's loyalty and devotion to America was constant to the end. Like the Master of old he went about administering to those in sickness and distress, and had no place to lay his head. He died in poverty, and his grave is unknown. We can recount his loyalty, recite his acts of service, and preserve his memory by giving him a part in this memorial to the winning of the West.

Likewise, Francis Vigo threw all that he possessed into the campaign of Clark. He gave his fortune to buy food and clothing for the soldiers. He made trips to Vincennes and elsewhere and obtained invaluable information to guide Clark and his army. He took Virginia currency and accepted drafts on Virginia for several thousands of dollars for supplies which were never paid. He made money but lost it, and died in poverty with his claims still unpaid. Forty years after his death Congress allowed the claims and paid the same to his estate. Colonel Vigo likewise must be remembered in this memorial.

In the winning and holding of the West for American independence there is one with a military genius like unto that of Washington; with a love of liberty and a vision for expansion comparable to Jefferson; one with a devotion to law and order

worthy of John Marshall and possessing an understanding of human nature with a diplomacy to win and engage others similar to Benjamin Franklin. This patriot and soldier used his preeminent talents for his country at a time when his capable leadership was sorely needed. When we take into consideration the results obtained by the military leaders of the Revolution there seems to be few, if any, who accomplished so much with the meager assistance provided as Col. George Rogers Clark.

Out of the Northwest Territory acquired by this campaign has been carved the five great States of Ohio, Indiana, Illinois, Michigan, and Wisconsin, along with a portion of Minnesota. This section now constitutes one-sixth of the territorial area of continental United States, is peopled by more than one-fifth of our population, possesses one-fifth of our national wealth, and contributes almost a billion dollars each year in Federal taxes.

The acquisition of this territory which we propose to celebrate next year at Vincennes on the one hundred and fiftieth anniversary of its capture by George Rogers Clark and his band of Kentucky riflemen, became the common possession of the original thirteen States. Virginia graciously ceded her rights to the Federal Government. John Fiske, the noted historian, makes the assertion that this common ownership of land that could be pioneered by emigrants from all the colonies as the greatest influence in cementing the bonds of union of the original States. Moreover, the sale of this land to homesteaders helped to provide the funds that paid off the debts of the Revolution. This section, therefore, became the melting pot of the Nation, wherein colonists from all the original States settled and developed a wholesome fellowship and a tolerant national spirit.

Just a few miles removed from the site of old Fort Sackville is found the center of population of our Nation. At Vincennes is the crossing of two highly traveled United States highways—one from Chicago to centers of population of the Southland; the other, Highway 50, the shortest route from the Capital to St. Louis and points to the westward. The roads are paved with concrete slab and are thoroughfares carrying many tourists.

Here upon the banks of the Wabash at the site where Colonel Clark achieved his chief victory we propose to build a memorial to the winning of the old Northwest. It will be worthy of the great episode in history which we propose to commemorate.

The State of Indiana, Knox County, and the city of Vincennes have already provided funds to the extent of three-quarters of a million dollars. These funds are buying the real estate, removing the buildings, and building boulevards. These preparations are made in the hope that the Federal Government will contribute liberally to the erection of this national shrine. Indiana assumes the obligation of preservation and maintenance of the memorial after completion. The George Rogers Clark Memorial Commission created by Indiana statute has studied plans and proposed a memorial building that would be beautiful in architectural design and with impressive interior treatment. The proposed design is one of which the Nation will be proud. Its inspiring beauty will draw the attention of everyone who can visit the site of its erection. I regretted that while the Senate committee, which had exhaustive hearings, was convinced that the amount requested by the Indiana commission was needed to properly complete the plans, the House committee reduced the amount from one and one-half million to one million dollars. This will call for a revision of the plans. However, I am pleased with the prospect for a memorial to Colonel Clark and his army—and I know that a million dollars can build a beautiful structure—I am not sure that it will be as satisfying in design and detail as was proposed by the plans submitted to the committees. It would be gratifying to see the amount returned to the Senate bill, but if the conferees of the two Houses shall deem otherwise we will then adjust ourselves accordingly and build the best we can with the funds provided.

It sometimes appears in the modern passion for legislation that the sum and substance of statecraft is to consider only economic advancement and prosperity as evidenced by material wealth. Surely America, the richest country of all times, may hesitate in her mad rush of accumulation to consider and memorialize those finer and richer traditions of sacrifice, courage, and unselfish patriotic devotion which have been the chief factors in creating this golden age in which we live. That the youth of our land and the coming generations may understand and appreciate the daring, loyalty, and genius of the crusaders of the past, let us spend more for education and patriotic inspiration. For historical and memorial perpetuation there is no individual more appealing than George Rogers Clark and no more inspiring episode in our Nation's history than the capture of old Fort Sackville at Vincennes on February 25, 1779, by Colonel Clark and intrepid followers. John W. Daniel, former United States Senator from Virginia, speaking of famous Revolutionary soldiers, said:

> There was no hero of the Revolution who did a cleaner or better piece of work than George Rogers Clark, and there is none who can stand by him or be mentioned on the same page with him, who has been so much neglected.

Last year I visited his grave in Cave Hill Cemetery, Louisville, and found his final resting place marked only by an insignificant monument not over 3 feet in height erected by the Daughters of American Revolution. Upon this small slab the meager lettering can be read only with difficulty. It seems almost a travesty that one who contributed so much to his country's glory and expansion of empire, should be so signally neglected.

I come to you with the hope that this Congress may rectify this ingratitude. For a century there have been spasmodic efforts to memorialize this event in history. The State of Indiana has made preparation for the Federal Government to cooperate in this worthy endeavor. May we not work together to build a shrine in memory to this great man and his army? One who, like Washington, was not of any political party, but belongs to all because he was a great American. George Rogers Clark and his achievements are the common heritage of every section and his memory should be perpetuated.

I ask your support for the pending measure. [Applause.]

Mr. GILBERT. Mr. Speaker, I observe the situation of the House. I will not make any speech. However, Kentucky and the other States that have Clark suggestions have been alluded to. The gentleman from Indiana spoke about Clark's expedition. Indiana has another suggestion for a monument about the Battle of the Thames. Of course, Kentuckians won the Battle of the Thames and Kentuckians won the battle at Vincennes. The gentleman from Illinois speaks of Lincoln and his great contribution. Of course, Kentucky furnished Lincoln; in fact, it seems that Indiana and Illinois would have little to commemorate if Kentuckians had not gone across the river.

The SPEAKER. The question is on the motion of the gentleman from Massachusetts to suspend the rules and pass the bill.

The question was taken, and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

### LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. BURDICK, for the balance of the week, on account of important business.

### BRIDGE ACROSS THE MISSISSIPPI RIVER NEAR TIPTONVILLE, TENN.

Mr. DENISON. Mr. Speaker, the gentleman from Tennessee [Mr. GARRETT] has a bill here which he would like to have passed as he has to leave for his home. I refer to the bill (H. R. 12985) authorizing J. T. Burnett, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Tiptonville, Tenn. There is a similar Senate bill on the Speaker's table and I ask unanimous consent to call up the Senate bill S. 3862 and consider the same in lieu of the House bill.

The SPEAKER. The gentleman from Illinois asks unanimous consent for the present consideration of the bill S. 3862. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That in order to facilitate interstate commerce, improve the postal service, and provide for military and other purposes, J. T. Burnett, his heirs, legal representatives, and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River, at a point suitable to the interests of navigation, at or near Tiptonville, Tenn., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon J. T. Burnett, his heirs, legal representatives, and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said J. T. Burnett, his heirs, legal representatives, and assigns, is hereby authorized to fix and charge tolls for transit over such

bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of Tennessee, the State of Missouri, any public agency or political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches and any interest in any real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 15 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost as soon as possible under reasonable charges, but within a period of not to exceed 15 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been provided, such bridge shall thereafter be maintained and operated free of tolls or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 6. J. T. Burnett, his heirs, legal representatives, and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War and with the Highway Departments of the States of Tennessee and Missouri, a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States, shall, and at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said J. T. Burnett, his heirs, legal representatives, and assigns, shall make available all of its records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to J. T. Burnett, his heirs, legal representatives, and assigns, and any corporation to which, or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

Mr. DENISON. Mr. Speaker, I desire to offer two small amendments to correct the text.

The SPEAKER. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 5, line 5, strike out the word "and," and on page 5, line 13, strike out the word "its" and substitute the word "his."

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

THE SURCHARGE ON PULLMAN FARES

Mr. BOYLAN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a small editorial from the New York Evening World of April 18, 1928, on the Pullman surcharge bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BOYLAN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

While Congress is considering the removal of the remaining wartime taxes it might well turn its attention to one tax of war origin whose proceeds do not go into the Federal Treasury. This is the surcharge of 50 per cent on Pullman tickets. It was originally imposed when the Government was in control of the railroads and was intended for the twofold purpose of raising revenue and discouraging civilian travel when a large part of the railway equipment was needed for moving troops.

After the armistice this surcharge was discontinued, but in 1920, when the roads were hard hit by the postwar inflation, the Interstate Commerce Commission restored it. Since then conditions have changed, and the reasons for its retention appear to be no longer valid. An examiner of the commission has recommended its removal, but the commission itself has not been able to agree whether it should be removed or only reduced. Meantime the Senate has twice passed a bill for its repeal, but so far the House has failed to act.

It has been objected that a bill of this character puts rate making into the hands of Congress. The measure now before Congress, however, prescribes no rates, but leaves that function to the Interstate Commerce Commission, where it properly belongs. It merely prescribes a policy which the commission is to follow by stipulating that there shall be no discrimination or double charges for the same service. The Pullman surcharge is in effect a double payment, for which the passenger gets nothing in return. Its proceeds do not go to the Pullman Co., which renders the special service, but to the railway company.

As a second objection to the repeal of the surcharge it is urged that the roads badly need the money. Whether they do or not, a discrimination against one class of traffic is hardly the proper way to get it.

BILLS AND JOINT RESOLUTION SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and a joint resolution of the following titles, when the Speaker signed the same:

H. R. 4357. An act for the relief of William Childers;

H. R. 6492. An act to authorize the Secretary of War to donate to the city of Charleston, S. C., a certain bronze cannon; and

H. J. Res. 177. An act authorizing the erection of a flagstaff at Fort Sumter, Charleston, S. C., and for other purposes.

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 3594. An act to extend the period of restriction in lands of certain members of the Five Civilized Tribes, and for other purposes.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 6 minutes p. m.) the House adjourned until to-morrow, Tuesday, May 8, 1928, at 12 o'clock noon.

## COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Tuesday, May 8, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON FOREIGN AFFAIRS

(10.30 a. m.)

To ascertain if the State Department is adequately equipped in both its foreign and domestic services (H. Res. 87).

To provide for the reorganization of the Department of State (H. R. 13179).

COMMITTEE ON THE DISTRICT OF COLUMBIA

(10.30 a. m.)

To authorize the merger of street-railway corporations operating in the District of Columbia (H. J. Res. 276).

COMMITTEE ON AGRICULTURE

(10 a. m.)

For the prevention and removal of obstructions and burdens upon interstate commerce in cotton by regulating transactions on cotton-futures exchanges (H. R. 11017).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To authorize the Secretary of the Navy to proceed with the construction of certain public works (H. R. 13319).

COMMITTEE ON RIVERS AND HARBORS

(10 a. m.)

To consider a report from the Chief of the Army Engineers on the proposal to deepen the Great Lakes channel.

COMMITTEE ON THE JUDICIARY

(10 a. m.)

Prescribing the procedure for forfeiture of vessels and vehicles under the customs navigation and internal revenue laws (H. R. 12730).

COMMITTEE ON BANKING AND CURRENCY

(10.30 a. m.)

To amend the act approved December 23, 1913, known as the Federal reserve act; to define certain policies toward which the powers of the Federal reserve system shall be directed; to further promote the maintenance of a stable gold standard; to promote the stability of commerce, industry, agriculture, and employment; to assist in realizing a more stable purchasing power of the dollar (H. R. 11806).

## EXECUTIVE COMMUNICATIONS, ETC.

488. Under clause 2 of Rule XXIV, a letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Norfolk Harbor, Va., with a view to deepening, widening, and extending the channel in the Western Branch of Elizabeth River (H. Doc. No. 265), was taken from the Speaker's table and referred to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. GRAHAM: Committee on the Judiciary. H. R. 170. A bill to provide for the care of certain insane citizens of the Territory of Alaska; with amendment (Rept. No. 1540). Referred to the Committee of the Whole House on the state of the Union.

Mr. GRAHAM: Committee on the Judiciary. H. R. 9778. A bill to amend an act entitled "An act providing for the revision and printing of the index to the Federal Statutes," approved March 3, 1927; without amendment (Rept. No. 1541). Referred to the Committee of the Whole House on the state of the Union.

Mr. GRAHAM: Committee on the Judiciary. H. R. 7200. A bill to amend section 321 of the Penal Code; with amendment (Rept. No. 1542). Referred to the House Calendar.

Mr. WRIGHT: Committee on Military Affairs. H. R. 9961. A bill to equalize the rank of officers in positions of great responsibility in the Army and Navy; with amendment (Rept. No. 1547). Referred to the Committee of the Whole House on the state of the Union.

Mr. WRIGHT: Committee on Military Affairs. H. R. 12449. A bill to define the terms "child" and "children" as used in the acts of May 18, 1920, and June 10, 1922; with amendment (Rept. No. 1548). Referred to the Committee of the Whole House on the state of the Union.

Mr. McSWAIN: Committee on Military Affairs. H. R. 12689. A bill authorizing the sale of surplus War Department real property at Jeffersonville, Ind.; with amendment (Rept. No. 1549). Referred to the Committee of the Whole House on the state of the Union.

Mr. WRIGHT: Committee on Military Affairs. S. 1829. An act to authorize the collection, in monthly installments, of indebtedness due the United States from enlisted men, and for other purposes; without amendment (Rept. No. 1550). Referred to the Committee of the Whole House on the state of the Union.

Mr. WRIGHT: Committee on Military Affairs. S. 1828. An act to amend the second paragraph of section 5 of the national defense act, as amended by the act of September 22, 1922, by adding thereto a provision that will authorize the names of certain graduates of the General Service Schools and of the Army War College, not at present eligible for selection to the General Staff Corps eligible list, to be added to that list; without amendment (Rept. No. 1551). Referred to the House Calendar.

Mr. WRIGHT: Committee on Military Affairs. H. R. 12352. A bill to require certain contracts entered into by the Secretary of War, or by officers authorized by him to make them, to be in writing, and for other purposes; without amendment (Rept. No. 1552). Referred to the House Calendar.

Mr. SNELL: Committee on Rules. H. Res. 188. A resolution providing for the consideration of S. 777, an act making eligible for retirement, under certain conditions, officers and former officers of the Army, Navy, and Marine Corps of the United States, other than officers of the Regular Army, Navy, or Marine Corps, who incurred physical disability in line of duty while in the service of the United States during the World War; without amendment (Rept. No. 1554). Referred to the House Calendar.

Mr. GLYNN: Committee on Military Affairs. H. R. 10363. A bill to provide for the construction or purchase of two L boats for the War Department; without amendment (Rept. No. 1556). Referred to the Committee of the Whole House on the state of the Union.

Mr. GLYNN: Committee on Military Affairs. H. R. 10364. A bill to provide for the construction or purchase of two motor mine yawls for the War Department; without amendment (Rept. No. 1557). Referred to the Committee of the Whole House on the state of the Union.

Mr. FURLOW: Committee on Military Affairs. H. R. 10365. A bill to provide for the construction or purchase of one heavy seagoing Air Corps retriever for the War Department; without amendment (Rept. No. 1558). Referred to the Committee of the Whole House on the state of the Union.

Mr. SPEAKS: Committee on Military Affairs. S. 4216. An act to authorize the adjustment and settlement of claims for armory drill pay; without amendment (Rept. No. 1559). Referred to the Committee of the Whole House on the state of the Union.

Mr. BRITTEN: Committee on Naval Affairs. H. R. 12032. A bill to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended; with amendment (Rept. No. 1560). Referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. BECK of Wisconsin: Committee on Claims. H. R. 11153. A bill for the relief of Harry C. Tasker; with amendment (Rept. No. 1543). Referred to the Committee of the Whole House.

Mrs. LANGLEY: Committee on Claims. H. R. 12021. A bill for the relief of Samuel S. Michaelson; without amendment (Rept. No. 1544). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. H. R. 12809. A bill to permit the United States to be made a party defendant in a certain case; with amendment (Rept. No. 1545). Referred to the Committee of the Whole House.

Mr. WARE: Committee on Claims. S. 1122. An act for the relief of S. Davidson & Sons; with amendment (Rept. No. 1546). Referred to the Committee of the Whole House.

Mr. WRIGHT: Committee on Military Affairs. H. R. 8341. A bill to amend the national defense act, approved June 3, 1916, as amended; with amendment (Rept. No. 1553). Referred to the Committee of the Whole House.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. GAMBRILL: A bill (H. R. 13590) creating a commission to investigate and report on the relocation of the food-distributing district of the District of Columbia to be moved to make way for the public-building program, and for other purposes; to the Committee on the District of Columbia.

By Mr. KEARNS: A bill (H. R. 13591) authorizing the Ripley Bridge Co., its successors and assigns (or his or their heirs, legal representatives, and assigns), to construct, maintain, and operate a bridge across the Ohio River at or near Ripley, Ohio; to the Committee on Interstate and Foreign Commerce.

By Mr. HOWARD of Nebraska: A bill (H. R. 13592) authorizing H. A. Rinder, his successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Niobrara, Nebr.; to the Committee on Interstate and Foreign Commerce.

By Mr. REID of Illinois: A bill (H. R. 13593) granting the consent of Congress to the city of Dundee, State of Illinois, to construct, maintain, and operate a footbridge across the Fox River within the city of Dundee, State of Illinois; to the Committee on Interstate and Foreign Commerce.

By Mr. CASEY: A bill (H. R. 13594) to provide for the cooperation of the Federal Government in the sesquicentennial of the Battle of Wyoming; to the Committee on the Library.

By Mr. COCHRAN of Missouri: A bill (H. R. 13595) to punish the sending through the mails of certain threatening communications; to the Committee on the Post Office and Post Roads.

By Mr. HOPE: A bill (H. R. 13596) to amend the packers and stockyards act, 1921; to the Committee on Agriculture.

By Mr. UPDIKE: A bill (H. R. 13597) to prohibit the making of photographs, sketches, or maps of vital military and naval defensive installations and equipment, and for other purposes; to the Committee on Military Affairs.

By Mr. SMITH: Joint resolution (H. J. Res. 298) providing for the delivery of water on the Okanogan irrigation project, Washington, during the season of 1928; to the Committee on Irrigation and Reclamation.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CARTER: A bill (H. R. 13598) for the relief of Robert W. Miller; to the Committee on Claims.

By Mr. CRAIL: A bill (H. R. 13599) granting a pension to Rosanna Monroe; to the Committee on Invalid Pensions.

By Mr. DOUGLAS of Arizona: A bill (H. R. 13600) for the relief of C. R. Olberg; to the Committee on Indian Affairs.

By Mr. FULMER: A bill (H. R. 13601) for the relief of Herbert Warren McCollum; to the Committee on Claims.

By Mr. GARDNER of Indiana: A bill (H. R. 13602) granting a pension to Sarah E. McHobson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13603) granting a pension to Alfred McClellan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13604) granting a pension to Emily C. Colvin; to the Committee on Invalid Pensions.

By Mr. WILLIAM E. HULL: A bill (H. R. 13605) granting a pension to Cora Nevil; to the Committee on Invalid Pensions.

By Mr. LEAVITT: A bill (H. R. 13606) for the relief of Russell White Bear; to the Committee on Indian Affairs.

By Mr. McSWEENEY: A bill (H. R. 13607) granting a pension to Regina W. Smith; to the Committee on Invalid Pensions.

By Mr. MOORE of Virginia: A bill (H. R. 13608) for the relief of the estate of Moses M. Bane; to the Committee on Claims.

By Mr. SHREVE: A bill (H. R. 13609) granting a pension to Catherine Peer; to the Committee on Invalid Pensions.

By Mr. SUMMERS of Washington: A bill (H. R. 13610) granting a pension to John T. Truax; to the Committee on Invalid Pensions.

By Mr. TINKHAM: A bill (H. R. 13611) for the relief of Peter Joseph Sliney; to the Committee on Naval Affairs.

By Mr. UNDERWOOD: A bill (H. R. 13612) granting a pension to Versa Shoemaker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13613) granting a pension to Phebie Hamilton; to the Committee on Invalid Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7446. By Mr. BARBOUR: Resolution of State Council of California, Junior Order United American Mechanics, opposing the entry of members of the Facisti to the United States, etc.; to the Committee on Immigration and Naturalization.

7447. By Mr. KINDRED: Petition of Senator William M. Calder, in behalf of a number of Army officers who served with distinction in World War and residing in New York, for the early and favorable passage by the House of Representatives of House bill 13509, the Wainwright-McSwain bill; to the Committee on Military Affairs.

7448. By Mr. MAJOR of Missouri: Petition of citizens of Springfield, Mo., urging the passage of legislation providing increased pensions for Civil War soldiers and their dependents; to the Committee on Invalid Pensions.

7449. By Mr. MAPES: Petition of 30 retail merchants of Grand Rapids, Mich., recommending the passage of House bill 11; to the Committee on Interstate and Foreign Commerce.

7450. By Mr. CARTER: Petition of Oscar Rose and many others of Oakland, Calif., urging an amendment to the Welch bill granting increased wages to the lesser-paid Government employees; to the Committee on the Civil Service.

7451. By Mr. O'CONNELL: Petition of Chamber of Commerce of the State of New York, opposing the passage of the Norris bill (S. 3151) to limit the jurisdiction of district courts of the United States by amending the Judicial Code so that the Federal courts would not have jurisdiction in "diversity of citizenship" cases; to the Committee on the Judiciary.

7452. Also, petition of the Chamber of Commerce of the State of New York, opposing the enactment into law of the Swing-Johnson bill (S. 592 and H. R. 5773) or similar measures which shall commit the Government to the operation of hydroelectric plants and other business projects usually conducted by private enterprises; to the Committee on Irrigation and Reclamation.

7453. Also, petition of the Chamber of Commerce of the State of New York, indorsing and commends the policy being followed by the President to limit the cost of flood control to reasonable and definite amounts, and to require the States and other local authorities to supply all land and assume all pecuniary responsibility for damages that may result from the execution of the project; to the Committee on Flood Control.

7454. Also, petition of Chamber of Commerce of the State of New York favoring the passage of Senate bill 744, as amended by the House Committee on the Merchant Marine and Fisheries, but strongly indorses the recommendations herein suggested by the committee on the harbor and shipping, believing such modifications would greatly promote the purposes of the measure in developing the American merchant marine; to the Committee on the Merchant Marine and Fisheries.

7455. Also, petition of the National Federation of Post Office Clerks, Local 1022, Jamaica, N. Y., favoring the passage of House bill 10422, a bill to give day-for-day credft to employees of the Post Office Department for the time served in the Army, Navy, or Marine Corps of the United States during any war, expedition, or military occupation; to the Committee on the Post Office and Post Roads.

7456. Also, petition of A. J. Ralph, Port Washington, Long Island, N. Y., favoring the passage of the Tyson bill (S. 777) in the form it passed the Senate; to the Committee on World War Veterans' Legislation.

7457. Also, petition of the Ithaca Gun Factory, Ithaca, N. Y., favoring the passage of the Tyson-Fitzgerald bill (S. 777) without amendment; to the Committee on World War Veterans' Legislation.

7458. By Mr. SHREVE: Petition of numerous citizens of Union City, Pa., and vicinity, for the enactment of Civil War pension bill; to the Committee on Invalid Pensions.

H. 46-79
